

One Planet 361

Chapter 361

361: Big Move! Capture Modo alive! Harvest the commander class warship!

There were dozens of people in the Island Masters residence.

They were locked up in separate rooms and interrogated by the Great Desolate Army.

It didn't take long.

The Great Desolate Army mapped the general situation about this place out.

This is a sea island planet.

Lu Sun summarized the interrogation confession and said, The ocean covers the vast majority of the area, and on top of the ocean, there are islands.

Most of the people in this world live on the islands!

There are also islands of different sizes.

This Xiangdao we are on now is the smallest kind of island among them.

And there are rulers in this world. The most powerful is the Ocean Alliance. Which is an alliance composed of many forces!

However

The structure is rather loose.

Under the Ocean Alliance, there is a naval fleet, distributed throughout the ocean, ruling this planet!

Lu Sun swept the crowd and said, The commander of the population here, Modo, is a naval admiral.

He is in charge of a huge naval fleet, and he manages the surrounding waters!

They say that he has one hand in the sky!

Is this person a transcendent?

Han Zuhu asked.

Almost.

Lu Sun nodded.

At this time, a large group of the Great Desolate Army had already arrived at the Island Masters residence.

The first group of the Great Desolate Army that came in through the passageway numbered fifty thousand people.

The rest stayed near the passageway.

The entire Great Desolate Army occupied the Island Master Mansion.

And on the periphery of the Island Master Mansion. The other buildings also did not have the slightest resistance. Especially the only bay on this island.

Only a few dozen people were guarding it.

The Great Desolate Army took it with little effort.

But there was no great fanfare.

Everything seemed very calm.

The people here don't know about Grand Commander Leif, but they knew about Admiral Commander Modo.

Lu Sun said in a deep voice: And

We can't hide things for long.

According to the results of the interrogation, the merchant ships outside will come over every day to deliver spices.

Once they find out that something is wrong, they will definitely report the situation to Modo!

The major problem we are facing now is

Lu Sun said somewhat helplessly, There are no ships.

All of them nodded slightly.

In this island world, it would be difficult to travel without ships!

The ships that the Great Desolate Army naturally had were not very advanced ones.

So

Lu Sun scanned the individuals in the room one by one.

Here were all the Elite of the Great Desolate Army.

A moment later, he said, We intend to take on this Modo Commander, and also to get information about the situation of Grand Commander Leif.

And also, it is To seize the ships under Modo.

According to what we have learned so far, he has at least one commander-class ship under his name, and it's quick!

What is Modo's strength? And how much is his naval fleet, do you know?

Zhang Liang asked.

Not sure yet.

Han Xin shook his head and said, The people here are all small people. They don't know these confidential things at all.

If you don't know all this, how do you dare to make a move?

Zhang Liang questioned.

Knowing one's self and knowing one's enemy would help us win a hundred battles.

The people here all understood that but
Time doesn't quite allow it!
There were only three days left.
Inside the house, there was a moment of silence.
Everyone knew this plan was too risky.
But.

At this time, Yan, who had been silent, suddenly spoke up.
The crowd faintly started.
Immediately after that
A hint of joy flashed in their eyes!
Yan said so.

Naturally, it resulted from Jiang Fan's hint.
This extrapolation system is actually only able to extrapolate three times.
Jiang Fan showed a somewhat helpless expression while looking at the situation of the Great Desolate Army.

This time, the promotion battle.
Jiang Fan had naturally used the deduction system.
But he didn't know what the reason was.
After three times of deduction, the system no longer had any response.
Think about it.

Jiang Fan also probably guessed the reason.
That was The same outer planet.
The system could deduce it a maximum of three times.
Jiang Fan then used this guess to ask for the deduction system.
And received an affirmative answer.

The number of projections is also limited, and it will be one more time after the upgrade? Jiang Fan raised his eyebrows slightly.
It was because of the previous outer planets conquest.
Jiang Fan had hardly used the deduction system.
Only at this time did he realize this!
It turned out that the system could still be upgraded.

But three times is enough.

Jiang Fan wasnt too worried.

The results of these three extrapolations.

Jiang Fan took the form of a brocade bag and transmitted it to Yan.

This was also the bottom line of why Yan spoke with certainty.

Since thats the case.

After receiving Yans affirmation, Han Xin spoke, Then lets set up properly how to deal with this Modo Commander?

The island that Modo is on is an hours journey away from here, but then with the speed of a commander class ship.

We cant possibly go on an active attack, so

Luring him over here is the best way!

Inducing Modo?

Zhang Liang smiled slightly, in this respect he is Old yin.

And immediately said: Isnt the obese master here has a sister who is Modos concubine?

Cant we

The others also all thought of this point.

They had come together to discuss it.

Not a moment later,a detailed plan came out!

And was quickly implemented.

In a room in the island masters house.

The obese middle-aged man had been locked up alone in a room.

And was being watched.

While covering his swollen face, the obese middle-aged mans eyes rolled.

He was thinking of a way to get out.

After a while.

The obese middle-aged man spoke out: Hey, big brother, I have a pet snail, I havent fed it water today, it will easily die if it doesnt drink water for a day, can you let me feed it water?

Pet snail.

The soldier in charge of guarding said, Where is it? Ill feed it for you.

No, no.

The obese middle-aged man immediately waved his hand and said, This snail of mine is rather timid and only recognizes me as its master, so no one else will feed it.

The warrior in charge of the guard thought for a moment and said, Well then, where is your snail? I will carry it over to you.

Its in the hall of the island masters residence. Thank you, big brother.

The obese middle-aged man said with a grateful face.

There was a glint of satisfaction in his eyes.

He, however, did not know in the slightest.

The Great Desolate Army could not understand his words.

They could communicate normally.

It was because

Outside the house, Han Xin personally carried the translation leaf.

The range of action of the translation leaf was within ten meters!

There were also those with a greater range of action.

For example, tens of meters or even hundreds of meters.

But that kind of translation leaf

The price would be a little too expensive.

The warrior in charge of the guard walked out of the house and spoke to another warrior.

Not a moment later, a huge snail was carried over.

Chapter 362

362: Big Move! Capture Modo alive! Harvest the commander class warship!

It was the size of a large bowl.

But like other snails, it crawled.

Its character was also relatively docile.

The most conspicuous was the head of the two tentacles, very long!

After seeing the big snail come in.

The obese middle-aged mans eyes flashed a trace of excitement.

He immediately picked it up.

Immediately

On the long tentacles of the big snail.

He was gently patting it rhythmically.

Though he made it look like he was petting the big snail.

The only thing that the obese middle-aged man did not know was.

Whatever he did was all noticed by Han Xin and others who were secretly watching him outside the window.

This kind of snail is a messenger snail, a unique product of this world, able to carry out the transmission of messages over long distances.

Han Xin explained to the others, This guy should use a code to send a distress message to his concubine, who is his sister.

After the interrogation of dozens of people from the island masters house.

With the interrogation methods of the Great Desolate Army.

Basically, they mapped out almost every aspect of the obese middle-aged man.

This messenger snail was even more impossible to fall.

After the obese middle-aged man finished soothing the big snail.

He was secretly pleased with himself!

And not too far from Xiangdao

-On a large island.

This island was the largest one in the nearby sea!

In the middle of the island, there was an immense castle!

The second floor of the castle.

A beautiful blonde suddenly rushed to the restaurant.

In the dining room, a stout middle-aged man in black was eating.

Seeing the blonde beauty running in.

He frowned slightly and said coldly, Whats so urgent?

Its not good. They have hijacked my brother.

The blonde beauty had a face of anxiety and uneasiness.

Your brother?

The stout middle-aged man frowned and said, What happened to him again?

Just now, my brother sent me a coded message, saying that the City Lords mansion has been taken over and he is now being held hostage.

The blonde said in a quick voice.

What kind of person did that?

The stout middle-aged man stopped eating.

I dont know.

The blonde beauty shook her head and said, My brother only dared to send me a code word without saying a word, so I guess the situation is dangerous.

Oh.

The corner of the stout middle-aged mans mouth curled up into a smile.

But he said nothing.

Instead, he continued to eat.

Taking a big bite of a steak!

My lord.

The blonde couldnt help but shout.

Theres no need to rush.

The stout middle-aged man smiled gently and said, Dare to kidnap people on Xiangdao, which is so close to me, or your brother, and

Also, let your brother send out a secret signal.

Dont you just want to lead me over there?

Ill do what you want.

The method that Han Xin and the others used to lure Modo over was not brilliant.

But it was to take advantage of Modos arrogance!

Solider!

The stout middle-aged man put down the steak in his hand, wiped his hands with a napkin, and then shouted.

My lord.

Immediately, a soldier ran in.

Inform Vice Admiral Ma to prepare well. We will go to Xiangdao today and clean up a bunch of self-important clowns.

The stout, middle-aged man smiled coldly.

There was a hint of a disdainful smirk in his eyes.

Baby, wait at home.

Modo pinched the blondes cheeks.

Get up and stride forward!

Not long after, at the mouth of this island.

A battleship was ready.

The number reached several dozen ships.

The most conspicuous of them was

At the front was a huge, tall ship hundreds of meters long!

This one!

It was a prestigious Commander-class battleship of the Ocean Alliance!

It was large, and its speed was quick!

Extremely powerful!

Only a powerful leader of the ruling party was qualified to own one!

This was also a symbol of the strength of the admiral!

Modo put on his trademark black cloak, stepped onto the deck, and swept a glance at many of his men.

A vice admiral immediately came up and said: My Lord, do you know what the enemy is on Xiangdao? Should we inform the navy headquarters?

Notify the Navy Headquarters? Is there a need for that?

Modo could not help but laugh and said, Its just some lowly pirates, or a few local middle-aged hot-blooded teenagers in Xiangdao, so theres nothing to do now. Go over and clean up!

Go, set off!

Dozens of warships at once

Vastly toward the Xiangdao sped away!

Because of the interrogation, within less than an hour.

The scouting soldiers of the Great Desolate Army that were on a hill on Xiangdao.

Already saw the figure of these warships.

Immediately, they passed the news to the temporary base camp at the island masters residence.

Modo is here.

Han Xin swept a glance at the crowd and said, Follow the original plan of action!

Everyone leads the way!

The only port on Xiangdao.

Modos fleet approached in a mighty manner.

It stopped at this port.

With no preparations at all, Modo was the first to disembark!

Other lieutenants, soldiers and so on followed.

Just like that They directly approached the island masters house in big strides.

There are three thousand people!

Han Xin and the others who were secretly observing.

In a flash, they judged the number of Modo and the navy behind them.

As the distance got closer and closer.

Modo was also seeing the soldiers of the Great Desolate Army on the stone fortress where the Island masters House was!

Dense and thick, standing in a large row.

Holding guns in their hands and aimed at Modos group.

Looking at the strange weapons of the Great Desolate Army.

Modo frowned slightly and said, These Are pirates from where again?

My lord, my subordinates cant tell either. The lieutenant beside him shook his head.

Forget it. Regardless of that, go straight on. You have ten minutes to take the Island masters house.
Modo barked an order.

Yes.

The vice admiral immediately led the order and went.

With a thousand naval soldiers.

He rushed quickly towards the stone fortress.

Bang Bang Bang

The soldiers of the Great Desolate Army on the fortress launched an attack.

Gunfire was loud!

Bullets cut through the air filled with fragrance.

They came straight at the thousand naval soldiers!

These naval soldiers were slightly stunned.

Before they could react.

The bullets already hit some of them.

After a miserable scream, they fell to the ground.

Screams after screams, constantly ringing out!

Waiting for others to react.

As many as a hundred people had already fallen!

The vice general and the others were all terrified!

How What is going on?

After seeing this scene, Modo in the back was slightly shocked!

He totally did not expect such a thing to happen.

The navy under his hands fell without even touching the enemys face more than a hundred people?
He felt that something was wrong in his heart.
He just wanted the vice admiral and others to return.
And heard a rumbling sound.
Looking back, he saw that from the two sides of the field.
Between a spice tree.
Drove out a steel beast!
These steel beasts were walking quickly.
Lined up in a zigzag.
Completely disconnecting the road from the port and this side!
The sense of discomfort in Modos heart deepened!
The sudden burst
Suddenly!
A rush of sound from all sides!

Chapter 363

363: Big Move! Capture Modo alive! Harvest the commander class warship!

Modo was just about to observe.
And saw a row of soldiers not far in front of him were covered with wheat.
All fell down!
The Great Desolation Army used the continuous speed gun.
At the same time, to the left, to the right, to the back!
From three directions.
The unidentified sound of burst, burst, burst came from all three directions.
Followed by
-The sound of screaming and falling of each navy soldier!
In this sudden blow.
Just less than a minute, the three thousand naval soldiers who boarded the island.
Had fallen more than half!
This area in front of the island masters residence was completely flat land.
There was almost no cover at all.
Except for a wide road in the middle.
Other places.

There were many fields planted with spice trees!
Three thousand naval soldiers were like targets, being quickly harvested!
At this time, The rest of the naval soldiers reacted.
One by one, they hurriedly got down.
This was the way to reduce the losses.
Some scared soldiers.
Even more jumped into the stinking ditch on both sides of the road!
To avoid the frenzied fire of the speed gun.
Although it was quite humiliating. But it was very effective.
At least they saved their life!
Modo was stunned.
Although there was no gutter.
But he also followed them down.
The uneasiness of his heart still did not dissipate.
He subconsciously looked up.
And suddenly, in the middle of the sky, he saw a small black dot.
These small black dots quickly become larger.
Then
quickly fell down.
Boom! Boom! Boom!

Cannonballs fell in the crowd of naval soldiers.
It emitted a deafening loud sound.
It directly cracked and blew hundreds of soldiers away!
The latest type of cannons of the Great Desolate Army opened up!
The cannonballs fell completely non-stop.
The open space was in front of the island masters residence.
Plowed through the entire area!
Boom boom boom
-And from time to time,
Only the sound of cannon fire rang out.
It drowned even the sound of the speed gun out.

Three minutes later, the artillery fire slowly stopped.

When the smoke cleared.

The crowd of the Great Desolate Army saw

In this area of land.

Roads, fields, ditches, stones, spice trees, etc.

All blown up!

No place was intact.

Especially more than a thousand naval soldiers.

They were killed and wounded badly.

There were broken limbs and legs everywhere.

They did not spare even those hiding in the gutter!

At the same time, at the mouth of the bay.

Five special operations squads quietly lurked nearby.

They originally hid inside the other ships in the bays mouth.

After Modo led the main navy ashore, they moved.

With no twists and turns, they quickly approached the largest size of the commander class battleship.

The soldiers were on guard.

They saw the special forces, but were not much alert.

One soldier opened his mouth to ask questions.

Directly shot by the special warrior with a round of bullets and sent to the sky.

Special warfare squad quickly boarded the ship.

The guards on the battleship were taken out or subdued one by one.

Most of the naval soldiers here use swords and knives, and they interspersed their weapons with a special sea stone, which is very restraining for ability fruiters.

Han Xin was explaining to the crowd, they mainly built these naval forces to deal with Ability Fruiters!

Against ordinary people.

Of course, it was useless.

Especially the battle-hardened, heavily armed special operations team!

A few bullets went down, He fell to the ground and did not move.

Not a moment later, the first team of special operations easily occupied the battleship of the commander class.

Other special warfare squads moved at the same time.

Their target was the other battleships behind.

It was also effortless.

These battleships did not have orders from Modo.

So they didnt even escape.

They watched helplessly as the special forces team rushed up.

Special Warfare Team 1 completed its mission.

Special Warfare Team 2 completes the mission.

Special warfare team 3 completed the mission.

With a loud report.

Twenty-five battleships were all under the control of The Great Desolate Army.

Can you start the Commander-class battleships?

Han Xin asked.

No problem, its not too different from our ships opening. Weve mastered the method.

Good.

Han Xin nodded slightly.

Then he turned toward Yan and said, Your Highness, its time to implement the second step of the plan.

Ok.

Yan stood up.

Bringing the top brass of the Great Desolate Army, straight to the commander class warship.

This Xiangdao was only a temporary place.

And in the open space in front of the island masters residence.

Looking around at the extremely tragic death of the soldiers under his command.

Modo was shocked and angry!

The original three thousand soldiers.

Now

They left only less than five hundred people alive.

Among these five hundred people, most of them were wounded.

Ah!

Modo stood up.

He let out a miserable scream from the sky!

He hadn't finished screaming.

He heard a poof sound.

He looked down and saw his own chest.

An additional bullet hole!

But the bullet was about to break into the torso in a moment.

A layer of black material suddenly appeared on the surface of the body!

The armor-piercing bullet was blocked abruptly!

Hmm?

Seeing this scene

Han Xin frowned slightly, said: This is the ability of this Modo?

Seeing that large armor-piercing bullets were actually ineffective against this Modo.

Han Xin immediately ordered.

Direct coverage strikes!

Mutant burst

The sound of the rapid-fire gun rang out again!

Boom boom boom!

A single shell also fell!

Focused on Modo.

But nothing happened to Modo.

But the surrounding soldiers were miserable.

There were only a few hundred soldiers left.

A round of artillery fire came down.

Another half dead and wounded!

In the end, there were not even a hundred survivors.

Modo's eyes were wide with anger.

But he knew

The most important thing to do was not to take revenge, but Run for your life first!

Modo immediately fled towards the bay.

The black substance on his body was constantly resisting the incoming armor-piercing bullets!

And the shells were falling from time to time!

Bang! Bang! Bang!

The biggest threat was the more accurate large armor-piercing shells!

A few rounds went down.

The black substance on Modos body became much darker directly!

According to the soldiers under Modo on board, Modo used to take an obsidian fruit, able to fight in battle, the body surface covered with a layer of obsidian, a very strong defense.

The radio came with a report from the special operations team.

Continue covering the strike. I don't believe his defense could go on indefinitely.

Han Xin ordered.

Cannon fire and bullets swept wildly to deal with Modo!

The Great Desolate Army didn't dare to be careless at all.

It was straightforward to use hundreds of continuous speed guns and heavy rifles!

Everyone expected.

The distance between the island master's house and the mouth of the bay was not far.

Less than four kilometers.

But this four kilometers of travel.

Modo did not know how much bombardment Modo received!

He hadn't walked a mile yet.

The black matter covered on the body surface was almost the same to be all dark.

Poof!

An armor-piercing bullet broke through the body's surface.

It hit Modos torso!

Modo grunted in pain.

The body stopped in place.

Let's go, capture Modo alive.

Le Yi personally led the team.

He quickly stepped forward, surrounded by the bullets that were shot heavily!

And captured him directly alive!!!

Chapter 364: A shocking scene! A roar from the Sky!

After being heavily surrounded by hundreds of Great Desolate Army warriors!

Facing that black muzzle of a gun.

Modo felt like dreaming!

He was a naval commander.

Ruling a side, a great reputation.

This area of the sea was the general existence of the great devil.

Now actually

To be captured?!

From dinner time, he had a proud spirit.

He didn't care at all.

Up to now, he was wounded and surrounded, and the soldiers under his commands were almost dead.

It's only been about an hour!

But he felt like a year had passed.

Feeling the injuries on his body.

Modo's face was complicated.

Although it was the ability's fruit.

The physique was much stronger than ordinary people.

But being hit by a big armor-piercing bullet! That was no good to suffer, either.

"What the hell are you guys Who are you?"

Modo glanced at the Great Desolate Army warriors and asked in a cold voice.

Even with Modo's years of insight.

He did not see exactly the origin of these soldiers with strange weapons and camouflage uniforms?

They suddenly appeared on Xiangdao.

This was completely incredible.

Like appearing out of nowhere.

Thinking along this line of thought, Modo would actually find the truth of the matter.

But

Who would have thought that the Great Desolate Army really appeared out of thin air?

Not to mention the battle power of the Great Desolate Army.

This black hole weapon in their hands.

Modo had already discovered it before.

But he did not think at all.

He did not expect

The muzzle of the gun was of such a small caliber.

Can actually be able to fire such a powerful projectile!

Even

Even the obsidian on his body could break through!

Now the weapons of the Great Desolate Army had also been upgraded.

They upgraded the speed gun from the original four to five!

More powerful!

The ordinary soldier's sidearm was also upgraded from the original submachine gun to an assault rifle!

Faster firing speed with higher accuracy!

The range was also longer!

With the addition of Star Meteorite Iron and Vibranium.

Xia kingdom's assault rifle range could reach over 500 meters!

But the main role was still

To use it in short-arms combat.

It was still very effective with the naval soldiers here.

Against the ability fruiter, they used cannons and speed guns!

And heavy rifle!

Although no major changes!

But in these past few years, there was a lot of refinement!

"Cut the crap, put your hands up and don't resist."

Yue Yi drank.

Modo's eyes narrowed slightly.

His heart was incomparably angry!

When had he ever suffered such humiliation?

But one had to bow down under the roof.

In the end, one could only

Obediently raised his hands.

Allowed the Great Desolate Army to put on Sea stone handcuffs!

These sea stone handcuffs were the unique product of this world.

That could effectively deal with the ability fruit person.

Once handcuffed.

Even if you are strong.

Also, he could not use any ability!

“This world’s navy is set up to deal with a lawless ability fruiter, they themselves invented a lot of means to deal with ability fruiters, this sea stone handcuffs is just one of them.”

After taking Modo to that commander class battleship, Le Yi said, “We can make full use of these means.”

“Let’s do the interrogation first. Who will do it?”

Han Xin smiled and said.

“I’ll do it.”

Xu Tiande was the first to step forward.

As the oldest and most senior general in the Great Desolate Army.

Xu Tiande hadn’t been able to take credit for anything.

Of course.

He also knew that.

This was because he was old, and the people were afraid of any damage to him.

Han Xin and the others rarely objected.

Xu Tiande was still very good at this kind of interrogation.

It was not just Modo.

At the same time, other captured naval soldiers were also being interrogated one by one.

Modo handcuffed by sea stone, sitting in a chair with a sullen face..

-Silence!

“Our target is not you.”

Xu Tiande looked at Modo and said, “The reason we are dealing with you is that we just want to know something from your mouth.”

Modo sneered. He didn’t believe Xu Tiande’s words at all.

Putting up such a big battle, they had taken out thousands of soldiers under his command.

But he said the target was not him?

Even though they said that

Even a three-year-old child wouldn’t believe it.

“I’m just asking you some basic questions. If you don’t answer, the people under your command will surely know, too.”

Xu Tiande continued, “Your main camp. How many troops are left?”

Hearing that, Modo's face became a little strange.

Looking at Xu Tiande, he said, "You don't even know this?"

"I came to ask you, because I don't know."

"You" Modo frowned slightly.

A trace of incredulity flashed in his eyes!

Strength of the opponent. How could they know nothing about the navy?!

"Is it possible, the goal of these people...is it really not me?" Modo thought to himself.

"The strength of these people completely crushed me. The target should not be me.

If I cooperate well, there might be a chance to escape, at least until the rescue of the navy."

His eyes flickered.

Modo spoke: "There is not much left, I have brought the main force."

"Since you do not know, I can give you a little information."

"Although they are all commanders, they are also strong and weak."

"Although I am famous in this sea area, I am only a small commander in the entire navy."

"Under the hands of"

"In charge of but 10,000 naval forces and a commander-class battleship."

"There are more powerful commanders above!"

"Some commanders have 30,000 to 50,000 soldiers under their hands and two or three commander-class battleships. I can't even be compared to them!"

"And such a commander-in-chief."

"There are very many inside the navy, distributed all over the world!"

"Close to my side, there is such an existence!"

There was a slight warning in Modo's tone.

After glancing at Xu Tiande, whose expression changed little, he continued: "And above the commander-in-chief, there is an even more powerful existence, which is the Grand Commander."

"The majestic side."

"Within the Navy, we only obey the Grand Commander's orders!"

“The grand commanders are each incomparably powerful and intimidate a vast sea area.”

“The reason our navy deters the entire world is that of these dozens of Grand Commanders!”

“Grand Commanders?”

Xu Tiande was shocked.

Finally He heard what he wanted to hear.

“Then you should know the name of Grand Commander Leif, right?”

Xu Tiande asked.

“Grand Commander Leif!?”

Modo was slightly taken aback.

Then he looked at Xu Tiande for a few moments.

Suddenly, he laughed.

“Haha, don’t tell me that your target is Grand Commander Leif, right?” A hint of disdain flashed in Modo’s eyes, and he said: “Although your weapons are powerful, for Grand Commander Leif, it would be nothing more than a tickle!”

“Grand Commander Leif is one of the many Grand Commanders”

“One of the most powerful ones!”

“Even if you look at the entire world’s strongest people, He is ranked at the top.”

Chapter 365

365: A shocking scene! A roar from the Sky!

No one dares to provoke him!

Where is this Grand Commander Leif located? Xu Tiande asked.

Its not too far from our side, and we can arrive in less than half a day by a Commander-class battleship. Modo said.

Then he looked at Xu Tiande and added: But I advise you to

Its better not to seek your own death.

Modos real meaning was not to advise Xu Tiande.

Rather, he was using the method of provocation.

Let these people look for trouble with Leif.

He could then find a chance to get out!

It was hard for Xu Tiande not to notice Modos intention.

But he did not bother to pay attention.

He asked a few more questions and got all the important information about Grand Commander Leif.

After finishing asking, Xu Tiande got up and left.

He hurriedly came to another spacious room.

Inside this room, Han Xin, Le Yi, Guigu Zi, and others were all gathered together.

Look at the information about Commander Leif. Xu Tiande put the results of the interrogation on the table.

Here are also some results of the interrogation of Modos men. Everyone should take a good look Lu Sun also put down a pile of papers.

The people quickly compared them.

In the end, they all nodded their heads.

None of them are lying. Han Xin said, Next, its time to make a targeted plan for this Grand Commander Leif!

According to the results of the interrogation, this commander Leif is always 3on Leif Island. Lu Sun said, Leif Island is a very large island, and it was not called this name originally.

They changed the name only after Leif moved in.

According to the specifications of the navy here.

The Grand Commander usually leads about 100,000 troops, and this Leif

As a few of the most powerful of the Grand Commander, there must be more than that

We can make a preliminary estimate of 150,000 or more!

But the number of these soldiers is not the key!

The key is

Leif still has a group of powerful ability fruiters under his command.

There are some special abilities that are very troublesome for our weapons to deal with!

All of them nodded their heads.

Just like Modo.

There are other abilities.

Then

Im afraid it would take more time and effort to capture.

And the most troublesome thing is still Leif himself!

Our conventional weapons, Im afraid have little effect on him!

Lu Sun said in a deep voice.

Lets take it one step at a time. Han Xin replied, Follow the two two tips given by Her Royal Highness, proceed with the next plan.

That means going to Prisoner Island and finding the two ability fruiters on the pouch.

One is Wang Lao, and the other is Wu Kongkong!

These were the two names given by the deduction system.

If you want this mission to succeed, then

It was necessary to get the help of these two people!

Prisoner Island?

Xu Tiandes face was slightly gloomy as he said, According to the interrogation, I just did.

That Commander Modo isnt very familiar with this place either.

Just know that it is a very scary place!

As the name implies, its an island dedicated to prisoners!

But the ones held inside

All of them are ability fruiters!

One can imagine such a place. The guard force must be very strong!

A strong attack is not the best policy.

Lets see the situation first. If it really doesnt work, then lets use the second strategy.

Han Xin said, Lets decide the first step.

Everyone, go have a meal first and take a break.

Move after two hours!

People were iron, and their food was steel.

Every one of the Great Desolate Army was an ordinary person.

They still must eat and rest normally.

But in these two small hours, others could not rest.

They were busy doing the preparations.

Putting heavy weapons on that commander-class battleship!

Two hours later, the candidates for the prisoner island were also decided.

Lu Sun and Le Yi, who were good at water warfare, led the team.

Ghost buster himself was in charge!

Because the Commander-class battleship could only carry a maximum of three thousand people at a time.

So the other Great Desolate Army could take the rest of the ships.

And followed far behind!

As for Han Xin and Yan.

They stayed in Xiangdao.

Just in case!

According to the prediction of the Great Desolate Army.

If everything goes well, it would not delay too much time.

This time the trip to the prisoner island.

20,000 Great Desolate Army took a dozen battleships.

The number was not much.

But now the number of the Great Desolate Army was not considered critical.

The heavy weapons carried on the ships were the elements.

These guys are actually going to Prisoner Island?

Seeing the direction the battleship was sailing.

The imprisoned Modo quickly guessed the destination!

He could not help but be a little surprised!

Although Prisoner Island is not as scary as Leif Island, its not much worse. Are these guys gaining impatience?

Modo was a little shocked and a little excited while thinking.

But its good. When these guys are beaten to death, I can also escape.

The commander-class battleship opened the way in front.

Dozens of other battleships followed behind!

After about three hours.

-A not so big, but a very peculiar-looking island.

Appeared in front of the crowd.

The entire shape of this island looked very much like a skeleton!

The prisoner island has arrived.

The spirit of the Great Desolate Army crowd lifted up.

From the results of the interrogation.

The Great Desolate Army was also aware.

This skull was The famous symbol of the prisoner island!

Outside people were also, therefore, called the prisoner island as The island of Death.

It was said that all the prisoners who went in.

No one had ever escaped!

Approaching the island, The Great Desolate Army did not hide.

Instead, they made a big fanfare.

And immediately attracted the attention of the prisoner island!

Several battleships sailed from the mouth of the bay.

Greeted up.

A battleship approached the foremost commander class battleship.

On the deck stood a man who looked like a vice admiral.

Looking this way, he bellowed, Which navy is it?

Boom!

A cannonball flew out.

It landed on this battleship.

It exploded directly!

And it blew a big hole out!

It was the response to this vice admiral.

Enemy attack, enemy attack

This vice admiral was a little shocked, but he quickly reacted.

Immediately shouted.

Quickly!

Several battleships behind them responded.

An alarm was sounded!

The prisoner island behind the mouth of the bay was wide open!

A battleship quickly moved out!

The frontrunners were actually two Commander-class battleships!

Flying to the side!

The first reaction to being attacked by the enemy.

The prisoner island was actually not retreating.

Instead

Active counterattack!

It also shows its strength and confidence!

Hahahaha, these guys are crazy, and they dare to actively attack the Prisoner Island fleet at sea?

Seeing this scene, Modo laughed out loud in excitement.

The Prisoner Island has five Commander-class battleships, and hundreds of other battleships. Are these guys crazy?

Modo was shocked and overjoyed!

Chapter 366

366: A shocking scene! A roar from the Sky!

He knew the situation on the side of the Great Desolate Army very well.

The ones that were on board were all the battleships that originally belonged to him.

There was only one commander-class battleship.

The other battleships were also mediocre.

At least not compared to the prisoner island side!

The cannon fire of the Great Desolate Army was constant!

Above the sea.

The most powerful was still the cannon!

At least the range was long!

Even with a speed gun this time, it would be difficult to be useful.

But what made Modo puzzled was.

After a round of shelling, after sinking a battleship off the prisoner island.

The Great Desolate Army quickly retreated backwards.

Seemed to have been prepared.

The withdrawal was very decisive.

Also quick!

The two Commander-class battleships from the bay behind them couldn't catch up!

Don't chase after them. Come back, we've fallen for their ploy.

There was a messenger snail on a battleship.

A man's low voice came.

These battleships did not continue to chase.

They could only return to the mouth of the bay one after another!

What do these guys want? Modo was very puzzled, provoked the prisoner island fleet for a while, and then Retreat!

Crazy, right?

The crowd of the Great Desolate Army on the battleship that managed to escape.

Seeing that the Prisoner Island side did not come after them.

They all breathed a slight sigh of relief.

As expected.

Le Yi said with emotion, This Prisoner Islands Commander Ike is more cautious, just like the interrogation results!

The Great Desolate Army was not careless.

Because, according to the interrogation results, they knew the character of the Prisoner Islands commander in advance. They set such a plan.

And on the other side.

A high platform of the Prisoner Island.

A middle-aged commander with a huge body was with a group of men.

Watching the situation of the sea not far away.

When he saw the fleet return as ordered.

He was slightly relieved.

This middle-aged commander was Ike commander!

Because of the cautious nature, the Navy sent to the prisoner island.

Guarding this island.

Over twenty years down.

No accidents!

Commander is wise. These guys were probably trying to get rid of the tiger and leave the mountain, but fortunately, they were seen by the commander.

A deputy general tried to flatten the commander.

Ike had no expression on his face.

But he was still a little happy.

In the past, he did not feel like this.

But staying in such a boring place all year round.

Especially the conscientiousness guards for decades.

The Navy Headquarters had praised him several times.

His heart was also a little fluttered.

He felt that they do have outstanding ability!

He was waiting for a few vice admirals who went out to the battleship to return.

Ike immediately asked: What is the origin of those fleets? How dare they attack our prisoner island?

Not very clear.

One of the lieutenant generals, Looking at the shape of their ships, they are obviously exactly the same as the naval ships, even

There is also a commander class battleship!

Could it be another navy?

Ike frowned slightly and said, But what navy near here dares to attack us?

Its unlikely.

A vice admiral spoke up, I think it should be some kind of pirate group, pretending to be a navy, to raid us.

That should be the case.

Ike nodded and said, These pirates have been getting more and more restless lately.

There was nothing strange about Ike.

On the prison island, all were energy fruiters.

Many of them were originally pirates.

Previously, there were often pirate groups trying to hijack the prison to rescue their accomplices!

But all of them were the end of their own strength.

One by one, they were repelled by Ike, defeated!

This pirate group has a powerful person.

The lieutenant who was dealing with the side of the Great Desolate Army in the front said, They can fire large cannonballs, and these cannons will also explode. They are not small in power!

And

It could actually fire continuously.

They blew one of our battleships up.

I saw it too.

Ike sneered and said, It should be some kind of ability fruiteer who is not weak in strength.

Then what do we do? Should we report to the navy headquarters?

This vice admiral asked.

Report?

Ike immediately glared at this vice admiral.

This No way?

Reporting little things like this.

Wouldnt it be saying that Ike was incompetent?

If it leaves a bad impression on the top

That would be bad with Ikes credentials!

Just continue to do so for a few years.

After Thirty years, they could transfer you to the Navy headquarters!

Maybe

In the future could also become a great commander.

Do not bother with them. Close the mouth of the bay and forbid any ships to enter and leave the last few days!

Ike decisively ordered.

The people also did not dare to oppose.

Everyone knew Ikes nature.

He was very careful and cautious.

After decades of guarding the prison island.

After being praised by the Navy headquarters.

This caution was more and more exaggerated.

-A little thing happened, and they were closing the entire bay!

For Ike, nothing was as important as no accidents on the prison island.

Especially in a critical period when he would be transferred in a few years.

Absolutely nothing could happen!

Not a single thing could happen!

The mouth of the bay was quickly and completely closed!

No ships were allowed to enter or leave!

Seeing this scene.

Modo, who was locked in the room, laughed out loud.

These guys should be trying to rob the prisoner island. Now lets see what they do!

With that guy Ikes nature, it wont reopen before two or three days.

At this time, Modo also relied on its own intelligence.

The Great Desolate Army should disguise themselves to be a certain pirate group.

The purpose was to rushing into the prison island.

And rescue the companions inside!

However

In the other room.

Le Yi and Lu Suns faces had a smile on them.

The first step of the plan was to invade the prisoner island

That was successful!

The next step was the second step.

It was also the most crucial step!

Ten minutes later, start the raid operation!

Lu Sun ordered in a deep voice.

A naval battle?

It was impossible.

Because of the lack of ships.

The Great Desolate Army had no intention of doing so!

The best policy was to avoid the shortcomings!

The reason they attacked the prison island fleet just now.

The main reason was

To let the cautious Ike commander gave the order to close the bay mouth!

This way, the outside battleships could not enter.

But

And the battleships inside could not get out either!

It completely blocked the whole prison island!

This was exactly what the Great Desolate Army wanted!

The time passed little by little.

Ten minutes passed quickly.

Modo, who was sitting happily in the room.

Suddenly, he felt that something was wrong.

Immediately after

There was a roar.

From far and near!

Soon!

It came overhead.

Modo hurriedly looked out the window!

The next moment, he saw a scene that shocked him!

Chapter 367

367: Air Operations! New Tactics! Shocked natives!

A roaring sound kept coming.

Closer and closer.

Getting louder and louder!

What the hell?

Modo raised his head and looked at the sky.

The next moment.

He saw above that cloudless blue sky.

A small black dot appeared.

These little black dots were rapidly magnifying at a rate visible to the naked eye

Within a short time period.

From a distance came close to the front.

This time, Modo also saw it clearly.

These black dots were actually

A strange object with big wings!

The exterior was white.

It was several meters long!

The head was oval shaped.

The most obvious one was

There were two large wings on both sides!

It was something that Modo had never seen before.

And the most surprising to Modo.

It was the amazingly incomparable speed of these big guys with big wings.

Just in the blink of an eye.

It sped past the battleship.

It was terrifyingly fast!

What are these things?

Modo was completely stunned.

With the broad knowledge, he had lived for decades.

He had never seen or heard of such things before.

These were the

One of the most outstanding inventions of the Great Desolate Army in the past decade

The first generation of fighter jets!

A product of the Leite Aircraft Group!

The aircraft team had developed the third generation of aircraft.

They also successfully applied it to the army.

From the very beginning.

The Great Desolate Army did not think of using the Tanks or battleships as the main force.

Since there were fighter jets.

Directly let the fighter jets take off from the airfield in the Royal tomb Mountain Range!

Soar into the sky.

Through the planet passage, and then wouldn't it be nice to enter this world again?

In order to fight for this promotion.

The Great Desolate Army was working overtime every day.

Made nearly a thousand fighter jets!

This first batch of fighters coming in There were just 500 of them!

In Modos wide- eyes, five hundred fighter jets roared

swooped towards the direction of the prisoner island!

That's right!

According to the plan made by Han Xin and other high-level officials to deal with the prisoner island.

It was intended to be carried out directly with fighter jets indiscriminate bombardment!

Blow up hundreds of battleships inside!

Especially the five commander-class battleships!

If it was in the sea.

The speed of the commander-class battleships was too fast!

It was hard to aim.

One of the key points here was

Let the prisoner island automatically close the bay!

The fighter jets speed was even faster than a battleship!

On the battleship, you could only stay there obediently.

Couldn't get out at all!

Rumbling

A huge rumbling sound rang out in the sky.

On the high observation platform of the prison island.

Ike was thinking of going down to rest and led the crowd.

They all raised their heads.

Look in the direction where the booming sound came from.

Immediately saw a black dot, from far and near, densely rushed towards this side!

As the distance drew closer.

The clear figure of five hundred fighter jets appeared in the eyes of everyone.

Everyones eyes widened like they had seen a ghost.

At first, the crowd thought it was a bird.

But after seeing the specific appearance of the fighter jets.

It certainly wasnt.

What bird looked like this?

Wh What is it?

Commander Ike had a bad feeling in his heart and immediately asked aloud.

No I dont know. One lieutenant beside him shook his head.

Others also shook their heads.

Alarm, quickly send out an alarm. The whole island pay attention to the defense, enemy attack, enemy attack!

Commander Ike calmed down a little.

Despite not knowing what these unidentified objects were?

But still he quickly issued an order!

The surrounding group of lieutenants were busy.

But the speed of the fighters was too fast.

They hadnt gone very far.

And within no time

Five hundred fighter jets had already crossed the sea outside the prisoner island.

Swooped towards the prisoner island.

A huge roar attracted the attention of everyone on the island.

Including people locked up in the prison cells.

One by one, they crowded in front of the narrow window.

Looking at this amazing scene in the sky!

The next moment.

The crowd saw that on top of these large winged unidentified objects.

A black dot was suddenly cast down!

The target

Naturally, it was the mouth of the bay below!

The mouth of the bay was already blocked because of commander Ikes order.

No single ship could enter or leave.

Including the three huge commander class warships.

One by one, they remained stationary in the bay.

They divided five hundred fighter jets into several batches.

The first batch dropped a large amount of ammo!

One by one concentrated on the range of bay!

Bombing from the sky.

Its accuracy was naturally lower than the artillery.

But it did not matter.

The target range was large.

Plus, the number of fighter jets dispatched were five hundred.

The rest of the fighter jets remained behind.

Also in preparation.

The Great Desolate Army was not short of ammo.

Dont know how much they stored in the warehouse.

According to Han Xins words.

All that was needed was indiscriminate bombardment.

When the shells landed on a battleship.

There was a loud boom!

Directly the hull of this battleship exploded!

The shells that followed fell one after another!

Some landed on the battleship.

Some fell into the water.

Some fell outside the bay.

But without exception.

All of them exploded!

In a short moment.

Boom! Boom! Boom!

Explosions one after another!

Resounded throughout the entire prison island all at once.
Around the entire prisoner island.
Rumbling explosions.
Batch after batch of fighter jets came one after another.
The falling shells were completely non-stop.
They parked the battleships and other ships in the bay.
Completely became living targets.
One shell after another came in.
Some battleships were not so lucky and received dozens of shells.
In that violent rumbling sound, the battleship was blown apart!
Disintegrated on the spot!
The other ships didnt fare well either.
There were many ships in the bay.
A shell fell.
It was hard not to hit one.
Boom! Boom! Boom!
Endless explosions sounded in everyones ears.
They had to wait until five hundred fighters had completely flown by.
The first round of bombing baptism passed.
Commander Ike and others on the observation deck were
Completely dumbfounded!
They looked at the direction of the bay with dumbfounded eyes.
There was already a mess by now.
Hundreds of ships, none of them were unharmed.
A dozen of them had broken apart and sank into the water.
They blew half of the battleships out of shape.
It was unbearable!
Badly damaged.
Other ships were also more or less affected by the ripples.
Smoke filled the air on the remaining ships.
A blazing fire burns!
The light of the fire lit up the surrounding water.

It also showed the panic in everyones heart!

Locked in the room.

Looking out over the Bayo side of the Modo.

The eyes were even more rounded!

Totally can not believe it Just saw all this!

In less than ten minutes, the prison islands proud fleet

Its just been less than 10 minutes.

Although about half of the ships were still intact.

But most of them were badly damaged.

Cant move at all!

-A fleet!

Half of the ships were heavily damaged.

Chapter 368

368: Air Operations! New Tactics! Shocked natives!

To say they wiped it out would not be an exaggeration.

Rumble

At that time, Modo heard that terrifying roar again in the sky!

He looked up.

That one big winged unknown object flew over again!

Five hundred fighter jets.

Began a second round of bombardment!

The goal was precisely to completely destroy the prisoner islands fleet!

The plan is going well.

Le Yi, who was watching the fighter jets action with binoculars on the ship, breathed a sigh of relief.

Proceed to the second step of the island boarding plan.

Lu Sun ordered.

On the ship.

Lu Sun, who was good at water warfare, was the decision maker!

Five hundred fighter jets quickly came above the prisoner island.

Another series of shells were thrown down.

Countless dense bombardment sounds rang out!

It was deafening.

Ike and other senior officers of the prisoner island were shocked.

They had already reacted by now.

The other side was trying to destroy their most powerful fleet.

But

And what could be done?

There were no way!

These flying objects in the air.

The big birds that were so fast!

No one could handle them.

Only one by one

Watching the hundreds of ships in the bay got hit successively by the shells that kept falling.

Explode!

Fracture!

Fire blazed.

Then one by one, the ship sank into the water.

Commander, we have to call for help from the Navy Headquarters. A vice admiral said sharply.

No, no.

Commander Ike clenched his fist and growled loudly.

What kind of joke was it?

Right now, the Prisoner Island fleet was almost completely wiped out.

Such a huge loss.

If the top knew about it.

They would severely chastise him!

Dont talk about promotion and fortune.

It would be nice not to be disciplined.

Maximum alert! The highest alert!

Ike swept the crowd under his hands, almost frantically: All hands on deck, all soldiers take up arms!

Guard our island!

We cant let these bastards get on the island!

Not a single one

If anyone lets in a single enemy, Ill kill him!

With years of experience.

Ike was also judged.

After the enemy bombed to the fleet.

The next step must be to carry out the boarding of the island!

An order came down.

The vice admirals and soldiers on the prison island moved.

Although most of the several hundred warships were damaged.

But the admirals here were Fifty thousand of them!

Not a single one was injured.

On land, they were still a powerful battle force.

Under Ikes crazy tone of voice.

One by one, they were all urgently mobilized.

Quickly came to the back of the bay.

A simple defense line was laid out!

The bay was the only entrance to the prisoner island!

Everywhere else was blocked off.

Either the terrain was steep.

It was simply difficult to land!

Just hold this place.

The enemy wouldnt do anything!

At the same time, the fleet led by Lu Sun and Le Yi had already rushed towards the bay!

A commander-class battleship, plus dozens of ordinary battleships.

In a fan-shaped formation.

Covering the entrance of the bay!

Fire the guns, free fire!

Lu Sun ordered.

At once.

-Shells were shot out one after another.

They passed through the air on the surface of the sea.

Towards the defensive positions behind the bay!

The shells landed on the ground and made a loud, earth-shattering sound!

They encountered shells for the first time.

They simply did not know how to respond.

One by one, they waved the weapons in their hands.

Trying to use swords to block!

The result!

Naturally, they were completely unable to block.

And were blown to pieces!

But at the same time.

Lu Sun and Le Yi saw several lieutenants of the prisoner island.

They all used their own fruit ability.

One of the vice admirals could summon strips of Green vines!

Relying on these vines.

He was deflecting back the falling shells!

The Prisoner Islands ability fruiters, are a nuisance.

Le Yi frowned slightly and said.

Increase the attack! Prepare fighter jets for a third round of bombardment!

Lu Sun was also aware of how tricky these ability fruiters were.

Immediately, he gave another order.

This time

The target of the five hundred fighters.

It wouldnt be the warships inside the bay.

Rather, it was the prisoner island admirals on the defensive positions.

The Commander-class battleships underneath them also continued to move forward.

They moved closer to the island.

But because the entrance of the bay was closed.

It was impossible to enter.

They could only stay at the nearest place outside the entrance of the bay.

The ships were set up horizontally!

The Great Desolate Army set up a table of five-port continuous speed guns!

Bullets

Countless bullets were pouring out frantically!

Going straight to the back of the bay position!

Poof, poof, poof

Just a moment.

Hundreds of soldiers from the prisoner island were shot fell to the ground and died!

Although the prisoner island had 50,000 soldiers.

But almost all of them were ordinary people!

Including the vice admiral.

There werent lots of ability fruiterers.

There were even fewer powerful ones.

The five consecutive speed guns came out.

It directly suppressed the prisoner island soldiers on the defensive line at the mouth of the bay, completely unable to raise their heads!

Even that vice admiral who could summon vines.

Under this crazy firepower, there were a few vines.

Directly shot off!

Requesting support, requesting support.

This vice admiral passed the message through the messenger snail.

Yelling loudly.

There was no need for him to remind him.

Commander Ike on the watchtower had already sensed that things were not good.

No, no, we absolutely cannot let these people rush to the island.

Ike clenched his hands, gritting his teeth and growling inwardly.

Immediately ordered: Others, all follow me, block these bastards for me!

Ike gripped his long sword and moved out.

Led the remaining lieutenants and adjutants.

Quickly rushed to the defense position!

Ike spent several years repairing this position.

In order to prevent the enemy from boarding the island!

In the past, there were several pirate groups to raid.

But never got closer to the bay.

It was defeated by the prisoner island fleet in the naval battle.

This position was completely useless.

But did not expect.

Not only did the fleet lose more than half of it today, but even the positions were beaten down!

The navy side had no long-range weapons!

At most, a small number of bow and arrow teams.

There were a few long-range attack ability fruiterers!

Not to mention, they were in the prison island.

In this world, there were only a few people who could achieve long-range strikes.

The vast majority were mainly in close proximity!

The establishment of the navy dealt with these ability fruiterers.

Who would have thought that one day a group of terrible guys, who were good at long-range shooting, and were also able to do aerial bombardment.

However, Ike and others were completely wrong.

The Great Desolate Army did not even think about landing the island head-on!

Such a frantic attack was mainly to cover the real plan to board the island!

The Great Desolate Army was not here to occupy the prisoner island.

The only purpose was

To take away the two prisoners on the island

Wang Juen and Wu Kongkong!

While attacking on one side.

The men from the special combat team also started to move.

They jumped into the blocked bay.

They were ready to open this bay gate from the inside!

But it seemed impossible to open it.

Chapter 369

369: Air Operations! New Tactics! Shocked natives!

Finally

They used explosives to blow it off!

Seeing the move of the special combat team.

Commander Ikes heart literally Shivered!

He felt the uneasiness.

Immediately said: They want to open the bay, stop them, must not let them open!

Ikes tone was closer to a roar!

The others were also anxious.

If the Great Desolate Army happened to open the gate.

The consequences would be unthinkable.

They just couldn't imagine.

Because the Great Desolate Army mainly did lots to attract attention.

According to the judgment of Le Yi and Lu Sun.

There were still some ability fighters on the prison island!

If they really fight head-on!

Don't waste time to convince them.

There might also be some casualties.

This is what the Great Desolate Army did not want to see.

A powerful vice general personally led the team.

With an elite group of Prisoner Island soldiers, they came towards the lower side of the bay to kill!

Trying to stop the special combat team.

But immediately, they were greeted by the artillery and rapid-fire guns of the Great Desolate Army.

And the heavy sniper guns that come from time to time in the dark!

The bombardment in the sky continued.

The target was the prisoner island generals in the position.

The smoke of the bombing rolled.

The surrounding woods all burned up!

But this time the aircraft brigade, all weren't fighter jets.

There were also a few that were normal planes equipped with special combat soldiers who were fully armed and had a parachute at their back!

These planes went through the entrance of the bay.

They came to the back of the prisoner island.

Fire incendiary bomb!

Seeing that it's the right time.

Lu Sun immediately ordered.

Immediately, one by one, incendiary bombs were fired out.

It landed in one territory in front of the prisoner island.

It wasn't lethal but still could ignite the nearby material.

And!

The most critical thing was smoke!

Completely blocked the surrounding line of sight.
Ike and others simply could not imagine.
In the back of the prisoner island.
One by one, the Great Desolate Army special warriors were jumping off the plane!
The parachute opened and they slowly landed on a grassy area below.
For this landing operation.
The Great Desolate Army was also well prepared in advance!
After training and simulation after simulation!
This time, All thirty special warriors landed successfully!
There were a few people who were a little far away from the location!
But it was not a big deal.
Twenty people nearby gathered together.
Quickly dive towards the prisoner islands prison!
Although the outside was desperately defending.
But here in the prison.
There are still many soldiers and a lieutenant guarding it!
But one by one, most of the attention was on the defensive battle at the entrance of the bay.
They simply did not realize.
Under their nose.
Twenty or more special warfare soldiers of the Great Desolate Army slipped in.
Quietly came to the outside of the prison.
Special forces soldiers under the prison gate.
Buried a gunpowder packet.
After a while,
A loud boom!
The iron gate, naturally, could not withstand such a large impact.
And was directly blown up!
The deputy general and the soldiers on guard inside were startled for a moment.
Immediately
The deputy general guarding the prison along with dozens of guards.
Quickly rushed out.
Suddenly

As soon as they came out.

There was a series of bullets sweeping!

Two dozen special warriors, holding two dozen assault rifles!

Aimed at the cell door.

Shooting crazily!

Dozens of guards instantly fell to the ground!

It was the deputy general.

Under such concentrated firepower.

Even the ability fruiters had no time to use it.

Already got injured!

According to the results of the interrogation of Modo.

Ability fruiters were at low levels.

There was also a reaction time.

If you get to the commander-level.

Then it would be very difficult to sneak attack!

But even by surprise attack.

This vice general did not immediately hang up.

The special warrior rushed up.

The key to the prison was taken out from the seriously wounded lieutenant!

Quickly rushed in.

There were still several guards inside.

This time, special warriors did not directly kill.

Instead, they left a few of them alive.

Then

opened the prison cell.

Immediately, there was a

Loud sound!

Because the translation leaves were placed on the special warriors at the head this time.

Therefore!

They were able to hear the shouting of these prisoners locked inside!

There was a huge noise outside just now.

Naturally, the people inside heard it too.

And then saw the special warriors rushed in.

Immediately realized

These people would have come to rob the prison.

One by one, they shouted.

The special warriors grabbed a few guards.

While walking in, he asked, Where are Wang Jue and Wu Kongkong locked up?

Over there.

A guard pointed to a room not far away.

The special warriors immediately rushed over.

In the room indicated by the guard.

A dozen prisoners covered in filth were seen.

Which two are Wang Jue and Wu Kongkong? The special warfare warrior asked loudly.

A dozen prisoners instantly turned their eyes aimed at the two men in the corner.

One had dark skin, but bright eyes.

The other was thin and weak, but his face was disfigured.

It seemed to have been burned by fire!

Both of them were very young.

It looked like they were only about twenty years old!

You are Wang Juen and Wu Kongkong?

The special warrior asked.

You guys Who are you?

The dark-skinned teenager stared at the special warrior and asked back.

The people who came to save you, come with us.

The special warfare warrior pulled the dark-skinned teenager.

But this guy was tugging at the bars of the prison with one hand.

He wouldnt let go!

Hurry up and go, there is no time, do you want to stay here for the rest of your life?

The special warrior said in a stern voice.

The dark-skinned teenager hesitated for a moment.

The disfigured, skinny teenager behind him said in a hoarse voice, Go with them.

Ok.

The dark-skinned teenager seemed to be listening to the skinny disfigured teenager.

He let go of his hand.
The two men followed the special warriors and left!
The other prisoners also wanted to follow them out.
But there was a series of bullets by the special warriors.
And were forced to go back!
Although this was an alien planet.
But the Great Desolate Army was still disciplined.
About what could be done and what could not be done.
It was still divided very clearly.
After leaving the prison.
They did not forget to re-lock the door!
Let the group of prisoners inside wailing completely dumbfounded!
With two teenagers, a special warrior ran towards a cliff at the back of the cell!
At the bottom of this cliff.
There was already a battleship waiting here.
A special warrior took out a bundle of thick ropes!
One end was firmly tied to a large tree.
Threw the other end down!
The Great Desolate Army on the battleship below caught the rope.
Tied it to the battleship.
Made into a simple zip line!
Two special warriors acted first.
Each took a teenager with him.
Grabbed the pulley on the rope.
Quickly slid down!
Waited until the two teenagers landed safely on the battleship.
The other special warriors came down one by one!
After all of them came back.
The rope was cut too!
The battleship quickly turned away!
The Air rescue operation was successfully completed!

370: Duel with BOSS! Destruction Attack!

After the rescuing of both Wang Jue and Wu Kongkong.

The purpose of the Great Desolate Army was also achieved.

The frontal firepower also retreated.

The battleships also retreated backwards at the same time!

No!

Seeing this bizarre move of the Great Desolate Army.

Commander Ike frowned slightly.

With the current situation.

The Great Desolate Armys side was completely dominating the upper hand.

Why retreated like this.

At this time, the news that they robbed the prisoners from the prison just came through!

Ike was slightly shocked and immediately asked, How many prisoners were taken by these guys?

Only two people? A lieutenant replied.

Two people!?

Ikes eyes widened.

So much effort just to rob two people?

Ike was also reacting now.

Just now, the Great Wilderness Army had attracted attention at the front.

Meanwhile, the real target was the prisoner in the back.

Yes, two prisoners, one named Wang Lao and one named Wu Kongkong. The deputy general replied.

Wang Lao? Ukongkong?

Ike was slightly taken aback.

Who were they?

There were thousands of prisoners on the island.

Ike only knew some of the famous ones.

Like Wang Lao and Wu Kongkong.

He didnt know them at all.

Commander, we should report this to the Navy Headquarters. The opposite side is too strong. We are no match.

The vice admiral said.

Report what?

Ikes voice suddenly became louder and said, Do you want me to die? Anyway, its not like any important prisoners were taken. Let this matter pass.

Ike was not willing to report it.

Instead, he told the people under his command to keep their mouths shut.

It was right for his army!

It would cause a little less trouble.

On the commander-class warship.

In a spacious room.

Wang Lao and Wu Kongkong were brought there.

The Great Desolate Army had already unlocked the sea stone handcuffs on their hands!

You must be Wang Lao, right?

Han Xin looked at the dark teenager and asked with a smile.

And you Wu Kongkong.

Han Xin turned to the thin and disfigured teenager next to him and said, You must be a woman.

It was a man or a woman.

Naturally, it couldnt be hidden from Han Xins eyes!

The gap between men and women was still very obvious.

The thin and disfigured girl pushed aside the long hair that had been covering her face, and looked at Han Xin and said, You I saw you before, Youre not from this world?

Hm?

Hearing that.

Han Xin frowned slightly.

The others were alert.

Han Xin hadnt even asked a question.

The skinny and disfigured girl, Wu Kongkong, then continued, I am an ability fruiter, and the fruit I take is Prophecy fruit!

The ability to see things that others cannot see.

Three days ago

I saw that there will be a group of people who do not belong to this world to save us!

It turns out that the woman said this.

Han Xin nodded slightly and said, We are here to do something big and need your help.

No problem.

Wu Kongkongs voice was calm as she said, Since you saved us, we will naturally repay.

What you are dealing with is Commander Leif, right?

You saw this too?

Han Xin asked.

A little.

Wu kongkong replied.

So did you see how it ended?

Han Xin asked with a faint smile.

Cant see it.

Wu Kongkong shook his head and said, My abilities are limited, otherwise I wouldnt be disfigured and taken to the prison island

Especially for someone like Leif, its hard to predict him very well.

You guys are going to deal with Leif?

At this time, the dark teenager next to him, Wang Lao, widened his eyes.

Looking at Han Xin in disbelief.

Yes, do you have any ideas?

Han Xin asked with a smile.

Then Ill definitely go.

Wang Lao said excitedly: Dealing with such a big man has always been my dream since I was a child.

Leif has a grudge against you?

Han Xin looked at Wang Jun and asked.

He has no grudge against me, but we have a grudge against the navy.

Wang Lao gritted his teeth a bit and said, The face of Wu kongkong was destroyed because of the navy!

That Leif is not a good person either!

But he is too powerful.

There were many people who tried to kill him before, but they didnt succeed!

You guys are really strong, but its not enough to deal with Leif. Wu Kongkong answered, I saw your attacks just now!

Its no problem to deal with Prisoner Island, but Leif is the Grand Commander, or one of the most powerful ones within the Grand Commander!

Oh, then what do you propose? Han Xin asked.

We have a friend who has been chased by Leif. Wang Lao said, If you guys can join forces, there is some hope!

Thats right

Wang Lao said with a twinkle in his eye, Youll need my help for that!

Your help?

Han Xin deliberately asked, What can you do?

Dont underestimate me.

Wang Lao naturally did not realize that Han Xin was doing it on purpose, and immediately said with some anger, I am also an ability fruiter, and a very powerful one.

Very powerful?

Han Xin couldnt help but laugh and said, Then how did you get locked up in the prison island?

Hmph, its different.

Wang Lao said angrily, My ability is mainly used for assistance, I am not that strong in frontal combat!

It could be said that

One of the few most powerful auxiliary abilities in this world!

What exactly is the ability?

Han Xin asked directly.

I dont tell ordinary people.

Wang Lao glanced at Han Xin and Le Yi and said, Seeing that you are our life saviors, Ill tell you.

Upon hearing Wang Laos account.

Han Xin and the others were a little surprised.

This was indeed considered a very good ability.

So thats how it is.

Jiang Fan, who had been watching, was also suddenly enlightened.

No wonder

The system asked to find these two people.

Without the ability of Wang Lao, they might not be able to succeed in the end!

As for the role of Wu KongKong she said it herself.

I can show you the way. Its nearly half a days journey from Leif Island, and a long way to go, with a large area of sea in between.

Wu Kongkongs face was solemn and said, If there is no one to lead the way

It is very easy to get caught in storms, or sneak attacks by the giant creatures under the sea.

There are other pirate groups that are also a problem!

Although I do not know the way, I can choose the right direction through prophecy!

While saying this, a trace of hatred flashed in Wu Kongkongs eyes!

Then Ill trouble you.

Han Xin smiled faintly.

He was naturally clear about Wu Kongkongs intentions.

Rather than leading the way.

It was better to say that it was to lend the hand of the Great Desolate Army.

To take revenge for herself!

But as long as it serves a purpose.

Han Xin also did not bother to pay attention.
