

One Planet 371

Chapter 371: Duel with BOSS! Destruction Attack!

Soon.

A preliminary plan was discussed by Han Xin and the others!

Since there was a large distance from Leif Island.

So it was impossible for everyone to go over!

This time, Han Xin personally led the group.

The older Xu Tiande was left behind.

And Yan and Ghostbusters sat at the back!

The fleet streamlined, with only 30,000 people!

Because of the urgency of time.

Everyone did not rest.

Afterwards, they discussed the plan.

They set off straight away!

Along the vast sea towards Leif Island!

With the guidance of Wu Kongkong.

There were no surprises on the way!

The journey was very smooth.

After about half a day.

The Great Desolate Army fleet arrived at Less than 300 kilometers away from Leif Island.

Leif Island was already in sight.

The speed of the fleet was also slowed down.

Up ahead is the sphere of influence of Leif Island. There should be battleships going in and out during normal times.

Wu Kongkong said.

What are you guys going to do now? Attack directly? Wang Lao asked curiously.

Attacking the island directly is the next best thing. Han Xin smiled faintly and said, As for what to do? You will know after a while!

It didnt take long.

A small boat was put down.

On the boat was Modo, and dozens of soldiers who have been imprisoned!

These guys actually let me go?

Modos face was incredible!

Originally, he saw the fearful firepower of the Great Desolate Army.

They bombarded indiscriminately even the prisoner island.

Desperate!

Totally unexpected

He unexpectedly had this day of being let go.

What the hell are these guys thinking?

At this moment, Modo completely could not see the path of the Great Desolate Army.

It doesnt matter. Run away first.

Modo looked at the sea area in front of him and thought to himself, Leif Island is ahead. Although Im not very familiar with Leif, but for the sake of my fellow navy colleagues

He should save me, maybe

And also avenge me!

Right.

Modo suddenly remembered one thing, looked at the soldiers under his hand and asked, Have those people injected you with a drug?

-The soldiers all nodded their heads.

What do these guys want?

Modo frowned slightly.

Before being taken on this boat.

Modo watched helplessly as the Great Desolate Army injected a tube of something unknown!

I dont know what it is, is it some kind of poison? No matter what, lets escape first. Whatever poison is, there must be an antidote on Leifs side.

Modo cared little.

He immediately let the soldiers under his command

To paddle the boat towards the direction of Leif Island!

And in a room of the battleship.

Wang Lao and Wu Kongkong were watching Modos departure.

Sister Khong Khong, do these people have some other purpose? They let a commander go?

Wang Jiao was a little puzzled and asked angrily.

They had a big grudge for the navy,

I dont know.

Wu Kongkong shook her head and said, I cant predict it.

Then what do we do now? Continue to work with these people? Wang Lao asked.

Where else can we go?

Wu Kongkong spoke in a calm tone and said, Since we have to cooperate, we must trust others.

But

Wang Lao hesitated a bit, and said, Leif Island has a 100,000 naval forces, and hundreds of ability fruiters, and a few commanders of great strength, not to mention

Hate to admit, but Leif is a strong guy!

Although these people have sharp weapons, they are definitely not Leifs opponents.

Dont be anxious. Lets see what happens.

Wu kongkong comforted him and said, That friend of yours should be on his way over here!

If we wait for him to arrive

Wang Laos eyes lit up and said, If we wait for Asha to come over, then theres still a chance!

And in the other room.

Han Xin, Lu Sun and other high-level officials gathered together.

Did Modo find out?

Lu Sun asked.

Not yet.

Han Xin smiled and said, Im afraid he wouldnt bother to suspect.

At the head of the soldiers released from the Great Desolate Army.

A dozen of them were nominally the guards of the Lord of Xiangdao.

But in fact

One of them was the young man who infiltrated the island masters house with the ability to bounce.

The others were special warriors in disguise.

This action was perilous.

But there was no way.

They did it. In order to understand more about the situation on Leif Island.

A group of senior officers were waiting in the room.

Staring at a messenger snail on the table.

The expression was faintly tense.

If these special warriors could not successfully infiltrate Leif Island.

Then

A strong attack must be used.

It would be much more difficult that way!

After about an hour, the messenger snail suddenly moved.

The crowd was immediately shaken.

Prick up their ears and listen carefully.

A voice came from the messenger snail and said, Report, we have got to the island. The inspection here is not that strict, and there is no suspicion about Modo and our identity!

Good.

Han Xin praised, and then said, Continue with the original plan.

Take extra care of yourselves for safety!

Ending the call.

Han Xin, Lu Sun, Le Yi, and the other high-level officials eyes turned to the clock on the side.

Staring unceasingly.

Because they knew that

If nothing unexpected happens.

Later on

Modo and the soldiers under his command would mutate.

Thats right.

Just before letting Modo go.

The Great Desolate Army injected them with Dr. Chens newly developed The latest type of super zombie virus!

It differs according to each persons physique.

Modo was the most injected.

The other soldiers were less.

The reason was to wait for Modo and his soldiers to attack after going to Leif Island!

Its a pity that this virus only works on Modos level, otherwise it wouldnt be so troublesome.

Seeing this Jiang Fan thought, but he didnt care either.

If the super zombie virus worked on Leif.

Then

It wont be an eternal difficulty level!

About another half hour passed.

An urgent voice came from the messenger snail and said, Report, the virus on Modo and the others have a virus attack and frantically attack the living people around them. This island is now in a mess! The initial success of the plan!

Hearing this report.

Han Xin breathed a sigh of relief and said, Pay attention to your own safety!

Then he swept his eyes at Le Yi and the others and said loudly, Now Its our turn too.

One by one, the orders were given.

The Great Desolate Army fleet resumed its voyage!

Quickly traveling towards Leif Island!

In half an hour.

An immense island appeared in front of everyone!

Leif Island Here it is!

With the approach of Leif Island.

Wang Lao and Wu Kongkong both suddenly felt that something was not right.

Sister Kongkong, look.

Wang Lao pointed in a direction at the entrance of the bay.

The two of them looked over together.

They saw a scene that shocked them

Chapter 372: Duel with BOSS! Destruction Attack!

They saw several Leif Island soldiers fleeing frantically.

And one person was chasing behind them!

This person looked strange.

The face was hideous and gruesome.

His face was covered with blood and black lines!

The mouth roared, and he quickly pounced on a soldier who was closest.

And gnawed on it!

After a while.

An even more horrifying scene appeared.

The soldier who was gnawing on actually regained his feet.

The face also became hideous and horrible.

It was exactly the same as the one before.

The same roared and pounced on the others!

This This

Seeing this scene.

Wang Lao and Wu Kongkong were both stunned.

It wasn't just happening at the bay.

A glance over.

There were scenes like this everywhere

People were constantly being pounced on the ground and turned into zombies in no time!

The zombie virus was too contagious.

Especially Modo, a commander-in-chief zombie.

Killed everywhere!

As long as they bump into each other.

No one could escape from his clutches!

Modo, you're crazy!

A deputy general, who was also a commander, stared at the crazy Modo and shouted coldly.

Modo looked at this lieutenant.

Not only was he afraid. There was a glimmer in his eyes.

Modo, who mutated into a zombie.

The more powerful the creature, the more eager it was!

Modo, if you mess up again, I'll be ungracious! This lieutenant warned.

Modo laughed heatedly.

But there were no words.

He directly pounced on it.

Seeking death!

This lieutenant was also completely furious and activated his ability.

And Modo ruthlessly slammed together.

But it didn't take long.

He was surprised to find out.

No matter how much he attacked.

Modo had a little damage.

He hit Modo, but it was as if it did not hurt at all.

The zombie also had a weak point.

But for a short time.

The people on Leif Island

Couldnt find this weak point!

As time passed by, more and more soldiers transformed into zombies!

It was an island isolated from the outside world!

It was the best place for zombie infection!

Its almost time.

Han Xin was ready to order.

Go to the island!

Because now there were no guards at the entrance of the bay.

All of them were either on the run.

Or had been transformed into zombies!

Outside the Great Desolate Army reconnaissance soldiers suddenly issued an alarm.

The crowd looked towards the outside.

And found out that a huge fleet appeared not far away!

A fleet came by in a mighty manner.

There were at least hundreds of them!

Asha and the others are coming!

Seeing this fleet, Wang Lao was very excited.

Its not just Asha.

Wu Kongkong, however, said with wide eyes, Even the other supernovas have come!

The two were afraid that the Great Desolate Army would misunderstand.

They immediately reported this up.

That means

Han Xin said in a daze, This is a huge fleet synthesized by three families.

Yes, Asha Kidd and Paul the three supernovas!

Theyve always had a grudge against Leif, and I didnt expect them to come together.

Han Xin and Lu Sun next to him looked at each other.

Both guessed what this was all about.

These three so-called supernovas.

It was estimated that they had also planted people in Leif Island.

So they knew that there was a change on Leif Island!

This is why they came together!

The plan is on hold.

Han Xin immediately changed his original plan and said, Start the second backup plan instead.

If anyone could help.

Then naturally, Han Xin was not going to forcefully attack!

Soon, the combined fleet of three supernovas passed through the Great Wilderness Army!

Without greeting, sailing directly at the entrance of the largest bay on Leif Island!

One by one, pirates dressed in strange costumes.

Brandishing all kinds of weapons.

Howling loudly jumped off the ship.

From the entrance of the bay to the interior of Leif Island!

Let this already very chaotic island

Became more chaotic!

At this moment.

In the center of Leif Island.

Inside a huge palace.

There was a giant sleeping soundly, the sound of snoring could be heard far away!

An old man in the shape of a butler, came in hastily.

And woke up the giant.

Whats the matter?

The giant was very dissatisfied.

His huge eyes stared at the old butler.

He hated being woken up while he was sleeping!

My lord, its not good, something has happened on the island.

The old housekeeper shouted.

What happened? Why are you panicking?

The giant didnt care.

He picked up a barrel of wine next to him.

Drank it down with a gulp.

My lord, dont drink it, something really happened, something big happened, just go outside and see for yourself.

The old butler shouted in anxiety!

The giant man frowned slightly.

Then he stood up.

Stepped on his big feet.

Rumble, rumble

Walked out of the palace.

He glanced around quickly.

Upon seeing one soldier after another being chased by the zombies.

His face changed immediately.

These What are they?

The giant roared.

My lord, I dont know either.

The old butler explained, I dont know why, they suddenly became like this!

Ahh.

The old housekeeper suddenly remembered something and said, It seems that something started to happen on the island after Commander Modo came in.

Modo?

The giant frowned slightly!

Yes!

At this time, A deputy general hurried over.

He was out of breath and said, Its not good, Asha, Kidd and Paul, those three guys, are coming here with people to kill!

Its these three guys again.

The giants face sank and said, Last time they were spared, this time they dare to come and cause trouble again!

My lord, what happened on the island is definitely the work of these three guys.

The old butler said.

No, no.

But the giant shook his head and said, If they really had this ability, then they would have used it last time, why wait until now!

My lord, What should we do now?

The old butler asked anxiously.

Dont worry.

The giant laughed gently and said, After all this trouble, you still have to face me in the end!

Id like to see how far these three guys have grown in strength now, can they impress Leif?

This giant was

The ruler of Leif Island.

The most powerful of the Navy Grand Commanders Leif!

Once he took a giant fruit.

As a result, his body became huge!

The physique also became extremely terrifying!

With the title of Navys strongest body!

After talking, Leif stepped on his big feet.

Although the body size was huge.

But his speed was not slow at all.

He quickly rushed to the nearest group of zombies.

Stretched out his huge palm and one by one took them all.

And crushed them all!

At the same time.

Asha, Kidd and Paul, three supernovas also rushed to the island with people!

Crossed over the zombies, rushing to the front of Leif!

A big battle was about to start!

But what none of them expected was.

On the battleship outside the island.

Han Xin began to order.

Implement the final destruction plan!!!

Chapter 373

373: The sky falling apart! Shocking power!

Its a fight, Asha and the others are fighting with Leif. Wang Lao and Wu Kongkong borrowed the telescope of the Great Desolate Army.

Seeing Leifs island.

Giant Leif was fighting with Yasha, Paul, and Kidd, the three supernovas The battle was a mess!

The three supernovas were all ability fruiters.

Those who could be called supernovas

Those were the best among the young generation!

Strength could even be comparable to those ordinary Grand Commanders.

There was also a huge difference in the strength between the great commander and the grand commander like Leif!

He was the most powerful kind.

Wu Kongkong, can Asha and the others win?

Wang Lao asked, nervously.

Hard to say it.

Wu Kongkong shook her head.

Her face was a bit gloomy.

At the same time.

Han Xin, Le Yi, Lu Sun and other generals were also watching this great battle on the island!

The three supernovas, Asha, Paul and Kidd were cooperating well.

Advance and retreat in an orderly manner.

Using their fruit abilities and unique skills.

Each one in a corner, into three directions.

Surrounded the giant Leif in the middle.

The attack was one wave after another!

The fight was loud and clear!

Very sensational!

The noise was also enormous.

From the surface, Leif seemed to be pinned down and beaten up, with little power to fight back!

The situation had a tendency to be one-sided.

But Han Xin and the others were not optimistic!

They had learned from Wu Kongkong and Modo about the approximate strength of Giant Leif!

Previously, Asha and others had challenged Leif several times. Lu Sun analyzed: But none of them ever succeeded!

Mainly because

Leif's ability fruit is too terrifying!

After taking it, not only did he transform into a giant, his physique also became super strong.

He is known for having the strongest body in the navy!

But, dont worry

Even if Leif stood there and let the three supernovas hit, it wouldnt hurt!

So

He glanced at everyone and continued, We cant put our hopes on these three supernovas. We must plan for the worst scenario!

And thats exactly what happened.

Leif spent half a day fighting.

It looked like Giant Leif was totally taking a beating!

The three supernovas made all kinds of moves.

But

Leif had a calm face.

Let these moves fall on their own body.

He glanced at the three supernovas without pain and laughed: Asha, Paul, Kidd, you have grown slightly in strength these days, but still not enough to tickle me. Continue, continue!

Damn it!

Seeing this scene.

Wang Lao on the ship slightly clenched his fists, a little angry, and a little helpless. Why is Leifs physique so strong? Asha and the others actually couldnt even break the defense?

Those rumors about Leif are not false.

Wu Kongkong spoke: Legend has it that Leif used to be a pirate and was captured a dozen times by the Navy!

Each time, they tortured him and even more tortured

They guillotined him several times, but

No matter what executioner, they werent able to chop off Leifs head!

With fire, with water, with lightning All kinds of methods have been used, all can do nothing to Leif!

After that

As a last resort, they recruited Leif to be the grand commander!

Fortunately, Leifs attack power is not as strong as his defense, otherwise

Wu Kongkong looked at the fight on the island and said, He would really be invincible!

Not to mention the three supernovas, even if there are ten more, its useless!

This time, the opportunity is so good. Wang Lao said reluctantly: Everyone on Leif Island is in chaos, and Leif is the only one left!

If we missed this opportunity

It will be more difficult to deal with Leif later!

No, I have to go to help Asha and the others!

After saying that Wang Lao was about to go outside.

Wu Kongkong stopped Wang Lao and said, Its useless for you to go.

At least it can help some. Maybe it will work. Wang Lao said anxiously.

There is no need to rush at the moment.

Wu Kongkong advised, Now, the only hope may have to be placed on those people from the outer world!

Them?

Wang Lao faintly puzzled, Those weapons of theirs are indeed powerful, but can they be stronger than a supernovas attack?

Three supernovas teamed up and couldnt even nail Leif!

Its even more impossible for these people.

I dont know why these people are coming against Leif, but Wu Kongkong blandly said, I have a hunch that they must have come prepared!

At this time, A Great Wilderness Army soldier came outside and said, General Han invited you two!

Hmm?

Wang Lao and Wu Kongkong were slightly stunned.

They glanced at each other.

Then

followed the soldier, walked towards the meeting room.

Inside the meeting room.

Han Xin, Le Yi, Zhang Liang and others were gathered together!

And they were discussing every detail and step of the final destruction plan!

Seeing Wang Lao and Wu Kongkong arrive.

Han Xin looked up and said, Both of you, please sit down. I invited you both here because I need your help with something.

Ask us to help?

Hearing these words, Wang Lao paused for a moment.

He couldn't help but ask, You guys are really going to deal with Leif?

Of course.

Han Xin couldn't help laughing and said, Otherwise, why did we spend so much effort to rescue you from the prison island?

But

Wang Lao hesitated for a moment and said, You have seen Leif's strength. His body is very strong. I'm afraid those weapons of yours can't break the defense.

We know that.

Han Xin smiled and said, So we need a more elaborate plan and for that we need your help!

Before inviting them.

After seeing the three supernovas of Yasuo besieging Leif.

The Great Wilderness Army abandoned the previous two plans.

This time, before coming to Leif Island.

The Great Desolate Army had made four plans to take out Leif!

Chapter 374

374: The sky falling apart! Shocking power!

One of the plans was to use the super zombie virus.

To infect Leif!

Although it might not completely infect him.

But as long as it makes Leif's consciousness blurred, it was enough!

Last time, in the actual combat assessment of the college entrance examination.

That's how they dealt with the Flaming Giant.

And then use heavy weapons to kill Leif.

After seeing Leif's perverted defense, the Great Desolate Army abandoned the infection plan!

Such a terrifying body.

Super zombie virus was definitely Impossible to work.

The latest type of super zombie virus developed by Dr. Chen.

At most, it could infect people at the level of Modo.

There was no way to go any further.

The other plan was

To use fighter jets and sky crackers.

Converging bombardment on Leif!

Great coverage using uncountable amounts of gunpowder!

Blast Leif to death, or maybe injured!

But this plans

Success rate was even lower than the infection plan.

The Great Desolate Army originally wanted to try it out.

After seeing Giant Leifs amazing physique, they just gave up!

There were only two plans left.

And these two plans needed the help of Wang Lao and Wu Kongkong.

Especially Wang Laos ability!

You guys What are you planning?

Wu Kongkong asked.

Although she had a prophecy ability.

However, it wasnt omniscient.

Every time she cast the prophecy ability, it would take a lot of energy!

We are going to ambush Leif somewhere on the island, but this exact location cannot be determined right now, so we need your help.

Han Xin looked at Wu Kongkong and said.

No problem.

Wu Kongkong was very decisive and immediately agreed!

Even when

It was to make a deduction!

To help the Great Desolate Army to deduce the best location!

What about me?

Wang Lao also asked eagerly.

Its useful for you to wait. Dont worry.

Han Xin smiled.

Immediately, He planned in full swing.

Soon!

Wu Kongkong deduced the best location.

The Great Desolate Army mobilized many men based on this location!

At the same time, box after box of gunpowder was transported!

Thats right.

The Great Desolate Army prepared to plant very large amounts of gunpowder on the island

Planting large amounts of gunpowder!

To blow Leif up into the sky in one fell swoop!

There was some controversy within the Great Desolate Army, on the specific amount of gunpowder.

Finally!

In order to be on the safe side.

They transported about five thousand tons of gunpowder!

Last time in the actual combat assessment of the college entrance examination.

Against the Dark Elf clan.

They used Two hundred tons!

And it blew the dark elves up and made them miserable!

But now it was Giant Leif!

According to Jiang Fans guess.

This is at least a second level, Supernova!

Looking at the image of Giant Leif and the three Supernovas fighting.

Jiang Fan already had a judgment in his heart!

Furthermore, it was the most powerful, extraordinary individual in the current Great Wilderness Army!

No wonder its an eternal level mission. Its at least a Level 2 transcendent.

Jiang Fan couldnt help but mutter to himself.

The difference between Level 1 and Level 2 was very large!

Like the Amethyst Behemoth, that Emperor Qing had bred!

It was already considered the best of the first level.

More powerful than the Flame Giant!

But incomparable with Giant Leif.

Even an ordinary commander like Modo could not compare!

And Modos strength was estimated to be at the peak of Level 1!

Grand commander was at least Level 2!

And Leif

The most powerful rank in the Great Commander!

The most critical thing was that he had an extremely exaggerated physique!

No wonder the system said that the success rate was only thirty percent. Jiang Fan couldn't help but murmur, The projection system still saved some face.

If they attacked with conventional tactics, the probability is estimated to be less than ten percent!

Five thousand tons of gunpowder.

Transportation was also a big problem!

It was the equivalent of five thousand large boxes!

Fortunately!

Fortunately, the dozens of flame giants captured by the Great Desolate Army came in handy.

These flame giants were now tamed by the Great Desolate Army completely tamed.

This time, they also shipped them over.

Their only purpose was

as hard labor, to transport goods!

-Each flame giant was carrying several large boxes.

Flying around Leif Island.

They transported the box to the designated location.

At the same time!

The rest of the Great Desolate Army didn't stay idle.

They also worked together!

After several trips of carrying.

Finally, all 5,000 large boxes were transported!

At this time, the fight between the three supernovas and the giant Leif!

It was also into the most intense time.

You guys have had enough tickling, it's my turn.

Giant Leif laughed.

With that, he started a counterattack!

With one punch, he knocked the nearest Asha out of the way!

The three supernovas had been besieging for so long.

It consumed a lot of physical strength.

But the reason why the three dared to be so bold.
Provoked the Giant Leif.
It was because
Three peoples abilities were extremely special and powerful.
They got hit so hard.
It was no big deal!
Giant Leifs counterattack has begun!
-One punch.
The three supernovas were all knocked away!
But the three still didnt give up.
Wiping the blood from the corners of their mouths.
Once again, they stood up.
If you dare to make trouble on my island today, dont even think about leaving.
Giant Leif took a big step.
Forced his way towards the three.
It just so happened that
He stepped into the ambush spot of the Great Desolate Army!
Its done!
Seeing this scene.
Han Xin and the other high officials, and Wu Kongkong all breathed a sigh of relief!
Wu Kongkongs prediction was still reliable.
Rumble, Rumble
Giant Rafe stomped on his big feet.
The ground trembled as he stomped.
He didnt even notice that underneath the bottom of his feet.
There were several fuses burning!
Just in case!

Chapter 375

375: The sky falling apart! Shocking power!

The Great Desolate Army was igniting several fuses at the same time!
Snort snort snort
A small voice sounded.

But the surrounding was very noisy.

Those soldiers who became zombies after mutation were still running around.

Covering it all up.

Giant Leif continued to move forward.

And

Stepped right in the middle of 5,000 tons of gunpowder!

The fuse burned to the end.

And the next moment!

They heard a loud bang!

It was a loud noise that could no longer be described in words!

It was like an earth-dragon turning over!

The whole ground exploded!

Countless dirt, rocks, vegetation on the ground, nearby buildings . All flew out!

It was a terrifying and destructive shock wave along the air!

Instantly, from the center of the explosion.

He spread out to look around and saw that within a thousand meters.

All life and things were all blown up!

The ground shook like a mountain.

Even the air trembled violently!

This was a terrifying five thousand tons of equivalent!

The nearest ten-meter-tall building.

Instantly

It turned into powder!

Standing in the distance Asha and other three people were also affected by the ripple!

They quickly got down.

And waited until they got back on their feet.

And saw that

In the center of the explosion.

There was a huge pit!

The surrounding area was already bare!

Except for the blackened dirt.

There was nothing.

This This

Wang Lao and Wu Kongkong on the boat were dumbfounded!

Such a terrifying power.

They couldnt say that they had seen it.

Didnt even hear about it!

It was almost the power of a god!

Asha and the three supernovas were also stunned.

Even with their strength.

At the moment when it just exploded.

They also felt like it was a deadly danger!

If you get a little closer, you might die on the spot.

Or might get seriously injured!

Even with their strong fruit ability.

There was absolutely no way to block such a horrible Explosion!

Is this the crushing weapon of these people? Its actually this terrifying?

Wang Lao was so shocked that even his voice trembled a little!

Both hands were also trembling slightly!

No wonder, no wonder these visitors from the outer world dare to come and make a move against Giant Leif?

Wu Kongkong was also shocked and excited.

Such a terrifying weapon!

Beyond the imagination of the two!

Leif should die this time.

Wang Lao then thought of something and laughed excitedly.

He picked up the binoculars.

Looking towards the center of that explosion on the island.

In the huge pit that was blown out

There was a huge body!

Who could it be other than Leif?

At this moment

Giant Leif was covered in charcoal!

Seemed to have become a charcoal.

But!

When Wang Lao saw the condition of Giant Leif.

His face changed suddenly.

No, how did Leif Nothing happened at all!?

It wasnt just Wang Lao.

Others were also shocked to see Giant Leif was lying down in the big pit hole.

But his heart was clearly beating.

He wasnt dead yet!

Even

Not even a piece of flesh had been blown off his body!

After a while,

Leif in the huge pit.

Slowly got up from the ground and stretched out his big hand.

Patted the black scorch on his body.

Everyone was surprised.

These black powder was like snowflakes Little by little fall down!

Revealed the intact skin inside!

Hahahaha!

Leif laughed out loud, with a hint of anger in his laughter: Very good, very good, I have never encountered such a terrible attack since I took the giant fruit!

Surely it wasnt you three little guys who did this.

Leif looked at the three supernovas of Asha.

Then

Looking at the battleship of the Great Wilderness Army, a smile appeared on the corner of his mouth: You little mice, I have already discovered you!

You dare to set a trap for me!

Unfortunately

You have calculated a thousand times, but still underestimated my giant physique!

I, Giant Leif, am the strongest body in the world, you cant kill me!

Its over, its over!

Wang Lao shouted in frustration, Such an attack, and it didnt even manage to finish off Leif, who else can kill him later?

Retreat, retreat, Im afraid well have to wait at least ten years before we can defeat and finish off Leif!

The three supernovas of Asha were also quite frustrated.

After such a terrifying explosion just now.

They all thought that

Giant Leif would be seriously injured even if he didnt die!

But unexpectedly.

There was no injury at all!

Giant Leif was Still too terrifying!

Even Wu Kongkong felt an unprecedented helplessness!

Only Han Xin and the others were slightly surprised by this.

But still within the acceptable range.

Not to mention Jiang Fan who had been observing.

If you could use gunpowder It would be successful.

And no need to spend so much effort to prepare!

Wang Lao, get ready, youve to show your ability! Han Xin shouted.

It awakened Wang Lao, who was immersed in disappointment and depression.

Huh? Wang Lao was slightly taken aback. Immediately he looked at Han Xin and said, Arent you guys running away yet? The explosion here must have attracted the attention of the navy, and there are other powerful commanders around here, if you dont run away quickly, you wont be able to escape later!

Who said were going to run away?

Han Xin laughed and said, We were just testing the water, below is our real offensive!

The real offensive? Wang Lao and Wu Kongkong glanced at each other.

Both saw the trace of surprise in their eyes!

This kind of terrifying weapon was just testing the water?

Dont hesitate, hurry up and use your abilities to help us. Han Xin shouted, This is the only chance!

The ultimate destruction plan!

Wang Lao was slightly stunned.

With a dumbfounded face, he obeyed Han Xins order.

And started using his fruit ability!

And at the same time, Above the sky.

A plane was flying at high speed towards Leif Island!

The ultimate destruction plan was starting!!!

Chapter 376

376: River Explosion! In the name of Desolation! The Day of Destruction!

Rumble

High in the sky over ten kilometers above the ground, a huge plane was flying at high speed!

It differed from the fighter jets.

This plane was obviously much bigger.

Its wings were over several dozen meters!

It was not an ordinary plane, but a bomber!

The first bomber developed by the Great Desolate Army!

Specifically, for this destruction plan!

The pilot was an experienced and highly skilled thirty-year-old man.

Before taking off, he was already prepared for the worst.

He left a suicide note and gave his last words!

He was well aware of the dangers of this operation!

But still did not have any hesitation.

He took the initiative to take up the mission.

The bomber took off directly from the Royal Tombs Mountain Range airfield!

Followed the planet passage.

Bypassed a distance of several thousand kilometers.

Flying towards Leif Island!

Through the route ahead, Jiang Fan was now also able to initially determine

This world was a Level 3 planet!

Grand Commander Leif was not the most powerful transcendent here!

Above Leif, there were more powerful existences, but that had nothing to do with the Great Desolate Army!

As long as they didnt interfere with the Grand Desolate Armys actions.

A Level 3 planet, a level 2 Transcendent, probably still the top Transcendent in level two. No wonder no one ever passes the Eternal level missions.

By now, Jiang Fan also had some clarity in his heart.

This mission was almost impossible to complete!

Other level 1 planet masters.

They restricted level one transcendent energy to death.

At most, they could defeat the level 2 transcendent.

Like Giant Leif such attack power was not top-notch, but the terrifying defensive power of the body was intense!

It was absolutely the most peak existence among the Level 2!

What to fight!

If the Great Desolate Army had not the ultimate weapon the mushroom bomb!

Then there would be nothing you could do about it.

The bomber, carrying the final product of the Great Desolate Army's atomic program for the past ten years a mushroom bomb weighing several hundred kilograms!

In a previous conquest of an alien planet, the Great Desolate Army had successfully tested one!

This was the second time!

And the first live mushroom detonation!

As the bombers flew in the air approaching Leif Island, Han Xin, Le Yi, Lu Sun and others stood up one after another with high tension.

Wait, listen to my command. As soon as I give the order, you will immediately activate your abilities!

Han Xin stared at Wang Lao.

His expression was more serious than ever!

The mushroom bomb was ready, but it still needed Wang Lao's ability to cooperate!

It was their only chance!

The surrounding air felt slightly freezing.

Even Wang Lao, who usually had a smiley face.

He also knew the seriousness of this matter.

He immediately nodded vigorously and said, I know, I won't lose the chain.

Behind her, Wu Kongkong was also nervous.

She did not know

What was the destruction plan that Han Xin said.

But seeing the expression on Han Xins face the other side was definitely not joking!

These people from the outer world probably had even more powerful weapons!

After instructing Wang Lao, Han Xin and others were picking up binoculars.

Staring closely at the sky above,

While looking at the sky from time to time.

Above the sky, a small black dot appeared in the sky.

Its coming!

All the high officials of the Great Desolate Army clenched their fists slightly!

The bomber flew at a fast speed.

It quickly crossed the cloudless sky for miles, approaching Leif Island!

The sudden appearance of the bomber caught the attention of Asha, Kidd, Paul, three supernovas and the Giant Leif!

With their strength, they noticed this small black dot in the sky!

Hmm? What is this?

The three supernovas were puzzled, looking at this strange flying object!

Giant Leif also looked up.

He was a little curious!

The bomber flew over Leif into the sky.

The pilot took a deep breath.

Even after dozens of training, he still could not help but be nervous!

The next second.

His right hand smoothly and forcefully pressed the bomb drop button!

A hole opened up under the bomber.

An oval-shaped mushroom warhead slowly emerged from the exit.

Immediately after that!

From a height of ten kilometers, it fell down!

After doing all this, the pilot immediately started the plane to leave far away.

Once affected by the power of mushrooms.

Even a plane at high altitude might also be affected!

This moment

Not only the Great Desolate Army, the three Supernovas and Giant Leif.

Even Jiang Fan was also watching carefully.

The actual mushroom bomb weighed hundreds of kilograms!

They filled it with uranium 235!

According to the conversion of energy, the energy of a kilogram of uranium-235 burst was equivalent to 20,000 tons of a conventional gunpowder explosion of energy!

But the mushroom bombs now developed by the Great Desolate Army.

They cannot fully utilize uranium!

Only a part of it will detonate!

This mushroom bomb was equivalent to 300,000 tons of equivalent gunpowder explosion!

This was also the largest yield mushroom bomb the Great Desolate Army could produce!

The mushroom bomb fell from a height of 10 kilometers!

The speed was getting faster and faster!

At this time, Han Xin immediately said, Wang Lao, use your abilities!

Yes!

Wang Lao also sensed the urgency in Han Xins tone.

Immediately, he unleashed his fruit ability!

Wang Laos fruit ability was Prisoner!

As the name implies.

He could form a prison in a short amount of time.

Let the things inside it could not get out!

It was because of this ability.

Wang Lao changed his name.

This ability

There was almost no frontal combat power.

Chapter 377

377: River Explosion! In the name of Desolation! The Day of Destruction!

The biggest role was to play the auxiliary effect, but it was the king of the auxiliary inside!

If there was no main output, this ability was equivalent to A chicken rib.

Nothing worked.

This was also the main reason Wang Lao was arrested and then imprisoned on the prison island!

After all, an ordinary commander like Modo couldnt even beat it!

Han Xin understood this peculiar ability of Wang Lao before.

The range of the prison, at most, could reach a range of ten kilometers!

The surrounding ten kilometers range turned into a prison.

Everything inside was trapped in this prison.

There was no way out!

And

It was an indiscriminate impact.

Whether there were ordinary people, Modo, Supernovas, or the top powerhouse like Leif, no one could escape from the prison trap!

If it was used on a strong opponent, the effect time would be shortened!

If I trap Leif, the effect of my prison is only about five minutes!

Wang Lao was afraid that Han Xin didn't pay attention.

So he reminded him!

Don't worry, even one minute will be enough.

Han Xin naturally knew about this time limit long ago.

It was not just ten kilometers on the ground but also in the sky.

Rather, not that wide.

But there was also a five-kilometer range.

See that black dot in the sky? Wait until it gets within the range of your prison and then you can shrink the range.

Han Xin instructed.

Okay.

Wang Lao nodded.

This was also the second ability of the prisoner.

It could perform range scaling!

The maximum expansion range was ten kilometers and the minimum shrinking range was extremely small!

A very crucial point was that the things that were previously trapped in the prison would be there after the shrinkage.

It would continue to trap in the prison.

But with the current ability of Wang Lao, he could only choose a few things.

It was impossible to carry all the things within 10 kilometers, after narrowing down the range!

Just trap Leif and that black dot in the sky, shrink as small as you can, you dont need to care about the rest!

Han Xin finally explained!

Wang Lao did not answer, but he heard it.

At that moment, he placed his full attention on the rapidly falling black dot above the sky.

He did not care what it was.

According to Han Xins explanation, when this black dot came into the range of his prison.

Immediately perform a range contraction.

The next moment amazed the Great Desolate Army.

They saw the high speed descending mushroom bomb.

In a strange posture, it was pulled over.

Originally, it was still nearly a kilometer away from the giant Leif inside the big pit!

But under the imprisoning ability of Wang Lao, it was pulled little by little.

And it didnt slow down.

Fruit ability, with Xias current level of technology, can not be explained.

Jiang Fan was also curious to watch, but he wasnt much surprised!

After all, the main world had all kinds of even more incredible transcendent phenomena!

Five kilometers!

Four kilometers!

Three kilometers!

Two kilometers!

The mushroom bomb was held captive.

Being contracted closer and closer to the giant Leif!

And the speed was getting faster and faster!

At this moment, Leif was still standing in that huge deep pit and there was no movement.

The crowd also guessed out in the middle of that violent explosion.

Although Leif had a terrifying physique, he did not suffer any serious damage.

But the body tremor was still there.

It was like being punched hard by someone!

Nothing was hurt, but he still needed to rest for a while to slow down!

Leifs current situation was the same.

He just stood quietly at the bottom of the pit to slow down, while opening his gigantic head.

Looking up at the high-speed falling mushroom bombs from the sky, Wang Lao desperately used his ability.

But facing the high-speed mushroom bomb.

He also seemed a bit tired.

He was gritting his teeth.

Green tendons sprouted!

Wow!

Wang Lao spat out a mouthful of blood.

But still held on for dear life.

One kilometer!

At this time, the speed of the falling mushroom bomb had come to Over six hundred meters per second!

Wang Lao put out the last bit of energy.

Finally!

Put this mushroom bomb with Leif.

Shrunk within the range of one hundred meters!

In a moment, the mushroom bomb arrived at the top of the giant Leifs head!

It was detonated with a bang!

The Great Desolate Army had a very good grasp of time!

The giant Leif still had a trace of curiosity on his face.

Looking at this oval strange object, he did not know what he was about to face!

In the distance, on the fleet of the Great Desolate Army, one by one, the soldiers of the Great Desolate Army were under the command from above.

Down on the ground, they were holding their heads and covering their ears!

Later, they turned their back toward Leif Island!

And far away on the commander-class warship, Han Xin and others also put on the specially made goggles early!

He also gave Wang Lao and Wu Kongkong a pair!

Three supernovas Asha, Paul and Kidd were on Leif Island.

Although they didnt know what the falling black dot was, but the vigilance in the dark told them!

This thing was terrifying!

Extremely dangerous!

When that black dot was less than a kilometer away from the Giant Leif, they instantly and unanimously retreated backwards!

They were fleeing fast, towards the outside of the island!

Fear!

A kind of unprecedented great fear!

It was a fear that words could not describe!

Gradually, it filled their hearts.

They didnt care about their supernova pride and self-pride!

Chapter 378

378: River Explosion! In the name of Desolation! The Day of Destruction!

About the bad reputation of running away, they didnt care about being seen by their subordinates in this wretched shape.

At that moment, in their hearts, there was only one word

Run!

Run away with all your might!

The next moment!

Light!

A powerful light!

A light that shone on the earth and the sky!

The three supernovas turned their backs towards the Giant Leif.

They didnt know what was happening behind them.

But they saw a radiant light of unparalleled terror!

Compared to the red sun above the sky didnt know how many times more dazzling it was!

In that world, nothing could be compared to it!

It was as if all the darkness was illuminated!

Facing the three supernovas under the pirates of Leif Island, the eyes were directly blinded!

In this moment of light, on Leif Island, everything around the center of the explosion, everything turned into ashes, annihilated into nothingness!

Even the giant Leif, who was known as the strongest body in the Navy!

In his sight, besides the endless dazzling light!

There was no longer any trace of color, he could not hear any sound!

As in the midst of darkness, someone had a strong flashlight shining into his eyes!

Time seemed to stand still at that moment.

The blinding white light at this moment transformed into a purgatory!

The huge Leif Island was enveloped by this unprecedented light of death!

The prelude of terror pulled off by this blast of light!

The breath of death crawled into every corner of the proud body of the giant Leif!

For Leif it was the first time he felt the threat of death!

This was something he never felt even when the navy tried countless means of punishment on him.

In the corner of the eyes, he saw what was in front of him.

Everything, whether it was dirt, rocks, trees, turf, or buildings and roads and so on!

Any object, anything that could be seen!

Anything that couldn't be seen!

Instantly everything disappeared!

Annihilated into nothingness!

Yes, nothing left at all.

A terrifying heat struck swept through his entire massive body!

The ground trembled!

Swirling, twisting, shattering!

The earth-dragon turned over was not so terrifying!

Immediately after, there was a huge thunderous explosion!

The sky and the earth collapsed!

The ground shook like a mountain!

After the sound of the explosion, there was a huge brownish-red ball of fire over ten kilometers in diameter!

It was more dazzling and hot than the red sun in the sky!

An enormous ball of fire was burning everything around!

This ball of fire was rising rapidly!

It swelled violently.

Like a sun that has just half risen.

Then it turned into a cloud of gray-white smoke.

Followed by, a trail of debris and dust rising upward from the ground in the center of the explosion!

It was carried into the air by the rapidly rising air waves.

It became an ever-expanding pillar of dust, gradually connected with the fireball smoke cloud!

After the massive cloud effect, an unbelievably immense cloud like a blooming mushroom, appeared in the sky above!

Rhizomes supported the bottom of the mushroom.

These rhizomes comprised various pieces of matter and water vapor that had been pumped into the air by tremendous energy!

Around the bottom a very wide range of water curtain rose and quickly fell down again.

The upper part of the mushroom cloud was white.

And then, it boiled and tumbled to a maroon color.

The ten kilometer diameter was getting bigger and bigger!

Almost the entire center of Leif Island was covered.

The air was filled with unimaginable heat.

This mushroom bomb of hundreds of kilograms exploded with 300,000 tons of super high gunpowder equivalent!

Under such a terrifying power, the prison capacity of Wang Laos prison was even more powerful.

Also just a moment

He could stand it at all!

Wow.

Spit out a mouthful of fresh blood!

His face turned pale!

The look was completely slumped down, but it didn't matter anymore.

The mushroom detonation had been formed!

Nothing could stop its destructive and terrifying power anymore!

But this was just the beginning.

The huge power of the mushroom bomb was still behind.

Shockwave!

Terrifying shock wave with overwhelming momentum.

Nothing could resist!

Even Asha, Paul and Kidd, the three supernovas were also like wheat in a field.

They were swept by the gale!

They were blown up into the sky and hit hard on the cliff wall not far away.

As for the others on Leif Island.

Those zombies that became huge and the soldiers who were still intact.

Or the powerful lieutenants!

These vice generals were also all commander level characters.

The strength of each one was at least above Modo.

But still in front of this terrifying shockwave, they became so powerless!

A zombie and ordinary navy soldiers directly flew out!

Not to mention them.

Even boulders weighing several tons.

And tall trees were like being hit by a hurricane.

Thrown away into the air!

Click click click

From the center of the explosion, the highest mountain peak on Leif Island was several hundred meters high!

But after the shock wave swept through, there was a cracking sound!

Immediately after, that mountain top shattered layer by layer!

Collapsed!

Of all those who watched this scene, only Jiang Fan was not affected.

Its over! Its all over!

Jiang Fan let out a long breath of relief.

In front of this heaven-destroying and sun-destroying terrifying power

Even though Leif was known as the strongest body and defense of the Navy.

He was no different from ordinary people!

Chapter 379 : The stars shine! The heavens congratulated! The endless road ahead!

At the edge of Leif Island.

-On a cliff, Asha, Paul and Kidd and the other three subconsciously fell down.

They didn't care about their supernova appearance.

They only knew that

If they didn't get down.

They might die!

Seeing that dazzling light that illuminates everything in the world flashes.

All three couldn't help but

Turned their head.

They wanted to see clearly What really happened back there!

Last time, a thousand tons of gunpowder exploded.

And made them a little surprised.

Then!

This time, it was the mushroom bomb!

It was a complete shock!

Totally incredible!

Beyond their imagination and overturned their world view!

In this world

There was still such great power!

In the line of sight.

A ball of fire that was more dazzling than the red sun in the sky rose up!

Releasing an amazing heat!

The pressure around it increased to billions of atmospheres!

And quickly expanded in all directions.

In the form of ray radiation.

Heating up the surrounding cold air.

And became a high-temperature, high-pressure plasma!

Emitting a terrifying light radiation!

Immediately after that

A huge shock wave was formed from the center of the explosion.

Like a mountain and sea waves, swept in all directions!

It went everywhere.

Nothing could stop it!

The small lake closest to the center of the explosion!

The water inside it instantly evaporated!

-Not a drop left!

The surrounding mountains, rivers, forests, meadows, fields, buildings.

Under this horrible shock wave and high temperature.

They fragmented inch by inch!

Mountains and rivers crumbled.

Rivers collapsed.

The trees in the forest were destroyed.

One by one, buildings fell helplessly!

Immediately after that.

The terrible heat hit.

Plants of vegetation and trees

All were on fire!

Leif's huge palace that was built after several years of construction.

Under this amazing power.

With a click!

It collapsed with a bang!

Get down!

Asha, who saw the situation was not good, subconsciously shouted.

His voice was trembling!

Paul and Kidd both had little hesitation!

Hastily head heavily down to the bottom of the cliff.

Hula

The violent shock wave swept away in a moment!

Swept all the trees and boulders above the cliffs... all into the sky!

Some small vegetation and rocks were even destroyed.

Turned into pieces!

Despite the distance of several kilometers from the center of the explosion!

But the three of them still felt the terrible impact!

The shock wave continued onward.

And head out of Leif Island!

Clatter!

The boats that stayed at the entrance of the bay.

As if they had encountered a frightening wave.

The sea below formed huge waves!

Rolling one ordinary ship and battleship up!

Hula.

A small fishing boat was even snapped off!

Cracked in half!

Not far away, hundreds of ships under the name of Supernovas suffered as well!

Click, click, click

Crackling

On the pirate ship, the glass towards Leif Island shattered one after another All shattered!

Shards splattered all over the place!

Doors, railings, decks, life preservers, etc.!

The vast majority were lifted off the ground.

Hundreds of people were standing on the deck.

The pirates who were watching the three supernovas and Leif fight.

First, they were blinded by the dazzling light.

Now they were even more affected by this hurricane-like shock wave

Directly rushed into the air.

And drew a high arc in the air.

Landed heavily inside the water.

But this time!

No one would think to save them.

In front of the threat of death.

The remaining pirates were hiding under all the objects that could hide them.

Cowering and shivering.

They didnt even dare to breathe.

In the sea a few dozen kilometers away from Leif Island.

Three commander-class battleships were heading this way.

Above the deck, stood a middle-aged man with a sturdy figure.

This guy Leif is really troublesome, such a thing happened on the island!

The stout middle-aged man shook his head.

If I wasnt close, I wouldnt bother to go over there!

My lord, if you go there, Leif will at least owe you a favor. An adjutant next to him said.

The stout middle-aged man smiled faintly.

If Asha and other three supernovas were here.

They would certainly recognize

This stout middle-aged man was A naval commander who was almost as famous as Leif Meng Li!

Even

His attack power was stronger than Leif!

The three supernovas dare to take the initiative to attack Leif.

But they would never dare to attack Meng Li!

Because Meng Lis speed and attack power was very terrifying!

He might just eat them and walk around.

And in an hour ago.

The surrounding navy received a report from Leif Island.

That there was chaos on the island!

Many navy soldiers inexplicably turned into monstrous cannibals.

Chasing people around like crazy.

And after being eaten by these crazy soldiers, the soldiers on the ground also changed quickly!

This was something unprecedented.

It attracted the attention of the navy.

After discussion, the nearest Grand Commander.

That was, the Grand Commander Meng Li.

He came to Leif Island to check the situation.

Leif should be fine, right?

The adjutant asked.

This guy, how could something happen to him?

Mengli smiled lightly and said: In order to deal with this guy, what kind of means did our navy use?

As a result, you know.

Nothing happened to this guy at all!

And Asha, Paul and Kidd, those three supernovas. The adjutant continued, These three troublesome guys also came to join in the fun, Leif is really going to have a headache.

It doesnt matter.

Meng Li shook his head slightly and said, No matter how chaotic Leif Island is, as long as Leif is there

What soldiers go crazy, what supernovas
All are jumping clowns, a small matter!
As a colleague of Leif for many years.
Mengli was too aware of Leifs abilities.
That exaggerated physique.
Even if it was him.
Attacking him day and night non-stop was also completely unable to break the defense.
This was why
Although Meng Li was more powerful in attack and had more seniority.
One of the main reasons why the outside world still ranked Leif above Mengli!
Speed up, wait until Leif Island, and take away a few jars of old wine for Leif.
The corner of Meng Lis mouth had a hint of a smile.

Chapter 380: The stars shine! The heavens congratulated! The endless road ahead!

The adjutant next to him just wanted to echo a sentence.
Suddenly, he seemed to sense something.
He looked up in the direction of Leif Island.
Meng Li also looked at it the same way.
In the field of view of the two.
The first one was an unparalleled one!
It covered the dazzling light of the red sun in the sky.
Immediately after that
Above the sky, a huge mushroom cloud Slowly formed!
The diameter exceeded more than ten kilometers!
It covered the entire sky dome.
It was visible from far and near.
With a clatter
Beneath the battleship, a terrible wave accompanied by the sea water.
It quickly swept over!
A group of fish in the nearby water was scared to crackle and jump!
Although this shock wave was a few dozen kilometers away.
The power had lessened.
But Meng Li and the adjutant could feel That terrible destructive power!

Both of their eyelids twitched involuntarily.

It was as if something horrible had happened!!!

Ten seconds of silence passed.

Meng Li was the first to react and immediately barked an order: Quick, speed up, don't hide, speed up the battleship to the maximum speed, give me the fastest time to get to Leif Island!

Meng Li's eyelids twitched.

The heart that had always been calm was also violently up and down!

In the darkness, he felt the approach of death!

Although there was still some distance from the island!

But it was so real.

As if he had just brushed against the god of death!

Eyes widened.

He was staring at the gigantic mushroom cloud above the sky.

Meng Li took a deep breath.

Even with his experience of being a naval commander for so many years.

He couldn't understand either

What the hell was going on there?

Could it be some powerful fruit ability?

But, even if there were people stronger than him in this world.

There was no way to create such movements and scenes!

This kind of terrifying mushroom cloud.

Like a canopy of heaven.

And like the curtain of hell, pulling back the curtain of death.

Let people look at it with fear.

Hold back the trembling in the heart.

Meng Li was still moving forward.

He wanted to know

What was happening on Leif Island?

The battleship beneath him was moving forward at full speed.

Not long after that, the gigantic figure of Leif Island appeared in front of the eyes.

But only the scene outside the island.

Meng Li was surprised to see the bay inside and outside.

The ship, whether it was a huge warship or a small fishing boat.

All fallen to the east and west.

Some also overturned in the sea.

A plot of land on the entrance of the bay was like it had been plowed again.

Neat and tidy, incredibly smooth.

There was nothing.

The surrounding trees were broken off at the root.

The cliff face was torn in half.

The entire bay was in shambles.

There was still a pirate fleet nearby.

But Meng Li couldn't handle that much at the moment.

He quickly jumped off the ship.

He did not even wait for the adjutant and other men behind and went straight to Leif Island.

Not far away, three wretched figures showed up.

It was Asha, Paul and Kidd, three supernovas.

But at this time, these three young men of great reputation looked like a beggar.

All the clothes on the body were torn, and the hair was messy.

Their faces were pale.

There was a trace of fear in their eyes!

They were still in shock.

These three people also suffered minor injuries.

But with their special ability there was no major damage.

The three of them also saw Meng Li who came over.

If it happened in the past, there would have been a huge fight.

But now

The three of them had no desire to do so.

The three supernovas were looking at each other and turned to the center of the explosion on Leif Island.

The three supernovas were also looking there.

There was a tacit understanding with each other.

They did not strike at each other.

Instead, coincidentally headed in this direction.

They all wanted to know.

What exactly happened just now?

In the air, a stream of black smoke formed by debris, dust and other substances enveloped the entire island!

Meng Li slightly inhaled a mouthful of it.

And couldn't help choking.

Fires were still burning closer to the center of the explosion.

The higher the temperature!

The scene was also getting more and more Tragic!

Meng Li saw the highest mountain on Leif Island.

It was gone!

Disappeared, razed to the ground.

The palace where Leif lived also fragmented.

It also turned into a field of debris.

The river that passed through the center of the island.

All the water inside evaporated cleanly, and the river channel was directly displaced!

On the surrounding ground, there was nothing!

There was no breath of life.

All the trees, turf, birds and snakes, insects, fish and shrimp, crops, etc.!

All could not be seen.

This made Meng Li think of a word

A thousand miles of bare ground!

It was like an apocalyptic scene.

This was also a scene that Meng Li had never seen before.

He could never imagine.

One day, he would actually see such a terrible scene!

It was like hell.

As the center of the explosion approached.

Meng Li and the three supernovas footsteps became more and more cautious.

They saw the

The center section.

There was a huge and unbelievably deep pit!

Wait until you get to the edge of this big pit.

By looking down they find out that this deep pit was actually more than a few kilometers away!

And nearly a hundred meters deep!

When the four people swept this big pit around.

The brain buzzed.

They could not help but trembled!

Because they found that

Inside this big pit, there wasnt actually Leifs huge figure!

Not just the figure.

Even the possible remains of broken fingers or black charcoal fragments could not be seen.

There was nothing at all.

In addition to the burnt dirt and constantly falling black matter.

There was nothing else.

Dead! Is Leif dead!?

Asha muttered.
