

One Planet 391

Chapter 391

391: Level two Blue Star! Amazing change!

The planet that suddenly became larger.

Few people noticed it.

Only a few scholars, such as Yan, observed it.

But they were not surprised.

Knowing that the planet that lives beneath their feet was constantly increasing.

The diameter of the planet has almost doubled, but the size of the planet didnt stop there.

There was a lot of extra land.

On the first land, a whole new terrain landscape appeared.

Originally, the longest river was the Desolation River.

But now, it generated another river that was wider and had more flow.

The course of this river was from north to south.

It was located on the west side of the first land mass.

It formed another watershed corridor because there was a red mineral nearby.

This river often carried a large amount of this red mineral.

It was giving the river a red color.

Lets call it the Red River!

Jiang Fan also didnt have any good name available.

So he directly called it the Red River.

In the basin of the Red River, a huge rainforest had formed!

This was also a landform that was not present in the first land before tropical rainforest!

The Blue Star after promotion, had fifty extra species.

The vast majority of them were living in this tropical rainforest.

The area of the rainforest was still a bit smaller for now, but Jiang Fan could imagine that as the area of the Blue Star continued to increase, this tropical rainforest would grow even stronger.

There would be more and more new species born in it!

In the previous life on Earth, the tropical rainforest was the territory with the most species.

After seeing the tropical rainforest, Jiang Fans gaze moved north.

On the north side of the first land, the uppermost location of the Xia Kingdom, a glacial snow field appeared.

The temperature was very low, often below zero degrees.

It was not suitable for the survival of the vast majority of life.

This piece of glaciers and snowfields had just been born, and there was no life.

The greatest significance was that it enriches the geographical form of the Blue Star.

On the southern edge of the Xia Kingdom, on the edge of the first land, a vast mountain gradually formed.

It was originally a remote forest in the mountains.

Now it was even more

The endless mountains!

There was no need for Jiang Fan to think about the name of this mountain range.

The people living around it called it Cross South Mountain Range!

The species inside were also very rich.

Basically, no outsiders disturbed them.

The ecosphere was very complete.

The Red River, the tropical rainforest, the glacial snowfields, and the Cross South Mountain!

It was the most remarkable change on the first land after Bluestar rose to level 2.

Other places like vast plains where the people of Xia lived, lakes, and so on.

The area was getting bigger.

These were only superficial changes.

In places that were invisible to the naked eye.

There were other changes as well.

For example, the soil.

There were also many species living.

Vitality naturally increased as well.

The fertility of the soil itself also increased significantly.

Let the plants and crops living on it grow more rapidly.

In addition, the most important minerals for the development of Xias technology!

The amount of storage increased steeply!

Especially Star meteorite iron.

Originally, there were a lot of reserves.

Now it has doubled!

Even more inexhaustible.

The original reserve of Zhen gold was one hundred tons.

It was almost all collected by the Great Desolate Army and used to make all kinds of weapons.

And now

It generated another five hundred tons out of thin air!

The follow-up was still brewing rapidly.

At least!

Next.

The Great Desolate Army no longer had to worry about the reserves of Zhen gold.

Hmm?

Jiang Fan suddenly realized.

Besides these two magical metals.

Another brand new metal was born!

It was near a coal mine site.

A miner, after digging a media car of media, found an unusual shape stone underneath!

It was clearly different from ordinary coal or other stones.

This miner immediately reported this discovery!

The top also attached great importance.

He immediately dug up this stone.

After a simple test, he did not find out what it was.

And reported it to the higher research institute.

But this time, most of the scholars of the Great Desolate Army were on leave.

And no one paid attention to this matter.

Jiang Fan wasn't in a hurry.

His gaze moved away from the first land.

Turned to the second land.

Here too, naturally

There was an enormous change!

The area of the second land mass had more than tripled directly!

At the moment, the planet was successfully promoted.

A giant beast on the land seemed to have felt something.

All looked up at the sky.

A loud roar sounded out!

Even the overlord of the second land

The giant three-headed snake was also stretching out three heads, and glanced at everything around it with some doubts.

In the darkness, it could feel that

A substantial change had occurred around it!

The main thing was, Its own vitality seemed to

Enhanced a lot!

Under the promotion benefits of Blue Star, more and more gigantic creatures appear.

Under the crypt, the skeleton reptilian race had produced several more small babies.

The entire colony was rejoicing!

But what they didnt expect was further down in the crypt.

Because of the Blue Star promotion, an even more terrifying creature gradually was formed!

Same as the first land.

The second land terrain landscape also gradually had its own prototype.

Because of the large number of giant beasts living here.

Various terrain also exaggerated a lot.

Tall and lofty mountain peaks, Miasma-filled swamp.

Dense jungle, eerie dark caves.

All of these were difficult to see in the first land.

The giant three-headed snake that ruled this land could not help but be a little restless!

This way, the difficulty of ruling was even greater.

Blue Star promotion after the additional fifty species.

There were nearly ten species.

All of them were on the second land.

And most of them were species of immense size.

Deep in the jungles and swamps, a whole new life was born.

Chapter 392 : Level two Blue Star! Amazing change!

Besides the first land and the second land, the ocean was also changing.

The area was uncountably increased.

The wide sea formed a great cradle of life!

It could be imagined that in the future many fish, shells, seaweed and other life would be born in the middle of the ocean, but the biggest change after the promotion of Blue Star was not the first land, the second land or the ocean.

Rather, on the other side of the second land, across from the choppy waters, a brand new land was born!!!

This was also the third land on the Blue Star!

As Jiang Fan was just about to check out the situation of this new land, a doorbell came from outside.

Jiang Fan came out of the awakening space.

He stood up and opened the door and looked.

It was Su Jicheng with a smiling face.

Jiang Fan invited Su Jicheng in.

Su Jicheng smiled and said, The top has determined the strongest new students for this year's class. The school and the elder group have all passed. Congratulations!

Thank you for the school and Teacher Su.

Jiang Fan was polite.

The speed was still fast.

In the future, you'll be able to have all kinds of resources that other students can't get.

Su Jicheng pointed to Jiang Fan's communicator and said, Take a look for yourself. The first batch of resources sent down by the school should have already arrived.

Oh?

Jiang Fan picked up the communicator and checked it out.

Sure enough, he found that a remittance alert was received.

The amount shown on it was two billion federal dollars!

TotalTen Billions of Federal Coins

Su Jicheng explained, This is also the reward for the strongest freshman and for you passing the Great Mythology level mission, but it's impossible to give it all to you at once.

You should also understand the school's intentions.

Jiang Fan nodded slightly.

It will be divided into several batches for you, and when you run out you can also ask the school, but

Su Jicheng's face became a little serious, and he said, This strongest freshman is not a complete conclusion. It also depends on your future performance!

Of course, it doesn't mean that you have competition.

But to avoid some special cases!

For example, if you do something wrong in the future, or if you don't want to make progress, then

The school will take back these resources!

I understand this.

Jiang Fan smiled faintly.

In the history of the school, there had been some demonic freshmen.

After passing the planet promotion test and gaining the strongest freshman.

They became drifting.

Even

They would receive rewards from the school and go outside to have fun.

Completely let go.

The whole person became useless!

Later, Bei Dou University added a lot of restrictions.

Keep you motivated all the time.

In addition to the federal currency, other resources are naturally available.

Su Jicheng then said: But the civilization built on each person's planet is different, your respective unprecedented brand-new civilization, and the school doesn't know what resources you need!

So let me inform

When you have a need, you can ask the school for a review!

As long as it is not excessive, it is usually able to meet!

With that

Su Jicheng looked at Jiang Fan again and said, Your current planet is also level two, according to the usual practice, you can consider creating a brand new transcendent species, do you have any ideas?

A whole new transcendent species?

Jiang Fan wasn't surprised.

This was basic common sense now.

A level one planet.

-In general, it could create up to two extraordinary species.

Unless it's like Bu Jing Yue.

That uses the heart of the stars.

And after the planet was promoted to the second level.

Could create another kind!

But

On Jiang Fans Blue Star there were just ordinary people.

Not the musketeers rumored outside!

There was no need to build any brand new transcendent species.

Its just that

It was impossible to tell the truth.

It wouldnt do Jiang Fan any good either.

Ill think about it, I dont have any ideas yet.

Jiang Fan said.

Then

He suddenly thought of the third land where Blue Star was just born.

It was bare.

Vegetation, crops, beasts, insects, flying birds, swimming fish And so on.

Nothing at all!

Not a single life existed on it!

Instead, we can create a whole new species of life on the third land.

Jiang Fan thought secretly and said, To be different from the first land and the second land, it should benefit the most!

Transcendent species were naturally out of the question.

It wasnt like there was any transcendent energy on the Blue Star.

Even if you put an immortal cultivation race with unbelievable talent into it.

But without aura, slowly it could only degenerate into ordinary species in the end.

Not useful at all.

Hearing Jiang Fans words.

Su Jicheng couldnt help but smile and said somewhat helplessly, Although Im your mentor, but to be honest, theres nothing I can do!

Youre building a brand new civilization, theres no predecessor to learn from!

Lets do this, Ill send you some information.

Su Jicheng opened his communicator.

Quickly sent over a large amount of information.

A brand new civilization that someone has built in the history of the school.

Su Jicheng explained, These are brand new civilizations that have been built by other students in the history of the Bei Dou University school, so take a look first!

But be careful

These brand new civilizations are difficult to develop behind, the strongest one is only promoted to the fourth level of the planet!

Other schools and forces have more powerful new civilizations!

But this kind of information, you should know

All are extremely precious secrets and cannot be disclosed to outsiders.

This is not bad, at least it can be used for reference.

Jiang Fan smiled.

Rather, he didnt think anything of it.

In reality, this information was not of much use to him.

References were not meaningful.

In Jiang Fans heart.

At this time, he already had an idea.

That was

To check if there were any suitable strange creatures just like the atomic dinosaurs on the second land.!!!

Chapter 393 : Building the Third Land! A new race! The second generation of water droppers!

Su Jicheng explained a few more words and then he excused himself and left.

After Su Jicheng left, Jiang Fan opened his communicator and went into the school mall to check if there were any strange creatures for sale.

Jiang Fan was quite disappointed with the results.

There were strange creatures, but there were only a few of them!

Not only were they expensive, the quality was just average!

Jiang Fan glanced, but couldn't find any interest.

But Jiang Fan also understood that there couldn't be too many strange creatures in this school.

The major planet owners mainly used this thing for collection.

There was nothing of real value.

Find some time to go outside the school and take a look.

Jiang Fan could only put aside this idea for now.

He stood up and jumped lightly.

His fingers easily touched the roof.

Promotion to the second level didn't just increase in life expectancy, his physique was also greatly improved!

There was a difference between a level one planet master and an ordinary person, but not that much.

The second level was different.

It could be said to be a true transcendentalist, but that doesn't do much either.

What really mattered was longevity!

Although there were various extraordinary planets and there were heavenly treasures that increased the life span, it was for the people in this world.

The effect was greatly reduced.

It could delay it for a few more years at most.

For example, he could only live to be eighty years old, but with the use of precious life-sustaining treasure, at most could give you a few decades to continue!

No way after that.

And the second level planet master was able to live at least a few hundred years!

The third level planet master was even more.

And so on to the sixth level planet master.

Then you could live for a long, long time!

Level two planets are only really on the road.

Jiang Fan lamented.

Level one planet was too small.

Various resources were also limited.

Up to nine hundred and ninety-nine kilometers in diameter

What could be done?

It could only cultivate one or two transcendent species.

It directly consumed all the resources on the planet and secondary planets.

Theoretically, the largest diameter could reach nearly 10,000 kilometers!

It was similar to the previous earth.

The space for exertion was increased greatly.

Jiang Fan drank a glass of water.

After taking out the last college entrance examination, the Jiangcheng City Lord rewarded him with the one Star Pearl!

He re-entered the awakening space.

The newly born third land was still too small.

He had to wait for it to grow up.

He didn't know how long it would take, maybe until the year of the monkeys!

Jiang Fan was ready to use the Star Pearl directly.

The effect of the Star Pearl was that it could transform the local terrain without affecting the operation of the entire planet.

Before using it, Jiang Fan used the projection system and performed some deduction.

Finally, he determined the best land area and threw the sealed Star Pearl in it.

He threw it in the sea next to the third land.

Clap clap clap

Instantly, the sea resounded with loud sounds like mountains and waves!

Under the sea bottom, there were land masses that were rapidly rising!

It scared the fish and shrimp growing in the sea to flee in panic.

These plots of land were at a speed visible to the naked eye.

In the rapid rise.

Soon!

Had come to the surface of the sea together with the newly born land.

It formed a brand new The third land!

Up to this point!

Above the Blue Star.

It had three land masses.

In terms of area, the first land where Xia was located was the largest of these three!

The second land was the second largest.

It was a little smaller than the first land.

Mainly because the species and the number of lives were not enough.

The third land was smaller again.

It was still bare.

No life existed on it.

In the promotions process of the Blue Star.

One by one, life on the first land and the second land.

Whether humans or animals, or the giant three-headed snakes

All had been enhanced greatly!

But the one that had improved the most was

The water dropper peoples, who had already come out of the valley!

Water dropper people rely on the advantages of memory continuity.

The level of technology had developed quickly!

In just a few generations, it already made the second generation of water droppers!

This was not a real water dropper.

Rather

It was using several metals from the second land.

Combined refining into an alloy.

And then used this alloy as raw materials to make the second generation of water droppers.

The power was very amazing.

General giant beasts.

Such as the saber-toothed tiger and tyrannical bear were simply not a match for the water dropper people.

Boom!

Among the tall forest, several water droppers were hunting a wounded bear together!

This tyrant bear had a conflict with its own kind because of courtship!

Had a hard fight and lost.

And injured.

So

It was secretly being watched by the water droppers people.

And made a sneak attack.

-a water dropper man launched a water dropper.

The second generation of water droppers and the first generation were different.

No longer thrown by hand.

Instead

They were using a firing tool very similar to a crossbow.

But it wasn't a crossbow.

It could be much more powerful than a crossbow.

This was because the internal structure had been modified by the water dropper people.

As soon as it fired, the second generation of water droppers.

It would speed up quickly.

In a very short period, it accelerated to an extremely alarming point.

This wounded tyrannical bear, even if it perceived the sneak attack of water droppers, it simply could not react.

It was shot directly through the heart.

Then

Whoops!

Water droppers not only had high speed.

There was also a huge destructive power.

This was because of its special internal structure!

Jiang Fan was amazed.

Jiang Fan curiously observed the current community of Water droppers still living in the pyramid.

But it differed from the previous, just a few pyramids ahead.

Now the water dropper people went through several generations of development.

Chapter 394 : Building the Third Land! A new race! The second generation of water droppers!

The number had come up.

There were several thousand people!

They also gradually moved out of the valley, but there were all kinds of giant beasts out there.

There was that terrible giant three-headed snake.

Also did not dare to stay too far away.

Just outside the valley, they built a small pyramid!

Water dropper people weren't considered a family system.

Strictly speaking, it was a group system that abided by the rules of the group!

Unlike humans, water droppers could function regardless of gender.

It was their gift, but heavily parochial.

They have already considered the creation of water droppers outstanding.

The technology content was very high, but in other areas such as clothing, food, housing and transportation and primitive tribes were no different.

Cultivation of crops was a problem.

Now the major source of food was still remained the land plants and animals.

The main reason for sneaking up on this injured bear was In order to get enough food for the winter.

But the water dropper people were very cautious.
They strictly comply with the rules set by the group.
And did not dare to have a greater action.
Carefully, everything was predicated on survival!
Sometimes Humans were not very bold.
And sometimes very small.
It could not be helped.
The first land was full of ordinary plants and animals.
Humans in the past day were determined to dominate the position.
Those large carnivores were about to be wiped out by humans!
And the second land
There were too many terrifying creatures.
Just like that giant three-headed snake.
Based on the results of internal discussions among the water dropper people.
It was not an opponent at all!
They needed to wait until the birth of the third generation of water droppers.
Only then they would have a chance!
Water dropper people's community was rapidly developing and in a low-key manner.
And on the outside.
Another powerful race
The Atomic Dinosaurs did not care so much and were very high profile!
Benefiting from the promotion of the Blue Star.
This generations Atomic Dinosaur colony had greatly increased again.
Originally, there were only about twenty of them.
This generation had over thirty heads!
But because they werent living as a group.
Each one was scattered very far apart.
Born with a powerful physique, it was almost spread throughout the second land.
No one ever dared to provoke these atomic dinosaurs!
They had inherited the laziness of their ancestors.
Nothing aggressive.
But still attracted Giant three-headed snakes attention!

Giant three-headed snake had three heads and six cold snake eyes.

Staring at these big guys with good strength.

Vaguely feel the threat!

It would be fine if the current situation was preserved.

The scariest thing was if these atomic dinosaurs united!

At that time, it would be an army of sixty atomic dinosaurs!

Even if the giant three-headed snake was strong.

It couldnt resist!

No!

They must strike first!

The giant three-headed snake observed it for a long time.

It made a secret move.

First, it started with the old atomic dinosaur that was alone!

One was quickly killed.

The old atomic dinosaur lived alone in a place, basically didnt had attention of its kind.

The death did not cause any ripples.

The giant three-headed snake was very cautious.

It waited for several days.

After confirming that there was indeed no impact.

Only then it continue doing it!

Just like that

After more than a month of frequent strikes.

Those few old atomic dinosaurs were all taken out by it!

Although Atomic dinosaurs were lazy.

But werent stupid.

So many of their kind died.

It finally caught their attention.

They prepared themselves for a defense!

Giant three-headed snake was not in a hurry.

It stopped the killing plan and was quietly waiting for a better time.

A few months later, the atomic dinosaurs gradually let down their guard.

The giant three-headed snake secretly started doing it again!

So several times, it hunted down more than a dozen atomic dinosaurs.

During a sneak attack on a tenacious atomic dinosaur.

Something went wrong and the other side escaped!

Thus

Giant three-headed snakes secret plan was finally exposed!

It startled the rest of the atomic dinosaurs.

Only then they gathered together.

Not to give the giant three-headed snake a chance to take advantage of it!

Because the promotion was already over.

Jiang Fan didnt have so many scruples.

So he directly carried out time acceleration.

-And in a shake, a few months have passed!

On the side of the Xia Kingdom, with the end of the conquest.

A group of high-level executives formulated a comprehensive development plan after the war!

The primary focus was still on peoples livelihood!

Besides combat use, other areas were also being vigorously promoted!

Primary industry, secondary industry and tertiary industry to develop comprehensively!

Especially the tertiary industry.

Before that, it was basically a desert!

Only the simplest of functions like movies, cameras, black-and-white TV were invented long ago.

But because of the need to give way to the conquest.

So they shelved it all!

Yan and other high-level executives were keenly aware of the huge prospects of the tertiary industry!

Began to liberalize!

The entertainment and service industries slowly reared their ugly heads.

The first movie, the first TV movie, etc. appeared one after another.

But one thing remained the same.

That was

Scholars and doctors were still the most noble professions in Xia Kingdom!

It took ten years for trees to cultivate people in a hundred years for the training of scholars.

Education was the top priority.

Xia Kingdom adopted a similar educational policy to the former Earth.

But it was different.

There was no pre-school education.

No kindergarten at all.

School started directly at the age of five.

Five years of elementary school, five years of secondary school, four years of university!

Only fourteen years in total.

Primary and secondary education is compulsory.

Free for all members!

This was because the individual mass of the Blue Star human being was stronger than that of the Earth in the previous life.

After college graduation, there was nothing like postgraduate and so on.

If you want to go further.

It was necessary to take the academic exam.

This was also today's Xia Kingdom

The most popular and anticipated exam.

Pass the exam and you would be able to become a scholar.

To enter the various research institutes for further study.

Chapter 395 : Building the Third Land! A new race! The second generation of water droppers!

At that time, Xia only had four colleges: the Academy of Scrupulous Things, the Academy of Heavenly Engineering, the Academy of Medicine and the Academy of Science and Technology.

In order to meet the needs of more people, Xia had built a large number of universities and it wasn't the same as the previous world.

The universities here adopted the policy of lenient entry and strict exit.

University was not difficult to pass, but it was difficult to graduate!

"If the university was run like this in the previous world, I guess I could have become a scientist."

See here, Jiang Fan couldn't help but complain in his heart!

Roasting for a roasting.

Jiang Fan also knew that it was unrealistic to do this in the previous life.

The gap between the two sides of the population and ethos would be very large.

The most important thing was the quality of the individual.

Xia Kingdom was just like any student with average grades in the school in the previous life.

Estimates were the best!

With the passage of time, not only education, other aspects of Xia were also gradually making changes.

New scholars were appearing, but some older people had also begun to pass away!

Yan was sixty-eight years old.

Zhang Liang, a military strategist who had not been in good health died of illness!

He was the first person of Yan's generation who passed away.

Yan was almost seventy years old.

Zhao Zilong, the junior general who captured Cao Meng alive back then.

Because of an accidental fall, he passed away in a few days in bed.

Before he died.

Yan personally came to visit.

And sealed Zhao Zilong's position as a Major general!

Other warriors and scholars who followed Yan from the beginning of the year also kept decreasing.

The passage of life made people helpless.

At the front of the Royal Tomb mountain range, a monument of glory was erected!

As long as the generals and scholars who had participated in the battles.

After death they were able to leave their names there!

As the old men around them continued to fall.

Yan and Ghost bustler and others also began to consider the issue of leaving and staying in the Great Wilderness Army!

At this time, There were already many scholars and generals.

They were aware that There was a higher existence above this planet!

That was secretly leading the development of the planet.

Especially after the promotion of Blue Star.

Let many scholars believe this even more.

Jiang Fan watched it with interest.

He did not interfere.

He wanted to see how these people are going to deal with the problem related to Yan!

This kind of thing was more troublesome.

The factors involved were not yet determined by Yan and other senior people.

They discussed it for a long time.

But there was no result.

Jiang Fan was not in a hurry.

When he detached himself from the awakening space.

He found an unanswered communication, turned it over and took a look.

It was from Lin Youhe.

Jiang Fan thought about it and sent back the message.

A few moments later, the communication was answered.

Lin Youhe's big face appeared in front of Jiang Fan.

"You just called me, what's the matter?"

Jiang Fan asked directly.

"It's not anything very important."

Lin Youhe smiled and said, "First of all, congratulations on becoming the strongest freshman in our class, and secondly, I have news to tell you!"

"What news?"

Jiang Fan blinked.

"Jiang Fan, you should be building a whole new species, right?"

Lin Youhe asked.

"Pretty much, you guys should be too."

Jiang Fan said.

"We don't have a clue yet."

A look of distress appeared on Lin Youhe's face as he said, "This second level planet is not quite the same as the first level, the ecological stability is higher, and the transcendent species created don't need to be so careful!"

"The most direct method is"

"Buy a transcendent species, seal it and cast it in!"

"This way once it's done, it saves time and effort!"

"We are all planning to do this, what about you, Jiang Fan?"

"Probably the same as you guys."

Jiang Fan smiled.

The approach Lin Youhe was talking about was indeed very straightforward and simple.

But the problem was that

Not everyone was able to use it.

Buying transcendent species would require a huge expense!

But if you build new species on the planet.

It would take even more time and effort.

There was also no way to be sure what the created species would be.

But in terms of potential, the species built by the planet itself was definitely better!

There were pros and cons to both approaches!

It depended on each planet owner's respective choice.

According to history, both methods had been chosen.

The main thing to look at was

To check the fit of the new species and the original extraordinary species!..... The degree of fit!

The higher the fit, the more suitable it was!

The fighting power would be stronger in the future.

"To buy a new species, the school mall is definitely not suitable." Lin Youhe smiled:

"That's why I contacted you, because"

"Once a year, the Planet Auction held by the Planet Association is about to be held in three days!"

"This auction is the biggest one every year!"

"Not only are there many precious resources, but also some more advanced transcendent species!"

"Xiang Zhifei, Wan Yunsheng and I are planning to go there and see what's going on!"

"Jiang Fan, do you want to come?"

"The Planet Auction?"

Jiang Fan had also heard of the name of this auction.

It was held once a year.

The scale was very huge!

Sometimes it would even attract the presence of a rank six planet master!

"There should be strange creatures at this kind of auction, right?" Jiang Fan asked.

"Strange creatures?"

Lin Youhe was stunned for a moment, and then said: "You are still interested in this, it'll definitely be there!"

"Many powerful planet masters are fond of collecting these strange creatures!"

"Then add me."

Jiang Fan said.

A new species for the third land was needed to be created as soon as possible.

"Good."

Lin Youhe was overjoyed.

Then he remembered something and said, "By the way, Jiang Fan, did you know that the new edition of the Heavenly Ranking has come out?"

"The Heavenly Ranking?"

Jiang Fan raised his eyebrows.

Chapter 396

396: No. 1 on the Heavenly List! One hundred thousand volts!

About the Heavenly Ranking, Jiang Fan had naturally heard of it.

As the name implied, it referred to the Heavenly Pride Ranking!

-Generally, In the eyes of a powerful planet master, especially a rank six planet master.

Only after passing the planet promotion test and becoming a level two planet master, do they truly heavenly pride.

Only then can they be seen by them.

This "Heavenly Ranking" was a powerful existence comparable to Jiang Fan before taking the college entrance examination.

The authority and accuracy of the so-called heavenly pride list was much higher!

"For every new student, there is this list."

Lin Youhe explained, "The ranking is based mainly on the planetary talent of each heavenly pride and the potential to build a race!"

"This is different from the Star Ranking, the focus is on potential!"

"Generally, all those who have made the list in previous years without exception are at least above the epic level talent to make it."

"So, you have a chance too?"

Jiang Fan asked with a smile.

"How could I?"

Lin Youhe shook his head and said, “Epic-level talent, which is considered at the top of our school, is considered to look at the thirty-six superb schools, but

“Looking at the entire federation, it can’t even splash a little water.”

After hearing this, Jiang Fan nodded slightly.

The Federation was really too big.

Even the superlative forces were unknown.

Besides the thirty-six superlative academies.

There were also those powerful dynasties, clans, chambers of commerce, star houses and so on, various organizations and forces!

And this heavenly Ranking was the entire federation’s heavenly pride!

The potential here referred to the possibility of becoming a level 6 planet master!

The higher the possibility, the higher the ranking ahead!

“Although the bottom of the ranking used to be epic level talent, almost all of those on the list are mythic level, most of them are great mythic level.”

Lin Youhe continued: “Jiang Fan, you will definitely be on the list!”

“Although the Federation is big, there aren’t many that pass the Great Mythic level of difficulty.”

“I haven’t looked at this ranking myself yet.”

Saying that Lin Youhe sent a copy of the information over.

Instantly, a huge projection appeared in front of him.

It was a ranking.

After seeing the number one ranked person.

Lin Youhe couldn’t help but let out an exclamation and said, “It really is this one, the Holy Son of the Sky Dynasty, even before his promotion, there were already people comparing him to that amazing Holy Son of the previous Saint King Dynasty, except that

“That Saint’s son failed to challenge the eternal level difficulty and had fallen long ago.”

“And the Holy Son of the Sky Dynasty chose the Great Mythology level and passed with little doubt.”

Reading through the top ten rankings, the latter ones were not looked at closely.

Slipped directly below.

As expected, Jiang Fan was even on the list.

His ranking shouldn’t be too high.

Only

This time, Jiang Fan and Lin Youhe both guessed it was wrong!

In the thousandth place, they couldn't believe they saw Jiang Fan's name!

The leaderboard showed –

988th place: Jiang Fan.

Faction: Bei Dou University.

Planet talent: Great Mythic level.

Planet race: Musketeer.

There were comments below –

The planet master had created a brand new civilization race – Musketeers, very powerful in attack, but weak in defense. If they could make up for this in the future, their prospects would be unlimited!

“Ninety-eight hundred and eighty-eighth place?”

Lin Youhe was very surprised and said, “This powerful being has been ranked high enough for you, and he is very optimistic about you!”

“You must know that there are not many of the thirty-six super-first-class universities that can rank in the top thousand.”

“This powerful existence still has an eye.”

Jiang Fan smiled faintly.

He was daring to place in a brand new race but was ranked so far ahead.

It required more than ordinary people's vision.

After reading Jiang Fan's ranking.

The rest of the list was also slightly smooth at a glance.

Basically, there was no suspense.

The total number of places was only less than eight thousand.

“The number of people on this heavenly list were not fixed every year.”

Lin Youhe explained: “In some years, there are more geniuses, and more people will be on the list.”

“Some years with less, there may be less than 5,000 people!”

“This year is even a big year!”

“However, this heavenly ranking is just to look at, for reference, nothing of practical significance.” Jiang Fan said.

“Yeah.”

Lin Youhe nodded and said, "The Heavenly Ranking is there every year, and it only makes one heavenly pride more famous!"

"If you can get on the Star Ranking, that's really awesome!"

"Star Ranking?"

Jiang Fan's gaze flickered slightly.

That was the list of all the second level planet masters.

It wasn't yet something that Jiang Fan, a planet master who had just been promoted to the second level, could covet.

"By the way, Jiang Fan, do you want to come to the planet auction?"

Lin Youhe asked.

A hint of anticipation flashed in his eyes.

"There is nothing to do, so let's go together."

Jiang Fan said.

"Okay, you come over to the spaceship area next to the school gate, I've arranged everything else."

Lin Youhe said happily and hung up the communication.

After a little bit of preparation, Jiang Fan was out the door for the trip to the auction.

Naturally, it was to see if there were any suitable strange creatures!

With the two billion federal dollars given by the school.

In addition to the previous seven or eight rewards of more than one billion.

Jiang Fan was not short of money now.

Of course.

Those expensive treasures still couldn't afford to buy them.

He called a car and soon came to the airship area next to the entrance of the school.

Inside the school, it was not allowed to fly in the air.

These airships were mainly used for external rides.

Coming here.

Lin Youhe was already waiting at the entrance of the airship area.

Next to them stood Xiang Zhifei and Wan Yunsheng.

"Jiang Fan, this way."

Lin Youhe beckoned and said.

"You're all here." Jiang Fan also greeted him with a smile.

“For you, a heavenly pride in the top one thousand of the Heavenly Ranking, this fellow Lin Youhe has specially chartered an airship.” Xiang Zhifei chuckled.

“That’s really too much to ask.”

Jiang Fan smiled faintly.

“You don’t have to worry. This guy’s family is rich. And he will have to pay for everything.”

Xiang Zhifei looked at Lin Youhe and laughed.

Although these airships are from the school.

But it still costs money to ride.

It’s just cheaper than the ones outside.

“Don’t talk nonsense, get on the airship quickly.”

Lin Youhe glanced at Xiang Zhifei.

He beckoned Jiang Fan to go up.

The airship quickly took off.

It went through the gate of Bei Dou University and came to the outside world.

That was the original world.

This was also Jiang Fan’s entry out of the school after so many months.

His first time returning to the outside world.

The speed of the airship was extremely fast.

After about less than two hours, It landed in an incomparably wide docking area.

The destination – the Heavenly Star Domain had arrived!

“The place where this planet is auctioned is in the Heavenly Star Domain Planet Association branch. Look, there are very many people coming this year.” Lin Youhe said as he led the way in front.

Chapter 397

397: No. 1 on the Heavenly List! One hundred thousand volts!

Jiang Fan and the three of them looked towards the left and right.

Indeed, the people coming forward were bustling.

The flow of people was very dense.

The auction was located on the eighth floor of the Planet Association building!

There was an entrance fee to get in.

The entrance fee was very high, it reached as much as 100,000!

Although this was nothing for people like Jiang Fan, if it was the ordinary people of this world, that would be their salary for months.

Following the crowded crowd, four people walked forward.

Soon, they came to the eighth floor where the auction was located auction hall!

It was an incomparably wide hall.

They kept looking at it and could not see the end.

“They used a certain treasure that can expand the space and can hold as many as several hundred million people!”

Lin Youhe introduced, “Of course, it’s impossible for so many people to come!”

“Let’s go sit over there.”

Lin Youhe led Jiang Fan and the three of them.

They came inside a luxury box.

The auction house had nothing but ordinary seats.

There was also a box.

But the private boxes would cost extra.

“Hmm?”

At this time, Jiang Fan suddenly saw that at the entrance to the auction house.

Two familiar figures appeared.

Tang Yushu, dressed in black and the beautiful figure beside Tang Yushu.

Probably Tang Qingqing ?

Followed Jiang Fan’s line of sight.

Lin Youhe swept his eyes at Tang Yushu and Tang Qingqing and said in a daze, “So it’s Teacher Tang from Heavenly Star University.”

“You still know each other, huh?”

Jiang Fan asked with a smile.

“We met once before at a party.”

Lin Youhe nodded and said, “This is the Heavenly Star Domain, that’s where the Heavenly Star University is located, and the Heavenly Star University has the most people coming!”

“This teacher Tang should be promoted by her younger sister. Come to prepare more treasures.”

Jiang Fan didn’t have any doubts.

Tang Qingqing wasn’t like them.

He was still a first-class planet master and had to wait until the second batch to be promoted.

He turned out to be all the heavenly pride of Jiangcheng Seventh Form.

But within just a few months.

Unknowingly, they already considered two people as two worlds.

With Tang Qingqing's current planet diameter ceiling.

He could pass the king level difficulty Even if it was very good.

Jiang Fan also just looked and then withdrew his gaze.

Converge his attention on this auction.

It didn't take long.

An elderly auctioneer walked onto the stage.

Also announced this auction officially started!

Most of the items auctioned in the front were less valuable.

The urine of the auction was also known to people.

The more precious must appear the further back.

Jiang Fan and Lin Youhe and others watched it while eating and drinking alcoholic beverages.

Occasionally chatting a few words but quite comfortable too.

"It's worthy of being the largest auction of the year, there are many things I haven't even heard of."

Lin Youhe said with a smile.

Jiang Fan also opened his eyes.

"The following item up for auction is a Star Pearl, which can be used on a secondary planet, starting price One hundred million, interested parties please bid."

The aged auctioneer said.

"Star Pearl?"

Jiang Fan and the others couldn't help but look at it a few more times.

This was for a second-tier planet master.

It was quite attractive but Jiang Fan had already used one.

Another one wouldn't be of much use.

The concern was

How much this star pearl could actually be auctioned for.

Lin Youhe and the three hesitated for a moment and gave up.

They did not participate in the competition.

Creating an additional new terrain, for the vast majority of secondary planet owners was not necessary.

Everyone's transcendent races were monotonous.

Only one was the most common situation.

In the end, the Star Pearl was auctioned off for over 300 million!

The auction continued onward.

The further back it went, more and more treasures appeared.

The atmosphere in the auction hall also became more and more intense.

One by one, the bids rose and fell.

But Jiang Fan was not interested.

He only waited patiently.

Finally!

After about an hour had passed.

The auctioneer continued: "The following auction is for the Strange Creature Series, interested parties please bid."

The words fell.

A sealing crystal appeared on the stage.

Inside the crystal an unknown creature was sealed in it.

There were big and small body sizes!

"Strange walking creatures, ah, that's what the big guys are interested in."

Lin Youhe and the others then lost interest.

Jiang Fan, however, sat up straight.

He watched with interest.

In this batch of Strange creatures on the stage, there were more than thirty kinds in total.

All of them were unseen or known to Jiang Fan.

Strange creatures were also the same.

Because of the rarity.

It was regarded as a collectible by those powerful planet masters!

Like the atomic dinosaur that Jiang Fan got from the Jiangcheng city lord's residence last time.

This was the only one.

As for the origin of the strange creature, no one could figure it out.

Many powerful existences speculated

It was naturally generated by heaven and earth!

“Jiang Fan, are you interested in this?”

Seeing Jiang Fan carefully staring at these Strange creatures.

Lin Youhe couldn't help but ask.

“Somewhat interested.”

Jiang Fan laughed.

“This

Lin Youhe hesitated for a moment, but still reminded, “Strange creatures are said to be born naturally, usually only one, and have little transcendent energy on them!”

“If you want to keep it as a pet, that's no problem.”

“But trying to build a colony on the planet, that's not going to happen.”

“Hasn't anyone ever succeeded before?” Jiang Fan asked.

“Of course not.”

Lin Youhe laughed and said, “There have been people who have tried, but without exception they all failed!”

“These strange creatures do not absorb transcendent energy, no one knows what they rely on so peculiar!”

“I get it.”

Jiang Fan suddenly remembered the atomic dinosaur before.

Other people's planets didn't have that many species.

Only Bluestar had them.

Plus Bluestar's unique environment.

Nonetheless, it still took several generations afterwards.

The atomic dinosaurs were born.

Last time, it also happened to be the atomic dinosaur.

If it was other strange creatures.

It was estimated that it might survive on the Blue Star.

But the continuation of future generations was unlikely.

There were more than thirty kinds of odd creatures on the stage.

The big ones were bigger than the atomic dinosaurs, and the small ones were less than half a meter high!

After observing it several times.

Jiang Fan had no clue.

There was no way.

Jiang Fan could only use the deduction system again.

“System, help me deduce which of these strange creatures are the most suitable to survive and reproduce on the Blue Star?”

A moment later, the result of the extrapolation came out –

Deduction results: No. 9, No. 31, No. 36.

“Numbers 9, 31, 36?”

Jiang Fan raised his eyebrows.

Immediately..... he looked towards the three numbered odd-row creatures.

The first thing that caught Jiang Fan’s attention was Number 36!

Because it was a very inconspicuous yellow skinned rat!!!

Chapter 398

398: Space creatures! Magical land!

This strange walking creature was not big.

It was only less than half a meter long.

The whole body was covered with yellow fur.

There were two erect ears on its head and a Z-shaped tail, like a gigantic hairy rat.

It looked quite cute, but its expression was sluggish and stayed in the sealed crystal listlessly.

This reminds Jiang Fan of... a creature from a work in a previous life, but it looked different.

After observing this yellow-skinned rat, Jiang Fan turned his gaze to the odd-walking creature numbered 9.

This odd-walking creature would not be difficult to judge.

The appearance was almost identical to that of a kangaroo, except for the belly

There wasn’t a pouch!

It was over a meter in size.

Although being in the sealing crystal, the eyes were still non-stop bones turning.

It was very active!

“This guy is a kangaroo?”

Jiang Fan thought secretly, but immediately rejected this guess.

As an odd walking creature, all of them were somewhat special.

Otherwise, it would not be placed in this highest specification auction in a grand manner.

Before the auction, with the strength of the planet association, they must have checked it long ago.

A few moments later, the elderly auctioneer began one by one

They were introducing thirty strange creatures.

Jiang Fan listened carefully.

“Number 9, the initial judgment is that this is a kangaroo, but it is not an ordinary kangaroo. You should be able to find This kangaroo doesn’t have a pouch, but it actually does.”

“Its pouch is not quite the same as an ordinary kangaroo. After growing up, this kangaroo will automatically generate a parenting space and raise the next generation in this parenting space!”

“It can be said that

“This is a very rare creature, able to create an odd line of creatures!”

“Number 9: Yukon Kangaroo, starting bid 300 million!”

“Three hundred million!?”

Jiang Fan couldn’t help but raise his eyebrows.

And that was just the starting bid.

And the competing opponents were mainly powerful planet masters.

Coming up with billions for them was a breeze.

Jiang Fan calculated the savings he had.

-He had over three billion.

Even if all of them were invested.

It was not possible to get this Yukon Kangaroo.

If he met some big planet owners who were not bad with money.

He might not win it even with tens of billions!

“However... The school has 10 billion rewards. it’s really no good, if I apply for all of them, they should not reject me for buying strange creatures.”

Jiang Fan secretly thought.

This Yukon Kangaroo was a space creature.

It touched space together.

So even if the rest of it was mediocre.

Even

That parenting space was also small.

But the serial number was also ranked so early.

The starting bid reached three hundred million.

“Space kangaroo ah, this generation’s nursery space is small, but the next generation, the next generation The offspring further back, may evolve! Produce more space!”

Jiang Fan was quite impressed.

The system deduced the result.

There was absolutely no mistake.

This kind of odd-acting creature that could generate space.

The strategic value was very high.

Jiang Fan pondered.

The aged auctioneer had already introduced the yellow-skinned rat.

“Number 36, this is a strange walking creature somewhat similar to a rat, but even cuter, and its special ability lies in it can discharge electricity, but the power is not much, basically little damage.”

“You can buy it and give it to your girlfriend or lover. I think women will not refuse this cute odd line creature.”

“Number 36: Yellow Electric Rat, starting bid 100 million.”

Soon, the elderly auctioneer briefly introduced all the thirty odd-line creatures.

Then he said, “The above is the basic information of these strange creatures, so you can start bidding now.”

Immediately, the planet masters below began to get busy.

The bidding was also very simple.

In front of each person’s body.

Tap a little.

And a panel would appear.

The panel was numbered one by one.

If you fancy a strange creature.

Just enter the price at the bottom.

And you can keep adjusting the competition based on other people’s prices!

“Jiang Fan, do you want to auction?”

Lin Youhe asked curiously.

“Try it. I’m more interested in number 9.”

Jiang Fan said.

Because Jiang Fan was interested.

Lin Youhe’s trio listened carefully to the elder auctioneer’s introduction.

At this time, he said: “Yukon kangaroo number 9, I am afraid there will be many people competing.”

“No way, just try it.”

Jiang Fan smiled faintly.

“I’m afraid this won’t come down without a billion.”

Lin Youhe paused for a moment and said, “But If you need it, I can borrow some. I dare not say more. There are still one billion or two billion.”

“Thanks in advance. Let’s see how it goes. If there are too many competitors, then forget it.”

Jiang Fan had a plan in his heart.

But if things really didn’t work.

He could give it up.

Matching the number, Jiang Fan filled in his auction price.

The number 31 was a black cat.

The whole body was black.

There were no other colors.

The shape was also no different from ordinary black cats.

Only the pair of eyes was a little more unique. The inside was dark blue.

The starting price was also one hundred million.

Jiang Fan thought about it and filled it with two hundred million.

That black cat didn’t look good and was not very attractive.

Those popular, strange creatures.

Either it was like the atomic dinosaur that was more tall and dominant.

Either it was like the Yukon kangaroo With a special magical ability!

The number 36 yellow electric rat was a bit more expensive.

According to common sense inferred.

There must be quite a few bidders.

So Jiang Fan raised the price directly to 500 million!

As for the number 9 Yukon Kangaroo

Jiang Fan intended to see the situation and didn't bid immediately.

Just in case, Jiang Fan made use of the deduction system once more.

Then he modified the auction price slightly.

The Yellow Electric Rat was modified to 5.5 billion!

After a while, the elderly auctioneer on the stage announced the bids of each participating bidder.

As the crowd expected, the top ten numbered strange walking creatures

The competition was the most numerous.

Including the number 9 Yukon Kangaroo.

"Number 31, the highest bid, is 200 million. Is there anyone higher?"

"Two hundred million for the first time!"

"Two hundred million for the second time!"

"Two hundred million for the third time!"

"Good, congratulations to this guest, who has bid for the Star Black Cat number 31."

"Congratulations, congratulations."

Lin Youhe and the three people had just seen Jiang Fan's operation as well.

At this moment, they were all congratulating each other.

Jiang Fan was not surprised.

There really wasn't much competition for this black cat.

Soon, it was time for the Yellow Electric Rat session again.

"Number 36, the highest bid is 550 million. Is there a higher one? This is a rare and cute type of odd creature?" The elderly auctioneer was there to drum up emotions.

"Damn it, how can someone bid so high?"

In a box near Jiang Fan's place, a young man frowned slightly.

He was prepared to bid five hundred million.

At most, 500 million more to buy this cute yellow electric mouse.

As a gift to his girlfriend.

But unexpectedly

Someone actually bid 5.5 billion directly!

This made the young man have no choice but to give up.

Chapter 399 : Space creatures! Magical land!

Just like that, Jiang Fan also smoothly took down the number 36 Yellow Electric Rat.

Of the three strange creatures identified by the deduction system, two were already in his hand.

At that time, only one remained

For the number 9 Yukon Kangaroo, there was a lot of competition.

Jiang Fan didn't look for a while.

The auction price had climbed to over 500 million!

He didn't wait until the price came to one billion.

Jiang Fan started bidding and directly added two billion in one breath!

This was also the policy given by the deduction system.

“This guest is bidding two billion!”

The elder auctioneer's voice steeply changed to a large one, “Anyone higher? Is there anyone else bidding higher?”

“This is a rare space kangaroo. The opportunity is too good to miss!”

“Two billion!?”

-Inside a box, several fifth-ranked planet masters looked at each other!

One of the tall planet masters frowned slightly and said, “A strange creature that can produce a small space. Is it necessary to be so enthusiastic? Forget it, I won't follow it.”

“Two billion? I guess this bidder is determined to win. There is no point in fighting. After all, it's just a strange creature.”

In other boxes.

One by one, the planet owner who wanted to get this Yukon Kangaroo had also given up the intention to continue bidding.

The greatest value of odd line creatures was to collect and give away.

Spending too much would not be that necessary.

Finally, Jiang Fan smoothly bought the Yukon Kangaroo with a price of two billion.

“Haha, Jiang Fan, I can't imagine that you're a master auctioneer.”

Seeing this result, Lin Youhe and the three of them were all laughing.

If the auction was conducted according to normal little by little, the final price would probably break over two billion!

But a billion were added at once. It scared everyone else away.

But the timing of this bid increase was very critical.

Just at the right time, without the help of the deduction system, Jiang Fan could not have found it so accurately.

Although the things Jiang Fan wanted were already together, the auction was not over.

With Jiang Fan taking the lead, Lin Youhe and the other three also each bid for an item.

After the auction ended, the four people came backstage.

The handing over of items began.

“Three strange walking creatures, a total of 2.7 billion. The wallet is empty again.”

Jiang Fan paid while doing so. He felt a faint pain in his heart!

The money that was so hard to earn.

Immediately, cleaned up!

Each get their own shot of things.

Four of them had a simple lunch.

And immediately returned to Bei Dou University!

None of them were the type of person who wanted to be comfortable and have fun.

All they thought about was going back soon

To make their respective planets more powerful.

Jiang Fan returned to his villa, took out the three strange creatures under the auction.

Put them on the floor.

Although being in the sealing crystal.

But the three strange creatures were still sentient to the outside world.

Jiang Fan observed them for a few moments.

Then he couldn't wait to get ready to put them on the Blue Star.

So much time had passed outside.

On the Blue Star, it was already ten years old.

The third land was no longer bare.

Life began to appear. Need not say microorganisms such as bacteria.

Animals and plants had been born.

Some of them were the same as the first land.

Some were completely new species.

This land with different topography was full of life.

-It looked alike.

The green vegetation and the yellow land were 50/50.

The number of lives were not yet so high.

There were still not many species in many places.

Jiang Fan didn't just throw it all in.

Instead, he first used the system to deduce a bit and determined the right location.

First, he threw in the yellow electric rat, which seemed to have the strongest life force!

Yellow Electric Rat

Jiang Fan felt this name was not very nice.

So he changed it to – Electric Mound!

After, he threw Electric Mound into the third land.

It differed from the atomic dinosaur in front.

The eyes kept turning, very curious about the surrounding environment.

Also very lively!

But for every creature, the first thing is survival.

After a short time, this electric mound felt hungry and went out in search of food.

It was not quite the same as a mouse.

This electric mound did not eat plants.

It went straight to the nearest clear creek.

In the creek, there were fishes and shrimps swimming around.

Since there were no natural enemies for the time being.

They were swimming happily.

Electric mound stopped at the stream bank after observing quietly for a while.

It quickly ran down.

The speed was very fast.

But already startled the fish and shrimp in the water and fled.

Seeing that

This electric mound did not panic and

Did not run into the water.

Instead, it stopped by the creek.

Then stretched out that zigzag yellow-haired tail and poked into the water!

Crackle!

-A lightning flash appeared.

This electric mound let out electricity.

But it was not very powerful.

It could only electrocute the nearby fish and shrimp and stun a few.

The electric mound picked up these fish and shrimp and had a good meal.

Then happily continue its exploration journey.

“Very weak electricity.”

Seeing this scene, Jiang Fan couldn't help but spit out a sentence.

The electricity released by the 500 million electric mounds Weak as hell!

Whether it could illuminate a flashlight was still a problem.

But Jiang Fan was not so worried.

With the passage of time, estimated offspring and post-offspring electric mound.

He estimated it would become even stronger!

The following days are almost the same for electric mounds.

When hungry, go to the stream to catch fish and shrimp.

When full, it would go to various places to explore.

Said to be an adventure.

But because there were no gigantic creatures in the third.

Electric mound was completely free of any danger.

A month down.

Electric mound was also gradually accustomed to this new environment.

Its body also seemed to have gained some weight.

The electricity emitted was also a little stronger.

“Eternal level talent It was still powerful.”

Jiang Fan couldn't help but smile faintly.

The last time, the atomic dinosaur made little progress.

Seeing that the electric mound had adapted to the blue star.

Jiang Fan then turned his gaze to the remaining two oddly behaved creatures.

Yukon Kangaroo, needless to say.

But the one all black “starry black cat”, made Jiang Fan a little bit incomprehensible!

This What is this?

Other places did not differ from ordinary domestic black cats.

Except for the pair of dark blue cat eyes.

Jiang Fan took a closer look.

This starry black cat also stared at Jiang Fan.

There was no fear, or anger, or calmness in its eyes.

It was like a star.

It made Jiang Fan feel as if he had seen the starry sea.

“This is probably where the starry black cat came from.”

Jiang Fan took a few glances.

He was about to throw this black cat

Almost thrown it into the third land.

Suddenly!

A light flashed in my mind.

He suddenly remembered the kind of non-existent cats described in the textbook in his previous life!

“No way?”

Jiang Fan stared at this black cat with star-like eyes. His heart rippled!

Chapter 400 : Quantum Cat! A new era!

“This...”

Jiang Fan stared at the black cat with eyes like stars, feeling extremely incredible.

Something described in a book from a previous life actually exist in this world?

He thought about it for a moment.

Jiang Fan directly used the deduction system to deduce the origin of this black cat.

“System, help me deduce the origin of this strange walking creature, Star Black Cat!”

A moment later, the result of the deduction came out: the unknowable cat!

“???”

A few question marks popped up on Jiang Fan's head.

What the hell?

This deduction system had failed.

No successful deduction?

Is it that rubbish?

Then what's the use of it?

Jiang Fan reacted immediately.

It was not that the deduction system was garbage, but this result was the true origin of this black cat

—

The Unknowable Cat!

No one knew where this cat came from and no one knew anything about this cat!

Even no one was sure whether this cat exists?

Thus, Jiang Fan was basically certain.

This black cat should be associated with the kind of thing in the physics book in the previous life – Schrödinger's cat.

Schrödinger's cat referred to

A cat was locked in a closed container with a small amount of radium and cyanide.

There were odds that radium would decay.

If the radium decayed, it would trigger the mechanism to break the bottle with cyanide and the cat would die.

If the radium did not decay, the cat would survive.

According to the theory of quantum mechanics, since the radioactive radium was in a superposition of decay and non-decay, the cat was supposed to be in a superposition state of dead and living cats.

The cat that was both dead and alive was the so-called “Schrödinger's cat”.

But!

There couldn't be a cat that was both dead and alive.

The result must be known after opening the container!

“Let's call you Quantum Cat!”

Jiang Fan gave the black cat a new name.

With that..... He looked at it a few more times.

Then threw it into the third land.

Of course, the location and the electric mound were far from each other.

Technically speaking, the electric mound was also a rat, just a bit bigger.

Quantum cat, on the other hand, was a cat.

Even if both were odd creatures.

But a cat meets a rat

Jiang Fan didn't know how things would happen?

It was better to be careful.

After the quantum cat came to the third land.

The expression remained little changed.

Walking around and stopping.

For a while, it was observing the surrounding environment.

It angled its head looking at the distant sky, quietly thinking.
The eyes were full of stars and seas.
But even quantum cats had to eat.
This black cat in this regard was just like any other cat.
All of them like to eat fish!
Fishing technology that could be higher than the electric mound wasn't one or two points.
Just use the claws and quickly pounce.
Could easily catch a fish.
Half a month down, Quantum cat surprisingly fattened up some.
But did not show any special features at all.
Except for a cat's birth thinking from time to time.
In other respects, it was no different from an ordinary black cat.
This made Jiang Fan a little helpless.
He didn't know what the abilities of this Quantum cat were.
He also stopped paying attention the whole time.
Continue to throw the third strange creature – the Yukon kangaroo... into the third land.
Naturally, it was also thrown to another place.
Yukon kangaroo except for the ability to produce a nursery space.
In other respects, it was no different than ordinary kangaroos.
Bouncing around all day long and feeding on plants.
There were also few natural enemies.
Although there were some predators.
But how could it be the opponent of this kangaroo?
A few old fists down.
Let those who dare to test the beasts to try it out have blue noses and bruised faces.
Scared the shit out of it!
Three strange creatures living in three different areas of the third land.
Within a short time, it was impossible to meet.
Meanwhile, this piece of land.
More and more other life was born, too.
More and more vegetation.
More and more dense.

Trees grew strong.

All kinds of strange little animals appeared one by one.

Compared to the various vicious beasts on the second land.

The third land had the lack of a trace of survival of the fittest cruel competition.

Rather, it was more relaxed and peaceful.

Trends in the future... Obviously, it wasn't the same as the first land and the second land.

Towards the direction that Jiang Fan also could not expect.

Up to this point!

All three odd walking creatures were taken care of.

The cultivation of species on the third land also came to an end for now.

Jiang Fan shifted his gaze away.

It came to the Xia Kingdom.

.....

Yan was already over eighty years old.

But every day she was still in good spirits Insist on getting up early and returning late!

Continue to struggle for scientific research.

The old people of the Great Desolate Army had gone quite a few more in the past few years.

General Han Chuanhu died of illness five years ago.

The good minister Su Qin died four years ago.

The strategist Zhuge Ming and the general Lu Sun also died of old age in the same year.

As he grew older, many of the people who fought with Yan began to leave in large numbers.

This was also the reason for natural science.

In addition to some sadness at first after.

The rest of the people calmly accepted it all!

All had no regrets.

They participated in the battle to unify the world and in ordinary battles.

Participated in the Glory Campaign.

And participated in the promotion battle!

All of them won!

Yan and Ghostbusters and others have started preparing for the next generation to take over!

The system of the Great Desolate Army was a problem.

With the increase in population, the Great Desolate Army was also undergoing its first expansion.

It rose from the original 50,000 people to 100,000.

Still implementing the strategy of elite soldiers.

As for the group of scholars

That was incredible.

The original national scholars combined.

It turned out that scholars all over the country added up to no more than a hundred thousand.

Now that number was... quadrupled!

There were more people getting promoted to Ph.D.

The field of participation was also much broader.

All over Xia Kingdom.

A university was gradually established.

More and more scholars were running to various places.

The development of each place was greatly promoted.

Transportation technology was one of the most rapidly developing fields after the conquest!

A road and railroad were laid out in one territory of the Xia Kingdom.

Cars were slowly becoming mainstream.

It began to drive into thousands of households.

Inside and outside the capital.

A high-rise building rose from the ground.

Replacing the original old-style buildings.

Let the big wilderness city gradually have a touch of modern atmosphere.

Inside the Imperial City, the puppet emperor had long since died.

Now sitting on the throne was another puppet!

The sons of the imperial family were now very embarrassed.

With the spread of knowledge.

Outside there was no longer a heartfelt submission to the royal family.

They think that everyone was human, nothing different.

Not just a change in perception.

Even in actual power.

It was also in the hands of the Great Desolate Army.

The royal people simply could not touch.

It was more symbolic.

Yan did not want to abolish the “special institution” of the “royal family”.

Not only because she was also a member of the royal family.

In fact, there was no need to do so.

Even if someone pulled the flag and wanted to go against the Great Desolate Army.

Not many people would agree.

The successor behind the Yan had basically been determined.

But the specific statement had not been made yet.

Because

This was related to the issue of foreign conquests.
