

One Planet 441

Chapter 441 : Beyond the previous life! Xia's top ten black technologies!

This silvery gray piece of metal was very, very small.

It was only as big as a thumb cap.

But what was different from other metals was..... It was movable.

Jiang Fan felt a weak but growing life force from this small piece of metal carcass.

A small crackling sound.

This piece of silvery gray metal was the size of a thumb cap.

Detached itself from the surrounding.

But because it was on the edge.

-An accident

It rolled straight down.

Rolled down to the grass below.

This thumb metal was slightly taken away.

It felt a different environment for the first time.

Surrounded by lush, fresh grass.

Between the green grass.

There was a caterpillar and grasshopper.

As well as the occasional few flowers.

Even.....

The soil under the grass.

All emitting a fragrant and charming aroma.

All this..... made this thumb metal as if it saw a whole new world.

That represented a vibrant life!

At this time, a gray rabbit jumped over.

Just wanted to eat a mouthful of grass.

But at a glance, it saw the thumb metal that could move underneath.

A trace of curiosity immediately appeared in its eyes.

Thought about it.

Thought it might be a good thing.

Directly a mouthful of nibble down.

Put the thumb metal in the mouth.

Cackling sound.

Gray almost rabbit broke his teeth.

He was so frightened that he immediately threw the thumb metal.

immediately.....

Turn around and run away!

Thumb Metal was trembling with fear.

It was totally unexpected...

The world was so scary.

Haven't had a pleasant experience with this vibrant nature.

It was almost eaten!

The thumb metal rolled back immediately.

Back to the edges of the silver-gray metal.

Hiding and cautiously watching the outside.

Dared not to go out easily again.

With the passage of time.

The thumb metal gradually grew up.

And the silver gray metal behind it also increased.

Ten meters long in the pile of metal.

More and more faint life appeared.

A small piece of metal detached.

Same as thumb metal.

It felt very curious about the world.

Rolling down automatically.

Watching these metal beings slowly get on the right track.

Jiang Fan also stopped worrying.

He knew.....

What this thing needed was time.

So he slightly sped up the flow rate.

There was no more constant observation.

One year, two years, three years.

Five years passed in a flash.

The Blue Star has changed again.

Xia's technology continued to develop.

The seven members of the cabinet all came to the age of imminent retirement.

According to the regulations left by Yeon.

Seventy-five years old was the retirement age.

If you wanted to be in the cabinet.

You must be at least thirty-five years old to do so!

This was also in case of an emergency.

To prevent some people from staying in power too long.

And bring adverse effects.

The next cabinet had already been selected.

It still followed the principle of stability.

The successor chosen by Xia Ke was still a member of the royal family, and also a woman.

The name was Xia Ning.

Xia Ning did not have Xia Ke's harsh methods.

She was more moderate in her actions.

She was more like a "lady of the house".

In fact, Xia Ke did not like her.

But it could not be helped.

In this generation of royalty.....

There was no one more outstanding than Xia Ning.

The only choice was to choose her.

What's more.....

Xia Ning's age was not young anymore.

She was also over fifty years old.

After entering the cabinet.

It was estimated that it would not last long.

The other six people had the same idea of selection.

Generally speaking, everything was fine.

On the scholar's side, there were more candidates.

After some fierce competition and deliberation.

Finally settled on two people.

To ensure that the future succession of power could be carried out smoothly.

These were irrelevant.

Everyone was now basically clear.....

The future direction of the Xia Kingdom.

The main thing was to face all kinds of transcendents.

More advanced technological means was the top priority.

In these five years.

Xia Kingdom's level of science and technology was advancing by leaps and bounds, but it was also ... not small.

There were several inventions.

That could even be called black technology.

At this time, the doorbell suddenly came from outside.

Jiang Fan somewhat helplessly stopped observing and evolving.

Stood up, opened the door and looked.

Standing outside the door was Lin Ke'er and Bu Jing Yue and few more people.

“You guys

Jiang Fan blinked, somewhat surprised.

Especially the always cold Bu Jing Yue.

Surprisingly, she also came.

“Jiang Fan, we came to ask you for advice

Lin Ke'er said, “As you know about some experience in planet promotion, we are not that familiar with the rest of the school.”

“So I can only come to you with shame.”

“Planet promotion?”

Jiang Fan instantly understood.

These people, Bu Jing Yue and Lin Ke'er, were the second batch of planet promotions.

Counting the time, it was almost time.

“You guys come in and sit down. I'm going to change my clothes.”

Jiang Fan looked at his clothes that he hadn't changed in two days and turned around and went upstairs.

“Jiang Fan is not as difficult to approach as the legend says.” A girl looked at Jiang Fan’s back and couldn’t help but say.

“He just usually keeps a low profile and doesn’t like to interact with people.” Lin Ke’er explained, “Such an effort to become so powerful now!”

“I heard rumors are going around out there right now Jiang Fan is currently the strongest freshman in this class of the Federation. Is this true?”

This girl asked.

“It’s a thousand times true.”

As one who also came out of Dongyang Province.

Lin Ke’er said with some pride.

“I’m afraid you guys don’t know that.”

Lin Ke’er smiled and continued, “Originally, after the superb academy exchange tournament, it was customary in previous years for the top four to have an exchange tournament with those sects and dynasties as well, but

Lin Ke’er added a hint of tone and said, “Because of Jiang Fan’s appearance, these top sects and dynasties are directly looking for excuses to cancel!”

“If Jiang Fan had fought, they would have had absolutely nothing to fight.”

“In previous years, they were very happy with the exchange competition, because our super-first-class universities were all abused.”

“But this year, they were so scared that they even canceled the exchange match!”

Hearing that.

Bu Jing Yue next to her looked a little complicated.

In the Jiangcheng Grand Competition before the entrance exams.

Despite losing to Jiang Fan.

But at that time

She didn’t care much in her heart.

Not much to put Jiang Fan in mind.

But she did not expect it.

This was just less than a year.

The other party didn’t just win the overall top prize in Dongyang Province.

Now he has also grown to such an amazing point!

Already recognized as the strongest freshman in the federation!

After changing his clothes.

Jiang Fan went back downstairs.

Shared his experience slightly with Lin Ke'er and Bu Jing Yue, and other people.

But because Blue Star has passed through Eternal difficulty.

In fact

There was no reference.

Of course, Jiang Fan naturally could not reveal this.

Just simply talked about some of the content that everyone basically knew.

What to be careful, cautious, make adequate preparation and so on with nothing nutritious content.

“What difficulty are you going to choose?”

Jiang Fan asked.

“I should choose king level.”

Lin Ke'er replied, and after a pause added, “Bu Jing Yue should be Legendary level?”

“Oh?”

Jiang Fan looked over at Bu Jing Yue, slightly surprised.

“My planet has three transcendent races.”

Bu Jing Yue explained: “The development is relatively intact now. My teacher also gave me a very precious treasure. This difficulty... is also suggested by her.”

“That should be quite certain.”

Jiang Fan nodded slightly.

Because of the heart of the stars, the potential of the planet of Bu Jing Yue was not small.

It was developed.

It was not inferior to Lin Youhe, Wan Yunsheng and these people.

After finishing imparting experience to Bu Jing Yue and Lin Ke'er.

Jiang Fan continued to return to the awakening space.

Check out Xia's “black technology” over the years.

First of all, quantum computers.

A team of scholars had successfully developed the latest Quantum computer!

This quantum computer in the 50 million Gaussian boson experiment.

It only took less than two hundred seconds to complete.

Chapter 442

442: Beyond the previous life! Xia's top ten black technologies!

If it was replaced by the most advanced supercomputer in Xia.

Then

It would take 100 million years!

Not only quantum computers.

There were also major inventions in other areas of computers.

Another team of scholars had successfully developed the first Brain-like computer!

This made it possible to use the mind to type, sing, recite, and other intelligent tasks.

It also showed the prospect of the development of brain chips.

In the future, brain-like computers may be implanted in cell phones and robots.

It will generate new intelligent service experiences.

Drones were also a key area.

In the last campaign of glory, although the drone was not as scenic as the warplane.

But the role they played couldn't be underestimated!

Without the scouting and leading of drones, a game would not have gone so well.

For the future of drones.

Many scholars had been involved in the discussion.

They believed that there were two main directions.

One was miniaturization or even miniaturization!

The focus was on reconnaissance and detection.

The other was massification.

Or a combat drone dedicated to combat.

These two directions

Both had many teams of scholars following up and researching.

As for the top priority, nuclear fusion and melee weapons were still under slow but progressive research and development.

This time.

It was more than that.

While they considered missiles to be the most obvious threat to transcendents at the moment.

And it made a splash in the final round.

But there were already many scholars who were not satisfied with such things.

Ready to research faster and more powerful super-technology weapons.

“Missiles? This thing will soon become obsolete. With that crotch-pulling speed and bloated size, it will be used as a target by powerful transcendents in the future.”

-In a research room.

A young scholar wearing glasses had a disdainful face.

The other scholars next to him heard these words.

The faces were extremely calm.

There was not much reaction.

They took this arrogant guy for granted.

The Institute of Transcendental Research.

There were many people who were even more crazy than this guy!

Of course.

This crazy city also had the capital.

And that was this young scholar wearing glasses.

Although arrogant, look down on this, look down on that.

But there was still a brush in research.

He wanted to research a more powerful weapon than missiles.

Although there was not much direction yet.

A research lab next door, but with a specific direction.

That was Electromagnetic cannon!

Electromagnetic cannon was invented by a scholar long ago in the Yan era.

It worked by giving two parallel rails access to electric current.

When the cannonball was placed on these two rails.

A circuit would be formed.

It then generated an electromagnetic field through a strong Loren magnetic force.

It would launch the cannon at an extremely high speed!

Many scholars agreed electromagnetic cannon would be a future development direction that was more workable for a longer period.

Besides the above.

There was also a relatively new weapon named –

Microwave Ray gun!

But a scholar developed it by brainstorming.

This weapon could shoot noise waves into the enemy's head.

Depending on the eardrum, if it's empty, the microwaves enter the brain directly through the skull.

Able to create a variety of noise.

For ordinary people and wild animals such as tigers and leopards

It had a very high lethality.

But!

After looking at the demon apes, the heavenly wolves and forest trolls, these transcendent species with powerful knowing qualities.

The top officials of the Great Wilderness Army all think that...

The idea of this microwave weapon is quite novel.

It wasn't very practical.

It could not hit transcendent creatures hard because of the noise.

But

The Great Desolate Army did not take it lightly.

Still encouraged this scholar to continue research and development.

Many inventions at the beginning of the birth seemed to be of little use.

But with gradual improvement.

It might become more and more important!

About the weapons.

Some biologists also came to join the fun.

Their ideas were even more bizarre!

Surprisingly, they intended to combine mechanical devices with living things.

A half-mechanical, half-biological life that built the exterior was mechanical, but still had biological capabilities at its core.

The result

Naturally, it was a failure.

This idea was still way too far ahead of its time.

Because of the reward of the glory conquest.

Each scholar was more motivated.

Yes.

This time, the glory conquest, Jiang Fan distributed the rewards.

Jiang Fan divided the Water of Life given by the school into more than a hundred thousand portions!

It was thrown into the star house.

It was used to reward all the members who participated in the conquest this time.

These waters of life could not only speed up the reproduction efficiency of the race.

It could also increase the life span.

Each serving of the Water of Life could roughly boost the lifespan of the Xia Kingdom by five years.

Five years is not much.

But it was definitely not a lot either.

For most people who did not want to live a few more years.

The Earth in the previous life.

Let alone five years.

Even if there was any medicine to extend life for a year.

They estimated that a lot of rich people wanted to get it at any cost.

Besides the reward for the conquest.

The rest of the water of life was used to reward Those who had made significant research in various fields of talent.

There had also been scholars who had set their sights on space.

Awakening space had stars.

But those were all energy clusters made using the power of the origin.

For example, the red sun.

It would be easy to create a lifeless planet.

Just use the power of the origin to convert it into matter.

But the consumption of power of the origin

It was very scary!

According to Jiang Fan's calculations.

If you wanted to create a lifeless planet as big as the Earth in the previous world.

I'm afraid it would have to be worth a hundred million of power of the origin.

"Let's not build it first. Let's wait until later."

Jiang Fan thought about it and gave up on the idea.

There was no point in doing so now.

Wait for the success of the nuclear fusion project.

Then it won't be too late to carry out this aspect of the plan.

Energy was a major problem that limited the development of science and technology.

The development of Xia made Jiang Fan more satisfied.

Jiang Fan turned his attention to the second land.

.....

Here, at this time.

Compared to five years ago.

There was a tremendous change.

Because

The giant three-headed snake that dominated this land was wounded!

It lost one of its snake heads.

Currently, there were only two heads.

It looked very bizarre!

Not only that.

It was also badly injured.

The giant three-headed snake without one head No, it should be called a giant two-headed snake now.

Its strength was greatly reduced.

This triggered a shock in this land.

Many giant creatures

It had dissatisfied them with this powerful and sinister guy for a long time.

“Something seems to have happened on the land. That giant three-headed snake was attacked secretly, broke off one of its heads, and is now deeply and seriously injured.”

In the base of the Great Desolate Army.

A scout reported.

Despite not daring to land easily.

But it didn't take a while.

The Great Desolate Army would still send a small team to go and watch.

Especially the drones.

Every day, there were drones scouting in various territories of the second land.

Although these drones did not end up very well.

Almost all of them ended up being shot down by giant beasts and flying birds.

“Is the giant three-headed snake injured?”

Su Dingfang blinked his eyes.

Su Dingfang, who was already nearly seventy years old.

Not long after the Glory Conquest.

He came back to this side of the second land.

Ready to continue to march on the land.

But mainly because of the immensely powerful giant three-headed snake in.

The Great Desolate Army still did not dare to act rashly.

“I’m afraid that this land is going to be unstable again. There may be another giant beast battle.”

Su Dingfang sighed slightly.

Jiang Fan was also watching with interest.

Especially looking for

This “warrior” who dared to sneak up on the giant three-headed snake!

“Good guy, so it’s you.”

Looking at this sneak attacker.

The corner of Jiang Fan’s mouth could not help but reveal a slight smile.

Chapter 443: Terrible Root Law! The Great Desolate version of Gundam!

The one who sneaked up on the giant three-headed snake was not another giant beast.

Rather, it was the only descendant of the atomic dinosaur that was seriously injured by the giant three-headed snake and finally died!

This atomic dinosaur originally lived a very comfortable life.

Like other similar species, it was also relatively lazy.

Originally, it had no worries about food and clothing.

Everything was fine, but since that one dark rainy night, after a giant three-headed snake attacked his father, everything had changed.

This atomic dinosaur sobbed all night.

The next morning, the state of mind had changed.

The eyes were no longer filled with spring flowers, but with deep hatred!

For revenge.

This atomic dinosaur hid itself.

While avoiding the giant three-headed snake's pursuit.

And secretly growing its strength.

Surprisingly, it also chose to went to the crater of the volcano.

To feed on lava!

And use it to exercise its physique!

Gradually.

This atomic dinosaur's body underwent step-by-step changes.

The breath it exhaled became very hot!

After years of enduring humiliation.

This atomic dinosaur spied the giant three-headed snake.

Secretly waiting for the right moment.

Finally!

On a rainy night, an excellent opportunity arose.

The giant three-headed snake's defense was focused on the Great Desolate Army base on the shore.

It simply could not think that

A giant beast on land would dare to sneak up on it!

This atomic dinosaur suddenly popped out.

One of the giant three-headed snakes was restrained in one bite.

And spit out the scorching flames in its body.

Although the giant three-headed snake had a strong physique.

But couldn't stop this terrible flame.

The snake's head directly blew off!

But the giant three-headed snake was strong after all.

The other two snake heads launched a counterattack, spewing mouthfuls of flame.

The attacking Atomic Dinosaur was seriously injured!

But it succeeded in one blow.

So it didn't dare to stay.

Immediately slip away!

It was also very smart.

Prepared two sets of options.

If it couldn't kill it directly, then hit it hard.

That way, the giant three-headed snake would not dare to chase.

As expected, it was as smart as a three-headed snake.

The first thing that came to mind was not to make this atomic dinosaur pay, but

Hurry up and find a place to hide.

The first thing it wanted to do was to find a place to hide and get well.

But this atomic dinosaur deliberately made the commotion very big.

And deliberately spread it.

Soon!

The giant beasts of the second land were aware of

The giant three-headed snake that had ruled for decades was Without a snake head!

Some restless beasts started moving around here.

There was no shortage of giant beasts that were previously suppressed and bullied by the giant three-headed snake.

Among the crypt, over five skeleton crawlers burst out of the ground.

Looking for the footprints of the wounded giant three-headed snake.

A tyrannical bear, saber-toothed tiger, giant E and atomic dinosaur, all acted.

The one who was most happy to learn the news was

The giant gorilla that has been living next to the base of the Great Desolate Army.

Now the leader was immediately taking all his kind to the battlefield.

Searching for traces of the giant three-headed snake.

Ready to kill it while it was still sick!

To get revenge for the ancestors fiercely!

There were so many places to hide in the second land.

Even if the giant three-headed snake could hide, it couldn't hide anywhere.

One day, the giant beasts found it.

So

The battle quickly broke out!

These giant beasts also knew the power of the giant three-headed snake.

Did not dare to fight alone.

At this time, also discard the former suspicion and join hands.

Together against this wounded giant three-headed snake.

There were even more than ten giant gorillas that joined the battle group!

Even though the giant three-headed snake was very brave.

Without a snake head, still rushing left and right to kill.

Took out one giant beast after another.

But in the end it was outnumbered!

The second snake's head was ripped off.

Not long after that.

The gorillas themselves killed the badly wounded giant three-headed snake!

So far!

The single most powerful creature the Second Land had ever seen had fallen!

The dominant position was also briefly vacant.

None of the giants were strong enough to convince the public.

Many behemoths were staring at them.

But in the end, they could only look on with dismay!

After the giant gorilla killed the giant three-headed snake.

It was not enough.

Continue to look for the descendants of the giant three-headed snake.

But the giant three-headed snake was so cunning.

The descendants have long been returned to the sea.

“An era has ended for this land ”

Su Dingfang, who was watching this battle through a drone, smiled and lamented.

“Hm?”

At this time, the crowd suddenly saw

Not far away in the forest.

Several giant gorillas were dragging a behemoth in this direction.

When they came closer.

Found that this behemoth was actually an atomic dinosaur.

It was the same one that had attacked the giant three-headed snake.

The giant gorilla dragged this atomic dinosaur.

He came to the base of the Great Desolate Army.

It kept waving its arms in a pose.

“These super gorillas are not trying to let us save this seriously injured atomic dinosaur, right?”

The crowd was looking to understand the meaning of these giant gorillas.

“To save or not to save?”

Many scholars and generals were a bit headstrong.

Giant gorillas as neighbors.

All these years, they were friendly with the Great Desolate Army.

The relationship was very cordial.

This favor couldn't be unhelpful, right?

But they were naturally aware of the power of atomic dinosaurs.

And there was no friendship with the Great Wilderness Army.

Once there's a violent attack and it hurts someone Then I'm afraid it's not very good!

The most crucial thing was

The anesthetic seems to be ineffective against the Atomic Dinosaur.

“The Atomic Dinosaur has a very powerful physique, even stronger than the Giant Three-Headed Snake, not to mention anesthetics. Even transcendental poisons may have no effect on it.”

A scholar frowned and said.

The others were also in a dilemma.

To save or not to save was a problem.

“Save!”

Finally, it was Su Dingfang who spoke up and decided.

Let the giant gorilla drag in the seriously injured atomic dinosaur.

A group of scholars and a medical team got busy.

The rescue was rather time-consuming.

After an afternoon of tossing.

Finally, this atomic dinosaur was rescued from the edge of endangerment.

But in this process.

Many scholars were astonished to find it.

“This atomic dinosaur actually has a flaming furnace inside its body.”

A young scholar was shocked and said: “There is a terrifying high-temperature flame, which is much higher than ordinary fire.”

“And

“What shocked me the most was.”

“It can surprisingly spit out these flames, the esophagus, mouth and what not is completely unaffected.”

Others have also expressed the surprise in their hearts.

“This atomic dinosaur is really unique.”

Another scholar picked up, “Have you noticed that the other atomic dinosaurs don’t seem to spit fire, which means

“I even tested it carefully this afternoon.”

Chapter 444: Terrible Root Law! The Great Desolate version of Gundam!

The young scholar from before lowered his voice and said, “Then I found

“I checked the previous test reports and found that this atomic dinosaur had stayed in the crater almost all the time before.”

Another scholar blinked and said, “It won’t feed on magma there, would it?”

“It should be. The atomic dinosaur already had a history of sucking volcanic rocks, and I can’t imagine that it has evolved now.”

“It can swallow even lava. No wonder it can spit fire.”

“I suddenly have a bold idea.” The young scholar from before said as he scanned the crowd.

“A bold idea!?”

Everyone was slightly taken aback.

And suddenly reacted.

This young scholar, nicknamed “Mad Wolf”, wanted to do something.

“No.”

When this idea was reported to Su Dingfang.

Su Dingfang did not even consider it.

Directly vetoed!

Stop joking around!

Did you really think the atomic dinosaurs were machines?

Could you just test it?

After knowing the result.

It did not discourage the young scholar.

His eyes turned quickly and he came up with a brilliant idea.

That was

To go directly to the person in question – the atomic dinosaur was still recuperating in the base.

Asked this beast for its opinion.

The Great Desolate Army rescued and treated this atomic dinosaur.

It was very friendly to the young scholar.

A few giant gorillas accompanied the young scholar.

Nervously to this atomic dinosaur Gesturing with hand gestures.

Explained his requirements.

This atomic dinosaur blinked its gigantic eyes.

Finally, it understood the young scholar's meaning.

Gigantic eyes instantly glared round!

What the hell are you kidding?

But

After thinking for a while.

He agreed.

The young scholar was very happy.

He told Su Dingfang the opinion of the atomic dinosaur.

Su Dingfang didn't know that his brain was twitching, but he even agreed to the test.

But when it was reported to the cabinet.

It was rejected!

This experiment intrigued Jiang Fan very much...

It ended before it even started.

Atomic dinosaurs had a powerful physique.

Not to mention it recovered intact.

But the lazy nature came back into play.

It was eating and drinking well in the Great Desolate Army base.

Didn't have to find its own food.

And there were giant gorillas as neighbors.

Simply didn't go.

And on the opposite side of the second land.

On the first land.

Transcendent Institute's melee weapons team There was a new development!

Although the metal that could flow and deform was obtained.

One by one, the latter team made various peculiar alloys.

But there was still a certain distance from what Xue Rengui and Su Dingfang wanted as a final result.

“Rubbish, another pile of garbage.”

In a laboratory.

An old man with white hair looked at a tall robot in front of him, but he directly cursed.

“This thing looks quite imposing, but what's the use? Not to mention those transcendent creatures. Can a tank beat it?”

The white-haired old man asked.

The research team next to him couldn't help but lower their heads.

As the white-haired old man said.

This giant alloy robot

It could be described as flashy, but not real.

Indeed, even Tank was no match.

“Doctor, I have an idea.”

A scholar wearing thick glasses spoke up.

“What's the idea? Say it.”

The old man with white hair was always acute.

“I think

The thick glasses scholar paused and pointed to the giant robot and said, “We should specialize in one side. There are too many unnecessary weapons on this robot.”

“What's with the speed gun, machine gun, howitzer, flying device, and even missiles? All of them are unnecessary.”

“Hmm?”

The others were slightly taken aback.

All looked at the thick-spectacled scholar in amazement.

The most advanced weapons were removed.

Then what else could this robot do?

Go mining or moving bricks?

“Our goal is against powerful transcendent creatures.”

The thick glasses scholar scanned the crowd and exclaimed, “And what do you need? A robot equipped with all those weapons that the war machine was just able to do and do it well?”

“We must take the route of differentiation, think about it. What weapons are difficult for war machines to equip, and more suitable for robots?”

This statement reminded the crowd of scholars and PhDs present.

Each one was the elite of the elite.

Naturally understood the meaning of the thick glasses scholars!

Even the old man with white hair was rubbing his chin.

Caught up in contemplation.

From this night and evening onwards.

Transcendental Research Institute on the road of developing melee weapons

A breakthrough had been made.

And in another laboratory.

Another research group was working in a different direction.

“Big robots are too bloated and not very realistic.”

The bald scholar at the head of the research team exclaimed, “So our goal is to shrink down and create smaller armors.”

“Hasn't someone made one before? It's not practical enough either, at least far from the requirements above.”

A scholar weakly questioned.

“That's because they're stupid!”

The bald scholar said nonchalantly: “They are an upgraded version of the alloy battle suit, what's the use of it!”

“We have to design this kind of armor to focus on mobility. Can't fight with transcendental creatures!”

“Then it's still impossible to fight?”

Another scholar issued a query.

“If you can’t beat one, won’t you take on two?”

The bald scholar retorted loudly, “You guys are really pig-headed, transcendent creatures are very laborious to breed one, but if we make this kind of armor

“Then it can be mass-produced!”

“Two can fight one transcendent creature, or even ten can fight one. Why can’t they beat it!?”

“Armor sea tactics to drown them!”

Not just these two research teams.

Because of the importance of the top level.

There were not a few scholars and doctors who were interested in melee weapons.

There were no less than fifty teams that had really started their research!

That’s right.

That’s right, fifty of them!

The number of scholars at the Institute of Transcendental Research was very terrifying.

Many of the scholars’ ideas were very bold and frightening!

A mere melee weapon was nothing.

There were still people who had thought of how to take out missiles!

“If the other side has a weapon like a missile that can be launched remotely and can also track and strike with precision. Then how do we deal with it?”

This was the question Xue Rengui asked in a meeting.

Plan ahead!

Xue Rengui was thinking far ahead.

“Using missiles?”

A scholar made a suggestion.

But then

He himself felt it was not right.

After they launched the missiles.

Especially to the back.

The speed was very fast.

It was difficult to intercept!

“Speed!”

A scholar with messy hair that seemed to have not been washed for days spoke up, “As long as the speed is fast enough, a rock can also intercept the missile!”

“So

“It would be good to develop faster weapons!”

“Then tell us what faster weapons are available?”

Xue Rengui looked at this guy speechlessly.

This thought

It had long been thought of by many people.

But the crux of the matter was

You came up with a specific idea!

After this meeting, the crowd brainstormed.

Although it seemed more difficult.

But research was down to find.

It might be easier to achieve than melee weapons.

Soon after.

A terrifying weapon that had not even appeared on Earth in the previous life

Chapter 445: The Wind Rises! Starry sky list text!

Although the Great Desolate Army had researched a very powerful weapon like missiles.

In the glory conquest, they also saw excellent results when used to deal with transcendent creatures, but some scholars became worried.

In case, the transcendent races also had similar means, how should the Great Desolate Army target?

As we all know, the people in the Great Desolate Army would be just ordinary people.

Once the opposite side uses such means to make a direct surprise attack on the Great Desolate Army, that would be equivalent to missiles against missiles.

They couldn't defend against each other.

The Great Desolate Army side would be very passive.

The Earth in the previous life.

It was because several powers had missile deterrence against each other, so they could coexist peacefully.

No one dared to make the first move.

But here the Great Desolate Army had to face the Transcendents.

Therefore

A group called “Missile Defense Group” was born.

The purpose was to research weapons that could target missiles.

“I said missiles are garbage, but there is no way to do it now, and someone will definitely replace them.”

The very arrogant scholar from before spoke up again.

He had always been very contemptuous of even speed guns and missiles.

This time, he didn't just talk and do nothing.

Instead, he put forward an idea.

Other scholars had also put forward several ideas.

In these ideas.

The common denominator was that anti-missile weapons must be faster than missiles to work!

“Lasers could be a direction.”

One scholar suggested, “But right now lasers are used for civilian use, and specifically used in combat is still a long way off.”

It is good to have an idea.

The seven members of the cabinet approved this laser research project.

And they listed it as a priority program.

Time was passing little by little.

The advanced technology born from within the Great Desolate Army was.....

Also, slowly making its way to the civilian population.

There was a significant change in the means of transportation.

Moving trains with speeds of over two hundred kilometers per hour were being built, facilitating travel to and from.

Research groups and companies had also developed VR technology.

Artificial intelligence was developing very rapidly.

The first driverless car..... hit the road under the personal witness of the top officials of the Great Desolate Army.

They manufactured various kinds of robots one by one by a research group.

But the artificial intelligence was still poor.

It could only perform the most basic actions.

All walks of life were developing rapidly.

The only thing missing was.....

The field of culture and art!

Although there was also small progress.

In the past, the Xia Kingdom could be said to be a desert in this field.

But because of the existence of transcendents.

Who cared about these things?

The development was very slow.

Internet novels have emerged.

-On every website.

The most popular was no surprise.

It was the fantasy genre of novels.

There were two main genres.

One was..... The main character joined the Great Desolate Army and grew up step by step from a small soldier.

In the battle with the transcendents to make an impressive feat.

Finally, marry the beautiful boss story!

The details were different.

But overall, roughly the same.

Most people wrote this type of novel.

It was the most ubiquitous.

But the number of readers was also the largest.

Another one was

The protagonist suddenly came across a planet passage one day.

Transported to another transcendentalist planet.

Discovered that

He himself could actually cultivate and become a transcendent.

Experiencing various thrilling adventures.

Step by step, from an ordinary person to grow into a powerful transcendent.

Of course, a variety of beautiful women was also not missing.

This type of novel was not so uniform.

It was also quite popular with readers.

All in all.

In the field of culture.

Xia Kingdom compared to the Earth in the previous life..... It was much worse.

Other fields were advancing much faster!

But there were no major inventions and epoch-making geniuses.

Jiang Fan speeded up the flow of time.

A blink of an eye.

Another decade passed.

This decade!

The most obvious thing was that.....

The population of Xia continued to grow explosively.

For the first time, it exceeded 200 million people!

But this was completely incomparable to the previous world.

The Earth in the previous world.

The population increase in ten years could exceed one billion people!

Of course, this was also because the Earth's population base in the previous life was large.

But the cabinet had paid attention to the problem of population growth.

After analyzing the pros and cons.

They were guided in the dark.

And wouldn't directly interfere.

The most comforting thing for Jiang Fan was.

Xia's house prices were not expensive.

Compared to the previous life, it could be very cheap.

Before crossing over to the first-tier city where Jiang Fan lived, he could not afford to buy a bathroom with his yearly salary!

This was also because of the corresponding policies and guidance in Xia Kingdom.

Another important reason was.....

Most of the land in Xia Kingdom was fertile plains.

There were relatively few high mountains, forests, deserts, hills, basins, etc., and most of them were on the fringes.

The whole country was a very livable place.

The cabinet was also distributing the industries.

It was no longer bound to the central locations of the Royal Tomb Mountains and the capital city.

Located to the west of the First Land was.....Red River!

The runoff was getting bigger and bigger.

Now it had the name of “Eight hundred miles of red river”.

Capable of fast river transportation!

Therefore, it attracted many people to live here.

With the river and the richness of the surrounding species.

This area was.....also developing rapidly.

Many biological companies and bio-industrial parks.....were established on both sides of the Red River.

This was currently the largest tropical rainforest in the Blue Star.

There were nearly a thousand species of all sizes living inside.

Compared to moving trains.

Airplanes were even more popular.

The civil aircraft technology here was much more developed than in the previous world.

The restrictions were not that high.

Even..... Helicopters had become the main means of transport for many rich people.

New energy had not much development.

Because

Most people saw it.

Nuclear fusion could be within a few decades or less..... to be a success!

By that time.

Was there anything else going on with energy?

This was indeed the case.

During this decade.

The nuclear fusion project was progressing little by little.

It was coming to the most critical place.

Other areas.

For example, 3D printing technology..... had surpassed that of previous generations.

Architects across the country had tried to build 3D printed houses using this new technology.

A single machine could print twenty 3D printed houses in a day.

The cost was not too high.

A house was about tens of thousands of Xia Guos.

But for the people of Xia Kingdom.

The biggest change was naturally

The change of the seven members of the cabinet!

Xia Ke, Xue Rengui, Su Dingfang and others all retired a few years ago.

The power was handed over to the next cabinet.

Xia Ning took the place of Xia Ke.

And on the side of the Great Desolate Army.

Xu Ji and Huo Qubing replaced Xue Rengui and Su Dingfang.

Especially Huo Qubing.

They were still very young!

Less than forty years old.

-Then.

It got quite a lot of attention.

Huo Qubing had little interest in fighter jets and missiles.

Not long after taking office.

Ran to the second land side.

With his support.

Chapter 446: The Wind Rises! Starry sky list text!

The main research team for the melee weapon project was now at the base in the second land.

After all there was a giant beast there.

Once the melee weapon research was successful, the best test subjects were the behemoths.

This decade, the project did not progress too well at first, many detours were taken, but after someone put forward the idea of specialization, the crowd made a new attempt.

-They made New products one by one.

Although there was still a certain distance from the final requirements, at least on the right path, Jiang Fan watched curiously for a few moments.

Rather, he was amazed.

These things were one more oddly shaped than the other, but they were more practical.

“I guess in a few years, I’ll be able to see the real finished product.” Jiang Fan thought secretly.

At this time, Jiang Fan also took the time to glance at the planet panel.

There had been a considerable change on it –

Planet name: Blue Star

Planet level: two

Planet diameter: 3820 km

Planet species: 2217

Planet talent: Eternal level

Extrapolation route: None

“It’s finally surpassed the moon in the previous life.”

This was Jiang Fan’s first thought.

The diameter of the moon in the previous life was 3476 kilometers!

Thanks to the enormous explosion of Xia’s population and the birth of one new species in the third land.

The area of the Blue Star was naturally growing by leaps and bounds.

Large base!

The faster it increases!

If it was the first-class Blue Star.

Ten years of time.

I’m afraid that it would be only a pathetic few kilometers.

The number of giant beasts in the Second Land has also grown rapidly in recent years.

After the giant three-headed snake died.

There was no new overlord.

The second land seemed to have become a situation where the masters were fighting for supremacy.

But the giant gorilla no longer had the idea of domination.

And the same goes for Atomic dinosaurs.

The most powerful one

Still staying at the side of the Great Desolate Army base.

It had also bred offspring.

In these offspring.

Half of the carcasses also gave birth to High-temperature flame furnace!

Blue Star ten years.

Outside, it was January.

In this month, there were many people who came to visit Jiang Fan.

There were many Invitations to various banquets or dinners.

But Jiang Fan refused them one by one.

Others also knew Jiang Fan's character.

Did not dare to bother.

This day, Lin Ke'er and Bu Jing Yue and others once again came to the door.

“You guys succeeded in promotion!?”

Seeing these people's expressions.

Jiang Fan then probably guessed the result.

The biggest thing in this month was

The promotion of the second batch of new students to the planet.

The first batch only had Jiang Fan and Lin Youhe, the best of the new students.

The number was only about 50 people.

But the second batch was much more.

Almost all the remaining tens of thousands of freshmen participated.

“Yes, I successfully passed the king level promotion test.”

Lin Ke'er had a smile on her face and happily said, “Bu Jing Yue also successfully passed the legendary level. Everyone is surprised, now”

“Our new students in this class, Bu Jing Yue has become the fifth person!”

“The first four are naturally Jiang Fan, Prince Qing, Wan Yunsheng and Li Zihao.”

“But there are quite a few people who failed, and several of our new students from the Dongyang Province could not make it.”

Lin Ke'er's face was slightly gloomy.

Jiang Fan was not surprised.

Compared to last time.

This time, there were fewer people coming.

Failure was the end of the road ahead.

No one had a solution!

After chatting with Lin Ke'er and the others for a while and sending them off.

Jiang Fan continued to evolve the Blue Star.

Time continued to flow.

Although it was because Bei Dou University was in a level six planet.

The four seasons here were like spring.

Basically, nothing changes from season to season.

It was very comfortable to live in.

But for the main world outside.

Now was the coldest winter of the year!

Many places were snowing.

Like the schools outside the superb academy.

There was no such condition.

Each and every student was wearing thick coats, huddled tightly, stepping on the thick snow.

“It’s cold.”

A couple walked side by side on the campus path.

Shivering from the cold.

Snow-capped all around.

There was hardly any human shadow.

And at this time

The sky suddenly lit up.

The couple stopped in their tracks and raised their heads in surprise.

Looked toward the sky.

Only to see

Above the sky!

A group of stars composed of countless stars moved slightly.

A star shone out.

Like the neon lights on the street.

In the vastness of the starry sky it formed a big character!

These star characters were finally combined.

They became A huge list of text!

Non-stop faintly shining.

It looked extremely shocking!

“Is this?”

Seeing this amazing scene that suddenly appeared.

The couple were both wide-eyed and very incredulous.

The amazing sight above the starry sky.

Naturally, it attracted the attention of countless people!

Even

-It startled every powerful existence.

In the endless star field, a similar scene also appeared.

“This is Another person has completed an eternal level mission!?”

A rank six planet master looked at the sight in horror.

That previous shocking image of the stars shining and the heavens coming to congratulate him.

It left a deep impression on him!

But then he reacted.

Although this scene was also the stars shining.

But it was far from the last time the stars shine!

And

The most crucial thing was.

It was also not the time when planets were promoted twice a year.

“So that’s how it is.”

This still relatively young level six planet master immediately understood after a little thought.

A smile surfaced at the corner of his mouth as he muttered, “The once-in-10,000-years event is still coming as scheduled.”

“When the last event was held, I wasn’t born yet.”

“But I still relied on that one treasure and became a rank six planet master by a fluke!”

“This time

“I’m afraid that it’s going to trigger the madness of an unknown number of heavenly pride again!”

“Interesting, interesting. I have to rush back to look, otherwise I might not be able to wait for the next time.”

This level six planet master changed direction.

He quickly headed towards a certain region of the Endless Star Domain!

At the same time, the Federation, the Empire, and even other vast and incomparable regions.

One by one, the rank six planet masters were all startled.

They all raised their heads to look above the sky.

This immense and incomparable star list text!

“It’s coming, it’s coming, it’s finally coming!”

“It’s still here, the 10,000-year event.”

“We have worked so hard for so many years to cultivate a single heavenly pride, isn’t it just for this moment?”

“Even if it is a level six planet master, most of them can only see such a grand event once in their lifetime. I have to take a good look at it this time.”

One by one, powerful existences were discussing.

It wasn’t just the main world.

Under the authority of a single level six planet master.

These shining star characters also went into the various superlative academies.

It illuminated the entire campus.

One by one, the teachers and students were all startled.

After seeing this starry sky list text.

Many of them revealed excited expressions.

They were all clear

The once-in-a-million year’s event was finally here!!!

Chapter 447: The Ten Thousand Year Event! The Group Star Competition!

Ads by BidGear

Everywhere in the endless star field, countless forces of all sizes, including empires and confederations, were all started by this sudden appearance of the star list text!

“Hahahaha, I’ve been waiting for three hundred years, three hundred years! Do you know how I’ve spent these three hundred years?”

– A mountain

A white-haired old man was looking at the huge list in the sky.

He roared like a madman: “I, Qi Yu, was one of the most demonic figures of that era back then, an existence that oppressed the entire world, so I won’t be willing to let me step on the path of the sixth level!”

“But... I finally made myself wait!”

“This time, I must remind the world of my former glory!”

It wasn’t just this old man named “Qi Yu”.

Many second-level peak planet masters who were close to their expiration date.

They all came out from their places of seclusion.

Looking at this list in the sky.

Tears of excitement flowed down their faces!

Dao Sect!

Within the back mountain.

The black-clothed young man hurriedly rushed over.

Coming to the ancient building, he shouted, "Daozi, Daozi, don't close the door!"

A moment later.

The door of the ancient building slowly opened.

From inside came out a young man dressed in white.

Somewhat helplessly, he glanced at the black-clothed young man and said, "What's the matter with you again? So flustered and anxious?"

"Just look at the sky yourself."

The young man in black pointed to the sky.

"The sky?"

The white-clothed young man raised his bucket and looked at the sky.

At a glance, he saw one of those huge words formed by the twinkling stars.

There was a slight change in his face.

"The once-in-a-million year event.....Group Star Competition, it's still here." The white-clothed young man muttered to himself.

Clang clang.....

At this time, a vivid and ancient bell sounded.

It made both the white-clothed young man and the black-clothed young man tremble.

Immediately after that

A majestic voice resounded in the ears of the two people and said, "All second-level disciples of the sect all come to the main hall of the sect!"

The black-clothed young man and the white-clothed young man glanced at each other.

Both saw the shock in each other's eyes.

Because, this voice was.....

It was from the patriarch of the Dao Sect!

The clan of the Dao Sect was an extremely powerful level six planet master!

But usually rarely interferes with the affairs of the clan.

The two of them rushed together to the clan's main hall.

When they came here.

There were already at least tens of thousands of people inside.

This clan's sect hall was vast.

It could hold millions of people.

These people were not a big deal.

After waiting for a while, the people gathered.

The figure of a middle-aged man in yellow..... appeared on the high platform in front!

“It's my first time meeting the patriarch of our Dao Sect.”

The black-clothed young man moved his lips and said imperceptibly.

The white-clothed young man was also curious.

Even though he was Daozi.

But it was hard to even meet the level six planet lord in the clan.

Not to mention the high and mighty Sovereign.

Along with the yellow-clothed middle-aged man.

The entire hall had hundreds of thousands of people.

Suddenly.....

Completely silent.

The yellow-clothed middle-aged man's sharp gaze swept a glance at the crowd and said aloud: “The Group Star Competition has come, and all of you who have been preparing for decades, or even hundreds of years of secondary planet masters , should know what this means.”

The crowd was silent.

They were naturally clear.

That was why they had waited so hard for decades, or even centuries.

The lifespan of a second-tier planet master was around three hundred years.

It was related to each person's talent for building a planet.

The higher the talent, the longer the life span.

The planet master of an ordinary level planet was estimated to be about two hundred years old.

And a mythical level planet master could live to nearly four hundred years old.

“For you heavenly talents, the only path to become a level six planet master
..... is this Group Star Competition!”

The middle-aged man in yellow continued loudly, “Do you know, in the entire vast federation, how many new level six planet masters have been born in the past ten thousand years?”

This question

Few people would know.

Even the well-informed young man in white and the young man in black had both revealed a hint of curiosity.

The appearance of a new level six planet master.

Absolutely was able to affect the situation of the various forces of the big event.

But it was also a secret!

Besides the high level six planet master.

It was hard for others to know.

“Exactly how much you can find out for yourselves.”

The yellow-clothed middle-aged man’s voice sharply said, “But I can tell you”

“Absolutely no more than ten digits, only a handful!”

Wow

Many people at the bottom couldn’t help but let out an uproar.

For thousands of years.

The entire federation

Not even ten new sixth-level planet masters?

“The sixth-level planet master in the history of our federation...”

The yellow-clothed middle-aged man continued, “Most of them came from the winners of the Star Competition. It is very difficult for us to cultivate new sixth-level planet masters by ourselves.”

“Except for the star competition, we can describe the other paths as a near-death experience!”

“Only a very small number of people with unfortunate luck, such as getting some kind of extremely precious treasure, can cross the threshold of the sixth level.”

“So”

The middle-aged man in yellow swept his eyes coldly and sternly at the crowd and said, “If you want to become a level six planet master, this group star competition is almost your only hope!”

“Go ahead, and sign up. Whoever can become the winner of the Group Star Competition, then

“No matter what your origin or talent, the next patriarch will be yours!”

“Daozi, you’re not lucky enough.” After the dispersal, the young man in black laughed and said, “If you could have been born five years earlier, you might have had the chance to compete for this winner’s spot.”

“I’ve known this for a long time.”

The white-clothed young man showed a hint of helplessness and said, “I’m not the only one, you too, and all those heavenly demons in our class can only sigh with admiration.”

In Bei Dou University.

Outside, a beautiful villa.

Ao Xiong, Prince Qing and others were gathering here.

Waiting outside the gate.

Although, they were waiting for a long time.

But the face was not at all impatient.

If you look carefully.

It can be found

The surrounding area of this villa is also the same as Jiang Fan’s villa.

There was a layer of star space.

This was

The place where the first Great Myth level student in ten thousand years, the famous “Crown Prince” lived.

A slight turbulence rippled.

The star space opened a hole.

Immediately after that

The villa door opened.

From inside came out an uncommonly temperamental young man dressed in white, with a face like a crown of jade and a handsome look.

“Crown Prince.”

Seeing this young man, everyone said respectfully.

Even Ao Xiong and Prince Qing were the same.

The crowd was very clear

The future successor of Bei Dou University.

Must be the one in front of him!

Ao Xiong could have such a big voice in the school.

The main reason was that he was the spokesperson for the Crown Prince Party.

No one dared to offend him.

The prince nodded slightly.

With that

He looked up at the huge star list in the sky, but his face did not fluctuate.

Instead, he scanned Ao Xiong and the others, revealed a smile and asked, "During the time I was in seclusion, did anything big happen outside?"

"No major events."

Prince Qing spoke: "But a rather sensational event happened in our school."

"In the super top university exchange tournament, our school blew a big cold one and took the championship."

"But that great mythical level freshman Jiang Fan's sake?" The prince asked.

"Exactly."

Prince Qing nodded and said, "This exchange tournament Li Zihao and I were both withdrawn, and the remaining lineup was not complete, but Jiang Fan created a brand new race called 'Pilots and ended up defeating five Great Mythic level Xinghe university by himself to take this championship."

"It's not just our school that's very sensational, there are rumors in the whole federation... Jiang Fan is the strongest freshman in this class."

"Now this Jiang Fan is very scenic."

Li Zihao at the back added: "Many people now think that Jiang Fan's talent is above yours, Prince."

"If Jiang Fan hadn't been born a few years later, maybe this successor position would be his."

"You don't have to provoke me with your words." The crown prince's face was calm as he said, "To reach this point, Jiang Fan has some abilities, and in the future, he will become another powerful planet master of my Bei Dou University."

"Crown Prince, you don't know how arrogant Jiang Fan was at first." A trace of anger appeared on Li Zihao's face as he said, "He directly forced out mentor Ao in order to dominate the power, and Prince Qing and I had no choice but to quit the varsity because of it."

Chapter 448: The Ten Thousand Year Event! The Group Star Competition!

Ads by BidGear

“Don't talk about that.” Next to him, Ao Xiong's face was slack as he said, “This is a critical time for the Crown Prince to impact the Group Star Competition. Don't let the Crown Prince be distracted!”

“That's a small matter.” The crown prince smiled slightly and said, “We are all part of Bei Dou University, so it's normal to have some conflicts.”

“Jiang Fan is only eighteen years old now, and his talent is strong, so he must be rather high-minded and arrogant. Just suppress him when the time comes, and don't worry about it.”

“It's still the Crown Prince's atmosphere.” Li Zihao quickly flattered.

“All right, you guys go back first.” The crown prince waved his hand and said, “The teacher is calling me. I have to hurry over.”

“The prince's teacher?”

The crowd was slightly shocked.

Because

The prince's teacher was none other than the true master of this Bei Dou University—

That high and mighty level six planet master!

Because the crown prince was the only student of Bei Dou University in ten thousand years who had the possibility to shock the winners of the group star competition.

So he accepted to be the disciple of record!

If everything goes well, there would be a new level 6 planet master in the future!

At the same time, Jiang Fan was still inside the Awakening Space.

Observing the evolution of the Blue Star.

At this point in time, several more years have passed on the Blue Star.

The population was increasing rapidly.

The level of technology was even more rapid.

Research teams developed many powerful weapons that were not even available in previous generations..... one after another.

The diameter of the planet broke through four thousand kilometers for the first time.

Jiang Fan only detached himself when it was time to eat.

Pick up the communicator next to it and take a look.

There were more than a dozen unanswered communication requests.

He looked carefully.

But they were from Su Jicheng, Lin Youhe, and others.

“Could it be something important?”

Jiang Fan thought about it.

He was about to reply.

Suddenly, he noticed that something didn't seem right outside.

The grass was obviously a little brighter than usual.

Jiang Fan walked out the door to look.

At once, he found

High above the dome of the sky.

There was actually an oversized text composed of non-stop flashing stars!

These words have been added.

Combined into a huge and incomparable starry sky list text.

Jiang Fan blinked his eyes.

In a flash, he thought of the scene after he passed the eternal level difficulty.

But it wasn't that amazing.

At this time, the communicator rank.

Jiang Fan picked it up and looked.

It was Lin Youhe calling.

After picking it up.

Lin Youhe's projection appeared in front of him, and without even greeting him, he directly said, “Jiang Fan, have you seen the list in the sky?”

“I'm reading it now.”

Jiang Fan nodded his head.

Slightly narrowed his eyes.

Fixing his eyes on the content of this starry sky version of the text –

Once every 10,000 years, registration for the Group Star Competition held by the Group Star Conference was officially open!

No matter what your origin, age, or race, as long as you were a second-tier planet master, then come and sign up.

Here you would find the top talent, the most generous rewards and the best training in the Endless Star Region!

For more details, please log in to the registration page of the All Stars Competition Council.

“The Council of Stars?”

Jiang Fan raised his eyebrows.

“It's a real behemoth in the Endless Star Domain.” Lin Youhe explained, “If there's anyone who knows how big the Endless Star Realm really is, then..... It must be the Council of the Stars!”

“Our federation is big enough, right?”

Jiang Fan nodded slightly.

The Federation was indeed very, very large.

It could be described as vast and boundless.

“But the federation is a tiny wave in the endless star field, the kind that is insignificant in the slightest, while the Star Council is the true master of the endless star field, ruling over billions of stars and an unknown number of level six powerhouses underneath.”

“A tournament of this size

“Only the Star Council can hold it.”

“Once in 10,000 years, to select the most demonic existence among the second level planet masters!”

For the Star Competition.

Jiang Fan had naturally heard of it to a greater or lesser extent.

It was divided according to the level of planet lords.

They divided level one and two into primary.

And divided level three and four into intermediate.

Level four and level five were advanced.

With the powerful existence of the high level six planet master.

Primary planet owners were still in the potential stage.

The second level planet master was called “the last genius”.

Because after reaching the third level.

There would be no more genius title.

The battle power of any third-level planet master had basically been set and could no longer have any significant change.

It was like growing up from a teenager to an adult.

This was also a powerful force such as the Group Star Council to select good seedlings The best stage.

That was why there was such a group star competition!

It was also known as the “Road to the Sixth Level”!

“I heard that most of our Federation’s Level 6 planet masters were all winners of the Group Star Competition and were eventually trained by the Group Star Council.”

Lin Youhe said with some emotion: “With the power of our Federation alone, we cannot cultivate a level 6 planet master on our own!”

“After all, only the strongest person is at this level.”

“And in the Group Star Council, I heard that there are even stronger great existences!”

“It’s a pity that our current term is a few years late.”

Lin Youhe shook his head and looked at Jiang Fan, “Especially you, Jiang Fan, it’s too bad. If you had been born ten years earlier, or maybe five years would have been enough!”

“Maybe you would have had the chance to win this group star competition.”

According to the evolutionary speed of most planets.

Starting from level two to the peak of level two.

It takes at least five years or more.

Only

What Lin Youhe and the others didn’t know was.

Jiang Fan’s Blue Star was not the same.

It was now over four thousand kilometers in diameter!

And with the increase in population, the area increased.

It would get faster and faster later.

Faster and faster!

“But it can’t be helped.”

Lin Youhe smiled helplessly and said, “This is the Group Star Council, people don’t care about you, a small level two planet master, for them, it doesn’t matter if there are a few more level six planet masters or a few less, everything is done according to the rules.”

“Hmm?”

At this time, a voice suddenly sounded in Jiang Fan and Lin He’s mind – All second-level planet masters get ready. In ten minutes, there would be a transmission.

Hearing this voice.

Jiang Fan's first reaction was the spirit of the planet.

But the voice didn't sound like it.

Then something immediately came to mind.

"It's that powerful existence."

Lin Youhe was slightly startled, and said, "It seems that this star competition has alarmed the sixth-level planet masters. Jiang Fan, See you later."

Hang up the communication.

Jiang Fan washed his face and changed his clothes.

Ten minutes later, a force suddenly entangled the whole person.

Immediately after

The surroundings had changed.

When you look again, he was no longer in his own villa.

Instead, it was replaced with a huge, void-like occasion.

Jiang Fan was not the only one here.

Surrounded by blackness, all

Secondary planet masters of Bei Dou University!

"Jiang Fan."

Lin Youhe's voice rang out.

Jiang Fan turned his head to look.

The four of them, Lin Youhe, Xiang Zhifei, Wan Yunsheng, and Jane Ziqiang, walked over together.

Ever since, the team had participated in the exchange tournament.

The relationship between these four people had become even better.

"So many people, tsk."

Jane Ziqiang swept a glance at the black crowd and couldn't help but stammer, "I'm afraid this is no less than 100,000 people. Are there so many second-level planet masters in our school?"

"Look at the number of seniors here."

Lin Youhe pointed to the front, a large group of old people with white hair and beard, said: "These people have already reached the peak of the second-level planet master, but they have never participated in planet promotion, just to... Wait for this star contest!"

"Waiting for that chance that the Council of Stars will support the pitifully small number!"

Hearing that, Jiang Fan and several people couldn't help but stay silent.

The smile on his face also slightly contracted.

Although these people were so desperate.

But in the end, I'm afraid that none of them would have a chance.

But

Still bitterly enduring for hundreds of years.

This was also mainly because

The difference between level five and level six was very large.

The fifth-level planet masters could be seen everywhere, but there were also a lot of them.

And the sixth level

There were very few of them!

There were few in the entire federation.

Becoming a level six planet master was the real powerhouse.

Chapter 449: The craziest times! Endless applicants!

The front of the crowd was a crowd of level 2 peak planet masters.

The worth of the so-called secondary peak was that their planet was over 9,000 kilometers in diameter!

It was not the same as a first-class planet.

First-class planets were limited in the amount of transcendental energy they could withstand because of their small diameters.

Nine hundred kilometers or more was very difficult.

The capacity of the second level planet to hold the transcendental energy was much larger.

It could breed more, more powerful transcendent species!

Planet diameter development beyond nine thousand kilometers was much less difficult, but after nine thousand kilometers, with each additional kilometer, difficulty would increase by one point.

Many ambitious people weren't satisfied.

It would slowly improve the diameter of their planet step by step.

Thus increasing the strength of the planet!

One part was preparing the planet for promotion.

Another part was

to wait for this once-in-a-million years opportunity!

"Old friend, how many years have we been waiting for this?"

An old man in black spoke up and asked.

"I can't quite remember. It's probably about three hundred years." A white-clothed old man next to him responded with emotion.

“Back then, you and I were the most demonic freshmen in that class of the Bei Dou University, both passed the mythical level examination and were promoted to second-level planet master at eighteen, and developed our respective planets to nine thousand kilometers at twenty-five.”

The old man in black’s eyes flashed a trace of memory and said, “But twenty-five years old all the way to now, only promoted less than three hundred kilometers.”

“It can’t be helped. The further you go, the harder it gets.”

The old man in white shook his head and said, “We are still good. Do you still remember Liu Xi who was in our class that year?”

“Of course I remember. Liu Xi was a recognized school girl, although the talent is not as high as the two of us, but is more popular with the girls.”

The old man in black laughed.

“After the planet developed to nine thousand kilometers, Liu Xi intended to spell the group star competition, and even broke up with his school girlfriend, but did not expect

The old man in white paused and said, “Not only he didn’t improve, but directly collapsed, a collapse of a thousand miles, backwards to below five thousand kilometers.”

“This made him not even dare to go to the ordinary level of the planet promotion. He quit the school disheartened, and now he doesn’t know where he will spend the rest of his life.”

“At least we still have a way out.”

The old man in black nodded and said, “Even if we can’t get out of the group star competition, we are still able to continue to go to the promotion, with your and my planetary strength, the epic level of difficulty should not be too big, and by then we will be a third level planet master!”

“Everyone is thinking the same thing.”

The old man in white swept a glance around the black crowd, and could not help but laugh: “So Look, so many people have endured until now.”

“There are a lot of old guys like us.”

The old man in black laughed bitterly and said, “Our school alone has so many, the entire Federation outside, and even the entire Endless Star Field, probably hundreds of millions, but...”

“You and I should also know that most of them don’t end well.”

“This truth is actually very clear in everyone’s heart.”

The old man in white said calmly: “But why did you forcefully support it for hundreds of years? Isn’t it because of that nebulous opportunity!”

“To become a level six planet master, you must have a strong heart!”

“That’s right, that’s right, a planet master who doesn’t want to become a level six planet master is not a good planet master!”

The old man in black also had a serious face!

As the most outstanding geniuses of various eras.

They weren’t just high-minded and arrogant.

Also more than that The heart of a strong man who is not willing!!!

“It’s a pity that these people The chance is slim!” Lin Youhe watched these not-so-young second-level planet master forward, a pause, shook his head, lamented: “According to the previous group star competition, the final winner is basically that are within a hundred years old.”

“Older ones instead are rarely seen!”

This point.

Lin Youhe didn’t need to explain.

Jiang Fan and others also knew what the reason was.

After the planet climbed to its peak.

If you don’t participate in the promotion, ecological collapse might occur.

With more time, the higher the probability of such a collapse!

Don’t look at these old men with white hair struggling to hold on for hundreds of years.

But maybe the planet they built had been substantially degraded!

The best state was still within a hundred years.

Taking advantage of the planet at its peak.

It was most stable to come to the group star competition.

“But don’t underestimate them either.”

Wan Yunsheng spoke: Being able to maintain a second-level planet without collapsing for hundreds of years, this perseverance and endurance cannot be underestimated. If you underestimate it, you will definitely suffer.”

“That’s right.”

Xiang Zhifei nodded and agreed: “These seniors may not have much chance of superiority, but the strength is definitely all very strong!”

“What’s the use of talking about this, it has nothing to do with us either, well” Lin Youhe’s voice suddenly stopped.

The surrounding crowd's talk was also completely extinguished at once.

People turned their heads to look forward.

Then they saw

An old man in blue with a unique aura appeared above.

Seemingly very ordinary.

But there was an indefinable ethereal-like aura on his body.

Jiang Fan and a few others although not seen with their own eyes.

But it was clear

This blue-clothed old man was The real master of Beidou University!

The only level six planet master!

The blue-clothed old man swept a glance at the black pressed crowd and spoke out: "I won't say much else, everyone knows the importance of the Group Star Competition, so go ahead and register if you want to participate!"

"No matter who, if you can take the winning spot, then"

"After me, the successor of this Beidou University is his!"

"Crown Prince."

The blue-clothed old man looked to a plump and handsome white-clothed young man at the forefront and said, "Our school's Level 2 peak planet master will then be led by you, in the next month, prepare well and strive to get a good result!"

"Yes, teacher."

The prince answered.

The blue-clothed old man waved his right hand gently.

The whole person directly disappeared.

And the scene around was changed.

Just now it was still in a void.

Now it had turned into a certain arena.

"For the next month, the school is providing free enhanced star space in this arena."

The prince scanned the crowd and said, "Any second-level planet master who wants to participate in the competition can come over!"

"Is this man the legendary Prince? The first Grand Mythic level in our school in ten thousand years?"

Jane Ziqiang looked at the prince for a few moments.

Could not help but ask curiously.

Chapter 450: The craziest times! Endless applicants!

“Well, that's right.”

The well-informed Lin Youhe nodded and said, “It is said that he is the only second-level planet master in our school who has the hope of winning the championship. If there is no accident, he will be the school's next successor.”

When saying this.

Next to him, Xiang Zhifei and Wan Yunsheng both faintly glanced at Jiang Fan.

Of course, they were clear about the conflict between Jiang Fan and those Ao Xiong people.

And those people of Ao Xiong belonged to the Prince's gang.

If Jiang Fan was not convinced.

The future might not be too easy.

“The Crown Prince or something is still too far away from us.”

Wan Yunsheng smiled, looked at a few people and said, “Although we are less powerful, we are also second level planet masters and are qualified to participate in this competition, what do you think? Do you want to sign up and see?”

“Of course I want to sign up.”

Lin Youhe immediately said, “This is an opportunity that only comes once in 10,000 years, if we wait until the next time, we would probably have been reincarnated long ago.”

“Yes, it's good to open your eyes and see the world.”

Xiang Zhifei also followed: “This competition, but the convergence of the most demonic geniuses of the centuries!”

Although Jane Ziqiang did not say anything.

But the light in his eyes was very bright.

“Jiang Fan, what about you?”

Lin Youhe looked at Jiang Fan and asked.

“You're all going to participate, so of course I can't skip it too.”

Jiang Fan laughed.

The Road to Level 6.....

Since there was such an opportunity.

Jiang Fan naturally couldn't possibly miss it.

“Come take a look at the official registration page.”

Lin Youhe directly projected out a huge page.

It was the official registration page for the Group Star Competition.

At the top was the slogan for this competition.

In the middle was a huge entry portal for registration.

At the bottom there was also

The number of registrants in real time.

This number of people was changing rapidly every second.

“Crap!”

Seeing the staggering number of registrations, Jane Ziqiang couldn't help but marvel, “So many people?”

Jiang Fan took a look.

The number of people displayed at this point had already exceeded one billion!

“Of course.”

Lin Youhe wasn't surprised and said, “This is..... The number of people enrolled in the entire Endless Starfield! In our school alone, the second level planet masters are more than a hundred thousand people, and our school is placed in the federation with nothing.”

“The entire federation is at least hundreds of millions!” And the entire Federation is nothing in the Endless Starfield.”

“Most of them are cannon fodder, including us.”

Xiang Zhifei made a joke.

“Cannon fodder must also be properly prepared, next I will be in seclusion for a month, what about you all?”

Lin Youhe asked.

“Same, since we are participating, we have to give our best, don't lose too badly.”

Wan Yunsheng and the others also responded.

After some deliberation.

Several people decided to spend the next month.....

Cut off all outside contact and devote themselves to the creation of the planet.

Jiang Fan didn't have to stay in this enhanced star space.

His villa's star space was the same as here.

“The competition doesn't open until a month later?”

Back to the villa.

Jiang Fan calculated the time.

Since the contestants ranged from the entire Endless Starfield.

It was too extensive.

So the registration time was also very long.

It lasted a whole month.

“I'll have to prepare properly as well.”

Jiang Fan quickly made his decision.

But Jiang Fan was different from Lin Youhe and the others.

Could not just plan to go over there to open eyes, but.....to strive for a good ranking.

“Not much else, at least fight for a winning spot so that he can get into the Star council.”

Jiang Fan secretly wanted to see.

A behemoth like the Group Star Council.

The resources that could be provided.

Naturally, there were more resources than the Bei Dou University or more powerful sects or dynasties!

Only

No need to deduce the system.

Jiang Fan was also clear.

Now Blue Star's strength was not enough.

This was an endless battle of geniuses from the entire federation, the empire and other regions!

There was no shortage of talented demons and those with great luck.

For Jiang Fan.

A very crucial point was

There was still one month of preparation time.

The biggest difference with other planet owners was that.

Blue Star could accelerate evolution.

Although other secondary planets could also be accelerated.

But it was not possible to exaggerate as much as the Blue Star.

Jiang Fan went into the awakening space again.

A prompt was made.

Xia Ning, Xu Jie, Huo Zhaoge, and others were meeting to discuss nuclear fusion.

Suddenly

They saw the transparent panel in front of them.

There was an extra line of words –

The Supreme Glory Conquest was about to start in ten years, this conquest would last for a hundred years, please be prepared!

According to the rules of the Group Star Competition.

From the preliminaries to the final round.

The whole time would last a full half year!

This gives Jiang Fan sufficient time to develop.

So it was also necessary to inform Xia's top officials in advance.

Seeing this line.

Everyone was slightly taken aback.

Immediately... a look of surprise appeared on their faces.

Especially the two people, Huo Qubing and Xu Ji.

Totally unexpected

The seven people in the last cabinet.

It was not until late in life that they waited for the opportunity to conquer the war.

Or a small glory conquest.

They just took office not very long.

And then encountered the supreme glory conquest!

“Supreme glory conquest?”

Huo suddenly realized something and spoke: “According to the previous records, the glory conquest is divided into the great glory conquest and the small glory conquest, this time the supreme glory conquest

It is estimated that the importance is even higher!”

“It should be so.”

Xia Ning nodded slightly and said, “You did not see the hint, we are all ten years ahead of schedule. It will also last a full century, indicating that this time the Supreme Glory Conquest is very critical, while

Xia Ning scanned the crowd, continued, “I'm afraid the difficulty is also unprecedentedly high!”

“Don't be afraid of high difficulty.”

Huo Qubing smiled slightly and said, “What I'm afraid of is that it's not difficult.”

“This conquest will last for a hundred years, so let’s get ready next and make a thorough plan to lay the foundation for the next hundred years.”

Xia Ning said in a very gruff tone.

So

A top-secret plan called “The hundred-year plan”.

After a week of continuous discussion among the seven members of the cabinet.

Initially it was born.

But also this was a general direction.

Various aspects of the specific steps would need to be explored in more detail.

Jiang Fan looked at a few eyes.

There was nothing wrong with it.

Jiang Fan also made slight adjustments to Blue Star’s time flow.

This flow rate.

Of course, it was also deduced with the deduction system.
