

One Planet 481

Chapter 481: The Battle of Heavenly Pride begins! Thirty years later, the Great Desolate Army!

“Only a hundredth place? That Hess before the total points ranking can be more than eighty

Xiang Zhifei frowned and asked.

“That’s the total points.”

Lin Youhe explained, “You should also know that in the group stage, no one will make their full strength.”

“This Hess’s actual strength is in the upper or lower two hundredth place.”

“But

“This is just a ranking from the strength shown by the various participants of the tournament so far.”

Lin Youhe lamented, “Not including those who are hiding their strength.”

“I just hope Jiang Fan doesn’t run into such contestants!”

“Jiang Fan’s luck has always been good.”

Xiang Zhifei laughed and said.

“Let’s see the result of the draw. If there’s nothing unexpected, this first round is going to be relatively smooth.”

The tournament party arranged the draw ceremony.

Directly using the power of origin.

A small ball was drawn.

They attached the numbers of the participants to the balls.

There was no artificial factor at all.

It was as fair and just as possible!

In the middle of the field.

Four thousand contestants all stared at The small balls that were constantly being drawn out.

Countless spectators were also paying attention.

Many weak contestants were still praying inwardly.

“I hope I don’t run into those ranked in the top fifty.”

A dark-haired young man secretly thought, “With my hidden bottom card, as long as I don’t run into the top fifty, I have a great hope of winning!”

“The others are fine, but don’t meet the one from the Long Sky Kingdom. The race he created is very restrained.”

“Let’s have a weaker one. I still have some hope.”

The forces outside have ranked me above a thousand, really blind. Later on, take a good look at my real strength and hit these people’s faces hard!”

“Hmph, it doesn’t matter who I touch, I, Wu Yun, am going to be number one in the entire Long Sky Star Area, or even Top 100 in the Endless Star Region! This time, let the entire Endless Star Region spread my name!”

“Damn it! I, Hess, just met a monstrous freshman, and I was looked down upon so much. It’s not easy to win the first round!”

“.....”

Each and every participant had various thoughts inside.

But without exception

All of them wanted to be on this stage where all eyes were on them.

The most dazzling light of their own!

Needless to say, those popular players.

Some unknown contestants

The actual strengths of the contestants were also ready to show their true strengths and make their mark!

The draw ceremony was not long-winded.

It ended very quickly.

Just one minute later.

Four thousand contestants.

Two thousand groups of matchup results All out!

A huge pairing chart appeared in the sky above the venue.

It attracted everyone's attention.

One by one, the audience and the participants all fixed their eyes on it.

Jiang Fan also raised his head to look at this pairing chart.

A moment later.

He found his name and the opponent behind him!

“Jiang Fan's opponent is Teng Weihong? Someone from the Empire's side, this Teng Weihong doesn't seem to be a royal son of the Empire, right?”

Inside the box.

Lin Youhe and the others were also paying attention to Jiang Fan's opponent.

“Imperial royal family children don't have this surname.”

Father Lin spoke, “But the surname Teng is also a big surname in the empire, so I guess it's someone from the Teng family, the first family in the empire.”

“This Teng Weihong, the strength ranking outside is over two thousand.”

“Not weak, but not strong either, but”

“What is certain is that the Teng family must have prepared some bottom cards for him.”

“The Teng family didn't prepare any bottom cards for me.”

In the middle of the field.

Teng Weihong, who was drawn as Jiang Fan's opponent, looked at this matchup result. His gaze sank, and secretly thought, "But I have a more powerful undercard!"

"This is my true reliance!"

"By relying on this bottom card, I could stand out from the Teng Family Grand Competition."

"But it also offended those few direct descendants."

Teng Weihong's gaze glanced to the side.

There were several other young men and women who were not bad looking.

As the number one family in the empire.

This time, they also sent an extremely large number of secondary planet owners to participate in the group star competition.

Eventually, there were quite a few who entered the 4,000 people.

Teng Weihong was just one of them.

Because of the collateral origin, no one paid attention to him at all.

"Hmph, you people will let your scenery shine for a while first."

Teng Weihong's gaze was gloomy as he continued to think, "When I take the 1,000th place out of the line, and then play well in the main competition and get the training of the Star Council, then"

“The next head of the next patriarch of the Teng family will be mine!”

“You guys will beg me on your knees by then. I won’t even bother to pay attention!”

“The first round of the elimination round will begin in ten minutes. Please prepare yourselves.”

The pleasant woman’s voice rang out again.

The four thousand people in the venue.

They were instantly transported to one of the sparring rooms.

These two thousand groups of battles would start at the same time.

The audience could choose the match they wanted to watch.

From there, they could go inside the individual match rooms.

“Quick, quick, let’s go to Jiang Fan’s one venue.”

Lin Youhe and the other four people hurriedly moved.

There was also a limit to the number of spectators at each venue.

It was a maximum of 100 million people!

The one between Jiang Fan and Teng Weihong wasn’t considered a focus battle.

Jiang Fan was just a little famous for now.

But it couldn’t be compared to those popular players.

Lin Youhe and the four of them found their places very smoothly.

From the beginning of the elimination match.

In the audience, there was no special viewing position like a box.

All were in the same seats.

Nevertheless, the 100 million spectator seats were still quickly filled.

Besides the supporters behind the two players.

There were many spectators.

“Jiang Fan! Jiang Fan

Many viewers were shouting.

Compared to Teng Weihong.

Jiang Fan was more famous.

Especially for his handsome look.

There were only a few who shouted Teng Weihong’s name.

“Damn it.”

Inside the sparring room, listening to a shout from outside, a trace of anger flashed in Teng Weihong’s eyes.

“Wait until I burst cold and eliminate this so-called strongest freshman Jiang Fan out. See how you guys still shout?”

Teng Weihong thought with great confidence.

Ten minutes passed in a flash.

The match officially began.

The planet channel opened.

This time

The Great Desolate Army sent out 100,000 troops.

A one-on-one duel.

Naturally, more numbers were better.

And over the head of the Great Desolate Army.

A hundred storm warplanes flew in swiftly like sea swallows.

Compared to the hundred man battle in front of them.

Thirty years had passed on the Blue Star.

The storm warplanes also developed to The third generation!

Faster speed!

More powerful performance.

Besides the Great Desolate Army and warplanes.

Giant gorillas naturally couldn't be missing.

This time it was 500 giant gorillas.

Giant gorilla group Almost half of the number was mobilized!

For this reason.

There was also a competition for places within the gorillas.

It was the same as the hundred man battle.

After the start of the competition, they were not allowed to come and go at will.

Once you exit the planet passage.

You wouldn't be able to come back.

A micro drone flew in first.

Scouted the site at once.

After confirming that it was safe and sound.

Only then did the Great Desolate Army warriors quickly step in.

The first thing was to establish a defensive position.

Five hundred giant gorillas continued to act as a platoon.

Clad in thick armor and holding giant axes in their hands, they stood at the outermost end.

As the first layer of the defensive line.

A spider chariot followed closely behind.

Forming the second layer of the defense line.

Rumble

A trembling sound came from the ground.

In the planet passage opposite the Great Desolate Army.

Teams of tall and burly figures walked out.

The Great Desolate Army's team of five hundred scholars immediately observed.

This was also the Great Desolate Army so far

Another brand new transcendent species encountered!!!.

Chapter 482: New Weapon appears! Field Battle!

This was a group of supernatural creatures that were tall and quite similar to humans in appearance.

Each one had long hair scattered.

The upper half of their bodies were bare.

They were extremely muscular.

Bare, enormous feet.

They did not wear shoes.

Body hair was very luxuriant.

Both hands also held weapons.

Most of them were spears, and a few carried javelins.

At the body surface

There was also a dense pattern tattooed.

These patterns make people feel a little dizzy when they look at them.

“The patterns on the other side’s body are problematic. Be careful not to look at them.” A doctor from the scholar team immediately shouted.

“Totem Barbarians!?”

Jiang Fan raised his eyebrows.

Recognized the tall transcendent creature of this species.

The barbarian species.

It was distributed from low level to super.

And this totem barbarian in front of him was

Of all the barbarian races.

The only one of the super level.

The most different from other barbarians was The body of the totem pattern.

It wasn't tattooed.

Rather

They were born with it!

This totem not only allowed the barbarian to grow better.

It could also stimulate and improve the barbarian's combat power for a short time in battle!

Jiang Fan was surveying these totem barbarians, which numbered over 30,000, at the same time.

Teng Weihong was also sizing up the Great Desolate Army.

"Musketeers and pilots?"

Teng Weihong naturally wouldn't be careless.

After the lottery ceremony was over.

He looked up information about Jiang Fan.

Also quickly browsed through the video of the Great Desolate Army's previous matches.

His heart sank for a while.

"Musketeers are nothing, weak as hell."

Teng Weihong's gaze shifted to the storm fighters in the air, "It's these planes who are a huge trouble!"

"In the 100-man battle, Hess of Giant Island was defeated by these planes."

"But"

The corners of Teng Weihong's mouth curled up in a smile. "If it was a normal fight, I might not be an opponent."

"But I am now saving my bottom card to specifically deal with these aerial creatures."

"Barbarians, show your courage, charge over and finish off these weaklings!"

Teng Weihong commanded and ordered.

He was also experienced.

-At a glance

To defeat the Great Desolate Army.

He had to make a quick decision.

He couldn't delay it any further.

"Ha!"

Of the 30,000 totem barbarians.

The barbarian chief, with the tallest body size, roared out and led the other barbarians towards the Great Desolate Army and ran at full speed.

“Charge as soon as they come up.”

Huo raised his eyebrows, then ordered, “Warplanes attack, crush these barbarians!”

The bottom of the fifty warplanes above the sky.

One long, oval-shaped medium-sized missile was quickly launched.

This was for the Great Desolate Army.

It was already very familiar.

But for the audience at the scene.

It was quite strange!

The battle between the 100 men and Hess.

It also made the fame of the missile rise.

Many people were interested in this powerful and terrifying weapon very much.

The first batch fired fifty armor-piercing missiles.

Fifty barbarians headed up, down, left, and right.

To do separate strikes to cause the maximum damage.

“This weapon is still really fast. If I didn’t have a bottom card, there really wouldn’t be much I could do about it.”

Teng Weihong smiled gently, and then shouted, “Barbarians, use your unity power to block all these weapons for me.”

The words fell.

It surprised the crowd to see

The totem patterns of each barbarian suddenly lit up!

It emitted a deep glow.

Among them, the barbarian chief’s body was the most radiant.

“Roar!”

The barbarian chief held up his spear.

Once again, he looked up at the sky and roared.

The next moment.

The 30,000 barbarians around the body surface patterns

Like a street lamp.

Connected into a piece!

Made the whole barbarian team look a little fantastic.

It seemed to have been sublimated.

And at the same time, as these patterns lit up.

The speed of the barbarians was also strengthened.

More quickly, they rushed towards the Great Desolate Army.

“This is A domain formed by the power of totems!?”

Within the box.

Father Lin frowned slightly as he watched this scene.

“A domain!?”

Lin Youhe, Wan Yunsheng and the other four people were all slightly stunned.

“That’s right, this should be the domain.”

Father Lin nodded slightly and said, “Totem barbarians are relatively rare, and legend has it that after the third level, they can awaken the ability of the domain.”

“It’s the same as what you guys are seeing now.”

“Thirty thousand barbarians gathered together and united their totems to become a primary domain!”

“This domain is so terrifying that what is within the domain, they can manipulate at will.”

“I didn’t expect that this barbarian that Teng Weihong created could comprehend the mysteries of the totem field at level two!”

“So strong!?”

It shocked Lin Youhe and a few others to hear this.

The domain of thirty thousand barbarians was not small.

If that was the case.

Wouldn't that be invincible?

"The domain will definitely not be weak."

Father Lin smiled and said, "This Teng Weihong has indeed hidden his base card, but I didn't expect the base card to be so powerful. His true strength should be to rank in the top one thousand!"

"Won't Jiang Fan be in trouble?"

Xiang Zhifei frowned and asked, "I'm afraid that the terrifying weapon Jiang Fan's pilot built will be affected if it falls in the domain, right?"

"It's bound to be affected."

Father Lin nodded and said, "But this is still only the primary domain. It's not that powerful yet, and"

"It needs to consume a lot of totemic power, so I guess it won't be able to support it for long."

Whoosh, whoosh, whoosh

-An armor-piercing missile flew past.

Soon, they were forced to approach the sky above the barbarian army.

"The other side seems to... use some kind of special ability?"

Luo Cheng frowned slightly and said, "The aura and breath are obviously different."

“It should be.”

Huo Qubing also said with a gloomy face: “The opposite side must have researched us. This time, they will directly charge forward. I guess there is a way to deal with missiles. Let’s see.”

The first armor-piercing missile instantly passed through the totem field range.

The next moment.

The speed suddenly became slower.

But it was still at a high speed.

Just

This missile was like a lost deer.

Instead of continuing to track the original target It shot straight ahead!

The sound of the wind was loud!

But the barbarians who were already prepared immediately dodged far away to one side.

This armor piercing missile did not turn around.

Nor did it pursue.

A head dug into the ground.

There was a loud boom.

This missile exploded on the spot!

It blew a gigantic crater out of the ground.

It splashed up countless rocks and mud.

The violent shockwave instantly swept out in all directions, enveloping every single barbarian in the vicinity.

A dozen barbarians were injured.

But because they dodged the most central power.

There were no barbarians hung up.

“What!”

-This scene.

Huo Qubing, Luo Cheng and a team of scholars were all taken aback!

Since the development of missiles.

This was the first time they encountered such a thing!

It’s just unbelievable.

The most powerful guidance function of the missile actually failed!

“Hahahaha!”

Inside the battle viewing room.

Teng Weihong was laughing happily, with a hint of complacency on his face: “How about it? This is my actual trump card, even the most powerful weapon like the pilot has failed!”

“The strongest freshman Jiang Fan?”

A hint of disdain flashed in Teng Weihong’s eyes as he said, “Better behave and go to the loser’s group.”

“The weapon built by Jiang Fan’s pilot... has no tracking function anymore!?”

The four people inside the box, Lin Youhe and others, were also very surprised.

At the same time, a hint of worry rose in their hearts.

Chapter 483: New Weapon appears! Field Battle!

They were all clear

Previously, Jiang Fan was able to continuously defeat so many powerful opponents.

The main thing he relied on was this powerful weapon!

The power was extremely impressive.

Also able to precisely track the strike!

It was completely impossible to defend against.

“Uncle Lin.”

Wan Yunsheng looked at Father Lin and asked, “Does this Totem Domain have any weaknesses?”

“Weaknesses?”

Father Lin thought for a moment and said, “Just now, I said that it requires a lot of totem power. This domain won’t last long.”

“How long?”

Lin Youhe asked.

“About three minutes.”

Father Lin paused for a moment and added: “But this is the crucial qualifier, Teng Weihong will definitely use some kind of treasure to extend this world, it is estimated

“It will be at least five minutes!”

“Five minutes!?”

Lin Youhe and other’s suddenly felt cold.

The speed of thirty thousand barbarians was under the power of the totem.

The speed was very fast.

Rushing to the front of the Great Desolate Army’s position.

It wouldn’t even take three minutes.

“Is this the ability of the Totem Domain?”

Jiang Fan was also watching the situation in the field.

After the first armor piercing missile failed.

The second one...

It also ended up the same as the first one.

All of them had lost their tracking capability!

This caused the crowd of the Great Desolate Army to feel that something was wrong while their faces became grave!

“The other side is

A scholar frowned and guessed, “Formed a special range that changed the magnetic field inside, thus making the missiles lose their guidance?”

“I’m afraid that’s the case.”

Another scholar nodded and said, “It should be caused because of the totem power in them, the totems of these 30,000 united to produce such a powerful field!”

“In this way, won’t the missiles be less effective?”

A scholar worried.

The opposite side suddenly made this masterstroke.

It was completely unexpected by the Great Desolate Army.

It disrupted the deployment of the Great Desolate Army.

“No, no.”

An old scholar shook his head and said: “If the opposite really has this kind of field, it will not last long.”

“This cannot be determined, but

Another aged scholar said, “Just two or three minutes is enough time for the other side to rush into our position.”

“So, what should we do now?”

Someone asked.

Faced with this superlative totem field.

The group of scholars all felt a bit helpless.

“Keep firing the missiles. Don’t stop!”

It was Huo Qubing who spoke, and said calmly, “No matter what tricks the opposite side is using, but we can’t mess up ourselves!”

“All pilots listen to the order, launch armor-piercing missiles one by one, targeting the other side in all directions.”

Huo Qubing’s intention was obvious.

Wanting to see if the missiles could break up the opponent’s field.

A missile at the bottom of the Rainstorm fighter.

Launched continuously, one after another.

Striking in all directions towards the 30,000 barbarian army.

A constant loud booming sound rang out.

Under this kind of uninterrupted continuous explosions.

The waves also affected the 30,000 barbarians.

One by one, the barbarians fell one after another.

There were also several hundred casualties.

But

For the entire number of 30,000 barbarians, there was no effect.

“The missile killing power is still there.”

A scholar faintly breathed a sigh of relief and said, “It’s just that it can’t strike with precision, and the opposite side dodged the strongest power in the middle.”

“Have you noticed...”

Another scholar also said: “The formation on the opposite side has always been within a certain range and has not changed. That means... if the opposite side wants to maintain this totem field, it must stay within the same range.”

“It should be that the opposite side’s field range is this big, any bigger and it can’t be maintained.”

An elderly scholar added.

“If the missile continues to blast on, it will definitely be able to kill and injure the opposite side.”

At this time.

Most people could see this.

And the Great Desolate Army was eliminated this time.

Naturally, it carried a large number of armor-piercing missiles.

Only

Teng Weihong in the viewing room didn't imagine this.

“Charge, charge, charge! Quickly rush over and give me all your strength!”

Teng Weihong was shouting loudly.

“Killing hundreds of barbarians at a time, if given enough time, my army of barbarians can't suffer, but

The corners of Teng Weihong's mouth curled up in a smile, “It won't take long for the barbarians to step through these musketeers' positions!”

“By that time.”

“Without support from the ground, what use are these planes?”

There were already quite a few people outside studying the musketeers and planes that Jiang Fan had built.

Concluded

Although the musketeers look far inferior to the planes.

But also crucial to provide ground protection for planes!

It could be said

Musketeers were a soft spot for planes.

Get rid of the musketeers.

Pilots had nothing to fear.

“It’s too late. If we let these barbarians charge on like this, there will be at most a thousand casualties.”

Next to Huo Qubing.

Luo Cheng, who was on the battlefield for the first time, said in a cold voice.

The experienced Huo Qubing naturally noticed it long ago.

There was another series of loud blasts.

Another hundred or so barbarians fell.

But still not much use.

As long as the armor-piercing missile does not hit the middle part.

For a barbarian with a powerful physique, the lethality was much weaker.

The armor-piercing missiles also had armor breaking effects.

That was deadly.

But now the armor-piercing device at the front of the missile was Totally useless!

Plus the lack of guidance capability.

The entire missile was almost in a half-ruined state.

“Hmm?”

At this time.

A young scholar stared at the army of barbarians rushing over and suddenly noticed something.

His eyebrows furrowed slightly.

Immediately said: “The totem field on the opposite side can only change the magnetic field or position, etc. The effect on weakening the speed of the missile is not strong, and the power is still there. In this case...”

This young scholar looked at the others and said, “Why don’t we just use conventional weapons to take care of the opposite side!”

Hearing this

All the scholars were slightly stunned and literally slapped their brains.

Even Huo Qubing and Luo Cheng’s eyes widened.

Instantly, their mind became enlightened.

Couldn’t help but curse their own stupidity!

Such a simple truth they didn’t think of it at all.

Seeing this scene.

Jiang Fan couldn't help but have a smile on the corner of his mouth.

Because after defeating Hess last time.

The Great Desolate Army from top-to-bottom felt that

In the future, conventional weapons might not have much chance to play and would withdraw from the stage of history.

Missiles were the main killers!

For Teng Weihong.

Also, it was the same idea.

When they saw the missile tracking function failed.

Each one was a little panicked.

Only

What the Great Desolate Army did not realize was that.

Missiles were not the only sharp weapon of the Great Desolate Army.

“We're really stupid.”

Huo Qubing shook his head as well and laughed to himself.

Then his eyes narrowed slightly and said, “Then Let’s use the new weapons that have been developed in these thirty years!”

Hearing that.

Everyone’s eyes lit up.

Although this new type of weapon was developed thirty years ago.

And in these thirty years

It had been greatly improved and complemented.

It was almost perfect now.

They basically used this new type of weapon in normal training.

But

Within the field of the Glory campaign.

They never used it.

This was also another important node in the history of the Xia Kingdom’s firearms.

The new weapon replaced the rapid-fire guns and machine guns of the past, which used gunpowder as kinetic energy.

It became the new conventional equipment of the Great Desolate Army!!!

Chapter 484 Part-1: Terrifying Power! Break through everything! Savage Peiyi!

Rumble

Thirty thousand totem barbarians were rapidly charging towards the Great Desolate Army!

These barbarians were not low in intelligence.

In fact, there was no need for Teng Weihong to command.

They were also all aware that they were facing opponents with long-range output like musketeers and planes.

They must do it quickly.

With the fastest time, they needed to rush into the opponent's position.

That way, it was possible to pay a relatively small price.

Once it breaks into the long-range output position, what awaited them was a one-sided slaughter.

-In general.

The melee ability that could strike from a distance was relatively weak!

Was there any extraordinary species that can output from a distance and has strong melee combat ability?

In countless years of planetary history, there must be such a heaven-defying species, but that was a few of the few.

Could be met but not found!

“Move the electromagnetic rifles and shoot through these opponents.” Huo Qubing ordered aloud.

Electromagnetic Rifle was A brand new weapon developed by the Great Desolate Army in the past decades!

Replaced the previous gunpowder guns.

It became a new type of regular equipment.

Electromagnetic rifle was based on the law of electromagnetic induction using coil energization to fire projectiles.

And the traditional rifle with gunpowder gas pressure on the projectile was different.

The electromagnetic gun mainly used the force generated by the electromagnetic field to accelerate the metal projectile.

Thus achieving the kinetic energy needed to strike the target!

But the development of electromagnetic guns

It was much more difficult than the gunpowder gun.

It could be described as difficult!

Even with so many scholars in Xia Kingdom.

After researching and developing for so many years.

Only the basic shape was formed.

But the main reason was not the technology or materials of electromagnetic guns, but Electricity constrained all electromagnetic weapons.

They wanted to increase the initial speed.

Or grow the electromagnetic track and increase the electromagnetic force.

It was necessary to provide a stronger current!

This required high-capacity batteries.

The size of an electromagnetic rifle was not large.

However, these rifles should be equipped with corresponding large-capacity batteries, and at the same time, the volume should not be large.

That was a hard thing.

The key problem was still in the battery technology.

Until a few years ago

There was only a breakthrough in this area.

Each electromagnetic rifle carried a new type of battery.

They could use this battery at once

Let electromagnetic rifles fire thousands of rounds.

As for the charging problem?

It was naturally left to the thousand electric mounds that also came in with the Great Desolate Army.

There was no other way.

Considered a stopgap measure.

But!

After the actual test.

The crowd was surprised to find that.

The electric current emitted by the electric mound at one time was extremely terrifying.

Just a little bit of it could re-charge an electromagnetic rifle.

“Electric mounds, electric mounds, prepare to charge.”

Luo Cheng was shouting at the thousand electric mounds.

These one thousand electric mounds were crouching around the Great Desolate Army.

Curiously, they surveyed the barbarians in front of them.

After hearing Luo Cheng’s order, they immediately nodded and shouted excitedly.

They equipped thirty warriors of the Great Desolate Army with an electric mound.

The speed of the electric mounds was quick.

It had an innate sense of electricity.

There was no need to instruct.

The electric mound knew which electromagnetic rifle’s battery was dead.

One by one, the Great Desolate Army soldiers picked up the electromagnetic rifle.

And the previous assault rifle up.

The shape of these electromagnetic guns had changed drastically.

Very sci-fi!

“Huh? The musket in Jiang Fan’s hand...seems different?”

Inside the box.

Lin Youhe, who had been watching the movements of the Great Desolate Army, made a questioning sound.

The others also looked over.

At a glance, they saw the brand new shape of the musket.

“It’s really different.”

Xiang Zhifei blinked and said, “I remember that one musket held by Jiang Fan’s previous musketeers didn’t look like this.”

The previous rifles were also updated, though.

But the shape above.

Basically, not much changed.

Not like this time.

It could be described as a truly new type of weapon!

The shape should naturally conform to the principle of the electromagnetic gun.

“A newly awakened musket?”

Wan Yunsheng took a few glances and guessed: “It looks good, it should be more powerful than the previous muskets.”

Besides the electromagnetic rifle in the hands of the Great Desolate Army.

On the spider chariot.

There was also a rack of electromagnetic machine guns!

The product that replaced the continuous speed machine gun.

It still had twelve mouths.

But it used electromagnetic force as the power to launch the bullet.

And the bullets now

Was also different from the previous one.

There was no gunpowder in it.

Instead, it was replaced by a solid spiked alloy bullet.

This was also in order to deal with those transcendent creatures with powerful defense They specially created a brand new bullet.

This kind of spiked bullet was even stronger than the previous armor piercing bullet to break armor!

Rumble

The barbarian army charged at high speed.

It was only less than four kilometers away from the Great Desolate Army's position.

In an instant, it closed in on three kilometers!

This had come within the range of the electromagnetic rifle.

Electromagnetic rifle range, compared to the previous assault rifle.

Naturally, there had been a considerable improvement.

“Free fire”

Huo Qubing issued an order.

Since there was no more gunpowder.

The sound of the electromagnetic rifle projectile shooting out was not the same sound effect as before.

Whirring and whirring

Round after round of spiked alloy bullets poured out!

It was black and dense.

Like a rain of bullets.

The 30,000 barbarians overwhelmingly pressed down.

The distance of over three kilometers

In an instant!

This was the main advantage of electromagnetic rifles over assault rifles – speed!

Relying on the new tearstone alloy material.

Xia's assault rifle speed could reach fifteen hundred meters per second!

The special sniper rifle could even be higher.

But this also had a ceiling.

The highest could not exceed two thousand five hundred meters per second.

And the electromagnetic rifle that relied on electromagnetic force to fire.

The bullet speed was more than twice that of the assault rifle.

Reaching over three thousand meters per second!

Even more in power.

“Musketeers?”

Seeing that the Great Desolate Army warriors were firing with their rifles.

Teng Weihong smiled faintly.

A hint of disdain flashed in his eyes.

In terms of physique and defense.

The barbarian was about the same as the Black Flame Giant in the previous hundred man battle.

But after inspiring the totem power.

The defensive power was greatly strengthened.

The battle between Jiang Fan and Hess.

Teng Weihong naturally saw it after the lottery ceremony.

And he was also well focused on studying a bit.

Finally confirmed

Apart from the plane's missile.

The other weapons of the Great Desolate Army.

To the barbarians, after inspiring the power of the totem was not much of a threat.

“These projectiles will at most break through a layer of the barbarian's skin and will not do any major damage.”

Teng Weihong thought confidently, “When I rush to the front of the musketeer's position, I will pay at most a few hundred more barbarians!”

“By that time

“These weak musketeers will end up being slapped one by one by the barbarians!”

“Jiang Fan, ah, Jiang Fan.”

The corner of Teng Weihong’s mouth curled up into a smug smile as he muttered, “In two minutes, my barbarian army will rush into your musketeer position!”

“You’ll have to give it a go and come up with a good idea.”

“There’s not much time left for you!”

Hoo hoo hoo

Inside the competition field.

A spiked bullet with a speed faster than the wind whistling!

At first.

A barbarian also did not think.

Still charging forward at full speed.

Didn’t take this poor little projectile to heart at all.

But

After seeing the amazing speed of the projectile.

They felt that something was wrong.

And they were considering whether to dodge it

Already too late!

There was a light sound of poof.

A spiked bullet hit a barbarian in the first row.

That high speed brought a tremendous impact.

Plus the special spike structure.

Directly broke through the barbarian's totem power-supported skin.

Pierced into the torso.

This spike was like a cutting machine inside.

Chapter 485 Part-2: Terrifying Power! Break through everything! Savage Peiyi!

They were spinning and stirring inside at high speed, despite being blocked by the barbarian's wide and thick body.

But it still penetrated this vast body.

Broke through the back.

The speed then slowed down.

Hitting the barbarian behind.

Poof, poof, poof

The other spiked bullets came in rapid succession.

Since the 30,000 barbarians army did not spread out in formation at all.

Gathered in one piece and rushed straight ahead.

The warriors of the Great Desolate Army did not need to aim at all.

Directly straight shooting.

Not a single bullet would miss.

Just in one second.

It crossed a distance of over three thousand meters.

Came to the forefront of the barbarians.

Even these barbarians who had inspired the totem power could not react.

They were hit in an instant!

Immediately after that

Shot through the epidermis.

Through the torso and passed!

In a second.

An unknown number of rounds of spiked alloy bullets had hit two dozen huge barbarians.

Just saw

The surface of the torso, densely packed with all the bullet holes.

Truly beaten into a hornet's nest!

On the rate of fire.

They had also improved electromagnetic rifles a lot.

Reached twenty rounds per second.

And the electromagnetic machine gun was even more terrifying.

"Seems like we don't need to go on the field."

A soldier responsible for operating the electromagnetic machine gun said with some enthusiasm.

The electromagnetic cannon was more powerful than the electromagnetic gun.

It required more power.

So next to every electromagnetic cannon.

There was a special electric mound on standby.

The cost of an electromagnetic cannon was quite expensive.

The number was still relatively small.

Don't use it unless it's necessary/

Brought into the arena, mainly in case of an emergency!

But it seemed like

There was no need for this.

With the power of the EM rifle, it would be enough to break through any of the barbarians on the other side!

Plop plop plop

The sound of that bullet piercing through the torso was still ringing out intensively.

One electromagnetic rifle shot twenty rounds of spiked bullets.

Ten thousand warriors of the Great Desolate Army combined

That's two hundred thousand rounds!

Even if the barbarians had a powerful physique.

There was also the totem power enrichment.

But after being hit by hundreds of spiked bullets.

Still fell to the ground heavily.

Dead.

The barbarians at the back were the same.

The army of 30,000 barbarians, looking down from the high altitude.

It was like rows of wheat harvested by scythes.

The front row instantly fell down neatly.

The ones at the back followed by the waist break!

Row by row, they fell to the ground quickly.

Just in an instant.

Within only ten seconds.

The front of the line A thousand barbarians had all been knocked to the ground.

There was no longer any breath.

They hit every one of them with at least a few dozen spike bullets.

The terrifying tearing ability of the spiked bullets.

Dozens of them were stacked together.

The barbarian's torso organs were almost all shattered!

Even the physically strong barbarians could not withstand.

But the electromagnetic rifle's firing continued.

In the rapid harvesting of a barbarian's life.

And as more and more barbarians fell.

The entire domain formed by the power of 30,000 barbarian totems was also broken!

The mysterious stance that made the crowd of the Great Desolate Army impervious to it instantly disappeared.

“The opponent’s domain broke.”

A scholar shouted excitedly.

“Warplanes prepare, continue firing missiles and deliver a fatal blow to the opposite side!”

Huo Qubing ordered on the spot.

As long as there was no more interference from the domain.

The killing power of that missile was still second to none.

The fifty pilots of the storm fighters who received the order immediately launched.

They were also extremely aggrieved.

So many missiles had just been launched.

The missiles that had always been invincible were facing the field formed by these barbarians.

But it was losing its effect.

Now was the time to revive the power!

Whoosh, whoosh, whoosh

An armor-piercing missile was launched again!

Directly towards the barbarians in every direction.

Together with the electromagnetic rifles on the ground

Harvesting the remaining 20,000 barbarians!

This sudden change in the field Just in a brief span of ten seconds!

It's almost unresponsive.

Even Lin Youhe, who was most familiar with Jiang Fan, was wide-eyed.

Just now, they were still worried about Jiang Fan because of the barbarian's domain.

One by one, they were racking their brains to help Jiang Fan think of a solution.

But unexpectedly

In the end, it was actually the musketeer who had been ignored by the crowd that made a statement!

Using the musket in his hand directly pierced a strong barbarian!

Fifty armor piercing missiles fell one after another.

Each one hit at least one barbarian.

And at this time.

A careful pilot even found the barbarian chief in the barbarian army.

A direct shot of armor-piercing missiles passed.

This barbarian chief was bigger.

The strength was also stronger.

But also could not avoid the pursuit of the missile.

It was quickly hit.

There was a loud boom.

After a violent bombardment.

This barbarian chief became a pile of minced meat!

The other barbarians caught up by the missiles also ended up Naturally, they were not much better.

It blew them to pieces!

This wave of 50 missile attacks directly took away hundreds of barbarians!

The wave also affected a few hundred more and suffered considerable injuries.

Now the barbarians had also learned to be smart.

Once they saw the missiles coming.

Immediately, they would scatter.

This also made the killing power of the missiles reduced.

Only

Able to dodge the armor-piercing missiles.

But the Great Desolate Army still had at least 10,000 electromagnetic rifles aimed at them.

It would be completely impossible to dodge.

Under that dense rain of bullets.

Not being shot into a hornet's nest was the best outcome.

On the Great Desolate Army side.

A group of scholars were also fixing their eyes on the effect of electromagnetic rifles.

After all

This was the first time the electromagnetic rifle had been on the stage of the Supreme Glory Conquest!

"It's effective against barbarians, and the penetrating power can penetrate a barbarian." A scholar reported, "To finish a barbarian, we estimated you need to hit over fifty spiked bullets."

"If it's hitting the vitals, then twenty rounds will be enough!"

No way.

The physique of transcendent creatures was still too powerful.

For this result.

The crowd had already had a prediction.

There was no surprise.

“Continue to observe, to determine an accurate value.”

Huo Qubing nodded and said, “We must not be careless either. This is the first battle where the opponent is unprepared.”

The barbarians naturally could not imagine

When did the firearms on the side of the Great Desolate Army become so terrifying?

“Is the opposite side still not conceding defeat?”

Luo Cheng looked at the barbarians who were being slaughtered one-sided.

Somewhat puzzled, he said.

“It shouldn’t take long.”

Huo Qubing said indifferently.

Although the barbarians behind knew to scatter.

But the speed of falling down was still amazing.

It was only a minute’s time.

The combined cooperation and killing of electromagnetic rifles plus armor-piercing missiles.

They permanently left over five thousand barbarians on this playing field.

Inside the battle chamber.

The smile on the corner of Teng Weihong's mouth... had completely disappeared.

It turned into an unconfident expression!

“This How is it possible!?”

Teng Weihong muttered.

Completely unable to accept all this that happened in the field.

-Minutes ago.

His barbarian army was still just over three kilometers away from the Great Desolate Army's position.

It didn't take long to rush there.

Even the opponent's strongest missiles had been restrained by the field.

Victory was in sight.

Teng Weihong seemed to have heard the audience shouting his name.

But he did not expect

The next moment.

The situation flipped over.

The other side just relied on an inconspicuous musket.

And they shot the towering barbarian to the ground!

“No, I can’t lose. I’m an existence that wants to break into the top one thousand and top five hundred in the entire Long Sky Star Area. I want to slap those direct descendants of the Teng family hard in the face.”

Teng Weihong clenched his hands.

A hint of madness appeared in his eyes!

He was not willing.

Completely reluctant.

Only

In the end!

Reason still triumphed over anger!

Chapter 486: Successfully advanced! Two thousand strong duels! Alternative opponents!

Although after losing this one, he wasn’t completely eliminated yet.

He was still able to make it to the loser’s group.

He still had a chance to kill up from the loser’s bracket, but the loser’s bracket was different from the previous round robin.

It was also a single-round elimination tournament.

Only one chance!

It was extremely dangerous.

Like this four thousand people among the heavenly pride duel.

Except for an extremely small number of people.

The others were all using their bottom cards.

Just like Jiang Fan and Teng Weihong in this game.

In the pre-game

Jiang Fan's strength was ranked at around one hundred.

And Teng Weihong was just over 2,000.

But!

When the fight really started.

Teng Weihong was using a bottom card that had been hidden for a long time and was completely unknown to outsiders.

In one fell swoop, the most powerful weapon of the Great Desolate Army was rendered ineffective.

If not, the Great Desolate Army still had some preparation.

If it was another person.

I'm afraid this one will be planted here.

The loser group was also the same.

The situation would be even more dangerous.

If you lose again.

It was the real elimination.

"I can't lose, I can't lose!"

Teng Weihong's nails were sunk deep into the flesh of his palm, and his teeth were clenched.

Very reluctant.

Those direct descendants of the Teng family outside.

Still waiting for him to hit his face hard.

How could he fall here?

Poof poof poof

Boom boom boom

The Great Desolate Army's missile and electromagnetic rifle attacks still continued.

Teng Weihong hesitated for every additional second.

Hundreds more barbarians fell down.

“Abominable! Abomination!”

In the end.

Teng Weihong still helplessly pressed the “quit” button.

He chose to admit defeat!

“Four thousand people elimination match, Jiang Fan and Teng Weihong’s duel, congratulations to Jiang Fan for winning!”

The pleasant woman’s prompt sounded.

Hoo

A loud shout and whistle immediately rang out from the scene.

“Jiang Fan! Jiang Fan

Many people were shouting in unison.

“Win, win

Lin Youhe and Xiang Zhifei were both overwhelmed with excitement.

Wan Yunsheng and Jane Ziqiang also had smiles on their faces.

“Although Teng Weihong was well prepared and the field formed by the combined power of the barbarian’s totems was very restrained to Jiang Fan’s side of the pilots,” Father Lin smiled, “After all, it is still Jiang Fan’s side that is better!”

“Dad, have you booked the tickets for the next game yet?” Lin Youhe eagerly asked.

“No need to rush.”

Father Lin smiled faintly and said, “I’ve booked the next game for you, not to mention the next game.

“According to Jiang Fan’s current strength, as long as there are no accidents, the next game should not be a problem.”

“The next game is definitely no problem.”

Lin Youhe said confidently, “It depends on the next opponent in the next game?”

This one was a four thousand into two thousand duel.

After Jiang Fan won.

He was in the top two thousand!

The next match was two thousand into one thousand.

And the next match was the most crucial

1,000 into 500!

This was also the last game.

As long as you get into the top 500 people.

Then you would get a place in the Long Sky Star Area qualifiers!

A total of one thousand people.

The other five hundred were reserved for the players who killed up from the loser group.

“One thousand people into five hundred is indeed a bad deal.”

Wan Yunsheng nodded and said, “This one is extremely crucial, none of those ranked in the top one thousand are weak.”

“According to the rankings of the various lists out there.”

Father Lin also spoke: “Except for the top thirty whose strength is clearly higher than a chip, the rest cannot be said to be secure.”

“Some of those who come from strong backgrounds or have strange encounters may have some kind of one-time strong killing power of the bottom card.”

“Some race-specific ones are easy to catch by surprise and catch others by surprise.”

“Not to mention

“In previous years, there were a lot of races against each other.”

“Even if one builds a race stronger than the other, one may lose if one is restrained to.”

“Ethical restraint?” Lin Youhe blinked and said, “Jiang Fan’s pilots and musketeers shouldn’t have any special restraint races, right?”

“For the time being, there doesn’t seem to be.”

Lin’s father said, “It depends on who we meet next, don’t meet the top 30 ranked players!”

The race was over.

The Great Desolate Army passed through the planet passage.

Returned to the Blue Star.

To recuperate.

And Jiang Fan was also transported back to That immense and incomparable rest hall.

Jiang Fan and Teng Weihong's match.

The end time was considered moderate.

At this time, there were already quite a few people who had finished their matches.

They were resting in the hall.

The elimination tournament of four thousand people was divided into two days.

The first two games were on the same day.

There was only a two-hour break in between.

And the interesting part was that

The opponent of the next round.

Right now Jiang Fan doesn't know.

It was not just Jiang Fan.

Others were also the same.

All needed to go through the official lottery and draw their respective opponents for the next round again!

This was also to try to avoid early targeting!

After all

Some players with strong backgrounds.

If they knew their opponent in advance.

The power behind it may send powerful treasures at any cost!

Of course.

This was just a try to avoid that from happening.

In fact.

Some forces would still prepare the valuable treasures in advance.

During this two-hour period.

Every player must stay in this rest hall.

Including those who lost as well.

They also had to prepare for the loser's bracket.

“Hey, Hess, did you lose or win?”

What a coincidence.

Next to where Jiang Fan sat, he met the people from Giant Island again.

Among them was Hess.

A curly-haired young man came over and asked Hess.

“Of course I won, would I have fallen in the first round?”

Hess frowned slightly and looked at the curly-haired young man with dissatisfaction.

“You lose even the freshmen, maybe in the first round...you’ll get out, I’m worried about you.”

The curly-haired young man laughed.

“Roll!”

Hess glared at the curly-haired youth angrily.

Many people next to him were laughing lowly.

The atmosphere in the hall became slightly more cheerful.

“It’s just losing to that demon, these guys actually all think that I’m easy to bully.”

Hess was very angry.

“Hess, don’t be angry, if you meet that freshman in the next round, then win back properly, all this will not be a problem.”

A companion next to him comforted.

Hess's face stiffened slightly.

He would like to win.

But

Just now his game ended earlier.

So he went to watch the live broadcast of Jiang Fan and Teng Weihong's duel specifically and carefully.

Then the thought simply disappeared.

I haven't seen him for two months.

This demon's strength had actually become stronger again?

"Damn it, I actually lost to a freshman."

It wasn't far to Jiang Fan's right.

A pair of grim eyes were staring over here.

Who could it be other than Teng Weihong, who had been taken out by Jiang Fan.

Although there was still a loser group.

But what awaits Teng Weihong was naturally the sneering of a few of the Teng family's direct descendants.

"Hmph, when I climb up from the loser's group and get the 1,000 people out of the line, it will be the same."

Teng Weihong secretly thought, “This Jiang Fan, I’m not his opponent for now, and I’m not in a hurry first.”

“My barbarian still needs time.”

“There is still some time before the main competition of the Group Star Competition.”

“It’s enough to let the barbarian’s domain power coalesce even more powerfully!”

“By that time

“Not to mention this Jiang Fan, even those guys ranked in the top thirty, I won’t put them in my eyes as usual!”

Except for a few people discussing.

The hall was relatively quiet.

One by one, they were all resting with their eyes closed.

Some were still watching the video of the match just now to summarize.

More were going inside their respective planets.

To their respective created transcendental race to make the final arrangements.

Jiang Fan was simply closing his eyes and resting his mind.

These two hours of rest.

Set the Blue Star time flow to three days.

Enough to let the Great Desolate Army rest properly.

After all, the Great Desolate Army was different from those transcendent beings.

Not so powerful physique.

And after an hour.

That pleasant woman's voice rang out again –

“The following is the draw for the winner's group of two thousand and the loser's group of two thousand, please take a moment.”

Chapter 487: Successfully advanced! Two thousand strong duels! Alternative opponents!

Only after that did each and every participant open their eyes.

One after another, they turned their heads.

Looking at the top of the hall... a huge and incomparable projection.

It showed the image of the lottery.

It was the same as the previous one.

The power of the origin was still used.

One by one, the numbered balls representing each player were drawn out.

The first draw was for the loser's bracket.

“Weaker, weaker.”

Many people shouted in their hearts.

This draw was only an instantaneous affair.

All the matchups of all the 1,000 groups were all created at the same time.

Next was the draw for the winner's group.

One by one stared at them without blinking their eyes.

Except for a few players whose strengths were high, they still didn't care much and leaned back on their chairs.

The two thousand people in the winner's group.

Each one was the pride of heaven.

Strengths were very powerful.

Some of them might not even have used their bottom cards yet.

"As long as I don't touch the top thirty, I will definitely be able to make it to the next round!" A black-haired young man secretly thought.

"Don't touch the fire transcendent race, don't touch it."

A delicate looking woman shouted furiously inside.

"It doesn't matter, whoever I run into, even if it's one of the top 30 guys, the big deal is to use the bottom card in advance."

A rough-faced man thought unconcernedly.

One by one, all of them had their own thoughts.

The results of the lottery were soon released.

One thousand groups of matches were arranged on the projection at the same time.

Jiang Fan swept a glance.

He quickly found his name.

And the opponent behind him

Wu Xing!

“Wu Xing?”

Jiang Fan raised an eyebrow.

The name was one that didn't ring any bells.

“Wu Xing?”

Among the boxes.

Lin Youhe and a few others were also slightly stunned when they saw the results.

Finally, they had to look at Lin's father.

“This Wu Xing

Lin's father thought about it and said, “I remember that there is no background and not much fame.”

“But those who can kill within two thousand people are bound to be not simple.”

“The next round’s opponent is actually The strongest freshman Jiang Fan!?”

A corner of the hall.

Wu Xing, who was dressed in black and had a somewhat gloomy face, saw the result of the match.

A hint of joy flashed across his eyes.

Jiang Fan’s current reputation

After defeating Hess and Teng Weihong one after another.

It was getting louder and louder.

“What I’m most afraid of are physically powerful melee races like Giants and Behemoths.” The corner of Wu Xing’s mouth showed a smile as he secretly thought, “The Musketeer and pilots that Jiang Fan built are long-range outputs.”

“The physique is very weak.”

“It can be said that the two races with the weakest individual strength among all the participants this time.”

“I’m really not afraid of long-range firepower.”

“No matter how powerful your pilot is, you can’t do anything to my race.”

The more Wu Xing thought about it, the more excited he became.

It was as if he had already seen the next round beckoning to him.

At the same time.

Jiang Fan naturally wasn't careless either.

Looking up information about Wu Xing.

Including videos of previous matches.

Not only did Jiang Fan watch these videos himself, he also sent them to the high officials of the Great Desolate Army.

Blue Star!

The Great Desolate Army had plenty of time to study these videos.

An hour passed in a flash.

The winner's bracket and loser's bracket of two thousand people started at the same time.

-Every single participant

All of them were transported to their respective battling rooms.

Hoo hoo

Shouts like mountains and seas sounded outside.

“Jiang Fan! Jiang Fan”

There were quite a few fan girls shouting Jiang Fan's name.

The venue for this match.

It was still filled with spectators.

Jiang Fan's ratings were actually able to rank in the top one thousand.

Now, the title of the strongest freshman in the history of the Long Sky Star Area was completely secured after Jiang Fan made it to the top 2,000!

No one had doubts anymore.

Also among the four thousand people

The only freshman!

This name and gimmick naturally drew a lot of attention.

Even the various powers were now taking the initiative to promote Jiang Fan.

Especially on the side of the superlative academy.

There were quite a few of them in the four thousand.

But there was no comparison at all with these forces such as the Empire, Giant Island, and the Long Sky Domain.

It was not easy to have such a good hotspot.

Naturally, we had to make a good fry.

It could be said.

The 100 million viewers on the scene.

Almost all of them came to see Jiang Fan's performance.

"Hmph, wait until Jiang Fan is eliminated and see if you guys can still shout about it?"

Wu Xing in the sparring room was a little upset.

At the same time giving a final pep talk to the race he built!

The race started quickly.

The planet channel opened.

The Great Desolate Army remained the same as the previous races.

Micro drones enter the field first.

Scouting the field.

After confirming that it was safe.

Five hundred giant gorillas walked in the front and made a basic defense circle.

One hundred thousand warriors of the Great Desolate Army and five thousand electric mounds were following closely behind.

Under the transportation of the spider chariot.

Quickly arranged in formation.

Above the sky, fifty storm fighters rumbled in.

But the protagonist of this one was definitely no longer a storm fighter.

Because

This time the opponent.

It was a relatively special extraordinary race.

Micro-drones under detection saw the entrance to the opposite planet.

Surprisingly it was empty!

Not a single transcendent creature could be seen.

There weren't any flying creatures in the air either.

“This Wu Xing, the two transcendent species he built, are actually both underground races?
Can you believe this?”

Inside the box.

Lin Youhe was talking with the others.

They had naturally studied Wu Xing for a while.

This Wu Xing was extremely special.

It was normal to create two transcendent species.

What's not normal was...

Both were underground races.

“Underground races have very obvious advantages and disadvantages and are easily targeted, how did this Wu Xing think of building two of them?”

Xiang Zhifei asked with some confusion.

“Probably because his planet is suitable for building underground races.” Wan Yunsheng guessed.

“That should be the case.”

Lin Youhe nodded and said, “But for Jiang Fan, I’m afraid it’s a bit troublesome.”

“The powerful output of the pilots cannot be brought into play at all.”

“It’s the same for musketeers.”

Xiang Zhifei frowned slightly and said, “How does this above-ground one launch an attack against the underground one?”

“The underground races are very afraid of physically powerful melee transcendents.”

Lin Youhe picked up, “But the two races Jiang Fan built are both long-range output, with almost zero in melee combat!”

It was not up to Lin Youhe and the others to worry.

Even the 100 million viewers at the scene.

After finding out that the two races built by Wu Xing were both underground species.

There was also an uproar.

Boom boom boom...

There was a slight sound coming from the underground.

Since the information had been studied.

The Great Desolate Army naturally made adequate preparations.

An underground detection machine was distributed around the Great Desolate Army.

Preventing the two underground races on the opposite side from quietly digging over.

At the same time.

Another excavation machine started.

Quickly digging the ground.

Preparing to dig a relatively deep trench.

This also added the very soluble Red Geibi blood.

This was also from the Red Geibi planet that Jiang Fan had previously specifically searched for and had the Great Desolate Army conquer.

It was the same as dealing with the underground races before.

The Great Desolate Army was going to use poison gas first to carry out the attack!

Today's poison gas.

After decades of development.

The killing power had been greatly improved again.

“The opposite side should have weapons like poison gas.”

Wu Xing watched the movements of the Great Desolate Army, but the corner of his mouth curled up into a smile.

“My underground race has experienced hundreds of battles. What kind of battle have I never seen before, using poisonous gas?”

Wu Xing shook his head, a hint of disdain appeared in his eyes, “That’s really underestimating my underground race.”

At the same time.

Besides the poison gas.

The Great Desolate Army was also preparing another kind of secret weapon that was extremely lethal to the underground races!

Chapter 488: Sandworm Raiders! In an instant!

With the help of dozens of machines and Red Geibi blood, in front of the Great Desolate Army’s position, a long trench was tentatively dug out.

A single mine was thrown in and buried in the ground.

These mines naturally had mainly poison gas components inside.

As long as there was a slight vibration, it would burst open.

With that, it would release a wisp of poison gas.

Although there were poison gas mines, the others weren’t careless.

All the warriors and generals of the Great Desolate Army All of them boarded the spider chariot.

Used the thick armor of the spider chariot to defend against the attacks of the two races under the ground.

Above the sky, fifty rainstorm warplanes were on standby.

As long as the opposite side reveals its head from underground.

It would certainly hit with the most severe blow!

Only the giant gorilla and the electric mound remained on the ground.

Five hundred giant gorillas held giant axes in their hands and scanned the surroundings vigilantly.

There was a flash of leap in their eyes.

Although they came in with the Great Desolate Army at the beginning.

But until now.

Still haven't had a chance to make a move.

This made a group of giant gorillas feel very depressed.

Click click click

Under the ground.

A very slight rattling sound came.

“They built the opposite side with two underground transcendent species, one of which is

Jiang Fan’s mind flashed through the information he had seen earlier, “The one that specializes in digging in the dirt, and the other that specializes in launching attacks!”

“The two match each other very well.”

“What is the depth of the opposite underground excavation?”

Huo Qubing in a spider chariot asked.

“It’s about two meters, close to three meters deep.”

A scholar in charge of observation reported.

This depth was about to be elevated a lot compared to those underground races encountered before.

Click click click

The sound of digging still kept ringing.

And it was still advancing forward at a fast pace.

Although they knew what race was the opposite.

But because they couldn’t see the specific face.

It was also difficult to target for a while.

Great Desolate Army people were holding their breath.

Waiting quietly.

Not daring to make a single sound, afraid to affect the detection of the underground.

On the battlefield, there was a rare silence.

They could hear only the louder and louder sound of digging.

Rumble

After a while.

The bottom felt like a drill drilling the earth.

The sound became a little deafening.

Poof, poof, poof

A poison gas mine was touched and instantly detonated open.

It emitted a dull sound.

“Is there an effect?”

Several scholars were wide-eyed.

But a moment later.

The sound of that drilling soil sounded again.

It was as if they did not block it in the slightest.

“The poison gas has no effect.”

Huo Qubing said in a deep voice: “The other party should be on guard.”

“The opposite side has built two underground races, and should have encountered poison gas attacks before, so they must be able to think of this.”

Luo Cheng also nodded his head and said.

“Haha, still dare to use poisonous gas against my sand worms?”

Inside the battle viewing room.

The corner of Wu Xing’s mouth that saw this scene curled up into a smug smile, “To deal with the poison gas that couldn’t be easier, just make the underground race close their mouths and not breathe.”

The underground race was a transcendent creature.

Not breathing for a while was something that could be easily done.

Boom!

Just at this time.

In the middle of the trench.

An opening broke open.

Immediately after that

A huge worm with a head full of mouthparts burrowed out from the ground.

The worm head was almost all mouthparts.

Densely packed.

It makes people's scalp tingle.

Goose bumps all over the body.

“Sand worm!”

Jiang Fan immediately recognized the type of bug.

It was a type of worm.

The digging ability was powerful.

It relied on those mouthparts in its head.

The speed was faster than an earth driller!

Not to mention the ordinary dirt.

They could break even a hard stone in a quick time!

From the opposite side to the Great Desolate Army's trench here.

A distance of several kilometers.

It took only a moment to dig over.

“Fire!”

Seeing this sandworm emerge from its head.

Huo Qubing ordered immediately.

Swoosh, swoosh, swoosh

Thousands of electromagnetic rifles fired at the same time.

This huge sand worm also did not expect this weapon to be so fast at all.

In a slight daze.

It was pierced through the worm's head.

Hundreds of spiked bullets hit it.

The sandworm didn't have a powerful physique like the black flame giant or the barbarian.

In an instant, it died.

The mouthparts were all smashed into pieces.

It couldn't die any more.

"The firepower is really powerful."

Watching his sand worms being shot.

Wu Xing's gaze faintly stared and muttered, "It's a pity that the two races I built are not going head to head with you guys again."

"Next"

“It’s the death of these musketeers!”

Wu Xing’s sight was cast to the ground.

The others couldn’t see what was going on down there.

But as the builder of two underground species.

Wu Xing could share the view of the sandworm and the other underground race.

Behind the sandworm.

In a tunnel dug out.

Followed by fat worms covered in slime.

The appearance was similar to leeches.

But the exterior was covered with a thick layer of mucus.

Snicker

The place where these slime passed.

All the surrounding soil and stones were being rapidly corroded and dissolved away.

There was also a puff of green smoke.

“Be careful, the slime worms on the opposite side should be coming soon.”

Luo Cheng reminded.

The faces of the others also became serious.

Slime worms!

That was the name of this big round fat worm.

The sand worm's offensive power was not strong.

It was mainly responsible for digging holes.

The slime worms were the main output of the Wu Xing side.

It relied on the thick mucus constantly secreted from the surface of the body.

These slimes were very strong and corrosive.

Even the transcendent creatures couldn't stand it.

"Wu Xing's strategy for the previous few matches was almost the same."

Inside the box, Wan Yunsheng spoke, "All of them used sand worms to dig a tunnel under the ground first, and then let the slime worms crawl over and secrete a large amount of slime."

"The slime produced by these slime worms is a constant source."

"As long as they are given enough time, it is enough to cover the ground with slime."

"The sand worms then dig through the ground."

"Let the rival races on the ground fall down."

"Falling into piles of slime and being corroded and dissolved."

“The strategy is very simple, but

Wan Yunsheng laughed helplessly and said, “There’s not much the opponent can do.”

“But this Wu Xing’s luck is not bad.” Lin Youhe picked up, “I watched all his previous match videos, and none of the ones he encountered were the restrained races.”

“These two underground races are terrified of physically powerful melee races like Giants and Barbarians.”

There was no doubt about it.

The black flame giants and barbarians could resist the corrosion and dissolution of the slime hard.

And then hammer the slime insects one by one!

“But Jiang Fan’s side doesn’t have such powerful melee output.” Xiang Zhifei said.

Rumble

Inside the competition venue.

Under the ground.

A giant sand worm was still driving.

The speed of digging the hole was amazing.

And the slime worm followed the dug tunnel and crawled over.

Although the speed was not fast.

Using the situation of creeping.

But there was nothing the Great Desolate Army could do.

“Can our chariots stop the corrosion of this slime?” A scholar asked.

“It won’t work.”

An older scholar replied, “But it won’t be corrupted too much.”

“Be prepared.”

Huo Qubing spoke.

He glanced at everyone and ordered, “Prepare to use the chariot form to fight these sand worms, slime worms underground!”

If it was before.

Against the underground races.

The only effective weapon of the Great Desolate Army was Toxic Gas Mines.

But now!

They weren’t weak in head-on fights.

Because of the existence of the spider chariot.

It was directly possible to fight underground.

“We can’t let the opposite slime worms spread out the slime, at that time we will be very passive.”
Luo Cheng also said.

Chapter 489: Sandworm Raiders! In an instant!

The two of them, Huo Qubing and Luo Cheng, prepared to strike first.

They sent out a team of spider chariots to go inside the tunnel dug by the sand worms underground.

Make a surprise attack on the sand worms and the slime worms behind them.

Relying on the performance of the spider chariot.

At least it’s safe.

“Squeak

Just when Luo Cheng was ready to lead the team and go down to the underground tunnel.

A big electric mound next to him suddenly called out.

“Hmm?”

The crowd looked at this big electric mound, unsure of what to do.

This big electric mound was the leader of the five thousand electric mounds.

Because the current spider chariot was also using batteries for energy.

In addition, they might use a lot of spider chariots at this time.

So the number of electric hills brought in... reached as many as 5,000.

The main purpose was

Naturally, it was to charge the chariot.

The electrical energy released by the electric mounds.

At once, it could fully charge the large battery of the spider chariot.

“Squeak.”

This big electric mound called out again.

Luo Cheng faintly froze.

Then he reacted and said, “You mean you could solve these bugs?”

The big electric mound nodded.

Luo Cheng and Huo Qubing looked at each other.

They all saw the doubts in each other’s eyes.

Huo Qubing pondered for a moment.

He gave Luo Cheng a wink.

The meaning was obvious.

Let these naughty guys try it.

Even if they failed, it didn’t matter.

Jiang Fan was also clear about the character of these electric mounds, which were very naughty and active.

If they were not satisfied.

Immediately, they would get emotional right away.

“Alright then, you guys go ahead and wait for good news.”

Luo Cheng could only speak helplessly.

The big electric mound nodded excitedly at once.

With that,

Immediately, a thousand elite electric mounds were drawn.

They scampered to the front of the trench.

This big electric mound was the first to take the lead.

Followed the passage where the giant sand worm went out before and scurried in.

The thousand elite electric mounds behind him followed closely.

They also followed and quickly scurried in.

“These electric mounds Will it be okay?”

Watching this scene.

A young scholar asked worriedly.

“I don’t think so.”

An older scholar frowned slightly and said, “Although electric mounds are very naughty, they are also very smart and won’t do anything dangerous.”

As a race of its own making.

Jiang Fan could naturally synchronize the vision of these electric hills.

Drilling into the underground passage.

It became completely dark all around.

But the electric mounds were prepared for this.

They were rats themselves.

They could not be better at drilling holes.

-Only the electric mounds

They rushed in along the wide tunnels with ease.

Compared to the sand worms.

The size of the electric mound was still quite small.

These tunnels were in all directions.

This was the result of thousands of sandworms digging together.

Snorting

Not far away.

There is the sound of corrosion.

One by one, slime worms were slowly crawling over.

Sensing the approaching slimy insects, the electric mounds immediately stopped in their tracks.

Increased vigilance.

Squat down to check the situation.

The corrosion sound was getting louder.

Slime insects were getting closer and closer.

After about a minute of time.

Near a tunnel.

A fat body of slime worms covered in mucus was revealed.

These slime worms were also specially trained.

That was to act separately.

Each tunnel had one slime worm.

This also ensured that

Even if these slime insects were subject to a large power attack.

It would not be affected too much at once.

Even if a missile fell down.

At most, it blew a few off at once.

As the saying goes, soldiers and horses go first before moving food and grass.

Slime insects were also the same.

The body did not move; the mucus went first.

Before the slime worm crawled, the mucus on the body surface had already flowed out.

Relying on this mucus.

Slime insects could keenly know the surrounding movement.

The electric mound in the tunnel was soon discovered.

Seeing these tiny yellow skinned rats.

The slimy insects were slightly stunned.

The electric mound rolled his eyes.

Curiously observing the strange bugs that had never been seen before.

-In a moment.

The scene became a little strange.

The two were in the dark tunnel.

Wide-eyes and small-eyes were staring at each other.

The air all seemed to become frozen at this moment.

“This is What is it?”

The Wu Xing who saw the electric mound was even a little frozen.

Although he studied the game video of the Great Desolate Army.

But the focus was placed on the pilots and musketeer.

For the small electric mound.

He didn't pay attention at all.

“Musketeer's companion species?”

Wu Xing blinked, somewhat unsure.

Although most of the secondary planet masters built one or two kinds of transcendent creatures.

But it didn't mean that the respective planets only had these two species.

There were also some plants and animals that provide auxiliary functions.

Generally also called “companion species”.

These companion species had little combat power.

It only plays a role in the food, clothing, housing and transportation of the extraordinary species created.

But the electric mound was naturally not a companion species.

“Coming to scout under the ground?”

Wu Xing guessed, then his face turned cold, and he said, “No matter what it is, slime worms, finish these little things off for me!”

A command was given.

A group of slime worms that encountered the electric mound

All of them opened their mouths.

A white slime spurted out!

It went straight at the electric mound not far away.

In the dark tunnel inside.

The electric mound’s sensing power was not weaker than the slime worms.

The moment it sensed the slime worm opening its mouth, they were ready.

Waiting until this white mucus emerged.

Immediately jumped to the side.

Completely dodged away.

White mucus landed in the back of the tunnel.

There was a severe corrosion sound of “chi chi chi”.

The reactivity and agility of the electric mound.

Let the slime worms slightly stunned.

They did not expect to dodge the mucus they fired so quickly!

“Don’t panic, keep attacking and finish these little guys off.”

Wu Xing ordered unhurriedly.

There was no worry in his eyes.

On the contrary, there was plenty of self-confidence.

Confronting the slime worms underground.

That was really asking for death!

Silently, a slime worm

The attack continued again!

But the electric mound dodged all of them.

And the slime attack of the slime insects was completely constant, one after another.

One after another, one after another, one after another!

The electric mounds jumped up and down.

Jumping from side to side.

Bouncing around.

Dodging the slime attacks in various ways.

Seeing this.

Jiang Fan was speechless.

These naughty yellow-skinned rats were not here to fight at all.

Instead, they were teasing slime worms on the opposite side.

But it couldn't be helped.

It was the nature of the electric mound.

They like to have fun.

Wait until they've had their fun before getting down to business.

"Bastards, what are you doing?"

Seeing a single electric mound jumping around.

And the slime worms couldn't hit it at all.

Wu Xing cursed in anger and said, “Give me more effort, still so much effort to deal with these little rats?”

The slime worms immediately increased its strength.

The slime spewed out a little faster.

But

It had nothing to do with the high agility of the electric mound.

They could only watch one electric mound in front of them jumping up and down.

Like dodging a water gun.

Having a great time.

Rumble

This time, the huge sand worms digging in the front also found something wrong.

A part turned around and rushed back.

Only then Wu Xing thought of the sandworms.

Immediately, his eyes lit up, and he ordered, “Sand worms, join forces with the slime worms and kill these little rats first!”

The sand worms that received the order immediately sped up their speed.

Quickly, they rushed in.

“Squeak.”

The head of the electric mounds – the big electric mound

Sensing the movement of the sandworm.

Immediately, it was called out.

His face became serious.

The other electric hills also gave up their plans to continue playing.

Although they continued to jump horizontally from side to side.

But the Z-shaped tail behind them was slightly erected.

Ready to start the real thing.

Chapter 490: Ten million volts! Field of Electricity! Advance to the next round!

Rumble.....

A huge sandworm from the tunnel in front of them. They turned their insect heads and killed back.

Although the sandworm’s offensive ability was average.

The brain was densely packed with mouthparts.

Mainly used to drill the earth.

Agility speed was not fast.

The defense was even weaker.

This was a typical worm.

Let alone the most advanced spike bullets of the Great Desolate Army.

Even an ordinary bullet could pierce the carcass of these sand worms.

But this was under the ground.

The firepower from above would not be useful at all.

What's more

These were just tiny yellow-skinned rats.

In terms of size, it differed from the sandworm.

Under the command of Wu Xing.

A huge sandworm swarmed back quickly from one tunnel to another, approaching towards the electric mound.

At the same time.

The slimy insects in front were also launching an all-out attack.

To entangle these electric mounds here.

With the attack just a while ago.

The slime fired by the slime insects had flowed all over the place.

It spread the surrounding tunnel almost all over.

And!

It was still continuing to expand outward.

This was the most powerful point of the slime insects.

As long as there was enough time.

A single slime worm could spread the entire underground tunnel with slime.

Make the lower part a world of slime.

Several previous opponents built transcendent races.

All were planted on top of this move.

But there was nothing anyone else could do.

Whoosh!

A giant sand worm with the fastest speed had burrowed back from a tunnel in the back.

The insect head with dense sharp mouthparts was aiming at the electric mound over here.

At this time.

The slime worms launched a line of slime.

It had flowed all over the place.

Approaching the front of the electric mound.

“Squeak.”

The big electric mound let out a screeching sound.

At once.

All the electric mounds jumped up.

Jumped to the sides of the tunnel.

Or some electric mounds climbed directly to the top.

Avoiding the slime flowing through underneath.

Snorting

Countless channels of slime flowed through each place, eroding all the dirt and rocks underneath.

A creepy sound was emitted.

A single electric mound was jumping around.

The Z-shaped tail behind it was still slowly erected.

Prepared to build up strength.

But with the evolution of the electric mound for thousands of generations.

Electricity was instantaneous.

There was no need to store up power at all.

“These little guys

Jiang Fan looked a little speechless. He had seen what these electric mounds wanted to do.

The slime continued to flow forward.

Soon.

It came near the giant sandworm.

The giant sandworm seemed to be invisible.

Didn't even look at it.

Let these terrible slime from their own body under the passage.

The miracle was.

There is no “snorting” sound.

As if there was no effect.

“These sand worms are actually immune to the slime of the slime worms?”

Jiang Fan raised his eyebrows.

There was already a guess in his heart.

This was from the previous information something that wasn't there.

“No wonder.”

Jiang Fan instantly understood.

Why would the other side build these two underground races at the same time.

Giant Sandworms and Slime Worms.

Undoubtedly an excellent pair.

It was all about fitting between transcendent species.

-In general.

The best was a powerful melee species with an airborne species.

For example, the Black Flame Giant.

And with a not weak flying transcendent race.

That strength would be at least a grade stronger.

But this pairing was hard to create.

A high degree of fit.

Sort of unattainable.

Giant sandworm and slime worms were considered as a natural partner.

Sand, sand, sand

The entire vast body of the giant sandworm.

Quickly sliding on the slime.

Approaching towards the electric mound.

In one of the other tunnels.

More sandworms also surged out.

“Squeak.”

This time.

Only then did the big electric mound let out an even louder cry than before, as if giving an order.

The next moment.

They saw that

The Z-shaped tail of one electric mound was like a spring.

It suddenly stood up!

It transmitted a huge current from the inside of the tail to the outside.

Instantly formed a dazzling electric light.

A thousand electric mounds united.

That was a thousand electric volts.

Then these electric lights formed a huge chain of lightning.

Immediately after that

There was a loud scoff.

These one thousand electric volts headed towards the slime on the ground blasted away!

There was no doubt.

It arrived in an instant.

The huge lightning fell into the slime.

Relying on the conductivity of the slime.

In a split second.

It passed to the giant sandworms and slime worms in the slime.

“This is Is it 100,000 volts?”

Jiang Fan blinked.

Crackle!

The closest slime worm was swept and wrapped in electricity.

The entire body was trembling violently.

Surprisingly, it even twisted up.

It emitted a loud sound of electricity.

Just a moment of work.

The entire body of this insect All turned into a black charcoal.

An unpleasant roasted smell filled the tunnel.

Jiang Fan knew without observing.

This must be dead and couldn't die anymore.

Not only that.

The electricity was huge.

Passing backwards along the slime.

Pounced on the giant sandworm in the back!

This giant sandworm just smelled the smell of roasting and was still confused.

Didn't know what was happening.

The next moment.

It found a terrifying electric current coming.

The giant sandworm's reaction power was much stronger than that of a slime worm.

Immediately sensed that something was wrong.

Turned its head and ran!

But it was already too late.

How could it compete with the speed of electricity?

Just an instant.

This huge electric current, just like before, wrapped up the entire body of this giant sandworm.

Crackle!
