

One Planet 531

Chapter 531: Unscientific Electromagnetic Cannon! Blast off!

At the same moment, the ghoul itself had also changed.

The size of the body was slightly larger.

The aura was also stronger.

The muscles and bones on the entire surface of the torso grew slightly larger!

“The opposite side is starting.”

A scholar said with a gloomy face.

But there was nothing the Great Desolate Army could do.

The electromagnetic rifle couldn't hit this far.

They could only test the missiles to bombard.

But the ghouls also learned to be smart.

All scattered.

Each time, only one ghoul could be blown off.

Let the efficiency of the missiles be greatly reduced.

“Mok is really preparing to finish Jiang Fan in ten minutes, so he used the ghoul's devouring ability so quickly.”

Bru, who was watching the battle, spoke up.

It wasn't just one ghoul.

Numerous ghouls were devouring the corpses of their companions.

Swallowing one, strength rises to one point.

Swallow two, even faster!

So on and so forth.

The more you swallow, the more your strength increases.

Hiss!

After a ghoul swallowed five of its companions, the whole body's aura rose dramatically.

The body size almost doubled.

Those sturdy muscles and bones differed completely from before.

Couldn't help but let out an extremely ear-piercing scream.

Only

The next moment, a missile was fired over.

Right into this strengthened ghoul.

There was a loud boom.

After, the smoke cleared.

This strengthened ghoul had fallen heavily to the ground, with all its limbs disconnected!

“Is this weapon that terrifying?”

Seeing this scene.

Mok couldn't help but raise his eyebrows, then muttered, “Then we can only let the other ghouls have an ultimate evolution.”

“Ghouls, turn into your strongest forms.”

Mok bellowed an order.

Hiss!

Hearing this command.

All the ghouls let out an excited scream.

Then!

An amazing scene happened.

These ghouls actually ate each other.

Even the live ones were all swallowed.

From ordinary ghouls to first-class ghouls.

The level one ghouls then devoured each other.

Turned into second-level ghoul.

Second-level ghouls also devour each other.

Turned into a third level ghoul.

So on and so forth.

And so on and so forth.

The people of the Great Desolate Army were dumbfounded and did not expect this kind of devouring.

Because in the previous video.

Ghouls devouring were all dead companions or opponents' corpses.

“This This

On the vast square.

-Everyone who watched the battle was also shocked.

“This ghoul that Mok built actually has this skill?”

Chang Feng was a little surprised.

Then he thought of something and couldn't help but ask, “If he did this, didn't he swallow all 200,000 ghouls?”

“Ghoul breeding is not quite the same as other transcendent species.” Huo Kong explained, “Ghouls usually live underground in the darkness and live off corpses!”

“As long as there are enough corpses, they can be easily bred.”

“The number is 200,000

“It is estimated that it will only take a month or two of work to recreate it.”

“Besides

“It shouldn’t be able to devour all 200,000 ghouls at once. The second level ghouls aren’t that powerful!”

It was like what Huo Kong analyzed.

The ghouls that Mok built.

It was indeed unlikely to devour 200,000 companions at once.

It could only devour a thousand at most now.

In order to avoid being affected by the missiles.

The other ghouls acted like cannon fodder.

Block the knife for the ones that devoured it.

Under this rapid devouring.

In less than a moment, there were ghouls that rose to level eight.

And it was not just one ghoul.

The eighth level ghouls, the body was extremely tall.

And it was like the half-man mammoth encountered before.

The fangs in the mouth looked hideous and gruesome, and the bones and muscles were extremely thick.

Boom!

-A loud sound.

A missile ruthlessly blasted at this level 9 ghoul.

But a surprising scene happened.

This ghoul only had a wound on its belly.

But not the same as the previous level 8 ghoul.

The tremendous power of the missile blew it apart!

This was also the first time since the medium-sized missile debuted The first time it encountered a setback!

The transcendent creature blocked it.

“Just as I thought, the power of this tracking weapon is still limited.”

A hint of self-satisfaction flashed in Mok’s eyes.

“Surprisingly, it’s ineffective!?”

The team of scholars’ faces became a bit unsightly.

“It’s normal, right?”

Huo Qubing was unconcerned and said with a calm face, “The power of medium-sized missiles is ultimately limited, next

“The other side should directly devour a few level 10 ghouls.”

“This is also the most powerful ghoul that the opposite side can devour, relying on missiles is certainly not very effective.”

“Then let’s follow the original plan.”

It was the same as what Huo Qubing had expected.

Mok gave a direct order.

Let the remaining ghouls devour each other again.

After a while, three new powerful ghouls were born-

Level 10 Ghouls!

It was also the highest level that a level two ghoul could devour.

Of course.

In this process, the missiles kept bombing and attacking.

It had cost the ghouls a small price.

“Three level ten ghouls? It should be enough to deal with these weak musketeers on the opposite side.”

A smile appeared at the corner of Mok’s mouth.

Very satisfied, he looked at the three incredibly strong ghouls on the playing field.

Then he shouted, “Ghouls’ most powerful warriors, it’s time to exert your strength, crush all of them!”

Hiss! Hiss! Hiss!

The three level ten ghouls let out a shocking ear-piercing scream.

All three Level 10 Ghouls reached a height of over ten meters!

The thick bones and muscles provided a superb physique and resistance.

Making medium-sized missiles completely useless.

Immediately after that, the three level ten ghouls ran quickly.

The target was none other than the Great Desolate Army, six kilometers away!

The level ten ghouls not only became physically stronger.

Chapter 532: Unscientific Electromagnetic Cannon! Blast off!

The speed was also very amazing.

It crawled like a phantom.

Swoosh! Swoosh! Swoosh!

The electromagnetic rifle fired wildly.

There was nothing to do with medium-sized missiles, so what was the use of electromagnetic rifles!?

“Hahahaha, just love to see this tickling, my big ghouls.”

Mok laughed in triumph.

The truth was also true.

The three level 10 ghouls did not dodge at all.

Letting a spiked bullet hit their bodies.

But only the skin was broken.

At most, it touched the flesh and blood again.

And this injury

To the level ten ghoul's amazing resistance, it didn't worry at all.

To them it was also completely ineffective.

Still rushing over at a fast speed.

The distance of one kilometer took less than half a minute!

Except for the flying creatures.

This was the fastest ground speed of a transcendent species that the Great Desolate Army had encountered.

“Really thought we were out of options?”

Looking at the arrogant appearance of the three Level 10 Ghouls with their eyes wide open.

Huo Qubing laughed gently, then shouted, “Proceed as planned, use the..... Electromagnetic Cannon!”

Before this match.

How could the Great Desolate Army be unprepared?

The ghouls' match video alone.

All studied for several days.

Finally concluded

According to the ghouls' ability to devour.

The latter may give birth to extremely terrifying and powerful ghouls.

The truth was also as expected by the scholar team.

Mock hid his bottom card.

Surprisingly, it could devour the highest level 10 ghouls.

Even missiles and spiked bullets couldn't do anything about it.

But the Great Desolate Army took precautions and prepared an even more powerful weapon long ago – an electromagnetic cannon!

The last side of the chariot that came in earlier.

That five times larger chariot was carrying this terrible thing!

The development of electromagnetic weapons had a history of decades.

Electromagnetic rifles were relatively early out of the actual battle.

And the electromagnetic gun was a bit more troublesome.

The reason was also very simple.

The electromagnetic gun was large and troublesome to transport.

The most critical point was.....

The electromagnetic cannon was very power hungry.

Basically!

Every time you fire a gun, you have to drain the battery power that comes with the electromagnetic gun!

Energy problem.

At present, it was still a critical point for the Xia Kingdom.

Fortunately, the existence of the electric mound.

Relying on the terrifying ability of the electric mound.

After the electromagnetic cannon's battery power was depleted.

Three electric mounds together with the combined force.

It could be filled up!

The principle was basically the same as the electromagnetic rifle. Using electromagnetic emission technology made of advanced kinetic energy killing weapons.

It differed from traditional cannons that apply gunpowder gas pressure to the projectile.

The electromagnetic gun used the amperage generated by the electromagnetic field in the electromagnetic system to speed up the metal projectile to the kinetic energy required to strike the target.

Compared to traditional gunpowder-propelled cannons.

Electromagnetic cannon could explode the speed and range of the projectile.

There were three main components: energy, accelerator, and switch.

The gas pedal converted the electromagnetic energy into kinetic energy of the cannonball, which enabled the cannonball to reach high speed.

The switch turns on the energy source and the accelerator.

Within a few milliseconds, it could introduce megahertz current into the accelerator.

After this big guy entered the playing field.

It was already in the process of intense debugging.

Although the electromagnetic gun had been made for several years.

But this was the first actual battle.

What was the effect?

They couldn't tell.

Seeing this enormous weapon that didn't exist in the previous life.

A flash of memory flashed in Jiang Fan's eyes.

In the previous life on Earth.

Although the electromagnetic cannon was also studied by various countries.

It was also a key item in a certain country's "Star Wars" armament program during the Ice War era, and was considered a secret weapon against nuclear bombs!

But the moment Jiang Fan crossed.

There was no very practical progress.

It only existed in the laboratory.

The actual combat was much worse.

And Xia's research progress was not the same.

Energy was a difficult problem.

But with the help of electric mounds.

It was also no longer a problem.

This allowed the team of scholars researching electromagnetic cannons to let go.

Let the theory of the powerful power be realized.

Electromagnetic cannon had many advantages.

First of all, the speed of fire was fast. There would be no problems such as target removal or missing it like the cruise missiles.

In combination with the positioning system could further improve the accuracy of the hit.

In addition, it was different from traditional weapons.

The biggest difference with traditional weapons such as missiles, artillery shells, etc. was that
.....

The electromagnetic cannon was not using gunpowder.

This could greatly enhance the safety of the fighter, but also allowed the fighter to carry the number of shells increased by 10 times.

Of course, it was still a theoretical idea.

The most advanced electromagnetic cannon in Xia today.

It was also the one that was currently being shipped in.

Such a large weight.

It was not possible to carry on a warplane.

In order to make the electromagnetic cannon's field capability even better.

The Xia Kingdom once formed a team of a thousand scholars.

Specifically for the development of this larger size, could carry the electromagnetic cannon of the huge chariot!

The speed was not much slower than the spider chariot!

It could make the electromagnetic cannon move quickly.

And also could quickly turn around the firing direction.

“Prepare Fire

Since it was the first actual battle of the electromagnetic cannon.

Naturally, Huo Qubing gave the order personally!

The words fell.

On the huge chariot, the electromagnetic cannon had already revealed its terrifyingly huge muzzle.

Aimed at the field in front of

Three timing ghouls that were running fast!!!

Chapter 533: The Amazing Power! The dumbfounded audience in seconds!

In order to deal with the increasingly powerful transcendent creatures, the scholars and doctors of the Xia Kingdom had gone to great lengths!

They have conceived one powerful weapon after another!

Finally found out that

Power was not the most important thing.

The key was speed!

A fast enough speed.

Only then could it hit these transcendent creatures with super high mobility.

Otherwise, weapons like a tank, rocket launchers were also powerful.

Because the hit rate was too low, that's why they were gradually eliminated from the Yan era.

There was no way.

Transcendent creatures were fast and physically strong.

Amazing reaction ability.

Some special species also had superb advance vigilance.

Even

At the moment of the missile launch.

It could realize the approach of danger.

The good use of missiles lay in its ability to hit the target with precision.

This was something that other weapons did not have.

And the electromagnetic rifle relied on intensive firepower and ultra-high speed.

This was also what other weapons did not have.

The next generation of more powerful weapons was

Still under development.

Today's Great Desolate army, the most powerful weapon, was the nuclear bomb!

But this couldn't be used routinely.

The next was the missile.

Especially large-yield missiles, which were also powerful.

Of course, this was when the new weapon, electromagnetic gun, was ruled out.

Electromagnetic guns have advantages over missiles.

Also, it's amazing speed!

But the fastest weapon electromagnetic cannon wasn't there yet.

It was the same as the Earth in the previous world.

Xia's current fastest weapon was an intercontinental missile.

The range was over tens of thousands of kilometers, and the speed reached an astonishing Mach 30!

That was

Over ten kilometers per second!

But this was the speed of the missile in the later stage.

The initial speed was certainly not so fast.

Generally, over one kilometer per second would be good.

In terms of initial speed, there was nothing comparable with the electromagnetic cannon.

Xia's electromagnetic cannon could develop so quickly.

One of the important reasons was to have a special deformation alloy.

Since the electromagnetic cannon was a high-energy weapon, it generated serious heat and needed good cooling technology support.

It was difficult to deal with the earth in the previous life on it.

And on the Blue Star, after having deformation alloy.

There was no need to worry too much about this problem.

“Hmm? What is this thing?”

Mok keenly observed the side of the Great Desolate Army

A super-large weapon that was suddenly introduced.

After looking at it a few times.

There was some uncertainty.

Naturally, he had never seen such a thing before.

“No matter what it is.”

Mok also just glanced at it curiously for a few moments, not really taking it seriously, and continued to order, “Great Ghouls, show your courage, ruthlessly break through the other side’s position and kill them all!”

Although the electromagnetic rifle continued to fire.

But it only slightly slowed down the advanced three level ten ghouls.

Seeing this scene.

One spectator outside was feeling a little bored.

“I can’t imagine that this Mok is so ruthless, coming up with a big move and directly devouring three big ghouls. How else can we play?”

A participant who was eliminated laughed.

“This freshman named Jiang Fan is also quite unlucky. If he had met other opponents, he might have had a chance, but he ran into the very restrained Mok.”

Another participant also had a pity face.

“There was still hope to break the record of the strongest freshman in history, but now there is little possibility.”

Bru also said, after a pause, then said: “I guess this Mok should have a bet with those people in Augustus. He is planning to settle the game within ten minutes.”

“It should be.”

The Lord of the Long Sky’s face was calm.

Accepting it all frankly.

After seeing that, the missiles were not even effective against the level 10 ghouls.

The Lord of the Long Sky knew that

This match had been declared over.

But the Great Desolate Army at the match venue could be very busy.

Especially a team of scholars.

When the electromagnetic cannon was about to fire.

The scholars on the side had already recorded.

Recording the various speeds of the electromagnetic cannon in actual combat.

First of all, of course, the speed.

The pulse power of the electromagnetic launch was about 10 times the launch force of the artillery, so the speed of the projectile launched with it was very high.

The firing speed of a typical artillery gun was about 1 kilometer.

The electromagnetic gun, however, can speed up a 10-gram projectile to ten kilometers per second and a one-kilogram projectile to over 6 kilometers per second.

Some scholars even predicted that the future speed could reach 100 km/s.

In terms of accuracy, since they subjected the electromagnetic gun projectile to electromagnetic thrust in the barrel, it was relatively uniform.

And electromagnetic thrust was easy to control, so the projectile stability was good, which was conducive to improving hitting accuracy.

The concealability was also more outstanding.

The electromagnetic gun used a metal projectile when firing.

It did not produce flame and smoke, nor did it produce shock waves.

So it was more concealed in combat and not easily discovered by the enemy.

There was also an advantage that was

Compared with conventional weapons in the past, the manufacturing cost of electromagnetic cannon was very low.

Especially with the electric mound as the energy source.

It was basically not a pain in the neck.

Not like missiles!

The cost of each one was high, and they counted the missiles launched in this campaign every time.

Even the generous Huo Qubing would be worried.

This fight was completely burning money.

On the playing field, as the missiles continued to fall.

The speed of the three level 10 ghouls also dropped.

Chapter 534: The Amazing Power! The dumbfounded audience in seconds!

With the continuous bombardment, they were also extremely uncomfortable.

The three level 10 ghouls could only choose to avoid the missile bombardment as much as possible.

Choose a safer, more conservative route of travel.

As for the spiked bullets there wasn't much power.

“We should consider this a peak level two transcendent creature.”

Jiang Fan thought to himself as he watched the scene.

He couldn't help but think of the previous planet promotion.

The island world where the mission was located.

The mission target's Leif!

Originally, Jiang Fan had thought that Leif's strength was peak of the second level!

But now it seems, it should be a level three Transcendent.

While the three level ten ghouls were running around.

The electromagnetic cannon was already prepared!

They aimed the cannon at the large ghoul that was charging over.

Since there was only one electromagnetic cannon.

So it could only hit one target at a time.

“Fire, at the middlemost ghoul!”

Huo ordered in a cold voice.

Swoosh!

It made an extremely slight sound.

If one hadn't gotten close, it would have been impossible to hear.

This was one benefit of the electromagnetic cannon.

The concealment was very high.

Immediately after that.

A metal bullet was fired from the muzzle of the cannon.

The speed of the shell fired by this electromagnetic cannon.

It reached a staggering five kilometers per second or more!

Faster than the electromagnetic rifle!

But the weight of the metal bullet was not comparable to the spike bullet.

The difference was very much.

Such a fast speed and under the support of stability.

Not to mention its accuracy.

The three level 10 ghouls were less than four kilometers away from the Great Desolate Army's position.

That means

Metal bullets within a second could fly there!

The same was true.

Mok in the star space could only see a phantom flash.

Immediately after that

A loud boom sounded.

At such a fast speed.

It was a very terrifying kinetic energy!

Metal bomb without gunpowder.

Completely relying on the powerful kinetic energy killing power.

No doubt, this metal bullet was also the same as the spike bullet.

With the ability to break armor.

The original spike bullets could penetrate the epidermis of the level 10 ghouls.

Threaten the flesh and blood inside.

The electromagnetic cannon was even more exaggerated.

The power was over ten times greater!

Hearing this loud sound.

Mok faintly froze.

Still not sure what happened.

Subconsciously looked at the playing field, and found

The abdomen of the level ten ghoul in the middle had broken and opened an enormous hole!

A terrifying wound appeared.

It ran directly from the abdomen to the back!

In other words, this level 10 ghoul's powerful body was directly pierced!

The large and small intestines inside the abdomen, all section broken off!

As if cut open by a cutting machine.

See this result.

A group of people in the Great Desolate Army could not help but clench their fists a little.

According to the scholar's understanding of transcendent creatures.

Although the physique was strong, the defense was extremely high.

But the defensive nature of the five internal organs becomes weaker.

The large and small intestines were hit so hard.

It would seriously injure even this level 10 ghoul if it didn't die!

Nothing unexpected.

The body shook violently a few times after.

This level 10 ghoul could not hold on any longer and fell directly to the ground heavily.

The two companions next to it were stunned.

Some were dumbfounded.

It was fine just a second ago.

It was even the loudest.

The most aggressive rush!

But a second later

Surprisingly just fell down without warning?!

What the hell?

Even Mok, who was the creator, was a bit confused.

This is What's going on?

But Mok was also an old level two planet master, after all.

The actual battle experience was rich.

He quickly thought of the large weapon he saw curiously just now.

At this time, to look over again.

After seeing the joy on the faces of the people of the Great Desolate Army.

Suddenly

He understood everything!

The culprit for this level 10 ghoul to fall down.

It was this mega machine!

This made Mok feel a bit unbelievable.

He himself came from one of the most powerful star area of the emperor star area.

There was also a champion favorite like Augustus around him.

Couldn't know more about the battle power of his own level ten ghoul.

Even at the peak of the second level.

It was also the best-like existence.

Besides, he couldn't beat the top ten of the few big demons.

Mok wasn't afraid of others at all!

But now actually killed by the other side inexplicably in seconds.

Although it was the tenth level ghoul and it wasn't dead.

Just seriously injured.

But there was no combat power at all.

“Second shot, continue!”

Huo Qubing ordered.

There was a cooling time for the firing of the electromagnetic cannon.

Generally speaking, within one minute, five or six metal rounds could be fired!

This was an important reason why the electromagnetic cannon could not yet be used as a conventional weapon.

It could only be on the field against strong enemies.

The rate of fire was still a bit slow.

The manipulator fine-tuned the gun.

It was aimed at the level 10 ghoul on the left that was still dazed.

The next moment, another metal bullet blasted out!

Faster than the wind.

It exceeded fifteen times the speed of sound!

It had also exceeded the realm of naked eye recognition.

Mok, who had been noticing the electromagnetic cannon, immediately sensed that something was wrong and subconsciously shouted, “Watch out!”

However, it was already too late!

The level 10 ghoul on the left heard Mok’s alert.

It wanted to move his body.

The metal bullet had already arrived in front of him.

Just heard a loud “boom” sound.

Chapter 535: The Amazing Power! The dumbfounded audience in seconds!

This time it was the chest cavity.

A wound of about the same size appeared.

Directly through the front and back.

-A shower of blood splashed out!

The tenth-level ghoul did not understand what was going on, and felt a sharp pain.

Immediately afterwards, it lashed to the ground.

In a flash, the three level 10 ghouls that had just charged in with great arrogance.

Only the one on the right was left!

The tenth level ghoul on the right.

At this moment, his eyes were already rounded.

Completely couldn't believe what he saw!

In just half a minute, it knocked its two companions down for no reason?

But it also reacted.

Subconsciously looked toward the electromagnetic cannon.

It felt its whole body tremble.

This weapon was terrifying to this extent.

To kill a level 10 ghoul like them in seconds?

The legs trembled with fear.

This level 10 ghoul's whole body was sweating hair standing up.

Cold sweat was flowing.

Too scared to even move.

Afraid to move, then it would also receive another terrible attack just now.

In the star space, Mok was dumbfounded.

The relaxed smile that was still on his face just now had completely frozen.

Two of the level 10 ghouls he had worked so hard to breed had fallen?

The cultivation of ghouls was an extreme test of personal ability.

The top ones like Mok could breed ghouls that could devour to the tenth level.

And there were some weak ones.

It did not even develop the devouring ability.

This could devour to the tenth level of ghouls

It was also Mok's effort and brainstorming to cultivate.

Now it has hung two big ones.

The number of remaining ghouls was still quite a lot.

But Mok was completely unaware of any usefulness.

This was a terrifying weapon that could kill level ten ghouls in one shot.

No matter how many ghouls rushed up.

It was just a death sentence.

Mok suddenly felt a little ridiculous.

Just a short while ago.

He was still thinking about the next upcoming opponent – Ann, one twin from the Elves Empire.

Didn't expect to fall in this round.

Mok's biggest card was this tenth-level ghoul that was devoured.

Now even these ghouls were instantly killed.

There was no chance of winning at all.

Outside.

Inside the vast square, it became silent.

The crowd was all wide-eyed.

They were shocked, and a little incredulous, to stare at the match projection.

The situation really changed a little too quickly.

Within two one seconds, two level 10 ghouls had fallen.

There was no defense against them.

Most people didn't even know how they fell.

Especially the people in Mok's emperor star area.

They were even more dumbfounded.

Feeling ridiculous.

Before the game, Mok was smiling and said that he would settle the battle within ten minutes.

Things were really the same as he had said.

Looking at the situation.

The fight was indeed over in ten minutes.

But the one who was eliminated was not Jiang Fan.

Instead, it turned out to be Mok!

After firing two metal bullets.

The Great Desolate Army did not continue to move.

Instead, they were waiting for the opposite side to decide.

This was the match.

There was no need to chase after them, either.

About half a minute later.

Mok let out a long sigh and helplessly and reluctantly quit.

So far!

Jiang Fan and Mok's top thirty-two match ended with Jiang Fan's victory.

The Great Desolate Army also got a satisfactory result.

The first appearance of the electromagnetic cannon's actual battle effect.

It was not disappointing.

When Jiang Fan reappeared in the vast square.

He received the attention from almost everyone!

Before the battle with Mok.

Jiang Fan had a lot of attention.

But mainly because of his strongest freshman status.

And now

Many people looked at Jiang Fan with just a hint of awe.

Jiang Fan walked step by step towards the place in the Long Sky Star Area.

“Jiang Fan, you are amazing my brother.”

Huo Kong was the first to welcome him.

Patting Jiang Fan’s shoulder vigorously, he said, “What a deep hide. Even Mok is not your opponent.”

“Jiang Fan, congratulations, you’ve broken the best score for a freshman in the history of the Group Star Competition, setting a record.”

Xi Ya also spoke with a smile on her face.

There was a hint of ingratiating in her tone.

As the eldest princess of the empire, who had received all kinds of training since childhood.

Xi Ya knew very well that

The group of stars council would certainly cultivate such a demon as Jiang Fan.

The future achievement was unlimited!

“Everyone was stunned just now. No one was thinking at all.” Even the ever-silent Chang Feng spoke with a smile, “Including those bigwigs who were probably also dumbfounded, haha.”

Indeed, as Chang Feng said.

After the electromagnetic cannon heavily wounded the tenth level ghoul.

All the sixth ranked planet masters watching the battle in the hall were silent.

Not a single person had any more words.

But in the end, it was a sixth ranked planet master.

At this point, they had already reacted.

“This little fellow Jiang Fan is hiding quite deep, he actually has such a terrifying weapon.”

Bru’s face was astonished.

It was completely undisguised.

The people next to him didn’t find it abnormal.

Others did not show it on their faces.

But the heart did think so.

Although many contestants would have left the bottom card.

But how could it be so outrageous as Jiang Fan?

The power was completely beyond a grade!

Putting the opponent Mok and everyone watching the battle dumbfounded!

“This should be the newly awakened weapon of the Musketeer built by Jiang Fan!”

The Lord of the Long Sky Kingdom thought about it and guessed, “According to my previous understanding.”

“The Musketeer built by Jiang Fan is divided into three levels: normal, elite, and king.”

Chapter 536: The Amazing Power! The dumbfounded audience in seconds!

“The higher the level, the more powerful the awakened weapon.”

“If I’m not wrong, this time there might be a higher legendary level musketeer, so

“A more powerful weapon has awakened!”

“Makes sense, it should be so.”

Bru nodded and agreed: “This kid actually hid his bottom cards so far behind, uh...”

Bru suddenly thought of something.

His face couldn’t help but change and said, “It’s finished. This time our Elved Empire is in trouble.”

“Hahaha.”

The Lord of the Long Sky Kingdom also reacted.

He couldn’t help but let out a laugh.

Jiang Fan advanced to the next round.

If nothing unexpected happens.

He might face Ann, one twin of the Elf Empire!

Originally, it was Mok who advanced.

Bru was not worried at all.

Because of the high elves created by Ann, they restrained Mok's ghouls.

But now it was Jiang Fan!

This was difficult to do.

From the scene, that just killed the level ten ghoul in seconds.

All the sixth ranked planet masters judged it.

This was at least a strength that could almost rival the five big favorites for the championship.

Since Jiang Fan and Mok had an upset in this match.

The process was also extremely amazing.

The other matches were of little concern.

The results were no surprise.

The higher-ranked contestants won all of them.

When the blond, handsome looking Augustus came out of the star space, walking to the emperor star area.

Found that the atmosphere was a little off.

One by one, their faces were not quite right.

Especially Mok had a gloomy face.

"Mok, you won't be delayed by that freshman until after ten minutes of the match, right?"

Augustus asked with a light smile.

“Hmph!”

Mok gave a cold snort.

There was no answer.

“Hmm? What’s wrong with him?”

Augustus asked a black-clothed young man next to him.

The black-clothed young man replied with a strange face, “The match between Mok and Jiang Fan did end within ten minutes.”

“Then what are you still doing with a black face, Mok?” Augustus said in disbelief.

“But

The black-clothed youth added: “This match, Mok lost.”

“Lost!?”

Augustus blinked his eyes.

He couldn’t believe what he heard.

“I lost.”

Mok said in a good-natured manner, “That Jiang Fan left a powerful bottom card, and this bottom card killed even my rank ten Ghoul.”

“Augustus, you can also be careful not to run into this Jiang Fan in advance.”

Hearing Mok’s words.

Only then did Augustus believe the fact that Mok was defeated by a freshman.

But then wondered, “This Jiang Fan still has such a strong bottom card?”

It wasn’t just Augustus.

The other top ranked contestants also focused their attention on Jiang Fan for the first time.

“Jiang Fan? A freshman from the Long Sky Star Area? Able to defeat Mok?”

Bright Moon Snow, who was clean-looking and not too old, stared at Jiang Fan.

Curiously, she looked at him a few more times.

“Able to defeat Mok?”

The Ice Moon Sage next to her was also sizing up Jiang Fan, “But Not much of a threat to me.”

“Interesting. This year’s class of new students can still come up with such demons.” Huo Ge smiled gently.

“This freshman defeated Mok?”

The one who was most shocked was Ann, one twin of the Elves Empire!

In the thirty-two into sixteen matches just now.

Ann had also played brilliantly.

Defeated her opponent relatively easily.

She advanced to the next round.

Originally, she thought the opponent was Mok.

But unexpectedly

Now it turned out to be Jiang Fan.

“That’s true.”

Bru nodded and said, “So Prepare again. For the rest of the time, watch Jiang Fan’s video of the game just now.”

“Especially, the musketeer created by Jiang Fan has already appeared at the legendary level. The terrifying weapon that instantly killed level 10 ghouls just now is the awakened musketeer of this level.”

“Okay, I get it.”

Ann nodded and said, “Since I could defeat Mok, our strength must not be weak. I will keep a serious eye on these legendary level musketeers and not give the other side any chance!”

“Uh

Bru hesitated for a moment, but still said, “Ann, don’t blame me for speaking straight. You still underestimate Jiang Fan.”

“If there’s nothing unexpected, you shouldn’t be Jiang Fan’s opponent.”

Ann, however, coldly snorted.

Didn't believe what Bru said.

"This little ninny."

Bru couldn't help but shake his head.

As Bru was a training teacher, he was very clear about Ann's strength.

On the other side, the Lord of the Long Sky Kingdom was also pointing at Jiang Fan.

Because there was hope that he could take the match, the Lord of the Long Sky kept a smile on his face.

"Ann built the High Elf race, but it's not perfect yet. You just need to pay careful attention. There's a good chance you can win the game."

The Lord of the Sky admonished.

"I know."

Jiang Fan nodded his head.

The High Elf race was a very famous transcendent species.

Almost everyone in the Elves Star Region.

All of them built this race.

So did Jiang Fan's next round opponent, Ann as well.

And

Ann was still the favorite to be ranked in the top 10 in terms of recognized strength this time!

But after the battle between Jiang Fan and Mok.

Few people were optimistic about Ann.

After a quick break.

The sixteen into eight matches started at the same time.

Jiang Fan and Ann were each transported to their respective star spaces.

“Hmph, Teacher Bru actually said that I’m not a match for this Jiang Fan. I’m afraid I’ll be smacked in the face when the time comes.”

Ann glanced at Jiang Fan and thought darkly.

Everyone else was holding back their bottom cards.

Did she, Ann, not keep any?

“In fifteen minutes, no, within ten minutes, I’m going to defeat this Jiang Fan.”

A trace of determination flashed across Ann’s eyes.

It was the same as the last fight with Mok.

This time

It was the same as what Ann had imagined.

This match was also over in ten minutes!!!

Chapter 537: Range Battle! A side-to-side fight! Everyone was dumbfounded again!

Just like before, the eight matches of the top sixteen also started at the same time.

But there was one difference.

This time, the attention of the crowd was more on the match between Jiang Fan and Ann.

Those other big favorites for the championship.

For example, the Ice Moon Sage, Alcoholic, Augustus, bright moon snow and so on the attention was still lower.

Because, the previous match between Jiang Fan and Mok.

Many people did not watch it.

Only knew the result.

Now everyone wanted to know

Jiang Fan, the strongest freshman ever, who had already broken the historical record.

What kind of strength was it?

Especially the very popular legendary musketeer that had been rumored.

The crowd was very interested.

“Legendary Musketeer!?”

Jiang Fan was speechless as he listened.

But he knew that this was the world’s division of rarity within the extraordinary race.

Let’s say the Mok that he met before.

The ghoul that was created.

The level 10 ghoul that was obtained after constant devouring.

It could be called King level ghoul!

Ordinary level, elite level, king level and legendary level.

But this was only the division within each race and couldn’t be compared in parallel.

The king class of a lower civilized race couldn’t beat the elite class of a supercivilized race.

“I didn’t expect Jiang Fan to have such a trick.”

Huo Kong was delighted and said, “In this way, it is estimated that Jiang Fan’s strength should be able to rank at least in the top ten.”

“It should be stronger than the Elves Empire’s Ann.”

Xi Ya nodded and said, “The High Elf that Ann built doesn’t have the means to deal with Legendary Musketeers.”

“I wonder if Ann will have any bottom card?”

The ever-cautious Chang Feng said with some concern.

“There should be a bottom card.”

Huo Kong pondered for a while, and said: “After all, they are the strongest two in the Elf Empire this year, so she will definitely prepare some trump cards, but...”

The corner of Huo Kong’s mouth showed a smile and said, “This bottom card is unlikely to be hidden deeper than Jiang Fan.”

This was another point that surprised the crowd about Jiang Fan.

Although many contestants would have kept their bottom cards.

But there was absolutely nothing like Jiang Fan.

It was the one that could directly raise a notch.

Everyone else’s bottom cards were usually one-time precious treasures.

The competition soon began.

The teams on both sides entered the field separately.

For Ann’s High Elf.

Jiang Fan had naturally studied it.

The Great Desolate Army had even done a fairly adequate job.

And this time

Nothing unexpected.

Electromagnetic cannon were still on the field.

Looking at the super-large chariot equipped with the electromagnetic cannon, Ann in the star space couldn't help but observe a few more times.

“Jiang Fan's strongest weapon should be this, as long as I can solve it, this match will be very easy.”

And thought secretly.

The main reason Ann was more confident in herself lied in

The High Elves were a very well-developed race.

There was a long history, at least a hundred million years.

And immortal civilization, magic civilization, etc. belonged to the same highly developed civilization.

All aspects were very comprehensive.

Unlike some “short-lived” civilizations.

Still had to feel the stones to cross the river.

Just follow the steps and you could create a powerful race out.

The main species of high civilization were powerful high elves.

These elves and the dark elves that the Great Desolate Army encountered in the college entrance examination.

They were similar in appearance.

Only the details were a little different.

But the strength was even stronger.

Because the high elves had other vassal races.

The most important point was

The high elves could usually breed the fountain of life.

It had a very strong promoting effect on the cultivation and reproduction of extraordinary races.

Ann built the most formal High Elf civilization.

The total number was 50,000!

This battle was very crucial.

Therefore, it was also led by the Elf King.

High elves also had a powerful talent for archery.

They were naturally close to plants.

Nearly invincible in the jungle.

The subordinate races were also two plant species.

One was the tree man, with a very huge figure!

The height reached over ten meters.

It reminded Jiang Fan of Bu Jing Yue's Spirit Tree People.

But these tree people were obviously more powerful.

But the weakness was also the same.

It was slow in action.

-Usually act as a meat shield.

The other one was the Tree of War!

This was a transcendent plant species that was born specifically for battle.

Like a huge living stone thrower.

The body was even taller, reaching over twenty meters!

It could throw a boulder into the opponent's position several kilometers away!

This was also just a non-critical ability of the Tree of War.

Its actual power was

The extremely terrifying close combat fighting!

With great strength and physique.

Plus a huge body size of over twenty meters.

Even a level ten ghoul would have a hard time pleasing in the hands of these Trees of War.

“Who is stronger, the level ten ghouls we met before or these Trees of War?”

Huo Qubing asked a group of scholars.

“Both of them have their own merits.”

A scholar replied, “The tenth level ghouls are offensively stronger, but the Tree of War’s defense and vitality is more than that of the tenth level ghouls, and when the two fight, it is estimated that no one will help anyone.”

The others all nodded their heads.

Therefore

Many people outside believe that the high elves restrain the ghouls for a reason.

First, they had to break through this defense of the Tree of War to do so.

Either there was a powerful melee species.

Either it had to be a long-range output or an aerial output!

“The other side’s most powerful output lies in those High Elves.”

Another scholar spoke up.

Each High Elves held a bow and arrow in their hands.

Naturally born archers!

The shooting range was over two thousand kilometers.

The accuracy of the arrows shot was extremely high.

“Hm?”

At this time, Huo Qubing and the others, who had been paying attention to the opposite side’s movements, were seeing Opposing the Elf King’s hand.

Suddenly, there was an additional bow and arrow of a different shape.

It was bigger than an ordinary bow and arrow.

It was more ancient and simple.

“Elf King Bow?”

Seeing this ancient bow and arrow.

The Lord of the Long Sky Kingdom frowned slightly and couldn’t help but say, “Your Elf Empire gave this all away?”

“I can’t help it, just in case.”

Bru stretched his hand.

This Elf King Bow was naturally not a bow and arrow created by Ann’s own planet.

Rather, it was from..... Elf Empire, another powerful planet master.

It took a huge cost.

Only then was this Elf King Bow sent to Ann's planet.

"I can't believe you left me a hand."

The Lord of the Long Sky frowned.

Because the incident happened suddenly.

Chapter 538: Range Battle! A side-to-side fight! Everyone was dumbfounded again!

So now after knowing it, there was no longer any way to inform Jiang Fan.

"This bow and arrow from the opposite side differs from their ordinary bows and arrows. It must be extraordinary."

An elderly scholar immediately said, "It's somewhat similar to the longbow of the dark elves recorded in the books."

"I guess it's the opponent's hidden bottom card."

Luo Cheng nodded and said, "The performance is bound to be more powerful, so everyone be careful."

"If I were on the other side, I would definitely have to consider solving our side's electromagnetic cannon first."

Huo Qubing said at this time, "The other side dares to take out this bow and arrow, it is estimated to strike our electromagnetic cannon at a long distance."

It was the same as what the Great Desolate Army crowd had analyzed.

The range of the Elf King Bow was extremely exaggerated.

It exceeded over fifty percent of ordinary bows and arrows.

It reached beyond three kilometers!

This was naturally not something that a second level planet master could build.

It was the product of a third level planet.

In order to send this Elf King Bow onto Ann's planet.

But it came at a price.

“Let's get rid of that weapon on the opposite side first.”

In the star space, Ann had already made a preliminary plan in her head.

“Treeman and Tree of War advance at full speed and cover the elves.” Ann ordered and commanded, “All elves, defend yourselves, your target is that biggest weapon on the opposite side!”

Despite having the Elf King Bow.

But the range was still just over three kilometers.

Not even the electromagnetic rifle could compare.

This king bow was naturally not an ordinary material.

The material used was the material of the Elves King Tree, plus other precious metals.

Only then was it possible to make it.

To pose a threat to the electromagnetic cannon? One would have to move to a range of four kilometers.

This was difficult for others because it had to withstand the terrifying firepower of the Great Desolate Army.

But for the High Elves who have the Tree People and the Tree of War.

There would be the possibility of achieving it.

It was an extraordinary plant species.

Even if it was hit by a missile head-on.

There would not be any serious harm.

Under Ann's command.

The High Elf army quickly rushed towards the Great Desolate Army position.

Standing in the forefront was naturally the tallest size of the Tree of War.

Followed closely by

A good number of tree people.

And the 50,000 High Elves were hiding among the tree people.

"Let's try with missiles first."

This was the first time the Great Desolate Army faced the High Elves.

Luo Cheng then planned to put the main weapon to test.

Whoosh! Whoosh! Whoosh!

They shot out a single missile from the bottom of the storm fighter in the sky.

It went straight to the elven army below.

“There’s nothing others can do with these things, not including my elven race.”

Seeing this dense missile.

Ann, however, only smiled coldly.

The next moment, she saw that.....

On the tree man, fifty thousand high elves all raised the bow and arrow in their hands.

Arching their bows and shooting arrows!

Whoosh! Whoosh! Whoosh!

In an instant, there were 50,000 wooden arrows.

Shot in the sky’s direction.

Densely packed.

It was black and dense, like a rain of arrows.

The powerful archery skills of the high elves were on full display at this time. They could predict the position of the missile.

They were predicting the position of the missile.

Then they shot in a coordinated manner.

Often, thousands of arrows were used to stop a missile at the same time.

Because the range was too small, even though the missile was extremely fast, the dense archery would still hit it.

The bows and arrows touched the missiles one by one.

And lost its effect.

“The missiles don’t seem to have much effect.”

Seeing this scene, everyone in the Great Desolate Army was clear

Even if the missiles could slip through.

But it was only a few.

It couldn’t do much damage to the High Elves protected by the tree people below.

“Let’s directly use the electromagnetic cannon.”

Luo Cheng ordered.

The size of the missile was still a bit too big.

The most critical thing was

Opponent had archers.

Air defense was exactly a strong point.

But if replaced with metal bullets of electromagnetic cannon.

With that super fast speed.

It couldn't be blocked by the number of bows and arrows.

The electromagnetic cannon was already ready.

The warriors who operated it were very excited.

They aimed the muzzle of the cannon at the Tree of War at the forefront in the distance!

Seeing the move of the Great Desolate Army.

All the people watching the battle were slightly surprised.

Because now the tree of war was far from the Great Desolate Army position.

There was still a distance of over ten kilometers.

And just in case, Ann tried to keep it as far as possible.

And it knocked those three level ten ghouls yesterday down within four kilometers.

After the match many people were discussing The electromagnetic cannon was a powerful weapon.

But all were of the opinion that the range should be within five kilometers.

At most, add a few kilometers.

This was also in line with the common sense of the level two planet.

If further than that, that would be very strange.

Including Ann, she also thought so.

So she moved the elven army to a conservative position ten kilometers away.

Considering this location was extremely safe.

Only

What none of these people could have imagined was.

The range of the electromagnetic cannon was not at all five kilometers.

Neither was it ten kilometers!

Rather

It was over fifty kilometers!

Of course.

The further the range, the weaker the power of the electromagnetic cannon shooting out metal bullets.

But at a distance of ten kilometers, there was no problem.

Ann's side also saw that the electromagnetic cannon seemed to start to activate.

“Ready to use this strongest weapon?”

The corner of Ann's mouth curled up into a smile as she muttered to herself, “But I am going to pay three or even more trees of war to destroy this weapon this time!”

Before the match, Ann naturally watched the video of the battle between Jiang Fan and Mok.

And Aya also helped analyze a lot.

One weakness of the electromagnetic cannon was soon discovered.

That was

The rate of fire was relatively slow!

A minute could only shoot out five or six metal bullets.

And in a minute's time.

That was enough for the elven army to move forward a distance.

As for other weapons.

Such as missiles and electromagnetic rifles and the like.

The damage to the tree of war and the tree people was very small.

But there was some damage.

Chapter 539: Range Battle! A side-to-side fight! Everyone was dumbfounded again!

So Ann was planning to pay the price of three trees of war and more tree people.

To take care of the strongest weapon on Jiang Fan's side.

Unfortunately!

She didn't expect

The range of the electromagnetic cannon was not just as simple as five kilometers.

When the muzzle of the electromagnetic cannon was aimed at the Tree of War.

Outside on the huge square.

Everyone was silent.

Their eyes fixed while watching this scene.

Everyone wanted to see for themselves.

This weapon that could instantly kill the tenth level ghoul How powerful was it?

“Fire, target the middlemost tree of war of the opponent.”

This time it was Luo Cheng's order.

Five seconds later, the electromagnetic cannon was launched again.

Phew!

In an extremely slight sound.

A metal armor-breaking shell shot out from the muzzle like a phantom!

With an amazing speed.

It went straight for the Tree of War.

Wow

The crowd watching the movement of the electromagnetic cannon.

They all let out a clamor.

A hint of incomprehension flashed in their eyes.

What was Jiang Fan doing?

Didn't he see there was still a distance of over ten kilometers from the Tree of War?

“Hmm?”

Ann also looked puzzled.

Not knowing what the opposite side wanted.

But the next moment.

She heard a loud boom ten kilometers away!

For metal armor-breaking bullets, it only takes a little over a second.

The shot arrived!

In the middle of the tree of war, an enormous mouth appeared.

This mouth starts from the waist.

An enormous hole appeared in the tree of war in the middle.

It went through the entire thick body of the tree.

It formed a tunnel several meters long in the tree's body.

Then drilled out from the back.

The force had not completely dissipated.

It hit the tree man in the back.

Smashed all the branches of this tree man!

The metal armor-breaking shells fired by the electromagnetic cannon were not ordinary armor-breaking shells.

To be precise.

It should be called armor-drilling ammunition.

Relying on super high speed.

It could drill into the opponent's body!

Enhanced the ability to break armor.

And this time because the opponent was the tree of war.

So the metal armor drill ammunition used was heavier than before!

Under the impact of this tremendous force.

Even the over 20-meter-tall Tree of War was hit with a tremor.

It almost fell to the ground.

“Continue!”

Luo Cheng shouted.

-Metal drill armor bullet.

It was not enough to finish off a Tree of War.

According to the scholar team’s prediction.

It would take at least five of them to do so!

Phew!

Another one shot out.

After a second, it hit this middlemost tree of war again.

Nothing unexpected.

Another huge wound appeared on the waist of the Tree of War.

Through the entire tree!

Ten seconds later, a third shot came!

The error was very small.

It precisely shot through the waist of the tree of war again.

Behind the three metal drill shells.

The tree of war's body appeared with three huge wounds.

The whole tree body was shaking up.

But the electromagnetic cannon has not stopped.

It continued to fire!

Swoosh! Swoosh!

Twenty seconds later, two more emitted!

Again, they struck near the wounds of this Tree of War.

The strategy of the Great Desolate Army.

It was to continuously blast the same part of the Tree of War.

To directly girdle the other side!

After five metal drill shells.

This tree of war's waist became half empty.

It couldn't hold on any longer.

With a crash.

Directly fall headlong to the ground!

Such a heavy injury.

If it was for transcendent species such as ghouls or black flame giants.

It would be long dead.

But for the powerful life force of the tree of war.

It was still strong enough to survive.

This series of five long-range metal drill armor bullets made Ann dumbfounded!

She stared at the tree of the war.

From high, to dash to the ground!

In fact, even if Ann reacted.

She couldn't do anything.

Because the speed of the electromagnetic cannon was too fast, even if the high elves shoot arrows to intercept.

Also simply could not stop!

“This

For the first time, a hint of shock passed through Ann’s eyes.

That was completely unexpected

This weapon was not just powerful.

The range was even so far!

It exceeded ten kilometers!

People couldn’t prevent it at all.

On the competition field, seeing the most powerful Tree of War in the middle fall heavily to the ground.

There were five more huge slits on his body.

The appearance of dying.

The tree people at the back also stopped in their tracks.

Fifty thousand high elves had involuntarily picked up their bows and arrows.

But seeing the Great Desert Army position that was still ten kilometers away from this side.

They were helpless!

Even if they were good at shooting.

They couldn’t reach such a faraway target!

“Continue!”

Luo Cheng continued to order.

The electromagnetic cannon had an electric mound for unlimited charging.

There was also no need to worry about the heat problem.

It was possible to fire continuously for a long time.

The opponent’s army of elves.

However, there were seven trees of war in total, it was not enough to knock down only one tree.

Phew!

Another metal armor bomb flew out.

A few moments later, it hit a tree of war on the left.

The same as the middlemost Tree of War before.

Although.....

This tree of war was already prepared.

But also simply could not dodge.

It was hit right in the waist.

Directly through the enormous hole.

The huge tree body was shivering.

Swoosh! Swoosh! Swoosh! Swoosh!

Within the following minute.

The electromagnetic cannon fired five metal drill shells in quick succession.

The target was all this Tree of War.

The High Elves behind had already reacted.

One after another, they shot arrows with their bows.

Arrows rained down.

Trying to block these terrifying armor drill shells.

But all in vain.

The speed of the two sides was so much different.

It was completely impossible to block.

Five metal armor drilling bullets

There was nothing to hinder in the slightest, instantly penetrated out of five huge holes!

Boom!

This tall tree of war also fell heavily to the ground.

“Continue!” Luo Cheng aimed at a Tree of War on the left.

“Stop! Stop!”

Seeing that the electromagnetic cannon had reversed its direction.

Ann realized that it was not good and immediately shouted.

It had brought down two Trees of War.

There were only seven of them she had cultivated in total.

If one more fell

That would be terrible.

But in the star space of the finals.

The contestants could not have a direct conversation with each other.

It was impossible for Jiang Fan to hear it.

“How could this happen?”

Ann clenched her fists tightly and clenched her teeth, a hint of resignation in her eyes.

But she knew

This battle was completely out of the question.

Only by admitting defeat could avoid the slaughter of her tree of war!

And at this time less than eight minutes had passed!!!
