

Origin Powers 429

Chapter 429 The House Was Stolen

And at this moment.

Within Xuyun Star.

The flames of war were still raging.

Siria Planet was not far from Xuyun Star, it only took a few hours for the pirate army to arrive directly at Xuyun Star.

And when many warships broke through the atmosphere, descending above Xuyun Star...

The Shilin race immediately launched an attack.

They had been prepared for this, knowing that humans had previously escaped from this planet. They would surely seek help... and what they needed to do was hold fast to Shilin Star, buying time for their actions.

The war came faster than expected.

Likewise, Sara and the others could feel that the ground attacks were more fierce than imagined; their arrival seemed to be within the enemy's calculations.

But considering Zhou Mu and others had been to Xuyun Star before and were repelled... it meant they had already startled the enemy.

"But the kid really wasn't lying, these Shilin people have truly lost air superiority."

Sara looked at the fierce cannon fire below, the level of attack was evidently all-out...

But at this point, the opponent hadn't even sent a single warship into the air.

"Ascend, avoid their range, then use fragmentation bombs for carpet bombing. Before landing, I don't want to see a single living Shilin!"

"Yes!"

Sara had exceptional military talent.

Combined with having an absolute advantage, under her command, without much effort, the entire ground of Xuyun Star had been completely plowed.

Even activating all thermal sensing systems, there was never the slightest trace of life detected below...

Seeing the raging flames and the intense explosions of smoke, even if no detector could identify the life signs of the Shilin people, Sara was sure that if one-tenth of them survived this cleansing, it would already be quite remarkable.

"Land the warship, deploy the special assault team!"

Sara said, "Search the whole planet for Void Gold... be cautious of Shilin's ambushes along the way, the traits of the Shilin people have been sent to your personal information, be mindful, if infected, end yourself immediately, don't give them a chance to assimilate you."

"Yes!"

Batch after batch of special ops teams jumped down directly through the open cargo doors.

An overwhelmingly one-sided war...

The Cosmic Pirate Group could escape from the encirclement of countless civilizations and still thrive. Naturally, their strength was formidable, and now under the allure of the Transformation Capsule, they unleashed nearly all their power... how could the currently weakened Shilin race resist?

It took only six or seven days.

The Shilin on the ground had been completely purged.

Dozens of large and small warships slowly landed on the ground.

Sara watched all the pirates wearing protective suits throw one corpse after another of the Shilin people together, then burn them to ashes with flames...

The troops began to station on Xuyun Star!

Then the teams spread outwards, searching for the whereabouts of Void Gold.

Just when they thought they had defeated the Shilin race and passed the most difficult hurdle, they couldn't find the existence of Void Gold no matter where they looked.

Until...

A subordinate reported, "Miss Sara, we've found a very deep crater. If we don't find Void Gold inside it, I'm afraid there won't be any on the whole Xuyun Star... according to our survey team, there's over an 80% chance of finding Void Gold there!"

Sara said, "Then start digging, what are we waiting for?"

"But on the edge of that deep pit, we found climbing tracks, indicating that not only is there Void Gold inside, but likely remnants of the Shilin are there as well."

The pirate said, "This crater is too deep, previous attacks had no impact inside, based on our experts' judgment, it likely reaches the Earth Core; using missiles might damage the core, causing this planet to be destroyed entirely."

"Are you saying that not only would we not get the Void Gold, but we might not even survive to leave Xuyun Star?"

Sara frowned, asking, "Can a Micro Warship enter the deep pit?"

The pirate shook his head, "I'm afraid not."

"Seems like we have no choice but to venture into the crater."

Sara pondered for a while and then gritted her teeth, "Order a team to remain at the base, while everyone else fully arms and enters the crater, we will wipe out these Shilin!"

A subordinate asked, "Close combat?"

"What else?"

Sara sighed, "Who would have thought the Shilin would have such a hiding place left, it seems impossible now without some sacrifices, but worry not, our strength far surpasses theirs, coupled with superior weaponry, even in close combat, our chances are high!"

Though knowing melee combat with the Shilin was foolish, if the Void Gold was truly below...

Sara naturally knew the stakes, or rather, to become the new Pirate King among these unruly beings within the Pirate Group, Sara wasn't soft-hearted!

The subordinates immediately went to arrange it.

An hour later, tens of thousands of pirates, fully equipped and armed with high-energy weapons, advanced into the depths of the pit with the aid of Micro Armor.

Now having ensured there were no more Shilin on the ground of Xuyun Star.

They left only a portion of pirates to guard the warship, for potential retreat in case of defeat... although that possibility was extremely slim.

Meanwhile.

How could Sara have known that her stronghold had already been entirely stolen by someone?

Especially after all the elite subordinates had left, with the spread of the T-virus, the hosts became these strong Martial Artists... making the T-virus even more potent.

With the assistance in spreading from the Infinite Justice Mecha.

In mere days.

Without Old Gor's mediation, the remaining pirates trusted no one, each fighting for themselves, some even died never understanding what actually happened.

A planet once filled with sins.

Now, all living beings were turned into zombies... ironically purer, at least past sins were washed away.

Xu Lingjun and Xu Lingjun, under Xiaoya's guidance, boarded Old Gor's exclusive Monarch level Battleship, the most powerful warship on the entire Siria Planet, which even Sara was unqualified to command...

Yet now, it fell conveniently into the hands of Xu Lingjun and Han Yun City.

As the warship ascended.

Xu Lingjun couldn't help but sigh, "I never imagined Old Gor secretly had hoarded so many nuclear bombs, saving me a lot of trouble."

Indeed, his original plan was to infuse Talent Source into nuclear bombs and then bombard Siria Planet.

But now finding sufficient nuclear weapons in Old Gor's heavy weapons arsenal... saved Xu Lingjun a lot of Source Value.

Han Yun City asked, "I'm rather curious, did you also pack nuclear bombs inside the capsule? What on earth do you keep inside your capsule?"

Xu Lingjun smiled, "Want to push it?"

"Let me do it."

Han Yun City stood at the pilot console, looking at the dusky planet below, shaking his head, "What a pity, such a beautiful planet, now utterly destroyed!"

With that, as his finger pressed down.

Countless nuclear bombs detached from the ship, bombarding the planet below... meanwhile, the warship continued ascending, the two watching the entire Cosmic Pirate Group, which brought mountains of corpses and seas of blood to countless civilizations, utterly annihilated!

"Who would've thought, us two together could kill yet another Grandmaster level opponent."

Han Yun City shook his head, "And this time less trickery than last."

Xu Lingjun said, "Truthfully, it's still trickery, when you can kill a Grandmaster level opponent without trickery, I'll tell you a secret."

Han Yun City was surprised and asked, "What secret? Don't tease me, I have a curious nature..."

Xu Lingjun chuckled and truly stopped teasing; he asked, "In the cosmos, there are many mysterious races of the heavens. To be precise, Blue Star is also one of them, so why do you think Blue Star is uniquely targeted by them?"

He said, "Sun Yangwei asked me this question before his death."

Han Yun City was taken aback, showing a solemn expression on his face.
