

Origin Powers 691

Chapter 691 Reliable News We Have an Inside Man Now

Afterwards.

Everything proceeded in an orderly manner.

The Land of Light was a colossal entity, and if it weren't for the assistance of the various mysterious races of the heavens, the Great Xia Empire wouldn't have so easily devoured this piece of fat meat.

But now, even though the Land of Light has lain flat, wanting to completely digest it...

Is not an easy task.

During this time.

In the Land of Light.

There were numerous messages about the Giants of Light, sects, and countless numbers of believers spreading faith.

What was being advocated was the salvation theory of the Giants of Light.

Some of these people acted spontaneously... but more so, they were actually people dispatched by the Great Xia Empire.

They were maximizing the weakening of the influence of the royal authority of the Land of Light.

This process was supposed to be imperceptible, an influence as silent as a gentle rain...

But the newly rebuilt cities after the great war provided the best growth bed for these nutrients.

The time, geographical conditions, and harmony of people were all on the side of the Land of Light.

And upon learning that the Night Demon was now under Xu Lingjun's command.

In the face of such blatant actions by the Great Xia Empire, the Land of Light dared not show any resistance.

In just a month.

A brand new management system, different from the previous administrative system of the Land of Light... had successfully replaced the management system of the Land of Light, only that its sovereign figures had all become people of the Great Xia Empire.

And many of the warships of the Land of Light had already been gradually modified within this month.

Xu Lingjun was not entirely just cultivating...

Wang Qingya's words had alerted him.

The Great Xia Empire was powerful, but the Land of Light and the Baoxue Empire were actually no less formidable.

Now, the technology of the Land of Light had provided so much help to the Great Xia Empire... many scientific research technologies even helped the Great Xia Empire solve problems that had troubled it for years.

If such was the case with the Land of Light.

Then what about the Baoxue Empire?

Although the Baoxue Empire had been destroyed under nuclear bombs, just as Wang Qingya had said, the research institutes, being the most advanced and developed technological locations of a country, would they not have prepared measures to cope with nuclear bombs?

During this time.

Those monsters lurking beneath the Baoxue Empire moved collectively every night, scouring the surroundings of the entire Baoxue Empire.

There were so many of them...

Finding the science and technology research institute of the Baoxue Empire wasn't really a problem for Xu Lingjun.

As early as half a month ago.

The Night Demon had already delivered those materials, research findings, and many finished products to the Great Xia Empire, where they were received by Zhong Yuebai.

And so...

The Zhanzheng Academy also became busy.

The Great Xia Empire, nearly insatiable, actively absorbed the gifts and nutrients from the other two great empires.

In just one month, they had consecutively overcome several technological challenges... even many weapons that previously only existed in imagination had now taken shape in reality.

The heavy damage suffered by the Silicon Mysterious Clan in the Land of Light had rendered them unlikely to recover their primordial qi for a very long time to come.

The Great Xia Empire obtained a most crucial period of recuperation.

Everything was moving in a positive direction.

And when everything was in place.

Only the final east wind was needed...

At this time, even Han Yun City, conducting official duties in the Land of Light, couldn't help but gaze expectantly in a certain direction during leisure moments.

There, Xu Lingjun had been in seclusion for over a month.

With Li Jingjun breaking through to the Inference Realm.

Xu Lingjun had finally begun advancing towards realms beyond the Inference Realm...

His success was of interest not only to martial artists across the Great Xia Empire, but even to the now remaining experts of the Land of Light like Ace, and Tairuo, who had already lost all power, they couldn't help but harbor expectations.

Though hostile...

They were now already walking on the path of cultivation taken by the opposition.

After Dongxuan and Grandmaster, Inference replaced Creation, even encompassing Creation!

Deriving Spiritual Awareness, observing heaven and earth from another perspective.

Who wouldn't want to know how powerful the subsequent realms truly were?

But then...

In order to make more progress from the current situation, Xu Lingjun's guidance was an absolute necessity.

And at this moment.

In truth, no one knew that Xu Lingjun had actually successfully broken through the current realm half a month ago.

Finally reaching the limits of the Inference Realm...

And then exceeding the limits!

To now, there were no limits.

"Spiritual Awareness fully integrated with the body, unity of spirit and soul, no more shackles!"

Xu Lingjun lifted his eyes...

Looking through the window, at the scenery outside.

If after deriving Spiritual Awareness, his realm had reached the level of seeing mountains not as mountains, seeing water not as water, like seeing the essence through a microscope.

Then with the unity of spirit and soul, now he saw mountains as mountains, waters as waters.

The whole world before him seemed to have no more obstacles...

And more importantly, when he completely absorbed the Giant Spirit Stone, taking all its spiritual qi into his body, just like the previous White Robed elder, he felt as if he had also become a giant stone.

Only the White Robe had become the giant stone's companion material, while Xu Lingjun became the main entity of the Giant Spirit Stone, able to perceive the moment of its creation.

A spectacle as magnificent as the opening of heaven and earth.

The Giant Spirit Stone was not just a Spirit Stone, but also a Spirit Vein, the source of Spirit Stones, the fundamental basis for Blue Star's survival.

At this moment...

The secret of the Spirit Stone's birth, the secret of Blue Star's continuation, with the Giant Spirit Stone completely absorbed by him, all secrets were fully unraveled to Xu Lingjun.

Chapter 692 Reliable Information We Have an Insider_2

"Beyond Inference, I guess the realm I'm currently in should be called the Divine Soul Realm!"

Xu Lingjun quietly felt the realm within his body and said.

"Oh? How come it's no longer the Nascent Soul Realm?"

By the window, a lush green plant swayed with the wind, gently undulating...

Upon hearing Xu Lingjun's voice, she curiously asked.

"The realm I've created is somewhat different from what I imagined."

Su Xun thought to himself that describing Nascent Soul and Divinity Transformation with past realms might be convenient but forcing a fit wouldn't be appropriate.

The Leaf Clone said, "Oh... I thought you wanted a child. After all, a Nascent Soul must have something to do with children, right? And despite Miss Wang coming with precautions during this time, you've never used any, and you still do dangerous things."

Xu Lingjun glanced at the Leaf without words and said, "You're just a plant, yet you're interested in the trivial matters of men and women?"

"Didn't I tell you, at the moment of my enlightenment, the first thing I saw was a human scholar? I quite liked his appearance... Moreover, I've been diligently cultivating towards a humanoid transformation, thanks to your cultivation technique, I feel I'm almost there."

"Then it seems next time we have to find a way to get you out first."

"It's best to get all the plants out, including those corner-grown ones... I'm not interested in others, but I'm very interested in you. Oh, didn't I just say I'm about to transform? Do you have any preferences regarding my appearance?"

The Leaf said, "Didn't I say, I'm only interested in you, so if possible, I'd like to shape according to your aesthetic..."

"It's inappropriate for you to ask the master about this question."

Xiaoya suddenly bubbled out cheerfully from Xu Lingjun's neckline.

Her delicate face full of excitement, she laughed and said, "Many people don't know what they really like, but I know exactly what the master likes... Based on the films he's watched over the years, I can find many commonalities, and these commonalities are exactly the master's aesthetic preferences."

"Understood, we'll chat privately next time."

"Yeah, yeah, but when you transform, I want to watch from the side. If even a tree can cultivate a woman's body, then as a machine, I have no reason not to, right?"

Xiaoya complained, "Though Miss Yaya mentioned helping me construct a life-sized body, it wouldn't be convenient for me to hide on the master's body, so I still want a figure I can freely adjust in size, how convenient."

Xu Lingjun: "....."

He ignored the nonsensical talk of these two unusual women, unable to understand what they were talking about.

In his mind, he had already begun planning silently.

Why, despite having broken through, he remained indoors, not venturing out.

It's just a matter of waiting.

The Silicon-based Mysterious Clan's combat power had suffered more than half before this battle.

Taking back the Desperate Great Wall was not much of a challenge for Xu Lingjun... But Xu Lingjun's goal was not just to reclaim the Desperate Great Wall, but to completely annihilate the Silicon-based Mysterious Clan.

Especially with such a good opportunity.

But they needed time, as the heavily damaged Silicon-based Mysterious Clan surely anticipated a human counterattack in the near future...

If they wanted to hold the Desperate Great Wall...

They must increase their forces.

They needed more support... how to mobilize?

Of course, from their home star.

Perfect, we'll completely wipe out your living forces in one fell swoop... then utterly destroy the Silicon-based Mysterious Clan.

Make a harsh example to warn all the heavenly mysterious races who dare to have ideas about Blue Star, showing them the fate that awaits them.

Therefore... he couldn't leave seclusion yet.

Blue Star had been fighting bitterly for over two years, during which almost all the citizens were bound by the long war, their nerves stretched to the breaking point.

Now, this great victory stimulated the people's desire for triumph. If he emerged now, he feared he couldn't restrain the people from the clamorous tide of counterattack.

So he decided to wait.

In fact.

Everything was as Xu Lingjun anticipated.

Though not versed in military affairs... his standing and observation could somewhat make him a semi-famous general.

At least, Su Xun accurately predicted the reaction of the entire mysterious races of the heavens...

"We've decided to withdraw already."

The Seyin Clan, with forms similar to humans but skins more like lizards... appeared quite daunting and fearsome.

Its Star Lord, Xi Long, sighed and said, "The strength of Blue Star surpassed our expectations. Our Seyin Clan had a limited population, and this Blue Star war cost us over a third. We can't continue fighting. Going any further, not only can't we occupy Blue Star, but our Seyin Clan might also become subordinate to other civilizations, a loss outweighing the gain."

"Us too."

"And us, our losses are too great, returning now, becoming another's vassal, at least ensures survival... any further fighting, our entire civilization might be extinguished here, Blue Star is overwhelmingly strong. We haven't even reached their limits, our damages have become incalculable."

The Baiyue Race, Black Beast Race, and other race Star Lords expressed their intent to also retreat.

No matter how passionately or persuasively Guiyuan argued...

Repeatedly asserting, in truth, Blue Star suffered immense losses. We destroyed their Baoxue Empire at first opportunity, and although the Land of Light remains, it's merely titular. Once we defeat the Great Xia Empire, we can comfortably reap Blue Star's benefits and share the victory.

Alas...

Despite his eloquence, appealing to reason.

They couldn't forget the despair felt during Baoxue Empire's nuclear explosion.

Couldn't forget how the Land of Light, despite reaching utter despair, revived after the emergence of a giant... especially after that mysterious Light Giant killed many of their kin.

They heard the Great Xia Empire might not be the strongest among the Three Great Empires, but it is the most mysterious.

Who knows what secrets they have yet to reveal?

Such losses, they cannot afford a third encounter with.

Those races retreated.

Only the Iron Wing Clan's Wing Twenty-Two slammed a fist onto the table fiercely, angrily saying, "A group of cowardly, life-fearing cowards, having come to this point, retreat now, won't all previous efforts be wasted?"

"Indeed, thankfully you're with me, or relying solely on the Silicon Civilization, we wouldn't stand a chance against those Blue Star lunatics."

"We've sacrificed so much, reaching this stage, it's success, or martyrdom!"

Divine Flame of the Flame Race coldly declared, "Without a turning point, our civilization won't last a hundred years, our planet will perish, then death is certain anyway. Now, fighting these Blue Star people might actually grant a slim chance of survival."

"Exactly!"

"We too, the Silicon-based Clan has been around for millennia... from our origins of living primitive lives, to developing our science, exploring space, we've only just begun. Unfortunately, previous civil wars depleted too much spiritual qi from our home. Our home no longer supports us."

Guiyuan remarked with a sigh, "Blue Star might be strong, but regrettably, no matter their strength, we must fight them. Fight or die, fighting might hold a sliver of hope!"

"In fact, though they've gone, it's not necessarily a bad thing."

Wing Twenty-Two suddenly spoke, "Actually, we're not without chances of success, and a high chance at that, let them leave if they wish, perfect, this opportunity is ours to command!"

Guiyuan and Divine Flame were simultaneously shaken.

Divine Flame eagerly questioned, "What do you mean?"

"Nothing much, perhaps you aren't aware, our Iron Wing Clan were once avian creatures, through development, achieved human-like transformation and civilization. But in fact, our wings aren't mere wings, what creatures could possess iron wings?"

Wing Twenty-Two smiled and said, "Our wings are modified from birth, equipped with communicators... so, in some sense, even if thoroughly searched, we still have methods to communicate externally, reliable news, Lord Seventeen is alive, and seemingly embedded within the enemy!"

With these words.

Guiyuan and Divine Flame couldn't help but brighten their eyes, looking joyously towards Wing Twenty-Two!

Chapter 693 - This time, I will use their own tactics against them

Divine Flame exclaimed in shock, "You... you mean, you..."

"That's right, Yi Shiqi, he's still alive."

Wing no.22 smiled and said, "During the fierce battle with the Land of Light, our Iron Wing Clan's warship once received a few lines of code. At the time, due to the overwhelming information during the war, we couldn't decipher it immediately, but after returning and deciphering it, I found out that this information was actually sent by Yi Shiqi."

Silicon Element joyfully exclaimed, "Does this mean that my father and the others are still alive?!"

"No, the Master of Silicon has already fallen!"

Wing no.22 sighed deeply and said, "We deciphered this time's code and learned that their plan has completely failed. Beliya betrayed them, causing them to fall into the enemy's trap just as they landed, unable to operate, and they were killed by the enemy. Lord Yi Shiqi was also severely injured and had his wings torn off. But because he lost his wings, his appearance didn't differ much from ordinary people, so he managed to escape."

"Are you saying he has infiltrated the human world?"

"Precisely."

Yi Shiqi said, "After deciphering this message, I immediately sent someone to Blue Star to see if we could receive any more messages unique to our Iron Wing Clan from high altitude. It's been some time now, and if Lord Yi Shiqi is indeed still alive, we should soon receive reliable intelligence."

"This is great, I never expected Yi Shiqi to penetrate the inner circle of humanity so fortuitously. Now we finally have some knowledge of the surface of Blue Star."

The group was just filled with joy.

Suddenly, a member of the Iron Wing Clan rushed in quickly.

He shouted, "My lord, we've received information from the surface, unique to our Iron Wing Race, and it has been successfully deciphered!"

"Bring it here quickly!"

Everyone suddenly became excited.

Wing no.22 stepped forward a few steps and snatched the slip of paper from his hand!

He opened it to take a look.

His face suddenly turned extremely grim.

"What does it say?"

The problem with the writing of the Iron Wing Race was something Silicon Element and the others couldn't understand, so it was useless to snatch it.

But seeing Wing no.22's grim expression, it seemed that what it said wasn't anything good.

Wing no.22 coldly said, "The Land of Light battled with our country, both sides suffered losses... Subsequently, the Great Xia Empire came to aid, which caused us to retreat, but you probably didn't expect, those Great Xia Empire warriors did not return to their homeland but instead stationed themselves in the Land of Light, seizing its regime, the Land of Light is no more."

He looked up, his face ice-cold and grim, saying word after word, "We were used as a weapon."

Hearing this, the faces of Silicon Element and Divine Flame also turned extremely grim.

The regime of the Land of Light was seized by the Great Xia Empire?

Doesn't this mean that now the entire Blue Star has been unified under one regime, one voice?

And ironically, it was their various civilized races who facilitated all this.

They sacrificed a lot, paid a huge price, and only then managed to eliminate the effective forces of the Land of Light, allowing the Great Xia Empire to enter smoothly.

How can anyone put up with this?

Wing no.22 said, "And within the Land of Light, there's even a rumor that says the Great Xia Empire colluded with the mysterious races of the heavens to successfully occupy the Land of Light."

The group's faces became even more grim.

Whether they colluded or not, wouldn't they know?

They truly didn't collude...

They truly were used as a weapon.

They sacrificed so much, so many...

In the end, it came to such a result?

Silicon Element gritted his teeth and said word by word, "Great Xia Empire, I will remember you, today's shame will be repaid a thousand times, ten thousand times over in the future!"

Killing his father wasn't enough, and they used them as a weapon!

It's not like this is how you bully people.

"Do you think this is over?"

Wing no.22 was so angry that he pressed his chest repeatedly to catch his breath, and only then did he manage to stay upright.

He gritted his teeth and said, "I never expected the people of the Great Xia Empire to be so despicable... they're planning to continue using us to help them consolidate their regime!"

"What do you mean?"

Silicon Element could no longer imagine what else they could use them for?

Or rather, what else was there worth them utilizing... they had already been so trapped like this.

"After the Great Xia Empire occupied the Land of Light, they encountered several waves of resistance, but unfortunately, the Land of Light had already been beaten half-broken by our joint forces, unable to organize effective battles!"

Wing no.22 said seriously, "But even if they successfully captured these people, they have to be cautious about the perception of the Land of Light's citizens, so they can't inflict extreme punishment on them. So, they plan to use our various races to eliminate these people!"

He said, "Lord Yi Shiqi explained clearly in his letter that he accidentally discovered a Great Xia person who looked very similar to him, killed him, and took over his identity, which is how he was able to gather this information."

"What do they plan to do?"

Silicon Element asked.

"Unknown, the information hasn't come out... or in other words, with Lord Yi Shiqi's current position, he's not yet able to uncover such crucial information."

Wing no.22 said, "But Lord Yi Shiqi reminded us that the Great Xia people have unified Blue Star, and plan to launch a counterattack on the Desperate Great Wall. Therefore, we must either retreat our entire army or immediately gather the most elite warriors from each race, the more the better, and fortify the mysterious races of the heavens into an impregnable fortress, ready for the imminent challenge! And he also stated that once he obtains any information, he will promptly inform us, allowing us to prepare in advance, increase our troops, as part of a strategy of using their own tactics against them."

Chapter 694 - This time I want to turn the tables_2

"I understand now, Brother Shiqi's words make a lot of sense."

The Silicon Element angrily said, "Unbelievable, these Xia People have stooped to such a despicable level, bullying us like this... Our Silicon Race still has the Iron Blood Silicon-based Army, it's perfect to bring them all over now. With Brother Shiqi as our insider, I want to make humanity pay a price they cannot bear."

"That's inevitable. Among the top ten experts of our Iron Wing Race, each possesses strength that is qualitatively different from others, and can even transform into giant birds. I will return to send the news, asking my king to dispatch more experts, and also the Tiger Wing Army, to mobilize all of them!"

"In our Flame Race, if we talk about the strongest in individual strength, it's led by the Chiyang Army. But in terms of collective combat, none can rival the cruelty and ruthlessness of the Cangyan Army. I will also go back for reinforcements!"

.....

They quickly settled on a plan.

Reinforce.

Reinforcements are necessary.

The vile Blue Star People have gone too far in their bullying... if they don't regain face, even if they capture Blue Star, they still won't feel at ease in their hearts.

This time, with Yi Shiqi as an insider, they plan to make Blue Star pay an unimaginable price.

It's best to let them reap their own consequences; we must see their expressions of one-third pain, one-third regret, and nine hundred ninety-one parts remorse and despair!

At that moment, everyone quickly contacted their clansmen on their respective planets.

And at this time...

Yi Shiqi's face was full of flattery and sycophancy, this former seventeenth-ranked expert of the Iron Wing Clan has now been thoroughly frightened by Xu Lingjun.

He didn't even require much interrogation from Xu Lingjun, just a single question...

"What can you do for me?"

He immediately spilled all his abilities in a rush.

And now, this information was obviously spread with Xu Lingjun's consent right in front of him.

After transmitting it all,

he looked at Xu Lingjun with a flattering gaze, eventually unable to hide his curiosity, he asked, "Commander in Chief, I don't quite understand, I initially pledged allegiance to you, thinking you planned to use me to help you open the gates of the Desperate Great Wall, to catch them unprepared... But why did you alert them that we have intentions against the Desperate Great Wall? Does this not give them a chance to prepare?"

"I want them to be prepared."

Xu Lingjun was in a particularly good mood at the moment, perhaps because of Yi Shiqi's cooperation, or maybe the Iron Wing Race's abilities truly helped him greatly.

He didn't mind chatting a bit more with him.

He smiled and said, "If they aren't prepared, how could they return to their planets and bring more reinforcements? If they don't bring more reinforcements, how can I annihilate as much of their vital forces as possible?"

There was one thing Xu Lingjun didn't say much about, after all, the person in front of him wasn't one of his own people, but from the Iron Wing Race.

Even though he has now been reduced to a slave, his goal is not merely to annihilate the army they've dispatched, his aim is to completely destroy their civilization; the more soldiers they send out at present, the weaker their Central Star's defenses will be, and the smaller the counterattacks they'll face.

But he couldn't share all this with Yi Shiqi, who knew if this guy had any nationalistic feelings, or if he'd cause trouble halfway through, wouldn't that lead to more complications?

However, just this little remark left Yi Shiqi visibly stunned.

Evidently,

he couldn't imagine that in Xu Lingjun's eyes, the joint forces of all the races were so minuscule, so much so that he didn't even bother to hunt them down, so he might as well let them gather their forces in one place, sparing him the hassle of wiping them out one by one.

Xu Lingjun suddenly asked, "By the way, in your estimate, how long will it take for their reinforcements to arrive?"

"Well... the wormhole has been established, and without obstacles, they can directly use teleportation technology to jump through the wormhole to the Desperate Great Wall; based on my estimate, it will take no more than a dozen days."

At this point, even though Yi Shiqi had become a captive, he couldn't help but admire and say, "After all, the Blue Star People are indeed too clever. They've set up three battlefronts right at the critical teleport points; if these points aren't under control, we... they won't be able to use teleportation technology, subsequent supplies will be hard to mobilize, and attacking Blue Star will be several tens of times more difficult, plus it'll benefit Blue Star's defense. Because these three locations are ones they must control."

"Yes."

Xu Lingjun sighed, "The loss of the Desperate Great Wall obviously made the Mysterious races of the heavens on the other two sides notice something amiss; their attacks over these two years have become much stronger. Unfortunately, they fail to realize that our human strength has improved significantly in these two years."

"Humans are truly formidable."

This time Yi Shiqi genuinely sighed.

Three fronts in battle, yet now they're thinking of retaking the Desperate Great Wall.

It's hard to imagine, that these people entered this cosmos, and have only been in contact with Spiritual Qi for a little over a hundred years.

"If so, then after ten days, you will transmit this information to them, tell them our precise time and location of attack, understood?"

Xu Lingjun handed Yi Shiqi a piece of paper, paused, and said, "The Iron Wing Race intends to target humanity, and this time they've suffered a significant loss of Primordial Qi, it's inevitable. Do well; you know Tian Haiyi, right? She is now thriving in the army, Blue Star's inclusivity is very strong; although you've left your race, here, you might yet take root and blossom!"

Tian Haiyi, remnants of the Chi Yu mysterious clan.

It is said that the Chi Yu mysterious clan has been completely exterminated by this Xu Lingjun, Commander in Chief.

Only a few like Tian Haiyi who had surrendered early still exist... and Tian Haiyi seemed to be doing quite well?

Upon hearing this, Yi Shiqi breathed a slight sigh of relief.

Looking at the note in his hand, his face suddenly showed surprise.

His eyes showed a hint of shock...

Ten days later.

During this time, the Desperate Great Wall swiftly unfolded its defenses, and provided quarters for the arriving reinforcements.

As the reinforcements gradually arrived...

The previous damages to the Desperate Great Wall were finally completely restored.

But this was at the cost of their own planet's Primordial Qi; reaching this point, one wrong step would lead to utter ruin, they were already deep in a narrow path, making it hard to turn back.

However, with Yi Shiqi as an insider, they were confident that this time, they could certainly use the enemy's plan against them and catch them off guard.

As new information was relays from Yi Shiqi.

The crowd hurried to decode it, and after seeing the content,

one by one, they all sat down on the ground in shock.

"They actually plan to deploy those controlled warriors from the Land of Light to attack our Desperate Great Wall?"

The Silicon Element was shocked and said, "These Blue Star People truly still want to continue exploiting us, what rubbish about counterattacking the Desperate Great Wall, it's all a cover... their real aim is to use our hands to eliminate those inconvenient to kill remaining warriors of the Land of Light!"

"Such a sinister plan! Truly terrifying."

"Too ruthless! They're not planning on arming these warriors with any weapons, just letting the warship carry them into the heavens to charge towards the Desperate Great Wall. By then, we'll attack first and sink them, achieving the enemy's goal!"

Everyone broke into a cold sweat.

They truly thought Blue Star people were incomprehensible beyond reason.

They are from the same planet, and now that this side of the cosmos is filled with crisis, shouldn't they be gathering the power of the entire planet, striving to survive in this dark and merciless cosmos?

Yet, they even have the leisure to fight internally...

Even to this extent of internal strife, not hesitating to send their compatriots to be slain by outsiders.

But it was precisely human nature's tendency to infighting that allowed them to lure the Baoxue Empire into cooperating, thereby seizing the Desperate Great Wall!

And now, this internal conflict again...

Will send them into irrevocable hell!

Knowing this in advance,

Silicon Element and others felt a surge of enthusiasm in their hearts, and finally, the enemy's sinister plan could be thwarted.

Chapter 695 - Despicable Xia Country People!

Under the information from Yi Shiqi.

The Desperate Great Wall, which had just suffered a bitter defeat and should not have recovered its Primordial Qi for over a year, is now recovering at an extremely fast rate...

But this comes at the cost of sacrificing the foundation of this star.

This time, they are truly at the point of either success or death!

Even... Silicon Element has devised an extremely vicious plan.

"I have decided to encircle without killing, definitely not acting according to the malicious intentions of these Great Xia People, otherwise, wouldn't we become their tool again?"

Silicon Element's words were filled with deep grief and indignation.

Looking back at the previous experiences, he couldn't help but feel an urge to burst into tears.

The casualties among the clan exceeded three million.

Although the Silicon Based Race is large in number, three million is not a significant figure... but the issue is that these three million are not just any three million, but the most elite warriors.

With their death, the overall combat power of the Silicon Race has declined by thirty percent!

If their sacrifice could achieve some victories, it might still be barely acceptable...

But the problem is this sacrifice was completely for someone else's benefit; they went to great lengths to defeat the warriors of the Land of Light, only to make it more convenient for those warriors of the Great Xia Empire to take over the Land of Light.

It is very despairing.

He said coldly, "I believe that those in the Land of Light who gained a great victory only to have the fruits of victory snatched away from them must share the same anger as us!"

Wing no.22 asked, "What do you plan to do?"

"There is a saying on Blue Star that makes a lot of sense."

Silicon Element said, "The enemy of my enemy is my friend. Why don't we use their own methods against them and let these people of the Land of Light exhaust the Great Xia Empire's combat power for us?"

"Will they listen?"

"They will listen."

Silicon Element sneered, "Don't forget, they were sent here to die. They are seen as a major threat by the Great Xia Empire, indicating how elite these warriors from the Land of Light are... and don't forget, the Land of Light was able to fight us to a standstill with just the strength of one nation, they are very strong, and now what they need is just a little aid!"

He said, "So, we won't kill them, not only won't we kill them, but we will give them weapons and send them back to Blue Star... and the reason they are controlled by the Great Xia Empire is completely because their weapons have been destroyed in battles with us. That being the case, why don't we lend them a helping hand?"

Divine Flame worriedly asked, "Aren't you afraid that they will turn against us with the weapons? Don't forget, although the Land of Light and the Great Xia Empire are enemies, they are, after all, people of the same race. In critical times, won't their guns be aligned against us?"

Silicon Element suddenly burst into laughter, laughing and saying, "We of the Silicon Based Clan have studied humans thoroughly for the Desperate Great Wall, spending decades, understanding them clearly. They are not like us, no matter when, they sacrifice everything for the tiniest gain... as long as we encircle without killing, control these experts, then send them back and equip the warships with some high-tech weapons, at the point of no return, do you think they will coexist peacefully with the Xia Country?"

The few listened and nodded.

The words indeed made sense. As they knew, within their planets, there was only one civilization, one voice, all aligned outward.

Only Blue Star... a not too large planet, surprisingly hosts three civilizations, three regimes, and during external defense, internal conflicts never cease.

In fact, if they hadn't seen it with their own eyes, they wouldn't dare imagine how a planet with such scarce resources can maintain constant internal and external strife simultaneously?

"People, here are twenty-one coordinates, distribute seventy percent of my Desperate Great Wall's forces on these twenty-one spots, forming a siege stance... when the enemy attacks, observe if they are carrying large-scale or kamikaze weapons!"

After all, Silicon Element was still wise, putting the final patch.

"Yes!"

Immediately someone obeyed and went.

In the following few days...

Although not yet completely recuperated, the Desperate Great Wall was even more volatile than when the grand army was dispatched previously.

To know, that previous time was an active attack, but this time is inviting them into a trap!

As time slowly flows...

Very soon, the time already approached the scheduled communication time given by Yi Shiqi.

And at this time.

Within the Great Xia Empire, the Land of Light, the ruins of the Baoxue Empire, and the Secret Realm.

In four places.

Numerous warships modified to maximize their carrying capacity were located at these four places, each with ten warships sharing a channel, a total of twenty-one channels, but their ultimate target was all pointed directly at the Desperate Great Wall!

"Are you confident?"

Han Yun City asked.

"I don't know."

Xu Lingjun shook his head and said, "We really don't understand the current situation of the Desperate Great Wall... but this attack can be considered a probe, and even in the worst case, it can establish our foothold within the Desperate Great Wall!"

"That's true, after all, we won't lose anything."

Han Yun City looked at Xu Lingjun with full admiration, sighed and said, "It's truly remarkable, in these years your progress is not only in strength, but your wisdom as well..."

"It's only because standing high enough sees farther, and horizons become wider."

Chapter 696 Despicable Xia Country People!_2

Xu Lingjun glanced at Yi Shiqi in the distance below, nodded slightly to him, and his voice sounded in his ear, saying, "Don't worry, I won't go back on my word."

At this moment, he still did not forget to promise me... It seems what he agreed to before must be true.

Yi Shiqi's face showed an excited expression. It must be said that he actually no longer had much value to be used, but even so, Xu Lingjun did not abandon him like a worn shoe, which clearly showed his previous promises were genuine.

In front of Xu Lingjun, a line of small words appeared.

[You promised Yi Shiqi to be the future lord of the Iron Wing Clan, earning his sincere gratitude, thereby gaining the favor of the world's Origin Value, Origin Value +488!]

Xu Lingjun smiled happily.

Why did he trust Yi Shiqi?

Wasn't it because of this...

If it wasn't sincerely for his use, how could he have contributed so much Source Value to him in one go?

Words may deceive, but Source Value is unquestionably genuine.

He said, "Move out, I also need to get ready!"

"Understood!"

Han Yun City pressed the red button in his hand.

At the same time, all warships received the signal, and a huge circle of smoke violently spread from every corner of Blue Star, then extended in all directions...

Countless warships ascended straight into the cosmos.

Propulsion systems left long tails of fire in the sky, detaching segment by segment, but before detaching, providing greater kinetic energy to forcibly free the warships from the atmospheric constraints.

To deal with the enemy, none of the twenty-one fleets entered through the Star Ring... aiming to catch the enemy off guard.

The speed of the warships wasn't too fast.

Half a day later...

The Desperate Great Wall received an alarm indeed.

A total of over 300 giant warships were advancing from within Blue Star towards them.

"Here they come, as expected!"

Silicon Element showed a slightly excited expression in his eyes and shouted, "Immediately investigate where their endpoint is!"

Someone below immediately went to handle it.

A moment later.

News came through.

Their routes were divided into twenty-one courses...

Constrained by the opponent's interference barrier, only the endpoints of thirteen of these routes could be detected!

Silicon Element looked at the coordinates on the giant floating window in front of him, laughing excitedly, "As expected, these coordinates match exactly with the twenty-one coordinates we previously obtained from Yi Shiqi. It seems Xia Country is really going to trip over its own feet this time!"

"Indeed, Xia Country will surely suffer a massive loss in Primordial Qi this time, then Lord Seventeen will be the greatest hero!"

"Currently, the main remaining enemy forces are the Land of Light and Xia Country. As long as the Land of Light and Xia Country can damage each other severely, even if the Land of Light can consume half of Xia Country's strength, the entire Blue Star will be at our fingertips!"

Divine Flame and Wing no.22 were also full of excitement.

"We must not be careless, the enemy is about to enter the range of the weapons, inspect whether the enemy's warships are carrying high-power weapons!"

"Yes!"

The entire Desperate Great Wall, the protective shield was fully activated.

Even if it expends energy, to guard against the unexpected, they would not be the least bit careless.

Soon, the warships entered the range of the guns.

But strangely enough...

Even though both sides' warships and weapons were already poised to shoot.

Not a single one launched an attack.

Both sides just approached, ceaselessly approaching...

The distance gradually closed enough to investigate their weapon installations using advanced technology equipment.

"This time, it's confirmed."

Silicon Element let out a breath of relief, appreciating the effect of the counter-reconnaissance device, they could clearly see the bare warships... these warships were really just warships, lacking even the most basic weapons.

In other words.

If they didn't know the truth, they might have drowned the countless warships with thousands of salvos.

They couldn't even approach their Desperate Great Wall...

This is what they should have done, but if they truly acted, they would have fallen into Xia Country's trap.

Vile people from Xia Country!

Silicon Element felt immensely excited, yet became calm, and waved his hand, "Relay the order, disrupt the opponent's warship courses, and forcibly guide them to land within our encirclement, warriors, deploy heavy armor and surround the enemy!"

"Yes!"

Under Silicon Element's direction.

Below...

The warships on the originally orderly twenty-one courses, all had their direction forcibly altered by magnetic fields, under the guidance of the mysterious races of the heavens, slowly fell into the encirclement.

Amid countless loud crashes.

These warships all stopped within the encirclement of the mysterious races of the heavens.

"Let's go... let's all take a look, the warriors of the Land of Light are indeed very admirable."

Silicon Element smiled, "Going along with it this time, I am really impatient to see their expressions."

"Let's go together."

Several people headed towards the perimeter.

And at this time...

The entire Desperate Great Wall, at strategic joints, the enemy's warships had already been easily controlled by them.

These warships just silently sat on the ground, as if they were merely on a sightseeing tour, with no hostility whatsoever.

On the perimeter...

The warriors from the mysterious races of the heavens, fully armed, surrounded these warships tightly.

When Silicon Element and others arrived.

Silicon Horn, a trusty lieutenant of the Silicon Based Clan, approached him, asking, "My lord, we have sent multiple signals inside, but have received no response. Should we forcefully open the warships?!"

"Go ahead."

Silicon Element said, "If I am not mistaken, these people likely do not even have the ability to operate the warships. They are merely tools for sacrifice. What we need to do is save them, give them weapons, and let them launch a revenge counterattack at their enemies!"

At this moment.

Silicon Element suddenly felt incredibly righteous, almost as if he were a righteous character.

Immediately someone stepped forward, taking out a cutting laser, and began cutting open the warship's door.

Amidst fierce sparks flying...

The previously sealed door, almost without a gap, was gradually cut out into a long slit, and then, slowly spread in all directions.

And at this time, Silicon Element and the others finally got to see the warships at close range.

"These warships seem to have been deliberately modified."

The few people were veterans of battle.

Naturally, they could see that these warships had been deliberately modified, with all weapons removed, replaced only to expand space, and even just standing outside they could determine...

This warship was certainly meant to expand space, except for necessary acceleration fuel, everything else had been thoroughly removed.

"These despicable people of Xia Country genuinely didn't consider the soldiers of the Land of Light's lives at all."

Divine Flame walked around the warship a few times, marveling, "Even the most basic shock absorption devices have been removed... Are they truly unafraid that these ships will crush these people to meat paste upon launch and landing? For the sake of increasing space, they're truly stopping at nothing."

"Don't forget, they originally wanted their lives. Dying is exactly what they're after, isn't it?!"

"True, there is no need for them to be redundant."

Wing no.22 nodded.

The few people watched quietly...

Slowly.

The eyebrows of several people furrowed.

Silicon Element suddenly said, "Redundant?"

"Dying is exactly what they wish for?"

Their eyes met, and they saw the shock in each other's eyes.

"Wait!!! "

Silicon Element quickly shouted, "Everyone, stop cutting, this likely is an enemy plot..."

"Stop, there might be a bomb inside!"

And just at this moment.

Clearly not yet completely cut, but the warship which was previously tightly closed, with doors unopenable, suddenly clicked open, and the doors voluntarily opened, moving to both sides!

Subsequently...

A hideous, grotesque corpse roared out, directly pouncing onto the cutter who was working on the warship, and in the next moment... blood splattered wildly, and a mournful scream shot to the sky.

Following,

Countless dense Night Demons, like zombies released from a cage, swarmed towards the heavenly mysterious races' warriors standing extremely close to them.

Chapter 697 Highest Authority

Night Demons!!!

When everyone sensed something strange, their first thought was that what was hidden inside these warships was not warriors from the Land of Light, but bombs, or other things capable of causing them great harm.

They fell into a trap.

The opposition played a double game, manipulating them in the palm of their hand. Their supposed cleverness not only failed to outsmart the enemy but also fell right into the enemy's scheme, sending all their elite warriors to this vicinity.

If there were bombs on the enemy's warships.

Undoubtedly, it could inflict extremely lethal damage on them... at least one-third of these warriors would likely perish miserably under the bombardment.

Yet, no matter how much Gauss and others imagined, they couldn't conceive how terrifying the opponent's stratagem was.

What they delivered wasn't bombs, but Night Demons!

Those incredibly fearsome monsters that hindered their conquest of Blue Star.

At this moment, Gauss finally understood why the opponent played such a game with them... they feared they might attack these warships.

These warships had no protective measures, and if they took action midway, they could utterly annihilate these warships in the cosmos.

No matter how powerful these Night Demons were, they couldn't withstand their artillery's might.

As long as the warships were destroyed, these Night Demons would float in the cosmos... until death, posing no threat to them.

Alas, their intelligence backfired.

Allowing the Night Demons to set foot on the Desperate Great Wall.

Especially since the warriors, having disembarked from the warships, stood outside with weapons, exposing themselves to the Night Demons' clutches?

In an instant, the entire Desperate Great Wall, at twenty-one locations surrounded by mysterious races of the heavens...

Simultaneously erupted into a Night Demon calamity.

Night Demons, from within to without, counter-sieged these mysterious races of the heavens.

Guns and cannons?

If they don't hit a vital point, they can't take their lives at all.

Heavy hits?

Even if their bones are shattered... as long as there's enough Spiritual Qi, they can regroup. In a way, they are immortal monsters.

Plus, they've been suppressing their hunger for over a month.

Now suddenly smelling the scent of the living, how could they endure it?

Just in an instant.

Tens of thousands of warriors closest to them were directly overwhelmed by the sea of Night Demons, unable to even let out a scream before being completely buried.

Like rolling snowballs, the Night Demons rolled together, majestically rolling towards the mysterious races of the heavens ahead.

"We've fallen into a trap, quick, find cover, attack, hit their heads, that can temporarily hinder their advance!"

Gauss and others reacted extremely quickly, and along with their strength, although they were also within the immediate attack range of these Night Demons, Gauss's arms, like steam engines, erupted with countless gases, a single punch's light column swept forward, directly blasting the front Night Demons into scattered skeletons.

They immediately retreated rapidly...

This seemingly powerful offensive only slightly impeded the Night Demons' advance.

To deal with these monsters, the only method is to set up cover and obstruct their advance.

Now that these beasts have ascended the Desperate Great Wall, it's likely impossible for them to come down again... the best outcome is the Night Demons occupying half of the Desperate Great Wall, posing a significant threat every day and night.

Even the worst result.

Thinking of this, just as he rushed to a safe area, his pupils involuntarily constricted dramatically.

He saw that among the Night Demons rushing forward, some of them actually had extremely powerful plasma bombs strapped to their bodies!

"Dodge quickly..."

The cry of alarm hadn't even fallen.

The piercing roar completely occupied the sight and hearing of the mysterious races of the heavens.

In the thunderous explosion, the Night Demons were completely blown apart... the closest Night Demons were even directly vaporized into gas.

But the mysterious races of the heavens suffered heavy casualties too, the defensive line they had set up earlier completely torn open with an irreparable breach from this explosion...

The mysterious races of the heavens suffered severe casualties.

The close proximity to such terrifyingly powerful bombs left everyone instinctively somewhat dazed... their brains completely unable to keep up with the pace...

"It's over."

Gauss was almost in a stupor, Blue Star People actually resorted to such despicable means.

Originally thinking they would use bombs to attack, little did they expect them to be evil enough to use the Night Demons as weapons against them. Assuming that was sinister enough, they hadn't anticipated the bombs strapped to the Night Demons.

Now this breach...

He watched the detached bones on the ground violently twitch, and one by one, bizarre creatures swiftly resurrected amidst the dead earth.

Again, they stumbled, but quickly charged towards them...

This time.

The defense line was torn apart, the Night Demons rushed directly into the heart of their defensive line.

Engaging in melee with those elite warriors of the mysterious races of the heavens...

The most terrifying battle tactic.

"Everyone retreat, cover... rearguard Gauss machine guns cover, create distance from the Night Demons, create distance!"

Wing no.22 flew in the air with wings spread, knowing that these Night Demons couldn't fly, shouting hoarsely.

But suddenly...

A creature with skeletal wings emerged from behind and lunged at him, riding on his back.

It bit fiercely onto his wing.

Wing no.22 let out a scream, rapidly nosediving, but the other couldn't be shaken off, continually biting at him.

Chapter 698 Highest Authority_2

And its skeleton emitted a dazzling silver light, completely different from ordinary bones...

This was the mark of modification.

It's the Silicon Race...

"Father!"

Silicon Element let out a scream, unable to keep his eyes from tearing up.

This skeleton...

Isn't it his biological father?

His father, in order to assassinate Xu Lingjun, ended up becoming a part of the Night Demon...

His own father's body, even in death, was turned into a tool by others to attack his own homeland?

Silicon Element let out a piercing scream, lunging toward the body of the Night Demon.

But just as he rushed out a few steps, countless Night Demons surged around him.

The number of Night Demons was massive, with over a hundred warships, the total number of Night Demons probably reached millions...

But more terrifying was the speed of their radiation infection.

They survive by relying on Spiritual Qi, but the true source of their movement is nuclear energy and radiation.

If injured by them...

Even contact with them could lead to varying degrees of radiation infection, and once a certain level is reached, reacting with external Spiritual Qi could directly turn a person into one of them.

The more Night Demons killed, the more emerged.

From initially constantly attacking these mysterious races of the heavens, to currently making them retreat continuously, especially when amongst their ranks, those who were once retreating as wounded suddenly began to howl, grabbing their nearby comrades and biting down...

Physical fear, psychological despair.

Clearly having superior numbers, yet feeling surrounded on all sides.

This terrifying force has far exceeded their limits of endurance!

Especially since the Night Demons didn't just erupt in one location, but simultaneously in twenty-one places... even if one area was quickly suppressed, as long as one spread, it would grow larger like a snowball, until finally, forming a mountain of snow, completely overwhelming their Desperate Great Wall.

"We can't stay and fight, we need to retreat quickly!"

Divine Flame held onto the charging Silicon Element and yelled, "Wing no. 22 is beyond saving, and these warriors are also beyond hope. We must immediately return to headquarters, activate the defense tower, and keep these Night Demons out... we must..."

Before he could finish speaking.

The signal receivers on their wrists suddenly made an excruciating sound.

Emitting an ominous red light.

Headquarters, has been invaded!

"Impossible, how can the Night Demons attack our headquarters so quickly... they have no reason, just a desire for slaughter, they'd run towards places with people, not towards our headquarters..."

"What if those entering our headquarters aren't Night Demons?"

Divine Flame was dumbfounded, his voice now filled with despair.

"You mean to say humans also took the opportunity to enter the Desperate Great Wall?"

Silicon Element sneered, "Impossible, are you crazy... are you saying these humans are collaborating with the Night Demons to infiltrate our Desperate Great Wall's domain? Absolutely impossible... even if one of these warships didn't have Night Demons and was full of humans, once they descended, they'd be in the midst of the Night Demons, who would then turn to attack them first!"

He shook his head and said, "You're not suggesting that these humans wouldn't be attacked by the Night Demons even if they appeared beside them... you might as well say the Night Demons are being raised by humans."

"Do you truly believe that's impossible?"

Silicon Element paused abruptly, shaking his head, "Impossible, absolutely impossible, otherwise why haven't they used the Night Demons to attack us all these years... you're not suggesting that our attacks have been no more than a scratch to them, that they're using our existence to shield external pressure, buying time for their own survival..."

His voice trailed off until he could speak no more.

Just like Divine Flame said...

Is it truly impossible?

In these past two years, have they not gained an inch of ground?

He was just afraid to believe it, because if it were true, it would mean that humans never regarded the Silicon Race and others as significant?

Are humans truly this terrifying?

"Hurry back, to the main control room..."

"Hurry back."

The two no longer concerned themselves with the warriors entangled in battle with the Night Demons; at this point, there was no more hope for these warriors.

But at headquarters, they still had more than half their forces.

As long as they returned, activated the defense tower, and ordered all warriors to defend from the high towers, keeping the Night Demons outside the defense...

At that time, they'd still have a chance to win.

But most importantly, they first needed to eliminate the rats that had infiltrated their headquarters.

The two of them fled into the distance with all their might, ignoring the cries for help from Wing no. 22 behind them.

Without a doubt, the intelligence from Yi Shiqi was a lie and a conspiracy from the start, and this Wing no. 22 had led everyone into a trap.

They hated him completely, so how could they possibly rescue him?

And at this time.

Under the leadership of Xu Lingjun, the Great Xia Empire's Qisha Legion, their elite warriors, already under the cover of the Night Demons, in Iron Blood Armor, had covertly infiltrated the headquarters of the Desperate Great Wall.

Chapter 699 Highest Authority_3

An impenetrable defense?

Just take out the Heavenly Mirror and gently shine it on those steel forts for a moment...

Immediately, it opens a circular door large enough for all of them to enter.

If there's an obstacle they can't overcome, directly use the Space Time Gun to remove those obstacles, whether dead or alive... As for where to move them, Xu Lingjun doesn't know, nor is he interested.

Even if they're moved to Blue Star, it doesn't matter.

You must know that now it's a full-scale attack.

The entire Blue Star is under the control of the Great Xia Empire, under global martial law...

These mysterious races of the heavens entering Blue Star will immediately be spied on and found by the newly developed Skynet system over these years, and by then, they still won't escape death!

But this still gave Xu Lingjun and his group the utmost convenience.

Everyone advanced straightforwardly...

Under Xiaoya's guidance, they quickly entered the central command room.

This was also where the mysterious races of the heavens usually discussed their military affairs...

Solemn, chilling.

Just thinking that the orders causing the deaths of countless warriors over these years were issued from here.

And now, humans have stepped in on behalf of Blue Star.

Everyone showed a moment of uncontrollable gratification and pride on their faces.

"Alright, if you want to be proud, wait until we've completely wiped out this group of mysterious races of the heavens."

Xu Lingjun showed up in the air.

Said, "For now, act according to the plan... Yi Shiqi..."

"Here."

Who else but Yi Shiqi could be following beside Xu Lingjun?

He came to the control panel and started operating it seriously, saying, "In their eyes, I'm already dead, so for a dead person, they certainly will not cancel my clearance... I can issue orders for all the warriors to leave the base and rescue the warriors on the outer lines!"

"Then hurry, or when the Silicon Element and the others return, we might just miss the best opportunity."

"Yes."

Yi Shiqi quickly typed away at the control panel, delightedly saying, "My clearance still exists, saving you quite a bit of trouble, Commander in Chief. Okay, the order has been issued."

How fast is the transmission of optic and electronic messages?

In less than a second, all the warriors in the entire base had the latest order message on their wristbands!

"The army is deeply stuck in a human plot, quickly go out to aid!"

Of course, the mysterious races of the heavens also knew that today was the day they besiege humanity... but they didn't expect humans to have a plot brewing? And those comrades are already stuck in a trap.

Especially since they couldn't reach their leaders at all now, it definitely meant something had happened.

Unfortunately, they didn't know that the neutron disrupter could directly interfere with their electronic communications.

The various major military leaders immediately moved.

"Assemble! All warriors gather in front of the Tower of Despair, we need to go aid our comrades!"

"Eradicating humanity is everyone's duty!"

"Five minutes, anyone late will face military discipline and execution on the spot!"

Under the most efficient organization, millions of troops gathered.

Under the guidance of the various military leaders, numerous armored vehicles and individual exoskeleton battle armor warriors dashed out of the base, rushing to where the many warriors had been previously ambushed.

Yi Shiqi said joyfully, "Now, I'm the person with the highest clearance in the entire base!"

"Hmm, you did well. This raid, you are the primary contributor."

Xu Lingjun laughed and said, "Now, transfer the highest clearance to me!"

"Yes!"

Yi Shiqi didn't resist, having witnessed Xu Lingjun's power firsthand, and now witnessing Xu Lingjun's evolution once again.

Being taught the cultivation technique by Xu Lingjun, he now understood... Following Xu Lingjun, he could have that faint chance of reaching the true pinnacle.

Even, controlling the Iron Wing Clan!

Chapter 700 Your Base? No, My Base

The army immediately rushed to the location where those people had previously set up the ambush...

Meanwhile.

On their way back, Gui Zheng and Divine Flame were shocked to find that their communicator could no longer connect to headquarters.

A highly complex stream of information had directly disrupted the frequency, turning their communication sensors into lifeless objects.

"Damn it, it's definitely another human conspiracy. These despicable Blue Star People are excessively cunning!"

The specially encrypted communicator couldn't connect to headquarters, especially after noticing humans infiltrating the headquarters.

Naturally, Gui Zheng and others couldn't help but overthink it and immediately linked it to that person.

Gui Zheng roared angrily, and more than anything, he felt a sense of shock and fear that even he couldn't believe.

The Iron Blood Silicon-based Army was already the most powerful army of the Silicon Race, and this army absolutely could not be easily mobilized unless it was a matter of life and death for the Silicon Race.

Previously, he had been played with harshly, and after finally getting a chance to counter ambush, he naturally disregarded everything and directly summoned this army...

Nearby, the Flame Race and Iron Wing Clan clearly did the same.

Especially the Iron Wing Clan, who dispatched many experts.

Even the top ten experts came, no less than five... The prowess of these individuals was all above humans in the Creation Realm when fighting alone, but now, such a powerful army that could annihilate Blue Star was being ravaged by those irrational Night Demons.

No matter how strong, facing a sea of tactics is simply impossible to resist.

Even now, it seems that even the remaining small portion of the army is being targeted.

"Quick, hurry back!"

"Something must have happened at the base."

The two rushed like two flashes of lightning towards the headquarters base, silently making up their minds... If things truly become impossible, then the last resort might be to abandon the invasion of Blue Star, directly activate the nuclear bombs buried here over the years, completely destroy this place, and perish together with the enemy!

And just when they were halfway there.

They faced the overwhelming army coming their way.

The formation, the ranks, and the symbols painted on the warships... weren't these all their troops?

And ahead, the opposite side clearly noticed the two leaders heading towards the base.

Immediately, a micro warship came flying over, and three figures leapt down from above.

These were the capable elites left by Gui Zheng to guard the Desperate Great Wall Headquarters and ensure its safety.

"My lord, in accordance with your order, we have come to reinforce you!"

The three approached, respectfully placed a hand on their chest, and knelt on one knee in respect.

"Re... reinforcement?"

Gui Zheng and Divine Flame were stunned.

Gui Zheng exclaimed, "Who ordered you to come as reinforcement?"

"What?"

This time, the three were stunned instead.

The leader, Gui Zheng, asked in wonder: "My lord, didn't you fall for the enemy's trick in the encirclement and get tricked by them?"

"Well... indeed, I did."

"That's why we received orders from you to reinforce my lord."

Received orders from them, to reinforce?

Divine Flame screamed: "Fooled, you've been fooled! It's a trick... dammit..."

Gui Zheng also realized.

No doubt...

To deal with Night Demons, only the pre-built barriers can be relied on for interception.

Otherwise, even powerful warships would find it hard to completely eliminate these Night Demons... In the end, exhaustion of energy is inevitable.

And now, it seems the enemy was unbelievably despicable. After humans infiltrated their base, they directly impersonated them to give orders...

There's no time to be shocked by how they managed it, as Gui Zheng and others could serve as the primary defense at headquarters; their intelligence can't be too poor, and deceiving them shouldn't be easy.

Gui Zheng shouted: "Quick, troops hurry back to headquarters. We were deceived; there is no Land of Light Death Warriors, only Night Demons. We set a trap but foolishly walked into their jaws, and the front army is about to collapse. We must return to headquarters immediately and erect the energy magnetic field wall, or else we may all be completely obliterated by the Night Demons."

"What?"

"You've been tricked into coming out, quick, let's go back! We'll explain the details on the way."

Both were exhausted from the frantic sprint.

Promptly, they boarded the micro warship...

Under Gui Zheng's command, the mighty army that had just emerged swiftly turned back towards the return path.

Like child's play.

And along the way...

Gui Zheng recounted their encounter to the reinforcements.

Listening to Gui Zheng's explanation, Gui Zheng expressed a hint of shock and exclaimed: "Humans infiltrated the headquarters? Why didn't we notice?"

"The enemy seems to have a way to jam electronic signals. Shortly after receiving an alert, we completely lost any perception of the headquarters' situation, and couldn't even contact you."

Gui Zheng angrily punched the wall and shouted: "Jamming electronics and signal sources, this time it's not just an act of desperation; they plan to retake the Desperate Great Wall in one swoop, intending to achieve everything in one move!"
