

Origin Powers 751

Chapter 751 Nationwide Evolution_3

Everyone nodded in agreement.

Indeed, if there's nationwide evolution...

The first essential step is to enhance the strength of the entire population.

"Then the only issue now is the Cultivation Technique."

Han Yun City looked at Xu Lingjun and said, "You mentioned earlier that these Cultivation Techniques have issues..."

"Redefining the Immortal Tao, do you think I've been wasting my time these past few years on entertainment?"

Xu Lingjun smiled lightly and said, "I've already thought of the Foundation Establishment Technique for the Immortal Tao. At that time, we'll directly promote it, indicating that these basic Cultivation Techniques will be included in textbooks... and to obtain higher-level Techniques, one would need to put in extra effort to earn Contribution Value, the same applies to Martial Tao."

"That's not a problem, but regarding the Cultivation Technique..."

"Rest assured, I'm very familiar with creating my own Cultivation Techniques. The reason I haven't presented them yet is that there's still a little detail to be perfected, but it won't take long."

Xu Lingjun thought to himself, the foundation has naturally been created by me.

Although with my current strength, truly deducing a Cultivation Technique isn't a difficult task, it is indeed very exhausting, so a rough version will suffice. By then, when everyone on Blue Star is aware of this Cultivation Technique's existence,

I will directly integrate the Talent Source into it.

How convenient is that?

In fact... three years might barely be enough for Xu Lingjun to create one Cultivation Technique, but he has forcibly pushed out numerous Techniques and Magic of the Immortal Tao... whether they are correct or not, let's not discuss it, just consider how fast it is.

It's naturally fast enough.

The Source Value accumulated over the years is meant for today.

Seeing Xu Lingjun's calm expression.

Everyone immediately understood that he couldn't possibly be boasting... he truly had created so many Cultivation Techniques.

At this point, one couldn't help but secretly marvel in their hearts.

"With this, the entire system of Blue Star can be considered completely shattered."

Han Xu Yang shook his head and said, "But in connecting with the Cosmos, we need to consider not only our own development but also how to respond to the outside world... such changes need to be made sooner or later, so in that case, let me be the one to make the change."

Xu Lingjun laughed and said, "Wise decision, Father."

"Nonsense, if I were wise, I wouldn't have made you the Crown Prince!"

Han Xu Yang glared at Xu Lingjun, annoyed, and said, "Tell me honestly, are you really waiting for Qing Yue to grow up? She's still a child... waiting for her will take at least a few more years... Qingxue is so beautiful, I just can't believe..."

Xu Lingjun helplessly explained, "This issue really isn't mine to decide, it's mainly because Qingxue's Martial Tao aptitude is truly poor. However, after the appearance of the Cultivation Technique, allowing Qingxue to cultivate the Immortal Tao Technique shouldn't be a problem."

"Let's hope so."

Han Xu Yang shook his head and said, "You've come up with so many ideas over the years to enhance our Blue Star, but it's not enough to just care for everyone, you must also take care of the family... the remaining matters aside from the Cultivation Technique, leave it to us. As for you, rest more... spend more time with family, understand?"

"I understand."

Xu Lingjun nodded.

Thinking that even if you asked me to step up next, I wouldn't be able to... I'm just a theorist, these ideas are basically cobbled together...

I'm really not capable of specific implementations.

But it's foreseeable...

When these changes are truly implemented, their options will increase.

If the Immortal Tao doesn't work, pursue Martial Tao, if Martial Tao doesn't work, study technology, and if technology doesn't work, learn other sub-skills.

So many options...

Blue Star, perhaps within a century, could achieve nationwide evolution.

This speed is definitely unmatched by any other civilization.

Chapter 752 It's Also Good for Farming

In the coming years.

The entire Blue Star ushered in unprecedented changes.

The most direct one...

Is probably the disappearance of the Moon above us.

It's said to be used to expand the territory of the Blue Star, and with the Moon's disappearance, the once desolate land of the Baoxue Empire has revived.

Although it's uninhabitable...

But the Blue Star People, or rather the Great Xia People, have an ingrained obsession with land.

Once they heard the Baoxue Empire was revitalized, they didn't really care about the Moon's disappearance anymore...

It's fine, as long as the land isn't lost.

Even if we can't live on the land of the Baoxue Empire, it's still good for farming.

In any case, the area is about the same, and in a sense, it's much more practical than the Moon.

Especially not long after.

An artificial moon soared into the cosmos, replacing the Moon... reflecting light, bringing radiance to the night.

It also replaced the Moon, calming the increasingly unstable tsunamis and volcanoes on Blue Star.

They felt even less concerned, instead indulging in a confident pride.

The surrounding planets could be utilized at will...

I heard many mysterious races of the heavens planned to cause trouble before, even forming an alliance, but now, all these alliances have joined a Mutual Aid Association established by Blue Star. In other words, aren't they seeking help from Blue Star?

This feeling...

Quite reminiscent of hundreds of years ago.

The Celestial Empire, where all nations came to pay homage.

Unexpectedly, arriving at another cosmos, such glory could still be achieved.

And in the time that followed.

The whole Blue Star underwent great transformation...

First, a body constitution testing system was added between cities.

It's said to be opened freely, specializing in testing people's body constitution. If one's constitution is outstanding enough, even from a young age, they can enjoy subsidies issued by the Empire.

And in schools, an additional Immortal Tao course was opened!

Separated from the Martial Tao District...

But as a new course, it could only be a minor subject.

Even the instructors, knowing only half of their textbook contents.

Basically, they explained the courses during the day, and at night, they stayed up late, trying to thoroughly understand the textbooks left by Xu Lingjun. Whenever they had any epiphany, they were overjoyed, feeling that the Commander in Chief was indeed incomparable to ordinary people.

The mystery of Immortal Tao, compared to Martial Tao, had an additional profound subtlety beyond words.

Indeed, it's something that can only be grasped intuitively, not articulated.

Currently, it's just laying the foundation. Truly looking forward to when these foundational things evolve into genuine cultivation techniques...

How wondrous will those techniques be?

And in this state of anticipation from tens of thousands of people...

Xu Lingjun had some remarkable gains.

[Detected pseudo-cultivation technique "Qisha Sword Technique", do you want to grant it true origin?
Requires 2888 Source Value!]

[Detected pseudo-cultivation technique "Tai Chi Xuanqing Dao", do you want to grant it true origin?
Requires 3222 Source Value!]

[Detected pseudo-cultivation technique "Qingyuan Sword Technique", do you want to grant it true
origin? Requires 3000 Source Value!]

.....

Over the years, he had created techniques strikingly similar to the orthodox cultivation techniques of his
previous life with his current understanding.

Only limited by time, and since it was merely a rough creation, there were indeed many unreasonable
aspects.

But now, it seems his strength and perspective are already quite high... merely a rough creation, and it
reached the level of being called pseudo.

Apparently, there is some rationale to these techniques at the very least.

Xu Lingjun unhesitatingly granted the cultivation techniques their true origin.

The few recorded techniques in his hand had a gleam circulating, seemingly without significant
changes... but on flipping through, the issues within them, in his view, had greatly differed.

Su Xun opened and read through the techniques one by one.

With just one reading, he memorized these cultivation techniques, which were improved to near
perfection after being endowed with origin, into his heart.

In the subsequent period, he did not leave the study again... instead, seriously simplifying these
techniques.

After all, whether it's Tai Chi Xuanqing Dao or Qingyuan Sword Technique, they both require high qualifications and comprehension, not something everyone can cultivate.

And a Level 3 Civilization must be an overall enhancement, so even if it's just strengthening individual abilities, giving them a certain self-preservation capability is enough, and even if one's constitution or comprehension is lacking, cultivating basic techniques can extend life, and strengthen genes.

It can also subtly enhance.

Moreover, complete techniques cannot be directly taught, and although most of the surrounding mysterious races of the heavens have become alliance members...

It must be considered that techniques cannot be easily obtained by others, so the simplified version is used for building a healthy body and laying the foundation. If successful, one can then transition to cultivating the complete version...

At that time, having a certain understanding of the techniques and a foundation of self-defense can prevent the leakage of techniques to the greatest extent.

It took three full months.

The simplified and complete versions of these Immortal Tao Techniques were categorized and organized...

Then handed over to Yun Yi, whom he summoned.

And after that, the Martial Arts Techniques, which evidently also needed modification.

The path after Creation is wrong.

Fortunately, now Xu Lingjun has already found the correct path... this Creation is completely different from the former Creation.

Chapter 753 It's also good for farming_2

In a certain sense, Martial Tao should ultimately lead to the same destination as Immortal Tao.

Enter the Tao through martial arts.

When one's strength reaches a certain realm, one must communicate with heaven and earth through oneself... rather than isolating oneself.

As long as this point is grasped, the modifications in Martial Tao become much easier for Xu Lingjun.

Half a year later.

Two brand-new sets of textbooks, learning from each other yet completely different in system, were then compiled by Xu Lingjun.

There might still be many imperfections in the details, but the general direction was correct and ready for use... After all, when Han Yun City saw the Emperor Blood Heaven Slayer technique modified by Xu Lingjun, he lamented that... if he had practiced Xu Lingjun's modified cultivation technique back then, his current strength might have advanced even more.

If he had focused on Martial Tao initially, he might be even more powerful than he is today.

Thus, he chose to enter seclusion, planning to abandon his Immortal Taoist Technique and retrain in the Emperor Blood Heaven Slayer.

In a way, this also verified that Martial Tao is indeed not weaker than Immortal Tao...

At the very least, with Han Yun City's current insight, it's not likely to be wrong.

The entire Blue Star was mobilized.

Xu Lingjun and Wang Tiancheng collaborated to not merely strip a layer of skin from the various mysterious races of the heavens but even pulled a few tendons... The gains from this were not just scientific advancements.

More resources were planted in the suitable soil of Blue Star.

Especially the Secret Realm.

Currently, Xu Lingjun has long become the undisputed King of the Secret Realm, though even he was puzzled why the demon beasts had no objections when this title spread initially.

He is human, after all, and became their king. Is that really okay?

Lu Ye seemingly didn't mind in the slightest.

But this is an immensely good thing for Xu Lingjun, and even more so for Blue Star...

Although the Secret Realm belongs to Xu Lingjun, he did not let too many humans disturb its tranquility.

Apart from the necessary engineers mining the Spirit Stone, the Secret Realm still maintained its previous peace and harmony.

Moreover, as the storage place of Spirit Stone, where else could have more abundant Spiritual Qi?

These various unique plants from the mysterious races of the heavens possess distinctive medicinal properties and, if consumed, significantly aid in improving either Martial Tao or Immortal Tao.

What place is more suitable than the Secret Realm for cultivating these resources?

Xu Lingjun has planned to make the Secret Realm his back garden.

Thus, the spread of Immortal Tao has thoroughly laid a foundation.

And Han Xu Yang, worthy of being a wise ruler on the throne for many years, bringing prosperity to the Great Xia Empire, although Xu Lingjun had long made his decisions.

He did not recklessly announce all these decisions at once...

Instead, he proceeded in an orderly manner, step by step.

Governing a large country is like cooking a small dish, especially when it involves the entire nation...

Now, with the global population, which is even larger and more numerous, naturally, one cannot act hastily, but also definitely cannot act too quickly.

Han Xu Yang acted with great precision.

First, he used a Xuri High School at the foot of the Imperial Capital as a test point, making Immortal Tao the main course, and actively publicizing this news.

Half a year later, a high school martial exhibition competition was held.

High schools have generally been basic stages; what unexpected events could a martial exhibition produce?

Yet young people brimming with enthusiasm, indeed yearn to show off their valor in front of everyone.

Without a doubt.

This time...

Xuri High School won a complete victory.

Who could imagine that in high school, there would already be martial artists at the True Transformation stage?

And it wasn't just one, but a total of five appeared.

And there were also three Foundation Establishment students... supposedly equivalent to the True Transformation stage if converted to the Martial Tao realm.

In the same realm, they were slightly stronger than True Transformation cultivators.

What does it mean?

Know that during the Dragon Gate Examination, reaching the Qi Gathering Realm already practically guaranteed admission to the Four Great Martial Mansions.

But now, the emergence of True Transformation Martial Artists undoubtedly signifies that human Martial Tao civilization has taken a significant leap forward...

Know that even Xu Lingjun, the most renowned and powerful across the entire Blue Star now, was only at the Qi Gathering Realm during his Dragon Gate Examination.

The achievements of these individuals will undoubtedly surpass Xu Lingjun in the future...

And their accomplishments might involve a fair amount of manipulation, such as deliberate resource allocation?

But even so, with such an allocation...

There are too many wealthy and influential people genuinely interested in Martial Tao.

Can they not allocate their resources?

Why couldn't they reach this realm, yet Xuri High School produced eight all at once?

At this point, Han Xu Yang then naturally proposed the need for education reform.

However, given the numerous institutions, considering the lack of faculty and resources, it still needs to be gradually popularized from point to surface.

In this manner, all high schools immediately scrambled... for these lists, each employed all available forces they could muster.

In doing so, Han Xu Yang's initial intent to actively popularize ended up driving the high school leaders into a frenzy,

both Immortal Tao and Martial Tao have exhibited such amazing powers.

They couldn't help but be enthusiastic...

During this period, the thousands of mentors trained by Xu Lingjun were directly appointed to various high schools.

Chapter 754 It's Also Good for Farming_3

Over the past year or more.

Although there hasn't been formal cultivation of the Immortal Tao, those students, through the elective courses, are no longer completely ignorant about cultivation and have gained a fair understanding.

Entering the path is incredibly simple.

"If things continue like this, in at most ten years, our Blue Star will gain at least a thousand Grandmaster level experts, and fifty Creation Realm top experts!"

Han Yun City marveled, "In the past, Grandmasters were so noble that even in the royal capital, they didn't need to bow, but now they're truly a dime a dozen."

"These top forces don't represent much; having them is good, but without them, our Blue Star would be as impregnable as ever."

Xu Lingjun laughed and said, "What comforts me more is that our father emperor has already popularized the Cultivation Technique among the middle-aged and elderly. Nationwide cultivation, even if it fails, strengthens the body; robust genes will produce healthier offspring. In a different sense, this also constitutes a strong nation, doesn't it?"

Han Yun City worriedly said, "But this way, the consumption of Spiritual Qi is much greater. Although Blue Star's Spiritual Qi is abundant, I'm afraid it can't withstand such consumption. Our generation may be unaffected, but there could be a crisis of exhausting resources."

"This problem is no longer an issue. Now that the Night Demon guards our Three Great Iron Walls and the Nine Major Military Regions personnel are idle, I've sent them to nearby planets to search for suitable ones as backups."

Xu Lingjun smiled, "We have already mastered the method of producing Spirit Stones, and in our exchanges with external civilizations, they're also on the purchase list... By then, we can buy some from them. Cultivation should primarily use Spirit Stones and Spirit Liquid as a base, with the Spiritual Qi of heaven and earth as merely a supplement, thus minimizing the impact."

"Indeed, we can only plan for our descendants a thousand years ahead; anything further, let them worry about it."

Han Xu Yang looked at Xu Lingjun with fiery eyes and asked, "Interested in sparring?"

"Looking to get beaten again?"

"No, I've recently re-cultivated the Emperor Blood Heaven Slayer, breaking free from the confusion of the Inference Realm, or rather, now simultaneously residing in both the Inference Realm and Creation Realm. My strength is more than just doubled compared to before."

Han Yun City sneered lowly, "I feel if I want to beat you for once, now is the time."

"Regrettably, I don't think so."

Xu Lingjun smiled softly.

Is this considered strong?

These years, although he hadn't intentionally cultivated, his strength hadn't stagnated. Although still in the Divine Soul Realm, the reason he hasn't broken through is that he doesn't understand what the Mahayana Realm truly is.

Or perhaps, Mahayana is not a fixed Realm, but a state of all things becoming perfect, then it can be called Mahayana.

From this point of view, Xu Lingjun still has a long way to go to reach Mahayana.

But fortunately...

Much like Han Yun City's reluctance.

There's always someone chasing him from behind.

Making his cultivation path less lonely...

He has friends, lovers.

And now, even rivals...

The loneliness of standing atop, he has yet to taste.

"Come, today I'll show you what it means by 'there are always people more powerful than you', don't feel pressured then!"

"Why would I feel pressured? Having lost so many times, another loss wouldn't surprise me, but if I win... you would be humiliated... so if you think about it, you're the one who should feel pressured!"

The two walked out side by side.

Chapter 755 Hidden Motives

Time flies.

In the blink of an eye, another five years have passed.

And in these years... the development of Blue Star can almost be described as ever-changing, with a new change every day.

With the popularization of Immortal Tao.

Those who obtained Creation were not just the students of these few classes.

Xu Lingjun always remembered the standard of a Level 3 Civilization.

While technology reaches the pinnacle of a Level 2 Civilization, individual evolution is achieved, in other words, nationwide martial arts, nationwide cultivation.

Nationwide evolution!

The difficulty is great.

But in some sense, this is not too difficult for Blue Star.

The previous few exploitations almost stripped the powerful mysterious races of the heavens of everything but their last shorts... As long as the technology extracted from these exploitations can be fully absorbed, I believe that Blue Star's technological power could achieve a leap-forward growth.

As for Martial Tao, the problem is even less.

It should be known that any Martial Tao master, or Immortal Tao master, their children are very rarely considered worthless.

Evidently, while practicing Martial Tao and Immortal Tao,

their genes and bloodlines are also subtly strengthened, which may not seem obvious, but when they practice the same cultivation technique as their parents, it becomes apparent.

They are clearly born for these cultivation techniques.

As for producing a worthless child...

It would be an immense joy, for at such times, a worthless flow needs to be initiated.

Thus in some sense, nationwide martial arts and cultivation, giving birth to a worthless child may be tens of times more difficult than producing a genius!

Xu Lingjun believes, at most two generations.

Perhaps the race of Blue Star may still be called humans, but being born with extremely strong talents, ordinary people surpassing today's world champions would not be a difficult task.

This should also count as a form of nationwide evolution.

Thus, not only are students practicing Martial Tao and Immortal Tao cultivation techniques, but those long past their prime no longer partake in their beloved square dance and cycling.

Instead, everyone sits attentively in rooms, listening to the lecturers' teachings.

Practicing diligently every day...

The great battle has just ended.

No one on Blue Star does not long for power, especially knowing these cultivation techniques were created by Commander in Chief Xu, naturally, their will to train is greater.

For this reason.

Though only a mere five years.

Humanity has already advanced a whole level as a whole.

According to statistics, five years ago, the number of Profound Realm martial artists registered in the Great Xia Empire was around 90,000!

This is already an extremely astonishing number, which contains a lot of effort from Xu Lingjun, otherwise, this number might still be halved.

And now...

This number has reached an astounding 230,000, and the number of Grandmasters has exceeded ten thousand.

Blue Star has genuinely formed the most powerful team of Grandmasters, the Holy Hall Military Grandmaster of the Baoxue Empire, proud of its army of Holy Hall Grandmasters, is now utterly eclipsed in comparison to Blue Star's Grandmaster Force, seemingly as naïve as a three-year-old child.

As for the base of martial artists and cultivators, it is astonishingly large.

Already surpassing tens of millions.

Though not yet achieving nationwide cultivation, this is only because the elderly, too old to endure upheavals, have not all passed on, and those babbling children have not yet grown up.

And this... undoubtedly requires time.

In these five years.

Not only the development of Martial Tao and Immortal Tao, but many significant events also occurred.

For example...

Xu Lingjun finally ascended the throne as requested by everyone, becoming the rightful Master of the Blue Star.

And on the day of his ascension.

Many other civilizations, like the Bingshuang Civilization, Elemental Spirit Civilization, and other Level 2 Civilizations all came to congratulate.

Compared to ten years ago when Blue Star was almost at odds with the entire cosmos, Blue Star's situation has evidently improved much now... especially when facing these Level 2 Civilizations, Xu Lingjun was able to speak with them on equal terms, even subtly taking the initiative.

You should know, during these five years, Blue Star was not only focused on internal development.

Communication Star, in just ten years.

Has already become the most bustling and prosperous planet in the entire Milky Way Galaxy.

Products from various civilizations, and exchanged goods...

Under the management of Wang Tiancheng, its daily transaction amounts steadily rise, and then are evenly distributed among the planets according to their contribution.

Here, you can buy the most delicious food from Blue Star. In these past years, although there was no war, Blue Star almost conquered the entire Milky Way Galaxy with its culinary delights developed over thousands of years.

Each civilization has its unique specialties.

The most transparent crystal of the Bingshuang Civilization, just placing one in a room can keep it cool for several years... now, this thing has gradually replaced Blue Star's air conditioning.

Natural coolness is, of course, more pleasant than artificial cold air.

It also contributes to reducing atmospheric pollution.

The Elemental Spirit Civilization's small accessories that can calm and soothe, just wearing it can let even the most anxious person sleep well, so much so that sleeping pills barely have a market now.

The Hei Ming Civilization has a device that can capture post-mortem brainwaves, allowing people to see the souls of the deceased.

Though only for a short period, seeing the beloved who lingered in illness stand again is worth any cost.

The Xueyan Civilization's eye drops can even restore vision to the blind... as long as the eyes haven't suffered fatal damage.

Chapter 756 Ulterior Motives_2

This is not surprising. Their strength is concentrated in their eyes, so naturally, they pay extra attention to these things.

Nowadays, the Communication Star has become a true melting pot.

Here, you can see humans and Bingshuang People chatting and shopping together.

A human boy and a young Primordial Spirit Clan girl are holding hands, as if caught in the beauty of first love.

The exchanges and trade between each other have undoubtedly greatly promoted the development of various civilizations, which is much faster and more convenient than gaining wealth through war. All they need to do is maintain the peace of this planet.

With the Cosmic Pirates already annihilated, no one dares to target this planet.

And with Xu Lingjun's ascension.

The entire Blue Star celebrated with joy...

The happiest one is probably Han Qingyue.

The young girl is still not very old, around twelve or thirteen; marriage is obviously too early.

But it doesn't stop the young girl from having thoughts unique to girls...

Who wouldn't like a handsome, powerful, gentle husband?

Han Xu Yang once mentioned to her that if she wanted to marry Xu Lingjun, she would have to wait until after his ascension...

As an emperor, marrying two princesses is acceptable.

Otherwise, the name of the Han Clan would indeed be ridiculed.

The young girl now keeps calculating, when will Brother Xu marry me?

Especially after Han Qingxue gave birth to a daughter.

According to the promise, Xu Lingjun gave this child the surname Han... this can be seen as gratitude for Han Xu Yang's wisdom in appreciating his talent back then. If not for his concession, how could he possibly ascend to the position of Master of the Blue Star?

But this shocked Han Qingyue.

It must be noted that Han Xu Yang initially betrothed both sisters to Xu Lingjun because Xu Lingjun had a low impression of Han Qingxue. He feared Xu Lingjun would resist, so he included Han Qingyue as a package deal.

And now the two of them even have children.

Are they going to regret it?

Han Qingyue's heart is anxious, desperately trying various methods to quickly turn a done deal into reality...such as deliberately barging in when Xu Lingjun is bathing, or scheming to let Xu Lingjun break in while she's bathing.

Although she hasn't intended to consummate the relationship, at least she wants to first lose her innocence with him.

Unfortunately, Xu Lingjun hasn't slackened his cultivation over the years.

His cultivation has not waned in the slightest.

After reclaiming the Emperor Blood Heaven Slayer in Han Yun City, he once needed over a hundred moves to completely defeat Han Yun City.

But over the years, they have battled several times each year...

And Xu Lingjun has become more and more relaxed. Now, Han Yun City struggles to withstand even ten moves from Xu Lingjun.

How could Han Qingyue's little schemes deal with Xu Lingjun?

And as for Han Qingyue, Xu Lingjun has always held a mindset of going with the flow... By now, Xu Lingjun was already over thirty years old.

He had long passed the thrill-seeking thoughts.

Especially with so many lovely companions around him.

Although everyone has their own things to take care of, five years ago, after Zhong Yuebai became pregnant and gave birth to a daughter for Wang Tiancheng, Wang Qingya officially took over as the Pavilion Master of Zhanzheng Academy.

And Su Huanqing has become the highest lecturer at Zhanzheng Academy. In recent years, she has thoroughly researched the characteristics of several mysterious races of the heavens. She has even represented Blue Star several times to promote Blue Star's civilization in other civilizations.

To let them better understand Blue Star's history.

Li Jingjun immediately left her child with Li Pingting after weaning.

She went to the military and now has earned the title of Valkyrie. Although she is a woman, in terms of strength, she could easily rank in the top ten on Blue Star. Even when facing Han Yun City, she has enough strength to compete.

Just like Han Yun City has always been closely trailing behind Xu Lingjun, Han Yun City has never truly left Li Jingjun behind, even though they haven't actually fought each other.

Ji Roufeng has now become the Vice Alliance Leader of the Immortal Alliance, handling the daily affairs within the Immortal Alliance on behalf of Xu Lingjun every day.

As for Sun Lingli, after inheriting the Wind Fist Style, she became a professional lecturer in promoting martial Tao. Together with the entire Wind Fist Style, they have become the cornerstone of martial Tao promotion. The rapid spread of martial Tao can be credited to the Wind Fist Style.

Han Qingxue, while busy taking care of the child, also helps Xu Lingjun manage state affairs... Eventually, Han Xu Yang couldn't bear it.

He helped by taking the child.

Allowing her to focus on managing state affairs while he spent time playing with the child, which became suitable for retirement.

Everyone has their own things to be busy with.

Blue Star is developing rapidly... Under such circumstances, how does Xu Lingjun have the time to deal with a young girl's romantic thoughts?

In any case, if her thoughts remain unchanged after she reaches 14, he'll marry her.

This matter... just go with the flow.

And just as Blue Star was developing at a swift pace.

A piece of not-news news reached Xu Lingjun's ears.

Titan Civilization.

Once a Level 2 civilization in the Milky Way Galaxy, whose individual capabilities might have already evolved to a Level 3 civilization. Its planet couldn't bear the years of exploitation and pressure from the Titan Clan and finally shattered one day.

The Titan Civilization forever lost their homeland.

Becoming Cosmic Wanderers.

Without roots, there's no potential for continued growth... Once the closest to a Level 3 civilization, the Titan Clan has now completely disappeared from everyone's sight.

Upon hearing this news.

Crowley and others couldn't help but sigh in lament, thinking if they had made the wrong decision back then...

Perhaps now, the fate of the Titan Clan would serve as a cautionary tale for them.

But now, their civilization has already been reborn... There's no longer a fear of civilization extinction.

But due to their apprehension of Blue Star.

They offered no aid to the Titan Clan because of previous relations.

Knowing that Xu Lingjun was more petty than imagined—just because the Titans once attacked Blue Star under the employment of another civilization, he regarded them as enemies.

If they helped the Titan Clan...

Even the most powerful civilization among many now, the Bingshuang Civilization, have to admit... If ten years ago, they could still go head to head with the Blue Star.

Then now, in just ten short years.

The speed of Blue Star's progress exceeded their expectations. The gap between the two has widened, and even if war were to break out again...

Crowley had an almost instinctual feeling that even if all their civilizations united, they might not be a match for Blue Star.

Moreover, it's now likely impossible to unify them.

Knowing that over the years.

The Master of the Elemental Spirit Civilization, Jiuxin, visited Blue Star almost annually, for reasons that are almost self-evident.

If it came to a fight, deciding whom they would support is indeed quite debatable.

From this perspective, Blue Star's initial invitation for them to witness the rebirth of the Baoxue Empire wasn't out of fear but likely an opportunity to exploit them thoroughly.

Who would dare support the Titan Clan under such circumstances?

And in reality...

Blue Star is probably the only one that dispatched warships.

But they went to the destroyed Titan Civilization, not to rescue any remains but to thoroughly eradicate the Titan Civilization...

In a war of civilizations, there is no room for mercy.

From the countless attacks by the Titan Clan on Blue Star's Polar Star Battlefield, causing unknown numbers of innocent warriors to fall, there was never any chance for reconciliation between them.

Strike while they're down.

If you don't kill them off, why leave them to hatch babies?

This action further established Xu Lingjun's reputation for small-mindedness...

Causing Crowley and others to secretly feel relieved in their hearts, grateful they hadn't offended him back then, or else they might now not even know how they died.

Unfortunately...

The warships arrived with great momentum but found not a single troop.

The Titan Civilization had vanished.

Perished with their civilization?

That's impossible... Knowing destruction was inevitable, to collectively stay for civilization's burial, this simply does not match the ferocity of the Titan Clan.

"So, does that mean a civilization stepped in beforehand and secretly took the Titan Civilization? Was it out of a desire for the Titan Clan's strength to develop them as a clan, or were they simply targeting Blue Star?"

Xu Lingjun thought that it seems indeed someone within the Mutual Aid Association harbors ulterior motives.

The question is, which civilization exactly... It seems necessary to investigate carefully.

Chapter 757 Transformation

Regarding the matter of the Titan Clan, Xu Lingjun did not pay too much attention.

Even if the Titan Clan is currently at its peak, they don't need to worry about them anymore...

In a mere ten years, for other civilizations, they might not even have begun to start, but for the Blue Star, which took only a century to develop to this era, its pace of development is so rapid that, even with Xu Lingjun's extremely optimistic calculations...

This speed was still far beyond his imagination.

Now, the Blue Star, although only has ten years of accumulation, its overall strength has already taken the lead among all civilizations.

Why is it that despite Blue Star's rapid development, civilizations like the Bingshuang Civilization are still afraid to play tricks on them?

To put it simply, Blue Star has already become stronger than them.

And the speed of this strength...

Is totally a progress beyond their reach.

At this time, anyone who isn't foolish would not show any hostility towards Blue Star.

You must know.

Ten to one, Blue Star is almost destined to become the Level 3 Star System Civilization of the entire Milky Way Galaxy, and they will all become part of Blue Star's Clan in the near future.

Haven't you seen that now the Primordial Spirit Clan doesn't even have the intention to compete?

The Master of the Elemental Spirit Civilization, Jiuxin, is now almost frequently running to the harem of the Master of the Blue Star... and often asking people what "paper wife" means.

The intention is simply undisguised.

To be honest...

At this time, if someone is still willing to risk offending the Blue Star to shelter the Titan Civilization, if they really make such a move, then their intelligence may not be very high.

"There is no need to investigate this matter, as it is impossible to investigate anyway."

Xu Lingjun shook his head and said, "At present, although our strength has gradually pulled away from those civilizations, after all, both sides are still independent entities, and the difference in strength is not too large. In this situation, if the other party wants to hide from us, we can't find anything at all."

Li Jingjun has now tied her neat ponytail again, at Xu Lingjun's request.

With her slim shoulders, her hair falling loose and long, perhaps because she has had a child, she now has three parts less of firmness, and seven parts more of intellectual nature compared to before.

She stood in front of Xu Lingjun, and after hearing his words, she asked worriedly: "Are we just going to let it be?"

"Otherwise?"

Xu Lingjun sighed: "Blue Star's progress is faster than ours. I don't know what change will happen once we become a Level 3 civilization, maybe we will encounter new civilizations, stronger than the current Level 2 civilizations. At that time, even if we do nothing, if any Level 2 civilization has a rebellious heart, we don't even need to make a move; other civilizations will directly eliminate them!"

"Indeed, one's own strength is the real strength."

Li Jingjun smiled and said, "How can one be a thief for a thousand days but cannot guard against a thief for a thousand days? As Blue Star's strength is getting stronger and stronger, we just need to develop ourselves with peace of mind. Any enemy with hostility towards us will fall under our feet, naturally, we are not afraid of any bad intentions towards us..."

"Exactly, one's own strength."

Xu Lingjun stood up and smiled, "As long as we can become a Level 3 civilization, truly step out of this cosmos, by then, we will face more powerful enemies, compared to which, what is the mere Titan Clan?"

"Alright."

Li Jingjun nodded.

After finishing the main topic, she also became much more casual.

She walked over to Xu Lingjun and sat down beside him...

Taking Xu Lingjun's tea from the table, she took a sip and said, "Oh, I've already applied for a seven-day vacation and plan to return to Yuzhang City tomorrow."

"Oh? Going back tomorrow?"

"Ji Feng, the little girl, misses her mom and keeps pestering me to go back."

Li Jingjun paused and said, "Also, although my aunt pretends to be indifferent, in fact, she seems very concerned about whether you are going back this time."

"And you? Do you want me to go back?"

Li Jingjun was about to reply when she saw Xu Lingjun's mischievous smile.

Before she could answer, her cheeks turned red.

She glared at Xu Lingjun fiercely in embarrassment and said lowly: "Alright, alright, I'll do whatever you want. My aunt is taking care of our child every day, and you don't even think about rewarding her a bit. Yet you still bully her when you go back..."

"Isn't that already enough of a reward? I just went to stay with her and little Ji Feng for several days last month..."

"Yes, I heard, little Ji Feng has been clinging to you to sleep with you, and my aunt was very resentful."

Xu Lingjun immediately laughed, nodded, and said, "Okay, okay, let's go back together tomorrow then. Speaking of it, I do miss Pingting."

The couple whispered intimate words to each other...

Just like Xu Lingjun said before.

The Blue Star is already very powerful now, their pace of development is unstoppable, and if enemies have ideas about them?

Then just become so strong that all of the enemies' schemes can be crushed, and simply destroy all strong foes with overwhelming force...

For those ghosts and fiends, let them go if they can't be found out anyway.

And in fact, at this moment.

Within the Yalin Civilization.

Mo Luo received an emergency message from his subordinate and, after ensuring that none of his actions were discovered by the Blue Star, couldn't help but let out a sigh of relief.

A sense of surviving a disaster was unexpectedly born in his heart...

Chapter 758 Transformation_2

"Is Blue Star really that terrifying? Even if they find out about us, what's the big deal? As a fellow Level 2 Civilization, if they are truly strong enough, you should pull them down as quickly as possible to prevent your own civilization from losing freedom and becoming a clan of another civilization!"

Beside him.

The specially made giant chair still couldn't contain Quill's massive body.

He had a sullen face; seeing Mo Luo's timid demeanor, he no longer had the demeanor of a Master of Civilization.

With a sneer, he said, "Have you forgotten the inorganic civilization before? They were about to reach the threshold of a Level 3 Civilization, but in the end, they were dragged down by all of us working together, resulting in their destruction and extinction. With the prior example of the inorganic civilization, using the same method on Blue Star would work."

"Shut up, you. Blue Star is different from other civilizations. Besides, saving you this time means I've given the Titan Civilization a huge favor. Remember not to expose me, or else I will use all the power within my clan to ensure the Titan Civilization disappears from this cosmos. We will perish together."

Mo Luo let out a deep breath, with a hint of regret in his eyes, he sighed softly, "Blue Star is different. If we use the same method as we did with the inorganic civilization, we will be the ones who end up dying... You haven't been in close contact with them, you don't understand... you understand nothing, you money-brained fool..."

No one understands the power of Blue Star better than these Masters of Civilization.

Especially with the birth of the Communication Star, they had close contact with Blue Star... only then did they truly understand the terrifying depth of Blue Star.

Eliminate Blue Star?

Indeed, with the combined strength of all their Level 2 Civilizations, their absolute strength is certainly above Blue Star.

But if a real conflict breaks out between both sides... this battle will be long and drawn-out, lasting at least several decades.

And during these ten years, the speed of Blue Star's progress is something that all of them have witnessed.

If a great war really breaks out, it is likely that...

Initially, they may be on the losing side.

But while Blue Star fights and evolves, eventually, even before the war ends, Blue Star's absolute strength would already surpass all other civilizations, and then, with overwhelming force, they would destroy them completely.

Just thinking about such a battle is despairing.

They have long missed the best opportunity.

Thinking...

Mo Luo shook his head and said, "It's not possible, Blue Star is different from the inorganic civilizations. The same methods won't work on them and will only hasten our own doom... Haven't you noticed that when the inorganic civilization rose, the other Level 2 Civilizations united against them? But now, even Crowley doesn't dare to make any move against the rising Blue Star?"

No one who can become a Master of Civilization is a fool.

They all naturally understand, Blue Star's situation is already unstoppable, and they have missed the best opportunity.

"Rest assured, I won't tell anyone about how we obtained all the weapons for free from you when we initially moved against Blue Star and how we agreed to split the proceeds fifty-fifty afterward."

Quill sneered, "Look at you trembling; weren't you arrogantly claiming that you wanted ninety-nine percent of the land on Blue Star before?"

"Having thoughts of conquering Blue Star is the greatest regret of my life, and not acting against them directly is the thing I am most thankful for."

Mo Luo said seriously, "I will provide you with enough warships and supplies; these will be enough for you to find a temporary planet to reside on. In any case, do not approach Blue Star again. You know if you hadn't contacted me early and if I hadn't acted quickly, the Yalin and Titan Civilizations would have been completely wiped out by Blue Star's warships."

"Having lost a civilization, naturally, we have also lost the power to contend with Blue Star!"

Quill sneered, "But Xu Lingjun clearly had a way to save the Titan Planet, and yet he kicked us out of the scene, and you actually didn't care about us... If I hadn't threatened you with this, you would probably not have been willing to save us."

He continued, "But it doesn't matter anymore. Now the Titan Civilization no longer poses a threat to Blue Star, but there are certainly other entities in the cosmos that can threaten Blue Star. Rest assured, I won't betray you, because I still rely on you to gather many useful pieces of information for me. Let's leave it at that; tomorrow, I will lead my people away, and when I return, I will give these people on Blue Star a huge surprise."

"You seem to have an idea."

"But I can't tell you... who knows if you'll turn around and offer this information to Blue Star for merit and redemption?"

On Quill's seemingly rough and simple-minded face, a cunning smile emerged.

He stood up, patted the somewhat uncomfortable seat wedged into his rear, and turned to leave.

"Seeking your own death."

Watching Quill's figure fade away, Mo Luo couldn't help but let out a long breath, bitterly saying, "I hope he doesn't drag the Yalin Civilization into this mess, otherwise, I'll truly have no choice but to follow Blue Star's history and plead guilty to the Master of the Blue Star."

The demise of the Titan Civilization didn't cause much of a stir in the entire Milky Way Galaxy.

After all, the cosmos still exists without anyone, and planets continue to orbit without anyone... it's simply one destroyed planet; to the entire cosmos, aren't there thousands of such planets destroyed each day?

During the long period thereafter.

The focus of Xu Lingjun's thoughts was entirely on the growth of Martial Tao and Immortal Tao on Blue Star.

The first batch of students suitable for learning the complete Immortal Tao Technique had already been trained.

And they were personally instructed by Jun Qing, who served as Xu Lingjun's guard...

Jun Qing's cultivation had been stuck for a long time; the bottleneck seemed like a membrane thin yet unbreakable, forever obstructing her.

In the end, Xu Lingjun couldn't resist and, through the method of resonance, directly induced her body's resonance and then, with his vast experience, forcibly tore through the membrane hindering her progress.

There was no choice since her body had an ailment, reaching this realm was already her limit.

If Xu Lingjun hadn't intervened, she might have been stuck at the Profound Realm for her entire life, unable to advance.

Though theoretically, Xu Lingjun did nothing inappropriate during the process.

But just holding her hand could make her heart race, her body shiver... undoubtedly too stimulating for an inexperienced young girl.

Anyway, since then, Jun Qing found it very challenging to face Xu Lingjun calmly, always sneaking off alone to a corner with a rosy face, lost in her thoughts.

Finally, she was given a job assignment to send her out.

It was also to avoid distraction.

In the blink of an eye, another three years have passed...

During these years, many significant events took place.

For instance... the Secret Realm officially became the fourth major force on Blue Star.

Although Xu Lingjun was always revered as the King of the Secret Realm, in fact, those truly knowledgeable were aware that the real leader of the Secret Realm was Lu Ye, the elder sister of everyone.

Even Xu Lingjun held considerable respect for her, as it's by no means ordinary for someone to transfer all authority to an outsider without hesitation.

This decision is not something ordinary people can make...

Back then, Xu Lingjun successfully established the Great Xia Empire as the Supreme and only ruler of Blue Star, no doubt due in large part to the Secret Realm's contributions.

Trying to explain these efforts with the absurd claim that any woman would inevitably help you, Old Xu, is just nonsense?

For saying such nonsense, Guo Zheng received a good beating from Xu Lingjun... Of course, mainly because no matter how outrageous Xu Lingjun becomes, he doesn't think he'd fall for a tree.

During these three years.

The major news is probably that the Secret Realm was returned under Lu Ye's leadership.

For one thing...

Xu Lingjun needed to focus on evolving the entire Blue Star, leaving him no time to manage the Secret Realm.

And for another, perhaps because...

Lu Ye, after cultivating Blue Star's cultivation technique for many years, finally succeeded in transformation.

With a physical body, everything became much more convenient.

As for the transformation completely aligning with Xu Lingjun's aesthetic preferences...

Xu Lingjun naturally didn't believe it, suspecting Xiaoya of spouting nonsense, trying to fool him?

Chapter 759 We Are Back

"You really can bear to do it?"

At this moment, in Xu Lingjun's office.

A girl in a water-green light dress, looking quite charming and delightful, was sitting on his desk, swinging her slender legs, leisurely fiddling with the pen holder on the table.

She looked at Xu Lingjun in surprise and asked, "You know, Blue Star now is not the Blue Star of the past... Back then, it didn't matter if there were multiple Kings of the Secret Realm as Blue Star wasn't unified yet. But now, if you give the Secret Realm back to me and we're not on the same page, Blue Star will split again."

"In their eyes, isn't Blue Star already fragmented now?"

Xu Lingjun seemed indifferent, saying, "Besides, I'm really too busy to handle it now. If I were to manage the Secret Realm, I'd lose my mind... so I'll temporarily leave it to you."

Lu'Er frowned, "I feel like you're plotting something bad."

"Even if I'm plotting, someone has to have ill intentions towards us first... If no one targets us, no matter how much mischief I'm up to, I can't shove it down anyone's throat."

"True, as long as you don't shove it down my throat."

Lu'Er jumped off the desk, saying, "Don't worry, I'll manage the Secret Realm meticulously. The engineering soldiers you've sent to mine Spirit Stones, I'll protect them well. The Spirit Stones due to you, aside from our basic needs, the excess will be given to you. But in return, I want all the Cultivation Techniques you created over the years."

She earnestly said, "According to you, when Blue Star reaches a point where everyone is a soldier and technological power attains a certain level, Blue Star will rise to a Level 3 Civilization. Regardless of whether you reach Level 3 or 4 in the future, there must be a place for us Demon Beasts on Blue Star!"

"You've got a share ready for you."

Xu Lingjun handed over a booklet with a smile and said, "Rest assured, whatever I do, I'll include you. Don't forget, you are the real natives of Blue Star, more than us, who are just outsiders in this Cosmos. In this sense, all humans owe you Demon Beasts a debt of gratitude."

"Glad you know that."

Lu'Er took the booklet from Xu Lingjun's hand.

The Cultivation Techniques Xu Lingjun had taught before, although not weak in power, were very difficult, and besides the strongest group of Demon Beasts, almost ninety percent couldn't reach that level.

But now, while these techniques might be slightly inferior in absolute power, their gradual approach makes them more suitable for dissemination among Demon Beasts.

"I'll help you manage the Demon Beasts well, including Daxiong and Pang Hu, they'll be well-taken care of, you can rest assured."

She looked deeply at Xu Lingjun and said, "You won't let me down, and I will never let you down either."

"Thanks for the hard work."

"Then, I'm leaving."

"Take care."

"I... I'm really leaving now..."

Xu Lingjun watched Lu'Er, who intended to leave but didn't take a single step...

After a moment's hesitation, he asked, "Why not... stay for a meal?"

"Alright, since you insist, I won't be polite."

Lu'Er unhesitatingly sat back down and said, "Just that recently, since transforming into human form, I've been through so much with you that I haven't had time to properly see the human world. After the meal, accompany me shopping, and help me buy some clothes. Now that I've transformed, I can't keep wearing these leaf-conjured clothes, can I?"

She slightly grumbled, tugging at her clothes, "You know these leaves are part of my true form. Wearing these is no different than being naked; letting a girl bare herself in front of you, Xu Lingjun, you've gone bad."

Xu Lingjun: "....."

"Okay... okay, after the meal, I'll have Sister Yaya go with you to pick out some fitting clothes."

"Didn't I say I want you to accompany me? What, am I so ugly, such a disgrace? Or has your reputation spread across Blue Star so much that even walking beside a woman will lead to misunderstandings?"

"I'm just worried the inner... garments won't fit?"

"There's nothing inappropriate; after all, you're the one I spend the most time with, so I still want your opinion. Besides, skin showing is just superficial. Didn't I basically not wear clothes while we communicated before... you should be used to it by now..."

Xu Lingjun suddenly felt that the Lu'Er in front of him seemed completely different since transforming.

If he had to say, this clingy attitude resembles Xiaoya's style a bit.

Little did he know, at this moment, Lu'Er was silently recalling Xiaoya's teachings.

"The master is someone who stands still if pulled, but retreats if pushed... if you expect him to take the initiative, you might as well wait to turn into a widow's firewall. Approach him head-on, assertively, and boldly show your charm before him. Just look at master's confidantes, Wang Qingya and Su Huanqing are all like sisters, Ji Roufeng is actually two years older than master, Han Qingxue is a friend's sister, and only Sun Lingli and Li Jingjun are about the same age, which was a result of long-term relationship development."

Chapter 760 We Are Back_2

"From this, can we conclude that the Master is the type who's fond of elder sisters? Plus, he's emotionally passive. If you're also passive, then you two shy lads won't get anywhere."

Lu'Er isn't foolish, and precisely because she's not foolish, she realizes Xiaoya makes a lot of sense.

Besides, she has an advantage... Xu Lingjun has a fondness for elder sisters?

At my age, I could be not only his elder sister but even his great-grandmother!

Lu'Er is filled with determination.

She had made an agreement with Xiaoya, who helped her refine into a human form. Although it's somewhat challenging for an AI to transform into a human, if even a tree can become human, then it seems AI can too?

And in return, she would help Xiaoya sleep with her Master... mutual assistance.

Watching Xu Lingjun reluctantly agree.

Her heart shouted that the plan succeeded... indeed, one has to be proactive with this man, take some initiative!

Happily, she follows Xu Lingjun, continuing with her grand plan.

In the blink of an eye.

Several years have passed.

Over these years, Blue Star has continued to develop, without hitting a bottleneck after reaching a certain height in technology or martial skills within the Immortal Tao.

It has maintained rapid progress all along.

Two years ago, the first batch of students systematically involved in the Immortal Tao and cultivating the new Martial Tao graduated from the Immortal Alliance and Immortal Martial College.

After several years of accumulation.

Blue Star finally welcomed an explosive growth...

A surge in overall strength...

Nowadays, even the elder retired ladies on the square can perform a sleek Sword Skill and even spar a few moves.

Adult males have significantly improved in physique, with rumors that they can run the 100m in nine meters per second on average...

Also due to this, rumors have it that marital relationships are more harmonious.

As a result, not only do women persist in cultivating techniques themselves, even if they don't achieve anything noteworthy, just for beauty and ageless appearance, they flock towards it.

They even urge their husbands to cultivate... if you don't cultivate, you can't get in bed. But once they do, the women don't need to get out of bed.

Who would have thought that it's cultivation, not its competitors, that would take down potency medicines and cosmetics?

The overall strength exudes a flourishing Blue Star, where people walk the streets brimmed with confident expressions.

Grandmaster Level masters?

Once treated with honor anywhere in the Three Great Empires, now they're almost commonplace.

The ultimate development of Immortal Tao and Martial Tao has brought Blue Star a rapid and explosive growth...

Especially since Xu Lingjun knows that a premature environment cannot produce perfect flowers.

Therefore, he reorganized the nine major military corps.

Then, assembled these masters into an army to venture out into the cosmos for conquests... naturally targeting those planet civilizations that once dared to attack Blue Star, now struggling to survive.

Xu Lingjun was always a petty person.

After they laid hands on Blue Star, how could he simply drive them out of the Mutual Aid Association?

Those who kill will themselves be killed... when you attacked my Blue Star, many heroic spirit warriors died because of you. Making you pay a thousandfold isn't excessive, is it?

And so.

This batch of very novice warriors set out with veteran soldiers to wage battles among the mysterious races of the heavens surrounding the Milky Way Galaxy.

The results shocked all the heavenly civilizations.

Who could imagine a fleet of fewer than one hundred thousand people?

Ending up wiping out over ten civilizations, with individual combat power averaging at the Grandmaster Realm!

Moreover, with the presence of Coexisting Demon Beasts beside these warriors, they could exhibit multiplied strength.

What a terrifying army.

A full three years of war.

Casualties exceeded twenty percent.

But when these warriors returned, they not only shocked all the heavens' civilizations but also established Blue Star's distinctive quality of seeking vengeance, discouraging anyone from harboring malicious intent towards Blue Star.

Through this exercise, Blue Star truly became the Galaxy's indisputable NO.1.

Truly building a reputation that no one dares to provoke.

From this, the entire Blue Star is naturally more invigorated... subsequently...

Troops continuously bolstered.

The overall strength of Blue Star has become even more formidable.

And now, in the Province of Light.

Tairuo has long given up on restoring the nation.

There's nothing he can do; in less than ten short years, the citizens of Province of Light only know Blue Star and not the Land of Light anymore.

Their only impression of the Land of Light is the Light Giant Race appearing to save them, bringing a new world where they could live more happily.

Indiscriminate treatment, plus cultural integration.

Within ten years, except for Tairuo and some conservative figures, everyone is proud to be Blue Star People.

What nation restoration?

Tairuo also had no choice but to give up reluctantly, accepting the reality of being the last Monarch of the Empire of Light.

By now, Blue Star internally truly became a united whole.

Everything is flourishing.

Including the entire Milky Way Galaxy, everyone has accepted this fact!

Blue Star is destined to be the Galaxy's first Level 3 Civilization.

Though not yet a Level 3 Civilization, all civilizations have already tacitly accepted it.

With no competition whatsoever... on this point alone, no matter how vast the cosmos is, there's only one Blue Star.

There's no way around it; Blue Star's advancement is just too swift and terrifying, to the extent that they dare not muster up the courage to contend!

Especially with these years of Blue Star waging wars against various civilizations.

That vengeful attitude...

They truly fear that a mere slight would be seen as provoking Blue Star, leaving them with nowhere to cry should a massive army press against them.

No one is foolish; all can see that Blue Star is purposely honing their military, and they're even worried about having too few enemies. Provoking them now would only be feeding them.

Therefore, even the most arrogant Xueyan Civilization, Sass sternly instructed his subordinates not to easily provoke these Blue Star People; any conflict on the Communication Star must be resolved peacefully!

Blue Star has a saying: 'Conquer with virtue.' Even though Blue Star People don't comply, we'll adhere to it, shaming these Blue Star folk.

Everything is developing in a positive direction...

And at this moment, however, no one knows.

A fleet group left the Milky Way Galaxy after years of wandering and escaping.

Finally embarking on their homecoming after many years.

Although this return journey is likely not of their own choice...

Titan Civilization.

After years of wandering, despite the cries for revenge, Quill knows that without their planet, they've forever lost their capability to challenge Blue Star.

The so-called angry howls are just the impotent yowls of defeated dogs.

Yet now, they're forced to return to this heartbreaking place, the Milky Way Galaxy...

Over a hundred warships.

The ship cabins bear the signs of battle all around, previously numbering in the millions; the Titan Civilization has suffered heavy casualties, with almost thirty percent of Titan Race being slaughtered.

Escaping thousands of light-years away, yet ultimately unable to escape Blue Star's pursuit... although it was another force that massacred them.

"Is this Blue Star?"

Within the main ship's cabin.

A tall, robust man dotted with steel needle-like hair on his face, gazes intently at the water-blue planet ahead.

His eyes reveal a slight fascination...

Murmuring: "Unexpected, the Blue Star that was supposed to be destroyed not only survived but has developed so well. It's more beautiful than when I left... indeed, I shouldn't have left."

Only after losing it do you realize how important home is.

Originally thought Blue Star was doomed to destruction.

Thus they chose to leave; used to leaving Blue Star often, initially they didn't feel much about it.

Yet now, unable to return, they finally realize what it means.

Without a home.

They no longer have roots, doomed to drift aimlessly and roam...

With even the greatest power, they can never integrate into other civilizations.

And now, after a century of wandering, a century of loneliness...

They have returned.

To reclaim their homeland.
