

## **Origin Powers 771**

Chapter 771 I Am an Ape, Not a Monkey, You Can't Mess with Me Like This

So, everything that I thought was under my control was actually just a trap to capture me?

Xiong Zhen's heart was filled with grief and anger, utterly indescribable...

Who could have imagined that going home would lead to him voluntarily walking into an ambush set against him.

There was no room for luck.

If this Lu Ye considered him an enemy, then perhaps all the Demon Beasts in the entire Secret Realm would also see him as an enemy.

No matter how strong he was, in the face of countless Demon Beasts, it would likely be a certain death scenario.

Especially since there was an endless army besieging outside...

"I want your life!"

Xiong Zhen glared furiously at Lu Ye, there was no doubt she was the main perpetrator that led him to this downfall.

It was this woman who, while outwardly smiling, claimed she couldn't endure the oppression and wanton abuse of the Master of the Blue Star, yet had to concede for the Secret Realm's legacy.

Secretly, she had long been in cahoots with the Master of the Blue Star, quietly setting up the trap, just waiting for him to step into it.

At this moment, most of Xiong Zhen's anger and hatred were directed towards Lu Ye.

Leaping up...

While in mid-air, his body expanded dramatically, transforming into a Giant Ape covered in pitch-black long fur, lunging towards Lu Ye!

But just as he reached halfway.

He suddenly veered, charging at Xu Lingjun, for it was clear that although the other party had set up an inescapable trap around him.

As long as he could capture Xu Lingjun alive, he might still have a chance to turn the tables... this was his only opportunity left to do so.

No matter how furious, he could still differentiate between matters of urgency and importance.

Unfortunately, Xu Lingjun now in Unity of Spirit and Soul, under his Spiritual Sense, could clearly perceive the flow of power within Xiong Zhen's body.

This was a power different from Spiritual Power, True Power, and True Qi.

But in terms of quality, it was hardly inferior to his Spiritual Power... the Blue Star of the past was indeed powerful!

The sheer strength had developed to such an extent.

The so-called sneak attack naturally didn't panic Xu Lingjun at all; he gently pushed aside Lu Ye and said in a low voice, "Leave this person to me."

It was just the right time to probe from him how prosperous the Demon Beast civilization had been back then.

Clenching his fist.

Once again collided with Xiong Zhen, who was attacking with full force...

Xiong Zhen's black haired long face turned pale, his joints creaked, startling his heart... indeed, it wasn't an illusion earlier, this kid's power is even stronger than mine!

But fighting isn't just about who has more strength; it's about whose bones are harder, who's tougher skinned.

When both parties are the same type of strong fighters, then defense might just be the key to victory, and in this, he had absolute confidence.

The next moment...

Their fists missed each other, crashing into each other's punches.

With a resounding bang, the Secret Realm's great hall shuddered and trembled, the ceiling loosening waves of fine sand that trickled down.

Both figures were smashed away like cannonballs, each creating a deep pit... then they crashed into each other again at an even faster speed.

"Bring it on, hahaha, exhilarating, exhilarating!!!"

Ever since his cultivation reached the Divine Soul Realm, Xu Lingjun had never been so thoroughly engaged.

Powerful, terrifying Demonic Power surged into his body through the opponent's fist... oh, how long had it been since he felt so full to bursting.

Bang! Bang! Bang!

An unceasing bombardment of blows...

Both abandoned all defense, determined to triumph through strength.

Especially Xiong Zhen, who had absolute confidence in his defense... that body could withstand cosmic radiation, could a mere weak human match it?

"Come again!"

The two figures charged at each other nearly reckless and forgetting life and death.

Xiaoyun approached Lu Ye, whispering, "Big sister, should we get involved?"

Lu Ye shook her head, "There's no need."

"But this Xiong Zhen is a Level 12 Demon Beast..."

Lu Ye quietly explained, "Can't you see? While Xiong Zhen's power may be strong, Xu Lingjun can redirect and use that power for himself; the longer they fight, the more his advantage grows. Xu Lingjun will definitely win this battle!"

Lu Ye even somewhat suspected that though both sides seemed well-matched.

The strength of Xu Lingjun had never solely been in his power; rather, it was his array of endlessly surprising and terrifying techniques, yet now he hadn't used any of them at all.

Perhaps he was merely excited from seeing such a formidable foe.

In Xiong Zhen's eyes, however, it seemed the battle's outcome was clearly about to be decided in his favor.

Even though both sides were still evenly matched, the opponent was now flushed, breathing heavily, as if on the verge of exploding.

Clearly, he had reached his limit...

"Surrender obediently, I might spare your life and only take Lu Ye's!"

Xiong Zhen roared once more, his hands locked firmly, coming down with a powerful hammer blow on Xu Lingjun's shoulder. The ground at Xu Lingjun's feet immediately sank and collapsed, their battleground split into a massive crater.

Xu Lingjun's face flushed to an unbearable red before he exhaled a long breath... although uninjured, he was indeed at his limit.

"Is that all?"

He asked with a cold smile.

"I just like how stubbornly brave you are."

Chapter 772 I Am an Ape, Not a Monkey, You Can't Mess with Me Like This

Xiong Zhen gained the upper hand, laughing wildly as he landed consecutive punches on Xu Lingjun's chest... Both sides were exchanging blows, completely abandoning all defense.

This was a test of willpower.

Xiong Zhen had a vague realization in his heart that at this stage, the fight was no longer about the strength between the two but their tenacity and fighting spirit!

The strong-willed will prevail!

And Xiong Zhen, who had lived on Blue Star for thousands of years and was forced to leave his homeland... battling with him was undoubtedly a path to self-destruction!

With this thought, his previously dwindling demonic power surged once more, charging forward to entangle with Xu Lingjun.

Win... I will win!

Even though the enemy laid a trap as vast as the sky and earth, as long as I can seize Xu Lingjun, I can still turn the tables.

This time, I will turn defeat into victory.

In a surge of excitement, Xiong Zhen even ignored how much faster his demonic power was depleting compared to usual fights—several times faster at that.

It had only been less than half an hour, yet he already felt exhausted...

But in his view, consuming a bit more energy to defeat such a formidable foe seemed entirely justifiable...?

??????

An incomparably terrifying force, like Mount Tai pressing down, left Xiong Zhen completely bewildered, without a shred of will to resist.

His huge ape body was blasted out like a cannonball, hitting the ground, rolling over tens of times. From the point of impact, a nearly tearing pain made him feel as if his whole being was about to shatter.

Xiong Zhen confusedly pulled his head out from the ground, lifting it with a still bewildered expression on his face.

He was utterly baffled...

He was clearly the one with the absolute advantage, so why did the opponent's power suddenly become so strong?

"Is that all?"

Xu Lingjun asked, his eyes not even open, his face flushed, letting out a few deep breaths.

The powerful demonic power was entrenched within him, with each punch Xiong Zhen threw, most of the demonic power was forcibly retained within... he had endured thousands upon thousands of punches by now?

Especially since the purity of the demonic power was not inferior to his own spiritual power.

Clearly, the spiritual power he cultivated was essentially merging martial arts with the path, unifying Immortal Martial Unity power.

While the demonic power came from a Demon Beast's essence.

Demons and Immortal Gods inherently opposed each other, hard to distinguish who was superior.

For Xu Lingjun, so much demonic power assimilating with his spiritual power was an advancement even greater than years of diligent training.

Han Yun City was too shrewd, knowing since that Xu Lingjun could turn enemy force to his advantage, unless there was a significant breakthrough in power, they would never challenge him, and even if they did, it was merely to probe, retreating instantly if outmatched without entanglement.

Because of this, Xu Lingjun hadn't had such an encounter for years.

The immense demonic power quickly converged with his endless spiritual power, turning into a monstrous torrent, impacting his Divine Soul.

The bottleneck that hadn't shifted for years now...

Finally, with Xiong Zhen's help, shattered completely.

Xu Lingjun opened his eyes, a sharp glint bursting forth. At that moment... not only Xiong Zhen, even Lu Ye, who was not an enemy, couldn't help but be deeply startled, feeling a desire to kneel.

Beside him, Xiaoyun already found it hard to resist the almost soul-crushing pressure, falling to her knees, yet her eyes were full of admiration, his dominance did not even require an action to make her kneel.

This strength was probably more than tenfold stronger than hers.

Divine Soul Middle Realm.

A realm he expected to take years to reach, now easily attained with this fight against Xiong Zhen.

Xu Lingjun exhaled a long breath and calmly said, "Xiong Zhen, is it? You've helped me greatly, rest assured, I'll grant you a swift end."

Xiong Zhen stared in shock at the overwhelming aura around Xu Lingjun, so strong it even made him feel alarmed... then, that aura gradually receded.

Clearly, just now, he had leveraged their battle to elevate his strength another tier.

"You were... just pretending?!"

At this point, how could Xiong Zhen not understand what had happened?

The opponent had been toying with him, even deliberately using his attacks to break through his current bottleneck.

His disdain was not just evident in words but clearly shown in action.

"Hmph, fool."

In the distance...

The observing Han Yun City sneered; with just a few sparring sessions with Xu Lingjun, he had sharply perceived the issue.

This fool had fought for so long, yet still thought he had the upper hand; such a brain... no wonder he had fallen to this point.

"I'll kill you!!!"

Xiong Zhen roared in anger, a powerful sense of humiliation momentarily overtaking all reasoning.

He... Xiong Zhen, was an ape!

And now, someone had played him like a monkey.

Disregarding the implications of being toyed with, Xiong Zhen had already lost all reason, leaping, his body swelling again, charging crazily at Xu Lingjun.

Then he flew back even faster.

One side was like the midday sun, strength greatly increased, while the other was fraught with injury and exhaustion, nearly at his limits.

Once Xu Lingjun got serious, Xiong Zhen had no longer any chance...

Bang~~~!!!

With a loud crash, Xiong Zhen was directly stomped into the ground by Xu Lingjun.

Chapter 773 I Am an Ape, Not a Monkey. You Can't Treat Me Like This\_3

Raised his hand, blocking his desperate counterattack.

The palm technique slightly pressed down, followed by a crisp crack.

Xiong Zhen's right arm had been forcibly torn apart.

Xiong Zhen grunted, his ferocity undiminished; even with a broken arm, he used bone spurs as blades, determined to tear Xu Lingjun in half.

A flash of golden light.

Under the Sword of Oath and Victory.

Xiong Zhen's right arm was completely severed, and then the blade descended, piercing through his chest, pinning him firmly to the ground, unable to move.

Xu Lingjun said blandly, "I promised I'd grant you a swift end... so I won't torment you too much, but you killed 3,726 of my Blue Star warriors; for that alone, I absolutely won't spare your life!"

Xiong Zhen spat out a mouthful of bloody foam, which bounced back three feet in front of Xu Lingjun, staining his own face.

He sneered, "Do you think I'm the only one of the Demon clan? Before I came, I already communicated with all my kin, telling them Blue Star wasn't destroyed by the decline of Spiritual Qi... Blue Star is our home; you, thief, stole our home, and soon you'll return it. I'm going to die, you'll soon follow; I'll be waiting..."

"The Blue Star you abandoned no longer exists; no one waits forever at the same spot. You forsook Blue Star, and the current Blue Star is a fusion of two Blue Stars, half mine and half Lu Ye's, with no place for you anymore."

Xu Lingjun pressed his hand against Xiong Zhen's forehead.

Spiritual Power penetrated his body.

With a soft "poof" sound.

Xiong Zhen's massive head suddenly tilted backward, his eyes completely lost their luster, and in a single strike from Xu Lingjun, he was dead.

And as he died.

The body gradually transformed into a shimmering pure white.

An extremely pure Spiritual Qi slowly began to disperse from his corpse, spreading to the surroundings.

Soon, only the golden blade of the Sword of Oath and Victory remained lodged in the ground, and Xiong Zhen's body was already gone.

Lu Ye's face revealed a deep astonishment, exclaiming, "Such pure Spiritual Qi!"

Isn't it?

After Xiong Zhen's death, his body melted, turning into the purest Spiritual Qi, spreading out into the boundless surroundings.

This pure and essential Spiritual Qi surpassed any Spiritual Qi Xu Lingjun had ever encountered...

Even the Elixir crafted through refinement couldn't compare.

"Conservation of mass, take in as much as you expel... could Xiong Zhen have swallowed so much Spiritual Qi on Blue Star over the years, that upon his death, an equal amount would be released?"

Xu Lingjun exclaimed joyfully, "If that's the case, then we've truly hit the jackpot."

Consider why Blue Star withered back then.

Wasn't it because the Spiritual Qi consumption was too immense, and why was it so immense? Wasn't it because those Demon Beasts devoured so much... In a sense, these Demon Beasts were the true culprits behind Blue Star's destruction.

Who could imagine that upon their death, they'd still replenish Blue Star?

If that's the case...

"Has Xiong Zhen informed his kin about Blue Star's resurrection? If that's the case, can't we let the former Blue Star completely revive?!"

Xu Lingjun shook his head and sighed, "Xiong Zhen truly was a good man, not only sacrificing himself for Blue Star's sake but also summoning all his kin. Lu Ye, you don't mind if I kill your fellow kin, do you?"

Lu Ye rolled her eyes.

Her gaze fell on the spot where Xiong Zhen had just been lying.

There, a black box stood conspicuously.

She reached out to pick it up and looked at Xu Lingjun.

Xu Lingjun took it, studied it closely for a moment, then sighed lightly, "Xiong Zhen has truly done me a great favor this time. Perhaps this is the opportunity for our Blue Star to advance to a Level 3 Civilization."

Chapter 774 I am here to receive our supplies

A silent cosmos.

A realm of deathly stillness and bewilderment.

Yet, in this chaotic and unbounded asteroid field, who could imagine... over a hundred warships have been concealed here for quite some time now?

This period hasn't been particularly long, just over ten days, but these days felt longer than the past decades.

Although confident... relying on his own intelligence, he was absolutely sure of gaining the greatest benefits and advantages in this chaotic battle.

But since things haven't settled, there's always the potential for changes.

As a wise person, even with absolute certainty, three parts of caution and unease must be maintained, only then can possible unexpected incidents be anticipated.

But impulsiveness is out of the question; waiting for an opportunity that might arrive at any moment.

During this period, Quill often felt his thoughts becoming increasingly clear, and even memories from his early childhood, long forgotten, began to flash through his mind like a slideshow.

Going round and round... in cycles...

Making him secretly pleased, undoubtedly due to overusing his brain, developing it more powerfully than before.

And after patiently waiting for more than ten days.

This morning.

Another sleepless night.

As dawn just broke...

The entire warship was suddenly enveloped in rapidly flashing red light.

Accompanied by a piercing alarm sound.

Quill, who was having a meal, sat up straight abruptly, looking at his assistant Tos with delight.

Tos also looked back with surprise.

Quill exclaimed joyfully, "It's succeeded, Xiong Zhen has already rendezvoused with the Demon Beasts, now sending a signal for us to proceed to assist; attacking the Polar Star Battlefield from the outside, we'll completely destroy these humans with an inside-out pincer maneuver."

Tos, originally delighted, now expressed concern, "Could it be a trap?"

"What? Are you suggesting that Xu Lingjun could kill Xiong Zhen, seize his communication device, and then use it to lay a trap for us? The possibility is too low. Xiong Zhen's capability is certainly not beneath Xu Lingjun's, even if he can't win, he could escape, couldn't he? He wouldn't be foolish enough to run into an enemy's encirclement and be unable to escape, eventually getting killed... That would be too stupid."

Quill grinned proudly, saying, "Moreover, even if Xiong Zhen's intelligence is incredibly low, I've already considered this issue and had Xiong Zhen modify the communication device in advance. This device isn't activated with energy but can only be activated with the Demonic Power of a Demon Beast, do you know what this means?"

"It means that even in the worst-case scenario, if Xu Lingjun really killed Xiong Zhen, where would he find a Demon Beast strong enough to activate the communication device?"

Quill laughed heartily, "This is the true foolproof plan, full military advance, attack the Polar Star Battlefield, this time, it's victory or death!"

He laughed heartily, although speaking of a desperate battle, his demeanor was relaxed, rightfully so, after all his calculations, how could this battle not succeed?

Tos said, "Your Majesty, Xiong Zhen also sent a route, he said this path was found by the Demon Beasts of the Secret Realm after years of effort, it's a safe passage through the Polar Star Battlefield, he wants us to use this passage to enter Blue Star, and penetrate deeply into the Three Great Iron Walls directly to the Yellow Dragon."

"That's even better, full military advance, this opportunity shall be the resurgence of our Titan Civilization!"

"Yes!"

Over a hundred warships, led by a Constant Star class Main Ship.

Majestically charging in the direction of Blue Star...

As that blue planet gradually became clearer.

Following the information previously transmitted through the communication device, they proceeded without encountering any obstruction.

Entering the Polar Star Battlefield.

This time, the battle was to take place in its heartland.

Quill and the others were extremely cautious, all detection radars were set to their maximum range.

Along the way...

Indeed, they saw quite a few patrol ships on the Polar Star Battlefield, but they carefully evaded them.

Over a hundred warships quietly infiltrated deep into the Polar Star Battlefield.

"Ahead is the passage, who would have thought that the Polar Star Battlefield, as solid as a rock, still has such a hidden passage undiscovered..."

Quill couldn't help but sigh, "We've had many battles with Blue Star before, but never have we penetrated the Polar Star Battlefield so deeply, it's truly unprecedented."

Tos expressed concern, "Your Majesty, is something amiss?"

Quill inquired, "What's amiss?"

"Isn't it a bit too smooth? In the past, we united multiple races to attack the Polar Star Battlefield, yet couldn't set foot in the fortress. Now, a single passage leads us smoothly inside..."

"Didn't I say? It's a passage the Demon Beasts painstakingly discovered. Those Demon Beasts are native residents of Blue Star; finding such a passage over many years is a reasonable occurrence for them, isn't it?"

"But... but have we overlooked something crucial? And this journey has been excessively quiet."

Tos, worried, said, "Although it sounds reasonable, the fact is, the Polar Star Battlefield was established to resist civilizations like ours, it should be as unassailable as possible, in such a context... why would there be a hidden route? Initially I thought the defense might be slightly loose, allowing us deeper penetration, but now, isn't this looseness overdone?"

Chapter 775 I am here to receive our supplies\_2

Quill and Tos exchanged glances.

At this moment, even he sensed that something was amiss.

It was a bit... too smooth.

"Isn't it too late to realize it now?!"

Suddenly, a familiar voice echoed inside the main ship room.

A voice he hadn't heard in years...

But this was a voice Quill would never forget for a lifetime.

Back then, they had all worked together to find a way to survive... It was the owner of this voice who, with just a few words, turned everyone against him, excluding him from their plans and making him the target.

Because of him.

All other civilizations were saved, while only the Titan Civilization's home planet was destroyed.

It was him, it was him! It was him indeed.

"Xu Lingjun!!!"

Quill gritted his teeth, but a sudden fear gripped his heart.

The opponent was actually able to directly interfere with his signal source and speak on his main frequency.

Although Blue Star's technology had rapidly advanced over the years, achieving this seemed impossible... unless...

"Alert, quickly, alert! We may have fallen into the enemy's trap."

Quill shouted angrily.

"Too late."

Xu Lingjun's voice sounded again, accompanied by an extremely shrill noise.

Over a hundred warships, including the most precious legacy left after the Titan Civilization's demise, the Constant Star class Flagship Eternal, were forcibly immobilized there.

None of the warships could move.

No matter how frantically they operated them, it was of no use.

The pitch-black cosmos suddenly brightened like broad daylight, and countless layers of warships surged forward, surrounding them from all directions.

Deploying a single warship consumed an astronomical amount of military resources, and now, a full fleet of 379 warships had surrounded the Titan Civilization completely.

Coupled with the magnetic storm coils beneath them sucking fervently, even the Eternal couldn't escape the confinement...

Facing the endless black muzzles, even activating their shields seemed unlikely. Just one round of volley fire might erase the entire Titan Civilization from the cosmos.

"Damn it, we've been tricked."

By now, Quill understood, despite all the preparations, he had stepped into the trap after all.

That Xiong Zhen, dumb as a pig, still fell at the hands of Xu Lingjun, even letting him capture the communication device. He couldn't help but suspect whether Xiong Zhen had already surrendered to Xu Lingjun, otherwise, how could Xu Lingjun use that communication device?

"Quill... long time no see."

Xu Lingjun's image appeared on the Eternal's virtual panel, smiling as he said, "Escaping the Milky Way Galaxy and still daring to come back, where did you get the courage... was it Xiong Zhen?"

Quill shouted in anger, "Damn it, what's gone wrong? Has Xiong Zhen already surrendered?"

"He's dead. Before he died, he made his last contribution to our Blue Star, and of course, there were additional contributions, like you guys."

Xu Lingjun said, "I knew the hatred you have for Blue Star wouldn't dissipate easily. Not giving up on hunting you down back then was definitely the right choice, though even I didn't expect that all those efforts to capture you would be in vain, and you would instead walk right into our trap."

"Damn, just kill us already, why all the chatter?"

Xu Lingjun asked, "I just want to know, who hid you back then, making it so our human civilization couldn't find your remnants?"

Quill sneered, "Sorry, even if I die, I won't tell you."

"Alright then, you can die."

Xu Lingjun waved his hand, saying, "Launch the boarding battle; remember, these warships will be our strategic resources in the future, so do not damage them."

"What?"

Quill cried out in disbelief.

He originally thought the opponent went through so much trouble to stop them to extract some information from them.

If he just gritted his teeth, maybe the Titan Civilization could be saved against all odds.

But who knew Xu Lingjun would act so unpredictably...

Just perfunctorily asked a question, then directly went for their annihilation.

"Damn it~~, everyone, gear up with the personal combat devices and fight them!!"

Quill roared furiously, though in his shouting there was an unmistakable undertone of disappointment, shock, and despair... he knew that this time, there was no more chance for survival.

And Xu Lingjun turned around to look at the elite warriors behind him, stating solemnly, "The Titan Race is the physically strongest race among the mysterious races of the heavens. You have cultivated Martial Tao and Immortal Tao for years; this is your final test. Go, kill all these Titan race members, and let the entire Milky Way Galaxy know that Blue Star will avenge its grievances without mercy!"

"Yes!!"

Everyone responded in unison.

Over there, Han Yun City, wearing his single combat exoskeleton armor, sneered, "I missed the chance to fight Quill before, a real pity. Now I have the chance, Old Xu, I didn't fight you for Xiong Zhen before, so this Quill is mine, don't you dare take it."

"Rest assured."

Xu Lingjun waved his hand, smiling, "Go on, I know that kid's strength very well; I believe it will be thrilling enough for you!"

"Charge!"

Led by Han Yun City, numerous warriors of the Qisha Legion charged towards the hundreds of warships.

Now that all the warship's functions had been forcefully halted, it was a real battle of cornered beasts, and also the graduation exam Xu Lingjun had arranged for them. Surviving this battle would make one the finest Blue Star Warrior!

Xu Lingjun did not act himself.

He merely watched as those human warriors in combat gear forcibly breached the enemy warship gates, engaging in close combat with the Titan clan members.

One must know, long before Xu Lingjun's rise, the Titan clan was the most troublesome warriors for humans, and only the strongest Martial Artists could contend... often needing several together.

But now, humans, facing these Titan Mysterious Clan, not only stood their ground in single combat but even held the upper hand.

Han Yun City directly confronted Quill.

Amidst surging Blood Qi, he charged at him.

It was a battle at the end of the road, a fight of cornered beasts, the Titan Mysterious Clan unleashed over 200% of their strength, but unfortunately... it wouldn't change their fate.

"Did you really think I came here to interrogate you? Fools, if not for your warships, I wouldn't have bothered with you."

Xu Lingjun's gaze swept across the Eternal Battleship.

The towering warship spanned thousands of lengths, like a grand, steep mountain, sustaining its formidable presence even in the cosmos!

And its cold, metallic gleam filled with savagery still commanded awe, discouraging even the slightest approach...

Constant Star class Battleship!

Blue Star had never possessed a Constant Star class Battleship before; in fact, the reason Xu Lingjun meticulously set up this trap, further using Lu Ye to lure Titan Civilization here with the communication device, was precisely for this Constant Star class Battleship Eternal!

Blue Star's foundation was too shallow, and the exceedingly long warfare had depleted too many resources. Now, though rich, the nationwide cultivation boosted resource consumption to a more astonishing level.

They truly couldn't afford to build such an imposing warship. If it couldn't be made, then they had to seize it.

One must know...

This Constant Star class Battleship was built to face planetary extinction and mass fleeing, while it couldn't accommodate an entire civilization, it could take all their elites without issue.

This magnificent behemoth couldn't be found on battlefields often. If forcefully attacked, even if Blue Star captured the warship, the cost would undoubtedly be enormous!

But now.

The prearranged trap, using the surrounding cosmos' magnetism to forcibly control its power source, aimed solely to claim this Constant Star class Battleship.

Blue Star would soon face unprecedented formidable foes...

This Constant Star class Battleship was the perfect choice to counter the enemies.

As for who exactly shielded the Titan Civilization, of course, Xu Lingjun wanted to know too,.

But did he need to interrogate?

Currently, at least a million People from the Titan Civilization were still surviving... With so many individuals, whether in materials, weapons, or spacecraft, these assets would eventually fall into his hands.

When the time comes, whether they were gods or ghosts, could it be they can't trace it?

Chapter 776 This Request is Reasonable, Right?

Three days of fierce battle.

The Titan Civilization has been completely annihilated... For them, this was a battle of certain death, as they fell into the enemy's plans and were forcibly disarmed of all their weapons and control over their warships.

In contrast, the human warriors were fully armed.

Although it was a drill, if too many died, even Xu Lingjun would feel heartache.

Thus, every one of these warriors carried a powerful Thunder Rune Spear, a weapon constructed with a combination of Immortal Techniques and technology. In unexpected situations, even the Titan Giant Race would find it hard to withstand the power of a single shot.

But although this battle aimed to annihilate the Titan Clan, now that the Titan Race was already trapped like fish in a barrel, impossible to escape, Xu Lingjun hoped they could defeat these enemies with their own strength.

This firearm was merely a last resort for survival; if they used it, they would surely be punished upon return.

But with the ultimate reliance, the Blue Star warriors charged forward triumphantly, their momentum like a rainbow...

Especially at Han Yun City, they did not retreat a single step, resisting Quill in over three hundred moves, ultimately twisting off his head.

Even their Master of Civilization met a tragic end.

Afterwards, the morale plummeted...

In just three days, aside from those hiding in secret corners, almost over ninety percent of the Titan Race had been killed by the hands of the Blue Star warriors.

Extinction!

However, even after doing such a brutal thing, all the people of Blue Star were filled with indignation, recalling countless battles in the past. The Titan Giant Race always led the charge, and their tough hides and thick skins meant they often engaged in close combat with humans.

Over the past century, while they were merely used as weapons by others, if one talked about the many heroic spirits of Blue Star warriors who sacrificed themselves over the century, at least two tenths of the credit would go to these Titan Giants.

Just thinking about this, they felt not the slightest pity.

After taking control of all warships and that solitary Constant Star class Main Ship,

it was conceivable that the remaining members of the Titan Race would not escape the net...

At this point, humanity finally achieved complete victory.

Xu Lingjun then nodded with satisfaction, instructing Han Yun City to stay behind and clean up the battlefield.

He then boarded a warship and flew towards the Secret Realm within Blue Star.

Over the years, the development of technology... the update and replacement of warships had also been frequent, so much so that now, it took just over two hours.

Xu Lingjun had already returned to the Secret Realm.

Lu'Er had been waiting for quite a while.

Seeing Xu Lingjun return, she stepped forward and asked, "How did it go?"

"Everything went smoothly, the Titan Civilization has been completely annihilated, and we even gained an additional Constant Star class warship."

Even with Xu Lingjun's extraordinary mindset today, he couldn't help but feel delighted... One must know that the reason Constant Star class warships were not used as main ships on the battlefield was that the resources required to build one were so vast and numerous that they almost exceeded a planet's limits!

Therefore, a Constant Star class warship is the foundation of a civilization, only after plundering countless Civilized Planets can there be enough resources to build such a warship that can perpetuate a civilization.

"This time, we really have you to thank, Lu Ye."

Xu Lingjun expressed gratitude, "If it weren't for your Demonic Power's activation, I might not have been able to use this Communication Device, and I wouldn't have been able to lure the enemy into my trap, leading to such an easy victory."

"I also didn't expect Xiong Zhen to be allied with the Titan Race."

Lu Ye, however, was not as happy as Xu Lingjun...

Instead, there was a lot of worry between her brows.

Xu Lingjun asked, "Worried about your kin?"

Lu'Er gently responded with a hum.

"No need to worry. Instead, think positively. Just now, when I left the Secret Realm and went to the cosmos, even though separated by the warship, I could feel the Spiritual Qi between heaven and earth indeed experienced significant changes. It seems Xiong Zhen has expelled all the Spiritual Qi he's consumed over the years."

Lu Ye said, "It's no surprise. Blue Star is not tech-enabled, our Demon Beasts have always cultivated themselves, so why the decline... Isn't it because there were too many of those Level 12 Demon Beasts? Each of them lived for over a thousand years, constantly devouring Spiritual Qi day in and day out, and over the years, every one of them was walking Spiritual Qi reservoirs. Their existence was the direct reason why Blue Star was on the brink of destruction initially."

Here, she showed quite a bit of discontent in her eyes.

The behavior of these Demon Beasts was indeed underhanded, driving Blue Star to the verge of destruction and then leaving with a clean slate. Now, when Blue Star has barely recovered, she who knows how much effort it took to bring these Demon Beasts to this stage.

Yet, they shamelessly return, wanting to monopolize Blue Star once again.

"Don't be angry, just think positively."

Xu Lingjun smiled, "Just this one Xiong Zhen can cause such a big change in the world, how many of your kin are there actually? If they all die on our Blue Star... Hmph... they aren't coming back to monopolize Blue Star; they're coming back to give us great gifts. By then, the combination of old and new Blue Star Spiritual Qi will surely make Blue Star a new Holy Land!"

He sighed, "This truly is an unexpected fortune, you know. I previously predicted Blue Star could become a Level 3 Civilization in a hundred years at most, but now it seems, with the assistance of these Demon Beasts, greatly enhancing external forces, this timeline will definitely be significantly shortened."

"Do not underestimate these individuals; Xiong Zhen's strength is not weak, but among the Demon Beasts of those years, he was far from being considered top-notch."

## Chapter 777 This Request is Reasonable\_2

Lu Ye's voice carried a trace of concern as she said, "Being capable of draining the entire world almost to destruction, their strength is evident... If we underestimate them, beware that the entire Blue Star might..."

"Rest assured, I won't underestimate them, and besides, aren't you here? Just the right time to consult you about the strength of these Demon Beasts."

Xu Lingjun chuckled, "If we talk about age, you are probably much older than all of them, and you should know all of their backgrounds, right? With you around, I can naturally know my enemy as well as myself, and with meticulous planning, if we still can't win, then I'm unworthy of being the Master of the Blue Star."

"This I do know, but because I know, that's why I don't want you to be too careless. You don't understand their power; your Immortal Taoist Technique is indeed formidable, but their Demon Energy might not be much weaker, plus every one of them has lived for over a thousand years... Xu Lingjun, don't be reckless."

Lu Ye earnestly said, "I know the backgrounds of these Demon Beasts, but after all, they've left this planet and went to the Outer Cosmos for several hundred years. Maybe many of them have died, but if not, there must be many new changes, so you can trust what I say, but not entirely, otherwise, it's easy to be caught off guard by the enemy."

"I understand."

After that, Lu Ye told Xu Lingjun all the information she knew.

In a sense, her age is actually older than those Demon Beasts.

But because plants become spirits unlike beasts, at that time, she only had a faint Spiritual Sense, let alone being able to move as she can now; she couldn't even budge a bit and only had a vague impression of the events back then.

Therefore, regarding those Demon Beasts, what she knows is just about their essence and age, etc...

But these are already very important information for Xu Lingjun.

After all, with Demon Beasts, knowing their essence means knowing their style and type... like Xiong Zhen, who became a form of a Snow Ape, is immensely powerful and irascible.

Nature is hard to hide.

This is their greatest weakness.

But as he listened, Xu Lingjun's expression couldn't help but grow solemn.

He had already understood the power of Demon Beasts through Xiong Zhen, and even if stronger ones came, he was completely confident of defeating them...

But he truly didn't expect the number of these Demon Beasts to be so many.

Lu Ye talked for a long while...

Yet she hadn't finished...

The number is so large, probably over a hundred combined.

Moreover, all sorts of Demon Beasts have become spirits, possessing surely diverse strengths... If they all return at once, perhaps it would indeed be a catastrophe for the current Blue Star!

"But you don't need to worry too much; when they left, they all quarreled greatly, although they agreed to leave, everyone wanted to go to different places, so the Demon Beasts did not gather but scattered... in threes and fives..."

Lu Ye said, "This time you didn't even use external seals, and you directly took down Xiong Zhen, so even if a few more come, it shouldn't be too hard for you, right?"

Her meaning was clear.

The Demon Beasts do not communicate with each other, and even though Xiong Zhen is dead, how he died is probably unknown to anyone... They could completely reuse the same strategy.

Xu Lingjun laughed, "That's a good method, but right now, I have a better weapon to use."

"What weapon?"

"Just now while you were speaking, I received a message from the Old City. They've received the Titan Civilization's warships and materials, and among them, they found aged millet and rice!"

Xu Lingjun said, "Millet and rice are a specialty of the Yalin Civilization and their staple food with delightful taste and astonishing yield, but with the increasing prosperity of the Communication Star over the years, millet and rice have become common in almost all civilizations, including our Blue Star, which also plants a lot of it, so it's hard to trace from this alone who gave the Titan Civilization this grain."

He sneered, "Unfortunately, the people of the Titan Civilization are too greedy and gluttonous, so those who sheltered them didn't give them too much good grain, giving only aged millet and rice instead. This millet and rice has aged several years, and back then other civilizations had just gotten these seeds, so who else but the Yalin Civilization could have given so much aged grain?"

"Are you planning to take revenge on them?"

"If I don't hit them hard, I'd be doing myself a disservice for their initial deceit!"

Xu Lingjun sneered and got up to leave... but suddenly remembered something and sighed softly.

He smiled at Lu Ye, "It's getting busier and busier now, and it's rare to see you, yet we're only discussing serious matters. Come, let me hold you; next time, we'll spend quality time together, okay?"

Hearing this, Lu Ye sweetly smiled, ran a few steps, and leapt into Xu Lingjun's arms.

She rubbed against his chest several times...

Smelling that familiar scent, an unprecedented sense of fulfillment surged in her heart.

Seven days later.

Yalin Civilization.

Although the planet no longer faced the threat of destruction, during the initial civilization reconstruction, almost all structures on the planet's surface were destroyed.

After years of rebuilding, it still hadn't been fully restored to its former appearance...

In fact, this is also why many civilizations don't dare to provoke Blue Star.

All these years, due to planetary reconstruction, all resources and focus have been directed towards the people's livelihood, leaving technology with virtually no progress at all.

Chapter 778 This Request is Reasonable\_3

Instead, Blue Star has gained such tremendous benefits all these years, with almost no stagnation in its advancement.

As circumstances change, neither side is foolish... both are burdened with the survival and continuation of an entire civilization.

If conflict can be avoided, then naturally it is better to value peace.

For this reason.

When Mo Luo learned that Xu Lingjun, the Master of Blue Star Civilization, was visiting and even brought three Planet level battleships.

The approach was aggressive, with clear hostility, but merely three Planet level battleships were far from enough to destroy Yalin Civilization... this gave Mo Luo a slight sense of relief.

"If we can avoid war, it is better not to fight."

He sighed softly, thinking to himself.

Though Xu Lingjun's intentions were unfriendly, Mo Luo still treated him with courtesy.

He regarded those warships as nothing, treating them as ordinary ceremonial ships, and brought them into the space station... Mo Luo personally welcomed Xu Lingjun.

The two of them entered the great hall.

Took their seats, and tea was served.

Mo Luo asked, "Star Lord Xu, it seems you wouldn't visit without a reason."

Xu Lingjun straightforwardly said, "I am here regarding the Titan matter."

"I had no choice, at the time I had a good personal relationship with Quill, he pleaded with me, and I couldn't ignore him, so I lent him some warships and materials to leave the Milky Way Galaxy... never again to be worthy of Star Lord Xu's attention."

No evidence was needed.

The fact that the other party spoke such words clearly indicated they had obtained some crucial evidence.

If he continued to deny it, it would only make Mo Luo appear lowly in character...

Better to admit it openly.

"You've given me enormous trouble."

Xu Lingjun sighed, "Star Lord Mo Luo, you should know the hostility of the Titan Civilization towards us... by saving him, in a way, you are opposing me."

"But I truly have no intention of opposing Blue Star, otherwise I wouldn't have expelled them from the Milky Way Galaxy, I would have secretly absorbed that force."

"This is also why Blue Star has not deployed large forces against you, Blue Star has a policy of revenge, if you indeed harbored hostility, you would not be meeting only me today."

Xu Lingjun said, "But you have indeed caused us enormous trouble, from this perspective, my visit is actually to demand compensation!"

"If it can be settled through negotiation, there is no problem."

Mo Luo slightly relaxed and smiled, "This matter is indeed my fault, caught between public and private matters, it resulted in Blue Star becoming a victim. Whatever you need, just say the word."

"My requirement is very simple!"

Xu Lingjun seriously said, "The Titan army harbors strong hostility towards Blue Star, certainly intent on revenge... If their army presses forward, it would indeed be a significant disaster for Blue Star."

Mo Luo said, "That's impossible, they have already left Blue Star, and before leaving, I warned them not to step into the Milky Way Galaxy again."

"You underestimate hatred."

Xu Lingjun said, "My condition is that I require your Yalin Civilization to dispatch a force of one million, along with a fleet of such scale, to station and guard in the Outer Ring of Blue Star, to protect Blue Star!"

Mo Luo was shocked, about to speak.

Xu Lingjun continued, "Of course, the main defense is against the Titan Clan, after all, the civilizations surrounding Blue Star are now all on friendly terms, and the enemies have been nearly wiped out by us. If another enemy attacks, it is undoubtedly the Titan Civilization. So your assistance in garrisoning is mainly to guard against the Titan Civilization. This is the trouble you left behind, so it's reasonable for you to resolve it, isn't it?"

Chapter 779 Each Harboring Their Own Schemes

You want us to send troops to help guard Blue Star?

Mo Luo couldn't help but laugh...

It's indeed a reasonable request, but isn't Xu Lingjun being a bit too unrealistic?

He smiled helplessly and said, "Star Lord Xu, it's rare for you to consider a peaceful solution to this problem. Our Yalin Civilization also genuinely holds a sincere apology. As long as your requests aren't too excessive, we are willing to offer some advanced technology..."

"I don't lack that stuff."

Xu Lingjun waved his hand and said, "We have acquired so much technology from you before, and we still haven't fully understood it all; your technology and research are just enlightening and improving for us. We cannot fully conduct research based on you; that will only limit our growth... So those technological helps are limited."

"Your statement is indeed quite reasonable, and your demand is quite normal. But does it mean that as long as the Titan Civilization doesn't invade Blue Star, our Yalin Civilization has to protect your Blue Star indefinitely? And how do we calculate the military expenses?"

Xu Lingjun said, "Of course, you would bear those yourself!"

"We provide the people, we pay the money, and then protect your Blue Star indefinitely? Star Lord Xu, aren't you dreaming too well?"

"Twenty years. Whether the Titan Civilization comes or not within twenty years, you can withdraw your troops at any time. The military expenses for a million troops for these twenty years are indeed astonishing, but the supplies and resources you provide to the Titan Civilization are also quite costly, aren't they? Why are you generous to them but not to us?"

"Ten years, at most ten years, the military expenses will be at our own cost, and Blue Star will be protected by us!"

Mo Luo, seeing the opportunity to pay right away, agreed without hesitation.

Xu Lingjun thought for a while, ten years... actually, that was enough.

He nodded and said, "Ten years is acceptable, but within these ten years, any attacks from the Titan Civilization or other enemies must be solely borne by your Yalin Civilization. This is my final bottom line, unchangeable!"

Mo Luo nodded and said, "No problem."

Indeed, no problem.

Ever since the Mutual Aid Association was established, although it hasn't been ten years yet... it's not far off.

Have there been any wars these years?

The mysterious races of the heavens that once opposed Blue Star have all been wiped out by Blue Star.

The remaining ones, such as the Bingshuang Civilization and others, have now formed alliances with Xu Lingjun... and until now, they implicitly have regarded them as the leaders.

War?

What kind of war could there be?

After so many years of peace, how could anyone outside the Milky Way Galaxy possibly have the power to rival Blue Star, let alone surpass Blue Star and invade it?

Impossible... impossible...

Mo Luo nodded and said, "After ten years, we will withdraw our troops."

"Thank you."

Xu Lingjun stood up, a gentle smile on his face, and said, "I don't have much connection with that Quill, but I can see his nature; he is not a patient person. If he wants to act against Blue Star, no way he could bear it for ten years. Star Lord Mo Luo, you have such responsibility, Xu Lingjun admires that."

"You're welcome."

The atmosphere between them immediately turned harmonious.

Mo Luo inwardly felt satisfied. The Yalin Civilization might not be the strongest among the civilizations, but its strong economic foundation was its asset, especially after the Communication Star flourished, they could be counted as the civilization benefiting the second most after Blue Star.

It's just a matter of spending some money, and as for that million troops, they have to be stationed somewhere — stationing them at Blue Star's doorstep could also, in some sense, be considered a testament of trust in us by the Yalin Civilization?

Yes, the only loss would be money, but after this matter passes, wouldn't the issue of investing in weaponry to help the Titan Civilization against Blue Star just fade away?

Even if Xu Lingjun wants to stir trouble later, he has nothing to fear... I've already paid the compensation, why should you get stuck on this matter? By that time, Xu Lingjun wouldn't have any ground to act up.

Meanwhile, Xu Lingjun was also secretly satisfied, isn't this the same as finding oneself a free bodyguard?

They have no idea that the Titan Civilization will never come.

All thanks to Xiong Zhen.

Not only did he sacrifice himself to empower Blue Star's Spiritual Qi, but he also enabled them to acquire the key to communicating with the Titan Civilization.

Only then could Xu Lingjun and his people lead the Titan Civilization into the internal Polar Star Battlefield of Blue Star, and they were directly digested internally...

Who outside could discover that within Blue Star, there was an invisible war that was completely over within just a few days?

Moreover, they inadvertently helped us gather a fleet powerful enough to challenge any civilization.

A million troops, equipped with warships.

Even powerful Demon Beasts couldn't possibly ignore them...

Previously not understanding the origins of the enemy, that is what allowed Xiong Zhen to escape in.

Now, knowing their background and with the assistance of Lu Ye, do they want to come in again?

They can try... but first, they must get past the Yalin Civilization.

Ten years, these Demon Beasts don't look like the patient kind, how could they hold on for ten years?

The two civilization masters, each with their own hidden agenda, exchanged sweet smiles; subsequently, the atmosphere turned completely harmonious.

Under the guidance of Star Lord Mo Luo, His Majesty Xu Lingjun personally toured many landscapes of the Yalin Civilization, including the Rainbow Tier, Yunsheng Bridge, Ten Thousand Mu Jade Field... and even personally planted some millet and rice.

Their talks ended smoothly in an atmosphere of friendship and harmony.

Chapter 780 Each Harboring Their Own Schemes\_2

Finally, Xu Lingjun, carrying numerous gifts from Star Lord Mo Luo and a verbal agreement of mutual benefit between the twin stars, embarked on his journey back.

Returning to the warship.

The curvature engine activated, causing the latest model starship to suddenly accelerate, as if it had undergone a transformation from large to small in an instant, disappearing without a trace.

"They've even developed secondary space-time jumps—Blue Star... is truly terrifying."

Under full surveillance, Mo Luo couldn't help but sigh lightly. Thankfully, this Xu Lingjun was reasonable; otherwise, if war broke out, despite fearing the Blue Star Civilization, it wouldn't be to the point of dread.

He was more concerned about other civilizations seizing the opportunity to curry favor with Blue Star and kicking them while they're down, which the Yalin Civilization wouldn't be able to withstand.

"Go fetch my Dragon Suppression Token and summon General Zola."

Regarding the agreement with Xu Lingjun, he had no intention of breaking it... On the contrary, he planned to send his elite warriors to showcase his strength to Blue Star up close.

Letting Blue Star witness their might would possibly lead to forming an even deeper alliance.

Thinking of this prospect, he couldn't help but chuckle with satisfaction.

In just a few hours.

Xu Lingjun had already returned to the Polar Star Battlefield and used the Star Ring to enter Blue Star's interior.

This round trip was exceptionally fast.

Up until now, the battlefield hasn't been cleared... especially the numerous locks on the Constant Star class battleship, which is the Titan Civilization's last trump card, integrating all their most advanced technology.

If Blue Star can unlock these technological locks.

At that time, Blue Star not only gains a free Constant Star class battleship but also acquires the most advanced technology of the Titan Civilization.

This is the main reason Xu Lingjun didn't covet Yalin Civilization's technology.

It's known that the Titan Civilization follows the path most suitable for Level 3 Civilizations, enhancing itself while integrating technology.

Thus, their technology is most beneficial to Blue Star.

Profiting both inside and outside.

It's hard to count how many victories this wave has yielded, even Xu Lingjun himself can't keep track.

And just as he arrived...

Han Yun City swiftly approached, seeing Xu Lingjun, and exclaimed, "Old Xu, you came just in time. There's still a lot to handle, and it's all on you now. I can't take it anymore... it's unbearable."

"What happened?"

Xu Lingjun looked at Han Yun City's back and curiously asked, "Constipated?"

"What nonsense are you talking about? Haven't you felt the surge of Heaven and Earth Spiritual Qi in recent days?"

Han Yun City shook his head, saying, "I've been feeling a sense of saturation within my body and am on the verge of breaking through... Curiously, why has the spiritual qi become so dense? Li Jingjun has already gone into seclusion, reportedly having insights, and by now, thirty percent of our Qisha Legion has successively broken through their current realm, and now I'm about to break through too."

"That many?"

Xu Lingjun understood in his heart, probably this is the blessing left after Xiong Zhen's death.

The spiritual qi hasn't completely dispersed yet, and since the Qisha Legion is near the Secret Realm, they were the first to sense this wave of spiritual qi, thus receiving this Creation...

Once this spiritual qi fully disperses, it'll benefit not just the vicinity of the Secret Realm but potentially the entire Blue Star, offering tremendous blessings, although not comparable to the Qisha Legion, it will still significantly enhance compared to now.

Moreover, it's not just that, Xiaoyun and the others had already gone into seclusion when Xu Lingjun left.

Daxiong intended to get close to Xu Lingjun but fainted after a few steps... It was nearest to Xiong Zhen's body, directly intoxicated by the spiritual abundance. Once it awakens, its strength will likely see a substantial boost.

Just one Xiong Zhen was enough to bring varying degrees of evolution to all of Blue Star.

If more were to come.

If Xu Lingjun was apprehensive before, now he can't help but secretly look forward to it. If they could kill a few more demon beasts, letting their bodies vaporize on Blue Star, wouldn't Blue Star overall ascend then?

At the very least, helping Blue Star breakthrough to a Level 3 Civilization would be a no-brainer.

"I never imagined such great Creation would come all of a sudden when I thought at least a century's accumulation was necessary."

Xu Lingjun shook his head and said, "Truly unimaginable... alright, go into seclusion, leave the rest to me."

Han Yun City seemed genuinely on the verge of bursting.

He patted Xu Lingjun on the shoulder and quickly ran off.

Xu Lingjun entered the Eternal, observing the numerous technological professionals inside engaged in internal modifications, cutting, and technical analysis.

Wang Qingya was surprisingly at the forefront, now dressed in a white research coat, accentuating her slender and graceful figure and legs, and her long black hair casually draped over her shoulders, exuding an elegant and captivating charm.

At thirty, a woman is in her prime.

Wang Qingya, though in her early thirties, cultivated the Immortal Tao Technique, maintaining a visage as if time had frozen some years ago...

A myriad of charms, indescribable in words.

She turned, saw Xu Lingjun, and beamed a delighted smile, approaching him with a laugh, saying, "So, Your Majesty, do you have any instructions?"

"Of course, don't overexert yourself, okay? Your body isn't just yours; if you harm it, I'll have to severely scold you."

"Don't worry."

Wang Qingya's eyes scanned the various technological decryptions around her, impressed, saying, "The Titan Civilization's technology is remarkable, yet they clearly didn't anticipate their Constant Star class

battleship falling into others' hands one day, so the encryption is ordinary. Give us a few more days, and we'll crack all these codes. Our Blue Star will then have truly its last trump card."

"This isn't considered a trump card, just a trump on our battlefield."

Xu Lingjun said, "Primarily the Titan Civilization's technology. Their expertise in single-soldier combat, single-soldier systems... haven't you always said research hit a bottleneck? The Mark Series alone can't support future research, but now that you've got this, the right tools are here."

Wang Qingya nodded, her vivid face full of confident grace.

She laughed, "I don't know the exact criteria for Blue Star to evolve into a Level 3 Civilization, but one thing I'm sure of is that technology won't hold you back. Once you develop Martial Tao to the required standard, technology will certainly have surpassed that line long before."

"I'm satisfied with those words, after all... Martial Tao will soon rise too."

Xu Lingjun thought, with the Creation wrought from Xiong Zhen, it's an opportune time to significantly propel Blue Star's Martial Tao and Immortal Tao forward, meeting a high standard.

Although he secured ten years for Blue Star.

But in reality, apart from the ignorant Mo Luo, both Xu Lingjun and Lu Ye knew well... it would take much less than ten years for those demon beasts.

Learning that their mother star still exists, they would return at the earliest opportunity to plunder and reclaim their home.

War is upon us...

And what needs to be done is to seize this moment to maximize Blue Star's strength.

If Blue Star becomes a Level 3 Civilization, then all civilizations in the Milky Way Galaxy will become Blue Star's clans.

He can then justifiably and openly order all civilizations to rise up against these demon beasts...

Level 12 Demon Beast?

Even if you're a Level 14 Demon Beast and come to Blue Star, I'll force you to bow while conquering you, and squeeze out every last drop of essence from you.

After chatting with Wang Qingya for a while...

He then transmitted some data to her.

This was previously provided to him by Lu Ye, containing information on the demon beasts' identities, backgrounds, and strengths.

What he needed Wang Qingya to do was to, with the shortest time possible, develop weapons targeting these demon beasts.

Xu Lingjun is strong.

No matter how powerful the demon beasts, Xu Lingjun remains unafraid.

But the enemy is Blue Star's enemy; no matter how strong he is, can Xu Lingjun slay all the enemies single-handedly?

What is necessary is overall strength!
