

## **Origin Powers 781**

Chapter 781: Demon Beast Attack

Two months later.

The great army of the Yalin Civilization arrived...

After all, with a decade of stability at the beginning, coupled with the fact that Mo Luo really couldn't think of which undiscerning mysterious races of the heavens would cause trouble for Blue Star now.

It's now Blue Star not looking for trouble with them; they should be burning incense in celebration.

In this context... sending troops to Blue Star is, in a certain sense, not giving them an opportunity to befriend Blue Star?

Then let's proceed according to the proper standard, and even a more lavish standard, so as to show Blue Star their sincerity, making it awkward for Blue Star to lash out once they learn the truth in the future.

As for their arrival, Xu Lingjun naturally held an extremely welcoming attitude.

In accordance with the previous agreement, he allocated part of the Star Ring space for them to station.

Moreover, he personally went to greet them, giving the arriving commanders the highest respect.

After all, they are the first line of defense, the necessary courtesy and gratitude must be extended...

Xu Lingjun was indeed very grateful to them.

Then, Xu Lingjun once again plunged into busy affairs.

Although he had Han Qingxue assisting him, Xiong Zhen's death indeed gradually had a tremendous impact on the entire Blue Star.

According to Lu Ye, Xiong Zhen lived on Blue Star for about fifteen hundred years.

And over these thousand years, he passively absorbed spiritual energy at first, but later grew stronger, devouring surrounding spiritual energy as if swallowing the sea.

In addition to this, over the years, he wandered in the outer cosmos after leaving Blue Star.

His devouring of spiritual energy never ceased.

And now, with his death, all the spiritual energy he consumed was released at once...

It can almost be said to have blessed the entire Blue Star.

Initially, it was the Demon Beasts within the Secret Realm and the warriors of the Qisha Legion who reaped the first wave of benefits.

Han Yun City seized this opportunity, directly forcing a breakthrough to the Creation Realm, becoming the first person to reach the Supreme Realm in martial tao.

Henceforth... his power in the true sense, whether in terms of realm or combat power, has completely surpassed those aged predecessors who were stuck in the Creation Realm for years.

Li Jingjun now follows a similar path to Xu Lingjun's and is already only a step away from the Divine Soul Realm.

Finally, high-end combat power is no longer limited to Xu Lingjun alone.

As this wave of spiritual energy gradually spread across the entire Blue Star, the top few among the first batch of students receiving Creation have even surpassed the Nascent Soul, with signs of advancing to the Divinity Transformation Realm.

The military has achieved comprehensive force armament, and today's individual combat power is evidently much stronger than the past elite special forces.

This was originally the power Blue Star was supposed to achieve twenty years later...

But just with Xiong Zhen's death, twenty years' time was forcibly condensed into one year.

Over the past year, many things have also happened within the Blue Star.

For instance, Li Lei officially assumed the position of Sect Leader of the Sun and Moon Bright Sect... his Guiyuan Peak strength is in no way inferior to the previous Sect Leader Tomorrow.

Zong Xiaoping officially became the President of the Imperial Capital's Martial Arts Association.

It's just that the former Martial Arts Association has now become responsible for tracking contributions and exchanging martial arts.

Of course, this has nothing to do with his friendship with Xu Lingjun... his personal ability fully bears the responsibility.

Guo Zheng may not excel in martial tao, but his business acumen is remarkable. Although Wang Tiancheng suppresses him significantly, Xu Lingjun more prefers his Father Wang to exploit those external civilizations.

Therefore, the internal commercial minister is now assigned to Guo Zheng.

Gu Xi also left the Qisha Legion, parachuting to become the Commander in Chief of the Tianji Military District.

The younger generation is gradually coming to the forefront.

Blue Star's power surge can be described as changing day by day, and the development of martial tao and immortal tao has reached an extremely astonishing degree.

By now...

The physical fitness tests of age-appropriate children also grow stronger each year, and their overall quality has become completely incomparable to several years ago.

Those children aged three to five can already spontaneously gather spiritual energy into their bodies.

Public square dance has long exited Blue Star, replaced by old-age sword dance troupes...

Likewise, sports such as running and long jump have long been canceled.

There's no choice; how can one compete when the average person is like Superman?

Even just compiling statistics of the participating members can drive one crazy... instead, martial arts contests have become hugely popular across Blue Star.

Everyone reveres martial skill.

Everyone is like a dragon.

For this matter, Xu Lingjun specially made several trips to the Secret Realm, as after all, Xiong Zhen also counts as a Demon Beast; he is an enemy that cannot be thanked, so expressing this gratitude to the Demon Beasts of the Secret Realm was necessary.

Two years have passed.

It seems like a world-changing transformation for the entire Blue Star.

Internally, it has almost undergone a complete rebirth...

This is no surprise, even on the Communication Star, those Blue Star people traveling outside become increasingly powerful.

No one suspects the Demon Beast, as Xiong Zhen infiltrated Blue Star stealthily.

Unlike Xiong Zhen, who voluntarily came forward, contributed a massive amount of spiritual energy, and then died... even chose the Secret Realm as the battle location, leaving no trace.

Such considerate Creation is not a constant occurrence.

Thus, outsiders only perceive that humans have accumulated over the years, making astounding progress at a speed much faster than they imagined.

Chapter 782: Demon Beast Attack\_2

In private, the attitude of many civilizations towards Blue Star shifted from initial competition and caution, to later joint development, and now proactive friendships...

Blue Star is destined to become the first Level 3 Civilization.

They are also destined to follow its lead... as long as they are not foolish, naturally, they would not dare to offend the Blue Star People.

Therefore, the Blue Star People, who had just stepped out of Blue Star, were surprised to find that before they could even puff their chests, others were already bowing.

From initially only being able to visit the Communication Star to broaden their horizons, to sequentially being granted sightseeing permission by various major civilizations such as the Bingshuang Civilization, Elemental Spirit Civilization, Xueyan Civilization, etc., allowing Blue Star People to enter and enjoy their worlds.

Mo Luo was secretly grateful for his wisdom in not rejecting Xu Lingjun's initial request.

In the blink of an eye, more than a fifth of a decade had passed... Unexpectedly, in the past two years, Blue Star has been calm.

The maintenance cost of these over one million warriors and hundreds of warships was high, but it was just a matter of money. Money, after all... is often the least valuable thing.

Bear in mind, although Blue Star's warriors have retreated to provide enough space, contact with Blue Star is naturally unavoidable.

Especially during Blue Star's New Year.

The Three Great Iron Walls were also brightly adorned... there originally wasn't such a custom on the battlefield, but ever since Xu Lingjun succeeded as the Master of Blue Star, there has been no war outbreak outside Blue Star.

So they also relaxed quite a bit.

Not to mention, there was now an extra layer of protection. Therefore, at that time, the Nine Great Commanders invited warriors from the Yalin Civilization to celebrate the Spring Festival with them.

The Yalin Civilization had no concept of year-end celebrations.

Instead, it significantly broadened their experience... warriors with talents even performed some shows, winning applause from the entire audience.

Over the years, both sides maintained goodwill and forged deep friendships.

What the higher-ups were scheming, they didn't know. In any case, it didn't affect their diplomatic relations... moreover, quite a few female soldiers from the Yalin Civilization were attracted to Blue Star, planning to break away from their star after the ten-year period was up, and marry into Blue Star.

Mo Luo was naturally well aware of these developments.

He did not intervene and block... in some sense, this incident made the relationship between the Yalin Civilization and Blue Star Civilization the closest among many civilizations.

Even closer than with the Elemental Spirit Civilization, it's said that Star Lord Jiuxin often seeks out Your Majesty Xu Lingjun, but Xu Lingjun treats her with respect, never overstepping.

Indeed, what could have been a terrible situation, by a stroke of luck, turned into a great thing with twists and turns.

He was naturally happy to see it happen.

At present, an additional 300,000 troops were deployed.

Ten Monarch level Battleships and 50 Dreadnought-class Battleships were dispatched, to show their sincerity.

In the blink of an eye, another year had passed.

Usually strict in discipline and orders, the Yalin Iron Blood Battle Legion.

Now, even after daily rigorous training, the military morale had slight fluctuations...

Or rather, anticipation?

Nothing else...

When you calculate the time, the annual Spring Festival of Blue Star seems to be arriving again.

Seasons change, not unique to Blue Star alone, after all, they all draw warmth from the sun. Based on their distance and structural differences, climates also vary.

But at their core, they are mostly similar.

Yet to create a festival specifically to welcome the arrival of spring... that's truly one of a kind.

One can't help but admit, with their daily harsh training in the bitter cold, their natural inclination yearns for that lively and festive celebration.

"Calculating the time, is it almost the New Year?"

Inside the Yalin Civilization Iron Blood Battle Legion.

Although none spoke openly, during casual chats, they would unintentionally mention this topic.

Compared to surviving under almost totalitarian control for the sake of survival in the Yalin Civilization, Blue Star, a civilization from another cosmos, their prosperous festivals, and pure entertainment... were immensely appealing to them.

"Probably about twenty days left, hey, who can figure out Blue Star's calendar? It's divided into yin and yang calendars, and also Gregorian and agricultural calendars. It's really confusing."

"Exactly, exactly. Fortunately, I have a Blue Star boyfriend, he taught me how to calculate it... hmm, twenty-seven days left!"

Several warriors from the Yalin Civilization squatted in the shadow of the warship, each secretly puffing smoke clouds.

Their civilization didn't have as many pastimes and fun things as Blue Star...

Take cigarettes, for instance. They're already a craze among these over one million warriors. These over one million warriors from Yalin even boosted Blue Star's Polar Star Battlefield economy.

Even on the battlefield, they could make money... reportedly, upon knowing this, all the commanders were dazed.

But today.

As these warriors quietly puffed their smoke.

Suddenly, they heard a voice by their ears ask quite politely, "Hello, may I ask if you are lifeforms from Blue Star?"

"No, we are from Yalin Civilization."

One warrior, Uki, instinctively replied and then suddenly realized...

Wait, something's wrong!

This voice was transmitted through a translator, meaning the speaker isn't using Yalin's native language.

Is it Blue Star language?

And not the common Blue Star language, but ancient Blue Star language...

While others might not discern it, these warriors from the Yalin Civilization had been stationed here for over three years and had communicated extensively with Blue Star, naturally discerning these differences.

However, no matter how well the Yalin Iron Blood Battle Legion and Blue Star get along, theoretically speaking, Blue Star People aren't allowed to enter here rashly during weapon training... of course, they wouldn't rashly enter either, as it might raise suspicions of spying on other civilizations' military secrets.

This voice...

Everyone looked up.

They saw a graceful girl in a fiery red velvet jacket, with only the front chest's opening in snow-white.

The girl's hair was fiery and cascaded like a waterfall, with two bun-like headbands resembling ears, and a slit in her lower skirt revealing long, slender legs, adding an alluring charm.

Seeing she caught everyone's attention, she smiled gently, revealing two small tiger teeth, charmingly playful and cute.

"You... you, you... how did you get in?"

Her features were distinctly Blue Star, with perfectly matched facial features, providing an extraordinarily pleasing look.

But in an instant, they all became on guard.

Uki instinctively gripped the Light Energy Gun at his waist, warily asking, "Who are you?"

Faced with their alertness, the girl remained indifferent, lamenting, "You guarded so tightly, I thought of many ways, but it seems impossible to return to Blue Star without alerting you... it feels as if you're

deliberately targeting us, all my methods have been completely blocked. Behind this, someone must be secretly guiding you."

Upon mentioning this, the girl had a face full of anger, complaining, "This Xiong Zhen is really a bastard, he alerted us that Blue Star had recovered vitality, yet after we arrived, he pulled such a stunt, what's the idea? Are you Xiong Zhen's agents developed over these years? Does he want to become Master of Blue Star? Has he asked us?"

Clearly...

The one directing these warriors' strategies is certainly someone highly familiar with them.

No need to think...

Even with just knee-jerk logic, one could guess... it's undoubtedly Xiong Zhen.

Indeed, it seems Xiong Zhen intended to become the new Master of Blue Star, even override all their Demon Beasts, hence summoned them here, while he gained an advantage by entering Blue Star ahead of time, turning it into his impenetrable fortress.

Then, he intended to use this advantage to pressure them.

Ha...

Who would have thought that stupid, brainless monkey wandered for hundreds of years and still became clever?

But alas, lacking power, daring to suppress them all with just these random ragtag creatures?

Firefox's eyes glinted with mockery.

He smiled sweetly, but his words carried endless killing intent.

"If you obediently explain everything you know, maybe, I can spare you a whole corpse."

Chapter 783 Who is responsible for such serious casualties?

"Strange... it's not to deal with us, but to guard against the potential arrival of the Titan Civilization, which is why they're stationed on the outskirts of Blue Star? But if that's the case, why does their formation just so happen to completely counter my Thousand Transformations Technique, making it impossible for me to easily enter? Could it be that the Titan Race has some similar method to my Thousand Transformations Technique?"

Firefox pulled his fingers out from the skull of that Yalin Civilization warrior.

Licked the white brain matter off his fingers...

Just now, he had obtained the information he wanted.

But this information, instead, left him even more bewildered.

It wasn't to deal with them?

Then why are these methods so targeted at them?

What exactly is the Titan Civilization?

Or is this whole thing just an elaborate ruse played by that guy Xiong Zhen?

That kid has always loved being clever, always making simple things complicated... it very well could be the same now...

As he pondered.

Suddenly, a piercing alarm sounded throughout the entire fleet.

"What? I've been exposed?"

Firefox was startled, his face showing a stunned expression, then his gaze fell on the several corpses that had just been twitching but now lay completely silent.

A huge sense of crisis suddenly surged in his heart.

He hurriedly leaped high into the air...

The next moment, those corpses exploded violently.

Scorching fire mixed with shrapnel and blood sprayed in all directions.

The blood mist is poisonous!

Firefox only sniffed lightly to understand... secretly amazed, realizing that while these warriors' strength might seem insignificant to him.

But unexpectedly, they all had pacemaker bombs bound within their bodies, which would explode when their hearts stopped beating unless a special method to disarm the bombs was employed, bringing down all enemies with them.

He hadn't anticipated it, being caught completely off guard.

And with this leap...

The carefully hidden trace was entirely exposed.

"Enemy attack!"

"There's an intruder on Blue Star... Alert, everyone alert!"

"Initiate defense protocols, quickly, everyone enter Level One battle readiness!"

The entire base swiftly sprang into action.

At that moment...

The most well-trained warriors of the Yalin Civilization, in an instant, armed the entire base to the teeth.

And Firefox, in mid-air, instantly became everyone's target.

No need for orders...

The base's instinctive defense systems, countless missiles were already targeting him.

Firefox hadn't even had time to react before being engulfed in endless fire and smoke.

"Never thought there really was an enemy invading Blue Star!"

Supreme Commander Zola wore a certain look of surprise on his face, clearly not expecting that after just three years of peace, Blue Star would be truly facing an enemy... or rather, even if it's not an enemy, it must be treated as such.

The base's detection system detected that seven pacemaker bombs exploded moments ago, meaning that seven elite warriors of the Yalin Civilization were killed.

Even if the perpetrator was from Blue Star, this account needed to be settled clearly, as it concerned the dignity of the entire Yalin Civilization.

Moreover, although this perpetrator had a human shape, he flicked a fiery red tail behind him... clearly, not human.

All the more reason not to hesitate in taking action.

"Kill him!"

Zola instructed coldly.

Although the attacker wasn't from the Titan Civilization, they had promised Blue Star that any enemy attacking within this decade wouldn't be spared, not to mention she killed their people.

Upon Zola's instruction, countless dazzling laser beams, accompanied by missiles trailing fiery tails, along with a large number of mass destruction weapons... completely sealed off every escape route for the intruder.

Subsequently, even more intense bombardment hit the target.

Under the lock of the thermal imaging sensors, trying to hide or evade, opponents found it impossible to escape the fate of being targeted.

No chance for the enemy to survive.

Especially since the enemy could silently infiltrate for so long, their individual strength was definitely extraordinary, possibly the top talent of a particular civilization.

Therefore, Zola did not dare underestimate them, the action was a sure kill!

But after a long time...

When the fiery smoke dispersed.

Everyone was stunned, looking at the charred figure in the sky...

At this point, Firefox's fiery red fur was scorched beyond recognition by the artillery barrage, exposing large patches of fair skin.

His body was burnt black in patches, looking extremely battered.

But not injured...

Not even a single drop of blood had dripped out.

At that moment, the only scarlet part of his entire body... likely were the animalistic wildness-filled eyes.

"That was my favorite fur, I've worn it for hundreds of years, and you destroyed it."

Firefox's eyes were filled with endless rage, looking at the Yalin Civilization warriors below who swiftly arranged themselves into a defensive formation, a growl rumbled from deep in his throat.

He said word by word: "Don't think you'll die so easily!"

"Open fire!"

Zola had no time to listen to his angry words, striking while the iron was hot, although shocked that the opponent was unscathed under such fierce bombardment... since it's an enemy, what they could do was channel all of their ammunition into the opponent's body.

Chapter 784 Who Is Responsible for Such Serious Casualties?\_2

But this time.

Prepared, Firefox in the air was even more agile than the Spiritual Bird.

Dodging this dense barrage of bullets and rain, accompanied by a sharp screech.

Fiery Blood Flame erupted around Firefox, charged toward the nearest battleship... moments ago, this very warship had several times struck at his vital points.

His clothes were damaged, thanks to this warship.

Bang~ Bang~ Bang~!!!

Firefox, though looking delicate and weak, had a body as hard as steel, crashing fiercely into the warship's hull, creating a huge gap with his bare force.

An intact Dreadnought-class Battleship, outfitted with extremely strong military power, was completely shattered into a splendid firework in the Cosmos by just a single charge from him.

Such divine power...

Left everyone dumbfounded.

"All warships disperse, fire the Radium Light Guns, lock onto his movement trajectory, don't let him accelerate again!"

Zola's pupils suddenly shrank. Though he knew the opponent, arriving here single-handedly, must have something to rely on. But he truly didn't expect the opponent's strength to be so formidable... Just this one force of collision, their Yalin Civilization had none that could match it.

Immediately, he urgently issued military orders loudly, changing strategies, absolutely not giving the opponent any opportunity to approach!

"Hahaha, it's too late for regret now, for the revenge of ruining my fur, today I'll make you pay the price."

Firefox's voice became increasingly sharp.

After destroying one warship entirely, he went on to destroy several nearby warships.

As if that wasn't enough to vent his anger, he charged into the crowd, with hands like claws, leaving a trail of wailing and misery.

Though just one person, traversing through thousands of troops, it was as if no one could stop him.

"Block him, seal him!"

Zola, however, felt not panic but joy, sneering coldly.

With such powerful strength, if the opponent was truly intent on escaping, he indeed had no means... But now that he rushed into the enemy lines to slaughter, it was clearly to vent the hatred in his heart.

Unfortunately, how could he know?

On the battlefield, vision is restricted, can only see what's immediately in front... lacking a judgment of the big picture, they could completely ensnare him with a celestial net on the periphery.

By the time he wants to leave, he'll likely find that getting through was free just moments ago, but when wanting to leave, it's already too late.

No matter how strong, once trapped in the vast military formation, it is destined to be starved to death... merely a matter of how many warriors' lives to sacrifice.

But no matter how many are sacrificed, could there still be any reasoning to let him go now?

Outside of Firefox's vision, the entire military formation moved into action.

Like chains intertwining, thoroughly sealing off any escape routes for Firefox.

Yet from Firefox's perspective, nothing seems to have changed at all...

These warriors, though strong, can hardly withstand a single blow.

"Die, die, die!"

He muttered angrily, each exclamation of 'die' resulted in a Yalin Civilization warrior meeting a gruesome end at his hands.

Wherever he passed, his fingertips were already stained with blood.

He killed for over an hour...

This battle, was so intense that even the warriors of the Yalin Civilization couldn't help but feel terrified.

Until even his fingertips felt the pain of abrasion.

Only then did Firefox slightly alleviate the anger in his heart.

Letting out a long howl: "You damn scumbags, just wait a few more days and I'll come back to properly deal with you... Hahaha..."

He soared high into the sky.

Yet, at the very moment he just leaped up, countless beams interweaved above his head, forming a dense cutting net, descending toward him.

"What?!"

Firefox never anticipated these!

Seeing his escape route completely sealed off, he roared in anger, with his fangs extending long from his mouth, his whole face almost taking on a beastly form, indicating he was already going all out!

His five fingers, with razor-sharp nails extending extremely long, scratched forcefully across the cutting beams...

The web laid by thousands of warriors was directly sliced apart by him.

But as soon as one net was broken, another net covered from above once more...

Firefox had no choice but to leverage his fall, inadvertently, another ragged piece of clothing was sliced away.

"For ruining my clothes, you deserve a thousand deaths!"

Firefox became even more furious.

Immediately, he was engulfed in the endless cannonade of the Yalin Civilization.

But after the artillery fire...

His blood-shadow rushed out, entering the crowd once again.

Screams of agony filled the land.

These bombardments to him, almost seemed impossible to break his defense.

"Go, go, don't give him a chance to breathe, the seven armies surround from the left wing, the Iron Armor Army meets him head-on, pile on top of him if you have to, just kill him!"

Zola shouted angrily, but his mind remained clear.

As the leading general of the Yalin civilization, he often dealt with top-tier powers by overwhelming them with ordinary warriors.

Although facing a top-tier power as formidable as the Firefox is a first... their warriors are not ordinary forces either but true elites of the Yalin civilization's Iron Blood Battle Legion.

Their chances of victory were extremely high.

One hour, two hours...

The fight gradually reached a fever pitch.

The Firefox tried numerous times to soar into the sky, only to be brutally intercepted by the light net.

While the warriors below charged fearlessly, at first he did not take them seriously, slaying hundreds, thousands...

But when he had slaughtered tens of thousands,

a slight sense of fear slowly crept into his heart.

Don't these warriors feel fear?

Damn it... Can I not escape?

Gradually.

The Firefox could feel that, although the gap between them was as vast as heaven and earth,

he was gradually beginning to struggle.

He felt the enemy's power snowballing, growing larger and larger, higher and higher.

Finally, the enemy struck him across the waist with a blade.

Although the blade did not draw blood...

But he had indeed neglected it.

"Kill!"

The more they died, the redder their eyes grew.

Obviously, the opponent was just one person, but the casualties were greater than those of an entire battle.

The people had long been driven to indignation; seeing the Firefox falter, they were overjoyed yet even more grief-stricken!

At present, they were even more fearless!

"Damn it... Don't let me escape, or I will kill every one of you!"

The Firefox's angry roars grew increasingly wrathful and frantic; he felt as though he was trapped in a vicious cycle.

But he had no means to escape...

Finally, as his strength waned,

innumerable light cords wrapped around him, tightly binding his feet.

Before, he should have dodged them... but now, everywhere he looked, there were enemies; as his strength drained, his vision blurred.

Immediately, countless warriors swarmed him, unable to pierce his body with blades, they simply used their sheer weight to hold him down.

Countless specially designed restraints wrapped around the Firefox.

Binding him tightly...

Suddenly, a warrior cursed, "Damn, looks so pretty, but turns out to be a freak with a stick... this bastard killed so many of our comrades, and now he's finally within our grasp, huh?"

Saying that, he fiercely grabbed the Firefox by his weak point.

The enemy was too strong, this was no time for reservations; grabbing the weak point would immobilize him even more effectively.

"Mm..."

The Firefox's eyes indeed widened suddenly, curling up fearfully without daring to move.

But his eyes showed a hint of shame and anger...

"Report to the general, the enemy has been captured alive; how should we handle him?"

His personal guard stepped up to Zola and said loudly.

"How to handle him?"

Zola gritted his teeth and looked at the battlefield littered with corpses in the distance.

It was only one person, yet he destroyed several of their warships and killed tens of thousands of their comrades.

This time, the losses were immense.

He said angrily, "Hand him over to Xu Lingjun, we fought this battle for Blue Star, for them... we paid too much. If he cannot provide us with a satisfactory resolution, we will immediately withdraw our troops!"

What was thought to be a routine ten-year defense,

unexpectedly encountered such a situation in the third year...

They naturally were not resigned and were angry.

Soon, the news of the enemy's capture by the Yalin civilization was transmitted to Blue Star's Lan City.

Upon learning of this.

Xu Lingjun's eyes brightened, then turned heavy with deliberation.

In the communication with Star Lord Mo Luo, he sighed, "I didn't expect the Yalin civilization to capture such a formidable enemy for us. Alas, I have nothing to repay them with; I can only execute this mysterious enemy publicly on Blue Star, using his soul and blood to mourn the fallen Yalin civilization warriors."

"That seems to be the only option."

Star Lord Mo Luo sighed softly.

Chapter 785 I just don't believe such masters would appear in a bunch.

The cost was immense, even far higher than the number of warriors lost in a battle...

Although the opponent was only one person, without a doubt, if he were to succeed in charging into Blue Star, the destruction he would cause would be catastrophic.

But now, the Yalin Civilization has helped them avert this disaster.

It should have been the warriors of Blue Star who perished...

Yet, the Yalin Civilization suffered heavy casualties, and Mo Luo couldn't say a word about it.

You see, no one wanted this kind of incident to happen.

Back then, he personally agreed to it, to protect Blue Star for just ten years. During this decade, no matter what happened, even if it wasn't the Titan Civilization attacking, the Yalin Civilization had to repel the enemies at the gate.

This was the agreement between the two civilizations...

He just didn't expect that this agreement would bring such terrible consequences to the Yalin Civilization.

Fortunately, this terrifying enemy should only be this one; although the casualties have been inflicted, after all, it's in the past.

That Xu Lingjun has already agreed to publicly execute that Firefox on Blue Star.

Such formidable combat power... yet he said to kill, and just kill, with no intention of recruiting at all.

This sincerity is indeed quite sufficient.

Seven days later.

Mo Luo visited in person.

Together with Xu Lingjun, they escorted Firefox to the guillotine.

"Bastards... what right do you have to kill me? Get that scoundrel Xiong Zhen out here, and stop playing these mysterious tricks!"

Firefox roared angrily.

Her delicate face made the nearby escorts couldn't help but soften a bit.

Then, inadvertently noticing the indecent exposure under the tattered clothing, they looked as if they had eaten something foul.

Once a beauty, alas has a... rooster?

And at this moment, Firefox stubbornly believed that all this was entirely Xiong Zhen's trick...

After all, if it weren't for Xiong Zhen, who else could have grasped their vulnerabilities so precisely?

Who else on Blue Star could understand them so well?

He still believed that everything was Xiong Zhen's plan to make him submit, and furiously said, "Alright, I admit defeat, let Xiong Zhen come out quick... I'm willing to serve him as my master, okay?"

"Who is Xiong Zhen?"

Mo Luo asked with some curiosity.

"Not too sure, after all, right after this person was brought over, he was sent directly to the execution ground."

Xu Lingjun sighed, apologetically saying, "We asked you to help us guard Blue Star, mainly to promote economic development between Blue Star and the Yalin Civilization, allowing us more time to improve our own economy and strength. But unexpectedly, it brought you such a massive disaster... I cannot let him live, I must kill him immediately, and also throw his body into the wilderness, burying it in the earth, separating his body so that he will never find peace!"

"Star Lord Xu is considerate."

"And the previously agreed ten years..."

"Rest assured, what is agreed upon must be fulfilled. Since we promised to guard for ten years, it cannot be less by a year, a month, a day, or even an hour."

Though Mo Luo's heart was aching, he had to endure it painfully for now.

This kind of terrifying enemy... one is enough. Now that it's captured, continuing to feel heartache would only make him seem petty and lacking in style.

At least, Blue Star owes them a huge favor now.

He doesn't believe there could be another enemy as monstrous as this one attacking Blue Star.

The losses have been incurred, naturally maximizing benefits is essential.

"Execute!"

Xu Lingjun waved his hand.

With Han Yun City personally wielding the blade, looking at Firefox with eyes full of malice, he slowly raised the blade...

"Wait, you can't be serious, right?"

Firefox's eyes filled with terror, looking around... surrounded by humans, beings once annihilated by the Demon Beasts.

Yet now, they have awakened.

Moreover, their strength is formidable.

In fact, quite a few have strength nearly equivalent to his current level... are they serious?

"Wait, where's Xiong Zhen? Tell him, I accept my defeat, I give up... don't kill me... please don't..."

"Go admit defeat to him in Hell."

With one stroke, Han Yun City beheaded him.

Firefox didn't even have time to scream for mercy... his head flew high, accompanied by a fountain of crimson blood spraying skywards.

Han Yun City took the large sack next to him, opened it, and placed Firefox's head inside.

Also shoved the body into it.

Tightening the sack's opening, he handed it to the later-arriving Yun Yi, saying, "Go and bury his body somewhere arbitrary."

"Yes!"

Yun Yi carried the sack, walking quickly outwards.

Clearly, Firefox's body was undergoing Spiritualization.

Blue Star is about to usher in another leap and evolution.

Xu Lingjun cast a glance at Mo Luo, who wasn't suspicious, smiling with satisfaction, thinking this was indeed like Huluwa, coming one after another to be delivered.

"Actually, Star Lord Xu might have interrogated this Firefox, at least to know what their purpose was for coming to Blue Star."

Mo Luo sighed and said.

"No, since he dared to attack our friends on Blue Star, I couldn't tolerate him for even a moment longer, no matter what schemes or plots he had, I had to take him out first, otherwise I would let down Star Lord Mo Luo!"

Xu Lingjun's smile faded in an instant, his expression turning guilty, he said, "This time, Blue Star owes the Yalin Civilization an enormous favor, rest assured Star Lord Mo Luo, from now on, the Yalin Civilization will forever be our friend."

Chapter 786 I just don't believe such masters would appear in a bunch\_2

"With just this one sentence from Star Lord Xu, any sacrifice we make is worth it."

Mo Luo said earnestly, "Rest assured, Star Lord Xu, we will fulfill what we promised. The warriors and warships lost this time will be compensated by our Yalin Civilization... we won't allow anyone to gossip."

Xu Lingjun said with difficulty, "This... won't that be too demanding for the Star Lord?"

"I don't believe that enemies of this caliber will repeatedly come to Blue Star. We haven't seen these people for so many years; how could it be that as soon as we start guarding Blue Star, they all show up? If that's true, it might actually mean they're targeting us."

Mo Luo sighed, "In any case, being able to gain Blue Star's friendship, those fallen warriors can rest in peace."

"Hmm, with such intentions from Star Lord Mo Luo, I'm deeply grateful. By the way, General Zola."

Xu Lingjun looked at Zola, sitting beside Mo Luo, and said solemnly, "Although, as Star Lord Mo Luo mentioned, enemies of this level are unlikely to continually come to Blue Star, we must consider the worst-case scenario. I propose that we form an alliance, and should strong enemies invade again, notify our Polar Star Battlefield. Before, out of respect for you, our warriors did not conduct reconnaissance on

your side, and by the time we realized it, the battle was over. Now that I think about it, I feel very guilty."

Zola said with difficulty, "But such singular and powerful enemies are exceedingly fast. Once war breaks out, it can reach its climax in just a few hours, supporting might..."

Mo Luo calmly said, "Zola, if Star Lord Xu has such intentions, just agree. Actually, if we had Blue Star's help before, maybe we wouldn't have lost so many people."

"Yes!"

The atmosphere between the two sides immediately became incredibly harmonious.

No one noticed...

Yun Yi departed with extreme speed.

At this moment, the previously bulging pocket had become flat.

"Huh?"

Mo Luo couldn't help but exclaim, sensing something strange in the air, and said in surprise, "Such fresh Spiritual Qi, is this also a specialty of Blue Star?"

"This is Blue Star's unique Spiritual Qi tidal flow, which appears periodically. I didn't expect Your Majesty to be so lucky to experience it."

"Indeed."

Mo Luo didn't think much of it, stood up, and said, "Then we shall leave now. In ten days, the number of lost warriors will be replenished... Rest assured, Star Lord Xu, I will not go back on my word on what I've promised!"

"Thank you for your trouble!"

Xu Lingjun accompanied Mo Luo and his entourage all the way to the warship.

They ascended into the sky, flying towards the Yalin Civilization.

Inside the warship.

"Your Majesty, do we really need to replenish their forces?"

Zola said worriedly, "What if another strong enemy strikes..."

"Replenish, as we've promised, and we've come this far. If we stop now... wouldn't our previous sacrifices have been in vain?"

Mo Luo shook his head and said, "After this, it should be stable for a while. It's been thirteen years for such an incident to happen, and there are another seven years. Even by probability, nothing should happen... It's unlikely that such powerful experts would gather in one place, right? If that's the case, then I'll accept it."

"Yes."

Zola responded.

Meanwhile, watching Mo Luo and his team's warship ascend into the air.

Xu Lingjun stood quietly.

Over here, Han Yun City appeared beside him, wiped the blood off the blade, licked it, and said in satisfaction, "Such pure Spiritual Qi, congratulations to you, Your Majesty. This time, Blue Star has gained so much opportunity... Let them make the sacrifices, while we take the benefits."

"In the future, give them a few more points in trade."

Xu Lingjun sighed lightly and said, "Although I feel guilty, the Yalin Civilization once had designs on us... If sacrificing them means fewer of our warriors die, I'll accept the label of being cold-hearted and thick-skinned."

"I never said you were cold-hearted or thick-skinned."

Han Yun City shook his head and said, "There is no justice or morality between nations, let alone between civilizations. I'd rather say I'm curious, you intend to voluntarily let Blue Star's warriors engage..."

"Haven't you noticed? A single person could defeat the sharp warriors of the Yalin Civilization to this extent... we can't look at them with the same eyes anymore. The Level 12 Demon Beast that Lu Ye knew was from hundreds of years ago. Now, who knows what kind of evolution they've undergone?"

Xu Lingjun said solemnly, "If we really let these Demon Beasts break in, it will be a disaster for Blue Star, so the Blue Star Warriors must take action and together with the Yalin Warriors, we must strive to destroy their viable forces on the outskirts of the planet!"

"I will immediately dispatch the Qisha Legion over, along with the newly developed S-Class Mecha units. Although they might not be a match for those Demon Beasts, they will definitely be formidable enough for them."

Han Yun City thought for a moment and said, "Forget it, I'll go personally. I've just killed this Firefox, and my hand wielding the blade is itching... These people are incredibly skilled, I really want to see it for myself."

"Don't underestimate the accumulation of centuries from others."

"Don't worry, with the weapons developed by your sister-in-law and the researchers over the years to counter them, I am fully confident. After wiping out these Demon Beasts, I still want to spar with you again."

Han Yun City waved, the long blade in his hand slowly retracted, returning to his body.

Chapter 787 I just don't believe such masters would appear in clusters\_3

Transmuting blood into a blade, the blade becomes solid.

At this moment, he had already honed himself into a complete weapon.

In terms of strength, he was just below Xu Lingjun, and in true combat power, even Lu Ye might not match him.

Xu Lingjun did not obstruct.

The arrival of Firefox was merely a signal.

Xiong Zhen was like this, and so was Firefox...

What was attacking was the essence of a Blue Star Civilization that had once developed to its peak.

A terrifying force infinitely close to Level 3, and possibly surpassing Level 3 in some aspects.

"I hope you embrace the fine tradition of Huluwa, coming one after the other... this way I can save myself a lot of trouble."

Xu Lingjun sighed softly.

He wasn't afraid of these enemies' onslaught in the slightest... but he had to admit, in some sense, these Demon Beasts were almost like a natural disaster to the ordinary warriors.

Casualties were inevitable.

Fortunately, the friends of the Yalin Civilization were holding the front line as shields.

In the blink of an eye...

Three months had passed.

During these three months, Blue Star was under lockdown.

No longer accepting tourists from other civilizations to visit Blue Star... there was no choice, with Firefox's death, the purity of Spiritual Qi on Blue Star had risen to a new level again.

Now, it was almost a paradise everywhere.

Spiritual Qi was so abundant it was nearly solidified, and even in the marketplace, a variety of rare plants were being sold... or rather, humans had finally discovered these Spirit Qi-laden plants were far more delicious and tasteful than typical vegetables.

This could no longer be explained by spiritual energy tides. If visitors from foreign civilizations kept coming, they might eventually notice something unusual.

As for Blue Star's seclusion.

Other civilizations naturally understood, not long ago, Blue Star was attacked by a powerful top-level master, who was fortunately eliminated by people from the Yalin Civilization.

They locked their country in defense, which was understandable.

And a large number of warriors were dispatched to gather at the borders, and many new scientific weapons were distributed to the Yalin Civilization's Iron Blood Battle Legion.

This deeply moved Mo Luo.

He didn't expect Star Lord Xu wasn't just being polite, but genuinely wanted to join forces with the Yalin Civilization to face a potential enemy, which was more likely not to come!

Just for a possibility, such a great price was paid.

Star Lord Xu, indeed a believer in people.

As for these weapons, Mo Luo didn't really take them seriously.

Because these weapons weren't very effective, or rather, their direct killing power was weak, but their abilities varied greatly...

Releasing wind pressure to disrupt surrounding storms; entering an overclocked mode that keeps anyone's brainwaves absolutely awake, immune to any hypnosis; and the gravitational device that can make the surrounding space enter a zero-gravity state.

And so on...

These weapons were highly targeted.

"It seems our capabilities have been leaked, Xiong Zhen... surely he's betrayed us, or maybe Blue Star is now under his control? If that's the case, then why summon us back?!"

"In any case, act carefully, don't get exposed, and avoid following in Firefox's footsteps!"

In a distant asteroid belt of the Blue Star Ring.

A number of humanoid beings with varying physiques... some just over a meter tall, others towering over seven or eight meters.

They gathered together, gazing at that blue planet.

With a hint of longing in their eyes.

But even they couldn't help but feel apprehension at the heavily laid out net of the Yalin Civilization.

Chapter 788 This Business is Very Doable

The development of the situation was really beyond Mo Luo's expectations.

In his view, after a whole thirteen years without encountering an enemy attack... now, just after encountering the enemy and successfully killing them.

How could it not return to the previous calm?

At the very least, giving them a few years of stability isn't too much to ask, right?

It was based on this thought that Mo Luo generously filled the previous personnel losses again, just to do a favor for Blue Star.

But who knew that Firefox's attack was just the beginning, not the end...

This time, this favor was a huge loss.

Just in the second month after Firefox's demise.

The army had just completed gathering...

The second wave of attack arrived.

And this time it was not just one person, but several, split into different teams, quietly infiltrating with the intent of penetrating through them into the interior of Blue Star.

And these people's strength was not inferior to that previous Firefox at all.

That's because they only just got their troops together, and learned from the last lesson, even if just in case... they had equipped much more powerful single-soldier explosive ordnance than before.

Plus, the specific weapons provided by Blue Star indeed played a huge role.

Or rather, played the key role.

These Demon Beasts were exposed immediately as they infiltrated...

Then, a great battle ensued.

Just one Firefox had caused them immense trouble before, now with several Demon Beasts attacking at once, it was only due to their thorough preparations this time, or else caught off guard, half of them might've been casualties.

The most advanced and highly precise weapons.

Combined with fully armed warriors who had long been prepared...

The Blue Star People did not break their promise; only a short while after noticing the Demon Beasts' invasion, the warships of the Nine Major Military Regions had already taken to the skies.

The speed at which they reached the battlefield was far faster than Zola and others imagined, obviously without any delay.

The two civilizations joined forces.

Brutally injuring one of them, driving them away.

But these enemies were as tenacious as maggots in bone...

Retreating briefly, they soon returned, mostly testing this time.

Repeated tests...

Each time beaten back by the warriors of the Yalin Civilization.

Although Blue Star Warriors also helped, after all, they were only reinforcements, and the main force was Yalin Civilization, not them.

By now, Mo Luo was already a bit puzzled...

This doesn't make sense, right?

Clearly, Blue Star was peaceful before, like nothing, and after they came over, in just three years, it seemed like all the cosmos' experts were targeting Blue Star.

Every few days, an attack would occur.

Though relying on Blue Star's help, every attack could be repelled... yet the losses of the Yalin Civilization were indeed real.

But Mo Luo couldn't voice the idea that Blue Star should take responsibility.

Because he was a bit bewildered now, though the enemies seemed to be after Blue Star, they also seemed to be after them.

After all, when confronting the enemies, their deep-seated hatred towards the Yalin Civilization and their decisive methods made them feel... the enemies came fiercely, targeting them.

The reason for not attacking the main star was entirely to eliminate this force first, then focus attacks on the main star to prevent being surrounded from inside and outside.

Regrettably, Mo Luo didn't know that Firefox's identity was special, maintaining ambiguous relationships with many Demon Beasts.

Now that they knew Firefox was captured by these people... naturally, they harbored significant animosity, which inadvertently misled Mo Luo.

Mo Luo couldn't determine whether the enemy targeted Blue Star or Yalin Civilization, so he dared not retreat.

One has to know... the enemy's strength was indeed terrifying.

If they were really targeting them, staying here with Blue Star's help, but once back on their own planet, Yalin Civilization alone might not be enough to counter them.

And staying here, Blue Star could provide support.

Even Xu Lingjun, the so-called first expert of Blue Star, hadn't taken action, yet the two civilizations had already resisted these strong enemies...

"It's probably because Blue Star doesn't dare ask us to leave that's the reason, right?"

Mo Luo quietly thought: "Because if the enemies once head to Blue Star, and our Yalin Civilization leaves, Blue Star is destined to be doomed... A fifty-fifty chance, who would dare gamble easily?"

Once becoming the Master of respective civilization.

They are never aligned with making risky bets...

They dare not gamble.

Even if only ten percent, Mo Luo dare not gamble.

Maintain the current situation... even if there's a fifty percent chance we're simply blocking disaster for others, isn't there also a fifty percent chance that others are blocking disaster for us?

"But isn't it too unfavorable for us to passively resist like this?"

During an audience with Mo Luo, Zola couldn't help but express his opinion.

He said in frustration, "In fact, with the combined strength of Blue Star and our Yalin Civilization, our absolute strength is far above those enemies, but they come and go like the wind, without any signs, and their individual strength is overwhelmingly strong, leading to our powerlessness, and we can only defend passively, leaving all the initiative in their hands..."

Chapter 789 This Business is Very Doable\_2

Especially since their strength is too strong, and the Yalin Civilization's front line is very long and heavily fortified, it's like trying to pierce a piece of leather with a needle. No matter how tough the leather is, it can still be pierced through with one stab, right?

"I know about this issue too. Taking the initiative to attack is the way to break the stalemate."

Mo Luo smiled bitterly and said, "But right now... forget it, I'll go discuss it with Star Lord Xu Lingjun, after all, these enemies are apparently coming for their Blue Star, and they also bear a certain risk."

"Yes."

Zola responded.

At this moment.

In the asteroid belt, although there is no air, with the formidable strength of these Level 12 Demon Beasts, they've long reached a state of creating their own domain. With over a dozen of them gathered, they almost opened up a small world hundreds of meters wide.

In fact,

if they weren't worried about being discovered, this domain could be expanded several times over.

Thousands of years of accumulation and heritage; they are the essence of the once peak Blue Star Civilization... Their very existence is equivalent to a civilization.

A civilization not inferior to a Level 3 Civilization.

But now it seems they are also encountering a formidable enemy.

"I didn't expect the enemies to be so strong, even Dadi was injured by them."

The person speaking had a bushy head of blood-colored mane, appeared greatly robust, clearly a being of unmatched great strength.

Amongst the more than a dozen Demon Beasts, he was implicitly the leader...

Beside him, a young man with a spotted furcoat frowned and said, "What's even more bizarre is that their strategies are highly targeted at us, there must be someone very familiar with us giving them guidance. Who betrayed us? Xiong Zhen or Firefox?"

"It can't be Firefox. If it were Firefox, he would know my fatal weakness. If he betrayed us, I wouldn't just be heavily injured; I would probably be dead long ago."

At this time, a robust man with lush body hair, who was crouching on the ground, slowly stood up.

He said, "It's Xiong Zhen, definitely Xiong Zhen... He was the one who initially sent messages asking us to return. I now suspect he might have known that Blue Star wasn't destroyed decades or even a hundred years ago, and has been laying out plans here for over a hundred years. Now, when the time is ripe, he sent the signal to lure us back into an inescapable net."

"Dadi's words make a lot of sense!"

Upon hearing this, the other Demon Beasts felt a chill in their hearts.

Isn't it?

These Demon Beasts are powerful, but if there truly is a massive plot laid out over a hundred years... they too would find it hard to survive.

In fact, has Firefox not died?

And they, if not for accidentally meeting on the way back and forming a team, and then coincidentally witnessing the scene after Firefox's death.

They might have also fallen into the enemy's trap without realizing it...

"So, what should we do now?"

One of the women, who transformed from Blue Snake and whose name was Lan Ling, spoke.

She was quite beautiful, but her chin was too sharp and appeared abnormal. She asked a bit timidly.

"Wait!"

"We are now in a proactive position. We only need to send out a signal, let all the comrades gather and rendezvous with us. I fear Xiong Zhen would never imagine we'd all join forces against him. When that time comes, I will surely let him die in endless despair and remorse, regretting his stupidity before he meets his end!"

Xue shi sneered, "A monkey is just a monkey, even the vegetarian dares to offend me? I will make him feel his stupidity before he dies."

He instructed, "Also, do not stop these few days. Keep disrupting their military's morale, not letting them feel at ease. If anyone manages to enter Blue Star by chance, remember to head to the Secret Realm immediately... Xiong Zhen is definitely hiding in the Secret Realm. As long as we kill him, they will be leaderless, and their defeat will be inevitable!"

"Understood!"

The Demon Beasts all nodded in unison.

Xiong Zhen's strength is indeed strong, but among them, he's nothing extraordinary. He must be colluding with other forces to have such big ambitions, undoubtedly bringing Blue Star's strength from outside.

The thought of allowing their homeland to be trampled by outsiders filled them with hatred, wishing to kill Xiong Zhen right away.

This bastard, colluding with outsiders to harm his kind, must not be easily forgiven.

Even though they themselves know that the possibility of breaking into Blue Star is... almost negligible unless the enemy allows them entry.

But if the enemy were willing to allow their entry, why bother blocking them here now?

Blue Star.

Lan City.

Xu Lingjun closed the communication in front of him and shook his head, smiling, "Mo Luo can't endure anymore and has proactively asked me for help, wanting to attack those Demon Beasts."

Li Jingjun curiously asked, "Why hasn't he withdrawn yet? In this period's battles, at least 300,000 warriors have died miserably... To this extent, no matter how much he wants to befriend Blue Star, he should consider a retreat for himself, right?"

"Perhaps he can't figure out whom they're really after. But given their proactive request, I'm really in no position to refuse."

Xu Lingjun shook his head and said, "Just that with his proposed initiative to attack... It seems they are more eager than I am to kill these Demon Beasts."

"After all, such heavy casualties each time; it would be hard on anyone, wouldn't it?"

Li Jingjun frowned and said, "But this way... if we launch a full-scale assault on these Demon Beasts..."

"That would be too wasteful."

Chapter 790 This Business is Very Doable\_3

Xu Lingjun shook his head and said, "Such a good Spiritual Energy Source, letting them die outside is too easy for them... It seems we need to find a way to have a proper negotiation with that Mo Luo."

"Don't be too harsh on them."

"When they sold weapons to the Titan and secretly diluted our Blue Star resources, they certainly didn't worry about being too harsh on us."

During this time, the last legacy of the Titan Civilization has been completely absorbed by Blue Star.

Especially with the decryption of the Eternal, Xu Lingjun learned many things he didn't know before... For instance, the initial secret of why the Yalin Civilization risked offending Blue Star to help the Titan Civilization escape the Milky Way Galaxy.

Knowing this, he truly feels no guilt at all about having undermined the Yalin Civilization.

Want me to feel guilty?

Fine, first return the lives of our warriors who were killed by your weapons.

Xu Lingjun thought for a moment and said, "I actually have an idea about this."

So...

When Xu Lingjun contacted Mo Luo again.

"What? You want to activate the Mutual Aid Association?"

"That's right, the strength of the enemy now has far exceeded our imagination. Even if our two civilizations join forces, we probably won't be able to wipe them out completely."

Xu Lingjun said solemnly, "Moreover, the enemy moves through the Cosmos without a trace. In my view, we should ask all civilizations to help. I am willing to contribute my Blue Star as a trap, let them enter Blue Star, and then kill them inside Blue Star."

"Star Lord Xu!"

Mo Luo gave Xu Lingjun a deep look, his eyes already full of gratitude.

Even sacrificing his own homeland... If these people strike back fiercely, Blue Star would likely suffer great destruction.

Although it's highly possible that the enemy is targeting Blue Star, there's also a chance they might be targeting them, so in this sense, Blue Star is taking on all the risk for them.

"In that case, we agreed when the Mutual Aid Association was established that requesting assistance requires compensation. This compensation will be borne by my Yalin Civilization, no need for Blue Star to expend more."

"Good!"

Xu Lingjun was naturally happy with this arrangement.

Therefore.

Three days later... all civilizations knew.

Blue Star and the Yalin Civilization encountered a formidable common enemy.

The enemy is so powerful that even their two civilizations combined do not have absolute confidence in defeating them.

Therefore, they hope the allies of the Mutual Aid Association can step in to lend a helping hand, to completely eliminate this powerful enemy.

As for the benefits...

It's not a problem at all. The Yalin Civilization is considered one of the wealthiest among civilizations. They promised that as long as everyone helped, they would not let anyone leave disappointed.

It was not surprising that the Yalin Civilization wasn't a match... As everyone knows, the Yalin Civilization is renowned for its wealth, but their soldiers' combat capabilities rank nearly at the bottom among all civilizations. Otherwise, they wouldn't resort to renting out weapons.

But even Blue Star actively inviting help was unexpected for everyone.

Help or not?

Help!

Must help, Blue Star is the future Level 3 Civilisation. The opportunity to curry favor with the leading race is exceedingly rare.

Unknowingly, Xu Lingjun was also secretly delighted as he realized through Firefox that while these Demon Beasts have internal conflicts, they are very united outwardly...

The Yalin Civilization killed Firefox, inciting their wrath. If other civilizations are also dragged in and their people are killed.

The former strong enemy of Blue Star, wouldn't it become the entire Galaxy's enemy?

This business... certainly can be done.
