

Overlord 1181

Chapter 1181:

The one at Foundation Establishment is Huang Chengcheng.

Ever since Yang Fei gave that genuine Foundation Establishment Pill to Huang Chengcheng, he has been diligently preparing for Foundation Establishment.

As a Taoist inheritor, the cultivation technique he practices is the same as Yang Fei and Qin Yanyang's, though his talent isn't as good as theirs, but he compensates with a longer cultivation time.

Moreover, during his times in the Hidden Sect, among competitors of the same age and realm, Huang Chengcheng always stood out as the best.

However, for the sake of rebuilding the Taoist sect, he didn't spend much effort on cultivating.

Now that Earth has entered the cultivation era, succeeding in Foundation Establishment can double one's lifespan, and becoming a cultivator offers the chance to seek greater longevity and power. Naturally, Huang Chengcheng has become more focused on cultivation.

If it were someone else, they might have started Foundation Establishment as soon as they got the Foundation Establishment Pill, but Huang Chengcheng is quite steady.

In these twenty months, he frequently visited the seven disciples of the Lingxiao Sect at the Foundation Establishment Stage, such as Ye Wuya, to learn what to pay attention to in Foundation Establishment, and summarize experiences.

After twenty months of cultivation and preparation, he felt that his cultivation realm, as termed in the cultivation world, had long reached the pinnacle of the ninth level of Qi Refinement, completely capable of Foundation Establishment.

So, he informed Yang Fei and Qin Yanyang beforehand, and after receiving a promise from the two disciples to act as protectors, Huang Chengcheng began Foundation Establishment.

After consuming the Foundation Establishment Pill, Huang Chengcheng began the process of Foundation Establishment according to the Foundation Establishment Technique.

This closed door meditation lasted for half a month.

On the seventeenth day, the cultivators on White Jade City discovered that Huang Chengcheng had achieved the momentum of the Foundation Establishment Realm.

Ye Wuya and the disciples of Lingxiao Sect nodded in satisfaction and said to Yang Fei and Qin Yanyang, "Fellow Daoist Huang is steady and experienced, and his path to Foundation Establishment is very smooth, it's done."

Yang Fei and Qin Yanyang's Foundation Establishment was different from this kind of Foundation Establishment, but they had also experienced Wang Chunfeng's Foundation Establishment last time, so they could understand Huang Chengcheng's current situation.

Compared to the momentum during Wang Chunfeng's Foundation Establishment last time, Huang Chengcheng's current momentum is more stable.

At this moment, Yang Fei heard transmission from Helian Zhan: "Those two from the Lingxiao Sect have come again."

Yang Fei's heart skipped, and he transmitted back to Helian Zhan: "Please let them come in."

A moment later, Hai Mo and Yan Wei, led by Helian Zhan, arrived outside Huang Chengcheng's wooden building.

"Unexpectedly, there's already an Earth cultivator attempting Foundation Establishment so soon. It's truly a cause for celebration," Hai Mo and Yan Wei said with a smile.

Yang Fei returned the greeting with a salute, saying, "This is my master in Foundation Establishment. As a disciple, I must act as protector here. Since you two have come from afar, I must ask you to wait for a few days. Once my master has stabilized his realm, I will discuss matters with you both."

Hai Mo and Yan Wei hurriedly said, "It's no problem."

While they were talking, the aura of the Foundation Establishment Stage finally reached completion.

Hai Mo smiled and said, "Hahaha, this fellow Daoist has succeeded in Foundation Establishment."

Yan Wei also said, "Indeed, in such a complete state, this fellow Daoist's talent is quite good. The path of cultivation in the future will be smoother."

Yang Fei was pleased to hear this.

Qin Yanyang also showed a look of joy.

On the side, Wang Chunyang was a bit puzzled and couldn't help asking, "Is there such a saying?"

Yan Wei glanced at him and thought, although this person is the same as me, all at the Foundation Establishment Early Stage, but his gaze is especially sharp, and his aura is extraordinary, giving me an inexplicable sense of danger, making me secretly startled.

These Earth cultivators are really a bunch of oddities.

He said, "Indeed. Based on the state at the time of Foundation Establishment, one can detect whether the Foundation Establishment was smooth. If it is smooth and complete, it indicates that this person's cultivation is steady, each step is solid, and the future path of cultivation will be relatively smooth as well."

Ye Wuya and Li Yue, among others, nodded in agreement, indicating there is such a saying.

Yang Fei asked, "So, has my master already succeeded in Foundation Establishment?"

"Yes," Ye Wuya replied.

Yang Fei's expression was a bit odd.

He remembered that his and Qin Yanyang's Foundation Establishments were quite dangerous, with lightning strikes and thunderbolts, so why was someone else's Foundation Establishment so smooth, calm, unlike the intense aura of the formed Foundation Establishment Stage?

Wang Chunyang and the rest who had witnessed the Foundation Establishment scenes of Wang Chunyang and Helian Zhan, showed puzzled looks as well.

Why was Huang Chengcheng's Foundation Establishment different from their impression?

However, it was Ye Wuya and the seven disciples of Lingxiao Sect who were completely relieved.

They were truly worried that Huang Chengcheng's Foundation Establishment would also attract lightning to temper the body.

Fortunately, this time the Foundation Establishment situation was like the Foundation Establishment situation in the cultivation world.

Several people couldn't help but glance at Yang Fei, Qin Yanyang, and Wang Chunyang again.

Coupled with Helian Zhan, these four seemed like anomalies, with abnormal Foundation Establishments that attracted lightning tempering.

Linglong hesitated for a moment and couldn't help but say, "Could it be that due to the effect of taking the Foundation Establishment Pill, the body has already been tempered by the Foundation Establishment Pill, therefore no need for a thunder tribulation to temper the body?"

Ye Wuya, Li Yue, and several others' eyes brightened, thinking there might be such a possibility.

Hai Mo and Yan Wei didn't know about the two different kinds of Foundation Establishment on Earth, but upon hearing the words thunder tribulation tempering the body, their expressions changed dramatically. Yan Wei said in shock, "Thunder tribulation? Junior Sister Linglong, what thunder tribulation?"

Linglong pointed at Yang Fei, Qin Yanyang, and Wang Chunyang, saying, "The three of them, and the Fellow Daoist Helian Zhan who brought you here via the array just now, all encountered thunder tribulation to temper the body during Foundation Establishment."

"What?"

Hai Mo and Yan Wei were stunned, with a look of disbelief.

Just a simple Foundation Establishment, how could it attract the attention of the Heavenly Dao, bringing down the thunder tests and selection?

Even during Core Formation, one cannot attract thunder tribulation tempering, only during the attempt to reach the Nascent Soul Stage does one need to undergo the tests of the Heavenly Dao's thunder tribulation.

Why do Earth cultivators have to endure thunder tribulation even during Foundation Establishment?

Hai Mo and Yan Wei couldn't help but doubt the authenticity of Linglong's words.

They looked towards Ye Wuya and Li Yue's fellow sect brothers to inquire, but saw they all had the same peculiar expressions that confirmed this situation, making them secretly astounded.

Yang Fei sensed for a moment and thought that since his master had gradually succeeded, the next step would be stabilizing the realm, no longer requiring his protection. He thus directed to Yan Wei and Hai Mo, "What brings you here this time?"

The rest all looked at the two.

Hai Mo and Yan Wei exchanged a glance and conjured three or four storage bags as if by magic. Then, from these storage bags, they took out numerous magic swords, the talisman pen needed for appendix creation, talisman paper, demon beast blood, and a lot of medicinal materials needed for alchemy, as well as many medicine bottles filled with elixirs, and alchemy furnaces and other cultivation world materials commonly used by cultivators.

Upon seeing more than twenty magic swords, the eyes of the Earth crowd lit up.

Particularly Wang Chunyang, Zhao Wannian, Qin Sizhong, and Gong Haichao, who all used swords.

They were immensely envious of the magic swords in the hands of Ye Wuya and others from Lingxiao Sect, knowing that these magic swords, besides being of different quality from ordinary swords, also possessed a certain spirituality. After a cultivator drives them, they can achieve harmony between human and sword, and even sword flight.

Now the Lingxiao Sect has brought more than twenty magic swords, so they begin to deliberate, thinking they should also be able to get one.

Chapter 1182:

Looking at these things, Yang Fei and Qin Yanyang were also quite delighted.

Qin Yanyang glanced at the two people and asked suspiciously, "There's still three and a half years left until our originally agreed five-year trade term, isn't there? Why have you come now?"

Hai Mo said, "We've come this time to settle the sales payment for the two bottles of genetic liquid medicine from last time."

Everyone's eyes lit up slightly.

Those two large bottles of genetic liquid medicine were highly valuable to the Cultivation World of Earth. However, compared to this huge pile of Elixirs, Magic Swords, and other cultivation resources unavailable on Earth, they seemed like nothing.

However, Yang Fei frowned.

His gaze swept over the merchandise they laid out and he asked with a smile, "Are you saying that the two bottles of genetic liquid medicine I entrusted to Lu Chen and Gan Qian can only purchase these goods you've brought?"

Hai Mo and Yan Wei detected the implication in Yang Fei's tone and took a deep breath.

Indeed, so many items couldn't match the value of those two bottles of genetic liquid medicine.

These Earth cultivators aren't so easy to fool.

But since it was a price negotiation, they had to maintain their composure.

Although the two knew the price wasn't sufficient, they remained calm. Yan Wei said, "Yang, here we have ten Foundation Establishment Pills, among which three are authentic Foundation Establishment Pills. In addition, there are various pills like True Essence Pill, Qi Gathering Pill, Five Elements Blood Coagulation Pill, Nourishing God Pill, Face Stabilizing Pill, Longevity Pill, and Spirit Feeding Pill."

Our Sect Master has instructed us to bring all the pills from Lingxiao Sect's pill treasury, except for those needed for daily expenses suitable for Earth's Cultivation World.

Furthermore, these Magic Swords were all personally crafted by our high-ranking Artifact Refiners from Lingxiao Sect, and they are considered top-grade Magic Swords in the Cultivation World of the Southern Domain.

These talisman pens are top-grade, and with them, Talisman Masters can draw talismans and make talisman papers with half the effort and twice the effectiveness."

Hai Mo also said, "These talisman papers are of excellent quality, and among them are specially used demon beast skins for making various types of talisman papers. The blood medicines from these demon beasts are one of the most essential components for synthesizing pills. If Earth's cultivators want to grow and learn the Alchemy Technique, these raw materials are indispensable. These few Alchemy Furnaces too are made by our top Artifact Refiners from Lingxiao Sect."

Yan Wei continued, "The value of these items, even in the Cultivation World of the Southern Domain, is substantial. For Earth's Cultivation World, which urgently lacks these resources, they are even more priceless."

Ye Wuya and the others also nodded in agreement silently.

Not to mention this entire cargo, even just a small part of it would be considered immense wealth for any Foundation Establishment Cultivator; these items would be enough to drive countless Foundation Establishment Cultivation families mad with desire.

In the eyes of such a high-ranking Two-star Sect as Lingxiao Sect, Earth is just a low-level Cultivation World, where the strongest cultivators only reach the Foundation Establishment Stage. Offering so many cultivation resources shows their utmost sincerity.

However, Yang Fei still remained very calm.

Even Qin Yanyang appeared indifferent.

Qin Yanyang said, "In your Southern Domain, how many top-grade Spirit Stones could these items sell for altogether?"

Hai Mo and Yan Wei took a deep breath, feeling quite bitter inside.

These Earth cultivators are indeed difficult to deal with. Despite saying so much, they remained absolutely clear-headed and were not swayed.

The Earth cultivators present scanned these items with their Divine Sense, counting them one by one.

Qin Yanyang held the ten Foundation Establishment Pills and said, "Based on the last transaction's price, a single subpar Foundation Establishment Pill sells for fifteen thousand to twenty-five thousand lower-grade Spirit Stones, correct?"

Hai Mo swallowed his saliva and nodded.

The normal price for a subpar Foundation Establishment Pill is between three thousand to five thousand lower-grade Spirit Stones. The price Qin Yanyang mentioned aligns with those of the workshop and some black market auctions, over five times the normal price.

More importantly, since they already discussed this price in their last transaction, they couldn't refute when asked now but could only nod.

Qin Yanyang smiled and said, "There are seven subpar Foundation Establishment Pills here, calculated at twenty-five thousand each, that totals to one hundred fifty-five thousand lower-grade Spirit Stones. As for the three authentic Foundation Establishment Pills, at five times the price of a subpar pill, they require only three hundred seventy-five thousand lower-grade Spirit Stones, bringing the total price for the ten Foundation Establishment Pills to five hundred thirty thousand lower-grade Spirit Stones, or fifty-three top-grade Spirit Stones, correct?"

Hai Mo and Yan Wei were numb by this point. Regardless of whether her calculations were accurate, they nodded as it seemed generally correct.

Previously, trading these ten Foundation Establishment Pills for fifty-three top-grade Spirit Stones would've been highly profitable.

But now, they no longer had any delight at making a profitable deal.

Because they were aware that the Earth Cultivation World's supply of top-grade Spirit Stones was abundant.

Even with fair prices set above the market rate at workshops, they still felt like they were selling cabbage-priced goods.

Qin Yanyang continued, "As for these pills, name your price, and I'll calculate it. For the other items, please give us the workshop prices from your Southern Domain, and we can pay a high price. Let's see how much this entire batch is worth in top-grade Spirit Stones."

Hai Mo and Yan Wei fell silent.

Even if other items had more outrageous pricing, marked up tenfold or even a hundredfold, they might only sell for ten thousand top-grade Spirit Stones at most.

But for the Earth Cultivation World, which last time provided seventy-two thousand Spirit Stones in a single offering and compensation, ten thousand top-grade Spirit Stones was mere pocket change.

After a brief silence, Yan Wei said, "Fellow cultivators, we cannot assess this shipment with the normal Southern Domain prices. To Earth's Cultivation World, every single item here is incredibly valuable, something you couldn't buy even if you had top-grade Spirit Stones, right?"

Yang Fei chuckled and said, "That's about right."

Yan Wei immediately felt encouraged and said, "So our Lingxiao Sect is providing everything we can in these cultivation resources, showing our utmost willingness to cooperate. Thus, we hope you can offer us a reasonable price, one acceptable for Lingxiao Sect, for the genetic liquid medicine."

Yang Fei smiled and asked, "May I ask if you have already tried our genetic liquid medicine and seen its effects?"

Hai Mo and Yan Wei did not know the secret, but since the Sect Master wanted to purchase the genetic liquid medicine in large quantities, it must have showcased its benefits. Thus, they nodded.

"Since its effects have been proven, you should know that this medicine is an invaluable treasure for the Cultivation World. By sharing it with Lingxiao Sect, we've already shown our utmost sincerity from the Earth's Cultivation World. If, and I stress if, the Flame Moon Sect, the Great Dao Sect, and the families of Feng, He, and Zhong also found out about the genetic liquid medicine, do you think it would be difficult for me to wish for the goods you've brought?" Yang Fei asked with a smile.

Hai Mo and Yan Wei's expressions changed drastically.

Ye Wuya and the other disciples of Lingxiao Sect were also taken aback, growing tense.

Though Ye Wuya and others speculated this was Yang Fei's negotiation tactic, they still got nervous.

If news about the genetic liquid medicine spread across the Southern Domain, it was feared it would quickly leak beyond the Southern Domain, at which point not only Earth but the entire Southern Domain's six major Cultivation Forces would face massive external challenges.

Chapter 1183:

Hai Mo and Yan Wei both drew in a cold breath.

The high-level members of Lingxiao Sect greatly value the Genetic Liquid Medicine. If that teleportation channel could allow stronger people to come, it's likely that the Nascent Soul Stage giants of the Sect Master would come personally.

But due to the restrictions of the teleportation channel, only cultivators below the Foundation Establishment Stage can come. Therefore, Lingxiao Sect, even though they know that Earth possesses such a miraculous medicine as the Genetic Liquid Medicine, still has no choice but to cooperate with them.

Moreover, this matter absolutely cannot be let known to other cultivation forces in the Southern Domain.

Even if this secret is eventually revealed one day, Lingxiao Sect must ensure that they are the leader among the six major forces of the Southern Domain before that happens.

Now with Yang Fei using this to threaten them, Hai Mo and Yan Wei were left speechless.

If you put it like that, then what's the point of negotiating at all?

After a brief silence, Hai Mo looked at Yang Fei and said, "If you really wanted to do this, you wouldn't have waited until now, nor sought to cooperate with only our Lingxiao Sect."

Yang Fei nodded and said, "Yes. That's why I sincerely wish to cooperate with Lingxiao Sect, and I hope the Lingxiao Sect can treat our Earth's cultivation world equally and stop looking down on us. Please respect our intellectual property rights."

Hai Mo and Yan Wei didn't understand what he meant by intellectual property rights, but they understood the core meaning. Yang Fei simply hoped that Lingxiao Sect could adjust their attitude and stance to continue fair and just trading with him.

"One hundred thousand top-grade spirit stones," Hai Mo stated directly. "To be honest, top-grade spirit stones are scarce and precious resources across the entire cultivation world of the Southern Domain. This price is already the final bottom line after discussion among several Nascent Soul Stage experts of Lingxiao Sect."

Ye Wuya and others' pupils slightly contracted.

Although they were merely Foundation Establishment cultivators in Lingxiao Sect, they were somewhat aware of the sect's revenue and knew that the sect's annual total income of top-grade spirit stones did not exceed two hundred thousand pieces.

And that's just the income. The operation of such a large two-star sect requires a huge consumption of spirit stones.

Therefore, to offer such a price after discussion by several Nascent Soul Stage experts is indeed full of sincerity.

However, Yang Fei, Qin Yanyang, and the other cultivators from Earth were unimpressed.

In their view, exchanging one hundred thousand top-grade spirit stones for a large bottle of Genetic Liquid Medicine wasn't cheap, but it wasn't expensive either.

The production of spirit stones in White Jade City was too high and its quality too excellent, making Earth cultivators not have a deep concept of top-grade spirit stones, not taking ten or twenty thousand seriously at all.

And the Genetic Liquid Medicine was a valuable item.

Even though it can be mass-produced, no one knows if the raw materials for extracting Genetic Fluid can continue to be found after Earth's drastic transformation, and if not, whether alternative materials can be sourced.

So the supply of Genetic Liquid Medicine is not limitless.

What's more, even if it could be supplied infinitely, it's still a priceless treasure to the cultivation world right now, so trading a large bottle for only one hundred thousand top-grade spirit stones, all cultivators from Earth felt it wasn't worth it.

Therefore, after a brief contemplation, Yang Fei shook his head and said, "Your Lingxiao Sect is not sincere enough."

Hai Mo's expression changed, hurriedly explaining, "Fellow Daoist Yang, the Sect Master offering such a price is already full of sincerity. Perhaps one hundred thousand top-grade spirit stones aren't much to you, but for a two-star sect like Lingxiao in the Southern Domain, the annual spirit stones amount only to the equivalent of two hundred thousand top-grade spirit stones."

Upon hearing this, Yang Fei, Qin Yanyang, and the other Earth cultivators were slightly moved.

Is the Southern Domain cultivation world really so scarce of top-grade spirit stones?

If that's truly the case, then offering such a price indeed shows sincerity.

Hai Mo continued, "Moreover, for any cultivator, ten thousand top-grade spirit stones is a massive fortune. To put it bluntly, a cultivator with dual spirit roots doesn't need a thousand top-grade spirit

stones' worth of resources from Qi Cultivation to Foundation Establishment Stage. Therefore, one hundred thousand top-grade spirit stones are enough for a sect or family to train ten Foundation Establishment cultivators."

Yan Wei nodded. "Yes, so the price offered by our Sect Master is indeed fair. If you raise the price any higher, this Genetic Liquid Medicine will be too luxurious for Lingxiao Sect at present, and purchasing it in bulk might end up being more of a loss than a gain."

Li Yue couldn't hold back and said to Yang Fei, "Fellow Daoist Yang, Junior Brothers Hai Mo and Yan Wei are right. With such a high price, Lingxiao Sect is already very sincere. If you don't care for spirit stones, you can make other requests for Lingxiao Sect to exchange other goods."

Yang Fei glanced at him and remained silent.

He realized that to offer one hundred thousand top-grade spirit stones for a large bottle of Genetic Liquid Medicine, Lingxiao Sect is indeed bleeding.

Actually, he wasn't interested in how many spirit stones Genetic Liquid Medicine could fetch at Lingxiao Sect.

The Earth's cultivation world currently lacks spirit stones the least, but other cultivation resources are what they truly lack.

The reason for bargaining was to make the high-level members of Lingxiao Sect understand that his Genetic Liquid Medicine is priceless and not for free.

Seeing Yang Fei's silence, Hai Mo spoke again, "Among the six major powers of the Southern Domain, by choosing only our Lingxiao Sect to cooperate with, Fellow Daoist Yang indicates you've a bond with us. Before leaving, the Sect Master asked me to convey to Fellow Daoist Yang that since we are allies, Lingxiao Sect will ensure Earth's peace and not let the serene and comfortable cultivation environment on Earth be greatly disturbed. As long as Lingxiao Sect maintains its leading position in its dealings with Earth in the Southern Domain, the peace of the Earth's cultivation world will be assured."

Yang Fei's heart tightened.

This was both a promise from Lingxiao Sect's Sect Master and a warning and reminder.

The true intent of choosing to cooperate with Lingxiao Sect was to ensure peaceful coexistence between the two realms, wasn't it?

Now that Lingxiao Sect has provided assurance, and Earth has gained valuable time for development during the early stages of spiritual energy revival, that is enough.

Thinking of this, Yang Fei laughed heartily and said, "Alright, with such words from your Sect Master, that's enough. Let's go with your mentioned price. And, considering the kindness of your Sect Master allowing you to bring so many goods, we'll overlook the two large bottles of Genetic Liquid Medicine last time."

Hai Mo and Yan Wei were overjoyed, not expecting Yang Fei to be so generous, essentially gifting two large bottles of Genetic Liquid Medicine.

Everyone else also slightly relaxed.

The cultivators from Earth feared the relationship would strain again.

Over the past year, everyone has focused on their cultivation and progressed rapidly. Such tranquil days were truly what cultivation and practice were about, so no one wished for another conflict with people from the Southern Domain.

"Besides discussing the price, do you have any other purposes for coming this time?" Yang Fei asked.

Hai Mo took a deep breath and said, "Yes, we hope to purchase more Genetic Liquid Medicine from Fellow Daoist Yang."

Yang Fei nodded and said, "How much do you want?"

Hai Mo and Yan Wei exchanged a glance and said, "How about ten bottles?"

Yang Fei laughed heartily, "That's quite the undertaking. Ten bottles, equating to a million top-grade spirit stones. Did you bring them all?"

Hai Mo nodded and said, "Before departure, the Sect Master practically emptied the treasury, and let me bring it all."

Yan Wei immediately coughed, signaling Hai Mo not to reveal Lingxiao Sect's assets before outsiders.

Yang Fei and Qin Yanyang were unconcerned, assuming the two were intentionally feigning poverty.

"Wife, how much Genetic Liquid Medicine do we currently have?" Yang Fei asked Qin Yanyang. He hadn't paid attention to this matter lately.

Qin Yanyang said, "Twelve bottles."

Yang Fei's expression changed, "Is that all the total storage we have?"

Qin Yanyang rolled her eyes at him and said gloomily, "A lot of raw materials were destroyed in the previous disaster, and some semi-finished products in production were also ruined. Coupled with the long delay and the slow synthesis efficiency of Genetic Liquid Medicine, we've used a lot ourselves, so storing this much is already decent."

Yang Fei took a deep breath, feeling a bit regretful for arrogantly agreeing to trade ten bottles just now.

But the words were already spoken, and he couldn't go back on them. So he gritted his teeth and said, "Go fetch ten bottles."

Qin Yanyang gave him a look and turned away.

Before long, she returned with ten bottles of Genetic Liquid Medicine.

Hai Mo and Yan Wei were seeing this so-called miraculous medicine for the first time.

Seeing ten bottles of pale blue liquid, they couldn't help but be a bit puzzled, looking towards Ye Wuya and others.

Spending one million top-grade spirit stones, if they brought back counterfeit goods, even as second-generation immortals of Lingxiao Sect, they'd be in deep trouble.

Chapter 1184:

Ye Wuya and the others felt a bit awkward when they saw Hai Mo and Yan Wei's questioning gazes.

Li Yue laughed, "It is indeed this item, how could Yang joke about such a significant matter?"

Yang Fei chuckled upon hearing this and said, "Yes, if I were to deceive you with counterfeit goods, I'm afraid the Foundation Establishment army of the Lingxiao Sect would forcefully invade Earth for war within weeks."

Hai Mo and Yan Wei, thinking it over, felt embarrassed for their earlier cautiousness.

"Apologies for making Yang laugh; it's truly a major matter, and if anything goes wrong, we can't shoulder the responsibility," Hai Mo quickly explained.

Yang Fei waved his hand, saying, "It's alright."

At that, Hai Mo and Yan Wei each took out several storage bags, pouring out countless Spirit Stones, piling into three small mountains.

Seeing these Spirit Stones, Yang Fei and the others changed their expressions slightly.

Most were Mid-grade Spirit Stones, followed by Low-grade, and the least were top-grade Spirit Stones.

The feeling was akin to carrying bags of coins to buy a luxury car.

The crux of the problem was that these Spirit Stones were of lesser quality than those mined from White Jade City, regardless of grade.

Staring at the three mountains of Spirit Stones, Yang Fei swept his Divine Thought slightly, estimating the specific quantity roughly.

"Ahem, well, if possible, in the future your sect should prioritize bartering, and trade goods with us instead,"

Yang Fei finally couldn't hold it back and spoke.

Firstly, Earth does not lack Spirit Stones, secondly, the quality of these stones isn't great, thirdly, Earth severely lacks other resources from the Cultivation World.

Hai Mo said, "It's doable. But for the Earth Cultivation World right now, many expensive elixirs and high-grade Magic Artifacts, talismans, etc., you folks don't necessarily use yet. If we exchanged everything for items like Foundation Establishment Pills, it may be tough for us to gather that much."

Yang Fei had already calculated, saying, "Settlement can also be done through other means. For instance, I want to establish some Teleportation Arrays on Earth, if it's convenient for the Lingxiao Sect, you could send Builders, and one Transmission Array could be exchanged for a bottle of Genetic Liquid Medicine."

The Earth people nodded silently.

Though White Jade City is suitable for cultivation, living here is comfortable, yet many wish to explore other parts of Earth, but Earth's current transportation is very inconvenient.

If more Teleportation Arrays were established across Earth, everyone's travel would be much easier.

"Additionally, you can send over any beasts or spirit pets, including flying devices like Spirit Ships and Spirit Boats if available. As long as they are what we need on Earth, they can be converted into equivalent value of Genetic Liquid Medicine or top-grade Spirit Stones for exchange," Yang Fei continued.

Hai Mo and Yan Wei nodded, promising to relay this to their sect leaders.

Leaving behind mountains of Spirit Stones and a large amount of elixirs and other Cultivation resources, Hai Mo and Yan Wei took ten bottles of Genetic Liquid Medicine, with both sides satisfied with the trade.

"Wife, are we really left with only two bottles of Genetic Liquid Medicine?" Yang Fei couldn't help but confirm with Qin Yanyang.

Qin Yanyang said, "We still have five bottles."

Yang Fei and the others showed a slight change in expression.

Genetic Liquid Medicine is very important to Earth's Cultivators as well, originally it had a low production rate, and with Lingxiao Sect's large appetite, less is left for Earth's Cultivators.

"The most crucial issue is that the reserve of raw materials for preparing the original liquid is already low; if new materials or substitutes can't be found, production of Genetic Liquid Medicine will eventually cease," Qin Yanyang said solemnly.

Everyone felt a heaviness in their hearts.

Yang Fei squinted his eyes and said, "Then we'll need to find substitutes."

"Earth is now completely stable, how much of the original flora and fauna remain, and whether new species might emerge and grow, all need to be surveyed and assessed," Qin Yanyang said.

Yang Fei nodded, "Yet with transportation being inconvenient, surveying these requires traversing mountains and dense primordial forests, so these tasks must be assigned to sufficiently powerful cultivators."

Qin Yanyang said, "The eight Foundation Establishment Pills have already all been bought or distributed, with the master's Foundation Establishment success as precedent, many might try Foundation Establishment next. We'll see if they're willing to go; these Foundation Establishment Pills can also be used to entice cultivators into undertaking tasks."

Yang Fei's eyes brightened, nodding silently.

He finally understood the importance of sect missions these people from the Lingxiao Sect speak of.

For a sect, many tasks require manpower; having so many disciples, yet giving them cultivation resources without doing anything is unsustainable for any sect.

White Jade City doesn't lack Spirit Stone resources, but lacks other Cultivation resources, so if Earth's cultivators want to progress and exchange for precious resources Earth lacks, they must do necessary tasks to earn these resources.

Half a month later, Huang Chengcheng, whose realm completely stabilized, emerged after achieving the early Foundation Establishment stage.

Former Hidden Sect Divine Travel Realm cultivators all came to offer congratulations.

Huang Chengcheng demonstrated Foundation Establishment skills, fueling envy amongst the Divine Travel Realm cultivators.

The most notable aspect was Huang Chengcheng, though not old previously, had begun showing signs of aging; post-Foundation Establishment, his demeanor and charisma greatly transformed, exuding considerable life force.

This results from the substantial increase in lifespan for Foundation Establishment cultivators.

Cultivating for longevity truly can be realized.

This moment, the eyes of nearly every Divine Travel Realm cultivator above one hundred lit up, seeing hope, understanding the true allure of cultivation.

This afternoon, while Yang Fei was cultivating, Ouyang He sought audience.

He was accompanied by Helian Rong.

"Yang Fei, I heard there's an elixir called Face Stabilizing Pill among the ones brought by Lingxiao Sect last time. Is there any left? Could I have one?" Helian Rong asked straightforwardly.

Yang Fei laughed, directly handed her a pill from a bottle, saying, "I thought you wouldn't come to ask."

Helian Rong snorted and said, "As far as I know, you've given Qin Yanyang and Tong Yunshu pills, even one to your cousin, yet not a single one for me, do you not consider me a friend?"

Yang Fei laughed heartily, "Of course we're friends; Aunt Helian is so young and beautiful, you hardly need a Face Stabilizing Pill."

Helian Rong's face reddened slightly, saying, "I heard the Face Stabilizing Pill can preserve youth eternally. No woman wants to age, naturally, I hope to consume such a pill early and forever maintain my current state."

Ouyang He listening to the flirtatious banter between the two youngsters cleared his throat, reminding them of his presence.

Helian Rong blushed a bit more, saying to Yang Fei, "Speaking of which, last batch of Foundation Establishment Pills my master didn't get any; this time I heard there'll be a new batch, will it be my master's turn?"

Yang Fei had already anticipated Ouyang He's purpose, glancing at him.

Having spent nearly two years in White Jade City, Ouyang He's arrogance had greatly diminished.

Especially before Yang Fei, he no longer had the lofty attitude he once held.

Hearing his disciple's preemptive request, Ouyang He dared not act high-handed before Yang Fei, quickly said, "Yang Fei, I heard from Lingxiao Sect friends that the success rate of Foundation Establishment drops with age; I'm already old, having cultivated here for nearly two years, and feel I have enough assurance, so I'd like to try. I wonder if you could sell me a Foundation Establishment Pill."
