

PEERLESS MARTIAL SOUL

Chapter 13: Break again! Three thousand catties!

He gritted his teeth and swallowed the magnolia whole, including the main stem and the rhizome. He didn't even chew it much. As soon as the white magnolia was taken in, he felt a burst of icy scent spreading through his body, and the hot and dry body got a link, which was extremely comfortable.

The white magnolia actually melted directly in his mouth, turning into an icy airflow, rushing into his lungs and into the pubic area.

He carefully controlled this cold air not to be swallowed by Guding, if it was swallowed by Guding, he would only get half of it. This ancient ding is extremely domineering, as long as it is sucked in, it must be half of the meeting.

And in his dantian, a cold and extremely strong qi rose from the dantian and began to flow in his meridians. This cold zhenqi was several times stronger than the zhenqi in Chen Feng's body before. Although the icy cold qi made him completely icy, it had a great healing effect on the injuries in his body.

Wherever the cold air went, all the injuries in his meridians were healed, the meridians became extremely stable, all the congestion in the body was cleared, and the dark wounds were healed.

After a cup of tea, Chen Feng wowed and vomited two black blood clots, which were congested blood in the body. A lot of black and foul-smelling impurities were discharged from his body surface along the pores, and a layer of paste was smeared.

Chen Feng opened his eyes, with a hint of joy in his eyes.

"The injuries in my body have healed, and even some of the hidden injuries have been cured. The effect of white magnolia is amazing!"

"The power contained in this white magnolia is so powerful that it only consumes less than one-tenth of the injury!"

At this time, the true energy in his body was surging, without any intention of stopping, and continued to gush out from the dantian, seemingly endless. Chen Feng cautiously guided Zhen Qi to run along the beddoro-leaf golden sutra, and his body strength was rising.

Two thousand catties!

Two thousand three hundred catties!

Two thousand five hundred catties!

...

Three thousand catties!

Soon, Chen Feng's strength climbed to three thousand jin, a full force of six tigers! This is equivalent to the power of the acquired mid-five mid-term strong!

Chen Feng's realm had reached the four-fold peak, and at this time, the true energy in the dantian was still extremely strong.

He gritted his teeth and began to mobilize all his true energy, rushing out of his dantian, and starting to hit the meridians.

The meridians that had been repaired and stabilized were shocked again and began to break every inch of the way. The rupture of the meridians gave Chen Feng tremendous pain, but he clenched his teeth and persisted, driving the true energy to keep running in his body, and his body surface was stretched out. Bloodshot, but he seemed to be imperceptible.

The tremendous pain made him almost numb.

I don't know how long he was, his whole body slammed, and there was a bang in his brain, all the meridians were broken, and then reorganized.

The newly formed meridians are wider and more stable, and can hold more Zhen Qi rushing from them!

With a long roar, Chen Feng suddenly got up and displayed the bright handprint. A huge golden handprint that was the size of a wheel and two feet in a circle was condensed, and banged heavily on the big rock blocking the entrance of the cave. The one-person-high stone was smashed to pieces, and Chen Feng laughed and flew out from the hole.

He successfully broke through, entered the acquired five levels, and his strength climbed to three thousand three hundred jin!

And his luminous big mudra has reached the second level!

Even if he is the martial artist at the sixth peak of the day after tomorrow, he is not necessarily his opponent!

Chen Feng's heart is extremely refreshing!

In the next few days, Chen Feng spent time in the Aomori Mountains.

Drinking mountain spring water and eating aura-rich monster meat, Chen Feng continued to fight the monsters to stabilize his realm, wearing a green shirt, laughing proudly at the forest.

He also harvested some monster beast crystal nuclei, but the level is not high, and the highest is only the acquired four. It was a khaki-yellow viper. Although it was very poisonous, its defense was too weak. Chen Feng used it to step into the second stage of the light handprint and killed it!

In a valley, the wind and thunder were masterful, and golden light flashed.

Chen Feng was fighting with a cyan demon wolf.

The Gale Demon Wolf, the acquired five-layer demon beast, comes and goes like the wind, with extremely fast speed, extremely sharp teeth, and can even bite through iron plates. Moreover, the demon wolf can spit out wind blades and carry out long-range attacks. At the same time, this demon wolf is very cunning and will run away if it fails to fight.

The demon wolf, the size of a small calf, ran swiftly. With a mouth, a half-moon-shaped wind blade the size of a wheel was spit out from its mouth, drawing an arc, and cutting it towards Chen Feng. Chen Feng slapped it with a palm, and the big handprint hit the wind blade, breaking it apart. A hint of cunning flashed in Yao Lang's eyes. It turned out that after the wind blade he sent out, he sent out another one. The one just now was just a fake move. When Chen Feng discovered Wind Blade, Wind Blade had already arrived in front of him.

Fortunately, he reacted very quickly, twisting his body abruptly, and the wind blade flew past his waist. The wind blade splattered a huge boulder to the sparks that had been cut, leaving a full foot deep crack on it. Chen Feng was surprised when he saw it. If he didn't dodge in time, he would have to be cut in the waist.

He looked at the gale wind demon wolf wandering in the distance and couldn't help but feel a headache.
