

Physician Wife 2961

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2961

2961 Finished 2

If she had made such a big mess outside, she knew that the ending would be terrible without thinking.

Chen zimeng did not care about anything else. She turned around and slapped Ling xuyao's face.

"You cheap man! How can there be such a cheap person like you in this world?"

Ling xuyao was so scared that he didn't know what to say. Now that he was hit by Chen zimeng, he felt like his whole world had collapsed.

Although Chen zimeng was domineering, she knew that there were many people in this world that she could not afford to offend. She quickly apologized to Nangong Nuan Nuan and mu Xigui.

"I'm sorry, miss Nangong! I'm sorry Governor mu! I'm sorry, young master ning! I'm sorry, miss mu! It's my fault! I shouldn't have looked down on her. I saw that she didn't buy anything, so I fought with her for a seat. It was my fault! I'm sorry, miss. It's my fault, I'll apologize to you!"

Chen zimeng's girlfriend was also scared out of her wits. She quickly bowed and apologized to Gu Xiaoli.

"Miss Nangong, Governor mu, young master ning, miss mu, I'm sorry! I'm really sorry! Ling xuyao has been wooing me ever since he was found out by my family's talent scout. I saw that he was quite good-looking, so I wanted to date him. Who knew that he would actually play hard to get and always deliberately look at miss MU's photos with his back facing her. Later, I couldn't bear it anymore and asked him who this person was. He told me that this was the person he liked. He said that he couldn't let go of miss mu. However, after miss mu had flirted with him in the past, she had abandoned her because of his ordinary background. I didn't know miss mu at first, but who knew that we were in the same university? Miss mu is a low-key person and has never revealed her background in school. I thought that miss mu was vain, so I've never had a good relationship with her."

Ling xuyao widened his eyes and looked at Chen zimeng.

He knew in his heart that he was finished.

He was completely finished.

After he failed to pursue mu qingxuan, he only knew that she went to dizhou with her father. He had no idea which school this young lady was going to go to. Moreover, she was spotted by a talent scout. Therefore, he only wanted to pursue Chen zimeng and help her create a fake love rival so that she would be more loyal to him.

However, he didn't expect Chen zimeng and mu qingxuan to be from the same school. Moreover, Chen zimeng was already at odds with mu qingxuan in school.

If he had known, he wouldn't have done such a thing no matter how stupid he was.

He simply did not have any pretty girls around him that could attract Chen zimeng's hostility. That was why he used mu qingxuan's photo.

Chen zimeng continued to apologize, "I know I'm in the wrong. I really know I'm in the wrong!" I beg miss Nangong, Governor mu, young master ning, and miss mu to let us off the hook for entertainment on the account that I'm also a victim!"

Although mu Xigui and ning Wenhao were still angry when they saw Chen zimeng's pitiful look, they didn't want to blow things up in front of so many people.

After all, many people had already recorded the argument.

miss Chen, I'll let this go on account of your sincere apology. As an elder and the governor of the Emperor state, mu Xigui could not say much. He could only let it go like this.

However, when he thought about how much his fiancée had been bullied in school, ning Wenhao couldn't hold back his anger. He had never been bothered to hold back his anger.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2962

2962 Future son-in-law (3)

Even though he was from Eagle, he had never done anything wrong to the people. He had protected the people in countless Wars. If he was criticized for protecting his girlfriend, ning Wenhao would have nothing to say.

So ning Wenhao said without any psychological burden, " "Our qingxuan is my childhood sweetheart and we've always had a good relationship. I hope that miss Chen will not hurt my fiancée again. Also, I would like to kindly remind miss Chen that your boyfriend's character isn't very good."

Nangong Nuannuan nodded. I've told qingxuan this a long time ago. Ling xuyao is a scumbag. That's why qingxuan has never looked at Ling xuyao. They can't even be considered acquaintances, let alone friends."

Chen zimeng suppressed the hatred she had for Ling xuyao and apologized profusely, " yes, I was blind. I didn't see this man's true colors. I won't go against miss mu anymore. I'll also open my eyes and look for a boyfriend.

Let's just forget about this matter.

Because of the arrival of Nangong Nuannuan and mu Chenxiang, the crowd was in a state of chaos even though they were all rich ladies. Everyone wanted to take this opportunity to get close to Nangong Nuannuan, who was Emperor Xun, and the boss of sky and land. Although they knew that the possibility of this was not high, it was good to leave a good impression on the other party.

How could Nangong Nuannuan not know what these people were thinking? Just as he was about to ask everyone to change places for afternoon tea, the General Manager of dizhou's sky everlasting land walked over.

Chairman, if you'd like to have afternoon tea, there's no one on the lawn behind House H. I've already informed the staff to clean it up.

Nangong Nuannuan nodded and said to the group of people, " "Let's go over there."

"Ah Hao and I won't be going to your girls' party," said mu Xigui. Qingxuan, have fun with your friends."

Ning Wenhao had a pitiful look on his face. He had finally remembered that his wife was on leave today and had taken half a day off, but his wife had told him that she had an appointment with Nuan Nuan in the afternoon. He finally managed to get here, but uncle mu wanted to pull him away.

When Nangong Nuannuan saw ning Wenhao's pitiful gaze, she understood their situation and said to mu Xigui, " uncle mu, young master ning has a good relationship with us. It's not easy for him to get a break. Please let him have afternoon tea with us.

Mu Xigui glanced at ning Wenhao, and his heart ached for this future son-in-law of his. He nodded and said, " "Alright then. If you need to carry anything while shopping, just order him around."

Ning Wenhao quickly nodded.

young master ning, " Nangong Nuannuan teased, " uncle mu is treating you like his son!

Mu Qingxin blushed as she looked at the people around her. She nudged Nangong Nuannuan with her elbow, which made Nangong Nuannuan and Gu Xiaoli laugh.

Watching the God of Fortune walk away just like that, the surrounding onlookers all had a look of regret.

As the saying goes, you can't judge a book by its cover. Today, Gu Xiaoli had really taught these socialites a lesson.

Especially for those who had asked for Gu Xiaoli's location from the beginning and felt that she was not tactful and did not let them leave with complaints, but found a place elsewhere, today's incident taught them that one must keep a low profile.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2963

2963 Signing the contract (4)

After all, in a place like the Emperor province, you really didn't know when you would run into an ordinary person who could end up with a large group of people with powerful backgrounds behind him.

If it wasn't for the little princess of entertainment, who had caused trouble first and forced Gu Xiaoli to give up her seat, Gu Xiaoli wouldn't have quarreled with them. If they had found another seat, they wouldn't have met mu qingxuan, and they wouldn't have met mu Xigui, ning Wenhao, and Nangong Nuan.

Ling xuyao shamelessly chased after Chen zimeng to apologize, but Chen zimeng ignored him. Everyone felt that he deserved it. That was too cheap!

Nangong Nuannuan could hear Ling xuyao's pitiful voice as he explained.

Ling xuyao had nothing to do with her anymore, and she did not feel sorry for him at all. After all, Ling xuyao was mu qingxuan's husband and the murderer who pushed her down the stairs in her previous life.

In this life, he was allowed to atone for his own sins and did not take his life, which was considered letting him off easy.

Mu Xigui doted on his daughter, and so did ning Wenhao.

After parting ways with Nangong Nuannuan and the others, mu Xigui had someone call the Office of the Chairman of entertainment. After hearing what his daughter did to mu qingxuan at school and at Tian Heng Holdings, Chairman Chen was so angry that he immediately called his manager to cancel all of Ling xuyao's schedules and schedules. He also asked someone else in the company to take part in the reality show that he was about to attend.

He was about to call Chen zimeng and tell her to go back to Haizhou. Ning Wenhao called again.

Only then did Chairman Chen know that his daughter's love rival was not only the daughter of the governor of dizhou but also the fiancée of the Deputy Chairman of the Eagle Eye group.

Mu Xigui alone was enough to scare him to death, and now there was another magnate who could easily stomp them to death.

After director Chen apologized to ning Wenhao, he called Chen zimeng and told her to go back to Haizhou.

It was useless for Chen zimeng to apologize or cry. All of her credit cards had been suspended, and the school had called her to ask why her father wanted her to drop out of school.

Chen zimeng, who originally thought that this matter would be over, realized that a mistake could not be appeased with an apology. One had to pay the price for making a mistake. And this price was not something she could afford at the moment.

On Nangong Nuannuan's side, the incident between Ling xuyao and Chen zimeng was only a small interlude.

It wasn't easy for the three of them to get together, and everyone cherished this time.

The reason Nangong Nuannuan called her sister-in-law, mu Chenxiang, out was to tell mu qingxuan that her sister-in-law's studio was now under disheng. With her sister-in-law's lazy personality, her studio and schedule would be taken care of by disheng's special team in the future.

If mu qingxuan signed the contract under disheng's name, she would be mu Chenxiang's junior.

Gu Xiaoli quickly encouraged mu qingxuan to sign with disheng.

Mu qingxuan also trusted Nangong Nuannuan completely. She smiled and said, "You're the big boss of disheng, and you're personally making a move. How can I not sign? It's my honor to be under di Mo's command."

Nangong Nuannuan laughed at the flattery.

but Nuan Nuan, why do you trust me so much? do you think that I'll be able to make money for disheng in the future? " Mu qingxuan's eyes lit up.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2964

2964 Tracking device (5)

She felt that Nangong Nuannuan had always had good taste. If she bought a mine to produce diamonds, a river bed to produce jadeite, and a piece of land to increase in value, then why would she fall for her, Yingluo?

Nangong Nuannuan laughed evilly. don't think too much. I'm just thinking that if young master ning dares to be fierce to me in the future, I can use you as a shield. We don't lack money, and we don't need your resources."

"You're so annoying!" Mu qingxuan was a well-educated girl, but she was always angered by an aggressive woman like Nangong Nuannuan. She couldn't help but want to hit her.

However, when she was being bullied, Nangong Nuannuan would always stand in front of her like a man.

Mu qingxuan was glad that she had a fiancé. Otherwise, she would lose her virginity if Nangong Nuan continued to flirt with her.

"Sister-in-law, you must be joking. How would I dare to be fierce to you? Boss is my Guardian, and you are my qingxuan's Guardian. In the future, our lives will depend on boss and sister-in-law. If my boss hears what you said, I'll be in deep trouble."

Nangong Nuannuan laughed. However, she had not forgotten how ning Wenhao had always scolded her in her past life.

Xiao Li, during the drill these two days, I found that you and Li xiangwang get along well and are quite close? "

Gu Xiaoli nodded. actually, she's just a little straightforward. She's a pretty good person. Didn't she come to apologize to you the other day? did you forgive her? "

Nangong Nuannuan frowned and nodded.

"Is there a problem?"

Gu Xiaoli trusted Nangong Nuannuan very much. As long as Nangong Nuannuan told her not to talk to li xiangwang anymore, she would definitely ignore li xiangwang immediately.

"No problem," Nangong Nuannuan shook her head and smiled.

Then, she took out a sealed food bag from her bag. There were a few white pills in the bag. There was nothing written on the bag, and it was obvious that it was a product with no products.

“This is a new tracking device. It can stay in your stomach for a month. Recently, the Internal Affairs Bureau has begun to move. Because of me, all of you have become a dangerous group. Take this. If anything happens, the pill can help you locate it.”

Nangong Nuannuan then gave mu Chenxiang, mu qingxuan, and Gu Xiaoli one each.

The three of them drank the water without any hesitation.

Nangong Nuannuan had wanted to say that the thing wouldn't affect them, but the three of them had swallowed it.

“Don't worry, this thing won't affect the body. After a month, it will fall out of the stomach and then be discharged from the body. This is a new drug made by our research Institute.”

the medicine you developed is hard to come by. I'm quite honored to be your lab rat, hehe.

Everyone laughed at Gu Xiaoli's words.

Her university life had officially begun. Nangong Nuannuan had received an invitation from principal Qin Muyang to enter the Research Institute of the medical department University and become a formal researcher.

The next morning, she had a class early in the morning, but Nangong Nuannuan did not turn up. Gu Xiaoli had called her in advance, but the news she received was that Nangong Nuannuan was not coming to class.

Gu Xiaoli was afraid that the teacher would be unhappy.

As expected, when the class started, the professor looked into the classroom, took out his attendance book, and read "Nangong Nuannuan".

After he finished reading, the boys in the class looked at Gu Xiaoli and Li xiangwang.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2965

2965 Rushing for a diploma (1)

Gu Xiaoli was still thinking about how to cover up this matter. Who knew that li xiangwang would say, "professor, Nuannuan's period is here. Her stomach is hurting, so she wants to take a day off."

Gu Xiaoli bumped into li xiangwang, feeling that she didn't have to lie like this. After all, Nangong Nuannuan had many things to do. Other than being a student, she had many more important things to do. Therefore, she believed that Nangong Nuannuan would have her own way of dealing with the matter of going to school.

li xiangwang could help her lie to her teacher once, but he couldn't lie for eight years.

The professor glanced at li xiangwang and asked, "What's your name?"

Li xiangwang was a little confused, but he still stood up and answered, "I'm Yingluo, li xiangwang."

"Is Nangong Nuannuan your friend?" The professor continued to ask.

“Hehe.” Li xiangwang thought for a moment and nodded.

Gu Xiaoli, who was at the side, frowned slightly.

The professor nodded, then picked up the notebook and read out another name-

“Shi Yalin.”

A girl from Shi Yalin’s dormitory immediately said, “ professor, Yaling has to report to the Research Institute today.

The professor put down the roster and started the class.

Li xiangwang looked at the student sitting in front of him and seemed to understand why the professor was looking at her in that way.

Li xiangwang was instantly furious again.

There’s something wrong! He clearly knew that Nangong Nuannuan would not come to class, so why did he call her name?

Fortunately, she had Shi Yalin. In the future, she would stand at the peak of her life and enter the medical Association.

As for Nangong Nuannuan, she had indeed made an agreement with Qin MUYANG. Although she was a student of the medical department University, she was only here to get a diploma. She would only be able to stay at the medical department University for a year.

In this one year, she would do free medical research in the Research Institute of the medical administration University. After she graduated, she would be able to share some of the research results of the angel research Institute with them.

Nangong Nuannuan’s request was that as long as she could finish all the subjects in Year 12 within a year, she would be given a Ph.D. Degree.

Although she had studied clinical medicine for eight years, Nangong Nuannuan was confident that she could get all the necessary examinations for her PhD in a year.

Although Qin MUYANG’s mouth twitched, he still allowed it.

Who asked Nangong Nuannuan to be a mobile bug? No matter where he went, there would always be bugs. To be able to give her a degree within a year in exchange for the joint development of the medical department University’s research Institute and angel research Institute was definitely good news for the medical department University.

After all, the angel research Institute was not only famous in Kamino, but also in cyber and the rest of the world.

With the angel research Institute sharing the results, the War Department’s medical achievements would not be monopolized by the medical Association.

Nangong Nuannuan, on the other hand, did not think too much about it. All she wanted was a legitimate identity that would allow her to carry out missions with Fei Ying.

Nangong Nuannuan entered the Research Institute according to the time.

This was because the heart transplant surgery she had done previously had not only caused a sensation in Renton, but it had also caused a big sensation in Kamino. In addition, the previous large-scale lung poisoning incident had also caused people to exclaim. He had also used silver needles to treat old man Chi and old man Nangong's heart problems, which were caused by blocked blood vessels.

Therefore, the experts and doctors at the Research Institute all thought that Nangong Nuannuan would choose to study the heart and lungs.

Therefore, almost all the experts and professors in the Research Institute in the field of cardiovascular and respiratory Medicine had come today. It was clear how much they valued Nangong Nuannuan.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2966

2966 Research Institute (2)

Of course, in addition to these specialized classifications, there were also classifications of cell studies, Neurology, and other aspects. The experts who specialized in this field were the most powerful. They often represented the entire Kamino country in foreign competitions or academic exchanges.

Even though the professors had heard of Nangong Nuannuan's name, they did not think that she would be able to make any achievements in cell and nerve research at such a young age.

Although they had heard that the world-famous angel research Institute was owned by Nangong Nuannuan, they felt that no matter how successful Nangong Nuannuan was, it was impossible for her to have made so many achievements in medicine at the age of 12. Even though her medical skills had far surpassed that of many people, the angel research Institute had been established six years ago. This showed that Nangong Nuannuan was just an impressive businessman. In the field of medicine, they did not believe that she had such impressive means.

Wu Lingyun had been waiting at the entrance of the Research Institute since early morning. Nangong Nuannuan had also arrived at the agreed time.

"Nuannuan," When he saw Nangong Nuannuan, Wu Lingyun happily went up to her.

"Senior Sister." Nangong Nuannuan smiled.

"Let me introduce you. This is my supervisor, professor Wei Yan."

Nangong Nuannuan was very respectful of Kamino's doctors who were dedicated to research. They were obsessed with research, which was different from the doctors in cyber. Although the doctors in cyber were also obsessed with research, their purpose was to make money. However, most of the doctors in Kamino did not receive a high salary and were doing things that were beneficial to human civilization.

"Hello, professor Wei." Nangong Nuannuan bowed slightly and greeted him politely.

“Hello, hello! I’ve heard about you from Ling Yun a long time ago. I didn’t believe him at first, but principal Qin mentioned you many times, so I paid special attention to some news about you. Miss Nangong is so young and promising!”

Nangong Nuannuan smiled. you flatter me. I was just lucky.

Wei Yan truly admired Nangong Nuannuan’s medical skills, which had reached the peak of perfection at such a young age.

age doesn’t determine a hero. Miss Nangong is not only the best in the business world, but also the best in the medical world. Miss Nangong deserves this!

“Professor Wei, you’re senior’s tutor, so you can just call me Nuan Nuan in the future.”

“Alright, alright, alright.” Wei Yan’s face was red with joy. He was glad that he had a student who could help him connect with Nangong Nuannuan.

“Nuannuan, before you entered the Research Institute, did principal Qin tell you about the categories of research institutes?”

Nangong Nuannuan blinked and shook her head.

In fact, she didn’t plan to enter the Research Institute at first. She planned to get a diploma from the medical department University. After all, she had her own research Institute.

However, not only did the medical Association take up a large amount of the Research Institute’s resources, but it also swallowed many talents that originally belonged to the Research Institute. As a result, many of the projects in the Research Institute could not be carried out.

Even though the Research Institute and the medical Association were both under the war service department and served the entire Kamino country, the military service department was still a huge force to be reckoned with.

However, because of the Shi family’s participation and their initial investment, the medical Association had now become a product of the Shi family.

On the other hand, the Shi family held all kinds of medical experts and talents. Even if the war services Department transferred people to the medical school of the Shu Yi University, these people were still in the CAO camp.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2967

2967 Enemies only meet (3)

Today, the combat Services Department and the Internal Affairs Bureau wanted to break the monopoly of the medical Association on the research and development of medical technology. However, no matter what they did, they could not get the people from the medical Association to work for the combat Services Department.

Food, medical, and livelihood industries were the foundation of a country. If it was monopolized by the medical Association, it would be a big problem sooner or later.

This was also the reason why Qin MUYANG, the director of the medical administration University, insisted on Nangong Nuannuan going to the Research Institute.

Otherwise,

Qin MUYANG said it under the pressure of the Chi family and the Nangong family. Otherwise, Nangong Nan would have to spend a year to pass the four years of university exams and credits, another year to pass the four years of credits for a graduate student, and another year to do the research and reports for a PhD student.

&Nbsp; en, that would be three years in total. Three years later, Chi Yang would be 29 years old, and old master Chi would be 81 years old. Only then could Nangong Nuannuan get pregnant and give birth.

Hence, Nangong Nuannuan agreed to principal Qin's request to enter the Research Institute.

"Nuannuan, it was principal Qin who allowed you to enter the Research Institute, right?"

Nangong Nuannuan nodded.

"Did principal Qin ask you to do any research projects at the Research Institute?"

"He didn't say. He told me to report to the Research Institute today. He didn't tell me what I should do, what I should do, or what I should do."

Wei Yan stopped Nangong Nuannuan from entering the Research Institute and said, " "Why don't you give principal Qin a call from outside? The internal department of the Research Institute is quite chaotic now. To prevent unnecessary trouble, you can ask principal Qin to assign you a suitable project to conduct research."

Nangong Nuannuan knew that the experts in the Research Institute of the medical administration University were often poached away by the people from the medical Association. She could also guess that it was not easy for them and that there was internal strife. So, she nodded and took out her phone to call Qin MUYANG.

As soon as he dialed, he heard the phone next to him ring.

He raised his head and looked over. Wasn't it Qin MUYANG who was walking over from another direction?

Qin MUYANG was very happy to see Nangong Nuannuan. His entire person was in high spirits.

"Nuan Nuan, you're here!"

Nangong Nuannuan nodded her head politely and greeted, " "Principal Qin."

Qin MUYANG nodded his head. He glanced at Wu Lingyun and her instructor, and the two of them immediately greeted him.

After exchanging pleasantries for a moment, Qin MUYANG said, "Let's go. I'll introduce you to the Research Institute."

"Alright," he said. Nangong Nuannuan nodded.

Just as she was about to enter, she caught a glimpse of a figure, which made her stop immediately.

After seeing the person who had arrived, Qin MUYANG's face was no longer as warm.

"Miss Shi." When Nangong Nuannuan saw Shi Yalin, she immediately smiled with interest, causing Shi Yalin's heart to skip a beat.

"Miss Nangong, principal Qin." In Shi Yalin's heart, Qin MUYANG was not a threat. Therefore, she subconsciously called Nangong Nuannuan to stand in front of her.

Qin MUYANG didn't care about her greeting at all. He was only concerned about how this young lady from the Shi family had entered the Research Institute of his Medical University.

"Miss Shi, are you on the wrong path? This is the Research Institute of the Shu Medical University, not your Medical Association."

The Shi Yalin of today was extremely humble. She bowed to Qin MUYANG and said, "Principal Qin, even though I'm from the Shi family, I'm now a student of the medical department University. He should have joined the Research Institute of the medical department University. After all, I'm not from the medical Association."

"Even though you're not from the medical Association, your family is. The hospital of the medical Association is now a special medical research base. If you really want to do research, you should go there!"

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2968

2968 Entering the Research Institute (4)

Shi Yalin did not feel embarrassed at all. She nodded and smiled, "You're right, but I've just started to study medicine, and I'm not at the level where I can enter the hospital yet. Otherwise, I wouldn't have come to college to study, right? It just so happens that my dad asked an old friend of his to help me learn from him after I enter the Research Institute."

Shi Yalin's eyes were sincere, and she didn't seem to be scheming at all.

The Research Institute did have such a rule. It was a benefit for the old experts who stayed in the Research Institute. This would give them the opportunity to take in disciples and bring in personal disciples.

Medical treatment was also a matter of inheritance. A teacher's job was to pass on knowledge and dispel doubts, but this did not include teaching everything one had learned in one's life.

The reason why humans were able to continuously progress, accept inheritances, and invent new things at the same time, was because of the teachings of their predecessors.

Even if those experts, professors, and academicians stayed in the Research Institute to contribute, they wouldn't be willing to teach everything they had learned. Therefore, each of them could invite a personal disciple to enter the Research Institute. As long as these personal disciples were students of the Research Institute, they didn't need to go through the assessment at all.

It was obvious that Shi Yalin had taken advantage of this loophole.

"Then who is your master?"

"Principal Qin, why are you here?"

A white-haired old man walked out of the Research Institute and smiled when he saw Qin MUYANG.

Qin MUYANG and Wei Yan turned around and saw the old man.

This person was Zhou Xianglin, a senior expert who focused on the research of nerve cells. He was the top fifth-level professor in the Research Institute.

This Level 5 professor was not certified by the Research Institute of the medical Bureau University, but by the world Medical organization.

The world's top medical professors were level six. However, there were only five Level 6 medical professors in the world, and they were all under the protection of cyber country. They were national treasures.

Kamino's medical development was not as fast as Saibo's, so anyone who could reach Level 5 was definitely a top talent.

Even the principal, Qin MUYANG, who was widely acknowledged as a medical genius, was only a fourth-grade professor. However, he was young. Compared to a level-four professor in his forties, a level-five professor in his seventies, the former was obviously more talented.

However, Qin MUYANG's heart still sank when he saw that Shi Yalin's mentor was the most precious fifth-grade professor in the Research Institute.

"Professor Zhou."

Zhou Xianglin had a warm smile on his face. Usually, he loved to smile the most in the Research Institute. He also had the best temper and the staff was very good.

Qin MUYANG's heart sank as he looked at professor Zhou, who was smiling warmly.

Such a person knew how to win people's hearts the best.

"So you're miss Shi's teacher."

"Principal Qin, Yaling is actually a very powerful and motivated student. I've always had high hopes for her. I also know that the Research Institute of the medical department University and the medical Association have never been on good terms, but I think that these are just small conflicts. As medical researchers, we should consider serving the people of Kamino, right? That's why Yaling said that she wanted to come here to do research. After all, the Research Institute is within the school, and it's

convenient to go back and forth. That's why he made an exception and let her come to the Research Institute, preparing to take her to study."

Qin MUYANG didn't even want to give him a fake smile and said, professor Zhou, you only have Shi Yalin's place. If he takes the place of your disciple, you won't have any more disciples.

"I know, I know," Zhou Xianglin chuckled. I'll strictly follow the rules of the Research Institute."

Qin MUYANG looked at Nangong Nuannuan, and his expression softened. "Nuannuan, let's go. I'll introduce you to the Research Institute."

"Yes." After Nangong Nuannuan nodded, she turned to look at Shi Yalin and asked with a smile, "Miss Shi, do you want to come with me?"

Shi Yalin gritted her teeth in her heart. She wished she could tear apart the face of Nangong Nuannuan, that Vixen.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2969

2969 Anger (5)

However, Shi Yalin's face revealed her usual low-profile and timid side when she was with Nangong Nuannuan. She shook her head and said, "Thank you, miss Nangong, but there's no need. I'll just follow my supervisor to his research group."

"Miss Shi, why do you seem to be afraid of me?" Nangong Nuannuan smiled.

Nonsense, you turned the real Shi Yalin into a vegetable. How could she not be afraid of you?

Shi Yalin quickly shook her head. no, I'm not afraid of you. I respect miss Nangong very much. No matter what you do, you can do it well. You're my idol, and I think I should learn more from you."

Nangong Nuannuan smiled brightly. Actually, I think miss Shi is quite amazing. With a score of 570, she actually dared to enter the Research Institute. I wonder how many of those technical terms you can understand?"

Shi Yalin was rendered speechless by Nangong Nuannuan's retort.

It wasn't that she didn't dare to retaliate, but the time wasn't right yet. Since she was going to make a move, she had to look for the right time. She would not act rashly before the right time came.

The Research Institute was a very important place, because the things researched here were very likely to change the development of human beings and the course of history. The best medical researchers were gathered here, so the combat Services Department had put in a lot of effort to protect and guard the Research Institute.

The Research Institute was built underground in an anti-radiation environment. Even the world's most advanced satellite could not detect it.

The laboratory had a total of 12 floors. The top floor was for skin-related drug research, and below it was orthopedic and various specialized research rooms, including the heart, liver, spleen, lung, pancreas, and other internal organs research rooms. Further down was the exclusive drug research lab.

It was different from the research on skin, bones, internal organs, and medicine. The further down one went, the more in-depth the research.

For example, drug research that specifically targeted the human body's various immunity systems, as well as drug research that targeted the resistance to major diseases such as cancer and AIDS. The lowest level was for drug research on cells, nerves, and genes.

After introducing the research subjects and directions of each level, Qin MUYANG stopped at the bottom level. He looked at the three directions and said to NANGONG NUANNUAN, "I think that whether it's cells, nerves, or genes, these three directions are very suitable for you.

You're the one who cured Best Actor FENG's cancer. Although you're more suitable for Cancer Research, I've always believed that cancer has a great relationship with the human immune system and genetic chain. So, I think that since you can treat cancer, you should try cells, immunity, or genes."

Qin MUYANG was all smiles. He had introduced the other places very briefly. Only the three places on the last floor were introduced in great detail.

the professors in these three research institutes are all level-five professors. You can set up your own research team, or you can follow them to conduct existing research projects.

The professors in charge of the three research institutes all came out when they saw principal Qin. However, after hearing what principal Qin said, their expressions changed.

What they were researching might be projects that would become famous in the future. Even if one of the projects made progress in one aspect, it would receive worldwide attention and achievements, let alone complete it. They already had a disciple they trusted, so why should they share their research project with this young girl?

"Principal Qin?"

Chapter 2970

2970 Being criticized (1)

The people in charge of the Research Institute were all furious. They looked at Qin MUYANG with red faces.

"Please don't be angry, professors. She's the NANGONG NUANNUAN I mentioned to you before, the one who cured FENG SHENGXUAN of lung cancer. When you guys heard about NANGONG NUANNUAN's story, weren't you also very interested in her?"

It's one thing to be interested, and we also welcome her to any of our research institutes. But isn't it a bit inappropriate for her to participate in our current research? "

that's right. Since miss Nangong is really as amazing as you say, principal, she should start a new research project.

This way, their existing research projects would not be stolen. If Nangong Nuannuan was really as amazing as principal Qin described, then their Research Institute would have new research projects and results.

Qin MUYANG truly felt that Nangong Nuannuan was heaven-defying and was a mobile bug. Regardless of whether Nangong Nuannuan joined in the research of cells, nerves, or genes, he felt that she would be able to achieve great results. Therefore, he was determined to get Nangong Nuannuan to join the project that was already in progress.

This way, if the research direction was wrong and no progress could be made, they could correct it in time or give up directly. There was no need to waste the human and material resources of the Research Institute. If the direction of the research was correct, he believed that with Nangong Nuannuan's ability, she would definitely be able to find the problem of the bottleneck and allow the research project to achieve a major breakthrough and progress.

Therefore, before Nangong Nuannuan came to the Research Institute, he had been bragging about her to the professors. He felt that after months of persuasion, the other party must be waiting for Nangong Nuannuan happily. They might even have started to fight for her in private. Nangong Nuannuan was standing right in front of them, but they looked indifferent, as if they were afraid that someone would steal their fruits of labor.

Qin MUYANG was truly disappointed.

After hearing Wu Lingyun mention Nangong Nuannuan, Wei Yan had been keeping an eye on her. He knew that this young girl must be someone with great abilities. Therefore, he made the decision that if Nangong Nuannuan re-opened her research project, he could bring his apprentice along to assist her.

Seeing that Nangong Nuannuan had been rejected by the three old men, she immediately said, "Nuannuan, there are still a few research projects at the Lung Research Institute that are at a bottleneck. Are you interested in joining the Institute?"

Wei Yan's words attracted the strange gazes of the other three professors.

"Professor Wei is really an all-rounded talent." The professor from the cell research Institute said.

"What do you mean by that, professor Li?" Wei Yan frowned.

"What professor Li means is that professor Wei, you can be a medical researcher and also an administrative person. No matter which path he takes, professor Wei will be able to do well."

"The professors really don't use any vulgarities when cursing."

"Hey, professor Wei, how can this be considered an insult? Professor Li and professor Wang were both full of admiration! Look at the three of us, we can't do administration after becoming professors."

"That's why you urged me to get into administration?" Wei Yan felt that the three of them were very strange. Although the three of them were of a higher rank than him and had more experience than him, who was not still alive?

although you're not in administration, you've taken miss Xiao as your disciple and now you're following miss Nangong. If professor Wei were to get into administration in the future, I'm afraid no one would have a better background than you.
