

Primordial 311

Chapter 311: Recasting the Dragon Vein Jade Seal

"If we don't eradicate the Black Cloud Sect today, once they recover, who within the Great Flame Dynasty will be able to resist their assaults?"

Lin Chen looked up into the distance and, upon seeing that the members of various sects were fleeing instead of joining forces to resist the Black Cloud Sect after the Black Cloud Bloody Array in the sky had been split open, immediately cursed under his breath.

The actions of the Great Flame Imperial Family seemed even more foolish to him.

To think that they would choose this moment to attack the Jade Cauldron Sect.

"Everyone, quickly recover your Spiritual Power. We cannot run away. This is an excellent opportunity to annihilate the Black Cloud Sect."

"Now that the Great Flame Imperial Family is in name only, once the Black Cloud Sect is destroyed, the entire Great Flame Dynasty will be dominated by our Jade Cauldron Sect. Maybe the other sects can escape disaster today, but they will ultimately be unable to evade our reckoning when we come knocking at their doors."

Lin Chen said in a calm tone, with a wave of his hand, several Fourth-Grade elixirs immediately flew towards Xu Ma'an, Li Xuanming, and the others.

The people who received the Fourth-Grade elixirs thrown by Lin Chen were incredibly shocked.

They couldn't help but wonder if elixirs were worthless in Lin Chen's eyes since he had so many, but what they didn't know was how much it pained Lin Chen's heart at this moment; those Fourth-Grade elixirs were meticulously refined from the countless Heavenly and Earthly Treasures he had obtained from the Descension Ruins.

However, as long as they got through this event, he, Lin Chen, would be qualified to acquire countless treasures, whose values would far exceed those of these Fourth-Grade elixirs.

What shocked them internally was Lin Chen's decision.

If Lin Chen had not spoken, they would surely have fled like the other sects.

After all, returning to the Jade Cauldron Sect was the safest option.

But Lin Chen's words made Xu Ma'an and the various Peak Masters see the light.

They all understood the implication in Lin Chen's words. He wanted to deal with the Black Cloud Sect and the Great Flame Imperial Family, then become the leader among all sects in the Great Flame Dynasty.

Everyone would then have to act according to the Jade Cauldron Sect's wishes.

This immediately stirred Xu Ma'an's and the various Peak Masters' hearts. Yang Yuemin took a deep breath and thought to herself that this was indeed her disciple, truly bold and daring.

Subsequently, everyone took the elixirs given by Lin Chen and started to recover their Spiritual Power.

Meanwhile, Lin Chen flew out of the Great Formation, picked up the two halves of the Dragon Vein Jade Seal that had previously been broken in Zhao Zhongtian's hands, and then returned to the midst of the Divine Fire Army Descent Formation.

"The Dragon Vein Jade Seal contains a formidable Power of the Dragon Vein. It seems that the Great Flame Imperial Family selected an imperial city built upon a Dragon Vein. Beneath Divine Sun City lies a massive hidden force of the Dragon Vein, which can be activated through this seal."

Lin Chen immediately recognized the function of the broken Dragon Vein Jade Seal in his hands.

The Power of the Dragon Vein is an exceptionally rare and precious power from the earth.

Such precious sites are typically chosen as the perfect locations for establishing sects and building cities, and it is rare for martial artists to willingly activate the Power of the Dragon Vein because the people living above it would receive great fortune.

Just the fact that the Spiritual Energy in the space above the Dragon Vein is denser than any other place is enough to deter martial artists from disturbing it.

However, the Great Flame Imperial Family, as an empire, still established a formation above it and forged the Dragon Vein Jade Seal. With the aid of this Dragon Vein Jade Seal, one could mobilize the power of the Dragon Vein. Otherwise, even a mighty one from the Heavenly Human Realm would not necessarily be able to call upon the power of the Dragon Vein by their own strength.

At this moment, a thought crossed Lin Chen's mind, and he took the Dragon Vein Jade Seal into the space of the Primordial Myriad Transformation Cauldron, his Second Soul Division following suit.

Looking at the two halves of the Dragon Vein Jade Seal in his hand, a thought suddenly emerged in his mind—if he were to repair the Dragon Vein Jade Seal, could he also mobilize the power of the Dragon Vein beneath Divine Sun City and summon again the golden giant dragon that Zhao Zhongtian had called forth before?

With this thought, Lin Chen's Second Soul Division immediately put the two halves of the Dragon Vein Jade Seal together, closely observing the formation patterns on it.

Due to the severe damage of the Dragon Vein Jade Seal, many of the talismanic scripts on it were no longer clear. However, Lin Chen's Second Soul Division had also grasped the source of the formation within the space of the Primordial Myriad Transformation Cauldron, so he quickly understood the mobilization formation on the Dragon Vein Jade Seal.

For Lin Chen, this formation was not particularly difficult—it was of Fourth-Grade level.

But to employ the Dragon Vein Jade Seal, it must be restored to completeness, and a complete set of formations also needed to be inscribed upon it.

Thinking this, Lin Chen's Second Soul Division immediately threw the two halves of the Jade Seal into the Primordial Myriad Transformation Cauldron.

For an Artifact Refiner to restore the Dragon Vein Jade Seal before them would surely be very troublesome, even for a Fourth-Grade Artifact Refiner, who would need several months to accomplish it.

Because the material of the Dragon Vein Jade Seal was a Fifth-Grade material, extremely difficult to melt and refine.

But Lin Chen was different. Inside his Primordial Myriad Transformation Cauldron, there was a Divine Fire, precisely the Blue Lotus Divine Fire he had fought for before.

Although Lin Chen had not yet refined the Divine Fire and couldn't manipulate it at will, the Divine Fire was very quiet within the Primordial Myriad Transformation Cauldron, showing no signs of unrest.

Lin Chen couldn't control it, but he could use its scorching power to melt and refine the Dragon Vein Jade Seal.

Hum hum—

As Lin Chen's Second Soul Division threw the Dragon Vein Jade Seal into the flames of the Primordial Myriad Transformation Cauldron, the Blue Lotus Divine Fire flickered consciously a few times, as if it was unwilling to be used by Lin Chen to refine the Dragon Vein Jade Seal.

However, as the Primordial Myriad Transformation Cauldron emitted a humming sound, the Blue Lotus Divine Fire immediately settled down again.

As time passed, the Dragon Vein Jade Seal was soon melted into a lump, and then, under the Artifact Refining Method of Lin Chen's Second Soul Division, it turned into a brand-new Dragon Vein Jade Seal.

Such a speed of melting and refining, even a Sixth-Grade Artifact Refiner would probably not be able to match; this was the mighty aspect of Divine Fire. It was imaginable that Artifact Refiners and Alchemists who possessed Divine Fire were incredibly powerful.

The Dragon Vein Jade Seal was ready, and to have it function in mobilizing the power of the Dragon Vein, all that was needed now was to inscribe the runes upon it.

Lin Chen had already figured out the runes, but the moment he held the Dragon Vein Jade Seal, he clearly understood that since its material was of Fifth-Grade, carving the runes on it would require an extremely hard and sharp tool.

Lin Chen tried using the Earth-Level Mid-Grade Artifact Glowing Sword, which was currently the highest-grade sharp tool he had, but it couldn't leave any mark on the Dragon Vein Jade Seal at all.

"It seems that Earth-Level Mid-Grade is not hard enough to leave a mark on it. What should I do?"

Lin Chen's Second Soul Division frowned deeply, pondering, when suddenly he heard a whooshing sound. It was the Dragon Fang Dagger from within the flames of the Primordial Myriad Transformation Cauldron flying over.
