

Chapter 103

Justin didn't expect Oliver to suggest revealing his relationship with Lindsay in the middle of the night.

He thought for a moment. "Is that really necessary?"

He and Lindsay were still having issues.

Oliver tried to persuade him. "Then tell me, how else can we divert attention without a major distraction? The celebrity we exposed isn't nearly as well-known as you. And Lindsay's popularity has been skyrocketing with this variety show and her recent trending topics.

"Announcing your relationship will definitely dominate tonight and tomorrow's headlines."

Justin was silent for a moment. "I'll think about it."

Oliver, being a classmate and childhood friend of Justin, couldn't interfere with his decisions.

"Alright, get back to me soon so I can make arrangements."

"Okay!"

They ended the call. Because of Oliver's call, neither Alex nor Justin could sleep.

Half an hour later, Oliver was still in the study, discussing with his PR team.

Suddenly, an assistant joined the video conference.

"Oliver, we've got a problem. The paparazzi have uncovered Lindsay's childhood history. They've also revealed that she is the biological daughter of the Harper family, and it's trending at the top of the searches."

Oliver and his team quickly picked up their phones and checked the trending topics.

The top headline read, "Shocking News: Lindsay Is Actually a Wealthy Heiress, But Unfortunately..."

The title immediately piqued curiosity—unfortunately, what?

Clicking on it, the article detailed Lindsay's childhood experiences, beginning with her abduction by traffickers at a young age, nearly being sold to a remote village for child labor.

On the way, a mystic saw through the traffickers and saved Lindsay and several other kidnapped children. At that time, Lindsay was the only unclaimed child, so the mystic adopted and raised her.

She then embarked on a path of academic excellence. From the beginning of her schooling, she consistently ranked first in her grade. She even skipped several grades and was admitted to the Divination Department at the Royal Capital University with the top score in the region.

Her academic records and list of awards were posted online. During her senior year, she entered the entertainment industry, graduating with excellent grades.

At nineteen, the prestigious Harper family recognized who she was

and took her back. It turned out she was the Harper family's long-lost daughter.

Moreover, Alex and Olivia's real surname wasn't Lowe but Harper. They used their mother's surname when entering the entertainment industry. Olivia was not the biological daughter of the Harper family but was adopted after Lindsay went missing.

The fans who specialized in face reading had been correct. According to the reports, Lindsay had a falling out with the Harper family and moved out, which explained the tense relationship between her and Alex during the variety show.

As for deeper secrets, the paparazzi hadn't uncovered them yet.

The Harper family, a prestigious lineage with generations of legacy, had their information intentionally sealed by Edmund and his brothers.

It was very difficult to dig up information about the Harper family. The paparazzi managed to uncover these details only by delving into Lindsay's birth history. Of course, they intended to put more effort into digging deeper.

Additionally, a prominent social media influencer posted on Instagram, sharing screenshots of the paternity test between Lindsay and the Harper family.

Someone sent these images to his email, and he verified their authenticity before posting them to attract attention. This influencer, backed by capital, ran an account dedicated to revealing scandals and wasn't afraid of offending anyone.

These revelations quickly exploded and spread online. There had been no solid evidence supporting previous online claims that Lindsay and Alex were either cousins or biological siblings.

But now, with the paternity test results out, and this well-known influencer known for genuine scoops, everyone believed the outcome completely.

Apart from being amazed by the significant revelation, people were also dazzled by Lindsay's top rankings and awards.

They admired someone who had endured hardship and still achieved such excellence.
