

Chapter 146

"For the sake of her two daughters, their mother never remarried, and even used to work two jobs: one to repay the debt from her father's illness, and the other to fund her children's education.

"Upon starting university, my friend took on part-time work to cover her expenses, easing her mother's financial burden. We visited their hometown briefly. Though modest, it exuded warmth and a genuine sense of community."

She envied that warmth and motherly love, hoping to hold onto it.

Lindsay thought for a moment and asked, "If she becomes my assistant, the work can be quite demanding at times. She might need to travel away from New Horizon occasionally. Do you think she can handle that kind of schedule?"

Jenny replied, "Yes, she can."

"Her sister is graduating from university this year and has decided not to look for a job for now, choosing instead to take care of their mother in the hospital. She started working to earn money for surgery and medical expenses.

"Given her work experience, her salary would be significantly higher than that of a recent graduate. She and her mother share a particularly close bond."

She added, "She had been in a serious relationship before, with marriage on the horizon. However, her mother's sudden illness changed everything. The situation required not just surgery but also

long-term care and ongoing medication.

"Her boyfriend and his family proposed a compromise: she could send money home monthly but shouldn't quit her job to personally care for her mother. They suggested her sister take on that responsibility instead.

"If she insisted on leaving her job, they wanted to postpone the wedding. Despite their long history together and her genuine feelings for him, his stance on this issue led her to end the relationship right away. So, besides her work abilities, I also admire her character."

Lindsay valued character as well. "From what you've said, I think she's great. Get in touch with her. If she's up for it, have her come and talk with me. If she becomes my assistant, we'll give her an advance on her salary."

Jenny nodded. "Okay, I'll contact her tonight."

She then asked, "Regarding artists, should we poach from other entertainment companies, or should we cultivate newcomers?"

Lindsay said meaningfully, "What if we took on the artists that Harper Entertainment has cast aside, shelved, or deliberately held back? We could nurture their talents and help them rise to fame. Can you imagine how exhilarating that would be?"

She had decided to sever ties with the Harper family. No matter what happened, she would never reconcile with them.

Initially, she focused solely on excelling in her work and gaining more supporters, choosing to ignore that family for the sake of her career

and survival.

But Edmund and Oliver, in an attempt to force her to submit to them, tried to blacklist her from the industry.

When appearing on the same variety shows as her, they hired internet trolls to promote Olivia while slandering her.

This time, they stepped up their efforts to whitewash Olivia's image while trampling on hers.

If she hadn't planned ahead and saved those photos in advance, coupled with the strong support from Elric's team, she would have been the one blacklisted and scorned by the entire internet.

After being blacklisted, who would dare hire her?

How could she continue in the industry?

They wanted to cut off her future completely, which was utterly outrageous.

She didn't want any more entanglements with them, but that didn't mean she would let them bully and control her.

If they could just let her be, they could coexist peacefully.

However, with Edmund and Oliver harming her, and trying to ruin her future, she had to retaliate.

Poaching talent and using Harper Entertainment's resources to build her own studio was one way of getting back at them.

Those talents they couldn't promote, or even intentionally

suppressed, would soar under her guidance.

This strategy wouldn't merely be a setback for Harper Entertainment. It would also force Edmund and Oliver to confront the consequences of their short-sightedness and experience a taste of their own misjudgements.

Harper Entertainment, with all its power, tried to blacklist and defame her, preventing her from surviving in the industry.

So, she would take over them, stepping on Harper Entertainment to rise up.

In the end, perseverance and strategic patience often yield the most satisfying results.
