

Superman Delta's Life Diary

Chapter 5 Who doesn't want to hear the gossip of the Land of Light?

"That, old star, do you know Siro?"

While eating, Xia Luzhen asked suddenly.

"I know, but I don't know. How could I know a big guy like Ultraman Cerro? I'm just an ordinary Ultraman." Xingguang Yi replied.

Ordinary? Ultraman?

The combination of these two words almost made Xia Luzhen hear schizophrenia. You are an Ultraman, why are you still ordinary?

When Xingguang saw that Xia Lu was really puzzled, he explained, "The Otto family is also a race. There are many individuals, and they are not as great as you think."

As soon as the box was opened, Damai and Laohou also began to ask questions.

No way, the sand sculpture roommate around me suddenly turned into Ultraman, and it was still native, which was so curious.

"Old Star, I heard that the Ultramans of the Land of Light are divided into silver, red and blue. Which clan are you from?" Malco asked.

"In fact, it was divided at the beginning, but now there are more and more Ultramans of different colors on my body, so they are not divided very much. My mother is from the silver family, and my father is from the blue family, so I have three colors on my body. By the way, in the m78 nebula, a purple Ultraman was born on a planet far away from the Land of Light."

"Then... Hey, I'm a little embarrassed, how did you Ultraman combine? It's not our LSP, we are really curious and want to see it."

Hearing Xia Luzhen asking this, Xingguang blushed a little, hesitated for a moment, and said, "Just... a couple who want a child, go to Silver Cross Hospital and put their light into the culture capsule, When the light of the two merges, a new life will be born."

"Cut, it's so simple, why are you blushing?" Xia Luzhen smacked his lips.

"Actually, many young couples have recently started to choose natural childbirth." Xingguang took a bite of rice, which may be the topic of the meal, "but the risk of natural

childbirth is indeed greater than that of cultured capsules. Prenatal care for pregnant women, during childbirth The care of the mother and the baby after giving birth is very troublesome. Then the Silver Crusade commissioned the Space Science and Technology Bureau to build a group of delivery rooms, nursing rooms and convalescence rooms, and the situation is much better.”

“Hey, isn’t it, Superman Aguang even takes care of this matter?” Malco gasped, and Superman Aguang was really terrifying, “Also, why do you know so well?”

“My mother is a nurse of the Silver Crusade, and my father is a researcher at the Space Science and Technology Bureau. As for Mr. Hikari, Mr. Hikari is a workaholic, and a lot of research is not led by Mr. Hikari, he is also Will help. So you know, in the days when Mr. Hikari ‘run away from home’, the Space Science and Technology Agency was under a lot of pressure.”

“Okay, it’s up to me now.” Hou Xianxing raised his hand, “Old Xing, I want to ask what’s the matter with the timer on your Ultraman’s chest, why some Ultraman have it and some Ultraman has it. Mann doesn’t.”

“Oh, you said this.” Xingguang thought about it and organized the wording, “The color timer was first developed by the Space Science and Technology Bureau (Zhuzhen and Damai shouted: Superman Aguang Niu Beer!), I It’s also unclear whether Mr. Hiccali was in the Science and Technology Bureau at that time, after all, I was not born when the color timer was invented.

The topic is too far away, because our Ultraman has a special body, that is, the giant of light. The color timer can be said to be both an instrument and an organ.

At the earliest, because some Ultramans were going to perform missions outside the m78 nebula, the Science and Technology Bureau developed this instrument that can store energy and indicate energy consumption. But I also said that this thing is an organ, so some Ultraman with a color timer, their children will also have a color timer when they are born, which is considered heredity.

Because the deeds of the Ott brothers spread more and more widely, many young Ottos also went to the Science and Technology Bureau to customize their own color timers, and my father was in charge of this. I once had a friend whose parents once had Yangchun noodles and liked it very much. I named my friend “Yangchun Noodles”. My friend also likes Yangchun Noodles under the influence of his parents, so he customized a “麵” color timer.

There is also an Ultraman named “Sword”. His color timer is a vertical sword. He originally wanted to add the function of cutting down the timer and cutting people, but due to personal safety issues, he was banned by the Science and Technology Bureau. And the Silver Crusaders vetoed it. ”

“...You Ultramans are quite free to name them. What about yours? I think your color timer is a right triangle. What does it mean?” Hou Xianxing continued to ask.

“Me? My real name is Delta, so I made a right triangle. By the way, we Ultraman have the concept of surname and first name. The surname is usually written in the language of our family, and generally only in the more formal occasions, and the first name is enough for the rest.”

Seeing that a large portion of fried chicken was almost bottomed out, Xingguang, who felt that he was not full, took out his mobile phone again and again and ordered a large portion of large plate chicken.

“Does anyone want beer?” Xingguang asked.

“Make more appointments, I’ll call you the money later, and the beer is my invitation.” Xia Luzhen said, “By the way, are you sent to Earth this time?”

Xingguang sighed, “Let me tell you first, the Kingdom of Light will provide compulsory education for all children. After graduating from high school, there are two options to choose from. One is to be admitted to the University of the Kingdom of Light to continue their studies. The next thing is to go to work, such as the Ultra Space Guard.

I didn’t have any big ambitions. At that time, after graduating, I wanted to go to the Children’s Service Science Bureau under the Science and Technology Bureau to make toys for children, or to be a guide at the Tourism Bureau. ”

“...There are so many flaws that I don’t know how to complain. Let’s talk about what happened to the Tourism Bureau first.” Xia Luzhen’s mouth twitched.

“There are people from other planets who want to come to the Land of Light for tourism, business, family visits, etc., and the Tourism Bureau provides help. The location is set next to the Otto Space Port, which is somewhat like the entry and exit of human society. Authority.

In the past, the Tourism Bureau was a subordinate of the Alien Affairs Countermeasures Bureau, but the Science and Technology Bureau was stolen too frequently for a while, and the Tourism Bureau began to be jointly managed by the Alien Affairs Countermeasures Bureau and the Space Security Agency. ”

The success of Xingguangyi’s explanation made the remaining three people suddenly realize, really can’t blame the superman Aguang, it turns out that the bad guy is here.

“As for the Science Bureau of Children’s Services, on the surface, it means to solve the problems of children and children, but most of the time is to develop teaching aids and toys that the residents of the Land of Light need.

The transforming device of mine was remodeled from the things in the warehouse during my internship. I remember that it was a test item made by Mr. Hikari a long time ago. Having said that, more than half of the test items in the warehouse of the Service Science Bureau seem to be made by Mr. Hikari. ”

Forget it, Superman Aguang, you better take the blame, why are you everywhere.
