

S.P.E.C.T.O.R 106

Chapter 106: WAY TMI

"But how?" Stacey asked as she watched the stream that was showing the eighty sixers watching the approaching shuttle.

"I had one of my microcams head over to the meeting point after we arrived at the base of the tower." Adam replied.

[Noobkiller9000 (Earth): Sweet, now we get to watch the action.]

[Thewhitesoverign (Devatov 7): Won't they notice the microcams though?]

[DeverinianLordMalacoss (Deverinian 9): They seem to have stealth capability.]

[Thewhitesoverign (Devatov 7): Wow.]

[OfficialRowena (Felinia 4): Impressive, I've never heard of a streamer with stealth capable microcams.]

"Here they come." Adam, Stacey and the chat heard Joe say as the shuttle started to land, it folded up its two lower wings so that the landing gear could deploy before the shuttle landed.

After touching down the shuttle hissed slightly before the entry ramp lowered and allowed three individuals to step out.

The one in the middle that led the way was a Nagareen dressed in a grey suit while two individuals that walked slightly behind flanking him on either side wore combat armour like the ones Adam and Stacey had killed, one of them held an assault blaster in their hands while the other carried a case in one hand and a blaster in the other..

"You brought the product?" The Nagareen asked with a slight hiss to its voice.

[Justiceistruth: (Earth): Why didn't the other Nagareen hiss like that one just did? You would have thought that was common in a snake species.]

[Beinglittleisnotadisadvantage (Strathorp 7): It is common, however it seems their combat armour alters their voice slightly.]

[AlamoMatador4thewin (Earth): That would explain why the streamer's companion has not been found out when she responds.]

[Beczontop (Terrana 5): She's not his companion.]

[AlamoMatador4thewin (Earth): ...]

"Your not Mr Smith." Jessie replied with a frown as the voice sounded different.

"Mr Smith, hahaha." The Nagareen replied before adding. "I'm his associate, the product?"

"Of course I have it, do you have the credits?" Jessie asked in return as she held up the case containing the dark matter.

"Naturally." The Nagareen hissed as it indicated the case held by one of its companions before saying, "However you will forgive me if I ask to check the merchandise."

"Still not very trusting are you." Jessi replied as she opened the case before turning it to show the Nagareen what was inside.

[Beinglittleisnotadisadvantage (Strathorp 7): Holy fuck is that dark matter?]

[OfficialRowena (Felinia 4): Oh my progenitor.]

[Thewhitesoverign (Devatov 7): So pretty, I had seen images of it but seeing it live on a stream is somehow different.]

[Beczontop (Terrana 5): How the hell did these gang members get dark matter without the military knowing?]

[Tessisdabest (Terrana 5): The question is how is there even any dark matter in Terran territory. We do not possess the technology to harvest it.]

[Prestigious3horns (Vinox 2): This is certainly unexpected.]

[Handsome3horns (Vinox 2): I know I was expecting drugs or something.]

[Whostolemyduck (Earth): When you say dark matter, do you mean that stuff that theorised stuff?]

[[Notification: [Beinglittleisnotadisadvantage (Strathorp 7): Has issued you a Stream quest]]

[[Stream Quest: Prevent the Nagareens from acquiring the dark matter.]]

[[Completion Reward: 5,000 Credits.]]

[[Failure Punishment: Pay 5,000 credits to quest provider.]]

[[Would you like to accept?]]

"I don't know why you're suddenly giving me a stream quest but this was the plan all along." Adam said as he saw the notification appear.

[[Stream quest accepted]]

[Beinglittleisnotadisadvantage (Strathorp 7): Those Nagareen thieves can't be allowed to get their hands on dark matter, they already somehow manage to steal other peoples work without being caught, god knows what they will get up to if they get their hands on that. As for what dark matter is...]

As Beinglittleisnotadisadvantage explained to that chat what dark matter was, the Nagareen nodded before saying, "very good." while taking the other case from its companion.

As it did so Adam, Stacey and the chat heard, "That's the signal. Team two take out the targets, teams three and four move in."

Suddenly everyone heard two more shuttles approaching rapidly as Adam took aim through his sniper rifle while saying, "I guess that's our cue."

"I guess so." Stacey replied with a smile as she lifted her missile launcher and pointed it towards the incoming shuttles.

[Gunlovergirl (Earth): Oh yeah here we go.]

[OfficialRowena (Felinia 4): Let's find out how good my granddaughter is with a missile launcher. 🎯]

[Superhearofangirl (Earth): I think I can safely say that those words have never been said on Earth before.]

[Pokemonking0924 (Mobius 2.0): That's quite the distance I wonder if the streamer can make the shot.]

"What are you waiting for team two, take them out." One of the individuals yelled over the comms.

"Copy that." Stacey replied in her normal tone of voice as she didn't bother to hide it anymore while she lined up the missile launchers holographic display with the two shuttles before pressing the button twice for each shuttle.

"You're not team two! Who the hell are you?"

"You're never going to find out." Stacey replied as she flicked the safety before pulling the trigger.

One after the other as the missile barrels rotated after launching the micro missiles from them and soon four micro missiles tore through the air towards the shuttles.

"What!" The suit wearing Nagareen said before everyone on the ground turned to see four small objects launching from the top of the tower towards the incoming shuttles.

Adam aimed slowly at the suit wearing Nagareen's head and as he held his breath he pulled the trigger.

"BUZZ"

The sniper rifle buzzed slightly louder than what his blaster did just as a bolt of energy shot from the end a split second before the suit wearing Nagareen's head disappeared.

[Gunlovergirl (Earth): Oh hell yeah, I just orgasmed.]

[AlamoMatador4thewin (Earth): WAY TMI.]

[Superhearofangirl (Earth): ...]

[Celebrityhunter69 (Earth): ...]

"WOAH." Joe said in shock as he, Jessi and the other member of the eighty sixers hurriedly backed away.

"Damn it, we're being ambushed." The combat armour wearing individual not carrying the case said as he hurried to raise the assault blaster he was carrying, but before he could his head suddenly vanished.

"Shit." The third case carrying individual cursed but before it could do anything Jessie, Joe and the other woman raised their own weapons and shot him down.

"EVADE EVADE." The individual on the comm yelled just before the four micro missiles impacted the two shuttles causing huge explosions.

[1000yearsofdeath (Earth): Boom baby. Kekeke.]

[Justiceistruth: (Earth): They're going down.]

The shuttles were on fire and had lost large parts of their structure as they plummeted towards the ground.

"Here." Adam said as he handed Stacey another clip of micro missiles before adding, "Tell Jessie and them to get out of there then take out that shuttle, it won't be long before sky tower security turns up.

"Copy." Stacey said while accessing her uniband and calling Joe which was quickly picked up.

"What the hell was that?" Joe asked.

"No time, evac now, we will cover you. Sky tower security is probably already on its way." Stacey said as she quickly reloaded her missile launcher.

"Copy." Joe said before hanging up.

Adam watched through his scope as Joe quickly collected the case of credits that had been dropped before the three of them got into the hovervan and drove away.

Afterwards Adam picked up the sniper rifle and took it to the other side of the tower roof before setting it down and looking down at the two shuttle crash sites.

[Celebrityhunter69 (Earth): Why isn't he evacuating?]

[Werewolf1987 (Caniniar 4):He's probably checking to see if any of those on the shuttle survived.]

[Thewhitesoverign (Devatov 7):Look, I see movement, one survived.]

A moment later however the movement stopped as a gaping hole appeared in the survivors chest before they collapsed to the ground dead.]

[OfficialRowena (Felinia 4): So cold, so ruthless. I love it. 😊]

The chat watched as the camera switched to show Stacey firing off four micro missiles at the shuttle that was still on the ground at the meeting spot before it blew up as the micro missiles hit and small bits of it flew all over.

[[Stream Quest: Complete.]]

[[Reward: 5,000 Credits.]]

"We're done here." Adam said as he stood up and disassembled his sniper rifle before placing it along with Stacey's missile launcher into the large bag as she handed it to him.

He swung the bag onto his back before walking over to the Nagareen's sniper rifle and aiming it at the spot where the meeting had taken place before he fired off a few rounds.

"What are you doing?" Stacey asked as the loud noise of the gun fire faded away.

[OfficialRowena (Felinia 4): Clever boy.]

[DeverinianLordMalacoss (Deverinian 9): Agreed, even I didn't think of that until I saw him do it.]

"Covering our tracks a bit." Adam replied as he activated his anti-gravity drive causing the wings and tail to appear.

[Thewhitesoverign (Devatov 7):Oh wow. 🤩 There not real dragon wings but they look cool. As for that tail it does look incredibly lifelike. He's like a black dragon.]

[OfficialLorelie (Terrana 5): Handsome right.]

[Thewhitesoverign (Devatov 7):Oh yeah.]
