

S.P.E.C.T.O.R 111

Chapter 111: Universal Force Staff

As the first guard whose arms were locked in place by Adam's staff stared at the crumpled body of his companion in shock Adam quickly shrunk the staff back down thus easily removing it from the guards arms.

Before the guard could realise he was free Adam pointed the now small staff at the guards back before pressing the button that caused another red flash to erupt from the staff's end just before one appeared on the guards back along with the sound of impact.

The guard like his companion slumped to the ground, though unlike with the companion who was hidden behind the security desk, Adam and the chat could see a large gaping wound in the guard's back.

[Noobkiller9000 (Earth): What the hell just happened?]

[AlamoMatador4thewin (Earth): I think the streamer disabled the guard with some sort of extendable staff before shooting the other with the same staff, after which he shrunk the staff and shot the first guard he originally disabled.]

[Justiceistruth: (Earth): I can see that, how did it happen? What kind of staff shoots things?]

[SciFifanboy (Earth): That was so Sci-Fi.]

[Gunlovergirl (Earth): That was Sci-Fi, I want one of those.]

[DeverinianLordMalacoss (Deverinian 9): How the hell does the streamer have one of those?]

[Beinglittleisnotadisadvantage (Strathorp 7): I am asking myself the exact same question. Is it possible the streamer is actually a Universal Senator's guard?]

[DeverinianLordMalacoss (Deverinian 9): Not possible, the streamer is from outside the known universe, how could they be a Universal Senator's personal bodyguard.]

[OfficialRowena (Felinia 4): How on Darah does my granddaughter know someone who wields a Universal Force Staff?]

[MerceadAnderson (Palaxia): It's probably one of those fakes that were flying around for a while.]

[Gunlovergirl (Earth): A what? Can someone explain please.]

[OfficialRowena (Felinia 4): That extendable staff the streamer just used, it is called a Universal Force Staff and is normally only usable by a Universal Senator's personnel bodyguard. They are strictly controlled because they are a weapon that was created with the combined effort of many races and species.]

[Whostolemyduck (Earth): Is that unusual?]

[Beinglittleisnotadisadvantage (Strathorp 7): It is, most weapons are made by one specific race such as the Terran Munitions GL Two blaster that Diva Rowena's granddaughter carries. That weapon is made by Terran Munitions, a Terran company. Most races have their own version of that blaster manufactured by one of their race or species weapons manufactures, but at the end of the day it is produced only by them alone.]

[Beinglittleisnotadisadvantage (Strathorp 7): Universal Force Staff is different however since it was designed and manufactured by several different weapon companies belonging to different races or species, no one company can craft a force staff because the components are sent to the Universal Senate Security HQ where they are constructed before being handed out to senator bodyguards and they alone.]

[AlamoMatador4thewin (Earth): Ok but what's the big deal, it's just a symbol at the end of the day right, it's not better than any other weapon.]

[DeverinianLordMalacoss (Deverinian 9): It's not just a symbol, it's a statement. Only the best from all over the universe get chosen to be a Universal Senator's personal bodyguard and the force staff is proof that they are worthy to carry out this honourable task. A race or species universal senator's is essentially their highest power in the universe. While the individual might answer to their ruler it is in the end them that decide matters on universal law along with the other senators.]

[Beinglittleisnotadisadvantage (Strathorp 7): Also it's not just a weapon but a utility tool that has many functions, most of which are known only to those allowed to wield them.]

[OfficialRowena (Felinia 4): This could be a problem for the streamer, if the Universal Senate Security HQ finds out a non bodyguard is using a force staff they might come after him.]

[Noobkiller9000 (Earth): It's that serious?]

[Gunlovergirl (Earth): Oh man I want this thing even more now.]

[Noobkiller9000 (Earth): [MerceadAnderson said it might be a fake, What's that about?]

[Beinglittleisnotadisadvantage (Strathorp 7): Oh that, yeah that happened a while back when the force staff was first deployed by the Universal Senate Security HQ. Many individuals wanted one for themselves as they were so multifunctional. Forgers being what they are, saw an opportunity to make a quick credit by creating cheap knock offs, needless to say it was quickly dealt with and the forgers quickly learned not to try it again.]

[Noobkiller9000 (Earth): So you think the streamers staff is one of those forgeries?]

[MerceadAnderson (Palaxia): It's more likely than it being a legitimate one.]

[Sparesomechangebro (Earth): Honestly the guy can have a limited edition weapon that is used by only a select few in the entire universe, yet he can't spare me some change. 😏]

[Leonthemoneygiver (Earth): There there. 🙄]

[Sparesomechangebro (Earth): You're my only friend bro. 🤔]

[Leonthemoneygiver (Earth): I know.]

[Superhearofangirl (Earth): Geez, get a room you two.]

[OfficialLorelie (Terrana 5): Streamer you should dispose of the force staff before it's too late, that thing is too dangerous for you to carry around.]

Adam had been paying attention to the chat after they started talking about his universal force staff. Spector had told him its name and its functions, however it had not told him about its origins. Considering how versatile it was with so many different functions he wasn't entirely surprised that it was rare.]

"I'll be fine." Adam said dismissively as he put the force staff back in its holster while he moved towards the security desks console.

[OfficialLorelie (Terrana 5): ...]

[OfficialRowena (Felinia 4): Oh my, when was the last time a guy said no to you Lorelie. 🤔]

[OfficialLorelie (Terrana 5): A longer period of time than it's been for you.]

[OfficialRowena (Felinia 4): Well I can't deny this. Still for us both to be refused by the same man. How amusing.]

As Adam reached the console he hovered his hand over one of the connector ports. Suddenly the chat watched as a part of his anti-gravity armour around his hand started to slither and extend away towards the connector port at which point it changed into the required connector and slotted in.

[OfficialRowena (Felinia 4): What on Darah?]

[DeverinianLordMalacoss (Deverinian 9): Oh my, how fascinating.]

[Beinglittleisnotadisadvantage (Strathorp 7): Eight this is the first time you have witnessed this.]

[DeverinianLordMalacoss (Deverinian 9): He's done it before?]

[Beinglittleisnotadisadvantage (Strathorp 7): Similar, back on his home planet his uniband morphed like the armour is doing now.]

[DeverinianLordMalacoss (Deverinian 9): His uniband. I have never heard of any uniband having such a function. Is it a new model?]

[OfficialLorelie (Terrana 5): Not one that's readily available. The Terran's supplied me with a new uniband after my was slightly damaged during my attack. It's already the latest model on the market.]

[OfficialRowena (Felinia 4): This streamer is getting more and more interesting.]

[[Access to Trillion Sky Tower Security data acquired]]

"Download emerging and erase any evidence that we were here." Adam said.

[[Affirmative downloading.]]

"I thought you only wanted the data on that dickhead?" A familiar voice said from the door.

Adam looked over to see that Stacey had just entered.

"That was originally the plan, but after how these guys reacted when I mentioned corruption I got curious. No harm in sneaking a peak."

"I saw. I watched the whole show on the stream, it was very entertaining." Stacey said before giving a giggle.

[OfficialRowena (Felinia 4): I agree with my dear granddaughter on this. I also thoroughly enjoyed the show.]

"I'm glad you all enjoyed it." Adam replied.

[[Download Complete.]]

[[Evidence Erased.]]

""Let's go." Adam said after his armour had disconnected from the console and reverted back to its original shape.

Stacey nodded before leading them both back outside to the waiting hoverbike.

Adam climbed on swiftly followed by Stacey before he activated the hoverbike and turned the accelerator causing it to speed away from the sky tower.

[[Mission Complete]]

[[Stream Ended.]]

As they left the area they noticed some shuttles heading back towards the sky tower.

"Fuck I still can't access the stream, I know he's live because there are comments about it on Xer-verse. But then why can't I or anyone else in the office access it?" Sinead Quintana complained as she stared at the holographic screen of her console in front of her.

"Still no joy?" A woman asked as she entered Sinead's office at the USNN or Universal subnet network news.

"No and I can't understand why, I even asked some friends who have nothing to do with USNN to try, but they also failed." Sinead answered as she leaned back in her chair.

"Well you gonna kick yourself when you hear what I have to tell you then."

"Go on, lay it on me." Sinead replied with a lack of interest.

"Hey hey at least try to show some interest, it is about your favourite streamer after all."

"He's not my favourite streamer, how can someone you can't even watch be your favourite streamer?"

"I dunno, maybe you have the hots for him."
