

S.P.E.C.T.O.R 31

Chapter 31: Emergency measures

Shortly after Spector's announcement Adam saw the aircraft ahead of him and he soon quickly caught up to it before slowing down and flying alongside.

The red glow of his wings lessened slightly however they still glowed enough to leave a trail behind him.

[DeverinianLordMalacoss (Deverinian 9): Wow, talk about a primitive vehicle, it looks like it's still using propellant based thrust.]

[Gunlovergirl (Earth): Pimitive again.]

[Whostolemyduck (Earth): I get the feeling we're going to have to get used to being called primitive when we watch Spector's streams.]

[Gunlovergirl (Earth): Ugh.]

[DeverinianLordMalacoss (Deverinian 9): My apologies, I meant no disrespect, but you must understand that compared to any other planet connected to the universal subspace network your planet does indeed seem very primitive technologically based. I mean that craft doesn't even seem capable of space flight. Actually how is this planet connected to the network?]

[Prestigious3horns (Vinox 2): We have all been asking that question since we started watching the streamer and so far no one has been able to provide an answer.]

[DeverinianLordMalacoss (Deverinian 9): Fascinating.]

[Noobkiller9000 (Earth): So what's the plan streamer, do you plan to disintegrate the plane like the car?]

[DeverinianLordMalacoss (Deverinian 9): Wait disintegrate, how's he supposed to manage that?]

[Beczontop (Imperial Down): We don't know why but his blaster is capable of the disintegration shot.]

[DeverinianLordMalacoss (Deverinian 9): ... what? His blaster?]

[Solarianpride11 (Solarian 4): You don't even know that 'My Lord', everyone in the chat knows about that.]

[DeverinianLordMalacoss (Deverinian 9): Oh? And how do you know it, you also only just joined this stream.]

[Solarianpride11 (Solarian 4): It was in the article I read 'My Lord' and I have seen it in clips on Xerverse.]

[DeverinianLordMalacoss (Deverinian 9): ...]

[Noobkiller9000 (Earth): So anyway stream what's the plan?]

"Hmmm." Adam made a noise as he thought about it. He could just disintegrate the plan but was that really enough punishment for Viktor who had killed the love of his life?

No it wasn't so he decided to let Viktor and his father die in a more harsh and fitting way. Whether deliberately or not he conveniently didn't think about the pilot.

"I'm going to shoot out the engines." Adam decided as he announced to the stream.

[DeverinianLordMalacoss (Deverinian 9): What but I wanted to see a blaster use the disintegration shot.]

[Solarianpride11 (Solarian 4): While I loathe to admit it, I have to agree with this Deverinian.]

As Adam was preparing to move into position the aircraft suddenly started to turn and enter into a dive.

On board the aircraft the pilot was leisurely keeping an eye on the navigation equipment while letting the autopilot handle most of the work.

He was slightly annoyed with the sudden departure demand from Alamo City because it meant he had to speed through the pre-flight checks faster than normal and more importantly the stewardess that normally served Francis Morose was not able to join them in time. He and the attractive stewardess often found a few minutes to fumble around in the cockpit together without their boss knowing, however now that wasn't possible.

Both of these things were of course highly illegal and dangerous, however the pilot had been flying both commercial and charter planes for years without incident having performed rush jobs for take offs several times also since he would get a hefty bonus each time he didn't care.

As he was relaxing in the cabin and grumbling about the stewardess not being there a communication suddenly came over the radio.

"Flight A C one seven nine nine this is Alamo City control come in please, repeat flight A C one seven nine nine this is Alamo City control come in please."

"This is flight A C one seven nine nine go ahead control." The pilot replied calmly.

"Flight A C one seven nine nine we have just been alerted to an unidentified flying object on an intercept course with you at high speeds, you are advised to turn to heading zero seven zero and descend to twelve thousand feet, I repeat we have just been alerted to an unidentified flying object on an intercept course with you at high speeds, you are advised to turn to heading zero seven zero and descend to twelve thousand feet, please confirm."

"The fuck." The pilot cursed before taking control of the plane and altering course as he replied.

"Confirmed control turning to heading zero seven zero and descending to twelve thousand feet."

As the plane suddenly turned and descended the cabin door opened and Francis Morose asked, "What the hell is with this sudden turbulence?"

"Apologies sir but I have just been advised that an unidentified object is on an intercept course with us so we are taking emergency measures." The pilot replied as he continued to alter the direction and altitude.

"What? What sort of unidentified object?" Francis asked in alarm.

"Unknown sir, please return to the cabin and buckle yourselves in."

Francis quickly returned to the cabin and buckled himself in as he explained to Viktor what was happening.

As Viktor was about to ask more questions he caught sight of something out the window next to him and couldn't help but curse, "What the fuck is that thing?"

Adam watched curiously as he wondered why they suddenly made a course change and started descending, they were in the middle of the ocean and had no place to land.

[Superhearofangirl (Earth): Look, the plane started to turn.]

[StealthAssassin9 (Earth): It's also descending, I wonder why.]

[Handsome3horns (Vinox 2): Do Earth plans normally change their course like that?]

[Noobkiller9000 (Earth): No, something must have forced them to change their course.]

[Whostolemyduck (Earth): If I had to guess I would say that the streamer was probably picked up on radar.]

[StealthAssassin9 (Earth): Actually that makes sense, the streamer was flying at Mach 5 and with his size he might have been mistaken for a hypersonic missile.]

[Solarianpride11 (Solarian 4): Radar?]

[Tessisdabest (Imperial Down): A primitive form of sensor, it uses electromagnetic sensors to detect objects. However it's very limited compared to the sensors used on spaceships, if the object it detects is not transmitting any sort of identification then the operator has to make an educated guess at what it is.]

[DeverinianLordMalacoss (Deverinian 9): How inconvenient.]

[Whostolemyduck (Earth): Unfortunately this could spell bad news if my guess is correct.]

[Beczontop (Imperial Down): Bad news?]

However, before Duck could explain, Spector spoke up.

[Alert, object detected approaching at hypersonic velocity. Considering this planet's level of technology the possibility of it being a hypersonic missile is high.]

[Whostolemyduck (Earth): I knew it.face palming emoji]

[1000yearsofdeath (Earth): So the streamer probably got mistaken for a missile that was on an intercept course with the plane and so they launched an actual missile to try and intercept. Kekeke.]

[Celebrityhunter69 (Earth): Oh wow that's bad.]

"Fuck, what direction is the object approaching from?" Adam asked in a hurry as he unholstered his blaster.

[Approaching object detected at six o'clock.]

Adam quickly spun round and focussed on the direction he had just come from. Soon he noticed a glow on the horizon which soon took the shape of a missile that was heading right for him.

[SciFifanboy (Earth): Oh shit it is a missile, that's not SciFi.]

[Superhearofangirl (Earth): Get out of there streamer, evade evade.]

[Noobkiller9000 (Earth): Can he evade? Even if he does, won't it just circle around as it continues to target him?]

Adam suddenly reactivated his hypersonic speed and flew away with the missile following him.

"What are my chances of survival if that thing hits me?"

[Based on available data you have a 99.9% chance of survival though you would likely receive injuries.]

[Noobkiller9000 (Earth): Damn 99.9% survival after being hit by a missile.]

"Why only 99.9%?"

[1000yearsofdeath (Earth): Kek, the streamer is not happy with his 0.1% chance of dying. Kekeke.]

[The anti-gravity armour is more than sufficient to protect you from the impact and resulting detonation. However I am unable to calculate for any unknown variables, that is why it is only 99.9%]

"Good." Adam said before he rolled over so he was flying upside down as he started to fire his blaster at the missile.

[Handsome3horns (Vinox 2): Who wants to place bets on how many shots it takes him to hit it?]

...

Knock knock

"Enter Sebastian Morose said from behind his large desk as he went through documents on his different family members, he was researching who would be best to replace Francis.

Sabastian Morse's assistant walked in before saying, "Sir I have news on Francis and Viktor."

"I already saw the news this morning." Sabastian replied curtly.

"Yes sir, however this is something that the news has not reported on yet." The assistant replied.

"Go on."

"Yes sir, apparently Francis was informed that the hooded individual is hunting him and Viktor as well as your agreement with the individual and so they have both fled the country."

"Interesting. Do we know who informed them?" Sabastian asked.

"The Informant sir."

"No real surprise there, after all that guy has informants everywhere. I'm curious to see what the hooded individual will do when he learns of this, however, after all he did make it obvious that consequences would follow anyone who talked."

The assistant was about to reply when he received a message on his phone and after looking at it his eyes widened in shock.

"What is it? Sebastian asked.
