

S.P.E.C.T.O.R 346

Chapter 346: Planet selection complete

[Noobkiller9000 (Earth): Oh, heck yeah, the streamer got chosen.]

[Gunlovergirl (Earth): Come on, choose Earth.]

[Prestigious3horns (Vinox 2): I still doubt that will happen.]

[[Historical data found.]]

[Prestigious3horns (Vinox 2): Huh!]

[Gunlovergirl (Earth): Oh hell yeah, come on choose Earth, plllleeeaaassseeee. 🤔]

[Emojisonly (Earth): 🤔]

[Superior4horns (Vinox 3): Could it actually end up picking Earth?]

[DeverinianLordMalacoss (Deverinian 9): I hope so.]

[[Avalible planets for selection:

Earth (Milky Way Galaxy)

Palaxia (Sandanar Galaxy)

Tillion (Sandanar Galaxy)

Terrana Five (Sandanar Galaxy)

Oceana Seven (Oasis Galaxy)

Fenix Nest (Ashes Galaxy)

Oceana Six (Oasis Galaxy)

Oceana Four (Oasis Galaxy)

Oceana Seven (Oasis Galaxy)

Oceana Eight (Oasis Galaxy)

Felinia Seven (Felidae Galaxy)

Beginning random selection of planets.]]

“Fenix Nest!” Aphrodite said in surprise.

“Oh gods, I was afraid of this,” Lorelie said with a sigh.

“Oh yeah, come on, please be Fenix Nest,” Tephe said excitedly.

“No, Tephe, we don’t want it to be Fenix Nest,” Stacey replied.

“Awwww but why?” Tephe pouted.

“You know why.”

“But people are gonna find out eventually, so why not now?” Tephe whined.

“Because it will bring trouble, Adam doesn’t need at the moment,” Rowena replied.

“Booo,” Tephe said sulkily.

“Seriously, what do you four know that we don’t?” Aphrodite asked with a frown.

“We can’t say,” Rowena replied.

“You can’t say? What do you mean? Why can’t you say?”

“We are all under Universal Senate Decree,” Rowena said in a tone that left no discussion.

“A Universal Senate Decree?” Tessa asked in shock as Aphrodite gaped open-mouthed.

“Yes, so please don’t ask us about it,” Lorelie confirmed with an apologetic smile.

[Gunlovergirl (Earth): OH HELL YEAH.]

[Prestigious3horns (Vinox 2): ... SERIOUSLY?]

[Beinglittleisnotadisadvantage (Strathorp 7): So it seems it counts all the planets the mech's mothership has been to and not just the ones the mech has been to itself.]

[DeverinianLordMalacoss (Deverinian 9): True, but why is Fenix Nest on there?]

[StealthAssassin9 (Earth): Is it possible the streamer went there when he wasn't streaming?]

[DeverinianLordMalacoss (Deverinian 9): Highly unlikely, the longest the streamer has gone without streaming is a few days. The travel time between Sector Seventeen, which the Sandanar, Oasis and Felidae Galaxies are part of and Sector Eight, which the Ashes Galaxy is part of, is well over a week, even using a jumpgate.]

[Whostolemyduck (Earth): What are these sectors you speak of? They have been mentioned in the chat before.]

[DeverinianLordMalacoss (Deverinian 9): The known universe is broken up into sectors to help organise it better. Each sector has numerous galaxies within it.]

[StealthAssassin9 (Earth): Why?]

[DeverinianLordMalacoss (Deverinian 9): Why what?]

[StealthAssassin9 (Earth): Why break the universe up into sectors? How does it make it easier to organise?]

[Gunlovergirl (Earth): You're seriously asking that? Have you never heard of compartmentalisation?]

[StealthAssassin9 (Earth): Compart what?]

[DeverinianLordMalacoss (Deverinian 9): The universe is split into several sectors so that it's easier to organise and manage. Can you imagine the hassle one department would have if it had to organise every galaxy in the universe and those planets within them?

This way, every sector has a department at the Universal Senate that oversees it so that no one is overworked, and any issues can be dealt with swiftly.]

[NonpareilRaphilia (Aaru): Can we get back to the point where the streamer has somehow visited the Phoenix homeworld?]

[Phoenixempress (Fenix Nest): 🐱]

[NonpareilRaphilia (Aaru): Spill it, Revi, what do you know? You have been teasing us this entire stream.]

[Phoenixempress (Fenix Nest): 🐱]

[[Beginning random selection of planet from available list.]]

[Noobkiller9000 (Earth): Here we go, here we go.]

[Gunlovergirl (Earth): Come on, Earth, please be Earth.]

[Prestigious3horns (Vinox 2): Fenix Nest, let's go Fenix Nest.]

[Superior4horns (Vinox 3): Why Fenix Nest?]

[Prestigious3horns (Vinox 2): Can you imagine if it chooses Fenix Nest, then the landscape turns out to be the Siege of Fenix Nest?]

[Superior4horns (Vinox 3): Ohhhhh, that's good.]

[Phoenixempress (Fenix Nest): ...]

[Prestigious3horns (Vinox 2): Riiggghhhtttt, imagine having three Black Knights partaking in the siege of Fenix Nest.]

[Whostolemyduck (Earth): Can it even generate a landscape like that?]

[[Planet selection complete]]

[[Chosen Planet: Earth (Milky Way Galaxy)]]

[Gunlovergirl (Earth): OH HELL YEAH!]

[DeverinianLordMalacoss (Deverinian 9): Very good.]

[Prestigious3horns (Vinox 2): Aww man. 😞]

[NonpareilRaphilia (Aaru): So we get to see what the streamers' homeworld is like.]

[Phoenixempress (Fenix Nest): I'm both happy and disappointed.]

[... Earth? Where the fuck is Earth?]

[... Where the fuck is the Milky Way Galaxy?]

[... Why are they choosing the planet from that shitty replica instead of Prime's superior one?]

[... Because Prime already had a chance and blew it.]

[Moderator has banned user ...]

“Ohhhh, they choose Adam’s homeworld, that’s still cool,” Tephe said happily.]

“Oh, thank the Preoriginator, that stressed me out for a moment,” Rowena said as she breathed a sigh of relief.

“Though I’m curious as to what you all are hiding about Fenix Nest, I’m interested to see what Adam’s homeworld is like,” Aphrodite stated.

“We didn’t get to see much of his homeworld back when he first started streaming. I hope we see something new,” Becky added.

[[Beginning random selection of landscape from Earth (Milky Way Galaxy)]]

[[Selection complete]]

[[Chosen landscape: New York City.]]

[Noobkiller9000 (Earth): NYC Baby.]

[AlamoMatador4thewin (Earth): The Big Apple.]

[Celebrityhunter69 (Earth): The City that never sleeps.]

[Gunlovergirl (Earth): The City of Dreams.]

[CEOHopkins (Earth): Empire City.]

[Superhearofangirl (Earth): Gotham.]

[StealthAssassin9 (Earth): Gotham? WTF? Some superhero fan you are if you think Gotham and New York are the same.]

[Whostolemyduck (Earth): Actually, Superhearofangirl is correct. Author Washington nicknamed New York City, Gotham, in the early 1800s, before it became popularised by the Batman comics.]

[Superhearofangirl (Earth): Ugh, huh, screw you dickhead.]

[StealthAssassin9 (Earth): ...]

[Superhearofangirl (Earth): Yeah, that's right, shut your fucking mouth, shrival dick.]

[Gunlovergrrl (Earth): Damn. 🤔]

[Emojisonly (Earth): 🤔]

[Celebrityhunter69 (Earth): You're go girl. 🖤]

[Superhearofangirl (Earth): The dickhead had dared to question my knowledge when it came to superheroes, and of all superheroes, the OG, the Dark Knight, Batman.]

[Handsome3horns (Vinox 2): WTF are they on about?]

[Superior4horns (Vinox 3): What are all those names?]

[Whostolemyduck (Earth): They are all different names given to New Your City.]

“Well, viewers, it seems the selection is complete...” Honcho began saying just as another notification appeared.

[[Match type selection beginning.]]

“You never said anything about a match type select,” Raella said as she saw the notification

“It never said anything about this in the information,” Honcho said in confusion.

“To be fair, all it said was that they would have to compete in a battle-type match,” Dulaebella added.

[[Match type selection complete.]]

[[Match Type selected: City Defense.]]

[[Participants standby for briefing.]]

“Ohhh, and the sphere’s main computer has selected a city defence match type for the next stage of the match viewers,” Honcho announced.

“This should be interesting as it will be in a city we have never heard of before,” Dulaebella said in excitement.

[AlamoMatador4thewin (Earth): City Defence? You think that's like Tower Defence?”

[Noobkiller9000 (Earth): Probably, though on a city scale.]

[Beinglittleisnotadisadvantage (Strathorp 7): City Defence matches are pretty common in the UMB Cup. Generally, they work by a points system, the more enemies you kill, the more points you get, and the winner is the one with the most points.]

[AlamoMatador4thewin (Earth): Sounds pretty simple.]

As everyone was discussing City Defence being chosen as the map type, the feed that was showing the four mechs floating near each other suddenly started to change as the previously grey walls of the sphere started to fade away, and scenery started to quickly form around them until the four of them floated in the sky while looking down on the bustling city of New York. Skyscrapers reached to the sky while grid-locked traffic filled the roads

[SciFifanboy (Earth): That's so Sci-Fi. It looks so realistic.]

[HackerSu (Trillion): That's New York City on Earth? It's so..... Primitive.]

[MertheadAnderson (Palaxia): Tell me about it, their vehicles still have wheels, WTF?]

[OfficialMuriel (Aqua Primus): Talk about a busy city, look at all the pedestrians walking around and the vehicles.]

[Celebrityhunter69 (Earth): That's one of the reasons they call it The City That Never Sleeps, there is always something going on in NYC any time of the day.]

[Phoenixempress (Fenix Nest): Why is there a large rectangular park in the middle of the city?]

[NonpareilRaphilia (Aaru): Why are most of those vehicles with wheels yellow?]

[Lizziethetruepower (Palaxia): What's with the green statue on that little island?]

[DeverinianLordMalacoss (Deverinian 9): Why are almost all the pathways the yellow vehicles with wheels travelling on only straight lines that crisscross and hardly curve?]

[Prestigious3horns (Vinox 2): Why is there the same flag all over the place? The one that's three-quarters red and white stripes except the top left corner, which is white stars on a blue background?]

“Wow, what a strange city,” Tephe remarked as she stared at the holographic screen showing New York from above.

“I see what you mean when you said that Adam comes from a primitive world,” Aphrodite remarked.

“Why does the air look so foul?” Lorelie asked with a frown.

“Global warming,” Rowena remarked before explaining, “From the looks of most of the primitive vehicles they are using, it seems that most of them are still using the combustion engine, while only a few are using alternative power sources.

If we follow examples of other races that were primitive when first discovered, they are probably still using forms of energy generation that damage the atmosphere.”
