

S.P.E.C.T.O.R 378

Chapter 378: HOLY SPACE WHALES BATMAN

[[Initiating Neurolink]]

All of Adams' sensors suddenly faded, and the next thing he saw was the Drot's ship stationed next to the jumpgate through the perspective of Spector Unit 6's eyes.

[[Neurolink operating at nominal levels]]

[[NDS Planetary Annihilation Beam Mode Selected]]

The remaining drones all started to roam around Spector Unit 6 as if protecting it, just as the four shoulder cannons suddenly detached themselves.

[[Forming NDS Cannon]]

The four shoulder cannons detached before combining to create an even larger cannon that reattached itself to Spector Unit 6's shoulder, after which blue energy could be seen moving along Spector Unit 6's body towards the NDS cannon.

[[Energy Transfer to NDS Cannon at nominal levels]]

[[NDS Activation Complete]]

[AlamoMatador4thewin (Earth): Holy fuck, that looks dope.]

[Animefangirl (Earth): OMG, OMG, OMG, OMG.]

[Emojisonly (Earth): 🤩]

[OfficialRowena (Oceana 7): What the hell is this?]

[LadyErkath (Oceana 7): A transforming mech? How is that even possible?]

[Beinglittleisnotadisadvantage (Strathorp 7): I have no idea.]

[DeverinianLordMalacoss (Deverinian 9): Just who he hell created all this tech?]

[Phoenixempress (Fenix Nest): HERE WE GO, HERE WE GO. I never got to watch this live all those years ago because I was fighting on the planet. Now I get to watch it live. 🙄]

“You dare to attack my friend and someone I promised to protect,” Adam said angrily before shouting. “DIE FUCKERS AND MAY YOUR SOULS BE SENT TO HELL.”

The chat watched as a giant beam of blue energy that sparked with lightning erupted from the NDS cannon and flew through space towards the Drot’s ship.

“EVADE, EVADE,” Drot screamed in panic as his ship started to move out of the beam's line of fire.

[OfficialMuriel (Aqua Primus): OMG, it’s just like in the history footage from the battle in orbit of Fenix Nest.]

[DeverinianLordMalacoss (Deverinian 9): Incredible, this is definitely the same attack.]

[SciFifanboy (Earth): That attack is so Sci-Fi.]

[Animefangirl (Earth): That attack is so Anime.]

[RealOtaku (Earth): That attack is just plain awesome.]

[Gunlovergirl (Earth): It's gonna miss. 😊]

As Gunlovergirl had predicted, the planetary annihilation beam barely missed Drot's ship and streaked past it.

"Fuck that was close," Drot said in relief over the comm before adding gleefully, "You missed fucker."

"Don't count on it," Adam replied before he started to turn himself, or more precisely, Spector Unit Six, to the left, which in turn caused the planetary annihilation beam to start turning.

"OH FUCK, GET US OUT OF HERE," Drot yelled angrily before his ship activated its emergency thrust in an attempt to escape the approaching beam.

"I don't think so," Adam said as the planetary annihilation beam continually closed the distance to Drot's ship until finally it impacted it.

Tephe, Maya and everyone watching the stream saw the giant blue planetary annihilation beam impact with the rear of Drot's ship, causing its shields to collapse instantly from the pure power that an energy beam capable of destroying a planet released before the ship itself started to disintegrate.

It wasn't that the ship was being destroyed; it was that it was literally disintegrating. The power in the planetary annihilation beam was so great that it disintegrated everything about Drot's ship that it touched.

Explosions caused by the damage started to erupt all over Drot's ship, and before any of the crew had time to deal with them, the planetary annihilation beam dealt with them instead by disintegrating the section of the ship where the explosions were happening.

"NOOOOOOOOOOOOOOO," Drot screamed in terror as the planetary annihilation beam reached the bridge of the ship where he was located and disintegrated it.

It only took a few seconds for Drot's ship to be utterly disintegrated so that it appeared as if it had never existed in the first place.

[Superior4horns (Vinox 3): He literally disintegrated the ship.]

[Beinglittleisnotadisadvantage (Strathorp 7): That's the raw power contained within a planetary annihilation beam.]

[HackerSu (Trillion): And that fucker is dead. 🗣️]

[StealthAssassin9 (Earth): It was a long time coming, but I'm glad it's done. 🗣️]

[Gunlovergirl (Earth): I hope that bastard suffered.]

[Noobkiller9000 (Earth): Err, the attack's not over.]

[Beinglittleisnotadisadvantage (Strathorp 7): What?]

[CEOHopkins (Earth): He's right, it's heading for that gate thingy.]

[Lizziethetruepower (Palalxia): Does he plan to destroy the jumpgate?]

[DeverinianLordMalacoss (Deverinian 9): Shit, that's not good. If he destroys the jumpgate, any ships capable of Subspace travel either have to wait until a new one is built to travel outside the Felidae Galaxy, or use normal FTL to travel the great distance between galaxies.]

"Don't think I forgot about you and your sneak attacks," Adam said angrily as the planetary annihilation beam continued to sweep towards the jumpgate even after destroying Drot's ship.

"FUCK FUCK FUCK FUCK FUCK," Krumzaxl was heard screaming before everyone saw a dark green mech fly out from behind the jumpgate where it had been hiding as it attempted to flee from the incoming beam.

“Figured you were hiding there,” Adam said as he saw the mech appear.

[Phoenixempress (Fenix Nest): So that bastard was hiding behind the jumpgate.]

[DeverinianLordMalacoss (Deverinian 9): It makes sense, the radiation interferes with sensors, but not line of sight, meaning Krumzaxl had to obscure his mech somehow.]

[OfficialMuriel (Aqua Primus): I don't think the beam is fast enough to catch him. Drot's ship was slow enough, but a mech is far faster.]

[Lizziethetruepower (Palalxia): No 😞 This fucker can't be allowed to escape again.]

“I DON'T THINK SO, BASTARD.” An angry female shouted before a beam of white hot energy flew across space towards the area that Krumzaxl was heading for.

The stream feed switched to show that Tephe had released a powerful Dragon breath attack from her maw.

[Lizziethetruepower (Palalxia): Yeah Tephe, GOOOOOO 🗣️]

[RealOtaku (Earth): A Dragon's breath attack, that's so awesome.]

[AlamoMatador4thewin (Earth): My god, it looks almost as strong as the planetary annihilation beam.]

[Phoenixempress (Fenix Nest): It's not, while older Dragons can indeed destroy planets with their breath attacks, my goddaughter is still too young for that.]

“Shit, fucking dragon,” Krumzaxl cursed before changing course and sending his mech into a dive.

“Drones,” Adam said as he mentally ordered the six remaining drones to stop defending him and dive down to try and get below Krumzaxl’s mech before they started opening fire at him, causing him once again to alter course and fly upwards.

“Those fucking things are a pain in the ass,” Krumzaxl said in anger as he continued to try and escape.

“Shit,” Adam cursed.

[NonpareilRaphilia (Aaru): It looks like they're working together to trap him so he can't escape.]

[Beinglittleisnotadisadvantage (Strathorp 7): Not good, the streamer and White Dragon Tephe can't cover all of Krumzaxl's escape routes.]

[StealthAssassin9 (Earth): The streamer still has 6 drones left, can't he split them up?]

[Beinglittleisnotadisadvantage (Strathorp 7): I'm guessing that three of the drones together wont be enough to force Krumzaxl to alter course, and he would just force his way past them.]

As the chat where discussing the battle and Adam was thinking of the best way to stop Krumzaxl, a large beam of black energy with orange specks appeared and flew through space, covering the area that Krumzaxl was flying towards.

“What!” Krumzaxl exclaimed in surprise as the stream feed switched to show that the large beam of black energy with orange specks was coming out of the Levithen’s mouth.

[AlamoMatador4thewin (Earth): HOLY SPACE WHALES BATMAN, it has a breath attack!]

[RealOtaku (Earth): Two breath attacks, this stream is awesome.👍]

[HackerSu (Trillion): What did you think it was incapable of defending itself?]

[Justiceistruth (Earth): You all said it was a benevolent creature?]

[Lizziethetruepower (Palalxia): Being benevolent and allowing yourself to get killed are two different things. No creature is stupid enough not to defend itself when attacked.]

[StealthAssassin9 (Earth): What about the Scorpo then? Why didn't the Space Whale retaliate?]

[Lizziethetruepower (Palalxia): Probably because the Levithen is still a young one while the Scorpo was an adult, it's like a child trying to beat up an adult.]

[1000yearsofdeath (Earth): It's like stealing candy from a baby. Kekeke.]

[Superior4horns (Vinox 3): Earthlings steal candy from babies? That's fucked up. 😏]

[Whostolemyduck (Earth): It's just a saying, it basically means it's ridiculously easy]

[Superior4horns (Vinox 3): It's still a fucked up saying. 😏]

"Shit shit shit," Krumzaxl cursed as he saw that the four attacks were blocking his escape routes before he turned his mech and charged towards Spector Unit 6.

[StealthAssassin9 (Earth): He's charging? 😏]

[LadyErkath (Deverinian Prime): Well, with the escape routes blocked, he either had the choice to flee directly away from the streamer, which would most likely end up with him being caught by the beam, or charge the streamer.]

"You combined all your cannons and sent your drones to try to block me fucker, so now you can't shoot these down. Die bitch," Krumzaxl cursed before his mech launched a dozen missiles towards Spector Unit 6.

“Fucking idiot,” Adam replied while having Spector Unit 6 open fire on the incoming missiles with its remaining wrist-mounted mini triple repeater as he added in the open channel, “I may have needed my drones and cannons to shoot these down before because of your sneak attack, but this time I have plenty of time to shoot them all down.”
