

## **S.P.E.C.T.O.R 430**

Chapter 430: Forty-One percent

“A flag? Oh, you mean that thing your chat was on about before with how you would meet Aphrodite?” Rowena replied before realising something and saying, “I guess they were right, you did end up meeting Aphrodite.”

“Flags are not to be taken lightly,” Adam remarked.

“Sure, sure,” Rowena replied as she had the hoverbike accelerate even faster, causing Adam to tighten his grip around her waist.

The hoverbike flew along the roads as Rowena followed the navigation laid out on the bike's mapping system and in a few minutes, they arrived at the spaceport and docking bay Gamma Seven Nine, where they found Spector.

And climbed off the hoverbike, followed by Rowena, who used her hands to tidy up her long, blood-red hair while asking, “I hope I didn't go too fast for you.”

“Not at all, are you a fan of going fast?” Adam asked as they began to walk towards Spector.

“Not with everything,” Rowena replied while giving Adam a wink before continuing, “But I do enjoy going fast on hoverbikes and open-top hover cars. I enjoy the way the wind catches against my wings and in my hair, though I didn't have my wings out this time.”

“Sorry for causing you to have to put your wings away,” Adam replied.

“It's fine, you already made up for it.”

“Did I?” Adam replied before asking, “I guess you must love flying then, since you enjoy going fast. I'm surprised I don't see you do it more often.”

"I do love the freedom it gives you and the ability to go as fast as I want without having to worry about hitting any tall buildings."

"Just flying aircraft and ships," Adam replied with a smirk.

"True. But if you go far enough away from a city or spaceport, you generally find far fewer flying objects to get in the way."

"So why haven't I heard about you going flying recently?"

"Because being around you and the others is far more interesting, also, I would have to go alone or with only Tephe since the others can't fly, including Stacey."

"I could always lend them anti-gravity armours, that way everyone can go flying together in the future," Adam suggested.

"That's true," Rowena replied as her eyes brightened.

"Though if Stacey's wings keep growing, I expect she will be able to fly on her own in the future. I guess you will have to teach her how to fly."

"I guess I will," Rowena replied with a happy smile as they entered through Sectors' hatch before she asked, "How is her body doing? What are its percentages now?"

"Sector?" Adam asked.

"When she was last onboard, Stacey Spencer's blood percentages were fifty-nine percent Terran and forty-one percent Brood," Sector responded.

"It increased again, huh?" Rowena remarked before adding, "and that doesn't take into account her feeding on you the other night in the hotel room."

"That ability of Aphrodite's is so broken," Adam remarked.

"Tell me about it," Rowena replied with a smile and was about to reply when Spector suddenly spoke up.

"ALERT ALERT"

"What's going on?" Rowena asked.

"I don't know," Adam replied before asking, "Spector?"

"Unstable reaction detected in the experimental drive," Spector replied.

"Unstable reaction? Explain."

"The dark matter and Scorpo blood are reacting with each other in unexpected ways.

ALERT ALERT

Forceful activation of the experimental drive.

Prepare for a random time jump."

"WHAT! TIME JUMP?" Adam shouted.

"RANDOM?" Rowena yelled.

[[Emergency stream lauch.]]

[Launching stream.]

[[Stream description below:]]

[[Stream Title: Random Time Jump.]]

[[Mission Parameters: Upon returning to Spector with Diva Rowena the dark matter and scorpo blood started reacting in unexpected ways and forcefully activated the experimental drive.]]

[[Missions Goal: Survive the random time jump and find a way back to your own time.]]

[Forever1stCommenter (Earth): First.]

“So do you know how many shows you plan to perform here in the Felidae Galaxy?” Aphrodite asked as she, Lorelie and Eri rode the hoverlimo back to the hotel.

“Not yet. I need to speak with Matriarch Maiya when I get back to the hotel and discuss it,” Lorelie replied before turning to Eri and saying, “I’m going to need your help.”

“Of course,” Eri replied.

Lorelie smiled and was about to reply when both her and Aphrodite's unibands beeped at the same time, causing them to show looks of surprise before they checked their unibands.

After they saw that Adam had once again gone live and the title for the stream, they couldn't help but look at each other with concern in their eyes.

Tessa sat in her cabin on the Imperial Down and stared at Adams' stream before using her uniband to send a message.

[Message sent: Did you know this would happen?]

[Message received from Liluth Solar: I assume you're talking about the title of Adams stream.]

[Message sent: Yes.]

[Message received from Liluth Solar: Of course. I'm sorry I didn't tell you, but you know I can't inform you of everything now.]

[Message sent: I understand that, but are they really going to travel back in time again?]

[Message received from Liluth Solar: They are. This time jump will force Rowena to face one of her greatest regrets.]

[Message sent: Greatest regret?]

[Message received from Liluth Solar: It is something she must face and overcome if she it to join the harem and become our sister.]

[Message sent: Rowena is supposed to join the harem? 😊]

[Message received from Liluth Solar: Why are you so surprised, sister? If the fact that Rowena is to become one of Adam's lovers shocks you, I can't wait to see your future reactions. 🐱]

[Message sent: What? 😳👉]

[Message received from Liluth Solar: 😊]

[Noobkiller9000 (Earth): Another stream already? Heck yeah.]

[DeverinianLordMalacoss (Deverinian 9): What sort of a title is Random Time Jump?]

[Phoenixempress (Fenix Nest): Oh no.]

[OracleRomy (Elysium): Oh dear.]

[Beinglittleisnotadisadvantage (Strathorp 7): The streamer has dark matter? Also, what's this experimental drive?]

[Noobkiller9000 (Earth): Dark matter actually exists?]

[Beinglittleisnotadisadvantage (Strathorp 7): Yes, though it's incredibly difficult to acquire.]

[OfficialLorelie (Felinia 7): Babe, are you and Rowena ok?]

[OrangeeyedStace (Felinia 7): What's going on, babe? Why does the stream title mention a random time jump?]

[StealthAssassin9 (Earth): The girlfriends are here.]

[1000yearsofdeath (Earth): Maybe they were concerned about the streamer having an affair with Diva Rowena. Kekeke.]

[AlamoMatador4thewin (Earth): Why did the streamer suddenly start another stream less than an hour after ending the previous one?]

[Justiceistruth (Earth): Don't complain about it.]

[AlamoMatador4thewin (Earth): I'm not, I just find it strange, don't you?]

[Justiceistruth (Earth): The streamer can be as strange as he wants as long as it's entertaining.]

"Energy levels of experimental drive reaching critical levels," Spector stated before making a shipwide announcement.

[[Initiating automatic activation of condition purple]]

[[Activating condition purple]]

[[Weapons systems offline]]

[[Shields to maximum]]

[[Energy output to maximum]]

[[Redirecting energy output]]

[[All hands brass for Time Jump]]

[Handsome3horns (Vinox 2): Time jump? Seriously?]

[Prestigious3horns (Vinox 2): There's no way. The streamers must be playing a prank on us.]

[Beinglittleisnotadisadvantage (Strathorp 7): I agree since the Dwarfinian science directorate has determined that time travel is impossible.]

[Phoenixempress (Fenix Nest): The Dwarfinian science directorate is about to be proven wrong.]

[Beinglittleisnotadisadvantage (Strathorp 7): Excuse me?]

[DeverinianLordMalacoss (Deverinian 9): Do you know something we don't, Empress Revi?]

[Phoenixempress (Fenix Nest): Just keep watching. You're about to learn for yourself.]

"Random time jump in five seconds."

The stream switched to an external view of Spector, where everyone saw how a purple glow began to emanate from her before arcs of lightning began to strike the walls, floor, and ceiling in the docking bay, leaving scorch marks while destroying miscellaneous objects.

"Four."

[StealthAssassin9 (Earth): That's so cool.]

[SciFifanboy (Earth): No, that's so Sci-fi.]

[RealOtaku (Earth): Who is gonna pay for all that damage?]

"Three."

Outside the docking bay, the same group of workers from before heard explosions coming from inside the docking bay and looked at each other.

The last two times something had happened and they had reported it, they had gotten in trouble for raising the alarm for no reason.

They had learned from their past mistakes and so decided to ignore the commotion and go get a drink.

“Two.”

[Handsome3horns (Vinox 2): Ok, streamer enough with the prank. You're only going to look like an idiot when nothing happens.]

“One.”

[NonpareilRaphilia (Aaru): He's one for taking a prank the entire way it seems.]

“Zero. Initiating time jump.”

As Spector finished speaking, everyone suddenly saw the scenery around Spector change from the damaged docking bay to space as Spector appeared in orbit of what appeared to be a moon.

[All of Chat: ...]

[HackerSu (Trillion): WTF!!!]

[Whostolemyduck (Earth): My thoughts exactly. What the fuck happened? First, the streamer's ship was releasing arcs of electricity everywhere inside its docking bay and the next moment it's in orbit around a moon.]

[Animefangirl (Earth): Was the previous scene pre-recorded and this is now live? Like a stream intro of something?]

[Whostolemyduck (Earth): The streamer has never done intros before. Maybe that was live and this is the pre-recorded content.]

[Animefangirl (Earth): Then what happened to the streamers' ship? Is it damaged? I mean, ships don't normally shoot off electricity like that. Do they?]

[Beinglittleisnotadisadvantage (Strathorp 7): No, they don't]
