

130 Lucas's Capabilities [2]

Every step was as if they were boulders. He had this uncontrolled strength, and as he noticed it, he lowered his strength to an equal level as a normal person. His eyes then fell back on the sect elder. 1

Noticing how the sect elder was getting weak under the pressure, he lowered it as well. Then suddenly, the pressure disappeared, as if a strong storm had suddenly stopped.

Lucas was only silent because his eyes were so cold that when he approached the sect elder, he didn't speak in the first few seconds.

"H-How can I help you?"

The sect elder was flabbergasted that he was unable to control his words. It was a stupid question. It is not appropriate to say, "How can I help you?" if it is obvious that he has to entertain his commands.

"The right word would be "your welcome."

Eccentric would be the word to call it if someone saw Lucas acting like this. But for him, it was as if it was normal since he didn't care about anyone. He only looked at the sect elder to hear what he expected to hear.

"Y-Your welcome, Senior Brother Lucas."

Lucas nodded, then tapped the sect elder's shoulders. They were weak, but Lucas didn't bother asking, as it was obvious he was scared of him.

"I don't eat humans," Lucas said, then suddenly changed the topic. "Call the Sect Leader. I would like to speak with him. I will be waiting inside the personal field."

Then, without waiting for a reply, Lucas left the sect elder and went back to the personal field. He entered and closed the doors.

Meanwhile, the sect elder came running away from the personal field. He needs to find the sect leader as soon as possible. Even without threats, he felt like he needed to comply with it quickly or he'd die.

It was only his instinct that caused him to become oblivious to the plain words Lucas had, and he could not even discern them from reality.

A few pants could be heard as he tried to reinforce himself. He was so panicked that he didn't notice himself wasting his stamina. And so, he dashed with his Qi supporting him to run faster.

As soon as he arrived at the meeting hall, everyone was starting to finish with the meeting,

but the sect leader wasn't there.

This sect elder was only small, and he did not hold much power inside the sect, so he was not part of the meeting. However, because of his power, he sometimes has the luxury of knowing the insights of those who were higher than him.

That is why he knew that other sect elders were mocking Lucas for being not being showy to everyone.

Other sect elders saw him and, as they wondered what he might have had with them, someone asked.

"Junior Brother Bo, what are you doing? Why are you panting?"

Sect elder Bo raised his palm to wait for him and chased his breath first. Then, slowly, he lifted his body to slowly pronounce the words he had kept.

"Lucas... Lucas... I mean... Senior Brother Wei had already left the personal field. I mean, he had finished his seclusion training."

Seclusion training is a common term for training without conversing with the outside world, hence, secluding themselves. But it was only a half-year stint, and considering it as seclusion training, even for him who mocks him, is a little suspicious.

Sect elder Bo is one of those who believes that Lucas backed out and was only hiding inside the sect leader's personal field. And of course, he is one of those who are arrogant as well.

But for them to see that his personality had turned upside down just because Lucas left the field, means something.

"Why are you acting like that?" One sect elder asked.

"You... You don't know what I just saw. The rumors aren't real. That kid is a monster!"

Kid... For them to call him a kid only shows that they don't know that Lucas had revealed he was hundreds of years older than them. What they only know is that Lucas is at least 18 years old because of the test he took before entering the sect.

"Monster? Did he threaten you?" They asked.

Sect elder Bo shook his head and explained himself.

"You don't know him, truly. His mere gaze is a predator, and the pressure around him wasn't coming from his robe, but it was coming from him. If I must say so, it was pure pressure, as if a sea wave was raging at the shore. "

Other sect elders laughed at him just after the

second he explained.

"He was still a kid. Even if he was indeed talented, it is impossible for him to surpass us and call him a pressuring predator. You must have come senile, Sect Elder Bo. Stop with your jokes."

"You are just pranking us, right? Who would believe such an utterly puny joke? Please, strengthen it with real comedic nature and receive enlightenment from the circus."

"You are only wasting our time. If that Lucas really left the sect leader's personal field, I must see him myself and assess if the sect leader's decision was indeed real. I'll take my leave."

"I as well. It is useless to listen to your words, Sect elder Bo."

"Junior Brother, I am sorry to see you in this state."

Sect elder Bo was frozen in his place as he watched them leave with mockery. He isn't concerned with the mockery he has received, but rather with the consequences that will follow if they offend Lucas. Considering the current power of the sect, they can't defeat Lucas.

"W-Wait! I'll come with you!"

"Nine... I am at the Ninth Level of the King Spirit Realm. A truly have fast progress... And also, my Magique Cultivation is already at the Emperor Stage... What happened in my cultivation that I reached that stage so quickly? "

Lucas had his eyes closed, mumbling something just after his cultivation. He was curious about something, but his desire to find an answer faded as the answers came to him effortlessly.

"This cultivation is overpowered. As I absorb my other personalities and erase their singularity, the cultivation rate increases. I must even have drained the personal field so that I had no choice but to absorb the energy below the ground."

Lucas's eyes opened and he ventured around the personal field. As usual, his eyes were still deep and uninterested, but his brain was solemnly focusing on the assessment he was making.

"I had absorbed 10 personalities and unleashed another 8 Mind abilities... However, even with the changes in my personality that I couldn't discern as it is mine, my goal was still the same."

"I wanted to at least create a sect in this Heaven before going to the Upper Heaven. That is why I became a disciple to experience it and learn some methods of how to operate it."

"I had achieved cultivating the limits of this

Heaven, for that reason, I only have ten years to achieve it and it is enough for me. Then, I will, later on, live with other immortals in the Upper Heaven and travel to the Upper Heavens."

"There must be something there... I am sure of it. Even with the different experiences I had in my previous world, I still wanted more. That is definitely the reason why I chose to die... I wanted to take a rest in that world and see the other side."

"Fortunately, I stumbled upon this world, which has different rules and ways of people. Apart from personalities, the people here were uniquely different from my previous world."

"They don't form countries; instead, they form families and reputations to hold land. That is, for sure, no one owns land apart from those who are powerful. That is how invasion in this world is impossible if you only had a brain, unlike in my previous world where some generals don't even have the fighting capabilities."

"I must say that I've become too childish since I arrived here. That "Youthful Mind" has two effects that for heaven's sake I didn't notice."

The "Youthful Mind" was a resetting passive ability to have more energy to get new information. But in his previous world, that Mind ability didn't work, and surprisingly, in this

world, it activated.

And one other effect of that Mind ability is that it can influence the body of the holder. Hence, in his transportation to this world, Lucas's body became younger.

Because of the effects he had from the Youthful Mind, Lucas wasn't able to discern that something was wrong with him as he was focused on the things before him. That definitely explains why the personality he had in his previous world was destroyed in this world.

His mind became unstable, and the reason was his Youthful Mind. But now, he had already fixed it to make it more certain and organized. His Youthful Mind was silently suppressed now since he knew that it would give him problems in the future.

Now, he still has an unstable personality but can act as if he were stable in some instances.

"Wow... I should remove this Mind ability in the future. It is utterly useless to me." Lucas calmly mumbled in his seat.

Minutes later, the door of the personal field opened, which indicated that Lucas had to move now. He had already achieved what he had hoped. Now, he has to focus on what he aims to achieve.
