

Smash All 191

Chapter 191

Now, with Ji Yuande as the center, the scattered circle was basically all the important figures of the current and future military regions.

Are you Jin Ke? Take Damocles to fight hard this year. Ji Yuande specially point out Jin Ke.

This circle of people were all backed by great aristocratic families. Only Jin Ke suddenly emerged from a small star. It was said that he was born in an unknown star before.

On this occasion, the main members of other military academies did not dare to make mistakes. Hearing Ji Yuande point out Jin Ke, all of them smiled politely. As for what they thought, only they knew.

There are too many excellent military students in this year, and every one of them is an important candidate if placed in the past years. Therefore, General Ji Yuande specially pushed the military affairs to catch up twice.

After a short conversation, Ji Chuyu and Ying Xingjue are called away by Ji Yuande.

What happened just now? Ying Chenghe asked Jin Ke.

Just now, everyone was walking this way. Jin Ke suddenly walked back quickly. He turned his head and saw his cousin and Wei San over there.

I dont know. I only saw Ying Xingjue standing in front of Wei San, with his hands raised. Jin Kes eyebrows were cold. You know what it means to raise his hands when commanding.

In addition to setting up barriers, the commander can also destroy the spirit of a low level mecha soldier.

Wei San was no more than A grade, not even S grade. Jin Ke can attack her at will, not to mention Ying Xingjues perception of being above 3S.

But Why should Ying Xingjue deal with Wei San? Shen Tukun didnt understand. They didnt intersect, and the Imperial Military Academy didnt need this method.

Even if they did not want to admit it, the Imperial Military Academy was strong enough that they did not pay attention to anyone.

Wheres Wei San? Go and ask her what she said. Liao Runing turned to find someone, and Huo Xuanshan followed him.

Wei San was competing against her own team on eating, one against four.

You must have a bottomless stomach. Ding Hemei was sure again that no one could eat so much without responding. She was about to finish all the food on the long table.

This dinner banquet is quite good, they can hold it several more times. Wei San felt her half full stomach.

You think too much, such a big dinner banquet can only be held in the imperial capital. Liao Runing stood behind her and said, What did Ying Xingjue say to you just now?

Wei San turned around and saw that they were all coming over. She nodded to Jin Ke: he just called me, but he didnt have time to speak. He suddenly appeared and left.

Ying Xingjue may want to make you stupid. Liao Runing said deeply with his face pulled down.

Wei San didnt understand the complications underneath. Didnt he want to shake hands with me?

Jin Ke: Why would a 3S commander shake hands with an A command soldier?

Wei San put down her plate and hesitated: I obviously saw his mouth form as if to say Hello, and then you suddenly appeared and stepped on me.

Everyone looked at Jin Ke.

Liao Runing: Why did you step on her foot?

Ying Chenghe: My cousin and I only nod to greet each other. He rarely touches people physically.

Im sorry. Jin Ke apologized. I was a little worried just now, but Ying Xingjue has his reasons for doing everything. Its impossible to shake hands with you for no reason.

Maybe he wants to know Wei San? Huo Xuanshan was serious. Boys should want to meet girls without reason.

Forget about that, did he fall for her dark eye circles?

Little fatty, I already have no dark circles under my eyes.

You! Hearing this address, Jin Ke jumped.

What is the title of little fatty? Liao Runing was curious, and the others also looked over.

Wei San was about to share her knowledge with them when Jin Ke covered her mouth.

Several people were fighting with each other. Nie Haoqi, who was standing beside them, was a little surprised: Why do they look like a team? Could it be all because of the freshmen?

Ding Hemei smiled, patted him on the shoulder, and motioned him to see the main teams of other military academies. They were not close at all.

The tacit understanding in fighting does not mean that you can play well and fight together.

In the meeting room, Ji Yuande sat at the top and looked at Ying Xingjue: It seems that there has been some changes in the Huanye Star recently. You have experience and ability, Xingjue. After graduation, you will go to the Fifth Military Region and guard the Huanye Star.

Yes, General.

Chu Yu, after winning the championship in this competition, you can go to the First Military Region with me after a few months of rest. Ji Yuande had a sound in his light brain, and ignored it. The relationship between the First Military Region is complex, so you and I should get familiar with each other first.

Im going to the Fifth Military Region. Ji Chuyu glanced at Ying Xingjue beside him, Ive also attended the battle at Huanye, I have experience. With the two stars of the empire together, we can definitely guard the federation, and not let the star beasts surpass our line.

Chapter 192

Now, with Ji Yuande as the center, the scattered circle was basically all the important figures of the current and future military regions.

Are you Jin Ke? Take Damocles to fight hard this year. Ji Yuande specially point out Jin Ke.

This circle of people were all backed by great aristocratic families. Only Jin Ke suddenly emerged from a small star. It was said that he was born in an unknown star before.

On this occasion, the main members of other military academies did not dare to make mistakes. Hearing Ji Yuande point out Jin Ke, all of them smiled politely. As for what they thought, only they knew.

There are too many excellent military students in this year, and every one of them is an important candidate if placed in the past years. Therefore, General Ji Yuande specially pushed the military affairs to catch up twice.

After a short conversation, Ji Chuyu and Ying Xingjue are called away by Ji Yuande.

What happened just now? Ying Chenghe asked Jin Ke.

Just now, everyone was walking this way. Jin Ke suddenly walked back quickly. He turned his head and saw his cousin and Wei San over there.

I dont know. I only saw Ying Xingjue standing in front of Wei San, with his hands raised. Jin Kes eyebrows were cold. You know what it means to raise his hands when commanding.

In addition to setting up barriers, the commander can also destroy the spirit of a low level mecha soldier.

Wei San was no more than A grade, not even S grade. Jin Ke can attack her at will, not to mention Ying Xingjue's perception of being above 3S.

But Why should Ying Xingjue deal with Wei San? Shen Tukun didn't understand. They didn't intersect, and the Imperial Military Academy didn't need this method.

Even if they did not want to admit it, the Imperial Military Academy was strong enough that they did not pay attention to anyone.

Where's Wei San? Go and ask her what she said. Liao Runing turned to find someone, and Huo Xuanshan followed him.

Wei San was competing against her own team on eating, one against four.

You must have a bottomless stomach. Ding Hemei was sure again that no one could eat so much without responding. She was about to finish all the food on the long table.

This dinner banquet is quite good, they can hold it several more times. Wei San felt her half full stomach.

You think too much, such a big dinner banquet can only be held in the imperial capital. Liao Runing stood behind her and said, What did Ying Xingjue say to you just now?

Wei San turned around and saw that they were all coming over. She nodded to Jin Ke: he just called me, but he didnt have time to speak. He suddenly appeared and left.

Ying Xingjue may want to make you stupid. Liao Runing said deeply with his face pulled down.

Wei San didnt understand the complications underneath. Didnt he want to shake hands with me?

Jin Ke: Why would a 3S commander shake hands with an A command soldier?

Wei San put down her plate and hesitated: I obviously saw his mouth form as if to say Hello, and then you suddenly appeared and stepped on me.

Everyone looked at Jin Ke.

Liao Runing: Why did you step on her foot?

Ying Chenghe: My cousin and I only nod to greet each other. He rarely touches people physically.

Forget about that, did he fall for her dark eye circles?

Little fatty, I already have no dark circles under my eyes.

You! Hearing this address, Jin Ke jumped.

What is the title of little fatty? Liao Runing was curious, and the others also looked over.

Wei San was about to share her knowledge with them when Jin Ke covered her mouth.

Several people were fighting with each other. Nie Haoqi, who was standing beside them, was a little surprised: Why do they look like a team? Could it be all because of the freshmen?

Ding Hemei smiled, patted him on the shoulder, and motioned him to see the main teams of other military academies. They were not close at all.

The tacit understanding in fighting does not mean that you can play well and fight together.

In the meeting room, Ji Yuande sat at the top and looked at Ying Xingjue: It seems that there has been some changes in the Huanye Star recently. You have experience and ability, Xingjue. After graduation, you will go to the Fifth Military Region and guard the Huanye Star.

Yes, General.

Chu Yu, after winning the championship in this competition, you can go to the First Military Region with me after a few months of rest. Ji Yuande had a sound in his light brain, and ignored it. The relationship between the First Military Region is complex, so you and I should get familiar with each other first.

Im going to the Fifth Military Region. Ji Chuyu glanced at Ying Xingjue beside him, Ive also attended the battle at Huanye, I have experience. With the two stars of the empire together, we can definitely guard the federation, and not let the star beasts surpass our line.

Chapter 193

Ji Yuande became serious gradually, and knocked on the table twice with his hands: Ji Chuyu, you are almost an adult. We have three military regions, and it is impossible for you two to stay together. Xingjue helps you guard the Huanye Star in the rear, so you can command other military regions.

Seeing that Ji Chuyu wanted to say something else, he waved his hand: Dont say anymore. Its settled. You guys head out.

As soon as he came out, Ji Chuyu kicked at the wall: What did the general mean? If you go to an important place like the Huanye Star alone?

The general wants you to take over his position. Ying Xingjue said lightly.

Ji Chuyus face did not get better: There are so many people who can sit in his position, and hes not short of one like me. The Huanye Star defense line has been lost all year round, and you and I working together will definitely protect it.

There is no shortage of 3S mecha soldiers.

You mean those people? Ji Chuyu pointed to the direction of the dinner party, and he sneered. Except for the Zongzheng Yues people, they are not worth mentioning.

Its too early compared to graduation. Ying Xingjue decided to look down at his right hand, and now the focus is on the competition.

Speaking of this, Ji Chuyu asked him, Why did you go to Damocles before? Their chief commander turned pale with fear.

Ji Chuyu could not help but sneer at the fact, did they think his Imperial Military Academy was Samuels Military Academy?

Its nothing. Ying Xingjue hung his hand. Its just something I couldnt understand.

Do you even have something you dont understand? Ji Chuyus cold gloom spread, and there was a little juvenile spirit between his eyes and eyebrows.

Liao Runing looked at the invitation in his hand and then looked up at the closed door of the Imperial Capital Underground Factory: Is this foreclosed?

It should not be. Wei San bowed her head and login the forum of the Sadu Star Black Factory. They are very normal on the other front.

Huo Xuanshan turned over the invitation card, pointing to the small letter at the bottom right corner: Here is the contact information.

When Liao Runing heard the words, he called first, said a few words to the person opposite him, and hung up: They said that the Imperial Capital Underground Factory was under repair and has been temporarily closed.

Then we can only go back to Sadu star and join then. Huo Xuanshan put his invitation card away.

Wei San was a little disappointed: I wanted to see the difference between this place and Sadu star.

The three people could only return home by road.

The second competition venue was determined, and the five military academies soon left for Sadu star.

The atmosphere of coming is different from that of going back now. Jie Yuman stood in front of the transparent window of the starship, looking at the outer space channel.

If they win third place, wont those bastards be too happy. Xiang Minghua spoke about this matter, and his heart ached. Forget about the school team. Their main team looked confident all day long, and everyone thought they were sure of the championship, but only wanted to win third place.

Jie Yuman laughed: Last year, we also won third place in the first game. At that time, we were not very happy. The students were very heavy minded. Now

Its weird now, Li Ze added.

Major its time to change the tongue. Jie Yuman turned around, Colonel.

Its just a name. Now Im just one of the team leaders. Li Ze was in a good mood, his friend helped him rebuild a mecha.

How are you getting used to the mecha these days? Xiang Minghua asked.

Im already familiar with it. Li Ze glanced at the students. The second competition venue is on our Sadu Star, so they should be prepared. The desert stars are different from the others. They are ferocious and different from the mountain environment.

The distance between the Capital Star and Sadu Star is far away, and it will take several days to arrive. During this period, all major military academies are training in their own starships.

Wei San stayed in her room and went to the Rubiks Cube Forum to chat with the I have money.

To be more precise, she asked him for information about the S mecha.

Chapter 194

When arriving at Sadu Star, many people took the initiative to pull banners to welcome the students from the Damocles Military Academy back, but because of the military port, they were not allowed to enter, so they had to stand outside the port.

Come on, Damocles!

You are the best!

The five military academies did not go out of the port, but had special aircraft to pick them up. Other military academies were waiting for the aircraft and did not go out. Xiang Minghua took the students of Damocles Military Academy outside for a few steps to greet the people.

In fact, whether winning or losing in previous years, the people of Sadu star will come to meet the students of Damocles Military Academy, and this year is no exception.

As soon as they came out, the people from Sadu star were even more excited.

You will definitely win! Come on!

Damocles Military Academy is the strongest.

Samuel people heard the voice outside and laughed: if the third is the strongest, wouldn't the first go to heaven?

Imperial Academy students who were about to go to heaven nearby could not help looking at Samuel students coldly.

Samuel students immediately became scared:

But the outside voice went bad when it shouted and began to become a fan pk.

Shen Tukun, you attack ah! You don't have to be an old mother anymore!!!

Jin Ke, kill the other military academies!

Ying Chenghe, mother loves you!

Master Liao is the most handsome.

Nonsense! Huo Huo is the most handsome! Huo Huo disturbs my heart!

Xiang Minghua shook his head and signaled that the students could go in after saying their greetings.
Why didnt we find that the people of Sadu star were also like this before lively?

After greeting the students of Damocles Military Academy, they turned around and walked into the port to get ready to board the military aircraft.

At this time, a voice burst out in the crowd: Wei San!!! Keep acting coquettish forever!

Wei San, who had turned around and stepped into the port with half her foot, said, ???

When the crowd looked back, they saw a boy standing in the middle of the crowd, being lifted up, wearing a dress with the image of Wei Sans vertical middle finger, and still shouting, Dont worry San San! I wont watch a competition without you!!

There were also people shouting at the bottom: Coquettish fans will always follow!

Liao Runing held Huo Xuanshan's shoulder and finally couldn't help laughing: Ha ha ha ha ha ha!

Even Li Ze next to him had a smile in his eyes.

You have fans now. Ying Chenghe said to Wei San, but he couldn't help laughing.

Wei San:

Why is everyone acting coquettish, but only she has coquettish fans?

With a complicated face entering the military aircraft, the group immediately completely opened up and laughed.

Congratulations, ha ha ha ha! Jin Ke leaned against her and smiled. Why don't we cooperate with each other to make a profit?

Wei San, who was still full of shock and confusion in her heart, upon hearing this, she immediately accepted the existence of coquettish fans: Me eighty you twenty.

Fine.

The five major military academies also went to the drill field of Sadu Star, not Damocles Military Academy. Compared with the former capital Star, it is much simpler and more plain, with the area of suites reduced, and it has not been renovated for a long time. All the facilities can be used, but it could not be counted as good.

Many other cadets were dissatisfied, but there was no way to start speaking. After all, Damocles cadets themselves live under this condition.

After allocating their rooms, Wei San slipped out and joined Huo Xuanshan and Liao Runing.

They were going to visit the Underground Factory.

Chapter 195

Wei San flipped through the competition prizes of Sadu Stars Underground Factory Forum: What is Xumi Gold?

Huo Xuanshan looked at her light brain and said, It is a first class material, and it needs a lot of perception. It can only be used on the 3S mechas, but not on other levels of mechas.

The material of Sadu Star is already so good, and the material of Capital Star should be better than this. Wei San looked regretful.

En that, I inquired before, the First Military Region seemed to be looking for something in the month of the competition, and the Underground Factory closed the competition field to avoid the dangers. Liao Runing said.

Huo Xuanshan felt that something was wrong: The Underground Factory has a deep influence behind it. It is said that it has a strong relationship with a military region in the capital. It will not be closed for an investigation.

Liao Runing spread out his hand and said, I dont know clearly either.

While everyone was resting, the three people slipped out of the studio and went to Sadu Stars Underground Factory.

Sadu Stars Underground Factory was not affected by the influence of the Capital Star, and was open as usual. The three people took the invitation card and entered the special area. The person in charge of registration took it over and said, If you dont come on the last day of today, the invitation card will expire.

I watched the game at the Capital Star before, but I didnt expect that the Underground Factory there was closed. Wei San explained, and wanted to hear the other sides response.

Capital Star is in the process of renovation and you should be able to go next year. Sadu Star has been competing for a long time. Now you can only match against the best teams. In addition, before the deadline at the end of the month, all the contestants can challenge the division champion and take away the prize if they win. The person in charge of registration explained a little more.

After the three people registered, the ID of the Underground Factory can enter the special random pool for matching.

At the end of the month, we have to finish the match before we can come to play. Wei San wants to see the so-called Xumi Gold. It is one thing whether it can be used or not, but it is worth seeing and feeling.

Then lets come back at the end of the second match. Liao Runing didnt care. Which team did we draw?

[F***** flip the Underground Factory vs Black Dragon Group]

Eh, why are there grade A admission now?

I thought the Black Dragon Group was the last A-grade team.

The two teams are doomed to be eliminated, and I dont know where they have the confidence to participate in the competition.

Dont say that. They all have invitations. If you need to blame you can only blame the stewards on the fourth floor of the basement for their lax guard and giving everyone invitations.

As soon as the three people entered, the audience began to talk, and these audiences were not ordinary people in the past. Most of them were grade A soldiers from different districts.

After such a long time, I still miss the challenge arena in the Underground Factory. Liao Runing turned his wrist and immediately entered the mecha.

Wei San and Huo Xuanshan also entered their mechas in turn. Three mechas entered from the entrance, and Black Dragon Group was already standing on the challenge arena.

I want the mecha in the middle. Wei San spoke first.

No way, I want it too. Liao Runing said to Wei San.

Wei San: You heavy mecha versus heavy mecha, and me medium versus medium, isnt it good? Although she has seen what the 3S class mecha looks like, she still has great interest in some heavy grade A mecha.

No, I think that heavy mecha is too ugly. Liao Runing said, I dont want to compete with the ugly mecha. Its spicy to the eyes.

Wei San: She suspected that Liao Runing was implicating herself.

The two still want to argue. In the next second, Huo Xuanshan will be the first to go straight to the middle mecha.

Holy shit! Liao Runing was shocked again and again by Huo Xuanshan who interfered first.

West Landing is the most coquettish. Wei San spoke and picked the light mecha to deal with. The heavy mecha was finally left to Liao Runing.

You guys! Young Master Liao angrily vented his anger on the opponents mecha.

Wei Sans opponent drove a light mecha, no wings, but only with internal thrust, which is not as light as a mecha.

Wei San tries to catch up with her. When she catches up everytime, the other side can jump out a long distance, as if playing tricks.

Wei San simply stopped chasing, took out her double-chain machete and cut it directly.

The other side dodges two machetes and slows down unconsciously. What Wei San wants is this short time difference to increase the speed of the mecha to the extreme, close the distance between the two and become a melee battle.

At this time, the other side pulled out a light whip with a hook and hit Wei Sans mecha with a crack. The metal mecha was hit by the hook on the light whip, bringing a burst of sparks.

Liao Runing, who was teasing his opponent nearby, heard the sound, looked around, whistled and wished the person luck in his heart.

After the strike, a deep scar was immediately left on Wei Sans mecha.

Chapter 196

She manipulated the mecha and lowers her head to see the damage on her mecha through the window.

At this time, the opponent took the opportunity to swing his whip again and wanted to attack Wei San again.

Wei San raised her hand and tightly grasped her whip, and said, You, today, will, end, here.

The opponent did not care about her threat. She is not the only one who will threaten in the challenge arena.

Wei San held her whip, and did not care about the damage to her mechas palm. When she pulled hard, her opponent almost made her stumble. Surprised, she immediately pulled her whip back with a force of 10%. Wei San let her go, and the other side fell back.

Wei Sans double-chain machete has been pinned to her waist. She stepped forward and moved to her opponents face, without weapons. She depended directly on her hands and hit her opponents mecha with punch after punch.

The other side was dazzled by the shock in the mecha cabin, and could not even control his mecha.

Finally, she felt that there was a pause in the movements of Bowing to Life. She just wanted to control the mecha to avoid it, but this person directly held up one of her mecha with both hands.

To be more precise, she lifted it up, raised it over her head, turned it around, and then swung it hard down on the challenge arena.

The challenge arena was shaken twice by the force.

The four other people in the challenge arena:

I feel that she is a lot more irritable. Huo Xuanshan clearly remembers that Wei San hasnt been so manic before. At most, she can make a quick decision.

Its not like you dont know how much Bowing loves this ugly mecha, said Liao Runing, who made a sudden stop and cut off half of his opponents mecha with the epee.

There is only one person left in the Black Dragon Group.

Huo Xuanshan looked at his opponent, spread his broken cloud wings, and used the weapon transformed by Wei San to kill him in seconds.

How can your broken cloud wing function like this? Liao Runing saw it and immediately asked, Which master did you find to modify it? They can even alter broken cloud wings.

The more popular and universal weapons are, the more fixed the parameters are, and it is basically difficult to make any adjustments.

Broken cloud wing is a popular weapon in grade A light mecha.

Wei San helped me find it before. Huo Xuanshan collected the mecha and walked to Wei San with Liao Runing.

She has come out of the mecha, but the mecha has not been retrieved.

There is a crack in the shell of my mecha. Wei San looked up at the chest position of her mecha, such a long scar.

Liao Runing looked back at the Black Dragon Group mech which had been swung on to the ground of the challenge arena and deeply concaved, and finally decided to comfort Wei San: She is too much!

I think so, too. Wei San felt distressed and touched her own mecha's hand. It's broken here too.

Huo Xuanshan clenched his fist and coughed: It's time for us to go back. Teacher Xie is ready to bring us for training.

You two go back first. Wei San retrieved her mecha back into her necklace and returned to normal. I have something to deal with.

What's the matter with you? Liao Runing was curious. Don't forget to bring me a portion of the food.

I'm returning to school to borrow books.

The three walked in two ways. Instead of returning to school immediately, Wei San went to the first floor of the Underground Factory.

Chapter 197

Wei San went to the ground floor, not only to repair her mecha, but also for the materials sent by I have money. She left Sadu star in a hurry last time to go to the competition, and she didn't have time to see the S-grade materials.

I haven't seen you for a long time. The shopkeeper pulled something out for her. Did you go to watch the competition?

Is to attend the competition. Wei San moved the engine to the console.

This is S-grade material, can you use it? the shopkeeper asked her.

Wei San held her hands on the console, looked at the shopkeeper carefully and nodded at the door.

The shopkeeper stepped back and snapped the door, the sound carried a little anger.

This is not the end. The shopkeeper went to the transparent glass and swiped down the curtain.

Wei San: ? When were the curtains installed outside.

She refocused her attention on the S-grade engine. As long as these parts were not used to build the mecha, they would not be damaged just by looking at them.

Compared with the A-grade mecha engine, the S-grade engine is integrated. At first glance, it cant be disassembled. The smooth lines are wrapped with metal inside the parts. Every undulation is appropriate. The surface is more like a work of art.

After studying for a long time, Wei San found that there was really no tool to open the engine and see the structure inside. She sent a message to Ying Chenghe and asked him how to use tools to repair a S-grade engine.

Master Chenghe: [Perception, the perception of the robot division can be used as a tool. As long as the control ability is accurate enough, this ability typically can not be achieved by soldiers or commanders.]

So that's how it is. Wei San looked at the engine on the console and moved her hand slightly.

Master Chenghe: [But it's better for A-grade mechanics to not touch it, even if it's the S-grade parts. Where are you? Why are you asking this question.]

Ying Chenghe in the drill field looked at his light brain and sent a message over. Wei San was a soldier of grade A mechas. It was enough to learn to transform grade A mechas by herself. Skipping a grade would only hurt her.

Begging secretly: [came out to play and suddenly thought about asking.]

Wei San turned off her light brain, looked at the engine on the console, put her hands on the table, and unconsciously lit it.

This feeling is like a hungry man, who has a delicious dish in front of him, but it is sealed by the glass cover and cannot be opened at all.

She wants to see the structure inside.

Shit!

Wei San covers her nose, which was a familiar bad feeling.

She hasn't started to move yet, but she can't even think about it?

She even stopped looking at the engine. Wei San went out with the blood in her nose in one hand. She held it in one hand and went out to find the main paper in the store.

Is your internal fire too big? The shopkeeper drew paper for her, or are you too excited?

Wei San plugged her nose and said, Low perception, thinking of S grade.

She handed the engine to the shopkeeper for safekeeping: Put it here first.

The shopkeeper only reflected on the meaning of that sentence for a long time after she walked away. He looked puzzled and said, Do you want to forcibly open the S-grade engine?

After Wei San came out of the Underground Factor, she went to Damocles Military Academy. The physical objects could not be removed or touched, but she could always study books.

School has already started, and Wei San was recognized by other students when she entered. She greeted people all along the way and finally came to the place where the books of Yu Qingfei were collected.

She picked a dozen books from the bookshelf and stuffed them all into her bag. Then Wei San rushed to the drill field.

Sadu stars environment is dry, and many places around it are close to the boundless desert. The drill field is set up near the desert. There are frequent sandstorms, which have a great impact on the vision and performance of the mechas. At present, apart from the physical training of individual soldiers, the mecha engineers are also modifying their own teams mechas day and night.

Chapter 198

The dust cover is missing. The team of mecha engineers squatted in the transformation room worried.

How many people dont have dust covers in their hands now? asked Wei San.

After the resources obtained in the last match were exchanged for the materials of the main team, the school team only got two thirds, and there was still one third of the team left.

The dust cover is designed to prevent dust and sand. It is installed at the joints of the mecha, especially at the knees. Otherwise, in the desert environment, with the action of the mecha, the gravel will penetrate into the mecha, which is very easy to cause damage, and can seriously interfere with all subsequent operations of the mecha.

We have the least amount of dust covers in our hands. The commander and the mecha engineers can ignore their mechas, but the soldiers must have this component. The commander sighed, It is difficult to surpass the advantages accumulated by the four major military academies in previous years.

The mecha engineers and the commanders mecha have considered various extreme environments in the initial design. For the convenience of combat, many things cannot be stacked on the mecha, so the mecha engineer needs to adjust according to the combat environment.

Wei San looked at her teams mecha and thought, then we can only rob.

Robbing again? The engineers were surprised. Were they really going to snatch all the way?

Wei San went out to get three sets of dust covers and threw them to the mechanic: Try it out and see how long it takes you to finish installing these.

After that, she raised her hand and began to calculate.

The mechanic was stunned and immediately took the dust cover and began to work.

In the transformation room, there was only the sound of the mechanic clicking to install the dust cover, and everyone in the team was watching him.

Do, done. The engineer wiped his sweat.

16 minutes and 32 seconds, its too long. Wei San pointed to the mecha. Now remove it.

She began to count again.

The engineer didnt even breathe. He immediately climbed onto the mecha and began to remove the dust cover.

That was 13 minutes and 09 seconds, Wei San sighed. What do you usually learn at school?

Engineer: The average time for loading and unloading three sets of dust covers is less than 10 minutes each. My speed is the fastest of the school team.

Being able to form a team with the school team chief, the mecha engineer is undoubtedly the best one in grade A.

Wei San stretched out two fingers: The total unloading time of the three sets should be reduced to 20 minutes.

Impossible, we can shorten the time to 25 minutes at most these days. The engineer looked at Wei San and felt like she was a layman directing blindly.

Wei San wagged a finger and shook her forefinger: If I, a layman can load and unload it in less than 20 minutes, then you definitely can.

As soon as the engineer wanted to tell her she was speaking nonsense, he saw that Wei San stooped to pick up the three sets of dust covers, jumped on the mecha and began to work.

Loading and unloading Wei San jumped off the last mecha and looked down at the timepiece: en, ten minutes.

The other four members of the team: ??

The engineer was dumbfounded. He ran to see the data panel that was just connected to the mechanic. The parameters were completely correct and there was no error.

You, how did you do it?

Wei San is very innocent: I learned it when I saw you just now.

The mecha engineers head is going to explode: Its impossible. You are a mecha soldier

Just now you said that it is impossible to load and unload in 20 minutes. I did it. There is nothing impossible. Wei San came forward and patted him. Just 20 minutes, and then we will run after we finish loading.

Engineer: I can also install it in ten minutes. Dont let a soldier trample the dignity of the engineering division into the ground!

From that day on, the mecha engineers of Damocle school team began to practice hand speed in succession. Once someone said it was impossible, the engineer division began to take out the data of Wei San.

Someone in our school team can do this, why cant you?

Engineers are all single-celled creatures. They have only mechas in their minds. They are so excited that they are determined to take more than ten minutes.

The engineer division is working hard, and the soldiers are not lagging behind. In addition to the necessary simulation module combat cooperation, they are working hard to train their physical fitness.

Left, right, right, left Ding Hemei held two baffles in her hands, and Wei San attacked in a small area with a fist.

After a while, Ding Hemei couldnt hold on: time to change, junior brother Nie, you come here.

Nie Haoqi picked up the baffle with a heavy heart. Wei Sans hand was too strong. Every time she beat him, his two arms were numb.

You guys cant. Wei San fought for a while and saw that Nie Haoqi could not hold on. She shook her head and gave up and went to the sandbag.

With a fist, the sandbag suddenly burst.

Wei San:

Did you take the Powerful Pill? Ding Hemei roast. Keep your strength down.

Forget it, Ill run fast. Wei San took off her gloves and changed places.

Tired of running in the training room, Wei San put on her coat and went out to take a walk outside.

Maybe it was that the location of the competition was on her schools star, but she felt a rare moment of nervousness.

Chapter 199

Wei San ran slowly along the edge of the drill field and saw the media coming from a distance. After counting the days, she found that it was time for the media to visit and interview.

Does Samuel have anything to say about what happened in the last match?

There is nothing to say, its just a certain military academy. Some people should be careful. We will not let you go this time. Xiao Eli said coldly.

What is Xi Wutongs plan for the Sadu star competition? Can you mention it a little?

Xi Wutong glanced over Wei San in the distance and said with a bad breath, Samuel Military Academy wont let the same person step on their head twice. After entering the field, the chief of the school team will die first.

Im sure it will leave a very deep mark if she is the first one out in her home game. Gao Xuelin took the microphone and added lightly.

Wei San watched the group of Samuel students speak, turned around and walked away, one by one, they could all pretend better than she could.

The main focus of the media is on the main players of the five military academies, and the interviews in recent days also focus on the training of the main players. However, Wei San was cued by Samuel, and the media will not let it go.

Hence, theyre going to go to see Wei San after interviewing the main members of the five military academies.

The military academies in previous seasons generally only accept media interviews, and the mainstream media is only Sequoia. However, due to a matter some time ago, after Jin Ke and Ying Chenghe sued Sequoia Media in the Peoples Court and the Military Court respectively, Sequoia Medias share price plummeted and its influence declined.

Because there are too many students in the military academy at the 3S grade, the major medias have joined forces with the military academy to plan a program. The live broadcast of the training video of each contestant before each match can not only satisfy the curiosity of the audience, but also let everyone know the hard work of military students.

A large part of the reason why the military academies agreed was also that they want to see other military academies daily trainings.

They selected several media channels. Sequoia is online because of its companys ability and equipment. After discussion, the military academy still let them in, and the rest are Lanfa and other top media.

Ladies and gentlemen, we are currently at the Imperial Military Academy training ground, which is said to be different from the Imperial Star training ground and can be divided into five training grounds. The reporter stepped back, motioned to the camera to follow, and then turned around, Uh

The Imperial Military Academy is carrying out physical training. Three soldiers are wearing short-sleeved trousers, both hands are wearing black gloves, and a pair of black leather boots are on their feet. Their back is obviously wet with sweat. As the soldier moves, their muscle movements are reflected.

[F*** f*** f***! I like this scenery!!!]

[Full screen of hormones, big long legs, love, love it, I declare that I am an Imperial fan!]

[Lets hurry up! I want to see the Imperial Twin Stars!!!]

Engineer Gongyi was not there, but Ying Xingjue sat on the side, holding a notebook and pen in his hand, and lowering his head to record something.

When the three soldiers heard the voice of the reporter coming in, they all stopped. Situ Jia came up to cover the camera and said, What are you doing? This is the military training ground.

The camera was covered and it was dark. In the live broadcast room, the audience could only hear the voice of conversation.

[ao ao, the second Situ Jia approached, I suddenly became alright, handsome!]

[His perception is so high, its hard to have ugly people.]

We signed an agreement with the five major military academies to do a live broadcast program, which is within our license. The reporter is not much calmer than the audience in the live broadcast room, especially facing the soldiers in the training of 3S mechas.

Situ Jia accepted her permit, looked down and threw it at Ji Chuyu.

Let her take pictures. Ji Chuyu threw the permit back after reading it. Keep quiet and dont disturb our training.

I know, I know. The reporter collected the permit and pointed the camera at the three mecha-armed soldiers.

It wasnt that she didnt want to shoot Ying Xingjue who was sitting next to her, but just now the camera moved over and he looked up. At that moment, the reporter couldnt say anything clearly. In short, she dared not point the camera at him.

In the live broadcast room.

[was that Ying Xingjue, one of Imperials twin stars just now?]

[He looked up, and my heart seemed to stop.]

[Although, can I say that he is too good-looking? He can conquer the whole Federation just by his beauty.]

[Alas, I cant imagine who he will be with in the future.]

[The only son of Ying Family's leader, the 3S commander, became famous at a young age. He did what many commanders could not do in the Battle of Huanye. It seems that the Federation can't find a girl who can match him.]

Three mecha soldiers from the Imperial Military Academy continued to train. Situ Jia, with a bit of flaunting, entered the mecha and fought with Huo Jian next to him.

The two mechas roared in the training ground. Each move was full of murderous air. The move was deadly, but it was always resolved by the other side.

The people in the broadcast were stunned.

Chapter 200

If the mecha up against a star beast has a tragic aesthetic feeling, then mecha against mecha can always excite people. The collision between metal and metal is like a close fight between people. Each collision can produce sparks and attract attention.

While the media broadcast the Imperial Military Academy, Wei San was training with the team.

The day before yesterday, the main members of Samuel Military Academy said they wanted to deal with you. Ding Hemei sat down heavily sweating. Did you read the news?

No. Wei San sat cross-legged on the ground, leaning back on the bench, but I saw it in the field interview that day.

Ding Hemei looked up and drank a bottle of water, wiped her sweat and said, If you ask me, they are too cheap, the main members of their school and you, the chief of the school team, are competing.

Why did it drop the price when they were dealing with her?

Wei San turned to look at Ding Hemei: I suspect you have other intentions for me.

No, its your illusion. Ding Hemei bent down and reached out and flipped the book on her lap, What are you doing? One day, youre happy and the next day youre dispirited, now what are you looking at mecha engineering books?

Today, Wei San didnt want to train. She took a book and sat in the training room to read it. She also didnt deny that: tired, take a day off.

Nie Haoqi came over and said, Wei San, did you learn how to load and unload the dust cover from a book?

Im a military student who is a double major. Wei San said lazily.

After reading Yu Qingfeis book, you can practice both military and mecha engineering skills? Ding Hemei shook her head, Its not senior sister who is attacking you. The name of this kind of instant book is deceptive. Maybe it is in the name of a master but cheats money.

Ding Hemei and Nie Haoqi rested for a while, then went to the simulation cabin for training, and let Wei San to find them after adjusting.

Go in the afternoon. Wei San didnt have much energy today and didnt want to train.

So you need to raise your pain grade to 90% during training?

Jin Ke nodded and explained: 3S mecha soldiers are different from other grades. This grade just allows them to achieve more realistic combat effects, and will not cause damage to perception.

Next to him, Chenghe is recording data. His fingertips are constantly moving on the optical brain, constantly adjusting the data of the virtual machine to find the best balance point.

The audience in the live broadcast room watched their orderly progress, and the bullet screen kept flashing.

[The main players of Damocles Military Academy look very serious at this time. Why do they always feel cheap when playing?]

[Ha ha ha, I like this Damocles military cadet. He used to be too serious and looked depressed.]

[Its strange not to be depressed. Almost fell out of the ranking of the five military academies, and the military regions will be separated by others.]

[Speaking of this, South Percy watched Samuel and Damocles fight in the competition at the beginning that season, and won the third place overall, so as to stabilize their current position.]

[The twelve and thirteen military regions are divided behind several military academies, and you can get a little bit of oil and water by handling them. Its good for South Percy not to fall into trouble, to still help? Do you think the nine and ten military regions dont want to obtain a share?]

[I saw the live broadcast of that year, and no one expected that the students at Damocles Military Academy would be so cruel. To be honest, without that student, it is not certain that Damocles Military Academy can participate in the competition again.]

[I admire them very much. I hope Damocles Military Academy can go further this year.]

The camera in charge of the live broadcast of Damocles Military Academy kept changing. The reporter said that at the request of the public, he would go to see how the chief of the school team trained, especially after the harsh words from the main members of Samuel Military Academy.

The reporter came out of the training room of the main players and walked all the way to the training area of the school team. The camera accidentally skimmed through the test machine of the main members of South Percy in the drill field.

[Is that mecha Qing Xiu?]

[correct, the mecha of the swimming fish series can play a 3S grade attack effect with the combination of Yamamiya Namiha and Yamamiya Isao.]

In the drill field, Qing Xiu holds a green whip. Each whip thrown on the obstacle will cause great damage.

[If this happens to a mecha the mechas above S grade are terrible.]

[I suddenly wanted to watch the game. I found that the desert field may be more intense than the hill field. They didnt seem to show much strength in the first game.]

[The first scene is all a trial, of course, we cant go all out.]

Ladies and gentlemen, we have now arrived at the school team area. In front of us is the training room of the Damocles school team. The reporter looked down at the optical brain. We have asked in advance where the training room of Wei San is. Now lets go and have a look.

The audience in the live broadcast room was in a good mood as soon as they heard.
