

Smash All 211

Chapter 211

Ambush the Damocles school team? Tai Wude asked his teams commander.

Thats correct, the chief commander asked you to eliminate the chief of Damocles team. If you have any other situation, report it to him in a timely manner.

Tai Wude felt his forehead and said, How can he suddenly want to deal with Damocles school team?

He had just heard that two school team chief soldiers were wiped out, and at least one of them was at the hands of Wei San.

Tai Wude was a little flustered.

The scene last time of Samuel being swung to the ground in the last match was too familiar to him. At Star 3212, once Wei San got bored and didnt want to continue to move, she would directly attack the person with violence.

And he is the man who was beaten by Wei San from childhood. The experience of Wei San robbing others were all derived from his experiments.

The main commander didnt say why. The teams commander drew a simple map. This is the road map given by the main commander, marking the direction that the Damocles school team might go.

The chief commander only said to eliminate the chief of Damocles school team out? It's better to add another South Percy chief. The other soldier of the team said proudly.

The Imperial Military Academy has a strict hierarchy. The school team must obey the order of the main team unconditionally. Tai Wude took a deep breath: Everyone stop, let's go in another direction.

Wei San, who was watched by the Imperial Military Academy, didn't know anything about it. The school team had basically all put on the dust cover, and the marching speed was much faster.

Jin Ke and his team took a step first to find the high-level star beasts. Wei San and her school team followed closely, harvesting a small range of star beasts along the way.

All of us stay in place, rest for four hours, and take turns on duty. After dark, in a shady place behind the desert, Wei San signaled the school team to stop.

Everyone started to set up tents in place, which are necessary resources in the war readiness package. The desert temperature is too low at night, and tents are essential.

Ding Hemei went out to keep watch. There were only four people left in the team. Wei San was the first to lie in the tent without any sense of leadership.

The rest of the team sat outside and were not in the mood to sleep. The desert has always been dangerous. The desert at night is not much safer, but more vulnerable to star-borne attacks.

The sand wolf likes to attack people in the middle of the night, so pay attention to patrol later, and don't take it lightly. The team's commander told Nie Haoqi.

Nie Haoqi nodded and said that he understood. He looked at the tent and said, Wei San doesn't seem to be in good condition.

The team's commander yawned: She may not be used to the desert environment.

He is a native of Sadu star, and different from those who come to school for retraining, he is very adaptable to the desert environment.

When training, it doesn't seem like this. Nie Haoqi still felt that Wei San was strange. He got up and walked to the tent, and pulled up the curtain to go in.

Wei San lies in the middle, looking at the top of the tent with her eyes open.

Are you all right? Nie Haoqi thought she was asleep before he came in, the result was that she laid down and had her eyes opened.

Wei San raised her forefinger to his lips and said, Shh

Nie Haoqi squatted in the tent with his other foot outside. He immediately shut up and quieted down.

Wei Sans eyes were scattered. She originally wanted to come in to rest, but she listened to the voices coming from around.

The voices of the members of the school team, the sound of the mechas patrolling and moving in the peripheral, and the sound of the wind and sand blowing she could hear them all clearly.

No, there are other voices.

The sound of stepping on the sand in the distance and hissing in the deep underground.

Wei San suddenly got up and turned to Nie Haoqi and said, Go out and let everyone prepare to enter their mechas.

Chapter 212

Nie Haoqi immediately turned around and went out to inform the teams commander. The teams commander and the other commanders perceptions were always linked. Within seconds, the school team received the order to guard.

Someone tried to retrieve their tent, but was stopped by Wei San: enter the mecha first, its too late.

The members of the inner circle of the school team had just entered the mecha, and those patrolling outside suddenly warned that a large number of sand wolves were approaching.

At the moment, people also discovered something emerging from the ground.

Its a scorpion! someone shouted.

Everyone on the Damocles school team looked solemn, unexpectedly they met the sand scorpion and the sand wolf.

The desert at night is ten times more cruel than in the daytime. Xi Haotian looked at the Damocles school team on camera, but they were really unlucky.

But the Damocles school team reacted quickly, otherwise it was not only bad luck, they would lose quite a lot of people this time. Yu Tianhe looked at them and sweated for them. As long as it was two seconds later, the underground sand scorpion could destroy most of the school team members.

The scorpions like yin energy, and the head of their school team should understand the possibility of placing the garrison on top of the scorpions. Ying Yuerong happened to come to take over the two classes, and stood on the stage watching the Damocles school team on the live camera. The decision they made is to accept the result.

That said, but there are few such coincidences. Yu Tianhe got up and gave her the seat of the chief commentator.

The two kinds of star beasts came suddenly, especially the sand scorpions, which were the closest. They were underground. The mecha soldiers in the inner circle began to kill these scorpions, and the mecha soldiers in the outer circle also could not spare their hands, and directly met the incoming sand wolves headon.

Hiss

The sand scorpions tail is high in the air, and it constantly sends out the sound of warning and attacks.

Wei San controlled Blood Drop, held the lightsaber, rose up in the air, stepped down on the head of the sand scorpion, and when the tail attacked, the light saber directly cut off its tail.

The spiky tail needle fell on the yellow sand, and the poison that originally dripped out was scattered on the sand, which could instantly rot the sand.

With a lightsaber, Wei San cut the sand scorpion into several pieces with a few moves, and then turned around to cut other sand scorpions. Nearing the end, it was one cut one sand scorpion, completely like a non-stop machine.

The movements of the mecha soldiers in the interior slowed down unconsciously, and the whole interior was like a solo stage of Wei San.

I still think there is something wrong. Nie Haoqi said to the teams commander. When would Wei San usually do this? She likes to fight slowly, will fight slowly when she can, but sometimes she breaks out after dragging out the fight.

Its never like this. The whole person with the mecha is full of irritability.

This place can be left for me, help the people who are patrolling outside. Wei San turned her head towards those in the inner circle, and her voice transmitted through the mecha, with a distorted mute.

Ok.

The mecha soldiers patrolling the periphery were fighting very hard, and there were too many sand wolves.

The role of the commanders now comes into play, and all the commanders perceive that the connection has started, which is virtually like starting a big network to connect all the mecha soldiers in the network.

At this moment, the attack of each mecha soldier has an unspeakable and wonderful rhythm. It seems that these soldiers are one. Everyone on the invisible internet will know every move.

Aooo

A sand wolf was killed, and there was no superfluous emotion among the mecha soldiers of the Damocles school team. The only idea is to move.

However, Wei San in the inner circle is still outputting crazily, the sand scorpions was killed by her alone and even began to return to the ground. Wei San doesn't know her own state. She just wants to vent her anger. She even regrets when she killed the last sand scorpion who didn't return to the ground in time.

Was this all?

Although the live broadcast and the live broadcast room have noticed the state of Wei San, at the same time, other soldiers in the vicinity have also fallen into an integrated state, and no one has noticed the abnormality of Wei San.

Chapter 213

The night was thick, and the ice and cold wind blew the fine yellow sand, which was wrapped in a thick smell of blood, floating in the rough air.

All the sand scorpions returned to the ground, and the sand wolves were all killed by the school team. The mecha soldiers of Damocles school team stopped the action in a unified manner. Suddenly, a sudden quiet atmosphere was thrown around. With the passage of time, the wonderful rhythm gradually dissipated.

Wei San stood in the inner circle, and she woke up the fastest. Maybe she was not connected with the school team from the beginning, but drifted away, but other members of the school team did not discover it, let alone the people watching through the live camera.

Clean the battlefield and put away all the tents that can be used. Wei San came out of her mecha.

Other members of the school team began to tidy up, when the radio above rang again.

[Damocles Military Academy killed two giant spiders with double S red limbs, and the school team killed 49 sand scorpions and 67 sand wolves. Repeat]

The two light speeds light up at different positions.

The main team finally met the high-level star beast. Ding Hemei looked up at the distant beam of light and said happily.

There is still time. I hope they can find other high-level star beasts again, Nie Haoqi spoke, while handing his mecha to the mecha engineer.

The mecha engineers began to repair the damaged mecha on the spot, and Wei San took the team commander to exchange materials and energy.

In the other direction.

The commander of the Imperial Academy pointed to one of the beams just now: Damocles team should be in that direction, which is one of the possible routes drawn by the main commander. We can catch up now and probably meet them tomorrow afternoon.

Tai Wude sighed in his heart, but still kept the calm and steadiness of the Imperials chief: Take a rest and rectify first, and let's go early tomorrow.

There are only three routes to the end of the desert track. The front military academy goes all the way forward. If the speed is fast, the rear military academy may not reach the end, just like the hill track. However, the military academies in front will not go directly to the finish line. They will try to find as many high-order star beasts as possible to accumulate energy and materials for the rear field while ensuring that they reach the finish line first.

For example, the current Imperial School Team deviated from the route from the beginning in order to cut down more star-killing beasts in exchange for resources.

Just return to the route tomorrow.

41 tents are damaged, and 11 tents can still be repaired, the mecha soldier in charge of statistics reported.

Wei San looked into the mess and said her greetings in advance: We will stay inside for a few days. Not having a tent is not good. If we meet any school team next, we will take advantage and attack first.

The live broadcast room was reminded by the battle bell, and the netizens who woke up to watch: ???

So are all other military school teams mobile storage bags in the view of Damocles?

Without the tent, they crowded to rest separately. It happened that some people were patrolling outside, and the school team members reluctantly rested for a night.

The next day, when it was light, the radio began to ring in the air.

[Imperial Academy kills four double-S black tailed sand wolves.]

[South Percy killed two giant lizards double S class.]

[Pingtong Academy killed two double S golden pythons and two giant sand spiders.]

[Samuel kills three giant sand scorpions, double S.]

Four beams light up from all directions.

Wei San stood up and listened to the radio. She discovered that only Damocles Military Academy was silent.

Lets move. No matter what the main members were, Wei San still needed to carry the school team along.

All the members of the school team set out, walked for a while, and suddenly a beam of light rose in the direction of 10:30.

[Damocles Military Academy killed a 3S giant wolf and a 3S two-headed adder.]

Damocles school team looked up at the beam of light and heard the sound of the radio. After a while, cheers burst out from the team.

Two 3S star beasts! No members out!

Damocles Military Academy was finally lucky.

Chapter 214

The level of the participating students in this session is really good. Xi Haotian looked at Jin Ke and the others on the live camera.

Jin Ke and them ambushed and waited around last night. At that time, the giant spotted wolf and the two-headed adder were fighting for territory. Until three o'clock in the morning, the two-headed adder finally won the victory. The giant spotted wolf dragged away, and Liao Runing went to chase it. Huo Xuanshan and Shen Tukun stayed in charge of the two-headed adder.

Jin Ke stood nearby, and the perception barrier was divided into three parts to protect the three people from being attacked by the spirit of the high level star beast.

Although Huo Xuanshan and Shen Tukun cooperate with each other, the adder has two heads and is extremely aggressive. In addition, it is very difficult to deal with the rapid action in the desert.

Shen Tukun is closer to the lower abdomen of the two-headed adder. The adder has already reacted, and the two heads are going to turn around and attack him. Huo Xuanshan controlled Lanhai to open its wings, and a silver bow appeared in his hand. Each time he pulls the bow, he can shoot eight ice arrows, all of which can be controlled in different directions. Once attacked, with the ice arrow as the center, the arrow made of high concentration ice can be frozen and broken within half a meter.

Disrupted by Huo Xuanshan's ice arrow, the two-headed adder had to turn around to face him, but in the next second, the snake's tail curled up and hit Shen Tukun, who had not yet reached the abdomen.

Jin Ke raised his hands, and his invisible perception overflowed from his palm. His left hand was facing Liao Runing in the distance, and his right palm was facing Huo Xuanshan nearby.

When the two-headed adder's tail swung over, Jin Ke directly transmitted what he saw to Huo Xuanshan and Shen Tukun's brain through perception.

The commander cannot control mecha soldiers of the same level, nor can he control mecha soldiers at the next level who have been trained to sense resistance, but he can transmit what he knows and feels to them, as long as they do not resist.

Shen Tukun quickly bent back and dodged the swept tail of the snake. When his attack power was reduced, he jumped up in the air and cut at the tail of the snake with his sword.

The two-headed adder is suffering from pain. One is still attacking Huo Xuanshan, and the other is directly biting Shen Tukun. The two-headed adder, which originally only accounts for one fifth of the snakes body, suddenly splits and opens to one third.

Several people were surprised that the two-headed adder actually began to morph.

Shen Tukun could not dodge and could only resist, but when he was bitten by the adder, he was hit by the tail of the snake coming from behind, and the back of the mecha was directly dented.

They missed by a bit, their chief commander cant attack the 3S star beast with his perception. Ying Yuerong commented.

Xi Haotian smiled and said, Except for Ying Xingjue of the Imperial Military Academy, there is no other military academy commander at present who can.

This attack ability needs to be constantly acquired in actual combat. The teacher cant teach it and the simulation module cant simulate it.

It is more difficult to learn command than to be a soldier and or an engineer.

Huo Xuanshan held a silver bow and fired eight ice arrows. After leaving the bow string, he shot at the four eyes of the two-headed adder in four directions.

Hiss, hiss

The two-headed adders blood-red forked tongue vomited out and retracted, giving out a warning and a painful sound.

Huo Xuanshan and Shen Tukun launched their mechas and attacked the two-headed viper at the same time, without giving it any reaction time.

At the same time, on the other side, Liao Runing was more direct. The artillery fire attacked the giant wolf from afar. The other side was seriously injured, and he took advantage of it. However, the strength of the wolf once again rose to a higher level due to the stimulation of life and death.

Liao Runing also gradually felt tired.

He drew out his weapon, the three-ring knife.

The back of the blade is inlaid with three rings. Each time the blade is waved, the ring and the blade make a slight impact sound.

It was not the ordinary impact sound. The three-ring saber is mixed with special material: cool sound cicada wings.

Each time the three rings touch the blade, the sound they make can confuse the opponent and make them enter a trance. This effect is effective both against star beasts and mechas.

It is like the spirit attack of the star beast, but the voice of the three-ring knife cannot be shielded by the command perception.

On the weapon ranking list, someone once commented that the three-ring saber is a bug, because the three-ring saber will attack everyone and the star beast indiscriminately when it rings, and only the wielder will be the least affected.

The cool sound cicada wings are rare and can hardly be found on the market, let alone use them as materials to mix into weapons, so the Union only has one three-ring knife.

After taking out the three-ring knife, Liao Runing attacked the giant wolf. It had a second of hesitation, which was enough for him to seriously hurt the wolf.

With a wave of the three-ring knife, the ring touches the blade.

With three rings, Liao Runing cut his blade deeply on the back of the giant wolf.

The giant wolf howled furiously and grabbed Liao Runing with both claws.

Liao Runing dodged and waved the three-ring knife again. The giant wolf was seriously injured, which would aggravate the sense of trance. He definitely won.

Ten minutes later, the giant wolf was killed in the sand by Liao Runing.

After killing two 3S Star Beasts respectively, the mecha of the three mecha soldiers were not lightly damaged. Ying Chenghe immediately began to repair their mecha in the original place. At this time, the mecha materials came into use.

There is a school team ahead. Ding Hemei reported.

Chapter 215

Everyone's spirits were refreshed, and Nie Haoqi took the lead in saying, Let's catch up and ask them to send some tents!

Ding Hemei didn't get too close to scout. They didn't know which military school it was, but the Damocles team didn't care.

Wei San agreed, and the party rushed forward immediately.

The school team ahead was from South Percy Military Academy.

Perhaps it was the deep impression of being attacked secretly on the stage. This time, it was Damocles school team who was discovered for the first time.

The whole school team at South Percy accelerated and ran away.

Qi Qi, a member of the Damocles school team, was stunned. They haven't even met yet.

Wei San had some pity: Are they so timid?

Damocles all sighed with regret.

The audience in the live broadcast room: a group of robbers sighed online.

At this speed, it should only take us two days to reach the destination. Wei San raised her hand to cover the direct sunlight, Do we have enough energy?

The commander of the team said, Enough, but we'd better go with the main team, or wait for someone from other military academies to reach the end of the line and pull the flag.

There must be a high-order star beast near the terminal. The school team rushed to seek death. It must have the main members or other main members of the military academy solving the high-order star beast.

Wei San nodded: We will get food at the supply station at night.

Against the scorching sun and stepping on the yellow sand, the Damocles school team made a quiet and rapid progress, and expected to arrive at the supply station in the evening with food to replenish their strength.

In the middle, the school team of Damocles found two more starbeast herds, fought twice, and their physical strength decreased again.

As the sun gradually sets, the temperature on the desert begins to drop, and the Damocles school team has changed several groups of guards.

Its coming soon. There are still a few miles to go. Ding Hemeis lips are dry and cracked.

The food in the supply station will not be too much. It can only maintain basic physical fitness. The competition is not for fun, but to train them and hope that they can learn from actual combat. At the beginning, there was no supply station in the Hephaestus competition, and everything was set according to the real combat environment, or the real combat environment, without human intervention. However, the casualty rate is too high, which once led to a shortage of recruits in the military region at the time of graduation each year, and then gradually developed to the present level.

Fifteen minutes later, Damocles school team arrived at the supply station, and Wei San went in to get the supply bag.

The two supply packs were all taken away, leaving only three. The second one had the flag of the Imperial Academy, the fourth one had the flag of Damocles, and the fifth one had the flag of Samuel, indicating that the main members of each school had come.

Wei San took the fourth supply bag.

The commander of the team came in and saw the second supply package. He was surprised: Is the Imperial Academy behind Pingtong Academy?

It may also be the main force of South Percy. Wei San handed the supply package to the team commander and asked him to take it out.

Damocles school team began to replenish their physical strength and rest in place.

As soon as Wei San finished drinking a nutrient solution, she turned her head and looked back.

At night, except for the light inside the school team, it is basically dark at a distance.

Wei San got up and signaled to everyone: Come out.

The people in the rear came out slowly. It was the Imperial Military Academy.

The members of the Damocles school team suddenly brightened up, as if they saw the fat sheep coming to their door.

Tai Wude? Wei San stepped on the yellow sand, bowed her head and kicked, looked up and said casually, Are you going to take the supply bag or fight?

Site of live broadcast.

I have been looking forward to these two chief soldiers meeting head on for a long time. Yu Tianhe turned to look at Xi Haotian. Who do you think has the advantage?

I cant say. Xi Haotian stared at the two in the camera. The strength of Wei San is good in the Super A level. With the addition of Blood Drop, there are no opponents in the basic A level. The chief soldier of the Imperial Academy, Tai Tai Wude, is said to have defeated the double-S single soldier who controls the A-level mecha. His strength cant be underestimated.

Yu Tianhe held his face and said, Im not sure. It seems that both of them are from an unknown star. They can have this strength after less than a year of contact with their mecha. Its really amazing.

There seem to be more people from unknown stars in the past two years. Xi Haotian was thoughtful.

Probably because of the continuous development of the federal government, the strength of the unknown stars has also begun to increase.

Tai Wude's hand on the side of his body reflexively moved. He looked at Wei San and said, one to one battle.

One to one battle, you? Wei San simply asked, Tai Wude, you want to die?

Tai Wude: You don't have to be so direct. People all over the network are watching.

Our commander wants you to be eliminated. Tai Wude said proudly, You must be eliminated today!

Hearing the words commander in chief, Wei San raised her eyebrows: Of course, it's fine to fight one on one, but there is a condition.

What condition? Tai Wude felt that Wei San was going to rob, just like on the 3212 star, and asked him to pay tribute in a high-sounding manner!

I win, you give us 41 tents. If you win, then you win.

Someone in the Imperial School Team objected: if we win, you have to leave your resources.

Tai Wude took a deep breath in his heart, and could not wait to turn around and block the mouth of the man who made noise from the Imperial school team.

When they excite Wei San, her combat effectiveness will soar.

In the years of Star 3212, Tai Wude paid countless blood costs to get this truth.

As expected, Wei San said again: Then conditions are changed again. If I win, you guys will die. If you win...wait till next life.

Chapter 216

As soon as Wei San said this, the other people in the Imperial Military Academy laughed. Obviously, they dont know why a mere chief of Damocles dared to say so.

Someone at Imperial Academy spoke quickly, We promise, but we would like to see how you win.

Tai Wude: ... Damn it, he didnt promise!

Wei San raised her eyebrows and looked at Tai Wude. Someone in your military academy has agreed. Do you agree?

Although Tai Wude was afraid, he had to show his momentum as the chief of the Imperial Military Academy, so he said proudly and confidently, Youre on!

The crowd made room for them in the middle, and the two military academies stood around to watch.

Tai Wudes mecha has been replaced with a new one, which is a gray-orange grade A mecha, and his momentum is different from that on star 3212.

Xinchen ranks first in the top A-grade ranking, and Blood Drop ranks second. Wei San cant take advantage of the mecha this time. Yu Tianhe explained the difference between the two on the live broadcast. Xinchen is also the mecha made by the S-grade mecha engineer, but unlike Blood Drop, it is tailored for the super A-grade mecha individual, and is more suitable for the super A-grade individual.

The two mechas stood opposite each other. Wei San first started. She raised her right arm and pointed it at Tai Wudes wrist and knee.

Tai Wude steered the side of the mecha. To outsiders, he seemed to move a little, but he dodged all the bullets.

Wei San in the mecha cabin raised her eyebrows slightly. It seems that he has made a lot of progress at Imperial Academy.

After the two mecha finished shooting bullets and dodged this series of actions, they were close, and everyone could only see the light from the two mechas, and then Wei San and Tai Wude both stepped back.

The two shook their wrists quietly in the mecha cabin, it had become numb.

Tai Wude pulled out his sword and cut at the upper part of Wei San. When he saw her dodge, he controlled the mecha to move forward and kicked his left leg towards her waist.

Wei San raised her knife against the sword he had cut. The other hand blocked and held the leg swept by the mecha. She tilted her head and pulled her hand hard.

Tai Wude was pulled violently and his footwall was unstable. He didnt panic. Instead, he took advantage of the situation and kicked his other foot.

Wei San retracted her knife, bent her knee and knelt down, while bending her upper body parallel to the ground, avoiding his other foot, and with the strength of sliding and kneeling, grasped the foot that Tai Wude had just started, and threw him over herself and onto the ground.

At the moment of Tai Wudes fall, he stood up with one hand on the ground, and turned his head. Wei San also stood up, and the muzzle of the gun was on him, and she fired bullets continuously.

As a last resort, Tai Wude dodged again, which was significantly different from the original leisurely mood.

Tai Wude has always wanted to distance himself from Wei San and didnt want to fight with her in close combat. He had been on star 3212 for so many years, and there was no mecha. They all relied on close combat. He is beaten scared.

Xinchen raised the muzzle on both sides of its shoulder and began to attack Wei San, trying to attack her with dense shells, forcing her not to approach.

However, Wei San is best at this kind of attack. She died so many times in the simulation cabin of Damocles Military Academy. It was not in vain. In addition, with the guidance of Chen Ci, a shooting wizard, Tai Wudes attack was not enough.

Tai Wude didnt miss the shot, but Wei San was getting closer and closer to him.

He resisted his impulse to turn around and run, and decided to face the melee of Wei San.

He was too careless.

Tai Wude has never been afraid of the double-S single soldier who drives the A-grade mecha, but this was Wei San. After so many years of beating, he has formed a conditioned reflex of escape.

Seeing that the shell attack was invalid for her, Tai Wude simply closed the muzzle and gritted his teeth and decided to face up to Wei San.

The arm of Wei Sans mecha was rubbed by the last stray bullet and it created a shallow mark. She turned her head while looking distracted, and Tai Wudes fist was forced over.

She raised her hand and hit him in the stomach with her knee. Tai Wude dodged her attack and stepped down on her shin.

When Wei San was trampled on her leg, she twisted her waist along her shoulder and threw away Tai Wudes foot. At the same time, she bent her left hand into a fist and quickly hit him in the face.

Tai Wude quickly raised his left forearm outward to resist Wei Sans fist, stepped forward, exerted his strength, and at the same time, turned his left hand forward and down, trying to hit her neck.

Wei San in the operation cabin did not retreat and dodge. Instead, she controlled the mecha to move to the side and raised her leg to kick at Tai Wudes heart.

Chapter 217

Tai Wude held her kicking leg with both hands up and down, pulled it hard, and at the same time, extended his foot and kicked the other supporting leg of Wei San down to make her lose her balance.

Wei San hissed. When she lost her balance and fell down, she moved forward, held Tai Wude with both hands, and pulled hard to make him fall down.

The two fought on the ground just like this.

The onlookers said, It seems that it was different from the one-on-one fight they imagined.

There is a little smell of street hooligans fighting.

But when you think about it, there seems to be nothing wrong.

Their mecha ranks first and second respectively in the ranking list, and they are both super A-grade mecha soldiers. Their strength and hardware are not much different. Isn't it also reasonable to have such a hand-to-hand fight?

With your one fist and my one foot, if the mecha has clothes and hair, it will be messy.

Wei San hit him on the arm with a fist, and he kicked her at the waist. Tai Wude was fighting harder and harder. He feels stronger! Wei San was not much, she did not even kill him!

You lost.

Tai Wude suddenly heard a voice in his ear. Before he could refute it, he was hit hard at the engine of his mecha in the next second. Wei San shot a circle at the enclosure of the wrapped engine at close range with the muzzle, and immediately removed his engine.

Tai Wude watched his mecha lose power: ???

It turns out that she didn't kill him in order to dismantle his engine?!

The surrounding of the mecha engine will generally be closely protected, and the mecha will also be subconsciously protected. At the beginning, Tai Wude still remembers that he was confused by Wei Sans punches from the east and west, and his mind was full of only Wei Sans idea of how to defeat her.

As a result, she took the opportunity to dig out his engine!

Wei San took his engine and pulled out the energy from Tai Wudes mecha. She stood up and said, You lost.

His mecha is completely useless, and Tai Wude will be eliminated immediately.

Tai Wude came out of the mecha cabin with no expression. Before leaving, he kicked the mecha of Wei San and raised his middle finger at her: Shameless!

In the mecha cabin, Wei San also held up a middle finger with one hand. They had been fighting for so many years. She was too clear about Tai Wudes problem . It was easy to float when fighting, and he was so forgetful. At this time, it is a waste not to do something wrong.

When Tai Wude was caught on the aircraft by the rescue teacher, he cast a hidden and loving look at his school team. Wei San would never give up the opportunity to take advantage of it. After he left, the Imperial school team would surely be robbed.

It can only be said that a moments pleasantry makes a regret for life! He cant save them.

[The head of the Imperial Academy is eliminated, repeat]

The beam suddenly rose at the supply station, and everyone could see it.

South Percys school team saw the beam of light and heard the sound of the radio. Their faces were not very good.

The chief of Pingtong Academy, the chief of Samuel, and even the chief of the Imperial College are now eliminated from the game.

There is no doubt that the chief soldiers of the first two military academies were killed by Wei San. When they left, they just wanted to avoid being involved in disputes. South Percy temporarily allied with Damocles. If they were present at that time, they would have to stay. They might send out their chief in order to continue cooperation. South Percy did not want to fight against Pingtong Academy.

So it is the best choice to leave early and stay away from disputes.

Now, all the main teams are in front, and a beam of light comes from the supply station. It is obvious that the Imperial School Team was also eliminated in the hands of Damocles.

Fortunately, we walked fast. Someone from South Percy sighed.

At the supply station, Tai Wude was taken out by the rescuers.

The Imperial School Team finally came back and was ready to pack up and leave.

Wei San, who had not yet come out of the mecha, pulled out her light knife and stood in their way: It was agreed before the game, I won, you are definitely dead.

A member of the Imperial School Team stood up and said, Dont bully others too much, our Imperial

Wei San directly cut his mecha and slowly added: Your Imperial is garbage.

Her words successfully angered all the Imperial school team members on the scene, and they all entered a state of combat.

Wei San didnt say much. She killed all the way into their school team expressionlessly. Other members of the Damocles school team moved at the same time.

The supply station entered chaos.

Chapter 218

An hour later, half of the Imperial school team members fled. Wei San looked at the combat readiness bag left here and did not continue to chase.

[121 individual mecha soldiers, 34 commanders and 26 mecha engineers of the Imperial Academy are eliminated from the game.]

Put away the tent and energy, see what else can be used on the ground. Dont lose them. Wei San told the engineers of the school team.

Live audience:

[Damocles school team is like a locust crossing, and there is nothing left anywhere!]

[The chief soldiers of the four military academies were defeated by the chief of Damocles, so it seems that the strongest chief is Wei San.]

[I feel that in the second game, there may be a main team meeting. I dont know if there may be a fight.]

Because the Imperial Military Academy and South Percy Academy did not go straight to the end this time. One went to find the high-level star beast, and the other spent time on the chief of Damocles Military Academy. The distance between the main teams of the five military academies was not far, and it was very likely to meet.

According to previous experience, if their encounter occurred near the terminal, there will be a battle between military academies.

The Imperial Academy's chief is not her opponent. Ying Xingjue looked up at the beam in the distance and whispered.

Situ Jia was puzzled by his inexplicable concern about a chief of Damocles Military Academy, and said, Maybe the chief soldier of Damocles Military Academy has some skills this time. She was said to be a student of Chen Ci, and it is not impossible to win.

Ying Xingjue never answered his words, but said faintly: At this current speed, we will meet at the end of the road with Pingtong Academy tomorrow afternoon. If the other military academies move fast, they will arrive within one hour of our confrontation.

So we can decide the winner within one hour? Ji Chuyu asked him.

Ying Xingjue pointed at a point on the map: I will let the rest of the school team lead the star beasts to the other side, and we will hunt other star beasts.

Ji Chuyu glanced at him and frowned subconsciously: Four double-S high-order star beasts, do you want to give them to Pingtong Academy?

Originally, these high-order star beasts were their target tomorrow, while there were only two high-order star beasts on the other side.

According to Ying Xingjue's current statement, tomorrow they will not only lose two high-order star beasts, but also fight for a long time. It is possible that the five military academies will come together.

The five military academies gathered near the terminal, which is the most taboo situation in the competition.

It is easy to have problems. It is possible for the alliance to turn against the tide and the opponents to unite with each other at that moment.

Two double S star beasts cant delay the time of Pingtong Academy. Ji Chuyu wants them to occupy most of the star beasts.

There are some places on the map that show star beasts and higher star beasts, but more star beasts are not recorded on the map. Compared with other main commanders, Ying Xingjues perception covers almost half of the field, and he can clearly know how many star beasts there are.

This is something that other commanders cannot do temporarily.

There is one thing I need to verify again. Ying Xingjue looked at his right hand. Now he was sure that there was a problem with the other side. He wanted to see with his own eyes whether the chief soldier of Damocles was as he thought.

Live broadcast.

What does Ying Xingjue want to verify? Yu Tianhe asked Ying Yuerong next to him.

The commander, Ying Yuerong, was not clear. She looked at the main member of Imperial in the camera and said, It is not clear what he wants to verify, but it should be mostly related to the chief soldier of Damocles Military Academy.

Ying Xingjue decided to ask the school team to eliminate Damocles school team previously, but Ying Yuerong was surprised. She didnt know why he spent his time on this chief soldier.

Teacher Xiang, is there anything special about the chief soldier in your school? Yu Tianhe asked Xiang Minghua below with a smile.

Is she not special enough now? Xiang Minghua asked.

The audience who watched the live broadcast and listened to the commentary: she really is special enough. Among the five military academies, only one person has the thick face of a city wall and robs openly.

Yu Tianhe looked at the live camera again: If he really agrees with the plan of Ying Xingjue, then several military academies will come together, and he is creating conflicts artificially.

Ying Yuerong did not comment.

The school teams began to converge with the main team. Occasionally, a beam of light would rise in all directions. All the main members were killing the star beasts. The remaining half of the Imperial school

team followed the command of the main commander and led several high-order star beasts in the direction of Pingtong Academy. In the middle of the way, someones mecha was seriously damaged, and the mecha cabin popped up, and they were eliminated automatically.

Wei San! Liao Runing saw the school team from a distance, and simply drove over with his mecha. Did you eliminate the chief of the Imperial school team out of the game?

En. Wei San answered. She has repeatedly fallen into a loose and irritable mood these days, and was not in high spirits.

Liao Runing retrieved his mecha and said, very strong!

Wei San glanced at him and said, Are we going to the end now?

Yes, Jin Ke said that we have to hurry now and cant spend any more time on the star beasts.

Everyone at Damocles Military Academy convene and headed for the end.

At the same time, Pingtong Academy and Imperial Military Academy were also killing the high-order star beasts on both sides of the front, and the other three military academies are starting to come towards the end according to the route of the map.

Its just a double S star beast. The two military academies dealt with it very quickly. Zongzheng Yue from Pingtong Academy dealt with two high level star beasts, which were obviously only one level apart, and the same level star beasts are more powerful than people.

Zongzheng Yue drove a mecha and held a spear, and his killing speed was faster than the other two mecha soldiers.

The beam rose in two directions almost at the same time.

[Imperial Military Academy kills two double-S beasts], [Pingtong Academy kills four double-S beasts.]

At this time, they are still moving their hands? Liao Runing looked up and said.

Lets hurry. Jin Ke looked back. Everyone should be prepared to fight.

Chapter 219

The Imperial Academy chose two star beasts farther away from the end point, while Pingtong Academy encountered a larger number of four-headed star beasts led by the Imperial Academy, and the time for the two military academies to reach the end point was moved back.

In this way, if the two military academies encounter a confrontation, the time will also move back. In addition to the other military academies coming from behind, the five military academies will gather together.

The scene is bound to fall into chaos.

This is the result of Ying Xingjue's decision.

After the Imperials' main force has killed the star beasts, all the members entered the mecha, started flight mode, and flew directly to the destination.

Due to the particularity of the competition, the flight mode is set as the high energy consumption mode. The five military academies can operate flight mode, but depending on their energy stock, they usually can not support their flight from the starting point to the destination. Military academies can only use it at critical moments, and the front field is basically invisible because they do not have enough energy.

Only big energy families like the Imperial Military Academy dare to use it in the early stage.

Imperial Military Academy stopped near the end point and returned to combat mode, with all its members still in their mechas.

There is a high-level star beast near the destination. If they want to raise the flag, they must first remove the star beast.

Huo Jian was the first to walk to the end of the road. After walking 200 meters, the surface of the yellow sand suddenly bulged, and several white spider silk sprayed towards him.

He paused slightly and dodged the spider silk. The white spider silk that missed the target was sticky and had great impact. When it hit the desert, it created a very deep hole, and the yellow sand splash even hit the mecha of Huo Jian.

The surface of the yellow sand became more and more prominent, until a giant earthy yellow spider drilled out of the sand, with a red ring at the end of its pincers and poison glands inside.

3S high order star beast, red foot spider.

Huo Jian pulls out his weapon. His mecha has only one sword, named Qisha.

Qisha make a move. Huo Jian fights, the opponent will never pass Qisha, no matter if he meets a man or a beast.

The Huo family belongs to a special family in the federation, and has always trained mecha soldiers, and has never made friends with any military academy. The Huo families children choose a military academy on a voluntary basis, but none of them is inferior in strength.

Everyone in the Federation has only one fixed impression of the Huo family: silent and tough.

In the first kill, Huo Jian ran towards the red-footed spider with a speed as fast as a ghost. At this moment, if they magnified the foot of his mecha, they could find that the foot of Extinction was only close to the ground, but actually did not touch the yellow sand.

Extinction is a heavy mecha. It is said that the speed of movement is light and a heavy mecha is slow, but Huo Jians speed is not inferior at the moment.

Extinction is very different from other heavy mechas. Yu Tianhe, as a mecha engineer, knows about the mecha of these students. Extinction removes the firepower equipment of the traditional heavy mecha, reduces the weight of the mecha, improves the speed, and strengthens the strength of the mecha arm at the same time.

The Huo family are all heavy mechas. With their swordsmanship, their combat effectiveness cannot be underestimated, Xi Haotian added.

Yu Tianhe suddenly laughed: Not all. You forgot that the main force of Damocles Military Academy has a Huo family who drives a light mecha and uses a bow and arrow.

Xi Haotian was stunned and changed his words: Basically, they are driving heavy mechas with swords.

In this way, there are many different types in Damocles Military Academy.

Near the end of the match, Huo Jian steered his mecha to avoid the spider silk attack of the redfoot spider, and approached the venomous spider at the same time. He bent his knees slightly, and cut at its pincers with one hand.

Right in the middle below the red circle.

Squeak!

The red-footed venomous spiders mouthpiece gave out a scream, and several pairs of feet reached the ground quickly, while the other claw limb stabbed Huo Jian.

Huo Jian closed his eyes slightly, and steered the mecha to jump up. The second kill was directed at the pincers stabbed by the redfoot spider.

da .

The pincer limb of the redfoot spider was broken and fell on the yellow sand, making a slight sound.

The high-level star beast is cunning by nature. Even if its pincers breaks, it does not attack crazily. Instead, it opens its mouth and tries to bite off the head of Extinction.

Huo Jian didnt dodge. He was bitten by the redfoot spider, its big mouthpiece smelled of death.

Chapter 220

He has already grasped the Qisha sword, and his wrist is slightly moving. He is about to wield the third kill, piercing the mouthpiece of the redfoot spider from the bottom to the top.

The high-level star beasts are sensitive to danger, giving up the prey they are about to bite, stepped back and quickly fled.

The sudden withdrawal of the red-footed venomous spider did not change Huo Jians move. He ran towards it quickly, and the white spider silk from the venomous spiders belly spinner continued to hit the chasing Huo Jian.

Huo Jian had to slow down if he wanted to avoid it.

[At three oclock, there will be quicksand 400 meters later.]

Ying Xingjues voice suddenly appeared in Huo Jians mind.

Sadu star has a special geological condition. Once the quicksand surface in the desert is disturbed, it will become liquid.

Once the mecha sinks in, the dust cover will immediately fail, and the fine sand that covers the sky will seep into the mecha like a liquid, which can make the mecha lose its power and be swallowed by quicksand.

Huo Jian slowed down and stopped running after the redfoot spider.

In the distance, the red-footed poisonous spider saw that its prey was not deceived, and stopped in front of the quicksand, with a vicious light flashing in its eyes.

His claw limb can regenerate, but it must eat this prey.

The mental attack of the red-footed poisonous spider is increasing, but it has no effect on Huo Jian.

Even the spirit attack of the 3S Star Beast is useless.

One person and one spider stood in a stalemate near the quicksand. The redfoot spider was not affected by the quicksand, so it had been trying to let Huo Jian fall into the quicksand when attacking.

During the fifth kill, Huo Jian cut off two pairs of feet of the redfoot spider.

The high-level star beast finally realized that the prey was not within its control. The redfoot spider turned quickly and this time it was really fleeing, trying to escape by using quicksand.

However, Huo Jian did not want to let it escape for a second time.

In the sixth kill, Huo Jian points his sword on the sand and jumps up with strength. The sword points to the abdomen of the redfoot spider.

Qisha sword sliced across its belly shell, and it was difficult to continue. The head of the red-footed spider was close to quicksand, but it was cut by Huo Jian and could not move.

Huo Jian used his hands to control the mecha to descend slowly. The Qisha sword fell down again, and this time there was a crack on the surface of the belly shell.

The red-footed venomous spider struggled frantically with its unbroken feet, and its mouthparts continued to emit harsh screams.

Squeak Squeak!

The scream was accompanied by the last desperate mental attack of the redfoot spider. Huo Jians hand relaxed. The spider thought that he had succeeded in attacking him and climbed forward excitedly.

In the next second, Huo Jian added more effort and sliced off the abdomen of the red-footed spider, directly in two.

The redfoot spider struggled with its head a few times and then stopped moving.

Huo Jian withdrew Qisha, looked at his team members, and then approached the quicksand, trying to lift the head of the redfoot spider.

The more complete the high-level star beast is, the more materials that it can be exchanged for.

As soon as Huo Jian got close to the head of the redfoot spider, the dead spider suddenly jumped up and bit him with a big mouthpiece.

The distance was too close for Huo Jian to draw his sword.

In the next second, the redfoot spiders bite will fall down again if it cant close.

Live broadcast.

The incident happened suddenly, and some of the audience didnt respond.

Its Ying Xingjues perceptual attack. Xi Haotian motioned to the audience to look at Ying Xing Jues right hand slightly raised in the camera. He is about 800 meters away from Huo Jian and the redfoot spider.

Yu Tianhe sighed: At his age, it seems that it is not difficult to make perceptual attacks.

At present, the main commander of other military academies cannot attack with perception.

In the Imperial Military Academy, except Situ Jia, who has not been trained in the military region, everyone else has actually fought. Xi Haotian said, This is also an experience that other members of the military academy have not had.

The chief commentators of the live broadcast were still discussing, when there was a second military academy team nearing the end of the field.
