

Smash All 231

Chapter 231

He is not a member of a noble family and has been to various unknown stars, but now that the federal development is good, the people on the unknown stars are just like ordinary people, at least living normally and eating well.

Just living like that. Wei San voiced casually, I made money to go to school.

Li Ze pointed to the period of almost no nutritional intake at the age of seven and said, This year, were you sick or?

The doctor took the lead in denying that lying sick in a hospital, they will provide her with nutritional supplements, on the contrary, that will not cause malnutrition.

Looking at that period of time, Wei San happened to have just come to this world, and began picking up garbage at the garbage dump to survive, all the while drinking a problem nutrient solution discarded by a company.

She even feels a bit absentminded when she recalls it now.

I was not sick, I went to school.

Li Ze frowned and said, Is there a problem with the testing instrument?

The doctor knew they had questions about the test results, but he patiently said, There will be no problems with the equipment here. I used it last week.

Its reasonable to say that parents should be able to detect such severe malnutrition. The doctor asked Wei San, What do you guys usually eat?

Xiang Minghua and Li Ze looked at Wei San, both waiting for her answer.

Wei San: I dont have parents. I usually drink nutritious liquid.

Hearing the first half of her sentence, Xiang Minghua and Li Ze were both stunned. They didnt know about this matter.

The enrollment mechanism for military academies is very simple. The enrollment information form and background form are submitted, and the enrollment information form is filled out by the students themselves. The main focus is on the students names, gender, birthplace, and the perceptual evidence provided by the attached college. The background table is submitted by the local star government and is generally sealed, mainly including family background.

There are only a few families with family names in the Federation, and Damocles Military Academy does not look at a students background. Unless it specifically pulls out the file, only then can they know the students family information.

When the investigation team arrived last semester, Li Ze once questioned the teacher next to him. The teacher called out the background table of Wei San to see her family relationship. At that time, Li Ze focused on the investigation team inside the aircraft, and did not pay attention to the background charts of an A-grade student.

Even now, they have not called up the background table of Wei San. Damocles Military Academy believes in strength and will avoid background interference as much as possible. Therefore, after coming out of the competition, Xiang Minghua subconsciously only flipped through the attachment of her admission information form and determined that the perceptual proof provided by Star 3212 was Grade A, and then asked Wei San again before arranging for a hospital retest.

Are you an orphan? Li Ze took the lead in regaining his spirits.

Wei San nodded.

The doctor next to him thought for a moment and thought something was wrong: If you drink nutritional liquid at the age of seven, the data won't be as low as this.

En The nutrient solution probably only contains sugar. Wei San recalled the news she heard on the advertising screen when she first entered the city, saying that the batch of nutrient solutions dumped and destroyed had no trace elements beneficial to the human body.

Li Ze reacted quickly: When you were seven years old, all the nutrient solutions from Tongxuan Company had been destroyed. All the nutrient solutions on the market had undergone third-party testing, and there could be no problematic nutrient solutions.

Wei San gave an oh and said, They dumped it in the dumpster, and I picked it up and drank it.'

She said such a thing with such ease that all three people in the corridor were silent for a moment.

According to the federal civil law, the Star Government has an institution for compulsory adoption of orphans, where free clothing, food, housing, and transportation are provided. Xiang Minghua was the first to speak out.

Wei San thought for a moment, but still couldn't figure out that Star 3212 had this policy, at least she didn't have it at that time.

Star 3212 does not have this policy. Instead, there is a policy of providing accommodation at a low price.

Chapter 232

Li Ze lowered his head and opened his lightbrain to investigate. He found that Star 3212 was located between several military regions, belonging to a zone where multiple parties did not care, with frequent policy changes.

You can still attend school like this? Xiang Minghua already doesn't know what mood he should use to face Wei San.

Just looking at the surface, he only knew that she is an arrogant and confident thorn, while Nie Haotian, who is also from the unknown galaxy, even has the money to customize his own mecha, but after arriving at the military academy, he still has the inferiority complex of being from an unknown star.

Who could have expected Wei San to be from such a poor background?

Ill take her to test with the other machines first, the doctor interrupted.

Go ahead. Xiang Minghua gave way.

The person of interest, Wei San, was indifferent. She has already come over and has no special feelings about the past.

Was there a lot of noise surrounding the nutrition liquid incident? Wei San was curious. She said one sentence just now, and Li Ze could immediately reflect on what happened when she was seven years old.

The doctor led Wei San into a white enclosed room and closed the door, saying, The Tongxuan Companys event was very famous. The Tongxuan Company controls the nutrient solution of the entire Federation, from the exclusive use of the aristocratic families to the common use for the ordinary people. The reason why they were picked up that year was because they were so bold that they used the nutrient solution of the aristocratic families to tamper with trace elements.

So it was discovered?

The doctor handed Wei San a pair of gloves, which were covered with threads and connected to the nearby instrument, saying, It can almost be considered so. Many people dont have a clear

understanding. However, my senior sister is in the Imperial Star Hospital, so I have some understanding of the situation.

What do you know? Wei San put on the gloves and tried to grip them with both hands.

The Tongxuan Company has been secretive for so many years, and no one knows it except for its internal profit earners. However, the Ying family produced a genius that was once in a century and had a special physique. At that time, they needed to supplement his energy. Their family specifically customized nutrient solutions. One nutrient solution was quite expensive, and other people could not bear the cost of it. Only he could use it. After eating it for several years, they had an accident, and their body did not receive enough elements, resulting in a collapse. The doctor shook his head as he spoke, My senior sister is his doctor. She searched everywhere for the cause, and finally found a problem with the nutrient solution.'

That's why other nutrient solution issues are involved. Wei San understood.

Yes, despite the fact that the Tongxuan Company is still under this name, it has actually undergone a major reshuffle and has been mastered by the Ying family. The doctor sighed a bit, The person in charge of the main household should be clean and honest, although his perception is low, but his means are first-class, otherwise he would not be in charge of the position. When he was elected, his son was not yet born. You should know his son when you participate in the competition.

I know. Ying Xingjue.

The doctor motioned for Wei San to go further and said, Now you move together according to the movements on the light projection. I want to test your strength and physical fitness to the extreme.

Wei San looked at the light projection and pointed to the wall. Am I going to hit it directly?

Smash. The doctor looked down at the optical brain panel connecting the machine, This wall is made of high-strength special metal, and it wont

Bang

Wei San punched it once and stopped her movements, leaving a big hole in the wall.

The doctor looked up and added, break.

He paused where he was, and after a moment he said, Give it one more punch, comparable it to the strength you just used.'

Wei San punched again, leaving only a shallow mark.

The doctor took out a measuring stick from his pocket and compared the two fists. He turned his head to look at Wei San and said, Use the same force as before.

Its the same strength as before, Wei San confirmed.

The doctor pointed to the two marks and said, Do you think its possible?

Im sure I used the same force just now. Wei San looked at the trace and was surprised.

Keep smashing, without pause.

Wei San followed suit and the marks on the wall were left both deep and shallow.

Doctor: The situation is even more complicated.

Chapter 233

Strength training tests, physical endurance training various tests and inspections.

The doctor took Wei San with him for a whole day of testing, from initial surprise to the bland silence later on. Finally, he uploaded all the data and summarized them.

The results will become available tomorrow, so you can go back first. The doctor led Wei San out and took a handful of things out of his white coat pocket and handed them to her. You can drink these first these days.

Wei San accepted it and looked at the white liquid in the test tube, shaking it twice: Whats this taste?

There's no taste, this is a nutritional supplement that is suitable for developing mecha soldiers. You haven't reached the age of 18, and your body can still be saved. The doctor explained, After supplementation, there should not be any sequelae left.

What does it mean that there shouldn't be? Xiang Minghua was a bit dissatisfied. Aren't you the most powerful doctor on Sadu Star? Your words are so inaccurate.

The doctor spread out his hand and said, You said she's at the 3s level, but the situation is still uncertain. If she's really at the 3S level, she can make up for it in a month or two, but if not there's a bit of a problem.

Li Ze frowned from the side and said, She can discover star beasts before other 3S, it's definitely not possible to be below 3S.

The doctor sighed, Why can't you guys look farther? If it's not 3S, it could be more than 3S.

Li Ze and Xiang Minghua suddenly looked at Wei San with strange eyes.

The situation of exceeding 3S is very complex, and it cannot be said that being sharper than other 3S is Super 3S.

Currently, the highest level recognized by the Federation is 3S, but there are differences in the perceived strengths of 3S mecha soldiers. This is why there are light, medium, and heavy mecha soldiers, and there

are also differences in the strength between 3S mecha soldiers. So far, only Ying Xingjue from the Imperial Military Academy has been recognized as a Super 3S in the Federation.

Otherwise, there would be enough samples, and the instrument would already have a fourth generation.

Wei San, who may be over 3S in the doctors mouth, didnt pay attention to their eyes. She had already lowered her head and opened a nutritional supplement, lifted her head and poured it directly into her mouth. After drinking it, she carefully savored the taste and said, It really doesnt have a taste.

Li Ze: At such a serious moment, why can she always switch to other places?

The three of them rode back to the base on Li Zes aircraft. The atmosphere was a bit awkward on the way, mainly between Li Ze and Xiang Minghua. Wei San leaned back in a chair and felt very comfortable.

Before you Li Ze coughed, flipped over the wall to the bar to work part-time?

Wei San turned her hand around the nutritional supplement and looked up, Thats right.

The matter of the Underground Factory remains unsolved. A series of tugs by the gourd may expose Huo Xuanshan and Liao Runing in due course.

I apologize for the deduction of your credits at that time, Li Ze spoke seriously.

It's right to be punished for violating school rules. Wei San has almost forgotten this matter and she was caught as a typical example. She also violated the rules first.

Xiang Minghua looked at the student who was enrolled and said, No matter whether it's a 3S level or not, you don't need to be under pressure.

Wei San nodded and was not interested in whether she was at the 3S level, but was interested in whether she could access the S-grade mecha.

Now that she was determined to be an S-grade, can she design and manufacture an S-grade mecha?

Chapter 234

As soon as she returned to the drill field, Wei San wanted to sneak over to find Huo Xuanshan and Liao Runing. The game at the Underground Factory was not over yet, and she was thinking about the prizes there.

Wei San went and found that the main members were all gathered together.

How was the test result? Ying Chenghe asked her.

It will come out tomorrow. Wei San sat down and walked towards the apples on their table.

Liao Runing snatched the apple from her hand and said, Lets talk about the situation first. Its so troublesome to re-measure the perception.

Its just like that, Wei San said roughly.

Standing opposite, Jin Ke quickly extracted a series of key words from her words, such as chronic malnutrition, orphans, and picking up nutrient solutions. He was surprised and said, What about the expert behind you?

What kind of expert? Wei San asked without knowing the internals.

The teacher who came to Sadu star to play before.

Wei San frowned and said, Didnt I tell you that he was a teacher in the preparatory individual department of 3212 College? I wanted to ask you earlier, but when you left, you said something about what I had or didnt have.

Jin Kes imagination of the background construction of Wei San for many years suddenly collapsed and shattered to the ground. He questioned, so the tricycle you sold me were really made by yourself.'

They all have a problem with imagination in the command department. Liao Runing threw the apple in his hand back to Wei San. I didnt know you were from an unknown star before.

Thats right, Star 3212, the Imperial Academys chief, is also from our place. Wei San bit the apple in her hand.

In addition to Jin Ke, several other people brushed together to look over.

Ying Chenghe: Chief of the Imperial Academy, that Tai Wude? No wonder todays replay shows that his mecha is still fine.

Only Huo Xuanshan focused on another point: What tricycle?

A tricycle, a treadmill that can be moved on foot. Wei San casually came, Do you want it? I can make one for you, just five

No need. Huo Xuanshan refused directly. I can rub Jin Kes.

Shen Tukun next to him said, He vaguely remembered Huo Xuanshan as a noble and as a noble family member who didnt care about money at all. Why does he still use the word rub right now?

Wei San sat next to Liao Runing and asked in a low voice, Are you still going to the Underground Factory competition?

Going Liao Runing said immediately.

What are you two talking about together? Jin Ke finally recalled his spirits.

Wei San and Liao Runing said in unison, Nothing.

When she returned to her bedroom, Wei San fell asleep, but instead, the teachers and doctors at Damocles Military Academy stayed up all night.

The next day, Li Ze and Xiang Minghua personally went to the military district hospital to obtain the test report.

The doctor led them in and closed the door. The test results are out.

What level? Li Ze asked.

Over 3S. The doctor opened the last page of the test report and showed them the results.

Li Ze and Xiang Minghua looked at each other and saw the complex emotions in their eyes.

Of course, they're happy. Super 3S means that Damocles Military Academy has the ability to compete with Imperial Military Academy, but with it comes more problems.

Chapter 235

The doctor turned back to the previous test data summary: However, her current condition is very complex, and her body values indicate that she is not even in normal A-grade health. Super 3S is currently not defined, and the only known super 3S in the Federation is Ying Xingjue, who has a strong command and perception ability and requires a large amount of nutrients to maintain his normal functioning. Due to a previous nutritional liquid problem, Ying Xingjue's body has been damaged, and the Imperial Star has been developing new special nutrient solutions to try to make up for it.

So Wei San also needs this nutrient solution? Li Ze asked.

The doctor shook his head: Wei San is a single mecha soldier, and is by no means identical to Ying Xingjue. Moreover, there is one thing that is quite strange. It is reasonable to say that she has a perception of more than 3S, and her body should not be able to withstand the fact that she did not supplement with special nutrients like Ying Xingjue when she was young. Bone testing shows that by the time she was seven years old, her body intake camp reached a low point, but instead pushed her perception back to adapt to the body. I suspect that Wei San's perception has been maintaining her normal life for so many years, so on the surface she looks like a normal person. Yesterday, I questioned her and she had had multiple nosebleeds, probably due to a sudden rise in perception, entering a state similar to that of Ying Xingjue, and the inability of her body container to accept, but at present, we have too few samples to fully analyze her situation.

Xiang Minghua: What do we need to do?

First, adjust her physical condition and supplement her with sufficient nutrition. The doctor sat down. Do you want to announce that she is at the Super 3S level?

After a moment of silence, Li Ze said, The outside world now thinks that she is at the 3S level, which is our hidden trump card. So this time, we will hide the true level of Wei San.

The doctor made it clear: The follow-up plan needs to be changed. Originally, I wanted to contact my senior sister to study together, but before the end of the competition, I will be responsible for Wei San.

Ying Xingjue definitely needs a special nutrient solution. What about Wei San? Xiang Minghua questioned the doctor.

My senior sister once led me to study the case of Ying Xingjues nutrient solution problem in the past, and I am fully aware of the composition of the nutrient solution behind him. The doctor said, There is still some time to go. After the next match comes out, you guys shouldnt hurry to leave. I will try to mix a special nutrient solution suitable for Wei San.

Then well be bothering you. Li Ze took the paper test report on the desktop and went out with Xiang Minghua.

She has such a high level, then what about her mecha? There is no mecha engineer who surpasses the 3S level in the Federation. Xiang Minghua was worried, a super 3S commander with support from the Ying family behind him, and he still hasnt managed to recuperate well.

Wei San

First, lets use the 3S level mecha. Li Ze lowered his head and reported to the military region, saying, You take her back to school to choose a suitable mecha. We will stay on Sadu Star for the time being, and make sure she selects the one that suits her.

The 3S level soldiers of the Aristocratic Family all have their own mecha tailored to their needs, but each school has its own 3S mecha stored from the military area. The sources of these are relatively complex. Some are developed by the 3S mecha engineers, but no one can use them. Some are donated after the death of their predecessors, waiting for future generations to use them.

Alright, Ill find Wei San later.

Upon arriving at the drill field, Xiang Minghua found Wei San, who was surrounded by several key members who seemed to be waiting for the news together.

Teacher, hows it going? Liao Runing put his hand on Wei Sans shoulder. She must be a 3S.

Xiang Minghua looked at Wei San and said, Super 3S.

Six people present:

Finally, Cheng He spoke out first, Like my cousin?

Xiang Minghua nodded and said, Before the competition ends, dont say anything about her situation of being a super 3S. You only need to pretend that Wei Sans perception is 3A.

Im Super 3S. Wei San finally reacted and said slowly, Does it mean I have a chance to see the flames of the Empire rise?

Xiang Minghua frowned and said, What flames of the empire?

Its nothing, Jin Ke interrupted, Teacher, what about Wei Sans mecha?

Time is running out, Wei San, you can only go back to the school and choose a 3S mecha first, and then let Ying Chenghe help you develop it. Xiang Minghua said, Ill take you there now.

Huo Xuanshan stood in front of Wei San and said, Teacher, it will take several days to pick out a mecha. Liao Runing and I will accompany her to practice our hand.

This is also fine. Xiang Minghua passed the virtual key ID card to Huo Xuanshans optical brain. You are all 3S mecha soldiers, so it should be better.

Wei San silently gave Huo Xuanshan a thumbs up, he reacted too quickly. It happened that they were going to the Underground Factory to compete together.

After Xiang Minghua finished his assignment, he went back to wrangle with other military school teachers. Every corner of the five military schools was full of intrigue.

Are they hiding something from us? Jin Ke said suddenly, squinting at the backs of Wei San, Huo Xuanshan, and Liao Runing.

Chapter 236

Wei San has returned to Damocles Military Academy and gone to the mecha storage room. Ji Chuyu raised his hand and turned the light brain to Ying Xingjue on the opposite side. It looks like they're not going to hide anything.

The double S soldiers of the main team of Damocles will graduate after three games and cannot participate in the competition again. Ying Xingjue looked up at Wei San and the others on the light screen. In the third game, they will replace him with her. The double S soldier will serve as the chief soldier of the school team, and the five military academies will be reshuffled in an instant.

An unknown star can actually produce a 3S mecha soldier. Ji Chuyu's tone was somewhat complicated.

Jin Ke was also born on an unknown star, and these people would immediately climb up if they caught a bit of resources. Ying Xingjue resolutely frowned, but he did not correct the statement that Wei San's perception was 3S.

In fact, since coming out of the desert arena, Ying Xingjue has never explicitly told anyone that Wei San is a super 3S mecha soldier.

In recent years, especially in the past two years, there has been a surge in the federal undercurrent, with a force mixed in. The emergence of the Super 3S mecha soldier is bound to be wildly culled.

At least after the competition, the super 3S mecha soldier has been trained in actual combat and has a certain self-protection ability. This information can only be released, and may have a deterrent effect.

Ying Xingjue looked down at the table, behind the military academy at Damocles maybe its time to contact them.

Are these all 3S level mechas? Wei San looked at various mecha rings and mecha necklaces, and her heart pounded a few times. Happiness came so suddenly that she couldn't accept it.

That's right. Liao Runing leaned over to the transparent cabinet and peered in at it. The teacher said that we would give you a few days to try them out. How about we change the mecha at this time and go to win the underground factory championship?

If the F*** the Underground Factory team doesn't do anything to turn over everyone, the name is taken for nothing..

First, let's find a suitable mecha for Wei San, and then we will choose three of the mechas we have never seen before to compete in the Underground Factory. Huo Xuanshan thought more comprehensively.

The storage room had a dedicated training venue, where Wei San tried out one mecha by one, and her whole person almost fainted with excitement.

Liao Runing clasped his arms and looked at Wei San with a disdainful expression, who was facing various types of mecha. How do I feel that her current appearance is not very similar to what we used to act like when we selected a mecha?

Before customizing a mecha, the children of the aristocratic families will first try out some mechas, which can be considered as their first real contact with a mecha, and they will be excited, but they will jump into the mecha cabin excitedly and control the mecha, instead of the way Wei San is now, touching the mecha like a dirty mecha engineer.

Thinking of those mecha masters groping their mechatronics, Liao Runing unconsciously shuddered. It was terrible.

Wei San, hurry in and try it out, Liao Runing shouted.

Right away.

After releasing a 3S mecha, Wei San jumped into the mecha cabin. She was first shocked by the luxury equipment inside, then began to feel around and finally sat down and put on a bionic helmet.

At the moment of activation, Wei Sans brain immediately receives the structure of the entire mecha, and her perception spreads through the bionic helmet to every corner of the mecha. At that moment, the mecha seemed to be herself.

Opening the control panel, Wei San began to move slowly, only to find that the gap between the grade A and the grade 3S mecha was too large.

Now, she is like a martial arts practitioner who has gained decades of internal skills cheaply. She slides out with one casual step, making every move easy.

Chapter 237

This surging sense of power that can control the world is no wonder that those 3S level mecha soldiers are all eye-catching and do not easily interact with A-grade soldiers. The two indeed did not produce a feeling of being from the same world.

After testing the basic performance of this mecha, Wei San left the mecha cabin.

Huo Xuanshan frowned at her and said, Wei San?

Wei San looked at him, not knowing what he meant.

Your nose. Liao Runing took out the paper from his pocket, pulled it out and stopped it under Wei Sans nose. Whats the situation?

Wei San took out a nutritional supplement from her pocket, blocking her nose while drinking it clean. The doctor said that my perception is recovering and my body will not be able to withstand it. Nosebleeding is normal, its okay.

Wei San tried one by one, faster than Liao Runing and Huo Xuanshan had imagined. She only tried each mecha action once every time, then she wouldnt try again.

Just this one. Wei San tried them out from morning to night, and finally chose a mecha with the same color as the Blood Drop. Its pretty good in all aspects, and it should be the most suitable one for me.

Zhu Jiang, it was used by a former senior at Damocles Military Academy. Huo Xuanshan remembered the mecha, and the senior once drove it and stood on the competition podium to win the Champions League.

Liao Runing is only interested in heavy mechas, as for the other medium-sized mechas in federal history, they cannot be clearly remembered. However, after listening to Huo Xuanshan's words, he said, 'How many years ago was that?'

Damocles Military Academy hasn't won a championship in too many years.

Huo Xuanshan: if Teacher Xie was here, you might have angered him to death.

Wei San retrieved the mecha and said, 'Let's pick three others and sneak off to the Underground Factory for the game at night.'

The students at Damocles Military Academy are paying attention to them, and if they want to go out openly, they will definitely be found. Fortunately, this side is in the North View Building. Apart from the escort team, no students will come.

It's especially easy to flip over the wall.

Is this the feeling of flipping over a wall? Liao Runing rode on the wall, one foot inside and one foot outside. It feels good.

Hurry down. Wei San stood outside the wall and looked up. Are you mischievous or not? Someone will bump into you later.

Liao Runing leaned on the top of the wall with one hand and jumped down. Interview a little, what was it like when you were caught by the Major on the spot on the wall?

Huo Xuanshan corrected, Now its Colonel Li Ze.

Wei San: ? ? ?

I was recognized by the Colonel in class. Who told you that I was caught on the spot? Where are these rumors coming from?

After I learned that you were Bowing, I went to the forum to read your news. They all said that you were discovered by the Major while climbing the wall at night, and that you also regarded the Major as a senior in the guard team. Liao Runing had a nose and eyes, It is said that you lied as a little sheep in order to escape punishment and were looking for an online lover, Brother Ye Bei.

Have you found your Ye Bei brother now? Huo Xuanshan inserted his knife.

Wei San: F*** you all.

The past cannot be recalled.

The three returned to the Underground Factory and registered again.

Its you three again? The registrant looked up and subconsciously said, The finals of the Sadu star Underground Factory are almost over. you guys are coming just now?

You said before that all competitors can challenge the division championship. Wei San still remembers the rules he said.

The person in charge of registration can only start registering and complain, The day before yesterday, the division championship has been won, and today is the last hour of the last day of the registration challenge. Im almost off work, so why do you always have to come to the end? The main team of Damocles is not as busy as you.

There are really two main players here.

The three remained silent and waited quietly for him to complete their registration.

Chapter 238

Take your game cards and start challenging for the division championship tomorrow. You guys should be in line the day after tomorrow. The registrar curled his lips and said, I hope you can challenge successfully and not waste my time off work.

The Underground Factory has five floors underground.

This is the list of all the challenge teams so far.

Li Que looked up at the names of the teams and gently blew on the nail polish she had just painted on her fingertips: These teams don't have any self-awareness, and they still want to have a chance.

As soon as she finished speaking, Li Que's gaze rested on the name of the last team. She lowered her hand and said in a cold voice, F*** the Underground Factory? The team with West Landing and Bowing to Life?

The companion pointed to the detailed list of team members, with West Landing and Bowing to Life impressively on it.

Looking for death! Li Que raised her hand and slammed it on the table, causing countless small cracks on the marble table. I didn't find them to settle for my brother, instead they delivered themselves directly to my door.

The God of Death is the younger brother of Li Que, who is an S-grade player himself. Later, he lost the game and lost points. He fell to the third underground floor, where he began to enjoy killing people.

However, after two challenge arena competitions with Bowing to Life and West Landing, the God of Death was completely destroyed, and his mind was hit, unable to recover. Not even as good as an ordinary person.

Since they want to challenge, just kill them on the stage. The companion said casually.

Li Que sneered and said, If you deliver yourself, then I wont be soft.'

The three people climbed over the wall and returned to Damocles Military Academy. The next day, Jin Ke and Ying Chenghe both returned.

Chenghe came back to help me change my mecha. What are you doing back for? Wei San asked Jin Ke.

Jin Kes brain spins fast, what if he finds out.

Youre all here, whats wrong with us coming back? Jin Ke squinted at Wei San and the others. Can you possibly have any hidden secrets?

Wheres Senior Shen Tu? Huo Xuanshan diverged from the topic.

He went to handle some stuff at the military region. Senior Shen Tu is going to the Thirteenth District, following Colonel Li Ze. Ying Chenghe explained.

Very good. In the future, young master will also go to the 13th District.

Five people gathered together, and Liao Runing suddenly remembered something. He looked at Wei San with a serious face and said, Tonight, I want to enjoy my 200,000 yuan.

Wei San:

Huo Xuanshan: My 50,000.

Wei San feels that Huo Xuanshan is sometimes particularly annoying, there is him everywhere!

Okay, lets all sleep in my bedroom together today. Wei San looked expressionless, but we need to buy a soft bed first.

Finally, the five people went out shopping together, once again stepping out with the momentum of exploding the street.

This time around, there is still only one poor person, Wei San.

Chapter 239

The young master went out shopping to pick up a bed, but was hoodwinked by several people. Finally, he bought various bedding items. After swiping his card, he realized that he was paying for them all by himself.

You guys scammed me? Liao Runing questioned the four people who looked up at the sky and down at the earth.

How can a matter between friends be called a scam? Wei San kindly patted him on the shoulder. Lets do this, Huo Xuanshan will invite us to dinner later.

Huo Xuanshan:

Liao Runing suddenly recovered and said, Alright.

Among these people, Jin Ke is the most calculating person, but when it comes to being a schemer, its definitely Huo Xuanshan. Liao Runing used to think of him as a gentleman like others, but now he understands that Huo Xuanshan is the most shameless one.

After an expensive lunch, Jin Ke and several of them went to Wei Sans bedroom to exchange things. Ying Chenghe brought Wei San to rebuild the mecha.

What kind of mecha did you choose? Ying Chenghe asked.

This one. Wei San released the mecha into the open space.

Zhu Jiang. Ying Chenghe nodded, Let me see what else needs to be changed.

After saying that, he went forward and connected the mecha with his optical brain.

Wei San didnt go up, but asked him instead, Im now at the Super 3S grade. Can I watch Yu Qingfeis teaching?'

Ying Chenghe was stunned and remembered that Wei San could also modify mecha.

You can, if you wear a brain interface, you can enter. Ying Chenghe responded, There are no super 3S mecha engineer in the Federation. Wei San, I will temporarily help you transform your mecha for the competition, but in the future, you may have to design your own mecha.

Then you can help me modify Zhu Jiang here, and Ill go watch Yu Qingfeis teaching. Wei San immediately wanted to see the mecha teachings left by Master Yu.

Ying Chenghe raised his hand to open the optical brain and helped Wei San with the authority: After entering, dont force yourself, come out immediately if you feel unwell, otherwise your perception may be damaged.

Wei San obtained permission and immediately slipped past.

The machine with a brain interface was on the second floor of the reference room they had been to before. Wei San passed through the reference room on the first floor and walked to the second floor.

The upper floor was empty, with only a slightly higher platform in the middle, with a helmet-like brain interface suspended above.

As soon as she approached, a pale blue light barrier suddenly stood up around the platform, preventing her from entering.

Wei San raised her hand to light up the authority of the light brain, and the barrier disappeared again. She stood on the platform and took off the suspended brain interface.

As soon as she retrieved her hand, she sensed that the brain interface was absorbing her own perception.

Wei San remembered what Ying Chenghe had said, so she simply released all her senses and then put on a brain interface.

As soon as she put it on, her vision immediately changed, more precisely, as if she were immersed in a dark, bluish night.

Its another one.

A young voice suddenly came from behind Wei San. She turned her head and looked at him. He was a slender, handsome young man, just like the photos on the internet.

Yu Qingfei.

Except then Yu Qingfei in the photo was handsome and straight, with a bonus of historical brilliance. No one expected him to actually carry some evil spirit.

The young man, also known as Yu Qingfei, walked over from the rear and stood in front of Wei San as if he had seen her: New person, are you sure you want to become a mecha engineer?

Wei San didnt make a sound, but instead walked forward and looked around Yu Qingfei.

This should have been recorded by him during his lifetime, and it can be seen that he is in good condition, and there is still a casual and relaxed feeling in his eyes that cannot be hidden.

Why dont you speak? Yu Qingfei spoke to the air, with Wei San standing behind him.

It seems Yu Qingfei didnt expect anyone to play cards without following common sense, and they dont respect him at all!

Chapter 240

Wei San reached out and patted him, saying, Master, here.'

The remnant of Yu Qingfei immediately turned around and said, Dont mess with me. Are you coming to learn mechas from me? Stinky problem.

Wei San:

Alright, now Ill start teaching you. Yu Qingfei raised his hand and pulled it horizontally. Here is the corresponding level of teaching, choose from it.

There are only three options in that row: S, SS, and 3S.

Wei San hesitated for a moment and directly hit the 3S.

The scene suddenly changed. This time, they were located in a super large studio, it was a luxury studio that Wei San had never seen before.

Whether youre a child with zero foundation or a garbage mecha engineer who wants to come here to learn again, Yu Qingfei suddenly appeared from the side with a tool knife in his hand. From now on, forget everything and learn from this master.

At this time, Yu Qingfei was significantly older than she had just seen before. He may be around thirty years old, but his loose and arrogant spirit remained.

Lets start with the structure of the mecha. Which of these mecha components do you think is the most important? Yu Qingfei looked at Wei San and didnt give her time to answer at all. No matter which one you think is important, now whats important is what I say is important.

Wei San: Alright, youre the master, everything you say is right.

Energy, engines, engines, and weapons are the most important things for a mecha. Yu Qingfei strode over to the tool table, pulled over a chair, and sat down. These parts are inextricably related to materials, and many of our materials are derived from Star Beasts. With whatever level of mecha, it is necessary to use what level of material, that is, Star Beasts.

Wei San began to become a bit clearer, but not quite clear. She has not been exposed to S-grade materials. Previously, I have the money sent her finished parts, but she didnt have time to study them because she had a nosebleed and finally put them on hold..

The materials she was exposed to were all synthetic materials, used on A-grade mechas. She hasnt heard that A-grade mechas use things from Star Beasts as weapons.

Grade A doesnt need to use the things from Star Beasts as weapons. Yu Qingfei seemed to hear Wei Sans words in his heart and said, Grade A star beasts mostly live in groups and have insufficient strength. The materials used to make them are not good enough, or even inferior to artificial imitation materials. If you want to play with Grade A mecha one day, remember not to use Grade A star beasts. If you have the opportunity, you can try adding a little Grade S material, not too much, otherwise the soldiers of Grade A mechas cannot bear it. The amount and balance between these needs to be studied by yourself.

Wei San suddenly remembered the God of Deaths mecha from the Underground Factory. It seems that the joints were made of S-grade materials, but the God of Death is different, he was S-grade.

This was what Huo Xuanshan later told her.

Today, I'm going to talk about the materials, and it happened that the headmaster's bastard got a 3S grade star beast. Yu Qingfei got up and pushed open a door.

In front of Wei San the scene changed again, this time to an empty room with only a processing desk, with a giant sand wolf drenched in blood in the middle.

This is a giant sand wolf, which only exists on Sadu Star. Yu Qingfei squatted in front of the dead sand wolf and opened its mouth with his gloved hand. This is a sand wolf that is about to evolve. Although the quality of the material will be better when it is completely morphed, however if something like a star beast is encountered, it will be killed, otherwise you will not know how many people will be injured in the future.

Pay attention to its teeth, which are hard and sharp. Yu Qingfei tapped the sand wolf's canine teeth, but if you want to make a mecha weapon, it is not suitable. The mecha's weapons should be able to be retracted and placed freely, which is beneficial to the mecha's movement. Therefore, I generally choose to remove the sand wolf's teeth, and after special treatment, add them to the weapon.

Yu Qingfei quickly disposed of the four canine teeth of the sand wolf, and then the scene turned around. It may have been several days since Wei San discovered that he had changed her clothes and was standing in the studio.

Let me demonstrate how to handle the sand wolf's teeth, Yu Qingfei said to the direction of Wei San's current position.
