

## Smash All 241

### Chapter 241

As he started to move, I heard a message the other day that a mecha engineer didn't kill Star Beasts when collecting materials, but took them while they were alive because that way it's better quality materials. Star Beasts really only know how to attack humans, and they are undoubtedly harmful, but I hope the students I have taught won't use this method in the future. It's not pitying for Star Beasts, but if you do too much of this, you will have psychological problems yourself.

Yu Qingfei raised his hands, pausing in mid air, his face not too happy, saying, 'That engineer has gone through such crooked ways. I hope there won't be such people in the future in the Federation.'

After that, he didn't say these things again, simply teaching how to handle materials mixed in weapon metal.

However, Wei San had a premonition that this was the first time that Yu Qingfei had shown such a complex and heavy expression in the teaching video he left behind, and the original loose and spirited expression he had brought precipitated down.

After learning to process materials with Yu Qingfei, she suddenly saw everything disappear and then returned to the empty second floor.

Wei San, you stayed inside for five hours. Ying Chenghe looked down at his light brain, as he had just forced Wei San to exit.

At present, among the people at Damocles Military Academy who use this instrument for brain interface learning mechas, the person with the highest authority is Ying Chenghe.

Really? I dont remember. Wei San got off the platform and her legs softened.

Ying Chenghe walked up to hold her and said, How was your first class?

Very good, starting with materials. Wei San stood in place, her nose bleeding began to flow again, but now she had no waves in her heart and skillfully blocked her nose with a paper towel.

Doctor already said its a sign of sensory recovery.

Materials? Ying Chenghe was stunned, Isnt it starting from learning about the mecha engine?

This is a teaching video that masters have recorded, set parameters, and imported into the mecha before they died. It looks like its one-on-one, but actually everyone is learning the same content.

Its not. Wei San looked at Ying Chenghe, Didnt you learn about the materials?

Yes, but you started in the wrong order. Ying Chenghe frowned and glanced back at the machine. It may be related to you being a super 3S.

Yu Qingfei is also a super 3S? Wei San saw that his information was limited on the star website, but it was just that this was an epoch-making figure, a powerful soldier, engineer, and double major .

Ying Chenghe shook his head and said, Im not sure. These masters in the Federation are all levels of 3S, but in recent years, some people suspect that the level of those masters is different from our level division.

The instrument for testing perception was not invented by Yu Qingfei and someone else? How could it be different?

Gong Yiliu. Ying Chenghe proclaimed.

En?

Its Yu Qingfei and Gong Yiliu. Ying Chenghe explained, The third generation instrument currently used was invented by Gong Yiliu, who is the ancestor of Gong Yijue, a major member of the Imperial Military Academy.

Wei San nodded, blurrily remembering a concept.

Maybe its because we are both soldiers and engineer practitioners, Wei San said unashamedly. I am also an excellent mecha engineer.

Ying Chenghe laughed and said, There is a difference. Yu Qingfei was first known as a mecha engineer by the world, but later it seemed like there was an assassination attempt. As for you, your current identity is a mecha soldier.

Wei San became thoughtful: Unfortunately, if she had money, she would definitely become an engineer first.

## Chapter 242

Hurry up. Liao Runing walked in a cat crouching pose against the shadow, whispering to Wei San and Huo Xuanshan behind him.

Young Master Liao has never climbed over a wall. After climbing last time, he felt good. This time, he was very proactive.

Wei San was last. They were going to the Underground Factory tonight, so during the day, she told Jin Ke that she would go and debug the mecha with Ying Chenghe. At night, she also told Ying Chenghe that she wanted to learn about mechas with Yu Qingfei and told him to go to bed early at night without having to go to her place.

What reason did you guys find for coming out? Wei San watched Liao Runing flip over the wall. She also jumped up and asked them both.

We said that we two are going out for training, Liao Runing said nonchalantly. Both of them are single soldiers, and they used to work together, not at school.

Wei San felt a little relieved. As long as Ying Chenghe doesn't go looking for her and had no doubts, she shouldn't have overturned her car.

The three of them came together to the fourth floor of the Underground Factory, where the final challenge of Sadu Star was held.

This is real gold. Wei San touched other people's walls as soon as she arrived. Has money.

The wall is black, but the corners of a flowerpot placed on both sides of the corridor have broken the wall a bit, revealing the original color inside.

There are many gray transactions in the Underground Factory, almost occupying the entire Federation, and it is not surprising that they have money. Huo Xuanshan came to fight after coincidentally hearing some news about the Underground Factory, and thought that this might lead to finding experts to practice.

Jin Kes family can make a fortune by engaging in garbage, and these gray transactions are all highly profitable things. Of course, they are rich. Liao Runing retreated and looked at the golden path revealed inside.

Jin Ke, who was still deducing at Damocles Military Academy, suddenly sneezed.

Liao Runing reached out and poked at the exposed gold wall, saying, We can dig some and bring it back to sell.

As soon as this was said, the waiter standing on the side of the corridor on the fourth floor underground, immediately glanced over from the corners of his eyes and stared at Liao Runing without blinking his eyelids.

F\*\*\* F\*\*\*, youre promising. Even Wei San didnt have this thought before.

Lets go. Huo Xuanshan reached out and pushed the two of them forward. If they still dont leave, the waiter would probably have to send someone to handle them.

Wei San glanced at their teams points and said, We can only reach the third level of points, if not for the competition, we cant come here yet.

Didnt the score increase a lot after playing with that team last time? Liao Runing remembers doubling it at the time.

Increased, still missing a little. Wei San touched the ring on her finger. She hasnt used this mecha much yet. Only in the afternoon, she played a few games with them at the training ground.

When they arrived at the match site, the penultimate challenger team was playing against the champion team.

Huo Xuanshan and Liao Runing didnt not watch their game because they were 3s. In fact, mecha and perception are one thing, while combat experience is another. They are still too young to have much experience.

The most important purpose of establishing the Hephaestus Competition was to provide military students with sufficient practical combat experience, so that they would not suffer too much casualties when going to the battlefield, and to provide young military students with a psychological buffer period. Apart from the events that occurred in the previous years between Damocles and Samuel, the actual casualty rate in the competition is not high. The reason for the many substitute players is that during the competition, some military students psychological collapse and eventually exit in a gloomy manner. If the sequelae are mild, they will adjust themselves and continue to participate in the competition as long as they have sufficient strength. But some people not only withdraw from competitions, but even withdraw from military academies and become ordinary people from then on.

In the competition, there are 12 matches, and students from all three departments will gain experience. The mecha engineering division needs to restore individual mechas as much as possible under limited time and materials to ensure that they can fight. Commanders learn perceptual application skills in actual combat with Star Beasts, not only to build barriers, but also to attack Star Beasts spiritual power. As for individual mecha soldiers and Star Beasts, as well as other military academies, the organizers want to see them fight.

The champion team has a 3S mecha individual, Huo Xuanshan said, looking at the light yellow mecha in the middle of the challenge arena.

Her teammates are ruthless, and they should not only have played in the arena. Liao Runing focused on the heavy mecha of the champion team, with a strong sense of violence on his body, which is definitely not a good opponent.

The challenging team is not weak either. The three players are all in the double S level, but they have a fatal weakness and lack tacit cooperation. The opposing champion team has obviously played a lot of games together, even without reacting, knows what the team members are going to do next.

Wei San lowered his head to retrieve the information of the champion team and open the 3S mechas information: Li Que

Chapter 243

Their team information? Liao Runing could clearly see the content on Wei Sans light brain with a twist of his head. Your light brain is this exposed to everyone, its better to switch to a light brain with a privacy interface earlier.

I have a privacy interface function.

Where?

Wei San pointed to her ID and said, This has been privatized.

Liao Runing: Ive been educated.

Li Que is not very good. Wei San stared at the person in the challenge arena for a moment and analyzed.

Why? Huo Xuanshan believes that their team has a tacit cooperation and has not been together for many years, so their actions cannot be synchronized.

Wei San looked at Li Que in the challenge arena and said, Her 3S mechas performance is only less than half of its actual performance.

Liao Runing: Maybe she has exchanged for a new mecha and has not adapted to the new mecha yet.

Probably.

Wei San just felt that Li Que is not quite the same as the 3S she has seen before, and she was very empty. The momentum of each move is good, but the strength is not strong, and the control ability is not enough.

From the perspective of an engineer, Li Que is not suitable for this mecha. If Ying Chenghe were here, he would discover the clues, but Wei San did not learn much about the 3S level mecha, so she was unable to explain her own feelings and the differences.

Looking up again, the challengers over there were all defeated and the mecha was completely destroyed.

[Congratulations to the Underground Factory Hunters for defending the division championship position again.]

Li Que came out of her mecha and stood on the challenge arena, looking at Wei San and Huo Xuanshan in the waiting area from afar. She stretched out her bright red fingernails, lifted them and tugged hard at her neck.

Liao Runing: ?

He tilted his head, Is that woman demonstrating to me? This young master hasnt even moved yet, how dare she use such gestures to me?

Master Liao was really angry, and he strongly expressed that Li Que would be handed over to him.

Wei San and Huo Xuanshan didnt know that the God of Death was Li Ques younger brother. The two came to the Underground Factory for different purposes, one to earn money, and the other to try out against different opponents. They didnt understand the gossip of the Underground Factory at all.

Naturally, they thought Li Que was just demonstrating against the challenge team.

They are the last challenge team, and according to the rules, the champion team will rest for an hour before continuing the game.

Wei San and them sat in the waiting area to watch the champion teams match yesterday.

All of them are S grade and above, all the scattered soldiers from the Federation have come to the Underground Factory to compete? Liao Runing looked at various teams and questioned.

The cooperation between the Underground Factory Hunters is indeed perfect. Wei San hasnt used the 3S mecha much yet, so you should be careful later. Huo Xuanshan instructed.

3S vs. Double S, novice vs. veteran, fairly fair. Wei San doesn't feel much, she only cares about one thing, Would I need to compensate if the mecha breaks down?

Huo Xuanshan: you probably wouldn't have to?

What is probably? Wei San knew that all the maintenance materials for the mecha in the competition were exchanged from the sponsor, without the need for mecha soldiers to worry, as long as they were responsible for working hard to fight the Star Beast, but now it's unclear when they return to school to test the mecha.

Anyway, you just need to say it was broken when you were testing out the mecha. Liao Runing was completely not worried. You are now the key figure at our Damocles Military Academy, and the school will not care about this money. Once you win the championship, the military expenditure can be doubled several times.

It's like they're sure to win the championship.

After an hour, the person in charge of the host stood on the stage and said, Next is the last challenge, the challenge team F\*\*\* er, F\*\*\*, Flip the Underground factory, pk battle against the champion team Underground Factory Hunter.

Spectator Seats.

Why did this host swear? What happened to the flip Underground Factory?

The name of this challenge team is F\*\*\*, flipping the black factory. Look up at the light curtain.

Originally, they thought the Underground Factory Hunter was already arrogant enough, but unexpectedly an even more arrogant name came up.

Several people released their mechas and stood in a row. The shiny new mecha could be described as a platoon.

Unfortunately, no one in the Underground Factory knew these mechas, and the S grade mechas cannot be seen by outsiders just by looking at the surface. It is only after a battle, comparing speed, and other aspects, that it is easy to gauge.

They've all changed their mechas, the middle-aged man in the VIP box standing by the window analyzed. As expected, they're S-grades.

Chapter 244

I thought they weren't going to attend originally. The person behind spoke quietly while bending slightly.

I sent them an invitation just to take a chance. West Landing and that person, Bowing to Life, their goals were clear and they were both upgrades. They were not interested in the various forces of our Underground factory, and most likely they were descendants of a noble family. The middle-aged man stared at the two teams in the challenge arena, I would rather Bowing to Life and this team would win. The descendants of the noble families would not be interested in the forces of our Sadu Star Underground factory.

The six of them stood by each other, and after the host said to start, the first people to move were Li Que and Liao Runing.

Li Que originally wanted to fight against Wei San, but was stopped halfway by Liao Runing.

Get out of the way, Ill spare your life. Li Que drew out her whip and said coldly.

Liao Runing: ? ? ?

You will spare me? Liao Runing felt that his self-esteem had never been challenged before. Grandpa hasnt even spoken so loudly and unashamedly. Is your fingernail being red so amazing?

When Wei San, who was facing the double S, heard Liao Runings words, she couldnt help but turn her head to look at him and say, Whats this have to do with the red nails?

Li Que was already impatient, and the whip flew straight at Liao Runing, while declaring, Youre looking to die!

Liao Runing dodged, saying, Grandpa is looking for you to die.

There may be nothing else he could do, but Liao Runing never loses on this point. After all, even Wei San, who has a strange personality, is not his opponent.

Wei San used her usual evasion method against the double S grade. Along this entire path, she has quickly and skillfully controlled the mecha while evading the attack of her opponent.

On the other hand, Huo Xuanshan's situation is temporarily balanced against the double S grade. The other side is experienced, and he cannot find a place to start for a while.

In the eyes of outsiders, the team of F\*\*\*the Underground Factory is particularly scattered, each fighting in their own way, without any tacit understanding, but no one happened to be harmed.

The scene was once very ugly, with the audience only seeing a flying mecha, followed by a double S mecha desperately trying to attack. The two cursed each other, and finally, the male mecha soldier who was called F\*\*\*you to Death, actually cursed Li Que so loudly that she didn't make a sound and attacked F\*\*\* you to Death aggressively. The only people who were a bit interested were the other two.

While the audience was speechless, the attack of Li Que failed.

That move was only made by Li Que when she encountered a thorny person. Once she moved, the opponent would surely lose the battle.

The invalid attack seemed like a signal, and the three from F\*\*\* the Underground factory immediately changed their tactics.

F\*\*\* you to Death made continuous moves with his big knife. Her shoulder, upper arm, and right leg are all scarred and bruised, and she even has no resistance.

On West Landings side, he widened his distance from his opponent and fired with a black bow directly at the opponent. The pair of S level stray soldier only had time to cut off the front two bows and arrows, while the arrows coming back directly penetrated their knives and pierced the mecha. Stochastically, he quickly approached him and kicked him off the challenge arena.

All the way until West Landing kicked over, the other party can't even raise a rebellious heart, which is called hierarchical repression.

Just now, as someone who was fleeing from place to place, Bowing to Life suddenly stopped. Suddenly, a long gun popped out of her hand, and she stabbed the other person with her back hand, pulling away her shoulder mecha.

Gradually, someone in the audience reacted, F\*\*\* the Underground Factory team, all three of them are 3S grade mechas!

Three 3S grade Mechas? Are you kidding?

Some of the audience who watched the Hephaestus competition, especially when the F\*\*\* the Underground Factory suddenly turned over. One had already stood by to watch the play, and the other was still beating Li Que. Their eyes couldn't help but focus on Bowing to Life. Looking at them, one of the audience suddenly said, Long guns, knives, and bows are all 3S mecha. Are they the main team of Pingtong Academy?

That shouldn't be right? The person who used the gun in Pingtong Academy was Zongzheng Yue person. If I remember correctly, he was a man, just now, looking at Bowing to Life, she looked like a woman.

This you don't know. Pingtong Academy has always been mysterious. It is said that there are many secret methods, and it is not impossible for men to change into women.

Really? Most people are skeptical.

Of course, 3S mecha soldiers, who knows how powerful they are, becoming a female should also be possible.

That's right, the only one who uses guns is Pingtong Academy. It just happens that the competition has ended in recent days. The 3S mecha soldiers who can use guns on Sadu Star, who would they be if are not Zongzheng Yue from Pingtong Academy.

For large-scale competitions such as the Underground Factory's, tickets are always secretly purchased, and the audience comes from all levels. Ordinary people only have the most basic knowledge of 3S, and it's only regarding the news circulated by Starnet and occasionally from various military regions..

Divine and demon tales towards Class 3S mecha single soldiers are a common thing in the Federation.

As for the rumors circulating among the people after this competition that Zongzheng Yue from Pingtong Academy can actually become a woman, is another matter.

At this moment, on the challenge arena of the Underground Factory, Wei San is recalling the action of Zongzheng Yue beheading the Star Beast in her mind.

## Chapter 245

Due to the lack of resources on Star 3212, teachers have trained students in physical skills and various weapons. Wei San has no hobbies and can use them all, so she has learned all the weapons once. In addition, for a long time, in order to squeeze time to learn mecha construction, she never learned the skills of mecha soldiers another time if she could learn them once.

Two days ago, the main team watched the replay of military academies at the desert field together, and Wei San also followed suit. Because the mecha's own weapon was a gun, it was probably made by a mechanic who imitated the mecha from Pingtong Academy, but could not use a gun, so the mecha was put on hold. Using this mecha, she naturally learned the tricks of Zongzheng Yue.

After removing the shoulder armor from the opponent, Wei San lightly turned her wrist, released her fingertips, and the lance swung around in midair. She held it with her palm facing upward and thrust it forward again.

The opponent thought she was going to attack her mecha chest and crossed his hands in an oblique cross shape, trying to block her gun head.

It was not the chest!

In the mecha cabin, the opponents' pupils contract.

Puchi

With a long gun in her hand, the head of the gun, which was supposed to be facing upward, went straight down and stabbed the knee of the mecha armor. She turned her hand vigorously, penetrating through his knee armor, and then yanked it out.

The long gun has a triangular head, and when taken out, the edges and corners on both sides cause secondary damage to the knee.

Wei San did not completely retract her long gun, but immediately leaned in from this position and hit him on the side of his knee with the barrel of the gun.

More than that

Wei San recalled the details she had observed. Zongzheng Yues move was not just a simple tap. He grabbed the gun body with his wrist and used the Buddhist gun to tap it. The shock force of the gun body continuously tapped the body of the double-headed adder. She couldnt see clearly, but it was definitely high-frequency. The body of the two-headed adder, under half its head, slowed down momentarily, and she suspected that the bones inside the snake were broken.

The gun was fired several times.

Wei San didnt learn this trick well, and she felt that it was a bit regretful in her heart, so she decided to try another knee on the other side.

After she re-pierced her opponents other knee, the gun fired several more times, but it was still not high-frequency.

Wei San began experimenting with her opponent, constantly searching for a feel until her opponent couldnt hold on.

At the other end, Liao Runing was still slowly playing with Li Que.

Why do you always rush there? Liao Runing complained. Your opponent is me, cant I satisfy you?

Huo Xuanshan, standing to the side while watching the show, What kind of words was he saying.

Li Que has become so angry that her chest is depressed. Originally, she was full of confidence and wanted to kill West Landing and Bowing to Life. As a result, she suddenly emerged from this situation. She couldnt even come into contact with those two people. How could she avenge her younger brother?

And she didnt expect them to be all 3S.

I will kill you! Li Ques eyes were red and she frantically waved her whip to attack Liao Runing.

Why do you still want to kill back and forth? Liao Runing hissed and dodged her attack, but was hit with a whip, leaving a deep scar on the mechas arm.

Huo Xuanshan frowned from the cockpit of the mecha, prompting Liao Runing finish earlier.

Liao Runing gradually became serious, and his blade was entangled by the sharp bird whip. He struggled away with no expression on his face and said, I, also, want, to!

Li Ques attacks suddenly increased, and he even had a bit of difficulty in dealing with her.

Huo Xuanshan couldnt stand it anymore and simply joined the game, playing two on one, hoping to end the game early in case of accidents.

When Li Que saw Huo Xuanshan coming over, her eyes became redder and her mouth smiled grimly, Today you all have to die!

Liao Runing almost rolled his eyes. The woman has been saying die for who knows how many times since she came on the stage.

Together, with the two combining their strengths, Li Que was suppressed again. She was like a poor fighting beast, crazy and constantly attacking, especially Huo Xuanshan.

Are you a heartless man who abandoned her? Liao Runing took the time to ask Huo Xuanshan, Why is she rushing to your side?

Huo Xuanshan: Shut up.

Its a bit tricky for them two to suppress Li Que.

Li Que couldnt see the two people clearly, and she only used one force to attack them crazily. Finally, she grinned and ignored Liao Runings attack, directly attacking Huo Xuanshan.

Two people should only use the same tactics as before.

Ah

The frantic cry of Li Que stopped abruptly, she could only let out a shout.

Chapter 246

Liao Runing controls the mecha to bend over and probe, looking behind Li Que: Wei San held a long gun and directly stabbed the other mecha in the neck.

Pulling out the lance, Li Que fell face down, but no one came out of the mecha cabin.

You Liao Runing looked at the scattered soldier double S over there. Why did you suddenly leap over?

Wei San withdrew her spear and said, Subconscious.

Just now, it was unknown why she felt a dangerous force coming from behind so she didnt even think, turned around and stabbed back.

Seeing that Li Que was also defeated, the Underground Factory Hunters surrendered voluntarily at the last moment.

F\*\*\* the Underground Factory finally won the Underground Factory division championship.

This is your prize. The middle-aged man who was in the VIP box just now motioned to his men to bring a box of things over and smiled kindly. 50kg of Xumi Gold is currently the top material used to make 3S mechas.

Wei San rushed up directly and opened it, hoping to see what the top material was like.

Inside the box lay a large piece of complete silvery gold metal, surrounded by cold air.

Xumi Gold brings its own cold and freezing intentions. If made into a weapon, light and cold intentions can hurt people. And the most important thing is that it is said to have growth potential. The middle-

aged man said proudly, Such a large piece of complete Xumi Gold is extremely rare and is a treasure of our Underground Factory.

What is growth potential? Wei San reached out and touched the Xumi Gold inside. It was cold and penetrating, but with a gentle touch, her fingers immediately lost their color.

Its just a rumor. If it can be made into a weapon, it can fluctuate depending on the level of the user.

Huo Xuanshan and Liao Runing looked at each other in the back and said, fluctuating up and down? If Wei San created a weapon, does it mean that she can create a weapon exceeding 3S.

Thank you. Wei San closed the box and picked it up by herself.

Wait a minute. The middle-aged man was stunned and immediately shouted to the three, You only won the division championship. There are twelve Underground Factories in the whole Federation, one in the Imperial Star, and other places. You need to compete with other division championships, and of course, the prizes are even richer than now.

When? Huo Xuanshan asked.

En, Im not too sure yet. Well notify you later. The middle-aged man smiled and said, You dont have to worry. At least until after the competition, it wont delay you watching the competition.

The coincidence was that three people are driving light and heavy medium mechas, and also happened to be 3S mechas, is clear to the middle-aged man, but it has not been exposed to the public.

We'll talk about it then, Liao Runing casually replied.

The middle-aged man nodded kindly and turned away.

At this time, Li Que on the challenge arena was lifted down, her seven orifices were bleeding, and she was unconscious, but her eyes were half open, and her inside was flushed.

Liao Runing scanned Li Que's condition and pestled Wei San with his elbow, saying, Are you so cruel?

Wei San frowned and said, I just broke her perception.

Even if Li Que connected to the mecha seems to have been stabbed through the throat, it is only temporarily mentally impaired. The more experienced the mecha soldier, the faster the recovery time.

Every aspect of Li Que shows that she is an old hand.

I'm leaving, it's very late now. Huo Xuanshan pointed to the box. What about this?

Ill send it to a person first, and when the venue for the next game comes out tomorrow, Ill ask him to help me send it. Wei San was speaking about the shopkeeper on the first floor underground.

The three went to the store together.

The shopkeeper received a generous sum of money from her and said, You want me to mail such an important thing for you? Sick!

Wei San: I have something to do temporarily, thank you for the trouble boss.

All right, all right, alright. The boss waved, Ill definitely send it to you.

After finishing the steps regarding the prize, the three of them flipped over the wall again and sneaked back to their bedroom.

Liao Runing and Huo Xuanshan straightened their backs and went ahead. Wei San waited outside for a long time, but didnt receive any message. Finally, she looked up and walked into the bedroom with peace of mind.

As soon as the door was opened, Jin Ke sat in the middle of the bedroom, Ying Chenghe sat beside him, Huo Xuanshan and Liao Runing squatted beside them, their light heads being confiscated.

Say it, what have you three been doing? Jin Ke kicked a chair at Wei San and said, Come on, speak the facts.

Wei San: I just came back from studying in the reference room. What did they do? She deliberately pointed at Huo Xuanshan and them.

Before leaving at night, she clearly told Ying Chenghe that she would lock the second floor of the reference room and wanted to study quietly.

Dont mention it, Chenghe and I have already watched the surveillance on the second floor, just your little trick, you still want to deceive me. Jin Ke looked like he was interrogating a prisoner.

Chapter 247

The dormitory became still, and Wei San sat in a chair with her eyes wandering.

Wei San is adjusting her mecha these days, so the three of us have gone out for training, Liao Runing explained squatting next to her. You also know that Xuanshan and I often go out for training.

After the training, you guys sneakily flipped over the wall and came back? Jin Ke was frigid. I have the right to check all the schools surveillance. The night before yesterday, you climbed over the wall and went in and out, but today you hid it from us and flipped the wall again. What training activities are you guys engaged in that you cant bring into the daylight?

Liao Runing: He doesnt know the answer to this question anymore.

Its actually Wei San who wants us to experience the pleasure of flipping the wall. Huo Xuanshan spoke seriously.

Wei San: ? Damn it.

Liao Runing: ! I have learned.

Huo Xuanshan has reason and evidence to say, Dont you already know that Wei San likes to flip over walls in the middle of the night. You should still remember about Brother Yebei. She came back at night without going through the main entrance and forcing us to follow her through to flip.

yes, Its I who forced them. Although Wei San was shocked by this superb level of framing and planting created by Huo Xuanshan, in this emergency situation, she could only carry this pot on her back.

However, why did she initially think that West Landing was a naive and innocent wealthy child?

Jin Ke: really? He knew these three people were colluding and talking nonsense, but he had no evidence in his hands.

Tonight, Chenghe should have returned. Jin Ke had originally just casually asked, paired up with the two, and found that these three people were probably going out together. After checking the surveillance, they were indeed together, and they still flipped over the wall from the north view building.

Really, Liao Runing crouched next to her and raised his hand in a low voice.

Then lets forget it this time. Jin Ke stood up and threw the light brain back to Huo Xuanshan and Liao Runing. Sleep!

He knew that Wei San was lying, and Wei San also knew that Jin Ke knew they were lying, but they all pretended not to know.

Wei San lay in the lower bunk, and after a while, she suddenly reacted. She suddenly stood up and asked Jin Ke, Why do you care where we are going? She was confused by the appearance of his three court hearings before.

The competition is not over yet. As the main commander, I have the right to manage all of you. Jin Ke said sternly. The teacher asked me to manage you well.

Wei San shut up and quietly laid down again.

The next day, the five returned to the exercise venue, and the third venue location was selected in the afternoon.

When they returned, Xiang Minghua was talking to Shen Tukun.

Since Wei San is a 3S level soldier, the position as the main member should be hers. Shen Tukun said seriously, The schools will reselect every season, and everything will be based on strength. My retreat is the best choice, and besides I no longer want to miss one game anymore.

He was genuinely happy for Wei San, and even breathed a sigh of relief when he learned that she was at the 3S level.

## Chapter 248

Shen Tukun has been battling for three years, and his other teammates are also working hard, but its not enough. The burden inevitably falls on him, and its too long and also too heavy.

During that time, his world was gray.

This year, four 3S players joined, and the first two games were his most relaxed moments since starting school. However, now that Wei San is a 3S grade soldier, it would be great for her to replace him.

You should handle the position of the school team chief then. Xiang Minghua comforted and patted Shen Tukun on the shoulder. After the next battle, you can go to the military district with peace of mind and follow Colonel Li Zes lead.

Yes.

Looking at the students leaving behind, Xiang Minghua was still worried. The main members were barely able to compare with the Imperial Military Academy, but the strength of the school team may not be enough as they progressed.

There are too many S-grades at the Imperial Academy, which is completely different from Damocles Academy, which has fallen into a fault,

As the difficulty of the competition continues to increase in the future, the school teams roster may be changed, and at that time, at least one-third of the S-grade members in the Imperial school team will be selected.

Any factor can lead to a change in the ranking of the competition.

At the exercise ground, all the military students stood scattered.

The person in charge of drawing the competition venue this time is his father, Jin Ke pointed to Liao Runing and said.

The person responsible for selecting a location after each galaxy competition is usually the most powerful person in the local family.

Wei San: Ying family provides a dinner party, and we can only stand in the exercise ground and watch helplessly in the afternoon. Young master, your family cant do it.

Your family is not good. Come less with that Yin and Yang strange energy, Liao Runing che. Our Sadu Star does not like this extravagant style, simple and diligent is the light of the right path.

Wei San opened a nutritional supplement and turned her head to find what Ying Chenghe and Huo Xuanshan were looking at. She leaned over and saw the introduction of Star 3212.

Star 3212 was an unknown star with only a number. Even on the star network, there is no useful information, only a simple section of popular science, azimuth coordinates, and volume size.

If you guys want to see, we can take a walk over there after the competition, Wei San rambled, holding a nutritional supplement in her mouth.

Ying Chenghe slowly proclaimed, I just want to see what the garbage dump you mentioned looks like.

Upon hearing this, Liao Runing looked at Jin Ke and said, Is the Star 3212 garbage dump not owned by Jin Kes family? He should know.

Jin Ke was still from a wealthy family on Star 3212, at least wealthier than ordinary people, so naturally he couldnt go to the garbage dump without reason.

He bent down and reached out to point at Ying Chenghes light brain, saying, I remember there was a photo that year of dumping and destroying problematic nutrient solution. The photo taken by the media was a Star 3212 garbage dump.

Jin Ke searched for news about the problem of selecting nutritional supplements, and a pile of news popped up. He scrolled through and finally saw the news video he saw that year.

Its here. Jin Ke pulled along the progress bar, until he saw the picture, then paused: Satr 3212s dump.

Four people gathered around and looked, with abnormal silence: this environment was unimaginable and harsh for them.

Huo Xuanshan reached out and enlarged a corner of the photo, saying, Theres a child here.

Liao Runing looked at the child in the photo with thin organs attached to the wall of the garbage dump and instinctively frowned, Federal laws dont apply on your Star 3212 ? How could there be children staying here? Was Wei San picking up nutrient solutions in such an environment?

Before, there were no relevant policies. Children stayed there to pick up things, Wei San explained.

After a while, Ying Chenghe blurted, This child should not have lived to adulthood.

Im perfectly fine, are you cursing me? Wei San turned her head and asked Ying Chenghe.

Ying Chenghe: ?

Chapter 249

I mean, the child in this photo doesn't get enough nutrition and lives in such a harsh environment. Ying Chenghe thought about Wei San going to the garbage dump to pick up waste nutrient solutions, and he felt uncomfortable.

Wei San: this is me.

The other four immediately looked together at the thin, small, and dirty child in the photo, and then looked at Wei San, who was now clean and even grew to 1.78 meters.

This person is you? Liao Runing didn't even know how Wei San survived in this environment?

Me. Wei San spread out her hand, I used to be a bit dirty.

She didn't feel much, the only thing she remembered was that the garbage dump really smelled.

At that time, she was dirty and small, and came to this world in a daze. Her only goal was to eat, and now she has arrived here.

At that time, I went to pick up garbage in the early morning, but they flew a few carts of nutrient solution and poured it down. I picked up a lot of it back and relied on it to survive. Wei San closed the news page, and she smiled and clubbed Ying Chenghe. Thanks to your cousin.

Ying Chenghe didn't speak, and didn't even know what to say.

When his cousin had an accident, he was also seven years old. When he went to visit him, he saw Ying Xingjue lying on the hospital bed with a pale face, motionless, and covered in various tubes. When the sudden onset of the disease occurred, his whole body twitched and his face changed from pale to light blue. The doctors kept changing back and forth, and the adults around him were filled with grief, which left a deep impression on him.

Ying Chenghe has always had sympathy for his cousin because the impression he left in his childhood was too deep.

However, he didn't know anyone else would be even worse off, living in a garbage dump and making a living by eating garbage. The same seven years old, one lived in the sky and one in the ground, the only thing that is the same is their perception level.

What are your expressions? Wei San looked up at the four of them. It's all what occurred during childhood.

I always thought you lived with your parents, Jin Ke found it difficult to describe his feelings. At that time, although Wei San's clothes were outdated, she had no sense of poverty and was even more mature than him.

He has always been thoughtful and directly believed that Wei San had a special background before making a decisive decision to befriend her.

Tsk. Wei San reached out and grabbed a handful of Ying Chenghe's dry and rough hair, then reluctantly released it. As a gesture of sympathy, you guys will take care of my future food.

As they spoke, the school leaders and teachers arrived, and everyone gathered together.

## Chapter 250

The five major military academies gathered in an instant and stood apart. The lead teacher stood at the forefront. Liao Runings father came in from outside, and a light projection lit up behind him. He turned around and raised his hand to press down on it. The galaxy name in the middle of the light curtain began to rotate continuously, and finally stopped.

The third venue of this years Hephaestus Grand Prix is Gu Yu Star. After that, Liao Runings father turned and went down, waiting for one minute and forty seconds for the light projection to turn and stop.

Wei San turned to Liao Runing and said, Your father was forced to participate?

It was voluntary, he just doesnt like to talk in public. Liao Runing looked at his fathers distant figure and immediately recalled those people who were hurt by his fathers straightforward words in those years.

The two of them muttered, causing many teachers to look at them.

Gu Yu Star rains all year round, and the rain contains corrosive substances. The soil and plants on this planet have adapted, but if the people do not take protective measures, and they stay in the rain for a long time, their skin and respiratory tract will be damaged. The shell of the mecha can withstand rain damage, and the mecha engineer only needs to modify the mechas circulation system. They also need materials, if the main commander replaces them with resources.

Therefore, as soon as this arena emerged, all military academies were immersed in contemplation.

At this moment, there were still people gossiping and naturally receiving the attention of all the teachers.

I feel theres a murderous aura. Liao Runing whispered.

Wei San raised her eyes and saw the teachers of various military academies staring at them. She raised her right hand and silently greeted the teachers.

Xiang Minghua took the lead in shifting his gaze: Forget it, you cant argue with Wei San, otherwise you will be angered to death.

Due to the absence of a dinner banquet, Liao Runing and his father only took one minute to complete the third round of the selection, and the dissolution of the five major military academies was exceptionally fast.

Do we have enough materials to exchange? Huo Xuanshan asked Jin Ke.

Not enough. Jin Ke shook his head, at the desert arena, they managed to kill two 3S star beasts, only to provoke the boss. The adult female double headed viper who they were about to kill at the end could not be counted in the exchange resources. The only comfort they received was that they had won second place in the competition.

Jin Ke explained, We have changed the materials required for other venue environments to prevent difficult venues from being drawn in the early stages. Although Gu Yu Star is difficult, it can be carried first, and other military academies may not necessarily have changed the materials required for Gu Yu Star.

Ever since many years ago, Damocles Military Academy has been in a state of resource scarcity in every competition, and the main commander can only use his mind to choose the exchanged resources.

The ten day competition period allows for a maximum of 12 hours without any protection from the human body, and the 3S grade can be extended to two days. Ying Chenghe said, This time we have the second chance. We can find the Star Beast earlier than the later military academies, and change the materials at that time.

It depends on whether the Imperial Academy has changed the materials for the circulation system. If not, the Star Beasts are not our turn. Jin Ke doesn't know what materials the Imperial Academy has exchanged for, and the footage of exchanging resources won't be broadcasted.

After confirming the third venue, all other military academies set off to Gu Yu Star, where there were still people living, but there were not many people coming and going on the streets.

The team at Damocles Military Academy has decided to stay for a few more days, waiting for the doctor to prepare the nutrient solution for Wei San.

Wei San and Ying Chenghe returned to Damocles Military Academy, where she went to learn from Yu Qingfeis tutorial. Ying Chenghe continued to help her adjust the mecha parameters.

Wei San still has a limited understanding of the construction principles of the 3S mecha and cannot repair it herself. It is best to entrust it to a professional.

She has been staying on the second floor of the reference room these days, drinking one nutritional supplement after another, and her nose bleeding is becoming a habit day by day.

Her perception is gradually stabilizing, but the detection instrument is still S-grade.

Anyway, she can learn the course of Yu Qingfei. Coincidentally, she started with the materials and introduced the weapon making method. Wei San doesn't have any mecha materials and doesn't have enough time to make new mecha now. She wanted to seize the time to learn more weapon making techniques and use that box of Xumi gold at Gu Yu Star.
