

Smash All 251

Chapter 251

Wei San, you stayed inside Ying Chenghe came in and turned off her brain interface. For seven hours

I made some materials and thought of Gu Yu Star and turned it into a weapon. Wei San casually wiped the blood from under her nose and got off the platform.

Ying Chenghe said, Where did you get the money to buy materials?

Wei San: She had a slip of tongue.

Last time, you went out with Xuanshan and Runing to get materials? Ying Chenghe handed her a wet tissue to wipe her hand. I wont tell Jin Ke.

Anyway, you can help me handle it together when the time comes. Wei San pulled the topic away.

I am the main team mecha engineer and naturally have an obligation to help you handle your weapons. Ying Chenghe asked her, What materials?

Wei San: Youll know when we get there.

The two of them finished their meal in the school cafeteria, and Ying Chenghe asked her to try Zhu Jiang.

Wei San was a bit surprised when she went in and saw Zhu Jiang. Obviously, this mecha is still the same as before, and it was unknown where it should have been changed by Chenghe. It seems that the mecha has come to life from the silence.

She jumped into the mecha, put on her helmet, and closed her eyes to release her senses. Every strand of perception begins to continuously extend beyond the mecha, all in an instant.

Wei San controlled the mecha to jump forward, put her foot on the wall, and with a jump, turned and rolled in the air, then suddenly stopped.

Its easier than before. The mecha landed, and Wei Sans voice came through the mecha.

Ying Chenghe nodded and said, The previous parameters were still used by the senior. His body data and movement habits are different from yours. Its normal for you to feel uncomfortable before changing them. Test out the weapons. Senior used a big knife, and I made some changes. Wait there and youll see what weapon you want.

Wei San tried it all over again, but there were still small details that needed to be adjusted on site. She came out and waited for Ying Chenghe to handle them.

I have made some protective changes here. Ying Chenghe pointed to the vicinity of the mecha engine and slowly explained the principle, with the intention of teaching Wei San.

At first, she listened very attentively, but later on, the more she listened, the more inappropriate it became. She always felt a sense of familiarity with the formula.

These are all things you learned from Yu Qingfei? Wei San asked tentatively.

Ying Chenghe turned his head and said, Not entirely. Some of these tips were taught by teachers who were hired from the Ying family in the Imperial City Star, and there is also a strange person I met on the Rubiks Cube forum before.

Wei San: Oh no, its just the people around me. Even the netizens I met on the previous forum are on Sadu Star.

Ying Chenghe and Wei San, who had a strange expression, turned their gaze and suddenly realized, Is it you? !

The ID poor man with no money to make mecha has a surprisingly similar style to Wei Sans ID Secretly begging for food. Previously, Cheng He didnt associate it with it, but now standing in front of him, he suddenly realized the commonality: IDs can exude a sense of poverty, building a mecha doesnt have a sense of beauty, and exudes a sense of obscenity.

Ying Chenghe still remembers that time in the training room of Imperial Star, when Wei San suddenly flashed her modified weapon, a fierce and powerful sword that suddenly split open from the middle, emitting a high-speed rotating drill bit. The painting style suddenly changed, and the mecha beauty he had built for many years was destroyed, leaving only one feeling: there is such an ugly weapon in the world.

Wei San:

It turned out that she had fallen into the nest of the main team at Damocles Military Academy early on.

Ying Chenghe was also in a complex mood. He never expected that poor man with no money to make mecha would be Wei San. At that time, he had always regarded the person behind this ID as a middle-aged man with some strength whos raising a young cub.

I used another ID account to privately chat with you before. Ying Chenghe remembered something, Why did you block me?

Wei San was stunned and said, Is that the person who I pulled into the black list also you? I thought she was trying to hook up with me and cheat a poor person out of money.

Ying Chenghe: .

The two of them remained silent, desperately recalling whether they had said anything they shouldnt have said.

then you should study mecha construction well and design a mecha that suits you in the future. Ying Chenghe now believes that Wei San may become the first person in the Federation to double major as both a super 3S soldier and engineer.

Previously, Chenghe treated Wei San constructing her own mecha as a hope, as transforming weapons and designing mecha completely independently were two different things.

After the military academies had arrived at Gu Yu Star, the doctors finally delivered the specialized nutrient solution. That night, the Damocles Military Academy team boarded the starship and set off to the star where the third competition was located.

It will take a few days to travel from Sadu Star to Gu Yu Star. During this period, Wei San followed the doctors advice to drink three nutrient solutions a day before meals.

The others quickly discovered that Wei San no longer had a table full of vegetables while eating, but had twice as much as the normal person.

The doctor said that if she receives enough nutrients and trace elements in her body, her stomach will no longer be like a bottomless pit, and if she recovers well in the later stage, she should be able to eat as much as an ordinary person.

How do we train on Gu Yu Star? Wei San asked Jin Ke, who was looking at the map of Gu Yu Star.

Chapter 252

Well simulate a similar environment for physical training, and at that time, a reagent will be placed on the ceiling of the training ground, causing the illusion of skin burning and respiratory damage. Jin Ke quickly moved the star map and divided his attention to state.

Which teacher will lead us?

Jin Ke stopped his hand and clicked on one of the parts of the open star chart: This physical training is lead by Teacher Jie Yuman, Liao Runing has been trained to cry by her before.

Pop!

Liao Runing pulled off a slipper and threw it at Jin Ke, saying, How many times have I said it, that was just sweat, it just slipped down from my eyes.

Wei San sat cross legged for a while, rubbed against Ying Chenghes side, took out the notebook from her arms, opened it for him to see, and all the records inside were her doubts about the mecha: Ill leave it to you, remember to return it to me after reaching Gu Yu Star.

What thing? Liao Runing wanted to get mixed up in everything.

Ying Chenghe closed his notebook and put it away without showing it to him.

When they arrived at Gu Yu Star, it was also night. Someone came to pick up the students there. After they arrived at the Gu Yu star exercise field, they did not immediately rest. The main team went to confirm the field.

Firstly, there is a large mecha training ground and physical fitness training ground. Then, five people walk to the exercise ground building, where there is a personal room required by the three department students. They need to confirm the room and equipment.

The air here smells very strange. Huo Xuanshan said from behind.

It is a disinfectant specially added to distinguish it from the outside air, Jin Ke explained, Gu Yu Star has too much acid rain, there would be a feeling of burning skin, but with long term inhalation of the polluted air outside, there will be no special reaction until it reached a point where it destroyed the human body.

We will confirm the equipment in the room separately. Ying Chenghe said

The building of Gu Yu Star is even more cramped than Sadu Star, with insufficient space. The structure of each floor is distributed in three series rooms, not just for students from one department, so the rooms of the five major military academies are all disrupted.

Wei San is responsible for inspecting floors 9 to 16. She looks at each room and confirms that the number of equipment inside is correct and undamaged before moving up to the next floor.

The assigned name and military academy were pasted on the door of the room. Wei San went all the way up from the ninth floor to the fifteenth floor, but unexpectedly did not see anyone from the main force of Damocles Military Academy. She has seen several names of the main team members of Samuel Academy and South Percy.

Wei San thought aimlessly and walked up to the 16th floor.

Pingtong Academy's people, South Percy, Imperial half way through, Wei San finally saw a mecha engineering room belonging to Damocles Military Academy.

She went in to check and came out to continue walking forward.

Wei San's footsteps suddenly stopped and she saw her mecha unit room, ready to push the door in to check the equipment inside. She suddenly remembered to look at the neighbors on both sides.

Looking to the left: Zongzheng Yue.

Tsk, they're actually from Pingtong Academy. Wei San actually dislikes the people in Pingtong Academy the most. Compared to the publicity of Samuel Academy and the arrogance of Imperial Academy, Pingtong Academy appears silent on the surface, but in reality, they are all more arrogant.

The people at the Imperial Military Academy are arrogant, and Wei San can understand it a little bit. After all, having won the championship for so many years, it is inevitable for a person to have arrogance, not to mention the many aristocratic families behind the Imperial Star, and the number of S-grade students at the military academy is several times higher than that of other students.

The pride of Pingtong Academy does not come from strength, but rather from bloodline.

Excluding outsiders from entering military academies, the class is strict.

The Imperial Academy will accept the same number of unknown star students as other military academies, but will not provide special treatment. Everything depends on strength and ability to stay. Like Tai Wude, they can even push down dual S-grade soldiers. Due to fierce competition, unknown star students without experience and influence are eliminated the most.

Different from Pingtong Academy, there are not many spots for students without famous stars to enroll from the beginning. They can register, however, they will require students without famous stars to pay a huge sum of money to purchase the school's mecha, which is known as the inheritance of their famous mecha bloodline and cannot be voluntarily dropped out, which is not included in the elimination rate.

These news were only later learned by Wei San from Huo Xuanshan. She should be grateful that she did not choose Pingtong Academy at that time, otherwise she would have voluntarily dropped out of school.

She looked to the right again, but before she could see it clearly, the door suddenly opened from inside and a person walked out.

Wei San instinctively whistled, long and loud, and the entire corridor echoed once.

Enshe finally did what she wanted to do on star 3212 before.

Ying Xingjue, who walked out of the room, quietly looked at Wei San across from him, unaffected by her whistle, and for a moment whispered, Even if you're a 3S, Damocles Military Academy won't win the championship.

Wei San raised her eyebrows and said, Don't you know? Our goal for Damocles Military Academy this year is to come to third place.

Ying Xingjue's handsome eyebrows and eyes slightly twisted and said, "The entire staff of Damocles Military Academy is currently 3S, and you don't even have the courage to compete for the championship?"

Wei San squinted and looked at him strangely, "Since the Imperial Academy is going to win the championship, we won't compete. What are you angry about?"

Ying Xingjue remained silent for a long time, throwing down a cold sentence: "Not angry."

Wei San looked at Ying Xingjue's back as he left, confused. "What did he mean?"

"Didn't he just declare war first and then turn back himself with his strange energy, how did he achieve this effect?"

It couldn't be that the fire of the Empire hoped that Damocles Military Academy would win the championship.

Chapter 253

After checking all the rooms and confirming that the equipment inside was correct, Wei San went down to meet with the others and found that the five people were on different floors. However, there were many people from her own military academy next to or across from her, and only she was sandwiched between the main members of the two military academies, as well as people from other military academies across from her.

Wei San: I always feel that my future training is in crisis.

Dont worry, we dont come here for training every day. Most of them are still together in small teams, Jin Ke comforted her, Along the way, you can also deepen your relationship with your enemies, and observe Zongyue Zheng and Ying Xingjues small movements.

Now, Jin Ke is not worried that Wei San will be controlled by other main commanders. A super 3S mecha soldier, except for Ying Xingjue who is in the same super 3S, theres no need to pay too much attention to others.

There is a door in the private room. Do you want me to crouch at their door or touch it to see? Wei San expressed dissatisfaction with Jin Kes perfunctory behavior.

Huo Xuanshan remembered something: As a super 3S commander, Ying Xingjue has extremely strong perception ability. Wei San is in the room next to him. Although the wall of the room is equipped with a surveillance net, wont he still be aware of all movements or will she be controlled by attacks?

Last time at the desert arena, Ying Xingjue fully demonstrated his perceived strength, not only detecting the movements of three alienated double headed vipers, but also attacking and controlling male double headed vipers, which is equivalent to the existence of a super 3S star beast.

Teacher Xiang has added sensory barrier training to her. Jin Ke is not too worried about Ying Xingjue taking action. Just now Wei San mentioned to the people around her on the 16th floor, and only Ying Xingjue is the main commander. Whoever perceives a problem is bound to be related to him. Moreover, the exercise field of Gu Yu Star was built by Yu Qingfei and later renovated by Gong Yiliu. Although it is ancient, its sturdy and protective performance ranks among the top few among the twelve stars

After the several people have inspected, they will return to their dormitory to rest.

The next day, the door of Wei Sans room was banged, and she suddenly got up to open it. The other four members of the main team stood outside waiting for her.

I'll go change into my training clothes. Wei San closed the door again, neatly changed her clothes, ran to wash herself, and finally opened the door. All done.

Fortunately, the first training class was not Teacher Xie, otherwise I wouldn't have knocked on the door just now. Liao Runing gestured to Wei San to see his outstretched foot, I would've broken through the door directly.

Wei San glanced down and then reached out to step on it.

Upon seeing this, Liao Runing immediately withdrew his foot and kicked back.

The two simply started fighting, moving forward, and the three behind them were purely watching monkey shows. The first class is a simulated environment physical training, where the school team and the main team work together, without the use of mecha, and there is also a scaled down Star Beast Shadow Attack.

Raindrops keep falling from the ceiling, which was fifteen meters high, and everyone was locked together to fight against the Star Beast Void Shadow.

Wei Sans hair was the first to get wet. Due to the special material of the training suit, it was waterproof and heat-resistant, but raindrops will flow down the hair and into the neck, increasing the sensation of burning the skin.

She held a virtual knife in her hand that was the same as Zhu Jiangs weapon, but the proportion was also reduced to be suitable for human use, giving her a realistic grip.

This feeling is actually virtual.

Chapter 254

She stood in a triangle with Huo Xuanshan and Liao Runing, facing the star beast shadow from all sides, protecting Jin Ke and Ying Chenghe in the middle.

The raindrops continued to fall, and their eyes couldnt even open. Their faces felt like they were rolling in an oil pan, with a burning pain, and their bodies were no longer much better. More seriously, they had respiratory problems, and as the battle lasted, they gradually couldnt breathe.

The members of the school team in the back have already started to fall, have been fed by the teachers, and will automatically be eliminated when they get up.

Wei San was in pain all over, and her emotions gradually became irritable. She didnt need to use any tricks afterwards. She could do whatever she could to harm the star beast, and various techniques were used repeatedly.

Li Ze looked at the standard combat moves of the main team of three, two of whom would not make any mistakes. As for the other oneshe had already ridden onto the star beast, carrying a large knife and directly wiped its neck.

Not to mention that, another star beast came from behind, and Wei Sans broadsword was shot down. She was about to pick it up and almost got attacked. The knife needs to be picked up, and the star beast also needs to be dealt with. Coincidentally, the virtual shadow of the star beast rushed over, and Wei San used both hands and feet, even using her mouth in the end.

Complete hooliganism.

This is a star beast, she actually bites directly with her mouth, if exchanged for a star beast with a hard shell on its head can break her teeth.

Li Ze: At the thought of teaching such a student, he seemed to have anticipated the ridicule of his colleagues.

Ever since her enrollment, she has been studying orthodox college skills. Why is she now acting like she came from a wild background? The teacher next to her looked at her and questioned her soul.

At first, she can still perform a few orthodox moves, but later on, she completely messes up and can even use her mouth.

Li Ze: Perhaps some people are born wild and cannot come back. Its okay, there are so many teachers accompanying him.

For a moment, there was no teacher to refute, and they all assumed that what Li Ze said was right, and at this moment, their inner activities were synchronized with that of Colonel Li.

Almost done. Xiang Minghua looked at the time and said, The school team has changed for a few rounds, and the main team has reached break time.

Li Ze: Let them shut down the system.

The virtual shadow of the entire training ground disappeared immediately, and the raindrops also disappeared.

Wei San reached out and touched her wet hair, feeling that the burning sensation had never subsided.

Xiang Minghua handed them each a solution and said, Drink it, what drips on you is just ordinary water. But there was a hallucinogen added inside.

In the afternoon, after you finish your teachers class, Wei San will continue to stay. A teacher will come over and teach you how to establish perceptual shielding, Xiang Minghua said after staring at them.

Wei San asked, How long will it last?

Class hasn't started yet, yet you ask the time first. Xiang Minghua hates iron that she cannot turn into steel. I've never seen someone like you before.

Teacher, strictly speaking, you haven't seen a super 3S mecha single soldier like me. Wei San gave herself a thumbs up and said, Wei San, just one word

Badass, I know, Xiang Minghua interrupted with an expressionless expression.

Wei San: genius

At lunchtime, Wei San received a message from her light brain and immediately got up to prepare to leave.

Chapter 255

Before slipping away, she even gave Chenghe a look, indicating that her materials had arrived.

Liao Runing clamped a chopstick of food and asked, Why did Wei San just flirt with you?

Ying Chenghe said, She probably just had a cramp in her eyes.

Wei San didn't hear what Ying Chenghe said, otherwise she would shake him and ask where the tacit understanding between the two went.

The Xumi gold that the shopkeeper helped to send has arrived, but due to its special location, Wei San can only carry it all the way back from the entrance of the exercise venue.

A military academy student swaggered through the market holding such a large box, and during the break time of the five major military academies, many people saw it.

Is Wei San holding a large box?

Is it her mecha material?

Where would she obtain the mecha materials? Damocles Military Academy must have prepared a 3S mecha for her.

Tsk, now shes switching seats with her senior who has played for three terms. I dont know if he might have an imbalance in his heart.

The rules of the competition need to be changed. Changing positions is equivalent to changing substitutes. Who knows where she modified her mecha after the two matches? She can still use the resources of the military academy team.

I think the next session will definitely change the rules after such a fuss at Damocles Military Academy. We military academy people are not fools.

Wei San carried the box back to the dormitory and sent a message to Ying Chenghe, saying that Xumi gold had arrived and would ask him to help take him to his renovation room later.

Ying Chenghe received the news as he had just finished his meal and heard from others that Wei San was holding a large box,

Master Chenghe: [Dont tell me, the big box youre holding contains Xumi gold.]

Secretly begging for food: [Its exactly Xumi gold, whats the matter?]

Ying Chenghe: [such a valuable thing, did you mail it over?]

She even walked around with great fanfare.

Secretly begging for food: [Oh, this is fine. I opened it and looked at it. The Xumi gold is fine.]

Ying Chenghe: [Forget it, lets not talk about this. Youre holding a big box, how much Xumi gold is there inside?]

He thought there was only one thing, after all, Xumi gold is a rare material that can enhance the performance of weapons with just a little.

Secretly begging for food: [50kg, should be enough to strike a pair of weapons.]

Master Chenghe: [where did you get so much Xumi gold? Did you rob someone?]

Chapter 256

During his lunch break, Ying Chenghe entered Wei Sans room and saw a large square cardboard box inside. He looked closer and even noticed a footprint on the side of the box.

Is this really Xumi Gold inside?

Ying Chenghe opened a complex cardboard box with a silver white cold chain box inside, a box specifically designed to store special materials. The price of this type of box is not cheap, so he has only one-third of the belief that it may contain Xumi gold.

Taking out the silver white box, Ying Chenghe carefully opened it, and a cold and evil aura came towards him, which is a material attribute inherent in Xumi Gold.

It is indeed a big piece of Xumi gold.

Ying Chenghe squatted on the ground, staring at such a large piece of Xumi gold a daze. He had never seen a 50 kg piece of Xumi gold before.

When he first returned, the news that several military academies had taken Wei San with a large box and strolled around the entrance of the exercise field had changed. It was said that Damocles Military Academy was now very arrogant, and during the hard training of the main teams of various military academies, the 3S mecha soldier Wei San, who had restored her true identity, did not go to training and still went shopping on the Star Net.

As is well known, the Federal express specializes in transporting food, drink, and entertainment items, and has nothing to do with mecha.

In this regard, Ying Chenghe just wanted to say that even if Wei San is not a 3S mecha soldier, she has not kept a low profile.

What are you doing running to Wei Sans room for? Liao Runing followed Ying Chenghe in after much trouble.

As soon as he spoke, Huo Xuanshan from the living room came first to watch the excitement, with Jin Ke following closely behind.

Liao Runing turned his back to the two of them and looked towards Ying Chenghe. When he saw Xumi gold, he subconsciously said, Its amazing that it really was mailed over.

Jin Kes gaze twirled between the three people in the room, and then coldly said, So what is the box Wei San just held? You all know what it is, only I dont know?

Ying Chenghe took the lead in taking himself out and said, Wei San said she has a need for money and asked me to help her design mecha weapons. Im not sure where this comes from. Its not his business, hes just a serious and responsible main team mecha engineer.

Jin Kes gaze shifted to Liao Runing without asking him, Instead, he directly stated ones own inference: You know what Wei San is sending over, and Huo Xuanshan should also know. Just now, his face was pretending to be surprised and too fake. Since both of you are aware of Xumi gold, it means that you three have something to do with the source of this material. We started the competition more than two months ago, and during that time, there were only two days when you flipped the wall on Sadu Star. I dont know what you three did, so you went to get Xumi gold in those days.

Liao Runing: At this moment, what should he say to save it?

Jin Ke continued to speculate, Such a large piece of Xumi gold is not available everywhere, at least not in the world of Sadu Star. Even if placed on the Imperial Star, the appearance of Xumi gold can still cause a sensation. If you silently obtain such a whole piece, there is a 70% possibility that it is an underground channel.

Liao Runing didnt expect that he had only said one sentence, and the old information was almost cleared. He quietly leaned towards Huo Xuanshan, trying to draw a little strength.

Jin Ke lowered his head and opened up his light brain. As the main commander, he was usually best at integrating various channels of information before drawing conclusions.

They are highly likely to have obtained Xumi gold from the underground channels of Sadu Star, and Jin Ke is checking the news of several large underground channels he has in his possession.

Five minutes later, Jin Ke read the above message word for word: The champion prize of the Sadu Star Underground Factory competition is Xumi Gold. It was won by the F*** the Underground Factory team.

Subsequently, he looked up at Huo Xuanshan and Liao Runing and said, The team name has been well named. There are three members, and the ID of Bowing to Life appears to be Wei San. The ID of Huo Xuanshan is West Landing, and as for F*** you to death it must be Liao Runings ID.

Hes saying the names followed by surnames, was this anger? Liao Runing looks at the ceiling with some heart palpitations.

Ying Chenghe consciously escaped from the storm, and Jin Ke did not hide his light projection. He got up and leaned over to watch the excitement.

He recognized the three 3S mecha as soon as he saw it: This is the mecha from our collection room at Damocles Military Academy.

Adding fuel to the flames.

Jin Ke let out a chuckle and said, Wei San wants materials to make mechas, so when you three come together, will you go to the Underground factory to play in the Underground factory competition?

Huo Xuanshan explained, No, we already met before participating in the competition.

Ying Chenghe said, When you first met on the starship side, it didnt look like you knew each other.

The explanation of this matter is quite complicated, Liao Runing interjected.

My mood is also complex now, Jin Ke looked at him expressionless.

Liao Runing walked behind Jin Ke and rubbed his shoulders and back, saying, All of this is a coincidence, really. Since we have obtained the Xumi gold now, let Ying Chenghe make the weapon for Wei San, and then punch Samuel, kick Pingtong Academy, and compete with the Imperial Academy for the championship.

Not me, Wei San will create it herself. Ying Chenghe corrected his statement, She is a soldier and engineer double major.

Liao Runing: ? ? ?

Chapter 257

Huo Xuanshan said, What does it mean when Wei San is a double major?

On the surface, Wei San can still design mechas, but currently she only knows how to design A-grade mechas. She has just come into contact with the 3S, and I can only guide the weapons nearby. The design is still her own. Ying Chenghe looked at Huo Xuanshan and shocked Liao Runing into surprise. You have known each other for so long and still form teams to play games, dont you know?

Jin Ke has always known that Wei San is interested in designing mecha, but it is not clear that she can independently design A-grade mechas: Can she make weapons for 3S mecha in such a short time?

It should be possible, shes making rapid progress. Ying Chenghe nodded.

Huo Xuanshan suddenly said quietly, Wei San once told me that she has a friend who is a mecha engineer and can transform mechas.

For some reason, Jin Kes mood improved a bit: Usually, when Wei San says she has a friend, it would be herself.

Huo Xuanshan The mecha has indeed been well modified, but in the current situation, he feels the subtle emotions of Jin Ke just now.

Its like a complex and subtle emotion that a friend shares a secret with another friend, but only he doesnt know.

Liao Runing finally concluded, Wei San is too scumbag.

Rare, the other three people present all agree with Liao Runings statement.

Wei San, who overturned her car, is completely unaware. She is at Li Ze's side, having a video consultation with a doctor.

Is your nosebleed still flowing? It's okay. The doctor signaled to Li Ze that he could remove the instrument clipped on Wei San's finger and ask him to report the value. You usually drink nutritional supplements and fluids. During this time, I need to go to other stars to find suitable medication. Once I find it, I will find you.

What other medication should I take? Wei San felt that she was now full of energy and was completely normal in all aspects except for a slight increase in nosebleeds.

The nutrient solution was only temporarily formulated by me based on the composition of the specialized nutrient solution used by Ying Xingjue before. Your situation is different from his, and we need to make improvements in the future. The doctor said seriously, During the competition, according to the regulations, you can only use the contents of the combat readiness bag, and the specialized nutrient solution cannot be brought in, so you need to prevent yourself from becoming crazy. It is a heavy burden on the body to completely improve your perception in one go.

After listening, Wei San asked, Does Ying Xingjue not use specially made nutrient solution in competitions?

He will drink before the competition, as long as it doesn't exceed fifteen days, he can completely hold on. Li Ze provided an explanation from the side.

The doctor recorded the data measured by Wei San: In short, using a 3S mecha is possible, but avoid getting too excited. Once you feel a sudden pull up, your body will collapse. Remember this.

After the doctor instructed her, he turned off the communication and the light projection in front of Wei San dimmed.

Her current perception level measured by the instrument is still at grade S.

The doctor said this is a good thing, indicating that her body is slowly recovering. Now that she adjusts her body foundation, her perception should automatically rise in the future. As for the ability of S-grade perception to manipulate the 3S mecha, doctors speculate that because she is a super 3S perception, she is different from ordinary people.

I heard you are very confident in the competition and still in the mood to buy things and receive packages, Li Ze said with a hint of confusion as he put away his measuring equipment, your previous oath at Damocles field, I took a look at it, and hope you can meet it.

Wei San hesitated and said, is it not possible to receive express delivery?

Li Ze: You can.

Wei San breathed a sigh of relief and said, Then its okay.

What did you buy? Li Ze suddenly asked, purely out of personal curiosity.

Because he doesn't know if Wei San will do any more dirty tricks.

Snacks. Wei San took the initiative to take on the rumor and even politely asked Li Ze, Colonel, do you want me to share some with you?

After returning, she needed to communicate with Ying Chenghe in a series of ways, so that others may think it was the materials obtained by Ying Chenghe, so that no one will find out that she and Huo Xuanshan are fighting in the Underground factory.

Li Ze doesn't seem like a person who can eat snacks, and he is an iron-blooded soldier who never takes anything from students.

Okay.

Okay, then I won't. Wei San said halfway before realizing that Li Ze actually agreed to her snacks.

You won't what?

I'll send it over soon. Wei San said forcefully. Teacher, I should go for training now. Goodbye.

As soon as she left, Wei San immediately boarded the Star Network Mall and ordered a bunch of snacks.

Wei San created a mess and went straight to the training ground after her lunch break. This time, the teacher was switched to Jie Yuman, and only five students from the main team came to train.

As soon as she passed by, she saw Jin Ke and they were already there and went up to say hello.

The four ignored her.

Wei San reached out and waved in front of the four people, What are you doing?

Liao Runing couldnt hold back first: Isolating you.

Wei San: ? ? ?

Chapter 258

She only heard such words in kindergarten in her previous life.

Jin Kes face was frigid, I already know about the activities of the three of you.

Huo Xuanshan: So the friend you know who can transform mecha is yourself.

Wei San stood in place, reacting for a while before she knew what the two of them meant.

She immediately let out a long sigh and said, If it werent for poverty, who would have gone to the underground competition?

This statement has a great killing power.

Originally, Jin Ke was the person with the most guilt when he knew that Wei San was an orphan and relied on the problematic nutrient solution from the garbage dump to make a living.

Wei San was satisfied to see Jin Ke take back his frozen face and sighed in the direction of Huo Xuanshan, Although I was poor at the beginning, I had a positive and diligent heart. I accepted your 50 million yuan, and in order to strive for perfection, I even offered some of my own money. I couldnt afford meat for a month.

Huo Xuanshan is not aware of this matter, but the level of mecha modification is indeed comparable to any A-grade mecha engineer on the market.

Im sorry, Huo Xuanshan thought at the time that Wei San came from a scattered academic family and didnt care about that little money.

Ying Chenghe took the initiative and said, Then Im still good. Ill give you an S-grade mecha engine for free.

When did you send Wei Sans S-grade engine, wasnt it a middle-aged man you met on the forum? Jin Ke asked Ying Chenghe and squinted at Wei San. How many vests did you create?

Wei San: This frustrating day.

Jin Ke said coldly, You talked to them privately and isolated me.

Im not, Im didnt. Wei San denied. At this moment, she decided to bring disaster to the east and turned her head to Liao Runing, saying solemnly, F*** F***, theres something I havent told you yet. Im very sorry in my heart.

Liao Runing next to her was puzzled and said, Whats the matter?

Wei San said in deep pain, We have a group chat of four, and you are not in it.

Liao Runings fist hardened and he said, When did this happen?

Wei San: Its been a long time, while still in the Imperial Star, Jin Ke took the initiative to bring Xuanshan in, but he didnt pull you in.

Little fatty, I knew you couldnt stand me! Liao Runing said to Jin Ke.

Who are you calling Little fatty? Jin Ke heard the word fatty and immediately exploded. He was clearly a handsome young man now!

Wei San took a step back and left the battlefield to the two of them, hiding her achievements and fame.

Finally, with the successful addition of Master Liao to the fours group chat, the war ended.

Jin Ke calmed down and demanded that he also join the F*** the Underground Factory. As the name suggests, they need the overall coordination of the main commander.

You still need a mecha engineer, Ying Chenghe recommended himself.

Five people reached an agreement.

You won the championship and used Xumi gold as a weapon. The competition was broadcast live, and the people from Sadu Star Underground Factory should quickly recognize the identities of the three of you. Jin Kes first thought was about identity.

Dont worry about Xumi gold, Ying Chenghe said. Although Xumi gold is rare and rumored to have growth potential, it is useless for the vast majority of soldiers. This has always been just a gimmick.

Perception does not grow, so weapons made of Xumi gold generally never grow.

In this way, Xumi gold is simply a customized material for Wei San.

Ying Chenghe listed several materials and said, The performance of these materials is similar to that of Xumi gold. Only the opponent can feel the subtle differences, which ordinary people cannot observe. The 3S mecha you use in competitions cannot be recognized as a mecha within Damocles Military School unless there is a teacher from the mecha engineers.

Their three 3S mecha soldiers will definitely be discovered when they appear in the competition, Jin Ke shook his head. Two men and one woman's 3S mecha soldiers, there's only you guys.

Wei San coughed and said, Are there any 3S mecha female soldiers in Pingtong Academy?

Jin Ke: Why do you ask that?

Wei San, Liao Runing, and Huo Xuanshan were momentarily unnatural.

Someone mistook me for Zongzheng Yue, Wei San said in a low voice.

Jin Ke: ? Unless he is blind, how can they recognize Wei San as a tall Zongzheng Yue?

Chapter 259

Many viewers believe that the people in Pingtong Academy have a secret method that can make people feel like men or women, Wei San heard gossip from the shop owner.

Ying Chenghe remembered something: The younger sister of Zongzheng Yue is enrolled in the second half of the year, and she is also a 3S grade.

Jin Ke: I will handle this matter. Chenghe, teach Wei San to disguise the performance of the weapon.

He wants to spread various news, confuse the public, and temporarily conceal the fact that Wei San and several others are competing in the Underground factory, which will be beneficial for the competition.

What are we discussing together? Jie Yuman walked in and asked the five people standing together, I dont see how good the relationship is.

Jie Yuman stood in front of the five people and said, The other four know me, and I also know you, Wei San.

Wei San quietly glanced at the few people next to herself and found that they all looked up and straight ahead, completely without the ease they had before.

Where are you looking? Jie Yuman walked over in the direction of Wei San and reached out her hand to pinch her chin, straightening it.

Wei San: If Chen Ci has the sharp and bright temperament of a shooter, the current Jie Yuman is gorgeous and cold.

Jie Yuman relaxed her hand and took a step back: My training doesn't have so many famous moves, just fight with me.

As soon as she finished speaking, she suddenly attacked Wei San.

Wei San didn't even notice the sound of air flowing, as if Jie Yuman suddenly appeared in front of her.

Quickly retreating, Wei San tried to evade Jie Yuman, but in the next second she discovered that she had already turned behind her.

Wei San didn't react well and was kicked to the ground by Jie Yuman. She reached out her hand to support the ground, trying to avoid injury, but Jie Yuman appeared ghostly above and kicked her arm.

Wei San fell solidly to the ground, feeling pain coming from half of her body.

The four people standing nearby, some reaching out to cover their eyes, some looking down at their feet, some looking up at the sky, and even beginning to fold their hands.

Every time they attend Teacher Yumans class, they develop a new understanding of pain.

Until now, Jie Yuman hasnt even moved her hands, just her right foot.

Rare as it was like this, Wei San is still being kicked horizontally and vertically by her, with attacks from all directions, unable to resist at all.

Jie Yuman moves too quickly.

Left, right. Wei San closed her eyes and even though she was kicked down again and again by Jie Yuman, her emotions gradually stabilized.

Wei San suddenly opened her eyes.

She found it!

Belonging to the rhythm of Jie Yuman.

When Jie Yuman kicked over again, Wei San successfully dodged by pressing her waist. She even demonstrated in her mind how to counterattack back.

As a result, the counterattack had not yet formed, and Jie Yuman expected her to move. Wei San was kicked in the butt and fell straight to the ground.

She behaved well this time, not reaching out to support the ground, but rolling and relieving herself instantly when she fell.

Completely useless, Jie Yuman's feet were like ghosts, following her like a shadow, and her buttocks were kicked again.

Wei San:

When the foot kicked again, Wei San knelt down on both knees and faced her head-on, forcefully embracing her with both hands.

Jie Yuman tried to pull away, but couldn't break free for a moment: let go, don't be naughty.

Wei San swore to death and said, Teacher, my butt hurts.

What is face? Wei San doesn't have any.

Jie Yuman:

Release.

Not releasing.

Jie Yuman looked up and said calmly, I wont fight you anymore. Liao Runing come over.

Wei San looked at Liao Runing, who regarded death as if he were returning home, and then let go of her hand and fled to the opposite side to prevent being kicked by Jie Yuman again.

It was unknown if she was influenced by the scoundrel Wei San, but Jie Yuman was particularly heavy on Liao Runing.

Wei San listened to the solid sound made by Jie Yuman when she kicked Liao Runings buttocks, and couldnt help but think of the burning pain of being kicked in her buttocks.

Teacher, my buttocks also hurt! Liao Runing took inspiration from Wei Sans move just now and tried to act coquettishly and play rascals.

Jieyu Man sneered and said, The pain is right! Then she kicked Liao Runings buttocks again.

The entire training ground was filled with Liao Runings painful howls.

Chapter 260

Waiting for him to leave, he was already limping and crouching next to Wei San with his hands on his buttocks and his eyes red: Teacher Xie, you are treating women as more important than men.

Wei San turned her head to look at him and said, So its true that Jin Ke said before that you were beaten and cried at Teacher Jies hands.

What nonsense! Liao Runing ahhhed, Do you think theyre any better.

In the following situations, the arrogant sons of heaven were beaten by Jie Yuman without any fighting power. They were as strong as Huo Xuanshan, gritting their teeth and holding on without any pain, exaggerated as Wei San hugging her legs, and Liao Runing howling and acting coquettishly.

In summary, after the training class in the afternoon, Jie Yuman felt like she was exercising, sweating a bit, and then left.

Leaving five people squatting in the corner, quietly touching their buttocks and legs.

After the afternoon class, they can train and rest on their own, and Wei San has to learn about perceptual barriers.

She limped to another place, and the teacher was waiting for her inside. Seeing Wei Sans appearance, she whispered softly and asked, Did you just come from Teacher Jie? Sit down.

En. Wei San had just sat down, and there was a sharp pain in her buttocks, forcing her to hold back without making a sound.

The teacher saw this and had a deep smile in his eyes, but he didnt reveal it: Let me briefly talk to you about perception.

Wei San tried to relax and listen to the teachers explanation.

The perception of an S-grade commander is the most complex. Setting up a barrier to prevent the spiritual attack of a star beast can be understood as a shield. If you attack a star beast and cause it to lose control, it can be seen as a spear. The teacher replied positively, The higher the perception level of a commander, the wider their perception coverage, and some extremely powerful characters can even control people.

Like Ying Xingjue from the Imperial Academy, he has already demonstrated the ability to control star beasts in competitions. With his level, controlling people in the future will not be difficult. The teacher said after giving an example, Although the 3S command cannot completely control your mecha soldiers, it can interfere, so you need to learn how to build barriers.

The teacher sat opposite, closed his eyes, opened them after a while, and asked Wei San, How do you feel?

Wei San: how should I feel?

The teacher was stunned and said, I just gave you a psychological suggestion that you are not injured now, there is no pain at all.

Wei San felt the signal of a strike coming from all over his body: Its quite painful.

The teacher was a bit embarrassed and said, Ever since you came in, I have been using my senses to interfere with your thoughts, you dont feel anything?

Wei San felt it carefully again and shook her head, No I dont.

The two of them looked at each other, leaving the room completely silent.

Finally, Wei San broke the eerie silence and said, What kind of hint is it? I only heard Jin Kes command in my mind, and his voice suddenly came out.

The teacher adjusted his emotions and said, Hints are something you unconsciously perceive, and you wont feel someone talking in your mind. Its okay if theres a problem. A mecha soldier needs to establish a barrier, first of all, they cant let the perception of the commander enter your mind. When they explore your thoughts and processes, its the most dangerous time for you, and they can immediately control you.

Wei San thought for a moment and said, What if I deliberately let them see and disturb them instead.

The teacher nodded and said, This is one of the ways, but it is the most aggressive method. We will mainly talk about traditional barrier building methods.

This class lasted until 9 pm.

After Wei San came out, she did not return to her dormitory, but went to the building for training. There are simulation cabins and small physical training fields in the individual rooms of mecha soldiers, suitable for practicing alone.

She swiped her card to enter, and Wei San walked directly towards the simulation cabin. She temporarily does not want to undergo physical training today and has received a significant psychological blow.

After entering the simulation module, Wei San chose the same environment as Gu Yu Star. Instead of using a mecha, she directly shuttled through the rain.

A familiar burning sensation came, and Wei San bent down into a jungle to examine the dagger inside her calf boots.

The surroundings were dark and gloomy, with occasional gloomy sounds from wild beasts and continuous rain falling.

Wei San turned her head and noticed that a living creature was attacking her. She immediately pulled out her dagger, and as it charged towards her, she dodged to the side and thrust her hand into the creatures body.

After completing this series of actions, Wei San realized that the living creature was just a wriggling black mist.

Her dagger is completely useless.

The living creature immediately turned into mist and scattered in all directions.
