

Smash All 261

Chapter 261

There was still this kind of star beast?

Wei San was stunned and then continued to lean forward, completely ignoring the burning sensation on her body.

She basically doesn't have any rest time in the day, in order to avoid delaying the main team in the competition. From now on, in every game after that, she will face opponents who are both at the Double S grade or above. If she does not train hard, it will not only be her own shame, but also Damocles Military Academy behind her.

After Wei San arrived at Gu Yu Star, she did not go out, and it is unknown whether the environment of Gu Yu Star is as harsh as the current simulation module.

She lightly stepped on the ground and skillfully avoided the branches and leaves in the jungle, moving forward quickly.

After setting the parameters when she just entered, the task she needs to complete is to find a shining sword.

After walking less than a kilometer, the same black mist attacked from behind again. Wei San dodged and did not put in any effort to stab it, but instead observed what this black mist was.

At this glance, her skin swelled with an indescribable itch.

The black mist is composed of dense black insects with a very small body, and the only thing that can be seen clearly is the mouth parts.

Anyone who sees the composition of this black mist cannot calm down, especially Wei San who has just had intimate contact with it.

Before she could make any other response, Wei San suddenly smelled a burning smell, ?. No way right.

Wei San suddenly opened her eyes, returned to reality from the simulation module, and stood up to take a look.

Sure enough, the body of the simulation module burned out.

Wei San: Didn't they check it once already? She even checked it herself.

The simulation module was burned out, and Wei San was unable to continue entering. He had to go downstairs to find the steward, explain the situation, and replace it with a new simulation module.

At the same time, Ying Xingjue in the adjacent room withdrew his hand from the wall and quietly sat back in his seat, continuing to train perception.

Ground floor.

Did the simulation module burn out? The steward looked suspiciously at Wei San. Okay, what did you do?

Wei San: I just laid inside and smelled a burning smell. As soon as I opened my eyes, the main engine of the simulation module burned out. Maybe your simulation module is too old.

Although the simulation cabin used by Sadu Star is not as good as that of the Imperial star, it is also a mainstream style. However, when it comes to Gu Yu Star, all simulation cabins here are old models, and the body may even turn yellow.

The steward followed Wei San upstairs to inspect and found that the simulated cabin body was indeed burnt out.

I'll replace it for you tomorrow, and I'll move this one down first.

Wei San watched as the steward uncle sent someone to handle the simulation cabin, but she was not in the mood to continue staying in her personal room. She simply went to find Ying Chenghe.

Ying Chenghe was studying materials with similar properties to Xumi Gold in his personal room when he heard a knock on the door outside and opened it to find that it was Wei San.

Have you finished your perception training?

Chapter 262

It's over. Wei San crouched in front of the Xumi gold, reached out and gently touched it, then quickly retracted. I was just about to enter the simulation module, but I didn't take two steps. The body of the simulation module burned, so I came to see your weapon.

How did the simulation module burn? Ying Chenghe asked in surprise, didn't you inspect it that night.

Perhaps the model is too old, but the steward said he would help me change it tomorrow. Wei San stared at the Xumi gold and said, Chenghe, what weapon do you think I should design.

Design whatever you are good at. Ying Chenghe looked at the comparison chart of light screen parameters, Weapons should be what you like.

Then there are too many things that I am good at, Wei San said without any humility.

Ying Chenghe smiled and said, I think you're good at using a light knife.

I can swing a whip pretty well too, Wei San pointed her finger at the Xumi gold again. Actually, I think the double chain machete I used to use was also good.

The pair of weapons used in the Underground factory? Ying Chenghe saw a photo of the A-grade mecha used by Wei San in the Underground factory during his lunch break. It was so ugly that he was in a daze, but the weapons were decent.

Its also possible, to add 50kg of Xumi gold, there should be excess. Ying Chenghe calculated the volume and said.

Wei San squatted on the ground, holding her cheek with one hand: I use a double chain machete, and people from Sadu Star Underground Factory may recognize me.

So Ying Chenghe walked over and said, Lets not design it as a double chain machete, or make it into a knife. After this competition is over, you can change it back.

Can we change it back? Wei San suddenly became interested.

Ying Chenghe nodded and said, You may not have learned that part yet.

Thinking of this, Wei San sighed, If we could borrow the chip for the brain interface She had to stay up late every day to see Yu Qingfei.

The chips made by the master cannot be taken out of the military campus, Ying Chenghe said. This is a rule, but I have already applied to the principal. After the principal completes the task and sees the application, there will be a response. We will see if there are any exceptions.

Wei San stood up and her spirit greatly increased. Then Ill think about what shape of a knife to make.

Ying Chenghe hesitated to speak.

Do you have anything else to say? Wei San asked him.

otherwise, you can tell me directly what kind of knife you need, Ying Chenghe hesitated and said.

He was worried that Wei San would design those ugly things that looked out of the sky again. Although the effect was useful, it really gave people a feeling of being wasteful.

Upon seeing his awkward expression, Wei San understood.

Not. Wei San refused directly. Previously, I was forced by life and limited by economic difficulties. I, Wei San, am a mecha designer with advanced aesthetic sentiments.

Perhaps due to peer discrimination, after Wei San returned, she stayed up all night and sat at a table, designing weapons.

The next day, Wei San went out with two large black circles under her eyes.

You Before Jin Ke could ask what she had done last night, he saw Wei San walking straight towards Ying Chenghe.

Take a look. Wei San gave Ying Chenghe a rolled up blueprint, My advanced aesthetic taste.

What kind of fun? ! Liao Runing immediately leaned over and urged Ying Chenghe to open it and take a look.

Ying Chenghe opened the blueprint and a large knife appeared in front of him. It was indeed sharp and beautiful, but the handle seemed a bit long, accounting for one-third of the blade.

This is a knife designed by Wei San? Its quite stylish. Liao Runing witnessed Wei Sans talent as a mecha engineer for the first time.

Chapter 263

Ying Chenghe stared at it for a while and noticed a hint: Double knives?

Wei San raised her eyebrows and said, Thats right.

She uses both hands equally.

So when combined, its a big knife, but the big knife can still be split into two and become double knives.

Ying Chenghe looked at the blueprint, and what impressed him the most was not the knife designed by Wei San, but the picture she drew, perfectly crafted with a light brain.

As a federal mecha engineer, he was usually accustomed to using optical brain design, which can save a lot of things and avoid drawing every stroke. Therefore, nowadays, almost no one can directly draw a complete set of mech weapons with just a pen and paper.

In the eyes of mecha engineers, this is a waste of time.

Since the design has been developed, finish it as soon as possible, and Wei San can also practice more. Jin Ke stated from the side.

Five people walked towards the training ground to start a new day of training.

Wei San received another message from Federal Express at noon, this time it was really snacks.

She still ran to the entrance of the exercise ground to pick up the delivery, carrying a large box of snacks. This time, Wei San walked towards the cafeteria, opened it in front of everyone, and distributed the snacks.

Youre actually willing to buy snacks for us to eat? Liao Runing said as he hugged the snacks in his arms.

Wei San finished and gave the rest to Li Ze on the other side.

What about us? Jie Yuman asked lightly.

Upon hearing her voice, Wei San had a reflex pain in her buttocks. She immediately took out half of Li Zes box and respectfully said to Jie Yuman, Teacher, please!

Li Ze: ? ? ? He was still here.

However, this time Wei Sans embrace of the box did not cause a sensation.

Because the federal government now doesnt know where the gossip comes from, saying that people in Pingtong Academy can be either male or female and can change gender at any time.

This bizarre brainwashing package made the students of Pingtong Academy laugh and laugh at first, and then they were told that some people saw the genius of Pingtong Academy, Zongzheng Yue, who was a transgender and used secret methods to turn himself into a woman. They also participated in underground competitions using marksmanship.

3S grade mecha soldier, also armed with guns, who else, except for Zongzheng Yue.

There are also rumors that the female mecha soldier who was actually seen was actually the younger sister of Zongzheng Yue, who went to play underground matches to exercise herself.

Wei San flattered all the teachers and when she returned, she heard this gossip and asked Jin Ke how he did it.

Others cant tell, the people in Pingtong Academy understand that Im a fake as soon as they watch the competition video. Wei San looked at Zongzheng Yue over there, his face seemed a bit gloomy.

Jin Ke raised his eyes and said, Its not how I did it, but the video of your game has disappeared and cannot be found by any means.

Chapter 264

Jin Ke used the word disappear instead of delete.

He originally wanted to stir up this pool of water, but after in-depth investigation, it was found that the video of Wei San and their match had not been broadcasted at all. The official response from the Underground Factory was that the recording equipment suddenly broke that night, so the last video of the championship challenge was not recorded.

There is only a photo of Wei San and a few people driving a 3S mecha standing on stage.

It is also the one that Ying Chenghe saw that day.

The camera is not broken. Wei San confirmed. It was still in good condition during our game, and there was no response from the staff around us.

She is accustomed to observing her surroundings, even when competing in the arena.

I checked, but the Underground Factory is an underground organization and there isn't much valid information, Jin Ke said. Your opponents team belongs to the Underground Factory's own organization, and this time they are very confident about the championship, but you suddenly emerged and won, so I guess the Underground Factory might as well ruin the game video.

All the game videos we used to have at Underground Factory have been taken off the shelves. Wei San originally wanted to verify what Jin Ke said, but unexpectedly, they couldn't watch all of their videos.

I have checked this, it is customary. Jin Ke explained, Before each division of your Underground Factory wins the championship, the videos of the division champions will be temporarily removed from the shelves.

Except for the audience who watched the Challenge Arena that day, no one knew about us. Liao Runing didn't care at all, as they didn't make a living from the Underground Factory competition and could still splash dirty water on Pingtong Academy.

The five people looked towards the Pingtong Academy, and Zongzheng Yue sitting in the middle lowered his head and pressed on his light brain, probably asking someone to investigate the situation. However, now that the most crucial video has disappeared, they can't find anything.

The master of the pavilion can be either male or female overnight, so Pingtong Academy will definitely be furious. Liao Runing chuckled, as if they weren't the main culprits.

As soon as this gossip was revealed, it immediately spread to major military academies, and of course, everyone knew that Zongzheng Yue was not a woman, but human nature dictates that many people, when they see him, think of this gossip and subconsciously scan Zongzheng Yue.

Moreover, shifting this gaze to other military students at Pingtong Academy once led to emotional repression in both the upper and lower levels of the academy.

As for the culprit, she was busy with training every day and had no time to pay attention to these things.

After replacing the simulation module with a new one, Wei San was quite comfortable with it, but tasks similar to that night disappeared, possibly due to different simulation module systems.

Room next door.

Ying Xingjue turned his head to look at the wall over there. Although the protection of Gu Yu Stars building was good, it could not resist his perception. As long as he wanted, he could cover all the rooms in the entire building.

Ying Xingjue was not interested in this, but the distance next door was too close, and Wei San had no control over her perception, so he had to forcefully accept the other party's situation.

Within two hours of entering the room from the other party, she had been on the brink of death seven times in the simulation cabin, with each rest interval of less than 20 minutes.

Once again, forced to feel the other party's emotions, Ying Xingjue stood up and knocked on the door next to him.

Wei San just came out of the simulation cabin, pale in complexion, but in a good mood. She has found a solution and can complete the simulation module task by entering again.

She heard a knock on the door and was surprised to open it, thinking it was Jin Ke or someone else who was looking for her.

As soon as I opened the door, I saw Ying Xingjue with a gloomy expression between his eyebrows and eyes.

your personal training room is next to me. Wei San said kindly, implicitly questioning what he was doing by knocking on her door.

Ying Xingjue's gaze shifted from the simulation module in the room to Wei San's face and said, No one taught you not to fall into a state of near death in a short period of time?

Wei San raised her eyebrows and said, How am I doing in the simulation module? You are all clear about it. Imperial Star, have you been using perception to detect me?

Regarding her suspicion, Ying Xingjue said in a calm voice, Your perception has dispersed and interfered with my normal training.

Wei San pondered for a while and asked him, Cant commands establish a barrier?

Im training.

Then theres no choice, otherwise you can go talk to the steward and find someone to change rooms with you. Wei San suggested thoughtfully.

No need, I will establish a barrier in the future. Ying Xingjue stepped back and looked into her eyes. Wei San, not all training can be done randomly.

Chapter 265

When Ying Xingjue returned to the next room, Wei San lowered her head and sniffed at herself. Can perceptions be emanated? Why didnt she see Ying Xingjue knock on the door of Zongzheng Yue then?

After her training at night, Wei San returned to her bedroom and casually asked Jin Ke in the living room, I am training in the simulation cabin. If you are next door, will you be disturbed by my perception?

Jin Ke turned his head to look at her and said, You already are in the simulation cabin. How can I be interfered with by your perception unless you fall into the illusion of near death? I pay special attention and may be interfered with.

Ying Xingjue's perception is stronger than Jin Ke's, and she has died several times in the simulation module today, so was she really interfering with him?

Why do you suddenly ask this? Liao Runing walked over with a yawn.

Just now in the training building, I interfered with Ying Xingjue. Wei San reached out and hooked a chair to sit down. He came searching to my door.

Jin Ke quickly grasped the key point and frowned, Have you been in a state of near death?

Seeing Wei San's silence, Jin Ke suddenly got up and said, Wei San, the simulation module will also kill people, do you know that?

Wei San was startled by him and said, Isn't everything fake inside the simulation cabin?

That taste was indeed unpleasant, but there was a voice in Wei San's mind telling her that the feelings in the simulation cabin were all fake, so as long as she woke up and rested for a while, she would be fine.

The smile on the faces of the several others in the living room gradually disappeared. Ying Chenghe chastised her, The pain setting is 90%, which is most suitable for 3S. After reaching 100%, mecha soldiers are very likely to face a near death state in the simulation cabin, which is very dangerous.

When the team trained together, all parameters were adjusted by the mecha engineer, and only Wei San was in a personal room. Therefore, until now, no one knows that she will directly set her settings to 100%.

The training methods of various federal military academies were gradually explored by predecessors at the cost of their lives, and cannot be easily changed.

I am a Super 3S grade, should I be able to set it higher? Wei San tentatively posed.

No you cant, you should wait until you completely recover to 3S. You must adjust it to 90 for now, Jin Ke said with a black face. If it werent for Ying Xingjues reminder, we wouldnt know if somethings happened to you.

This point was quite strange, as the military academies do not interfere with each other. It is reasonable for other commanders to only establish barriers and not to remind each other when encountering situations like Wei San.

They are competitors, and losing one of the main members to the opponent is a good thing.

Ying Xingjue knocked on the door saying that he was disturbed, but in reality it was a reminder.

Jin Ke had several possibilities in his mind, but he felt that Ying Xingjue would disdain using this method.

Starting from this day, the main team members always pay attention to whether Wei San has done anything that goes against the common sense of military school training, and seized every opportunity to carry out science popularization on her.

Wei San was troubled by their chanting style of popular science and felt a headache.

As for Ying Xingjue next door, he probably hasn't been disturbed by her perception anymore and hasn't had any conversation with Wei San.

On the contrary, two days before the competition, Zongzheng Yue from Pingtong Academy took the initiative to say a word to Wei San after training.

No matter whether you are at level 3S or not, you can't cross above Pingtong Academy.

Wei San was stunned as she tried her best to keep a low profile and avoid causing trouble as she entered and exited. Suddenly, she collided with a provocation and immediately said, Why do we have to pass your Pingtong Academy? Last round, Damocles was second, and our goal is to win the championship.

At this moment, Ying Xingjue on the other side came out of the room and happened to hear her last words. His eyes, as black as ink, swept past Wei San, with an unknown meaning. He then bypassed the two and walked downstairs.

Wei San:

Chapter 266

A while ago, she mentioned to Ying Xingjue that their goal is to win third place.

ZongzhengYyue was unaware of the differences, so he only regarded Wei San as wild and unrestrained. His gaze was heavy, and he said, I look forward to Damocles challenging Pingtong Academy.

We should accept your challenge when you say to challenge? Wei Sans mood suddenly turned sour and she left without considering Zongzheng Yues face.

Why do people always like to rush towards her? She is just a busy and ordinary person.

On the day before the competition, various media outlets rushed to Guyu Star to interview the five major military academies, especially Damocles Military Academy. The Star Network was quite interested in the sudden change of Wei Sans jump from A to 3S at Damocles Military Academy.

Due to the unique environment of Guyu Star, the organizers have set up an interview area inside the exercise venue to give them a unified interview time.

For the first time in many years, the main force and teachers of Damocles Military Academy were surrounded by a group of media reporters.

Is Wei San really at the 3S grade?

May I ask why you deliberately concealed the level of Wei San?

Does Damocles Military Academy have any major plans for the later stages?

Faced with various media cameras, Xiang Minghua smiled and said in his heart that there was no big plan. Originally, the plan of Damocles Military Academy was to wait for Shen Tukun to graduate and replace him with an S-class substitute. Who would have expected Wei San to be a problematic 3S mecha soldier.

On this point, they had to thank the Imperial Academys Ying Xingjue. If it werent for his probing, Damocles wouldnt have known this either.

But what he may think in his heart is naturally different from what he says on the surface.

Xiang Minghua proclaimed in an official tone, All arrangements at Damocles Military Academy are aimed at achieving results in the competition. Hiding the level of Wei San is a defense mechanism and is only part of our plan, and we believe other military academies will also have their own arrangements.

Media that were present: dogshit! No matter how the other military academies were arranging, they cannot create a 3S grade out of thin air.

After interviewing the team leader, there are the key players who must be interviewed before each game, which is the time to speak up.

This time, everyone rushed to pass the microphone to Wei San and said, Wei San, the second person on the desert field last time was the flag you raised. What do you want to say to other military academies at this time?

Next to her, Jin Ke stepped back and asked Wei San to stand at the forefront. She held several microphones in her hands and said, There's nothing I want to say, I only have one small wish.

What wish?

Saying it doesn't work, I will naturally tell you when it happens in reality. Wei San raised her eyebrows.

A reporter wanted to get a more direct answer and asked loudly, Damocles Military Academy is also a fully staffed 3S now, so who do you think is most likely to win the championship compared to the Imperial Military Academy and Pingtong Academy, which have the same fully staffed 3S?

The reporter spoke loudly, and even the main force of the military academy standing in other positions could hear it clearly. It was not intentional or coincidental, but the interview area suddenly quietened.

Wei San sighed and said, There's no way. The most powerful one must be us. Who made the name of Damocles Military Academy the longest.

Journalists: Surprisingly, there is still this statement?

Situ Jia, the main member of the Imperial Academy on the left, stood on the interview platform and sneered, clearly unhappy with Wei Sans unknowledgeable words.

The Sequoia media reporter reluctantly said, Since the name of Damocles Military Academy is the longest, it should be the longest time it takes to lift the flag.

Wei San was surprised and said, It turned out to be Sequoia media company. You havent closed down yet? Dont worry, you will be soon, and you wont have to work hard like you do now.

Sequoia media reporter:

On the other side of the Pingtong Academy, a reporter asked the main team their views on the recent news that secret techniques can transform people between men and women.

Chapter 267

Zongzheng Yue, holding a long gun, stood on the interview platform, his gaze sharp upon hearing the words, scanning the reporter.

Lu Shibai whispered, Sir, I will answer.

Zongzheng Yue leaned to the right and made way for Lu Shibai, saying, You should see the consequences of Sequoia media spreading rumors. I believe you will not want to fall to their level

Sequoia media reporter who was about to transfer to the nearby Pingtong Academy for an interview said, They havent offended Pingtong Academy, have they.

The largest federal media in the past has now reached such a point where the colleagues present cant help but secretly glance at the culprit, Damocles Military Academy, and finally sigh in their hearts: there is not a good speaker among these five major military academy students.

At night, Ying Chenghe brought Wei San into his studio.

The final shaping process requires using your perception to build a model of the weapon. During the formation of the weapon, perception cannot be interrupted and there should be no distractions. Ying Chenghe gestured to Wei San as he looked at the well proportioned material covered in a special container.

Unlike making A-grade weapons, materials above S-grade cannot be made into weapons using tools alone, and there is a greater emphasis on the perception and control ability of the mecha engineer.

Wei San stood in front of the special container and followed his instructions. She reached out and placed her hand in the operation panel below the container, introducing her perception into the material that had already been integrated. The addition of Xumi gold caused a cold atmosphere around her, and she could clearly feel it standing in front.

The material gradually integrated with her perception and stopped in mid air inside the container. Wei San controlled her perception, and the material squeezed together, like a dough that can be kneaded at will.

Ying Chenghe next to her was even more nervous than Wei San at this moment, and he doesn't know if Wei San can succeed.

When Ying Chenghe was studying weapons, he dared to use materials for practical combat only after learning for more than half a year. After multiple failures, he finally came up with some rules. However, Wei San only studied for half a month, during which she also had various soldier training sessions.

The knife was successfully formed, and Ying Chenghe breathed a sigh of relief in his heart. He turned his head to look at Wei San, only to find that she had started to bleed from her nose again.

Ying Chenghe quickly turned around to pick up the paper, took two steps forward and stopped. It was not wise to touch Wei San at this moment. He could only watch her nosebleed drip and stand beside her in a hurry.

Fortunately, after Wei San finished one of her swords, she made the other one much faster.

Two knives merge in mid air to form a large knife with a long handle.

As soon as Ying Chenghe saw a flash of light from her big knife, he knew that the weapon had not failed, and at this moment, the operation panel of the special container also lit up with a light, indicating initial success.

After another layer of surface treatment, the weapon will be ready. Ying Chenghe handed Wei San the napkins. The most important steps of material matching and building the weapon form are completed, and there are basically no problems

Wei San took the tissue, wiped her blood dry, and took out a nutrient solution from her pocket to drink. The symptoms of fainting and dizziness immediately disappeared.

After tonight, when she enters the Guyu Star competition tomorrow, she will no longer be able to drink this specialized nutrient solution.

There's no time to test weapons Ying Chenghe stared at the long knife inside the container, dealing with Xumi gold was even more complex and time-consuming than he had imagined.

Jin Ke said he will try his best to seize opportunities in the competition for me to test.

The main team consists of three mecha soldiers, with Liao Runing and Huo Xuanshan using mecha from a young age, which is completely different from Wei Sans. In fact, only Wei San from the five military academies used brand new mecha and weapons.

After Colonel Li Zes mecha was destroyed, even if he received a new mecha, he couldn't immediately return to the military district, but instead followed them and handled Star Beasts in the competition in advance.

This knife Ying Chenghe suddenly realized something was wrong, Why is it a little different from your design drawings?

There is an additional depression in the middle.

I have made a temporary change, Wei San explained. I think the shooting technique of Zongzheng Yue is quite interesting. I want to try the stick technique, but the blade should not be wasted.

Ying Chenghe: For some reason, he had an ominous premonition and mourned for the Zongzheng Yue person in advance.

Chapter 268

Guyu Competition field.

It didnt rain early in the morning, but the surrounding environment was gray and dark. Even with trees and grass, there was no greenery, and they all had a gray hue.

The five military academies were ready to draw their combat readiness kits, and the main team of Damocles Military Academy was discussing who would draw them.

Whose hands has good luck? Liao Runing asked, Regardless, I dont have good luck.

Ying Chenghe turned his gaze to Wei San and said, At the beginning of school, she drew the only empty dormitory.

Just listening, it seemed like her hands luck looked great.

Wei San humbly said, That was an accident.

The live broadcast started from here, Yu Tianhe laughed: The atmosphere of Damocles Military Academy team seems to be good all the time. Other military academy teams are too serious, and the atmosphere is a bit depressing.

The person in charge of extracting combat readiness packages from other military academies has not changed since the first arena, Ying Xingjue is responsible for the Imperial Military Academy, and Zongzheng Yue from Pingtong Academy all of them have the greatest say in the main team.

There was no change on the faces of the leaders and teachers sitting below. They all said in their hearts, Its clear that Damocles Military Academy was the most serious and repressive in the past, and I dont know why they have recruited such a group of shameless people this year..

Wei San, you pick, next time Liao Running will pick. Jin Ke commanded simply, Since we all have poor luck, theres no difference.

One person from each of the five major military academies lined up to draw combat readiness bags, while Wei San was sandwiched between Ying Xingjue and Zongzheng Yue.

Normally, Wei San should feel restrained before the competition. Before the competition, all parties judged the strongest three in this year: Ying Xingjue, Ji Chuyu, and Zongzheng Yue.

She was now standing between two people, feeling somewhat stressed.

But at this moment, whether it is the live audience or the netizens in front of the live camera, they only saw Wei Sans hands inserted in the pockets of her training jacket, one leg extended out of the team, her heel is on the ground, and her toes are facing up, leisurely shaking without feeling any pressure.

This posture is commonly seen in various queues of ordinary people, rather than in the tall and upright ranks of military academy students.

Everyone: This person really refreshes others cognition at all times.

Wei San waited for the organizer to prepare her combat readiness kit, her gaze fixed on Ying Xingjues long hair in front of her. It looked black and smooth, very easy to touch, completely different from his cousins dry and rough hair.

In a daze, Wei San took out her hand from her pocket and quietly moved forward, trying to touch it unconsciously.

Step on a point first, it will be convenient to start in the future.

Wei San thought to herself.

She touched the end of his long hair with her fingers, and the cold and smooth touch came from her fingertips. Such good hair its a pity not to burn it.

Before Wei San could touch him a second time, Ying Xingjue turned his head and said, What are you doing?

She immediately withdrew her hand, inserted it into her pocket, looked up at the sky, and pretended that Ying Xingjue was not talking to herself.

Could it be that 3S had perception even on his hair strands? Obviously, the movements were so light.

Yu Tianhe, who has been looking at the camera, said, . How should she explain this?

Audience in the live broadcast room.

[What is Wei San doing? !]

[How dare she take action against Ying Xingjue? It must be a provocation to Imperial!]

[Stinky and shameless! She even rubbed it with her hand! ! !]

The audience exploded when they saw this scene!

Ying Xingjue is definitely someone from a wealthy family, with outstanding appearance and abilities, coupled with a noble and luxurious temperament, belonging to an unattainable type.

This Wei San actually touched the hair of Ying Xing Jue, attempting to defile and provoke one of Imperials Twin Stars.

Following this, there will definitely be a dispute, and all the audience will have the same idea: fight, fight!

Ying Xingjues gaze swept over her fingers, and the two were so close. From the moment Wei San raised her hand, he sensed her movements and wanted to know what Wei San was going to do without turning around, but he didnt expect her to have thoughts about his hair.

The teacher over there was already calling for Ying Xingjue to come forward and draw his combat readiness bag. He lowered his eyes and turned around, walking forward.

After Ying Xingjue finished drawing his bag, it was Wei Sans turn. As if she had never been caught before, she reached out to draw the combat readiness bag and displayed it back to the team members.

Did you really use your hands to touch my cousin? ! Ying Chenghe pulled Wei San over, that was his cousin! One of the Imperial Twin Stars! Hes never been so offended before!

Wei San glanced at him and said, Chenghe, you need to be precise with your words. I only touched his hair once!

He spoke as if she had offended Ying Xingjue.

Jin Ke took the combat readiness bag, opened it for inspection, and remained silent for a long time: The materials used in this competition are actually

Full? Liao Runing leaned over and asked.

Not a single one. Jin Ke raised his hand and covered his heart, feeling that he urgently needed a heart saving pill.

Its none of my business. It must be the geomancy of Damocles Military Academy. Wei San immediately shirked her responsibility.

Chapter 269

When they were thinking about what to do in the next game, a shout of joy suddenly came from Samuels side.

Samuel Military Academys selection of mecha recycling materials and personal protective equipment is full.

All five members of Damocles Military Academy cast hostile eyes on Samuel. It was difficult to compete for the resources for the combat readiness package in this arena. They were far away, and Samuel fell to the last place. When they entered Guyus competition, harmful substances in the air would immediately enter the respiratory tract. They had no time to delay. The best result was to enter the mecha battle and exchange the resources with the star beasts killed.

After the war readiness package was drawn, the five major military academies began to enter the Guyu arena one after another according to their previous ranking.

Imperial Academy was still the first to enter the arena, and as soon as they stepped in, the sky began to rain.

The combat readiness kit drawn by the Imperial Academy this time is not very good, and their personal protective materials are particularly scarce. It should only be able to activate mecha mode, but this will greatly consume energy. Yu Tianhe said, Its unknown how the main commander of the Imperial Academy will make his decision.

For the time being, the military academy team that is not afraid of the environment of Guyu star is only South Percy who exchanges materials with others and Samuel who drew the full materials. Xi Haotian watched as the rain strengthened. The other military academies are unlucky as it started to rain as soon as they entered. If its a bit later, perhaps they can kill the Star Beast to exchange materials.

The main commander Ying Xingjue suddenly stopped, and the Imperial Academy team instantly stopped. The crowd in front of the camera thought he wanted everyone to activate mecha mode.

Ying Xingjue closed his eyes slightly and immediately raised a sensory barrier to isolate the raindrops from the outside.

The barrier was just enough to cover everyone at the Imperial Academy.

There was a sound absorption during the live broadcast.

This is the materialization of perceptual barriers!

Even Ying Yuerongs face on the main platform changed.

This ability had once appeared in the history of the Federation, in an era where countless masters were born, and anyone who is still at the top is the most outstanding. However, in that era, they were just ordinary geniuses, with a group of people surpassing them.

I didnt expect him to achieve this level. Yu Tianhe murmured.

What kind of monster was created from the Ying family.

After today, the name of Ying Xingjue will spread throughout the entire federation with awe.

This scene can only be seen by live cameras, and the other military academies are not aware of it.

Damocles Military Academy, which ranked second, had no protection. When it entered, it rained even harder.

The live audience suppressed their fear and tried to watch Damocles Military Academy, which was also unprotected, when they entered the mecha to calm down.

Jin Ke stood at the entrance, opened the map, set a direction, released his senses, and wanted to quickly find the Star Beast. After killing it, he exchanged for materials.

Wei San herself first released her mecha, pestled it and pointed at the forearm of the mecha Zhu Jiang, saying, Can you help me remove this down.

That was a piece of protective armor, which can be used as a shield to resist opponents attacks during battles.

Ying Chenghe didnt ask why, climbed up, opened his tool kit, and then dismantled it.

Although the protective armor was just a small arm of the mecha, it was enough to serve as a block for five people. Wei San held onto the protective armor and immediately lost the burning sensation of raindrops hitting her body.

Its still you whos awesome! Liao Runing immediately squeezed in to take shelter from the rain.

Huo Xuanshan and Ying Chenghe followed closely behind, and the school teams followed suit. Each team began to dismantle a piece of mecha to block the rain.

Jin Ke detected a small group of star beasts and had just opened his eyes to tell them, when he suddenly noticed a large shadow above his head. He looked up,

Just as shocked as Jin Ke, there were also the audience before the live broadcast. Watching them, even the shock of Ying Xingjue, the commander of the Imperial Academy, dissipated a lot.

[In terms of rogue operations, no military academy can match Damocles.]

[Why hasn't anyone thought about this operation before? I think it's pretty good.]

[Their mecha soldiers have always regarded mecha as their life, and they are not willing to dismantle them easily.]

[However, they still need to kill the Star Beast as soon as possible to exchange for personal protective materials. Although it blocks the rain, there is still poisonous gas in the air.]

There is a small group of star beasts ahead, and each team's heavy mecha soldiers should come out to investigate, while the others should quickly follow their footsteps. Jin Ke led the team and ran towards the direction he had detected.

As there was no rain damage, Damocles Military Academy was much faster than in training, and soon arrived at the destination Jin Ke pointed out.

Soon they discovered that there was indeed a small star beast herd here, but there was also a high-level star beast.

This high-level star beast hid among the star beasts and hid its own breath. It didn't appear until Damocles Military Academy came.

Bait.

This star beast uses a small group of star beasts as bait, specifically to attract prey.

Everyone immediately entered combat mode.

Jin Ke wanted Wei San to deal with this high-level star beast, while he protected the school team against small star beasts.

This high-order star beast keeps hissing, and the sound from its mouth interfered with Damocles Military Academy team, while strengthening the attack power of small star beasts.

Wei San installed her mechas forearm armor and pulled out her machete.

Live stream.

Yu Tianhe was an engineer, and recognized the source of this mecha at a glance. This mecha accompanied her former owner to gain a lot of glory. Zhu Jiang's original weapon was not this knife, but Damocles Military Academy had modified it for Wei San. It seems that she is good at using knives.

This high-level star beast is like a wolf, yet not like a wolf, with two hard horns on its head and a tail. It excitedly attacks Wei San.

Wei San controlled the mecha to jump over other star beasts below, held a knife in one hand, and cut towards this high-level starbeast. It showed no signs of evasion and screamed at her.

A knife was struck on the back of the high-level star beast, revealing deep bones. However, when she withdrew the knife, the injury on the back of the head star beast immediately recovered to the state previously.

Chapter 270

What the hell is that?

Wei San in the control cabin narrowed her eyes as it was her first time seeing this type of star beast.

With the cry of this high-level star beast, the star beast group over there became increasingly excited and their attack power continued to increase. Although the school team was not under mental attack, it was difficult to deal with these star beasts because the same thing happened to these A-grade star beasts.

Their damage recovery is extremely fast, and as soon as the attack is retracted, they will recover as usual and it even enhances their strength.

The bullets hit the A-grade star beasts, and they can even use the contraction of muscles in the wound to expel the bullets.

Jin Ke looked at these star beasts with an expressionless expression. The environment of GuYu Star was unique, and the constitutions of the star beasts varied. Many star beasts were not even recorded. Damocles Military Academy was extremely unlucky. For their first time, they met an unrecorded star beast.

They don't know where the weakness of this type of star beast lies. Currently, harming them can actually give these star beasts strength.

Jin Ke closed his eyes slightly and connected to all the mecha soldiers through the school teams commanders, forming an invisible net. They were integrated, and everyone knew all their actions. Each attack carried a unique rhythm, and the damage value continued to increase.

The shooting accuracy of a single soldier was originally only 80%. At this time, with integration, the talent of the shooter was added to the individual, and the hit rate instantly increased to over 95%.

This is the advantage of the main commander integrating the connection of individual soldiers in the school team, which is similar to what high-level star beasts do now.

Wei San was still chopping down this high-level star beast. She has tried various parts, and every part of it can immediately recover.

Every time she made a cut, it seemed like she was chopping on the water. After retracting the knife, the water returned to its original state, consuming her physical strength in vain.

In the operation cabin, Wei San is staring at the high-level star beast on the opposite side, it cannot be without weaknesses.

The head, eyes, trunk, limbsWei Sans gaze was fixed on the tail of this high-level star beast.

Its just a very ordinary looking tail, gray and almost integrated with the environment around the Gu Yu arena.

Wei San narrowed her eyes and began to explore again. The knife was also cut up, and when it was collected, the high-level star beast returned to its original state without any signs of injury.

After just the second round of exploration, Wei San discovered one thing: every time this high-level star beast is injured, its tail will start to swing non-stop, fast enough to produce illusions, but they all focused on the healed wound and ignored its tail.

Regardless of whether the tail of this star beast swings extremely fast due to pain or for any reason, Wei San will give it a try.

She maneuvered the mecha to avoid the claws of this high-level star beast, moved sideways to its body, and struck it on the back with a knife.

The eyes of this high-level star beast flashed with humanoid ridicule, as if mocking Wei Sans overconfidence.

Wei San pulled out her knife and its wound healed.

She made a gesture and still had to chop it off. In the next second, she grabbed the handle with her left hand, opened half of the blade, and quickly threw it towards the tail of the Star Beast, with another blade slashing at its back.

The high-order star beasts tail was cut and began to bleed, but it did not recover half as much as the other parts. However, the tip of Wei Sans eyes noticed that the recovery speed of its back injury had slowed down.

She found it.

Wei San verified her guess and glanced at Jin Kes side. Suddenly, all the soldiers of the school team were notified to attack the tails of these star beasts.

In the following time, as long as a star beast's tail is severely damaged and its body is damaged again, it cannot recover as before, just like an ordinary star beast.

Wei San then dealt with this high-level star beast again, and it clearly began to go berserk due to its weakness being discovered. With its temporarily recoverable body, it crazily attacked Wei San.

Wei San paid the price of being pierced in the abdomen by the horns of the high-level star beast, and struck the tail of the high-level star beast with a knife.

Audiences inside and outside the live broadcast saw Zhu Jiang slightly tilt its head, holding one hand against the head of the high-level star beast. The mecha stepped back and separated from the two corners of the star beast, then grabbed one corner of the high-level star beast and forcefully broke it off.

Wei San pinched the broken horn and found that its horn was not rebirthable, so she grabbed the broken horn and stabbed it into its neck.

The wound on the neck of the high-level star beast couldn't recover, so Wei San clicked and realized that this horn was the nemesis.

She kicked the belly of the middle and high level star beast with flying feet, immediately approached, and sent the horn into its belly, which was considered a partial return. Then, she closed her knife and threw out her hand, nailing the tail of the high level star beast.

The higher level star beast let out painful howls, constantly struggling to avoid Wei San.

Wei San did not take a turn knife or cut off the tail of the high-level star beast. Instead, she walked up to it and broke another horn.

She will definitely take the lead in dealing with anything that harms her mecha.

Wei San held onto this broken horn and sent it to the head of the high-level star beast. At this moment, blood finally flowed out and was no longer healing.

The body of the high-level star beast began to twitch, and the star beast group over there had already become a chaotic mess, surrounded by the school team.

Wei San manipulated her mecha to reach the tail of this high-level star beast, pulled out her sword, and without hesitation cut off its tail.

[Damocles Military Academy kills an unknown high-level star beast and seventeen A-level star beasts.
Repeat]

The beam and broadcast sound appear at the same time.

Live stream.

Bad luck is not necessarily a bad thing. Yu Tianhe proclaimed. Unknown high-level star beasts can double their exchange resources

Xi Haotian didn't care about this. Instead, he was interested in Wei Sans performance just now. As a 3S mecha, in terms of her performance just now.

Completely failed.
