

Smash All 271

Chapter 271

After Xi Haotian spoke aloud the phrase completely failed in his heart, the audience on the live broadcast raised their ears and listened to him explain why.

As a 3S grade individual, she took too long. This is just a double S grade star beast. Xi Haotian added.

Yu Tianhe disagrees with his statement: This is still an unknown star beast with the special ability to fully recover, which is time-consuming and this is fairly understandable.

Xi Haotian shook his head: This star beasts horn and tail are all weak points. A qualified 3S soldier should learn to find these in a faster time. If Huo Xuanshan or Liao Ruling are replaced, they can kill this star beast in half of the time. She lacks the unique acumen of 3S soldier mecha. Moreover, the 3S mecha in this competition has their own unique moves, Wei San. I feel that she still has a rough fight up to now. I don't know what Damocles Military Academy has taught there? In my opinion, all of Wei San's tactics have not changed at all, more like she has not yet stepped out of her position as the head soldier of the school team.

Xiang Minghua: he really hit the nail on the head. Wei San was supposed to be on a temporary job, but she didn't even receive her mecha for a few days. The weapon was only made last night, so how could she compare to other 3S mecha soldiers.

Perhaps this is the style of Wei San. Yu Tianhe smiled.

Xi Haotian no longer denied: If you can kill a high-class star beast, you are a qualified soldier, but now it seems that Wei San does not have the trump card strength I think. The reason why Damocles Military Academy chose to hide her level is probably because Wei San was born from an unknown star, not in the public eye.

These key members of the 3S team have been closely watched by various forces since the beginning of their enrollment, and their strength has been continuously evaluated with each training session, with only Wei San drifting away.

Now, it seems that to Damocles Military Academy, it is not entirely a good thing. Their teachers are not good enough to hide Wei San. It seems that they did not have much good training.

To be honest, Xi Haotian was disappointed as he thought there would be an additional ace in the competition.

However, the big knife in Wei Sans hand looks quite special. Yu Tianhe said, It can split into two, and split into a curvature. Before, when she threw the knife at the high level star beast, there was a feeling of throwing flying daggers.

Xi Haotian looked at the camera as Pingtong Academy entered and casually said, Its not a feeling, her technique is indeed throwing a flying knife. However, what she threw was a plus version of the flying knife.

Pingtong Academy has already entered the arena, and only one-third of the combat readiness kits they drew contain protective clothing and mecha recycling materials.

After passing through the first two military academies, one with super strength and the other with a rough operation, the entire staff of Pingtong Academy entered mecha mode, appearing mediocre and indifferent.

They drove the mecha and quickly searched for the star beast, apparently with the same purpose as Damocles Military Academy, to exchange for protective clothing and mecha recycling materials.

Pingtong Academy has more energy than Damocles, but they are also unwilling to consume more energy on Guyu Star. There are more difficult arenas behind them, and they may even need to always open mecha mode, which will consume huge amounts of energy.

As soon as Pingtong Academy entered Guyu arena, they heard the broadcast and the beam of light. Zongzheng Yue looked in that direction, and finally led the team to another direction. They could not win the championship but they would not give second place to Damocles Military Academy.

Change it all on. Jin Ke brought the exchange bag.

He and Ying Chenghe exchanged resources and came back with complete materials for protective clothing and mecha.

We are lucky to have encountered an unknown star beast, and our exchange power has doubled, equivalent to a 3S high-level star beast. Jin Ke explained to Wei San.

Hats, masks, gloves, and protective clothing are connected together, but similar to training clothing, they do not become loose or affect activity.

With protective clothing, they don't need all the personnel to enter the mecha state, so energy can be saved, and the mecha engineer is responsible for on-site modification of the mechs circulation system.

Wei San has put on protective clothing and a mask on her face, which can filter out harmful ingredients in the air.

The rain is still falling, and mecha soldiers who have nothing to do can temporarily rest and wait for the mecha engineer to improve the systems.

Liao Runing and Huo Xuanshan were guarding around, while Jin Ke was still looking at the map. Wei San found a horizontally cut dead wood and sat directly on it to rest, even shaking her legs.

Chapter 272

Looking at her alone, no one can tell that she is participating in a tense competition.

Wei San looked down at the ground and poked her finger in, digging out a lump of mud.

The soil gray mud has a strong particle sense and no vitality, like rough cement mixed well.

In such a place, people stay here to protect Guyu Star and prevent the star beast from going out. Then what is the purpose of the star beast staying here?

According to the history of the Federation known to the Federation, initially humans were attacked by star beasts, who ignored space and suddenly crossed the local galaxy to attack humans, using humans as prey and occupying the planet. That's why the Federation was formed later, and mecha was born.

Wei San, let's go. Jin Ke called her to leave.

The environment of Guyu Star is harsh, and the main team will not be separated from the school team temporarily. The school team members are following behind the main team at full speed.

[The Imperial Military Academy has killed two Double S Star Beasts and forty-three A-grade Star Beasts.]

[Pingtong Academy has killed three Double S Star Beasts and twenty-one A-grade Star Beasts.]

[The Imperial Military Academy has killed three headed Double S Star Beast.]

Three beams of light came from different directions.

Has the Imperial Academy been divided into two teams? Ying Chenghe looked up at the beams of light in two directions and couldn't help but marvel at the strength his cousin perceived.

Two teams mean that Ying Xingjue must separate his perception to protect them. From the direction of the beam and broadcast sound just now, one team was very far away.

Ying Chenghe did not know that the Imperial Military Academy did not use protective clothing, but relied on Ying Xingjue's perceptual physical barrier to block the harsh environment outside on Guyu Star.

He has raised his profile a lot. Jin Ke frowned and looked at the two beams of light at the Imperial Military Academy, responding to the first two matches of the Star Challenge. He didn't make many moves, just like Ji Chuyu, who only protected the Imperial Military Academy and set up a set last time to verify the level of Wei San.

Divided into two teams, apart from responding to Xingjue's own considerations, in Jin Ke's view, it was more like a demonstration deterrent.

But deter these military academies behind them?

Jin Ke couldn't figure it out, but Ying Xingjue's intention was to do so.

He took a look at Wei San, was it because Damocles Military Academy was now 3S for all of its members, and the Imperial Military Academy had another competitor?

What are you looking at me for? Wei San tried to insert her hands into her pockets before entering the mecha, but couldn't find it. She looked up at Jin Ke's eyes and asked.

Protective clothing has no pockets. Jin Ke quietly voiced. Wei San, such an unreliable person, should not suddenly make Ying Xingjue want to intimidate military academies.

Wei San let go of her hand and said in a clear tone, I know.

However, why can they all find so many high-level star beasts? We only have one on our end. Wei San asked. Jin Ke, are you not able?

Jin Ke smiled on the surface, .this is my plan. If it werent for the adjustment of Wei San to her 3S mecha, he would have gone in the direction of Pingtong Academy. However, he didnt expect it to be an unknown star beast, so he wouldnt have suffered a loss.

All right. Wei San sighed. You are the commander, and you have the final say.

Jin Ke grabbed Wei Sans arm with an expressionless expression and said, What are you doing acting so strangely again?

I didnt Wei Sans gaze fell on the road ahead. It looks a bit familiar here.

Chapter 273

Compared to the natural geographical environment of the hilly arena and desert arena, the Valley Rain arena is more like an abandoned large city, with a gray sky, occasional rain, abandoned buildings, gray green weeds growing everywhere, and withered trees.

The environment here looks similar to the outside of Guyu star. Jin Ke carefully surveyed and said, Before we took the plane to the arena, we saw a similar semi collapsed building and which also had that trademark.

Wei San stared at it for a moment and shook her head, Its not what I saw today. It seems like Ive seen this before in the simulation module.=

Ying Chenghe heard the words and said, In the early stages of the simulation module, it was formed through realistic projection and the introduction of various parameters. It is not impossible for you to see the same scene as on Guyu Star.

It was like so

The strange feeling in Wei Sans heart dissipated and she continued to move forward.

Under the cover of the rain, all external voices were weakened, as if only oneself and the surrounding teams were left. At present, the main team of Damocles Military Academy was Huo Xuanshan, who controls the mecha and flies in the front to observe the situation. There is also one person in each team behind the school team to maintain the mecha status.

Jin Ke and all the school team commanders were connected by perception, using their power to expand the detection range once again, but he did not detect any other star beasts, so it can be said that there was nothing around him.

Even though it is so, Jin Ke did not let the team relax their vigilance, but instead warned everyone to stay alert.

Ever since the previous execution of the Star Beast at the Imperial Military Academy and the Pingtong Academy, there has been no movement in the entire Guyu arena, as if everyone has fallen into a state of peace and tranquility.

This state is not right, more like a moment of calm before a storm arrives.

On the map in Jin Kes hand, there was a bold red circle around the destination they were about to reach, but the organizers marked it with four words next to it: Unknown Star Beast.

This meant that the star beast near the endpoint is an unknown star beast not recorded by the Federation, which may be easy to deal with or more difficult to deal with. However, based on the current situation, Jin Ke is more likely to be in the latter situation.

The sound of rain and rhythmic footsteps intertwined, making the surroundings seem even quieter and eerie. The audience in front of the live broadcast also became nervous.

Others may not be sure, but the audience on the live broadcast at this moment could see the footage of the five military academies, knowing that each military academy is immersed in the same eerie tranquility.

No one at the five military academies spoke out, and they all moved forward quickly. If anyone acted strangely at this time, the chief commentator would surely turn his gaze towards them.

Yu Tianhe looked at the live broadcast of Damocles Military Academy: What is Wei San doing?

In the camera, Wei San followed forward, pulled off her protective suit, and was even taking off her mask.

Xi Haotian looked over and said, Taking off her protective clothing.

Yu Tianhe: Would she not know that Wei San was taking off her protective suit? She wants to know why Wei San took off her protective clothing.

Probably knowing that he said something incorrectly somewhere, Xi Haotian replied, Maybe its a scratch an itch. Currently, it seems that its not impossible with Wei Sans personality.

Yu Tianhe: After listening, she actually felt it was a bit reasonable.

In the camera, Wei San pulled off her mask and she saw a stream of blood under her nose. She reached into her training suit, took out a package of paper, rolled it into a piece to block her nose, proficiently completed this series of movements, and then put on her protective clothing again.

Live audience and audience watching the live broadcast of Damocles Military Academy: ? ? ?

Is this from the fight she had with the star beast before? Yu Tianhe was surprised, it took so long before she had a reaction?

Many people focused on the lead teacher of Damocles Military Academy.

Xiang Minghua coughed dryly: This kid always has excessive heat and likes to nosebleed. Fortunately, Ying Xingjue will not nosebleed when his body can't keep up with his perception, otherwise Wei San can't be hidden anymore.

Chapter 274

In front of the live broadcast footage of Damocles Military Academy.

Will Xiao Wei still suffer from malnutrition? Jiang Wenying looked anxiously at Wei San in the camera.

Malnutrition will cause nosebleeds? I think she's afraid she's thinking about something she shouldn't think about. Li Pi said unkindly, and he was also upset about Wei San who used her hands to touch other boys.

Little hooligan!

No one dares to provoke, that's the Ying family! It is said that he comes from the most powerful family in the Federation. What should he do if she gets into trouble?

Jiang Wenying frowned and said, Xiao Wei suddenly went from an A-grade to a 3S grade. She definitely needs to supplement her nutrition.

That's quite true. Li Pi couldn't help but sigh as he recalled the past. When she was in our college, I thought she was a B-grade player, but in the blink of an eye, Xiao Wei was already a 3S grade mecha soldier.

Previously, he had very little contact with A-grade players. When he was young, he was fortunate enough to go live and watch the Hephaestus competition once, and that impression was deeply engraved in his mind.

Wei San adjusted her protective clothing and suddenly stopped, causing a lot of trouble.

Something just passed by me. Wei San pointed at her feet and said.

Jin Ke followed and signaled to everyone to be on guard. He controlled his perception and infiltrated underground.

No living organisms were detected, but a trace of residual traces could be sensed.

[High grade star beast, at least Double S grade.]

All members heard Jin Ke's voice, the main team members entered mecha mode, while other school team members continued to maintain their original speed. Wei San, Liao Runing dispersed and guarded several of the most vulnerable positions of the school team.

Jin Ke did not move his perception center of gravity underground, but continued to expand outward as before.

Half an hour later, the rain in Guyu Stadium grew again. Everyone in Damocles Military Academy dared not even blink once more, fearing that the star beasts would sneak into the ground. At this moment, the star beasts hiding underground seemed to finally find a chance, and countless strong and sharp vines rushed out of the ground to attack them.

It is rare that all of them are ready for a sneak attack from the star beast, but they are also surprised to see these vines.

Fortunately, the school team members reacted extremely quickly, and with the main members guarding around, everyone successfully entered mecha and started combat mode.

At the live broadcast, the three main commentators who appeared together stood up and looked at the live camera with a serious expression.

Five military academies unexpectedly fell into the same ambush and surprise attack at the same time.

Giant mutant plants. Ying Yuerongs face darkened.

Giant mutated plants can devour all living organisms around them, and were once rampant in a certain galaxy. Later, due to the excessive human resources expended by military regions every year to deal with giant mutated plants, they joined forces with major military regions to destroy that galaxy.

This type of plant that mutates after being contaminated has been very rare since then, and they never expected that there would be such a thing on Gu Yu competition.

But considering the unique environment here, it is not impossible for plants to mutate. It is just that half a month ago, when the military region cleaned up some star beasts, no abnormalities were found.

The five military academy teams were all ambushed by the same giant mutant plants, and at this point, some differences can be seen.

Imperial Academy has Ying Xingjue, and those giant mutated vines should have been discovered from the beginning. Therefore, when they were in a strange state, the three mecha soldiers of the main team immediately took action to suppress the giant mutated vines.

The audience doesn't even know when the members of the Imperial Military Academy discovered it.

Damocles Military Academy was the first team that the audience noticed, only because they clearly said something.

Due to not knowing what it is, the main team members first entered combat mode to cover the successful entry of the school team members into the mecha.

However, Pingtong Academy, South Percy Military Academy, and Samuel Military Academy were only wary of the quiet and excessive environment, and the surprise attack of giant mutated vines caught the three military academies off guard.

At this point, the main members demonstrated their abilities and took the lead in entering the mecha, activating combat mode. Samuel and the main soldiers of South Percy Military Academy unconsciously approached the mecha engineers and commands, while Lu Shibai reacted the fastest on the way to Pingtong Academy. It is estimated that he gave orders to the three mecha soldiers to protect the school team members.

After the two main commanders reacted, they immediately requested individual soldiers to help the school team members. However, by this time, their school team had lost a hundred people, mostly the school team commanders and the school team mecha engineers.

The commanding skills of Lu Shibai are good. Ying Yuerong leaned back into her chair and said calmly, South Percy and Samuel are one notch behind in commanding.

She didnt say anything about Ying Xingjue and Jin Ke. The former is too strong, theres no need to say much, while the latter with the warning from Wei San, after thinking for so long, he couldnt show his ability temporarily.

Chapter 275

I think Wei San is suitable for spying, and its best to use a light mecha. Why is she a medium mecha soldier? Xi Haotians eyes are complex, and even a bit regretful. Last time in the desert arena, Wei San also discovered the double headed viper before other 3S mecha soldiers. This time, she was the first to detect underground movements, and her perception was quite sharp. Unfortunately, choosing a medium mecha resulted in average combat awareness.

In fact, Damocles three main soldiers cooperated well. Yu Tianhe looked at the meeting and said that although the three were not as good as those in Pingtong Academy and the Imperial Military Academy, they were better than those in Samuel Military Academy.

After Yu Tianhe finished speaking, she began to reflect on herself. She was like a Damocles military academy fan, and she would blow it from time to time. On the contrary, South Percy, her former alma mater, she didnt say much about it.

She was always attracted by Wei Sans side, while South Percys side is mediocre and doesnt show any special performance. Due to the slow response of the main commander, the school team has been severely damaged.

Yu Tianhe sighed in her heart. This year, as the lead commentator, there is Ying Yuerong next to her, and Xi Haotian. These two people are not very interested in explaining to the audience on site. She brought up the topic, and Xi Haotian could still say a few words. As for Ying Yuerong, she is completely according to mood.

Unfortunately, how was she chosen to be the lead commentator this year?

Yu Tianhe suddenly found a reason for herself to always pay attention to Damocles Military Academy, probably because they are all very unlucky.

The giant mutant vines have a greater impact on the five military academy teams. Even Damocles Military Academy, who had made psychological preparations in advance, it was still a bit unacceptable. These vines are constantly stretching out and retracting.

The young master is about to vomit, what the hell is this? Liao Runing never stopped his knife from the beginning and forcefully chopped it down.

He is most afraid of these long and curved things gathering together, its too disgusting. He thought the double headed viper was his limit before, but he didnt expect to encounter this kind of thing again this time.

Mutant plants should have disappeared in the Federation long ago. Huo Xuanshan knew a little.

After removing the initial chaos, they have now adapted to this type of battle, and the giant vines have instead been suppressed and beaten.

In order to save time and avoid the need for a large knife, Wei San directly split her weapon into two knives. With a slight movement of her fingers, the original long knife handle was shortened and deformed into a closed ring, while the long knife body was folded to form a fan-shaped knife.

Zhu Jiang held two fan-shaped knives and shuttled through the giant mutated vines that were twisting and attacking them. Every time she passed a piece of land, several vines fell from there.

Yu Tianhe on the live broadcast couldnt help but say, This knife can still deform. After they finish the competition, I must ask which mecha engineer designed it.

Xi Haotian glanced at her: If Damocles Military Academy has the ability for an engineer to create 3s mecha weapons, you should be familiar with them.

thats true too, thats just designed by Ying Chenghe. Yu Tianhe sighed, The child has some skills.

[Huo Xuanshan leads the way ahead, Wei San leads the team forward, and Liao Runing cuts off the rear.]

After hearing Jin Kes command, Liao Runing couldnt help but feel an explosion in the mecha cabin.

But command is command, he can only stay.

Thats not good. In the future, where will you really encounter a group of snakes? Wont you have to run away in fright? Wei San left with a smile before leaving.

Liao Runing became anxious and said, Wei San, shut up! Dont talk nonsense!

What if it really happens? !

His lifelong reputation as Master Liao was destroyed in an instant.

Chapter 276

The key to giant mutant vines lies in their large number, and as for their level, they are mostly A-grade.

The main team of Damocles escorted the school team away from the center of the attack range of the mutant vines. Jin Ke used his perception to detect the surrounding underground, and made sure that there were no traces of giant vines before he asked everyone to stop trimming. The mecha teachers seized the time to start repairing their teams mecha.

Liao Runing finally came over there. Looking from a distance, the mechas footsteps showed a hint of panic.

After finishing, when are we leaving? Liao Runing now wanted to rush to the finish line, pull down the flag, and leave the arena without hesitation.

After the mecha is adjusted and repaired, we should be able to leave. Ying Chenghe began to inspect Liao Runings mecha.

Young master Liao was about to breathe a sigh of relief when Jin Ke said, We cant leave yet. There should be high-level mutant plants here, lets eliminate them first.

Liao Runing became numb.

Those vines are more like root systems than the original body. Jin Ke lowered to one knee and put his hands on the ground. The original body should be here.

But he couldnt detect it, as if his perception had malfunctioned.

Live stream.

Ying Yuerong looked at the military school teams that gradually ended the vine attack and said: The mutant plant and the star beast are two completely different species. Although the plant has changed, it is still a plant in the Federation, while the star beast is an external species, so the commander can easily find the star beast, but cannot find the mutant plant immediately.

So the main commanders of other military academies have never noticed the strange movement of the giant mutated vine under their feet. Yu Tianhe thoughtfully analyzed, then why should Ying Xingjue discover the giant mutated vine so quickly?

Since he materialized the perception barrier, it's not uncommon to achieve this. Ying Yuerong, with a pair of phoenix eyes, stared at Wei San in the live broadcast camera. On the contrary, it was Wei San, who was clearly average in strength, but repeatedly reacted quickly and detected anomalies in advance.

The school team members who were eliminated have not died yet, said Xi Haotian

This is a necessary procedure. Just now, they were attacked by a giant mutant vine, and a large number of members of the South Percy and Samuel school teams were instantly knocked out.

Most of the rescuers had to be dispatched to take the students off the field. The vast majority of the outgoing members are mecha engineers and commanders. They cannot enter the mecha without being protected by the individual soldiers. If their protection is insufficient, they are immediately pierced by vines, and the energy light goes out, automatically exiting.

Some students were even stabbed in the body before even getting into the mecha, but fortunately, rescuers came out and put these seriously injured students into the treatment cabin.

However, these people need psychological counseling.

Otherwise, lets go see what those vines look like again? Wei San suggested.

No way! I wont go! Liao Runing was the first to object. Seeing them all looking over, he swallowed and said, Its too late for you to go now. I just came over, and those giant mutated vines have already retracted underground.

Jin Ke stood up and said, Its okay, Ive already found where the essence is.

Where is it? Wei San asked.

Jin Ke did not answer her question, but looked at Liao Runing and said, You and Wei San will join forces to kill the giant mutated vine.

Liao Runing instinctively wanted to oppose, but his pair of eyes met Jin Kes head on, he hesitated.

In the competition, everything follows the command of the main commander.

Jin Kes words suddenly appeared in Wei San and Liao Runings minds: Go back and pay attention to the surrounding trees. If you find any vines wrapped around the tree body, immediately start moving. That vine is highly likely the body.

Jin Ke suspected that Damocles Military Academy had fallen into the trap of mutant plants from the very beginning, and the body had seen them on the ground.

After the maintenance of Ying Chenghe was completed, Wei San and Liao Runing collected the mecha and returned the same way.

Many trees were entangled by vines along the way, and some of their trunks were even deeply marked by the vines.

Wei San and Liao Runing cut off everything with knives, but no abnormalities were found.

Chapter 277

Why dont you grow up properly, and have to grow into this ghostlike appearance? Liao Runing roast while poking at various vines. Long and twisted, and the vines are still bare.

The vines he cut off now have a rough surface, some of which still have thorns. Liao Runing feels that he has a little stronger acceptance ability.

If they should grow according to your wishes, they are no longer called mutant plants. Wei San is not afraid of these things, picking one at a time, and her movements are extremely fast.

Liao Runing: forget it, lets move faster and hurry up.

Wei San picked off a vine on a tree trunk and was about to agree when she suddenly took a step back and continued to look at the tree and the vine that had already been picked off.

Whats the matter? Liao Runing twisted around and saw that Wei San had stopped, followed by a few steps back and turned back. What are you looking at?

This vine is already dead. Wei San pointed to the vine on the ground, and the broken edge of the blade had dried up and died, indicating that it had been dead for a long time.

On the surface, it looks quite normal. Liao Runing leaned over and looked at the broken vine, even closer than Wei San.

Be careful! Wei San suddenly pulled Liao Runing away.

The two of them instantly entered the mecha and controlled it to stay away from the tree just now.

The vine, which was clearly dead for a long time, extended several small vines from the fracture and directly attacked.

If it weren't for Wei San's quick reaction, their bodies would probably have been pierced by these small vines.

Liao Runing in the mecha cabin had a pale complexion, and whenever he thought about the situation just now, his stomach began to churn incessantly.

What kind of thing is this? Young master Liao's weak voice came from inside the mecha cabin.

Wei San held her knife, her gaze not on the small and arrogant vines, but on the tree that had been entangled by the previous vines.

This tree is not particularly lush, and even has some dark and withered leaves that have been ravaged by the environment. It stands by the roadside and is completely indistinguishable from other trees.

Just when Wei San picked out that vine before, she accidentally noticed that its appearance was too complete, and it even had a strange sense of harmony with the trees.

After being picked out, the vine had already died.

There's a problem with those trees. Wei San affirmed. Just now, Jin Ke also mentioned that the giant mutated vines that attacked them were like roots and whiskers.

They fell into a fixed mindset, thinking that the vine itself should be similar in length to these vines.

In fact, the tree may have learned from the vine on its body and gradually mutated its roots into their current form.

Tree? Young Master Liao's courage suddenly increased again. It turned out to be a tree mischievous spirit, chop it!

Wei San retreated to the side and said, Young master, please.

Liao Runing bravely pulled out his sword and chopped towards the seemingly ordinary tree. Suddenly, from a mile underground, appeared thicker and longer vines than they had seen before.

F***! Liao Runing was startled and turned to run away, hiding behind Wei San. You hurry up and help me!

You are a 3S mecha soldier. Wei San expressed disgust at his unproductive behavior.

Liao Runing turned pale with fright and still remembered to complain: This tree looks small and short. How can it have so many thick roots!

Wei San dodged the attack of two giant vines on her side and kicked Liao Runing, saying, I'll deal with these vines. You go and chop that tree.

As soon as Liao Runing heard that his most hated thing had been taken away, he immediately rallied and came to deal with that tree.

However, as he approached the tree, he realized that the closer he got to it, the denser the roots became.

Wei San! You screwed me! Liao Runing hurriedly chopped around, not forgetting to blame her.

Wei San didn't care at all. She used a pair of knives faster and faster, just practicing with these roots. Later, the fan-shaped knife could even take off her hand, cut off several vines, and then spiral back into her hand.

Xi Haotian, who was in the live broadcast room, was originally watching the battle at the Imperial Military Academy, but with a little extra light, he observed the battle of Wei San and was surprised: how could she feel like she occasionally used a few moves that looked proper?

Holy s*** Holy s***! ! ! Young master Liao's voice quickly broke through the sky, but his sword did not slow down. The higher he screeched, the faster he cut.

These roots seem endless, even though Wei San and Liao Runing cut their swords even faster and even more, new roots continued to sprout underground.

Chapter 278

Liao Runing was forced to retreat by a large number of mutated vines and finally stopped shouting.

Dont retreat, dont let them wrap the trees. Wei San reminded from not far away.

I know. Liao Runings finger in the mecha cabin swiped rapidly on the control panel, manipulating the mecha to wield a knife.

At this moment, the ring of the Three Ring Knife gently hit the blade, slowing down the contraction speed of the giant mutated vines. Liao Runing seized the opportunity and cut off the roots that had already formed a small part of the cocoon.

At the same time, Wei San also cut off the giant mutated vines around her and rushed to Liao Runings side to attack this constantly growing cocoon together.

Perhaps feeling an unprecedented sense of crisis, the trees face and trunk were swaying without wind, and the number of roots was increasing.

Wei San had no intention of thinking too much and jumped into the cocoon that had already formed half a leaf.

Upon seeing this, Liao Runings heart jumped and the Three Ring Knife was swung again, trying to restrain the cocooning speed of the giant mutated vine. Unfortunately, this tree was no longer affected and instead became even crazier, accelerating its speed. The roots behind it were also constantly attacking him.

Liao Runing was no longer in the mood to pay attention to the shapes he was afraid of, and continued to wield his knife to destroy the tree cocoon and let Wei San come out of it.

Countless giant mutated vines have emerged from the ground, densely packed, and even appearing to block the sun. Liao Runings knife, once chopped on the tree cocoon, has little effect.

Because he found that even if he cut off a layer himself, within this time, the inner circle formed a cocoon, and the power of the roots to form a cocoon could undoubtedly crush anything.

Wei San! Liao Runings hand trembled a bit. He shouldnt have stepped back at first and let Wei San in.

What are you doing now? Wei Sans voice came from inside the tree cocoon.

Liao Runing let go of his heart and said, Youre okay.

What would happen to me? Wei Sans voice echoed through the mecha and out of the tree cocoon, a bit dull. Wait a moment, Ill cut down this tree right away.

It was unknown if it was Liao Runings illusion. When Wei San finished speaking this sentence, the tree roots moved even harder.

Liao Runing raised his three ring knife and quickly cut off a layer of tree cocoon. As it formed a layer, he cut it off.

At last, there was a sudden crashing sound inside, and these layers of tree cocoons began to fall to the ground. The giant mutated vines that broke through the ground and constantly waved also suddenly fell to the ground.

Wei San walked out of the gradually loosened tree cocoon with her closed big knife and said, This tree is too difficult to cut.

Neither Liao Runing nor the audience in front of the live broadcast camera saw how Wei San cut the tree from inside.

At this moment, Liao Runing didn't have the heart to pay attention. When he saw Wei San safely come out, he controlled the mecha and hugged Zhu Jiang, saying, I was scared by you just now.

Wei San chuckled and kicked the dead vine on the ground, Aren't you scared out of your wits by this thing? Why are you still using me as an excuse?

Liao Runing: before was before, I, this young master was very worried about you.

Alright, thank you for your concern, young master. Wei San turned around and looked at the tree that had been cut off from below the root. Can this tree be used for resources?

[The Imperial Academy kills a giant mutant plant. Repeat]

[Damocles Military Academy kills a huge mutant plant.]

Upon hearing the sound, Liao Runing looked up and pointed to the beam of light, saying, Its good with just this.

Wei San looked up and said, Did they also encounter this kind of thing at the Imperial Academy?

Liao Runing said, Maybe weve all encountered it. Its only fair for everyone to encounter such an evil thing.

After the leader of the sponsor over there arrives and collects these things, Wei San and Liao Ruling turn around to find the group.

They did not allocate resources, and the results of a military academy were synchronized, which can also be seen from Jin Kes side. He is the main commander, and these are all the responsibilities of Jin Ke and the main engineer, which should be taken care of by Ying Chenghe.

Jin Ke and others saw them return and stood up to continue moving forward.

Chapter 279

Is the tree its body?

On the way, Jin Ke couldn't help but fall into contemplation after listening to Wei San's words. So after the tree mutated, it used its roots to imitate the vines winding around its body.

You haven't seen those roots twisted into a cocoon, Liao Runing thought of the previous scene, only feeling a surge in his stomach. I suspect that tree is conscious and will imitate everything seen around it.

Jin Ke: It's normal for giant mutant plants to be conscious, you've worked hard.

At that time, in a crisis situation, I made a quick decision, overcome psychological barriers, and desperately cut off those roots to prevent the tree cocoons from forming. Liao Runing began to blow empty air again. The Three Ring Knife couldn't work on mutated trees. I could only grit my teeth and cut down with one blade by blade, striving to break through myself.

Huo Xuanshan: So in the end, you knocked down the tree?

Liao Runing froze and immediately looked calm, Of course not. I'm responsible for the mutant roots outside. Wei San jumped into the tree cocoon and I don't know what happened inside. The mutant tree was broken, and the cocoon and those mutant vines all quietened.

Everyone turned their gaze to Wei San.

Wei San: what are you looking at me for?

She just lost her spirits and didn't hear what Liao Runing was saying at all.

How did you deal with mutated trees inside the cocoon? Jin Ke asked.

I sawed it off directly. Wei San said roughly.

The word sawing must be formed under certain conditions, and Wei San uses a knife, which should be said to be cutting.

Obviously, Liao Runing, Jin Ke, and Huo Xuanshan did not understand the specific operation of Wei San.

She has an electric saw on her mecha arm. Ying Chenghe explained from the side, adding it on his own initiative.

Wei San has no specific tactics to speak of, and has just been notified to take up employment and become the main mecha soldier as a 3S. Ying Chenghe thinks that relying solely on a knife is not enough, and needs to make the mecha as suitable for Wei San's gameplay as possible.

Hence he took inspiration from the A-level mecha weapons before Wei San and designed a chainsaw on Zhu Jiang's arm. If she was stuck in a melee with an opponent, Wei San could let the chainsaw come out of the mecha arm and attack the opponent.

After listening to Ying Chenghes explanation, Jin Ke and the others didnt have any special ideas. Instead, the audience in the live broadcast unified an idea: It was still Damocles who was most roguish.

The higher the level of the mecha, the simpler the weapon, especially the 3S mecha, which basically only has one weapon. Soldiers at this level pursue the ultimate purity.

For many years, the Federation has not seen such a situation where 3S mecha accumulates weapons. With more weapons, soldiers attention will be distracted, unable to master a certain type of weapon, and their level will actually decrease.

Chapter 280

Sawing off the mutated tree directly, and it loses all its abilities? Jin Ke still had doubts. In his opinion, the root of the tree is the key, and some types of trees can regenerate even after their trunks were broken.

Wei San let out an oh sound and said, After sawing it off, I inserted my knife into its base and turned it around in a circle.

Jin Ke glanced at Wei San. She said it easily, but the roots of this tree alone were so difficult to deal with, with such a large number. At that time, Wei San was already a threat to the body in the cocoon, and it was impossible to easily solve it with just an electric saw.

Some things will be asked after the competition.

Jin Ke wants everyone to stay alert and not let down their guard. This Gu Yu arena is probably not too easy, from the first unknown star beast to the current giant mutated tree, the difficulty is more difficult than before.

The staff responsible for collecting the star beasts and mutant plants killed by the five military academies are carrying back the mutant trees just killed by Damocles Military Academy.

This tree looks no different from a normal tree, its still dying and not very angry. It can even differentiate into so many huge roots.

This is what appears to be roots in the body. The person responsible for recycling over there said that those roots look like vines at first glance, and its completely unimaginable that they are tree roots.

Several staff members chatted while carrying the remaining roots onto the aircraft.

This is the root of the mutated tree? The staff looked down at the small piece of root buried in the soil left by the mutated tree.

Which individual moved their hand? What was this doing right in the middle of the mutant tree root? The staff looked at the large hole in the middle with a regretful expression. Its almost destroyed. This mutant tree is probably dead throughly, and the material properties need to be discounted.

This is already quite good. the staff member who had just moved the roots spoke, I heard from the person responsible for recycling materials from the Imperial Academy over there that Ying Xingjue personally handled the mutation tree by hand and directly attacked it with perception. The root of the mutation tree has been completely shattered, and even the root whiskers cannot be used.

They exchanged them for resources for no reason, and the person in charge over there regretted it to death.

Ying Xingjue's perception can already attack mutated plants? A staff member asked in surprise.

That's right, the organizers have started discussing continuing to transfer personnel from the military region to protect this competition and prevent accidents.

I think it is just to prevent accidents from happening to Ying Xingjue, but he has such strong perception, so there's no need to be afraid of anyone. I guess he can directly use perception to attack soldiers.

Who knows what the organizers think.
