

## Smash All 281

### Chapter 281

The rain stopped late at night, and the Damocles Military Academy team still did not stop, but hurried forward.

Two hours ago, the beam of the Pingtong Academics killing a star beast was lit in the southwest, in front of Damocles team. As well as two military academies in the rear, Samuel and South Percy, who had both gained.

Jin Ke is not like the outside world and able to watch the live. It is unknown that all five military academies have encountered the same mutation tree, and it is only speculated from the sudden loss of numerous team members from South Percy and Samuel Military Academies that the two military academies may also encounter similar situations.

The speed of moving forward at Damocles Military Academy is accelerating, and there is a desire to distance oneself from these two military academies in order to avoid any intersection.

In fact, all three military academies were hit by surprise attacks, but they didn't have the heart to find mutant entities. Pingtong Academy, due to the quick command of Lu Shibai during the journey, prevented a large number of school team members from being eliminated. They had spare time to find the mutant body, but Pingtong Academy chose to rush on.

Damocles Military Academy encountered a group of star beasts on the way, and when they were finished, Pingtong Academy had come in front of them.

Jin Ke predicted to stop and rest now. There was a possibility of being caught up by the military academy behind him tomorrow, so he asked everyone to continue moving forward. He circled around a place on the map that marked an abandoned building, preparing to go there and rest together.

Guyu arena often has a considerable narrow section of road, coupled with abandoned and collapsed buildings around it, which affects the progress of the mecha. If the mecha needs to be in flight mode, it will consume energy. Therefore, all the crew collected the mecha and quickly rushed forward. Three mecha soldiers from each team surrounded the mecha engineer and commander in the middle, only the slight sound made by the soles of their shoes stepping on the muddy road, and no one spoke.

Jin Ke hooked up all his commanders senses, this time not only detecting the surroundings, but also the movements underground. However, the perception detection of mutated plants was not obvious, and he could only focus as much as possible on whether there were any abnormal movements underground.

Fortunately, they arrived at their destination without any danger along the way.

This abandoned building has over seventy floors, but half of it is broken from the middle, and the other half is crumbling. The black and gold round emblem on it is about to fall off, giving the feeling that the entire building is about to fall down at any time. Jin Ke chose this building because it is marked with blue triangles on the map.

The building of Gong Yiliu.

Gong Yiliu and Yu Qingfei are equally famous, and he directly established the position of the medium mecha. Before him, light mecha and heavy mecha each accounted for half of the world, and no one recognized the strength of each others mecha. As for medium mecha, everyone looked down on it, thinking that this type of mecha, like its name, had poor performance and could not fully exert its power.

However, after the reform of Gong Yiliu, the medium-sized mecha directly surpassed the two types of mecha, light and heavy, and became the best mecha type to draw on the strengths of both.

Up to now, among the three mecha soldiers in a standard team, the most crucial ones are those who control medium mecha. For example, Ji Chuyu from Imperial Academy, Zongzheng Yue from Pingtong Academy, Xi Wutong from Samuel Academy, and Quinley Eli from South Percy, these four individuals have received more attention from all parties compared to other main soldiers.

At the same time, Gong Yiliu is also a commercial prodigy, and he led the invention of the appreciation type mecha, with the slogan of enabling ordinary people to achieve their mecha dreams, making friends with a large number of wealthy people without high perception, and obtaining a large amount of investment. Now, the mechanization of A-class mecha material parts is what he pushed forward with his own hands.

In the era of Gong Yiliu, Guyu Star was still a normal planet, with countless office buildings standing here. Later, the environment became harsh, and Gong Yi family moved from Guyu Star to Emperor Capital Star. From then on, the neutral faction became the main investor in the First Military Region.

Guyu Star has also become one of the arenas.

These blue triangle markings on the map have been around for a long time, and are said to be from the organizers to pay tribute to Gong Yiliu.

However, Jin Ke, as a commander, certainly has no special admiration for Gong Yiliu, a mecha master. He stopped here for another purpose.

## Chapter 282

Wei San, you go upstairs with Huo Xuanshan and Ying Chenghe. Jin Ke commanded and waited for all the school teams stationed in the hall on the first floor of the abandoned building.

Huo Xuanshan was the first to be vigilant: Is there a star beast in the building?

Jin Ke gestured for him not to be nervous: No, Chenghe said before that Gong Yiliu likes to hide materials in the Guyu Star Building. I have watched the previous competition videos and found that only this building has not been damaged by mechas. You can go in and take a look, maybe you can find something good.

The Hephaestus competition has been held for so many sessions, with countless teams coming and going, and most of the buildings have been affected by the battle to some extent.

It is said that the authenticity needs to be verified. Ying Chenghe reminded.

There are no waves without any wind. Anyway, if you pass by and rest at the station, you can go and take a look. Jin Ke thought she could take a look.

Audience of live stream: ? ? ?

I thought the chief commander of Damocles Military Academy had a special purpose of stopping here to have a rest. As a result, the Gu Yu competition was regarded as a treasure hunt?

Excessive! Arrogant!

After hearing Jin Kes words, the audience felt more and more that the main members of the Damocles Military Academy were all wonderful.

Upon hearing this, Wei San suddenly became excited. The free materials were still kept by Gong Yiliu, and they must be good!

I also want to go, let Huo Xuanshan stay. Liao Runing also wants to participate in the treasure hunt.

Jin Ke disagreed, The activity range of the building is not enough. Huo Xuanshan is more likely to escape with Chenghe if something happens.

Master Liao went to patrol nearby in frustration.

Under the eyes of the whole federation, the three people were ready to find the materials that Master Gong Yiliu said were hidden in the building.

Not all places on the track have cameras. The location of the cameras was initially calculated by the commanders of each military region, and the locations where each school team would pass and be stationed were installed. After so many competitions, the camera location was basically fixed.

For abandoned buildings like this, apart from their large space, there is basically no space for mecha deployment, so the organizers will not install cameras and there will be no team wasting time here.

Who knew that the Damocles Military Academy team would go upstairs to look for treasure because of a piece of gossip.

Although they can't see how the three people search for treasure, the audience watching the live broadcast in the evening was still stimulated by Damocles Military Academy. They stared at their live broadcast camera, hoping to wait for Wei San and some other people to come down to see if there was really a treasure.

Five minutes later, Wei San, Ying Chenghe, and Huo Xuanshan came down.

Audience: ? ? ? So fast?

Jin Ke was also surprised, Have you finished checking?

No. Wei San dropped a sentence and began to look at the first floor with Ying Chenghe.

There is a camera there. Ying Chenghe was the first to discover one.

Not to mention the audience in front of the camera, even the live streamers were confused. At this moment, Yu Tianhe went to rest, leaving only Xi Haotian and Ying Yuerong. The live audience who were still watching the live broadcast at night were eagerly watching the main interpreter, waiting for their explanation.

Ying Yuerong: Other military academies are taking a good rest. Why cant Damocles and this gang be at ease?

They want to remove the camera? said Xi Haotian was flabbergasted. He was a single mecha soldier who didnt understand anything except the battle explanation, especially the crazy operation of this Damocles Military Academy.

Ying Yuerong said, probably. She commanded a 3S military district in a grand manner, but she couldnt understand it at all.

The audience in front of the live broadcast scene and the Damocles Military Academy live broadcast shot also stopped dozing. They opened their eyes and watched Wei San and the three rushing towards the camera, stepping on the wall and stepping up.

At this moment, the whole Federation is watching the live broadcast of Damocles Military Academy, and all of them see the face of Wei San appear in the camera.

Chapter 283

3212 Star.

Li Pi was dozing off when Jiang Wenying woke him up. When he opened his eyes and saw the face of Wei San in the camera, he was startled and said, Whats wrong with this child? It was terrifying.

Everyone saw Wei San smile at the camera and then step back.

At that moment, the audience clearly understood that Wei San, who was smiling at the camera, was not smiling at them, even with a hint of carelessness, but they almost fell into it.

As for the next day, Wei Sans roguish fans doubled again, and this smile was also hailed by fans as Wei Sans first shot in their hearts.

Wei San jumped down and followed the camera to touch the energy conversion electricity stored by the organizer.

She squatted there with Ying Chenghe, unaware of what had happened, stole the energy from the organizers live broadcast and transferred it to the inside of the building.

Everyone on the live broadcast saw them struggling for a long time, and finally the building lights turned on.

Ying Yuerong and Xi Haotian said,

Xiang Minghua supported his head with one hand, blocking the view of other military school teachers and pretending that he did not exist.

Just let the elevator turn and cut off the lights on the first floor, Ying Chenghe hurriedly said. Try the thickest line.

Im trying. Wei San squatted under the first floor gate, constantly testing the line.

It has to be said that the building built by Gong Yiliu is full of the smell of money, and all the lines are still good up to now, except for a lot of dust.

At this moment, the militarys live broadcast camera specifically cut to the outside of the building, and the audience could clearly see that the lights on this floor lit up and on that floor lit up, which was very eye-catching.

Audience: In the evening, you kept a low profile and should feel lonely. If you continue like this, it would not be unreasonable for a star beast to attack.

Fortunately, Wei San and Ying Chenghe quickly took care of it, and the three of them walked naturally through the hall and into the elevator under everyones gaze.

Liao Runing spoke out to everyones hearts saying, is this okay too?

Jin Ke, who was resting on the ground, glanced at the camera and exclaimed in a loud voice, The competition rules do not say that it is not allowed to use the live cameras energy and electricity.

This type of energy is different from mecha energy, and mecha cannot use it, so no one has ever thought of paying attention to live cameras energy.

The two live commentators have the same idea in their minds: we will add this rule to you guys immediately in the next match.

I heard that 7 is Gong Yilius favorite number. Lets go to that floor first and take a look. Ying Chenghe observed while standing in the elevator.

Youre quite familiar with his situation. Wei San also searched for Gong Yiliu on the starnet, but theres no substantial content.

Ying Chenghe smiled and said, Gong Yijue and I used to be classmates. He always boasted about his ancestors.

Both of them are 3S mecha technicians and are located in the Imperial City Star. The overlap rate between the school class and the guidance teacher is extremely high. Even Gods talents used to be a child, no different from ordinary children.

Gong Yijue felt that he had a awesome ancestor, and during his childhood, he couldnt help but show off to others.

So youre going to dig his ancestors graves. Huo Xuanshan stated quietly.

Wei San and Ying Chenghe turned their heads together to look at Huo Xuanshan.

Its just a treasure hunt, how can it be said to be digging a grave? Ying Chenghe said without any shame, and Gong Yiliu is not buried here.

Wei San patted Ying Chenghe on the shoulder and said with confidence, When we have found it, we can give him an explanation.

The elevator opened and the three of them walked out, with a thick layer of ash on the ground that had not been visited for many years.

Actually, I dont think its possible. Its all due to Gong Yijue blowing, Ying Chenghe said. Gong Yiliu has been dead for so long, and his descendants are still in charge of these buildings. It should have been found long ago.

The seventh floor should be the workshop of the mecha technician, with large empty rooms. Everything inside was emptied during evacuation, but there was still a lot of waste paper left.

Wei San bent down to pick it up and saw that there were advertising papers from that era and some messy nonsense written by mecha technicians, which had nothing to do with the mecha. No wonder they were abandoned here.

Does Gong Yiliu have his own workspace? Wei San asked Ying Chenghe.

Its on the seventh floor. Ying Chenghe thought for a moment. Gong Yijue said that their family now maintains this habit, and all the best mecha technicians will be on the seventh floor.

The three of them found room seven, which was even more empty with no waste paper.

There doesnt seem to be anything special. Huo Xuanshan looked around and said.

Ying Chenghe knocked around the walls but didnt notice anything special: Lets go somewhere else and take a look.

Wei San stood under the ventilation vent of the room and suddenly asked two people next to him, Do you smell anything?

Chapter 284

Whats the smell? Huo Xuanshan walked over and sniffed, but didnt smell anything.

Wei San stood in place and sniffed again, That rotten smell.

No one has entered this building for a long time, and there may be corpses such as mice. Ying Chenghe looked up at the ventilation opening on the ceiling. This kind of place is very easy to have such things.

Not only the foul smell, but also Wei San paused without speaking.

The two people next to her also reacted, and for a moment, Room 7 was extremely quiet. Finally, Ying Chenghe said, After putting on the protective clothing, and after wearing the mask, you shouldnt smell any odor according to logic. Is your mask broken?

This polymer filter mask will filter out all foreign molecules in the air, leaving only beneficial air components for the human body. They cannot smell any special smell, regardless of the fragrance or odor.

Wei San reached out and took off the mask, sniffing the smell in the air. Huo Xuanshan also took off the mask, and from nearby Ying Chenghe checked Wei Sans mask and did not find any damage to her mask.

The two of them stood in the toxic air and sniffed for a while, and Wei San confirmed, Its a mixed odor and aroma coming from above.

Ying Chenghe also took a mask and sniffed, I didnt smell anything, where did you get the aroma?

The three of them couldnt find a reasonable explanation, but currently there is a more important thing: why can Wei San smell this smell through the mask?

Change to another mask. Huo Xuanshan exchanged his mask with Wei Sans mask, try to smell it again.

Wei San put it and said, Nothing.

I didnt smell anything. Huo Xuanshan said after putting it on.

Finally, the three of them decided to continue up and see if they could discover anything special. Inside the elevator, Wei San reached out and pressed for the fortieth floor, which is also the highest floor that the elevator can reach in this building. Continuing up, the building had already tilted outward and was constantly about to collapse.

I smell it again. Wei San finished pressing the elevator and spoke. It seems to be up there.

Huo Xuanshan and Ying Chenghe had no doubt, Wei San is over 3S and is highly likely to become a soldier and engineer double major in the future. It is normal for her to be more sensitive.

As soon as the elevator opened, Wei San led them out first. She pulled down the hood and stood outside to smell for the scent, then turned her head and turned her gaze to another place.

Following her, Ying Chenghe also took off his mask and took the time to smell for it. He didnt know why he had a feeling that the smell seemed to have been something he had heard of before.

He had heard of it, but had not smelled before.

The rotten aroma, which has been described to him before, was temporarily displaced by Ying Chenghe's memories.

The smell is directed over from there? Huo Xuanshan followed Wei San over and looked at the upper part of the building, which was leaning downwards.

Wei San nodded and said, It's inside.

A few people walked quickly up the sloping corridor, their footsteps flying like flies. Ying Chenghe was sandwiched between them, holding his arms and not even touching the ground with his feet.

Ying Chenghe:

However, he did not express any objection because Wei San did not wear a mask and was constantly inhaling toxic air.

It's still higher up. Wei San looked up and said.

The mecha cannot be deployed here, only people can go up, but she thinks the source of that smell is not on the roof.

Half an hour later, the three finally stopped at the 57th floor.

I feel like its on this floor. Wei San put on her mask. We should look everywhere.

This building is already half horizontal, and the three people are slowly moving forward together.

Its getting closer and closer. Wei San gestured for them to turn and walk towards a corridor.

They were walking on one side of the wall in the hallway at the moment, and after walking about sixty meters, Wei San stopped. She asked the two of them to look up at their feet and say, Here.

At their foot is a specially made door that cannot be opened with brute force.

Ying Chenghe squatted down and wiped the ash on the verification lock beside the door with his hand. After the original appearance was revealed, he looked up and said, Its a combo lock.

Wei San also crouched down and said, Can we open it?

Chapter 285

Ying Chenghe nodded a few times and found that the verification lock was on. The energy here should coexist and be independent of the buildings energy: It should be a pupil identification or a phrase password

He chose the phrase password.

A voice sounded: Say my phrase.

Open sesame. Wei San instinctively said.

Ying Chenghe and Huo Xuanshan both looked at Wei San, clearly surprised by her words.

Password failed, there are still two chances left. a mans voice transferred over.

Three people:

Ying Chenghe thought carefully and said, Gong Yiliu is the most awesome?

Password failed, theres another chance. Praising me is useless.

Wei San: Yu Qingfei is more awesome than you.

Huo Xuanshan, standing next to them, was in a daze. The three attempts at the phrases were easily swayed and tossed around in less than a minute. Shouldn't they try to think about what phrase to use?

The third time the password failed to sound, but the door did not open. Just as the three of them thought it was from energy exhaustion, the lock suddenly opened.

Huo Xuanshan: ? ? ? It really opened.

When opening the lock, there was also a sentence: Gong Yiliu, you will be stronger than Yu Qingfei sooner or later! The tone was full of encouragement and praise, which was very inspiring.

Ying Chenghe . It turns out that all the masters back then were like this, each one becoming more and more strange.

You can even think of such a phrase Huo Xuanshan gave Wei San a thumbs up.

Wei San raised her eyebrows and said, You should ask why Gong Yiliu set such a password.

The three of them stood by the door, bending down and looking inside, all stunned: the room was in the same state as before, with almost everything empty, but at this moment the room emitted a faint purple light.

Gong Yiliu passed away for such a long time, and the Gong Yi family had worked here for a long time. It is believed that something important should have been taken away by them. Wei San and the others came up, half of them sincerely wanted to explore, and the other half purely came up to play, just to relax.

Its right inside, Ill go down and take a look. Wei San wanted to pry down the door.

Dont. Ying Chenghe pulled her back, Wait.

He always felt like he was about to remember where he had heard about such rotten and fragrant air.

Huo Xuanshan jumped to the door on the other side and bent down to look inside. His voice became serious, Come and take a look.

Wei San and Ying Chenghe jumped over and looked inside the door: the inside was originally the side facing away from the wall, but now because the building has fallen horizontally, it has become the ground. A purple translucent mushroom has grown in the corner near the ceiling.

Ying Chenghe said, I think we may be finished.

What? Wei San didnt understand.

Ying Chenghe didnt have time to say anything and jumped straight down.

Chenghe?! Huo Xuanshan instinctively jumped down.

After jumping into the river, Ying Chenghe charged straight at the purple transparent mushroom, carefully and quickly removed it, loaded it into the combat readiness bag, and shouted to Wei San and Huo Xuanshan, Lets go, lets go straight into the mecha, run away!

Wei San and Huo Xuanshan didnt ask either. The three of them rushed out of the room, ran out of the corridor, and directly released the mecha in place.

The mecha had a large volume, and as soon as they rushed out, they directly collapsed the half collapsed building.

On the first floor of the hall below, Jin Ke and others heard the sound and immediately activated combat mode, running out of the hall.

Jin Ke, lets hurry to the finish line, its over!

As soon as they merged, Ying Chenghe immediately shouted.

What have you done? Jin Ke asked.

Ying Chenghe in the mecha cabin was already sweating profusely and quickly said, Weve found a Purple Liquid Mushroom. Its too late, lets go first before speaking.

At the moment he saw the Purple Liquid Mushroom, he remembered that he had heard of it in Yu Qingfeis teaching before, but at that time Yu Qingfei only brought it, and Ying Chenghe did not pay attention.

Jin Ke instantly figured out the way with less probability of encountering the star beast all the way from his head, and fled here with the Damocles Military Academy team.

On the live broadcast, the two mediators frowned as the team at Damocles Military Academy fled in confusion, unsure of what the Purple Liquid Mushroom was.

The two mediators temporarily left and sent someone to find Yu Tianhe.

Chapter 286

Ten minutes later, Yu Tianhe ran over with her hair in disorder, wearing only one shoe: Where is the Purple Liquid Mushroom?

Ying Yuerong pointed to the scene of Damocles Military Academy on the wall: I dont know who has it on their team.

Yu Tianhe could only see them running. She lowered her head and opened the live video she had subscribed to on Lanfa Media, where she could see the replay. She pulled forward and quickly watched until she saw what Ying Chenghe had said.

Absurdity! Yu Tianhe was angry at the actions of these three people, especially corresponding to Chenghe. Since Ying Chenghe knew about the Purple Liquid Mushroom, he should immediately notify us to collect it. What are they doing now? A mecha engineer made this choice in the competition! Where are they placing their own military academy and other military academies?

Ying Yuerong and Xi Haotian still didn't understand Yu Tianhe's anger.

The purple liquid in the Purple Liquid Mushroom can be incorporated into the mecha material, and with just one drop, the mecha's ductility and toughness can be fully utilized, even reaching a certain amount, which can improve the quality of the mecha, that is, upgrade. This liquid also has a fatal attraction to star beasts, which can elevate its level. After calming down, Yu Tianhe explained in a deep voice. They are now carrying bombs with them, and all the Star Beasts on the Guyu arena will run towards them.

Purple Liquid is only effective against Star Beasts and mechas, useless to humans, and cannot enhance human perception. In addition, the Federation has not yet been born, so only a small number of top mecha masters knew about the Purple Liquid Mushrooms.

Now they can only be grateful that a barrier has been set up outside the track. The Star Beasts of Guyu Star cannot smell this smell temporarily, but they can persist for up to three days.

Yu family has a box specifically designed to store Purple Liquid Mushrooms, which can block this attraction. I am applying to temporarily leave Guyu Star and return to the Yu family. Yu Tianhe declared in a solemn voice.

After a commotion in the background, everyone understood the seriousness of the matter, and the military immediately sent someone to escort Yu Tianhe back to her home.

The leaders and teachers of Damocles Military Academy got together temporarily in the evening with different expressions.

Why is Chenghe so reckless this time? If he can pick this kind of thing himself, what will he do next?

Although they didnt see how the three of them got the Purple Liquid Mushroom, only a small number of mecha engineers knew about it. Among the three, only Ying Chenghe was a mech engineer, and naturally he did this.

Jin Ke, too. They cant rest well. Do they have to insist that they go for some treasure hunting, did they eat too much?

Theres no need to think about this rounds ranking. I just hope they can come out safely. Yu Tianhe has returned and there seems to be no shielding box. The severity of the matter will definitely exceed our control.

Whenever teachers think of the news they just learned, their hearts jump with fear: these students are not poking a hornets nest this time, but piercing the sky!

Jieyu Man and Xiang Minghua glanced at each other, but they knew the purpose of Ying Chenghe doing this.

As a super 3S mecha soldier, if Wei San can use this material on her mecha, her strength will definitely be improved.

However, it is still too risky, as it has already threatened the entire area of Guyu Star, not just the arena.

On the field, Imperial Academy.

Ying Xingjue took a deep look in a certain direction and finally turned to the main team member, saying, Lets accelerate to the finish line.

Ji Chuyu: No longer looking for Star Beasts?

Go straight to the finish line. Ying Xingjue ordered all members to get up and rush on their way.

There wont be any Star Beasts here at the moment, and there shouldnt be any mutant plants. Jin Ke signaled to everyone to stop.

Ying Chenghe took out the Purple Liquid Mushroom and let Jin Ke keep it. At the same time, he erected a barrier with perception to prevent the odor from spreading out as much as possible, and the entire crew remained in mecha combat mode.

He ran into his own mecha and, using his fastest hand speed in his life, dismantled his mecha compartment to increase its space.

Wei San, come in and protect me. After the renovation of Ying Chenghe, two people can enter, but the undead turtles perfect protective ability has been destroyed.

## Chapter 287

Ying Chenghe first took back the Purple Liquid Mushroom and let Jin Les barrier continue to stand outside his mecha. Then he explained to Jin Ke and others, and intentionally told people outside the camera, Yu Qingfei once taught me how to temporarily make tools to block the odor emitted by Purple Liquid Mushrooms. I went in and made the tools to ensure that we wouldnt be discovered by the Star Beasts for two days. Wei San should drive the mecha inside.

Like the two person cabin before the Imperial Academy, it was designed to save energy while protecting the mecha and handing it over to soldier pilots, allowing the mecha engineer time to do necessary things on the way.

Damocles Military Academys school team continues to drive. After Wei San entered the mecha, Ying Chenghe still controlled the mecha.

Wei San, Ill direct and you do it. Ying Chenghe thought Wei San could better make a shielding box. Yu Qingfei only casually mentioned that if he suddenly met a Purple Liquid Mushroom outside and he didnt have the necessary materials in hand, what they should do.

At that time, Ying Chenghe was listening to Yu Qingfeis lesson on making tools, and the focus was not on Purple Liquid Mushrooms. He never expected to encounter Purple Liquid Mushrooms one day, and they would come so quickly.

If they didn't open that door, the Purple Liquid Mushroom may gradually decay and disappear in unmanned corners. Those doors and walls must have been specially made by Gong Yiliu. No one expected him to plant Purple Liquid Mushrooms in the corners of the ceiling.

The growth period of Purple Liquid Mushroom is too long, and no one has seen it except Yu Qingfei. It was unexpected that Gong Yiliu could still obtain spores of Purple Liquid Mushrooms.

On your left is the undead turtle armor that was just removed, with half of its energy remaining, integrated into your perception Ying Chenghe said carefully.

The protective armor he removed is the best piece of material among all the protective armor for the heart of the undead turtle.

This period of time has been a torment for both Jin Ke and Wei San.

In order to prevent the odor of the Purple Liquid Mushroom from emanating, Jin Ke has established a perception barrier to the maximum limit, while Wei San, under the guidance of Ying Chenghe, poured her perception into a box made with a mixture of protective armor and energy.

Is it enough now? Wei San reached out and rubbed the blood under her nose, asking Ying Chenghe.

Try putting the Purple Liquid Mushroom in.

Wei San picked up the Purple Liquid Mushroom according to his words. The mushroom head was transparent. It could clearly see that the purple liquid was flowing slowly and still emitting light.

She looked away and put the Purple Liquid Mushroom into the box.

How's it going? Can you smell it? Ying Chenghe asked.

Seeing Wei San shake her head, he breathed a sigh of relief.

Chapter 288

After they made the temporary shielding box, the staff responsible for recycling resources from the organizer showed up voluntarily.

Damocles cadets, do you want to exchange Purple Liquid Mushrooms for resources? The staff advised, Your mecha engineer should know the terrible things about Purple Liquid Mushrooms. Now let's take them out. The barrier of the Guyu arena can prevent the star beasts here from smelling the smell of Purple Liquid Mushrooms. You can not only continue the competition, but also exchange for a lot of resources.

You guys took it out, won't you still attract the Star Beasts? Ying Chenghe asked back, Guyu Stars starbeats are even more numerous than the arena. Do you want the entire star to enter turmoil just for one Purple Liquid Mushroom?

The star beasts from so many places on Guyu Star are rushing towards one place, and without a large military district team, the people on Guyu Star may become food for the rioting star beasts.

Staff: Master Yu Tianhe has now returned to retrieve the shielding box, and we are confident to temporarily seal the Purple Liquid Mushroom.

No need. Jin Ke disagreed. I remember rule 208 of the competition, which states that whether military students exchange resources during the competition is a voluntary choice, and we choose not to exchange.

At the beginning of the competition, each military academy dealt with the killing of Star Beasts themselves and made them into materials. Later, the exchange system gradually formed, and the organizers of the military region jointly organized and collected a certain handling fee to exchange resources for each military academy, so that they could use them on the spot as soon as possible.

As for the handling fees, they are some materials that have been processed.

Staff: Damocles cadets, I remind you once again that if you can exchange it for resources, you still have the hope of winning this game.

Saying no payment means no payment, why are you all still here? Liao Runing said impatiently, We won't exchange even if we lose.

Staff: I hope you all don't regret it.

Several staff members boarded the aircraft and left, their backs teeming with anger.

After they left, Ying Chenghe said, The maximum efficiency of the temporary shielding box is only two days, and every minute after that, it will attract a large number of star beasts.

Cant we make another temporary shielding box? Huo Xuanshan asked.

Ying Chenghe shook his head and said, The smell of Purple Liquid Mushrooms is special. The temporary shielding box has been used once, but it is invalid if used again.

Jin Ke thought for a moment and asked, Gong Yiliu planted spores. Have you ever thought about the side effects of Purple Liquid Mushrooms? Where did you find them, without a shielding box?

It should be Gong Yilius previous studio, which was planted in the corner of the ceiling. I suspect there are some special ingredients inside the wall. explained Ying Chenghe

He asked Wei San to make a temporary shielding box and put his perception in the middle layer of the material, temporarily masking the odor of Purple Liquid Mushrooms, which is the same principle as Gongyi Lius studio.

The interlayer between the walls and doors of Gong Yilius studio should have been filled with special substances to achieve the effect of isolating the odor of Purple Liquid Mushrooms. However, it should be speculated that once damaged, the intermediate substances in contact with the current external environment will immediately become ineffective.

Since the staff who just came to exchange said that Senior Yu went back to get the shielding box, Chenghe suspected that Gong Yiliu studio was an enlarged version of the shielding box made by Yu Qingfei.

Even if Gong Yiliu is not a fan of Yu Qingfei, he has always been striving for his goal, which is truly moving and hardworking. Even his phrase is full of motivation, and he has money. It is too simple to create an enlarged version of the shielding box made by Yu Qingfei.

## Chapter 289

In addition, Ying Chenghe suspects that the mushrooms were just ripe when they went last night. Now, as more time goes by, the stronger the flavor of the mushroom will become, and the more deadly they will be to the star beasts. As long as Ying Chenghe thinks of that scene, his back will generate sweat.

This time, its reallyone may end up playing to death if not done properly.

Ying Chenghe glanced at the few people next to him and settled down slightly.

They already plucked it, so they can only do this.

Jin Ke quickly calculated and said, It will take more than two days for the mecha to move forward at full speed, which will inevitably attract the star beasts. Moreover, the closer it gets to the finish line, the easier it is for the higher level star beasts to appear. From now on, our main team will rush to the finish line with the Purple Liquid Mushroom at full speed. Since all the star beasts will be attracted to us by then, the school team will fall behind and avoid the possible positions where the higher level star beasts may appear. You should keep your distance from us and no longer waste energy.

Twelve games, they were currently only in the third round, it is impossible for all players to reach the finish line in their mecha form, otherwise there will be insufficient energy in the fourth track and they will be eliminated directly.

Senior Shen Tu, the school team has been handed over to you. Jin Ke instructed before leaving. You should stay in the rear as much as possible and not get trapped in the starherd.

Shen Tukun agreed, Pay attention to your safety.

The five entered the mecha and flew at full speed towards the finish line, while consuming a lot of energy.

There is a star beast behind. Jin Ke said.

Its coming towards the scent on our bodies. Ying Chenghe was not surprised. His understanding of Purple Liquid Mushrooms was limited to a sentence casually brought by Yu Qingfei. However, with so many materials, there are always similar situations, but there is no such crazy attraction as the Purple Liquid Mushrooms. By pushing like this, one can also get a concept. Last night, when the Purple Liquid Mushrooms were just maturing, the odor was not as strong. The odor we had on our bodies was likely to attract some S-grade star beasts.

Their movements are not too slow, and they happen to be just in time for the Purple Liquid Mushrooms to ripen, so their taste is not strong. Those high-level star beasts will not easily venture out of their territory without confirmation, unless the temporary shielding box fails, and the scent of Purple Liquid Mushrooms completely emerges at that time, which is the real disaster.

Currently, only certain S-grade star beasts that are sensitive to odors will venture towards them.

Lets go first, lets wait until they can catch up. Jin Ke asked the few people to continue moving forward.

Sir, theres something wrong. Lu Shibai spoke, standing on a ruined building for a long time.

Zong Zhengyue held a long gun and opened his eyes, saying, Whats wrong?

There has been no movement by the Imperial Military Academy since late last night. Lu Shibai frowned. In the first few games, the Imperial Military Academy will slaughter a large number of Star Beasts to accumulate resources, and in the later games, it will once again widen the gap with other military academies, but there has been no news from last night until today.

Perhaps they are resting. speculated mecha engineer Ji Jian.

Lu Shibai shook his head and said, One more thing, some S-grade star beasts seem to be gathering in a certain direction.

The perception coverage of the main commander also increases with the progress of each round, and Lu Shibai can sense that there are S-grade star beasts in front of them constantly increasing.

The methods used by the Imperial Military Academy. Zong Zhengyue stated. In the first scene, their school team members lured the star beast herds everywhere, and this time it is no exception.

Lu Shibai was silent, he couldn't speak clearly, just a faint feeling that something was getting out of control.

Off the field, it was also not calm, and there were even disputes.

You Damocles cadets have made such a big mess. If it doesn't work out well, not only will the other cadets in the Guyu Arena have accidents, but also the whole Guyu Star! The teacher of Samuel Military Academy slapped the table angrily, Whatever the result of this competition, Damocles Military Academy can't rank ahead of other military schools.

Half of him was jealous of Damocles team getting this legendary material, and the other half was because next, when the temporary shielding box of Damocles main team failed, it attracted all the high-level star beasts in the track. Whether Damocles main team was alive or dead, it was bound to block Samuel's way behind.

Chapter 290

South Percy Military School agreed with Samuel's words: Your students acted recklessly, completely disregarding the people of other military schools on the field, and were unwilling to exchange Purple Liquid Mushrooms for resources, which brought danger to everyone on the field. After this competition, it is necessary to pay a corresponding price.

What you said is interesting. Xie Yuman put his hands around his chest and sneered. When he entered the arena, he had to take care of other military schools. Is it your students who were injured, and we Damocles military students who still have to go to comfort them? In the early years, you didn't say what trouble your team brought to other military schools, what? When it's our turn at Damocles, you wouldn't want to?

The teacher from Pingtong Academy said, This time, the nature is different and even worse. The past events have been resolved on the field, but now your students have rashly obtained Purple Liquid Mushrooms and are unwilling to exchange resources, which has threatened the entire Guyu Star.

To put it bluntly, you are just jealous. Xie Yuman sneered, They found Purple Liquid Mushrooms based on their own abilities. Whether to exchange them or not is within the rules. Whats wrong? After exchanging those resources, you can divide them up?

The teacher of Pingtong Academy frowned: If you exchange Purple Liquid Mushrooms for resources, Damocles Military Academy will surely get quite objective resources, which will be very beneficial to the competition field behind. This is a fair deal. Besides, the resource office is managed by five military schools together, and you will also receive a share at Damocles.

Please dont forget, where did the Purple Liquid Mushrooms come from? They belong to our Gongyi family. a teacher at the Imperial Academy stated.

That building is within the Guyu arena and no longer belongs to the Gongyi family, even the Purple Liquid Mushroom does not belong to you. retorted South Percys teacher .

Now Damocles Military Academy has it in hand, and the other schools have the chance to get it. If the Imperial Military Academy gets it, all Purple Liquid Mushrooms will surely fall into the hands of Gongyi.

Xiang Minghua spoke to several teachers, Lets take a look at the next situation first, maybe there wont be any accidents.

The people of the Gongyi family spoke out again, They cannot only reach the finish line in two days. Even if they do, they cannot be allowed to come out.

Xie Yuman patted the table and said, What do you mean?

What does that mean? Purple Liquid Mushrooms must not come out until Yu Tianhe brings the shielding box, otherwise our live broadcast will be the first place to be trampled down by the Star Beasts. The person from the Gongyi family said coldly, Since you have taken something, you will have to pay the price.

The leaders and teachers of the five military academies had a heated argument, so they directly contacted the various schools and military regions in the back.

Its normal for children to be impulsive. When they come out of the game, the teachers will teach them a lesson. said Damocles headmaster.

Its still a question whether they can come out. said Samuels teacher in a low voice, but it was clear to everyone in the conference room.

Military representative of the Pingtong Academy: Your Damocles Military Academy has been stepping on the edge of the rules this time. I hope you can pay the price accordingly, otherwise our Academy will not mind applying for another referendum.

The meeting room suddenly quieted down, with different expressions on their faces.

The competition rules are used to define the behavior of military students. Since the students have not violated the competition rules, there is no such thing as trampling on the edge. In the light projection behind several teachers of Damocles, the representative of the military region replied positively, Violation and no violation, there is no middle ground between the two words. I hope you know.

At this moment, the video from the Imperial Military Academy Military Region arrived late, and everyone looked up and was stunned. It was Marshal Ji Yuande.

No one expected that the military district representative of the Imperial Military Academy would be Ji Yuande, so the Imperial Military Academy held the absolute leadership position of this conference.

Ji Yuande looked tired and then saluted the people in the conference room.

All the teachers in the conference room stood up and bowed back.

I heard about the situation. I just came down from the battlefield. Sorry for being late. Ji Yuande took off his white gloves. Those children at Damocles Military Academy did nothing wrong. Anyone who sees such good materials will start their movements.

The conference room was quiet as he spoke.

Purple Liquid Mushroom, whoever gets it, gets it. However, their behavior has brought about a rising danger to all military academies, especially Samuel Military Academy and South Percy Military Academy,

which are lagging behind. Ji Yuande murmured, Damocles Military Academy is nullified regardless of its ranking this time.
