

Smash All 291

Chapter 291

If the temporary shielding box fails, can I establish a perception barrier to continue preventing the leakage of Purple Liquid Mushroom odor? Jin Ke asked on the way.

You shouldn't be able to. When I picked it off, the Purple Liquid Mushroom was already ripe and placed in a shielding box for 48 hours. Once the shielding fails, the blocked odors will be released multiple times.

The barrier established by Jin Ke before was only enough to cover up, but later on, the Purple Liquid Mushrooms were thoroughly cooked, and his 3-second command of the barrier could no longer prevent leakage.

There are more and more S-grade star beast teams behind. Huo Xuanshan said as he flew off at the highest point.

They came all the way, and the residual scent of Purple Liquid Mushrooms on their bodies attracted the majority of S-grade star beasts along the way, leading to the formation of an S-grade star beast herd in the future.

Let them be. Jin Ke pondered in the mecha cabin and found that the Imperial Academy had not moved for a long time, and now it was completely unclear which direction the Imperial was in.

A few people continued on their journey, without any rest time midway, only drinking a few bottles of nutrient solution separately in the mecha cabin.

The mask of Wei San has been removed, with a new ball of paper stuffed on one side of her nose, and her protective suit half pulled down. She controlled the mecha with one hand and still held half a tube of nutrient solution in her mouth.

This is still her first time drinking 3S grade specialized nutrient solution, and it has to be said that it is much better than the ordinary A-grade nutrient solution that Wei San herself bought in school before. This can instantly replenish the physical fitness of soldiers at level 3S, and after drinking it, their spirit will be improved.

The taste is quite good.

Its different from the nutrient solution given by the doctor. Previously, the doctor said that her foundation was too poor and it wasn't easy to repair it. The nutrient solution added a lot of special substances. Every time Wei San finishes drinking, he cannot immediately feel the difference.

The audience watching the live broadcast was stunned. They don't know why it was just one night ago. Imperial Military Academy and Damocles Military Academy began to rush to the end of the line.

Imperial Academy Live Broadcast Room.

[I went to bed at night. Can anyone tell me what the Imperial Academy is doing? Why did they suddenly stop working on the star beasts and stopped using energy?]

[It seems that the main team of Damocles Military Academy did something wrong. I didnt watch their live broadcast, so Im not sure.]

[If you want to know, you can watch the live replay of Damocles Military Academy starting from 2:16 at midnight.]

[I didnt subscribe to the Damocles Military Academy Live Channel. Are there any kind people to explain the reason?]

[In short, Damocles got a treasure, but pulled other military academies into the water, but I dont know why the Imperial Military Academy suddenly ran away. Is Ying Xingjue so powerful that nothing can escape his perception?]

[Speaking of Damocles Military Academy, the gang is also poisonous. Perfectly in the middle of the night and they suddenly said that they would go to find the treasure left by Master Gongyi Liu. At such a tense game time, other military academies even have to count the rest time. What are they doing to find treasures? !]

[The key is that they really found a baby]

[One dares to believe, the other dares to speak, and for a moment, I dont know who to say is more roguish.]

The audience in the live broadcast room had a Gods perspective. Although they did not know what the Purple Liquid Mushroom was, the Imperial Military Academy and Damocles Military Academy ran away.

In addition, the main team of Damocles Military Academy was followed by a long string of S-grade star beasts, and fans of the other three military academies panicked.

Returning to their favorite live broadcast room at the military academy, they desperately fired comments to the bullet screen, as if so that the people in the camera could see.

Just click on any live streaming room and it will be:

[Run! Hurry and run!]

Chapter 292

[Why are you still fighting against the star beasts? Hurry up and run! If you dont run again, youll be blocked by the star beasts! ! !]

[Please! Run! Wake up! The Imperial Academy is almost at the finish line! ! !]

However, the other military academies still kept their own pace, while Damocles school team kept away from all possible paths of high-order star beasts and moved forward slowly.

There is still one hour left before the temporary shielding box expires. Jin Ke commanded the four, Be prepared for battle.

It was rare that they were driving at full speed without sleep or rest. They are still a long way from the finish line, and at this speed, they can only reach it in 4 hours. However, now a large number of star beasts are coming, and the timing is not good.

The Purple Liquid Mushroom is at Jin Kes place, and his Undead Turtle has not been damaged. It is the most protective mecha among the five. The three mecha soldiers protected Jin Ke and Ying Chenghe in the middle, but their speed still did not slow down. They just drank a few more nutrients to replenish their physical strength.

Every minute now is a torment, and even the audience watching the live broadcast are staring at the camera, afraid to gasp for breath.

The Imperial Military Academy has arrived. Xi Haotian looked at the middle camera and saw that the Imperial Military Academy team had arrived near the finish line. Why did Ying Xingjue give up killing the star beasts and head straight to the finish line?

He was as confused as the audience. Ying Xingjue made the decision too quickly. At that time, the star beasts had not even followed Damocles Military Academy.

Ying Xingjue sensed the current situation and could feel any unusual movements of the star beasts in the Gu Yu arena. It was not surprising for him to make such a decision. Ying Yuerong analyzed, leaning against his chair, but his reaction was indeed too fast. At least it would take some time for Ying Yuerong to put himself in this position before making a choice.

In addition, whether its metaphysics or not, a powerful commander who is familiar with the battlefield will have a sense of anticipation for sudden situations, similar to the shooters sixth sense.

On the field, Ying Xingjue directly asked Ji Chuyu to take action. Although everyone was puzzled, they still made their way and handed over the battlefield to Ji Chuyu.

Ji Chuyu stood up and stepped on the ground. The audience only saw that his mecha didn't exert much force, as if it was gently crushing the ground.

However, the ground cracked inch by inch and quickly spread.

Suddenly, a root came from the darkness, and Ji Chuyu lightly jumped away. He reached out and grabbed the root, pulling it hard.

The 3S star beast was forced to appear from the darkness.

The audience at the live broadcast and in front of the camera took a breath, and this 3S star beast has mutated.

The body is huge, like a giant grizzly bear, but a small tree has emerged from its neck, which is exactly the mutant tree that two schools dealt with before. However, this mutant tree grows in a strange place, and although its roots are not as thick as they saw before, it is stronger in speed and toughness.

Ji Chuyu stood in silence, pulling out the Tai Wu sword with his right hand, and the atmosphere around him seemed to condense instantly.

The audience on the live broadcast did not even see the movements of Ji Chuyu clearly, nor did they see the roots of the mutated tree on the neck of the giant grizzly bear when it protruded. They only saw a flash of their figure, and then a broken root fell to the ground.

The broken roots were even twisting into the ground for half a day before gradually stopping.

Unlike the traditional martial arts moves of Huo Jian, which have a fierce and ferocious aura, all of Ji Chuyus movements only reveal one message a desire to kill.

Every move is deadly.

The audience watching the final battle of the Imperial Academy here felt even more nervous and excited. The audience in the Damocles Military Academy live broadcast room did not give way too much, even the countdown to the full screen was full, and everyone was waiting nervously.

Theres still one minute left. Jin Ke gestured for them to continue accelerating forward.

Those star beasts smell the scent but it should take some time for them to come over. Liao Runing said. We just need to sprint with all our strength, raise the flag, and go out. We should be fine.

It depends on the situation. The fastest time it takes for Yu Tianhe to get the shielding box on the way back and forth is three days, as long as there wont be any mistakes. Jin Ke doesnt think its that simple. If we reach the finish line and pull down the flag, and Yu Tianhe hasnt returned, I dont think we can go out.

[The Imperial Academy slays a mutated 3S star beast. Repeat]

Chapter 293

That's Ying Chenghe heard the broadcast and looked in the direction of the beam. Near the endpoint?

Jin Ke looked up at the direction of the beam with a feeling of a stone falling to the ground: If they reached the finish line at such a fast speed, unless the Imperial Academy, like us, started the mecha at full speed. From Chenghe, we pick up the Purple Liquid Mushroom, and the star beast moves abnormally. He has already noticed something wrong.

The same goes for Pingtong Academy.

After hearing the broadcast, Lu Shibai looked in the direction of the beam and suddenly stood up, They didn't kill star beasts, they went straight to the finish line!

This speed can only be reached by continuously starting their mechas and moving forward.

Sir, something must have happened. confirmed Lu Shibai. We need to rush over.

Regardless of the reason, if Ying Xingjue decides to make this decision, Pingtong Academy can no longer fall behind.

The main commanders of the other two military academies also reacted.

Samuel Military Academy Commander Gao Xuelin squinted and said, What is the reason why Ying Xingjue should give up acquiring resources?

Gao Tangyin, the commander in chief of the South Percy Military Academy, said thoughtfully, The Imperial Military Academy has never moved. Everyone start mecha mode and move forward at full speed.

Temporary shielding box fails, next second.

Holy s***, whats this smell? Master Liao retched as he sat in the mecha cabin. The scent is mixed with the smell of a corpse!

As soon as the temporary shielding box failed, the odor of Purple Liquid Mushroom accumulation suddenly erupted, spreading rapidly, and the high-level star beasts in the track also reacted exceptionally quickly to this.

Jin Ke, who was staying in the mecha cabin with Purple Liquid Mushroom, heard Liao Runings rude words:

The biggest damage he suffered was that wearing a mask couldnt completely filter out the constant odor of Purple Liquid Mushrooms, which was too much and too dense.

At this moment, the originally quiet atmosphere of Gu Yu arena suddenly changed, and the ground was shaking without any need to feel it. A large number of star beasts gathered in a certain direction.

The people at the five military academies were all stunned.

Xingjue?

Previously, Ji Chuyu killed the 3S Mutant Star Beast, and the Imperial Academy quickly rushed to the terminal building. Ying Xingjue piloted a mecha and landed on the top of the building, standing on the platform. He didn't reach out and pull the flag, but instead looked into the darkness below the building.

Until now, the Star Beast riot.

Ying Xingjue glanced down at Ji Chuyu and said in a low voice, A military academy has provoked something that should not be provoked. Lets stay and take a look.

The members of the Imperial Academy have no objection to this, the flag is at hand and can be pulled at any time. Although the entry interval for the next race is related to the flag raising time, this time will be calculated based on the number of days spent on the track, so its okay for them to wait.

This kind of thing has also been done by the Imperial Military Academy before, targeting Pingtong Academy as a pure demonstration.

Star beasts ran on the ground, flew in the sky, and a group of black animals, blocked the sky and the sun, rushed towards the main team of Damocles.

Holy s*** holy s***! Why are these star beasts coming so fast?! Liao Runing turned his head and drove his heavy mecha faster than Wei San, shouting, Can they really eat this stinky mushroom raw?

Huo Xuanshan said, They can even eat humans raw. Eating mushrooms is nothing.

Jin Ke: shut up, save your energy, there are still tough battles to fight in the future.

Young master cant accept this taste, whats the matter with a few words? Liao Runing insisted.

Jin Ke offered a killing move and said, No more nonsense, Ill throw the stinky mushroom into your mecha cabin.

Liao Runing suddenly became as quiet as a chicken.

The group took advantage of the time when all the star beasts on the track were rushing towards this end, and made a hard push towards the finish line for a distance.

Finally, two flying star beasts caught up first.

Today should not be my death day. Liao Runing stopped and looked up at the two flying star beasts in the sky. Young master is not yet of age.

The battlefield is much more terrifying than this. Huo Xuanshan inspected the mechas arm. It cant pass this level, and theres no need to go to the military district to participate in the war.

The two stood in place, waiting for the flying star beast to attack.

Wei San protected Jin Ke and Ying Chenghe and continued forward, but not far away, a high-grade star beast blocked their path.

Teacher, remember to count the numbers and not swallow them privately. These are all the star beasts we want to exchange for resources. Wei San looked up and shouted into the air, and the operator of the mecha nodded up.

The staff of the resource department hidden in high altitude:

Whether or not you can survive is the question. You still didnt forget to be a rogue, theres really only you.

Chapter 294

On the live broadcast, teachers from various military academies have returned to their seats.

Xiang Minghua was nervous in his heart, his hands clasped together under the table, but on the surface he remained calm.

Xie Yuman whispered, Sooner or later, we will pass this level.

This situation of being attacked by the star beast herd on a large scale will continue to increase in the future.

Where is Yu Tianhe now? Xiang Minghua asked the teacher next to him.

I heard they're already on their way back, they just need to hold out until early morning.

Early morning? Xiang Minghua felt a chill in his heart, the sky had just darkened.

This is the fastest speed, A nearby teacher said. I don't know how to operate it on Yu Tianhe's side. Her family grabbed the shielding box and brought it all the way over. She took it on her own and turned around to come back.

The Yu family are the descendants of Yu Qingfei. At first, they stayed in Sadu Star and were bound to Damocles Military Academy. Later, the Yu family went out independently and moved to South Percy Star, establishing the South Percy Military Academy. As for Yu Qingfei's legacy, except for the brain interface chip and a mess of books left in Damocles Military Academy, everything else was taken away by the Yu family.

After further development, the Yu Family continued to split into several factions, which was also an unavoidable problem for a big family. No matter which family it is, over time, factions will naturally divide within, and whoever is strong will have the most say.

At present, the Yu family is in power of another faction, and has been in power for many years. Yu Tianhe is from a branch background, and she entered the military region all the way with her own strength. Standing in her current position and taking a family's belongings, especially those left by Yu Qingfei, requires multiple procedures.

So she had to go back in person, but she didn't know what happened midway, so Yu Tianhe's faction directly came to grab it.

At the arena.

Ying Chenghe was working hard inside to repair his protective armor and wanted to reinstall it.

As for Jin Ke, he was building a perception barrier for the three mecha fighters, although he almost fainted from the fumes caused by the purple mushroom in the mecha cabin.

Is it useful to cut off their noses?

Wei San drew her sword and jumped up, taking the time to question the two next to him.

Ying Chenghe also took the time to answer, You try it and let us know.

It was unknown where this star beast came from, covered in mud and looking like a black skinned boar. Its two long fangs took the opportunity to stab at Wei San.

Qiang

Wei San dodged the attack of the giant black skin star beast and slashed its head and neck with a large knife, but it only produced a sound similar to hitting metal.

Again?

Wei San glanced at her own big knife, it was still fine, the blade was not curled.

[The head and neck are hard without]

Jin Ke was about to tell Wei San where the star beast could attack, but in the next second, Wei San swung her knife again and struck its head and neck.

This time, the metallized part of the giant black skin star beast was cut open.

Chapter 295

Jin Ke: alright, it was truly a weapon created by Xumi gold.

The giant black skin star beast probably did not anticipate that its toughest part had been damaged by humans, and immediately bared its fangs to threaten the other party.

Wei San acted like she didn't see it and attacked the star beast from start to finish, without even doing any defense against the mecha.

The 3S high-grade star beast was constantly pushed back by a novice 3S mecha soldier.

When the giant black skin star beast reached out its claws and attacked, Wei San controlled the mecha to lie on its knees, completely parallel to the ground, avoiding its attack. With a single blade facing upwards, it sliced off half of the star beast's nose.

Roar!

The giant black skin star beast retreated repeatedly, making a low roar and aiming at Wei San, suddenly spitting out a pile of mud in its throat.

Wei San felt a dark shadow rushing towards her and immediately got up, jumping up to avoid it.

The mud fell to the ground, gradually turning into mucus and making a sizzling sound.

Wei San twisted her neck, trying to control her emotions and calm down.

Facing the giant black skin star beast, one beast and one mecha looked at each other while charging towards each other.

Half way through, the giant black skin star beast suddenly jumped up, ready to knock down Wei San. Wei San jumped at the same time, taller than the giant black skin star beast. She extended her left hand and held onto the right hand holding the big knife, instantly splitting into two combined swords.

Wei San took off and released her sword with both hands. She then held onto the handle with her back hand and stepped on the back of the giant black skin star beast, with two knives stabbing straight into its back.

The giant black skin star beast was trampled to the ground and wanted to resist angrily. Wei San drew out her double swords and once again inserted them into its abdomen, turning with force.

The star beast let out a weak howl, slowly losing its struggling power.

Successfully solved a high-grade star beast, Wei San reached out and touched her nose, feeling for blood, replacing it with a new paper ball.

Go, go, go!

Liao Runing rushed from behind, with some blood on his mecha, leading Jin Ke and Ying Chenghe to continue towards the finish line.

There are more and more high-grade star beasts behind. Huo Xuanshan followed closely and walked with Wei San.

After several rounds of hard resistance, the five of them advanced a little further, and the star beasts gathered more and more.

Am I having an illusion? Ying Chenghe had already reluctantly restored his mecha to its original protective state. I haven't heard the sound of the Imperial Academy reaching the finish line yet.

I didn't hear either. What are they doing? Liao Runing asked Jin Ke, Commander, do you know what the reason is?

I don't know. Jin Ke said. Perhaps they've encountered a high-level star beast again.

That miserable? Liao Runing was surprised. Generally, on the track, the finish line of the 3S star beast will be controlled between one or two heads, and only the high difficulty arena will have multiple 3S grade star beasts, and even various mutated high level star beasts.

Jin Ke: No matter how miserable they are, they cant compare to us now.

Chapter 296

The five of them brushed their heads back together and saw a dense array of high-grade star beasts chasing them, with occasional star beasts jumping out from the front.

Wei San didnt even have time to drink her nutrient solution. The paper ball on her nose had already been thrown away, allowing her blood to flow down. In her eyes, only the star beast in front of her had to be killed, and all the star beasts blocking the way had to be killed.

[Wei San, control your emotions.]

Jin Ke probably sensed Wei Sans condition and kept reminding her in her mind.

Wei San opened her eyes wide, woke up, and held her knife in both hands to deal with the star beast in front of her. She asked Liao Runing to continue walking with Jin Ke and Ying Chenghe.

The three of them started taking turns to move towards the finish line.

At this time, there was no bullet screen on the Damocles live screen, and all the audience were watching them fight quietly. It was just a competition. To face so many star beasts, what about the real tide of star beasts?

Everyone was immersed in the contemplation of war with the star beasts and no one noticed that the handle in Wei Sans hand was covered with a shallow layer of white frost.

At the same time, the main teams of the other three military academies rushed to the finish line at full speed.

Among them, Pingtong Academy was the fastest, followed by South Percy, and Samuel fell behind.

All the star beasts are heading towards the same place. Lu Shibai regained his senses. The Imperial Academy is at the end, but the places where the star beasts are heading todoes not seem to be the end.

Zong ZhengYue: Damocles Military Academy?

Lu Shibai nodded and said, It can only be them. However, the Imperial Academy has not yet raised its flag, and I dont know if it has anything to do with these star beasts.

After arriving, we will know, Zongzheng Yue spoke expressionlessly.

He hates things beyond his control.

Before the competition, the inner courtyard of Pingtong Academy had made countless calculations. He was only responsible for dealing with Ji Chuyu, while Lu Shibai was responsible for Ying Xingjue. They had a 30% chance of winning the Imperial Academy.

And now suddenly there was Damocles Military Academy, and Wei San.

Zongzheng Yue controlled the mecha to gallop. Under no case would Damocles Military Academy walk in front of their Pingtong Academy this time.

Chapter 297

Is that the beast tide? Huo Jian stood on the top of the building and looked into the darkness in the distance, even as they stood here, they could feel the ground shaking.

So many high-level star beasts? Situ Jia subconsciously breathed when he heard the radio. Those people in Damocles Military Academy are crazy.

As the commander of the school team, Tai Wude led the team to stand behind and protected Ying Xingjue's side. He quietly looked into the distance, but for some reason, he felt that it was probably related to Wei San.

Wei San was an A grade who could make Samuel join forces with Pingtong Academy, ultimately successfully offending the two military academies. Now, she has suddenly been promoted to the 3S grade, and it was not her style to not stir up the world.

Anyway, based on Tai Wude's brief life experience, no one should offend Wei San. Back then, he was also a proud child on Star 3212. Wasn't it because he bullied people in Wei San's class that he was targeted and beaten by her all day.

When he arrived at Imperial, he became accustomed to being oppressed and beaten by others. He often suffered setbacks and battles, and his psychological qualities were so strong that even his teachers couldnt bear to look down on him and he was given a small lesson.

Alas, the past is unbearable to look back on, and talking too much is like tears.

Tai Wude stood at the forefront of the school team, wondering if their military academy could win the championship. At the beginning, he and his classmates betted on Imperial. Later, when he saw Wei San on the list of competitors, he secretly bet on Damocles Military Academy.

However Tai Wude glanced at the main commander in front and thought that their Imperial should be able to win. Other military academies also have a maximum of 3S for all personnel, and the main commander has a presence of over 3S. Its not possible to upgrade from B-grade to 3S grade like Wei San, but its also possible to leap up a bit, not just like a flying monkey.

Ill take a look. Situ Jia turned around and said to Ying Xingjue. Seeing that he didnt object, he jumped down from the building and fell into the dark night. In the next second, Blade Wind spread its wings and flew straight towards the distance.

Situ Jia flew the blade wind to the beast tide. When he got close, he discovered that there were five people in front of him, there was only the main team of Damocles Military Academy.

Thats the bird dude from the Imperial Academy? Wei San drew her own knife from the Star Beast. They didnt pull the flag, but they stayed to watch the play.

Bird dude?

Jin Ke and the others reacted after a moment, only to see Situ Jias wings not far away.

Huo Xuanshan pedaled his feet on the belly of the flying star beast and flipped it twice in the air: Do you call all light mecha soldiers bird dudes?

No. Wei San waited for the star beast on the opposite side to rush over, then took off and revealed Liao Runing who had rushed behind her. She landed and exchanged positions with Liao Runing to deal with the other star beast, not forgetting to explain, Youre not. There are too many people from other military academies, and I cant remember their names.

At this point, the three person mechas actually had scars of all sizes, but they started chatting as soon as they had the opportunity.

On the contrary, the audience in the live broadcast room was extremely anxious.

[Please shut up and stop talking! Save some energy, there are still so many star beasts behind!]

[Why are they not nervous at all? My heart jumped out when I saw this.]

[How long did they battle for, five hours? Or seven hours?]

[I didnt pay attention, but they managed to come near the finish line and its almost possible to see the building.]

Situ Jia flew in mid air, still some distance away from them. He looked for a moment, and finally turned around to report back.

Youre leaving now and not staying longer? There are so many star beasts here, are you sure you dont want them? Wei San shouted to Situ Jia when she saw that he was about to leave. They are all resources.

Situ Jia, who had turned around, heard this sentence: Are the people of Damocles Military Academy sick?

He turned his head and looked down, but unconsciously calculated in his heart, it seemed as if he could exchange for a lot of resources.

Chapter 298

Blade wind spread its wings and returned to the finish line. Before stepping onto the roof, Situ Jia retracted the mecha and jumped out of mid air, landing on one knee.

He went straight to Ying Xingjue: Its the main team of Damocles Military Academy.

Ji Chuyu: Only the main team?

Situ Jia nodded and said, I haven't seen their school team. Their main commander seems to have something on him, and those star beasts have been heading in his direction.

Ying Xingjue, standing under the flag, raised his eyes and said, What smell do you smell?

Everyone was stunned. Ji Chuyu took off his mask and was exposed to the toxic air. He sniffed for a moment and said, A rotten aroma.

Guyu arena is open once a year, and the environment inside is harsh. The air is not only toxic but also unpleasant to smell. The mask can effectively filter and isolate odors, and there is a faint scent at the beginning. People do not pay attention, but only consider it normal.

Damocles Military Academy may have got some good materials. Gong Yijue frowned. As an engineer, he knew that the smell of a few natural materials would attract star beasts. The more attractive to the star beasts it was, the higher the quality of that material was.

Starting from that night, the star beasts at the Guyu Circuit were ready to move. Ying Xingjue naturally didn't know which military academy it was at first, but at that moment, he sensed the emotions of all the star beasts. That was why he made a decisive decision to urge the Imperial Military Academy team to arrive at the finish line first to prevent accidents.

First place, it must be the Imperial Academy.

Staying here, he wants to know what caused the star beasts to move.

Do you want to grab it? Situ Jia said directly.

No need. Ying Xingjue walked down the flag and stood at the edge of the building. Since they dared to bring materials to the finish line, no one will be able to snatch it.

Everyone remembered what Damocles had done in the contest. They were desperate and dared to lead people to die together.

Ying Xingjue tilted his face and asked Gong Yijue, Which of the materials do you know of that cannot block its aura?

Gong Yijue didnt say a word before he was surprised: Why didnt those people in Damocles Military Academy exchange the star beasts they killed for something that could shield for materials?

What is the picture of three people struggling to deal with a continuous stream of star beasts now?

Unless there is no suitable shielding box at the exchange office.

Until now, the federal government has not found suitable shielding boxes, either new materials or rare materials that are not even available at the exchange point.

Gong Yijue had the same idea as Situ Jia at this moment: They are tired of dealing with the star beasts, we can move at that time, wouldn't we

Ying Xingjue raised his hand and signaled that he didn't need to say anything more: Huo Jian and Situ Jia, go kill the star beasts, select the 3S levels.

Situ Jia was stunned and said, Do you really want to go?

Ji Chuyu heard the words and said coldly, It's not easy to encounter the high-level star beast tide, especially in the front court. Now is the best time to accumulate resources. What are you dissatisfied with?

Situ Jia: no. He just felt that they would lose face if they went back, especially after being spoken to by the Damocles soldier.

Wei San, your mecha's back is damaged. If you let it go any further, it will affect the power of your arms. Ying Chenghe looked at the real-time data of the three people's mecha in the mecha cabin and said, Find a chance, let me fix it.

Repair for what? Wei San turned her knife with both hands and quickly stepped forward, facing the sharp teeth of the star beast. You stay in the mech cabin, don't come out!

As soon as they stopped, the star beasts would surround them in all directions, and Wei San could not count how many times they had split through the encirclement.

Liao Runing and her were back to back, while Huo Xuanshan dealt with the flying star beast in the air. The two of them resisted the latter, while Wei San was responsible for leading the way forward.

Jin Ke gritted his teeth and said, Ill give you five minutes to fix it.

Wei San held the knife handle in both hands and pulled it towards her legs. The blade instantly turned into a fan-shaped blade. She shuttle between two high-ranking star beasts, close to her, flesh is abundant, and Zhu Jiangs face is covered in blood: where will we have five minutes?

As soon as her words finished, the star beast in front suddenly slowed down and spun in place.

Quick! Jin Ke shouted in a deep voice.

Its a perception attack!

Chapter 299

Under the extreme situation, Jin Ke forcefully realized how to use perception to attack the star beast.

Ying Chenghe was the first to descend from the mecha cabin, surrounded by star beasts. Wei San was startled and immediately controlled the mecha to run to his side.

Are commanders so powerful? Wei San looked at Jin Ke while being vigilant about the surrounding star beasts.

No need to touch, directly move and perceive, even the star beast doesn't need to be in close proximity.

Original Technician Wei San was envious, she also wants this skill that can make things happen with just using her brain. Facing these stinky, ugly star beasts, it's really difficult for a soldier.

Ying Chenghe was busy repairing her mecha on site, and his hands were almost out of sight, so he couldn't hear her speak at all.

Alright! Ying Chenghe jumped off Wei San's mecha and shouted to Jin Ke.

In the mecha cabin, Jin Ke's face turned pale and he regained his senses. The star beasts in front of her immediately attacked them crazily.

Wei San blocked in front of Ying Chenghe, and with a flick of the fan-shaped knife, it turned back into a closed knife, with one person leading the way ahead.

She appeared to be joking with a few people as if nothing had happened, but in fact, in the mecha cabin, her nose blood even wet her collar, but she never stopped fighting from beginning to end.

Not only did she, but the other four people behind her never relaxed.

Live stream.

Bold enough. Ying Yuerong looked at the camera of the main team of the Damocles Academy, and they did not know whether he was talking about Jin Ke, who drove the ducks to the shelves, or Ying Chenghe, who kept looking for opportunities to directly get out of the mecha to repair the three soldiers mecha.

For Damocles Military Academy this time, it should be more beneficial than harmful. Xi Haotian said, Their main commander has begun to use perception attacks now.

The greatest progress is made between life and death.

As for the leading teacher of Damocles, Xiang Minghua could not calm down and began to shake his legs in secret. He kept whispering, Hurry, hurry!

Jie Yuman blocked the view of other military academy leaders and kicked Xiang Minghua: Calm down, Wei San is there.

Xiang Minghua said, Shes there, thats why Im nervous.

There are too many unstable factors in Wei San.

He was worried for a moment that Wei Sans body couldnt bear it, and then he was worried that Wei San might suddenly cause trouble.

The people from the Imperial Academy are there. Jie Yuman looked up at the camera.

But Huo Jian and Situ Jia didnt fall directly on the side of Damocles Military Academy, instead, they rushed to the side and swept the star beast from behind.

Che, didnt they come back still. Liao Runing stuck his knife into the fur of the dead star beast and wiped away the blood stains. How could those people at the Imperial Academy miss such a good opportunity.

Wei San, you go pull the flag, dont worry about us. Jin Ke looked at the star beasts that were starting to increase in front and suddenly said, Move quickly, the second wave of star beasts is coming.

I see. Wei San looked up at the building, and on the top of the building stood the people from the Imperial Academy, who were looking towards them.

She folded the knife back into the first big knife, held the long handle, and ran towards the building with strong legs. The big knife was trailing behind, and when she saw the beast killing the beast, she took it as her defense and kept moving forward without hesitation.

This Wei Sans knife is a bit interesting. Gong Yijue said in surprise as he stood on the top floor of the building looking down from afar. I didnt know that Ying Chenghe could make this type of weapon yet.

Chapter 300

The star beasts near the finish line have already been dealt with by the Imperial Academy, and the number of star beasts that Wei San needs to deal with is not as large as the others, and there is no need to worry about Jin Ke and Ying Chenghe. Her speed is getting faster and closer to the finish line building.

Commander? Gong Yijue instinctively looked at Ying Xingjue, Shes coming up.

The other two mecha soldiers of Damocles Military Academy are also very powerful. They unexpectedly blocked the defense line and prevented the star beasts behind from coming.

Ying Xingjue looked down at Wei San, who was about to rush to the building, and said, Wei San, first place is ours.

Wei San looked up at Ying Xingjue on the top of the building and suddenly turned around to kill the attacking star beasts. Finally, she slowly drew the large knife from its body and casually said, What about it?

At such a distance, as well as the obstruction of mecha, Gong Yijue could feel Wei Sans arrogance. Subconsciously, he spoke out first, So you came up to seek death.

Oh. Wei San was blocked by a chasing 3S star beast, and she stepped back a few steps. Im so scared.

Gong Yijue:

Ying Xingjue resolutely looked into the distance and said, Pingtong Academy is about to reach.

He took a deep look at Wei San, who was fighting against the star beast, and turned to walk to the flag platform. Ji Chuyu was still standing under the flag of the Imperial Army.

Do you want to raise the flag? Ji Chuyu asked.

Wait a moment longer. Ying Xingjue looked up at the high altitude, where the hidden aircraft had not yet moved.

As soon as they reached the finish line in the first two sessions, the aircraft hidden from high altitude began to launch and prepared to come down to pick up people. This time, there was no movement from beginning to end.

On the live broadcast, a considerable portion of the audiences attention was focused on another screen, where the renowned Marshal of the Federation, Ji Yuande stood. Before watching the game with the audience, he gave an order.

Before Yu Tianhe brings back the shielding box, no matter who pulls the flag, they cannot come out of the arena.

There are layers of barriers around the Guyu arena, and only when the organizers open the barriers and release the aircraft can military students come back from the exit.

Ji Yuandes one sentence cut off the way out for all military academies.

These people carry the hope of the Union on their shoulders in the future, and if they cannot resist this, they are not worthy of entering the military district and becoming true soldiers.

Marshal, should we notify the students of various military academies on the field about these matters?
Xi Haotian asked.

Ji Yuande directly refused, All information is temporarily not allowed to be shared with the students on the field. I want to see their choices, whether these people will choose to fight together or against each other for their own benefit.

The students on the track seemed to have no idea what they were about to face, and Wei San was still working hard to kill the star beasts. Finally, she took the opportunity and drove the mecha close to the building.

Zhu Jiang approached the top floor of the building, and Wei San retracted her mecha. She jumped out of the air and knelt on one knee on the ground, slowly getting up. She didnt wear a mask, her protective suit was loose and pulled under her shoulders, and there were large bloodstains around her collar. Her face was even stained with blood that had not dried up yet. Compared to the clean Imperial Academy students, she was in a state of embarrassment.

However, at the moment she stood up on her knees and looked up, the fighting spirit from the 3S level made all members of the Imperial school team unconsciously fully alert.

Do you want to pull up the flag? If you dont, let me do it. Wei San smiled with a standard smile, as if discussing, but her face was covered in blood, which added a hint of unfounded evil energy to her.

I said it before, first place can only be Imperial, Ying Xingjue spoke in a bland manner.

I also said I must pull the flag. Wei San reached out and slowly pulled on her protective suit, but did not put on her mask. I dont know what kind of taste it feels like to kick the Imperial Twins out?

arrogant.
