

Smash All 321

Chapter 321

..

The five courses are all mecha training, close combat, knife use, etc., and they wanted to tailor it according to Wei Sans situation. Practice the five courses together to see which weapon move Wei San is suitable for in the end, and then continue to practice in depth.

But Xiang Minghua was pissed off by her wanting to be lazy, and forgot to tell Wei San about it, making her think that she had to keep practicing all five courses.

As a result, the teacher who led the teaching later reported and summarized a point of view: Wei San is suitable for this course and can continue to study in depth.

Wei San, who didnt know it yet, practiced hard every day with the teacher, and went to the Rubiks Cube forum to collect points when she had a little time.

Whats wrong with the mecha engineer in South Percy? Liao Runing took advantage of the break time to secretly gossip, I saw him in the training building before, and he seemed to have a strange expression.

South Percys Military Academy should be happy to get third place this time. The high-level star beasts have not been killed less, and the resources exchanged should be much more than before.

The Yu family has changed. Jin Ke said casually, Its strange that he would look good.

This years South Percys main teams mecha engineer Yu Puxin is the son of Yus master, and he has always had a good relationship with Yu Tianhe. It is said that Yu Tianhe brought him out since he was a child.

Taking advantage of the shielding box this time, Yu Tianhe suddenly united with his own branch~ over there, turned against the main family, and now the person in charge of the Yu family has become Yu Tianhe, and he has completely become an unambiguous person in the Yu family, controlling real power.

So she's not just going to get the shielding box for us?

People's hearts are too complicated in the present, Young Master Liao feels that he is still an innocent child.

Jin Ke glanced at him: Otherwise, why do you think Yu Tianhe went back to get the shielding box in person?

It was just an excuse, the master's family disagreed with Yu Tianhe being taken away directly, and procedures had to be followed, so Yu Tianhe personally went over to put pressure on him, halfway through, it was too late for the master's family to regret it. Yu Tianhe has already let her branch clear the main family on the grounds that the main family doesn't care about the importance and ignores the lives of the people of the Federation.

For so many years, Yu Tianhe was born in a branch, but he has always been the most talented mecha engineer of the Yu family. He participated in various activities on behalf of the Yu family, and the power of his subordinates has invisibly increased. Coupled with the fact that she selflessly brought Yu Puxin, the master's family didn't have much defense against her, and that's why they dared to assume airs, but Yu Tianhe found a reason and turned against them.

Liao Runing listened: ???

However, Yu Tianhe's doing this is a bit Jin Ke thought for a while and said, It's awkward.

From his point of view, Yu Tianhe is already the number one member of the Yu family, and her position cannot be shaken, and she could have rebelled a few years earlier. If she is afraid of hurting her reputation, it doesn't seem much better now.

At least those who have a little knowledge of the situation understand that the shielding box incident was caused by Yu Tianhe.

As long as she puts more pressure, the master's family will naturally send it over in person. Taking a step back, there is still Yu Puxin in the arena, and the master's family cannot let him have an accident.

You people are awkward in doing things. Liao Runing shook his head, moved towards Wei San, away from Jin Ke, In the final analysis, us mecha soldiers are the simplest.

Wei San was lowering her head to brush up on the questions, when she saw a head stretched out: What are you doing?

Answering the questions. Wei San expressionlessly pushed Young Master Liaos head away, Go away.

Have you upgraded now? Ying Chenghe asked her.

Ive been promoted one level. After Wei San answered the last question on the page, she exited to show Ying Chenghe, L2, but it didnt pop up to remind me, and the circle around the ID avatar is also gray.

She guessed that she had to continue to go up to be a complete L2 level, because now her interface boards have not increased.

Ying Chenghe simply climbed up too: Ill try.

Try what? Jie Yuman came over, holding a pointer in his hand, and nodded towards Wei San, You come out.

Chapter 322

Wei Sans body froze, and she didnt get up immediately. She was sitting cross-legged before, but now her knees were on the floor, and she slid over and hugged Jie Yumans thigh: Teacher!

Jie Yuman moved the leg that was hugged by her: Let go, get up.

Wei San began to rub against her pants, pretending to be pitiful: Teacher, I haven't healed from yesterday's injury.

Jie Yuman raised her head and took a breath, then said coldly, If you don't get up now, I will make it impossible for you to get up from now on.

Swish

Wei San immediately let go and stood up.

See you guys in the afternoons. After Jie Yuman finished speaking, she left while carrying Wei San.

Cheer up, I heard that you are so energetic in front of other teachers, what? Do you dislike me so much. Jie Yuman released her mecha, turned to Wei San who was downcast beside her.

How could it be? Teacher Jie is my favorite. Wei San immediately denied, Jin Ke and the others must be spreading rumors.

Jie Yuman glanced at her: Hurry up and get in the mecha, how could I not know what kind of thoughts you have.

Wei San:

Among other things, Teacher Jie is really ruthless with her hands, and she has a lot of strength. Wei San would rather fight Li Ze, and there is still some room for turning around.

Li Ze is my subordinate, who do you think is better, him or me?

Wei San thought that Jie Yuman had seen through her thoughts, so she couldn't help being stunned.

Jie Yuman approached suddenly, raised his hand and knocked Wei San and her mecha to the ground: On the battlefield, no matter when and where, you can't be distracted, you know that?

Jie Yuman's tone was cold and stern, completely different from the way she was chatting just now, her elbow dropped, and she knocked directly on Wei San's heart.

Wei San opened her eyes slightly, a gust of cold air rose from behind, and she immediately ran away with all her strength, only avoiding the vital parts of her heart, and was hit by Jie Yuman in the lower abdomen, the pain from the mecha made her scalp shudder.

Even if you see an accident with your closest comrade-in-arms, you can't stop attacking, and you can't be distracted, otherwise you will be the one who will die in the next second. Jie Yuman attacked her and said, Once you die, the other people around you will die. If comrades-in-arms are also distracted, they will end up in the same way, understand? Not only will you die, but you may also implicate other comrades in arms.

Wei San manipulated the mecha to bend backwards, trying to avoid Jie Yumans weapon attack, but unexpectedly, the opponent flew into the air and kicked her hard with one leg. She was kicked hard in the abdomen, and her knees were folded down, and she fell directly to the ground.

!

For a moment, Wei San didnt even know whether it was the broken leg that hurt, or the kicked abdomen that hurt more.

Seeing that she didnt have the power to fight back, Jie Yuman stopped, controlled the mecha and stood aside, looking down at Wei San inside Zhu Xi: What do you want to say?

Wei San slowed down, manipulated the mecha to sit up, and a pile of mecha sat there with her arms around her knees, which was a bit pitiful.

Teacher Jie Wei San took a deep breath from time to time, obviously in extreme pain, Are you really Colonel Li Zes leader?

Are you still not clear about my origins? Jie Yuman said a little arrogantly, I am the major general of the Thirteenth Military Region.

Sohave you ever beaten Colonel Li Ze like this? Wei San asked sincerely.

After being silent for a while, Jie Yuman gritted his teeth and said: Wei San, I think you just deserve a beating!

She waited here, thinking that Wei San could ask some profound questions, but this is the end?

Did you fight? Wei San asked persistently.

Jie Yuman sneered: Of course I did. I haven't used the moves I used to fight him back then to deal with you. Now you can experience it.

Wei San: Dangerous! ! !

She immediately turned on escape mode, those who could escape from Jie Yuman's hands would not be beaten again.

Very soon, Wei San was dragged back by Jie Yuman, pressed to the ground and beaten.

Wei San was so beaten that she had no power to resist, she couldn't even cry out in pain, and she looked at the ceiling of the training ground with no desire: So that's how the colonel was beaten.

Chapter 323

In the next few days in Guyu star, Wei San often limped in and out of the training ground and the training building, and when she woke up in the morning, she was in so much pain that she wanted to skip class.

Jie Yuman is really scary!

To the point that Wei San was very happy when she was only beaten a few times a day.

In this regard, Liao Runing and Huo Xuanshan signaled her to be calm, this is just the beginning.

They looked comforting on surface, but they didn't hide the gloating in their eyes at all, Wei San could see it clearly!

It's okay, it's a good thing you two have been with me all the time. Wei San said openly, Anyway, with the three of us, Teacher Jie, will beat us up, so we share weal and woe.

Huo Xuanshan, Liao Runing: who wants to share in weal and woe with you!

However, no matter what the three of them think, the training sessions still have to go on, and there will be extra training that should be beaten.

Jin Ke has been training his senses for the past few days, and Ying Chenghe has been contacting the school.

He wanted to bring out Yu Qingfei's chip, but he told the school that he wanted to learn it, so he temporarily didn't say he'd also give it to Wei San.

In this regard, Damocles Military Academy is completely different from other military academies. Mecha masters of other military schools will carry brain chips with them, and at the same time, in order to study together, all S-level mecha masters in the military school will accompany the team. However, the Damocles Military Academy has always required that Yu Qingfei's chip remain in the military academy and not to be taken out. This also requires that the mecha masters of the main team who are about to participate in the competition must learn a lot of knowledge in a short period of time, otherwise there will be no chance to learn later.

This is also one of the important reasons why the ranking of the Damocles Military Academy is gradually regressing. The mecha engineers of the main team often cannot keep up with the progress. If there are no 3S mecha engineers, new mecha engineers will be replaced every term, which is staggered.

But a long time ago, the brain chip of the Damocles Military Academy could also be brought out, but it was stolen in one competition and was almost never recovered, so such a rule was established from then on.

Ying Chenghe submitted this application to the school, partly because he did not finish his studies, and partly because Wei San also needed to learn, but he subconsciously concealed the fact that Wei San was both a soldier and an engineer.

Not only him, Jin Ke, Huo Xuanshan, and Liao Runing didn't tell anyone about Wei San being able to design and build mechas.

This incident was no less shocking than being Super 3S. After the federation confirmed the division of the three lines, only Yu Qingfei was able to cultivate both as a soldier and engineer.

It can be said that this word is a special word for Yu Qingfei.

Wei San is now unstable beyond the 3S level, so its better to keep a low profile.

The four of them simply didnt say anything, so as not to leak the news.

The school only replied that it was under consideration, and did not directly refuse or agree, but Ying Chenghe believed that there was a high possibility that the school would agree.

The proportion of their 3S this year is too high, and the school already knows that Wei San is a super Ss, enough to compete for the championship. If the brain chip can no longer be brought out, there is a problem with the mecha engineer, and the Damocles Military Academy may miss their saviour from being in last place.

The day before the next draw, the five military academies were notified to exchange resources.

At that time, there were too many star beasts in Guyu Arena, and there were so many 3S high-level star beasts, and it was too late to exchange them with the exchange office on the spot, so the organizers could handle them in one day. The number of star beasts killed after Damocles Military Academy raised the flag before is also valid, and they can be exchanged if they are not deducted.

Im going too? Wei San asked Ying Chenghe.

Look at the materials you like, and pick the ones you can use. Ying Chenghe nodded, Jin Ke and I have discussed it, and this time the resources are coming to you.

Although Wei San adapted to Zhu Xi faster than anyone else, this is a 3S mecha that has been formed for many years. Even with purple liquid mushrooms, the quality improvement is limited, but if Wei San learns to design a 3S mecha, rebuild a brand new mecha of her own, it will definitely be better than now.

Wei San thought for a while and said: I only learned about weapon materials and making. And I didnt finish learning.

There is a detailed description of the materials on site, which one do you think is pleasing to the eye? Ying Chenghe will also go. Of course, the higher the quality of materials, the better. As long as the attributes do not conflict, he will check by the side.

alright.

Chapter 325

The staff stared dumbfounded at the Imperial Military Academys group coming in through the door that had been knocked out abruptly, and they could no longer find the proper language organization.

Ying Xingjue raised his eyes and said politely: Im sorry, Imperial will double the compensation for all losses.

Employee: is it amazing to be rich? So is there a mental damage fee?

The second one to go in was Liao Runing, but he had to wait for Jin Ke and Ying Chenghe to go in.

One-third of what you promised. Ying Xingjue turned around and said to Wei San who came in.

Wei San tugged at her messed up ponytail, tightened her hands, and raised her eyebrows: Go and tell Jin Ke, I don't have any.

Her tone was casual, without the slightest fear or looking up towards Xingjue.

Ji Chuyu, who was next to Ying Xingjue, squinted his eyes, raised his foot and took a step, and the aura of a 3S soldier instantly filled the entire space.

The mecha soldiers of Pingtong Academy and South Percy Military Academy who came in from behind subconsciously became vigilant.

Wei San clicked her tongue impatiently: Are you in heat? Take care of your perception.

Hearing this, the staff gasped. If they knew, they would not be here today, and a colleague would take over. If this continues, his heart can't bear it.

The perception of a single mecha soldier cannot attack like a command, nor can it be materialized, but when it is released, other mecha soldiers can feel it, which is a warning.

Ying Xingjue raised his hand to signal Ji Chuyu to restrain himself.

Just when Jin Ke came over, he pulled Wei San behind him, raised his hand and turned on the light brain: Lets add as a friend, the agreement is made, we Damocles will not break the contract.

After Jin Ke added Ying Xingjue as a friend, he transferred one-third of the star beasts obtained by Damocles Military Academy to his account: done.

Jin Ke turned around and pulled Wei San to the shelf. Ying Chenghe and the others also dispersed to look for materials when they saw this.

Inside is a large warehouse, where various materials are temporarily stored, and Wei San was dazzled as soon as he entered.

The mecha soldiers know nothing about these things, but everyone has a list in their hands. It is the conventional materials and energy drawn up by the chief commander and the main mecha engineers before coming here.

Although Wei San was holding the list, she was looking at other materials.

Ying Chenghe was helping her choose the mecha engine and the materials used for the engine. She walked through several rows of shelves, and finally stopped at a large shelf in front of her. There was only a large metal box inside. There was a black skeleton inside. There was a faint sheen on it.

She saw the light curtain floating beside her from a long distance: phaseless bone, unknown 3s mutant star beast skeleton, can be used as mecha joints, strong endurance, rare material.

Wei San subconsciously walked over there, and just as he got there, Ying Xingjue walked around from the other side, and the two of them stood in front of the big box at the same time.

Ying Xingjue had already stretched out his hand in advance, Wei San and his eyes met, her hands were quickly put on the box, and she pulled the box towards herself forcefully.

Ying Xingjue's outstretched hand was empty.

Wei San smiled slightly: Mine.

Ying Xingjue looked down at the hand he withdrew, then raised his head and said in a low voice: If you take this skeleton, it will take up half of Damocles resources.

Wei San had already pulled the box towards her, and only then did she discover some details that she hadn't noticed before: the Imperial Flame actually had a faint fragrance on it.

Tsk, the command is too fine, do you still have the mind to spray perfume during the competition?

Cousin. Ying Chenghe jumped out from nowhere, and put his hand on Wei Sans shoulder, I asked her to come here to find this rare skeleton, you dont mind if we accept it right.

Ying Xingjues eyes fell on his hand on Wei Sans shoulder, and his brows frowned slightly. He thought that the main members of the Damocles Military Academy did not have a sense of proportion when getting along.

In the end, Ying Xingjue turned around and left without saying a word.

Fortunately, I snatched it up. Wei San then turned to look at the skeleton, Ive taken a fancy to this, can I change it?

It can be changed for. Ying Chenghe lowered his head and input information on the optical brain, Done.

Chapter 326

In exchange for a pair of phaseless bones, most of the number of star beasts killed by the Damocles Military Academy was eliminated, and other resources were naturally reduced accordingly. Coupled with the engines that should be selected by Chenghe, the remaining resources that can be exchanged are pitifully small, so Damocles Military Academy was the first to complete the selection and leave.

However, the five military academies went into the warehouse to pick some things together, and some things couldnt be hidden anymore.

They picked a frame and engine? Samuels Mecha engineer Nan Feizhu pondered, It seems that they either need to modify Zhu Tao, or prepare to make a new mecha.

The purple liquid mushroom is only given to Wei San alone? Shaw Eli couldnt believe it, Liao Runing and Huo Xuanshan arent prepared to use it?

If it was him, they would have a falling out, the purple liquid mushroom that everyone worked so hard to protect would only be given to one person in the end.

Gao Xuelin glanced at Shaw Eli: The mechas of the other two are tailor-made, and it is not easy to modify them. Wei San is a person from an unknown star, and her mechas have not been used for too long. On the contrary, they are the best to modify. Whats more you have also seen the knife before, Wei Sans potential may be comparable to that of Ji Chuyu and Zongzheng Yue.

No matter from which point of view, it is more appropriate to improve Wei Sans strength than to share the Purple Liquid Mushroom among the three.

At the same time, other military academies also thought about Damocles Military Academys approach. Without exception, everyone will focus on the person who is the mecha soldier, Wei San.

After the people from the five military academies exchanged for the materials and left, the staff looked down at the huge sum of money on the optical computer, then looked up at the leaky wall, and decided to call a maintenance company for emergency treatment.

Before the communication was connected, a group of people rushed in suddenly. It was his boss who brought the high-level executives of the exchange office over.

The staff was taken aback, thinking that it was just a wall that was broken, and it wouldn't be possible for all the upper floors to come down.

After the senior executives came in, they followed their boss to a shelf without even looking at the damaged wall.

Crate 666 is missing.

The staff quietly looked over and found that after hearing these words, the faces of the senior management became extremely ugly.

It should be taken away by some military academy. The supervisor of the staff clicked on the light brain to check, it is the Damocles Military Academy.

Person who is arranging the goods, how are you sorting them?! Suddenly, one of the high-level executives broke out and sternly yelled at his boss, Such important things can be brought to this kind of warehouse? How can they be cashed out now? Being cashed out?!

This kind of complete skeleton is still a phaseless bone. Where did Damocles get so many star beasts? Another senior female voice was a little gentle, but she asked to the point, Even after twelve games, the star beasts they killed would not be enough to exchange for it. Check, which link is wrong.

The boss lowered his head, his head was full of sweat, and said in a very low voice: It should be that the decimal point of this price is wrong.

Some time ago, the exchange office ushered in a major cleanup once every ten years. All materials were uniformly recorded in the book, and all exchanged and newly added materials were statistically classified, including some rare materials collected by the exchange office.

At the same time, a new system was installed at the same time. As a result, when the system was interchanged, a mistake was made, and all the collected materials were divided into several warehouses. After being discovered, the staff immediately reported to the higher-ups and began to recycle the wrongly classified materials. In the end, only one phaseless bone was left.

Now the staff here made a mistake again, and made a mistake in the price of the phaseless bone, and moved the decimal point forward several places.

Now they came a step too late, and they were exchanged by the Damocles Military Academy with only half of the number of star beasts obtained in one field.

You must know that things like phaseless bones are priceless, and generally can only be bartered, not for money with ordinary 3S star beasts.

Go get it back now. Someone suggested.

Who wants to spit out what you eat? The female executive closed her eyes, then opened them, Since the cleaning is done every ten years, the staff also needs to be cleaned up once.

Chapter 327

Ying Chenghes personal studio.

This phaseless bone. Ying Chenghe touched it again and again with gloves on, and finally came down and said in surprise, Could it be the phaseless bone from the exchange office?

There are many phaseless bones? Wei San saw that short introduction in the warehouse before, and thought it was a particularly rare material.

Not many, there are only two sets of real phaseless bones, a black skeleton at the exchange office, and a white skeleton that disappeared in the early years. Ying Chenghe almost stared at the skeleton, Other said phaseless bones refers to the skeleton of an unknown 3S star beastthis skeleton looks like a real phaseless bone!

The black skeleton glowed faintly in the sunlight, but when the light hit it, it was suddenly absorbed completely.

Those two real phaseless bones are a pair of completely mutated 3S star beasts, of unknown species. It is said that several of the strongest mecha soldiers in the federation joined forces with the strongest commanders to kill them together.

In the warehouse before, Ying Chenghe didnt pay much attention to it. After all, half of the star beasts killed can be exchanged. At most, they are skeletons separated from ordinary mutant 3s star beasts, which are fake phaseless bones.

But this is too much like the rumored phaseless bone.

While Ying Chenghe was still thinking about why this fake phaseless bone looked so good in quality, Xiang Minghua called over via communication.

Teacher Xiang?

Xiang Minghua appeared in the light curtain with a serious expression, and when he saw Wei San next to Ying Chenghe, he frowned subconsciously: Wei San, why are you here? Why don't you go to training?

Wei San pretended to be pitiful: Teacher, I will rest for a while.

Xiang Minghua wanted to say something else, but seeing the green color in Wei San's eyes, he swallowed what he was going to say: Since you are resting, go back to sleep early.

Then Xiang Minghua asked Ying Chenghe: Have you exchanged half of the number of star beasts for phaseless bones?

Ying Chenghe corrected: After giving one-third to the Imperial Military Academy, the remaining half.

Xiang Minghua was silent for a while before he said: There is a problem with the system of the exchange office. All the materials in the collection have been sent out, and the last unrecovered phaseless bone was exchanged by you today.

Ying Chenghe: Its really the phaseless bone, why can it be exchanged with so few star beasts?

As long as the price is too high, they cant cash for it.

Xiang Minghua didnt know how to describe their shit luck: The staff marked the wrong price, thinking it was an ordinary alienated star beast skeleton.

Wei Sans first reaction: Fortunately, she snatched it over, otherwise would this skeleton not belong to the Imperial Military Academy?

This incident spread to five military academies in less than one night, and everyone had to lament the luck of Damocles Military Academy.

Simply put, is Damocles Military Academy going to reverse the tradition of bad hands from now on?

The next day, they held a meeting to prepare for the next game.

Everyone in the Damocles Military Academy was full of energy, with their heads held high, and it didnt look like they had won the last place on Guyu arena at all.

I have to admit that sometimes your luck is pretty good. Liao Runing and Wei San hooked their shoulders together, Otherwise you should continue to draw the combat preparation bag next time.

One person at a time, take turns. Wei San refused, Lets see who has the worst luck.

The two walked in front, Huo Xuanshan fell behind, and the three formed an inverted triangle, protecting Jin Ke and Ying Chenghe in the middle.

They walked over arrogantly all the way, ignoring the hidden or obvious gazes from the five military academies, and stood at the forefront of the team by themselves.

The teachers from the various military academies also came to gather, and they all had no good looks when they saw the main team of the Damocles Military Academy.

Phaseless bones, such a rare material, can be obtained by the Damocles Military Academy in such a dramatic way, or in front of the main team of other military academies, who is not angry? How could they make such a major mistake at the exchange office? They were angry that the commander and mecha engineer of their own military academy were useless, and they didnt find the phaseless bone before Damocles Military Academy.

The teams of the five military academies stood on the training square, and the teachers in front gradually became quiet, and finally the representative of Guyu Stars local forces came to the stage.

It is a great honor for Guyu Star to welcome so many 3S military students this year. I hope the environment here will not cause any trouble to your training. In addition, we, Guyu star, have prepared some special packages for you. In the past, these were no different from ordinary stars. Although now The representative paused, his throat a little choked, but we are still there, and one day, we will be able to return to our original appearance.

All the military students below looked at the representatives on the stage silently. This is the inevitable result of the war, and no one can control it.

Perhaps one day, the number of stars like Guyu Star will no longer increase, and then they will be able to free up their hands to help these galaxies recover fully.

I spoke too much. The representative smiled, Now lets draw the following match.

The representative began to scroll the words on the light curtain, and said after a minute: Stop.

Chapter 328

Fan Han Star

As soon as these three words came out, everyone looked towards Pingtong Academy.

The star where Pingtong Academy is located was on Fan Han Star.

The ambient light of many galaxies can be seen from the name, like Sadu star, most of the stars are deserts. As for Fan Han Star, the temperature is extremely low, and thousands of miles are frozen all year round.

This is bad. Liao Runing reached out and touched it, Their home court.

Wei San has never been to Fan Han Star, she has only seen the name of this star once, when she inquired and registered on Star 3212, she saw it on the Star Network.

I remember that the people in Pingtong Academy are particularly resistant to freezing. Jin Ke said, They don't use mechas, they walk on foot, and they are more resistant than us.

Their mechas are also naturally more frost-resistant than ours. Ying Chenghe added, Their materials generally have more frost-resistant properties.

Wei San listened to them, her face wrinkled into a ball: Why does our mecha have such a big advantage in the desert arena, before we had to grab the dust cover. The only advantage is that they can walk very fast in the yellow sand.

We used to bring our own dust cover, but it was canceled later. Jin Ke explained, Because there is a track environment that needs a dust cover, so other military schools feel it is unfair.

There are many reasons why the Damocles Military Academy has fallen step by step from the former boss to the present.

As soon as the track was determined, South Percy Military Academy left that night and rushed to Fan Han Sar, probably because they wanted to adapt to the environment there as soon as possible.

The following day, other military academies also set off one after another.

Damocles Military Academy left the next night. Before they left, the Imperial Military Academy hadn't left yet.

How is it? Wei San looked at the numbers on the instrument and asked the doctor.

It's not good. The doctor turned around and took out the needle, I need to draw a tube of your blood to test what's wrong with you.

Wei San: She suspected that the doctor was connoting her.

Your body data haven't fluctuated at all so far. The doctor put one hand in his pocket, and the other hand held the needle, staring at Wei San, Don't you feel uncomfortable?

No, I'm fine. Wei San felt that she was full of energy, had enough food and drink every day, except for being beaten by Jie Yuman every day, everything else was satisfactory.

The doctor frowned and looked around Wei San again, he was amazed, looking at the basic data of measurement and statistics, her body was still in that dilapidated state, it couldn't be worse, after drinking so many nutrient solutions and supplements, there was no reaction at all.

But he felt that Wei Sans state was better than the beginning.

First, I will draw a tube of blood for research. In addition, I will add some elements to the nutrient solution. If you feel uncomfortable after drinking it, please let me know. The doctor instructed after drawing a tube of blood in Wei Sans hand.

I know.

This is a supplement. The doctor took out a box from the cabinet and pushed it to Wei San, This time, it has added some flavor, strawberry flavor.

Can you change it to another flavor? Wei San opened it and looked at the pink supplement inside, she couldn't help thinking of the strawberry flavored nutrient solution she tasted at the garbage dump back then.

Okay, what flavor do you want? The doctor asked.

Wei San tried hard to think about it, and finally gave up: Except for this taste, everything else is fine.

Chapter 329

It was still late at night when Damocles starship arrived at Fan Han Star.

The military port was brightly lit, but the cadets felt the extreme cold as soon as they stepped out, and even the individual 3S mecha soldiers shivered as soon as they got off, and ran into the aircraft.

Its tootoo, too cold. Liao Runing rushed into the aircraft, shaking his hands and blowing.

Seeing that Huo Xuanshan next to him didnt seem to respond, Liao Runing reached out to touch his trouser legs, and found that Huo Xuanshan was shaking too, and he clicked tut twice, he just wanted to save face.

Several people came in one after another, Liao Runing turned his head and found that Wei San came in wearing a thick coat.

Where did you get that from? Liao Runing squeezed over and rubbed the sleeve of her thick coat.

Huo Xuanshan sat on the other side without a trace, pulled off the other sleeve of Wei Sans coat, and stretched his hand in to warm it.

It was given by the doctor. Wei San raised her eyebrows triumphantly, Im weak and cant stand the cold.

Liao Runing looked constipated, although logically he knew that Wei San had a hard time before and her health was indeed poor, but in reality, Wei San clearly killed a star beast with one punch.

Jin Ke watched the three of them huddled together and shivering, shook his head, and sat opposite Ying Chenghe with him, then pressed the seat, and a gust of heat came over him.

Ying Chenghe leaned on it, closed his eyes comfortably: Call me when we arrive.

The three mecha soldiers who had never seen the world and only relied on physics for warmth were dumbfounded.

Seeing that Liao Runing wanted to rush over, Jin Ke immediately said: The white button under the seat.

At last, the five people leaned comfortably on the seats, as for the doctors coat.

Wei San was too hot, she stuffed it to Huo Xuanshan, Huo Xuanshan took it for a while and then threw it to Liao Runing.

After all, Liao Runing is a native of Sadu Star, and he is tolerant of high temperatures, so he just hugged it all the way.

Arriving at the Fan Han Star practice field, everyone got off the aircraft and felt the extreme cold again.

Damocles cadets entered the dormitory building tremblingly. Fortunately, Fan Han Star was not as outdated as Guyu Stars equipment, and even needed the main team members to check. They could go to rest after arriving that night.

Its just that when they entered the dormitory, they were shocked to find that there was no equipment to increase the temperature in the room, and even the quilt was only a thin layer. When they lifted the mattress, there was still an iron plate underneath!

They live such a life, why is the harsh environment of Damocles famous? Master Liao, a native of Sadu Star, couldnt understand.

Huo Xuanshans tone was calm: Damocles lived a hard life because they were really poor, and Pingtong Academy lived such a life to train students.

Liao Runing: Feel a little heartbroken.

Chapter 330

So next we have to sleep while shaking? Wei San hugged the coat, but fortunately she still had a coat.

The extremely cold track is even colder than here, so be mentally prepared. Jin Ke was not surprised, he reminded, Try to adapt to this half a month.

There is still a difference in physique between the students of the three military schools and ordinary people. At least in this harsh environment, their ability to adapt will be stronger.

On the first night after arriving at Fan Han Star training ground, everyone did not sleep well, and their brains were half a beat slow because of the cold, especially those who grew up on Sadu Star, such as Master Liao, who was already frozen stupid.

Young Master Liao got up and shook his hands to boil a pot of hot water, but it couldn't boil for a long time, and finally got some temperature, poured it into a cup, and it was cold again.

I want to go home.

Young Master Liao said, sitting on the cold bench in the living room, his buttocks felt cold, and he immediately bounced up.

Liao Runing:

The others were not much better, they went out together trembling, although the other military academies around arrived first, but they were all trembling when they looked closely, only the members of the Pingtong Academy were walking normally in the exercise field.

A voice came out of everyone's hearts: F***!

Shaw Eli of Samuel folded his arms: It's okay now thinking about Sadu Star, it's just a little bit hotter.

Xi Wutong glanced at him. Before on Sadu Star, Shaw Eli often complained in the room.

Everyone went to the training ground shivering. After training all morning, although they were not hot, they were not so cold.

The members of Damocles Military Academy thought that they could always have a mouthful of warm food when they went to the cafeteria, but when they entered the cafeteria, they found that even the food was cold.

That night, Liao Runing collapsed and started going in and out of the toilet constantly, getting diarrhea from the cold.

He was lying on the bed dying, his eyes filled with cold tears: My last wish before I die, I just want to drink a cup of hot water.

Its impossible to have hot water. Everyone on Fan Han star drinks cold water. Jin Ke broke his fantasy, You will be fine in a few days.

Everyone could only bear it stiffly, and Wei San was the first to adapt, and she was already active on the third day, without much reaction to the temperature.

Afterwards, other people began to adapt to it one after another. Although Liao Runing hated this environment very much, he gradually recovered, and was not so exaggerated.

At noon that day, the Imperial Military Academy just arrived at the exercise ground.

Their military uniforms were neat, and everyone came in orderly. The most important thing was that they didn't have the embarrassment of other military schools when they came.

Wei San stared at Ying Xingjue at the front, and asked Jin Ke next to him, Isn't he cold?

Two reasons. Jin Ke is a know-it-all. One is that Ying Xingjue's perception is materialized, and he can block anything he wants to block, including cold air. The second is that the students of the Imperial Military Academy have come to Fan Han Star for special training.

Special training requires paying a lot of money to Fan Han Star. At present, only the Imperial Military Academy regularly organizes students to come here. It is said that South Percy is already talking about special training with Fan Han Star. Ying Chenghe also knows some inside information.

After all is said and done, Sadu Star is still the poorest, with nothing.
