

## Smash All 341

### Chapter 341

Ying Xingjue's attack on the doctor in front of other military academy commanders was known to all the main team members of each military academy. The first thing they thought of was that if Ying Xingjue really lost control, there would be a chance to overthrow the Imperial Military Academy in this Fan Han competition.

For a time, the training intensity of various military academies actually increased again, and they all thought that they might have a chance to win the ranking, and even had some ideas about that position.

At the same time, each testing point in Fan Han Star also sent over the summary of data from recent years.

In the conference room, the leading teachers and commentators from the five military academies were present, as well as the representatives of the military regions behind the organizer who showed up via communication.

Cold wave?

Everyone looked at the person at the front of the conference table.

The Representative from Fan Han Star released a calculated curve: Yes, a cold wave is coming ahead of schedule.

Perhaps because of the extremely low temperature, the environment on Fan Han Star changes slowly and is relatively stable, with only a once-in-a-decade cold wave requiring attention. No one expected that the cold wave would arrive a full year in advance. Assuming that the commanders of the military academies did not fall ill at the same time, they might not have been able to notice the changes.

The activity of particles in the air has skyrocketed in the past two weeks. According to calculations, the cold wave will begin on the seventh day after they enter the competition. If they can come out early on the seventh day, there will be no serious problem.

Ying Yuerong sat in the first seat on the right side of the conference table. She looked at the representative of Fan Han Star: No one has noticed. Are you going to just sneak past the Guixing testing point?

The representative was a little embarrassed: We have fixed the cold wave time in Hanxing for too many years, and the difference is only one day, so the detection points have been relaxed.

I see that people on all major planets have been at ease for too long, and there are problems in all aspects. Some time ago, the exchange office could lose the Phaseless Bone. Now, even the cold wave is coming, and you don't know. Ying Yuerong lowered her head and straightened herself out. She coldly said, Next time, it's better to just hand over the Federal Military District to others.

No one made a sound in the entire conference room.

There were people of the same level as Ying Yuerong here, but no one spoke before her.

First of all, she is a commander, and secondly, she is from the Imperial Military Academy and currently serves in the First Military Region. The most important point is that Ying Yuerong served as the commander-in-chief of the Fifth Military Region for five years.

There are thirteen military districts in the Federation. Except for Districts 3 and 11, which are occupied by the independent army, Huanye Star, where the Fifth Military District is stationed, is the most dangerous place. Most people will be replaced after staying there for three years and at least take a rest. At least, they won't be able to go back until next year.

Ying Yuerong's right to speak now is to fight it out year by year.

Should we compete in advance for the fourth division match? The Representative from Fan Han Star asked bravely.

The cold wave lasts for a month and obviously cannot be delayed later.

Chapter 342

You can compete how you want to compete. The leading teachers from each military school will go back and tell you students so that they have a clear idea. There is no need to change anything else. Ying Yuerong stood up and glanced at Fan Han Star's representative, What you have to do is to find out the reason. Why did the cold wave come early?

After she finished speaking, people from other military regions had nothing to object to and all turned off their communications. Yu Tianhe and Xi Haotian didn't care about this. When they saw Ying Yuerong leaving, they followed them out. Only these teachers were left in the conference room.

Is it possible that there will be a cold wave and we won't compete in advance? What if a student has a problem?

As long as they come out early, seven days should be enough.

The first three games were all done in advance. It was too late. Just like in the Guyu competition, a lot of energy was consumed, so they just turned on the flight state and rushed to the finish line.

I think the Ying family is obviously trying to delay time for Ying Xingjue's treatment. The teacher from Samuel Military Academy curled his lips and whispered.

Ying Xingjue is indeed being taken care of. In the past two days, people have come in batches from the Imperial Capital Star. The first ones to arrive are doctors. They come all the way with various large instruments, and aircraft come one after another. There are also two teams of mecha soldiers, one is the Ying family's escort team, and the other is the team recruited by Ji Yuande. These two teams have a total of twenty people, both of whom are 3S-level soldiers. It is said that at the beginning of this competition, they need to start following the team.

Standing next to the training ground, Wei San happened to see two teams passing by. She was stunned: Us 3S mecha soldiers are nothing but cabbage? How come they are everywhere?

Before the competition, it was clearly stated that there are very few 3S players, and every 3S player is the most precious talent.

First of all, the scope of the word we does not include you. Jin Ke stood against the wall and looked at the team of twenty people who were gradually walking away. Secondly, there are ten people here who

are the Ying family's guards, trained by the Ying family themselves. Individual soldiers have nothing to do with military regions. In the end, the 3S-level soldiers in the military region behind the Imperial City cannot be said to be everywhere, but they are also common, many times more than in other military regions.

Every year, the Imperial Military Academy absorbs the most elite talents from the Federation. After years of accumulation, it is not difficult to recruit ten 3S level soldiers.

Ying Xingjue is so important? Liao Runing clicked his tongue a few times, Will Wei San be able to enjoy such big scenes in the future?

Jin Ke turned around and looked at Liao Runing with a look that looked like a fool: This is the person who prevents Ying Xingjue from losing control. Once Ying Xingjue loses control and attacks people indiscriminately, he will be killed on the spot.

Liao Runing was silent for a long time and said dryly: Isn't he called the hope of the Federation?

The only super 3S level commander, kill as they please. This is too cruel. Forget about the military district, his family will also follow along and prepare to take action?

The hope of the Federation is based on the fact that there are still people in the Federation. Those who lose control and threaten the military regions of the Federation cannot be retained. Jin Ke had a complicated heart. If at the third battle, Ying Xingjue absolutely did not show the ability to perceive materialization, perhaps the military region will not send so many 3S mecha soldiers.

Ji Yuande expressed to the military regions that he would put the overall situation first and not favor Ying Xingjue.

Will Wei San lose control? Huo Xuanshan suddenly asked.

At most, her power is out of control, and usually it's her and her opponent who get into trouble. Jin Ke said calmly, Don't worry, even if she loses control and hurts people everywhere, we don't have that many 3S mechas in the military area behind Damocles to draw it out.

Wei San next to him: ?

Those people are just trying to contain him. If my cousin loses control, the one who really takes action should be Ji Chuyu. Ying Chenghe said slowly.

Liao Runing couldn't listen anymore: I'm going to the training ground. Goodbye.

Damn, these people, each are more ruthless than the last.

If you can't control it, just kill it. These people are interesting. Wei San said and left.

The remaining three people looked at it and left one after another.

Chapter 343

In a separate medical room, Ying Xingjue repeated the last examination, except that the doctor now was his personal doctor since childhood, the senior sister of the doctor for Wei San.

Have you had a lot of mood swings during this period? Xu Zhen pulled up a chair and sat next to him, asking Ying Xingjue.

Its still alright. Ying Xingjue said calmly, not like someone who would suddenly attack a doctor.

Xu Zhen called up the data on the light brain and compared it: Except for the fluctuations in perception, there are no major changes in the body. It may be that the nutrient solution has failed. Tongxuan Company has sent a new nutrient solution. I will test it first before leaving it for you.

Ying Xingjue leaned on the bedside and turned to look out the window. It was gray and even the air was cold. He could only see the gray building opposite, which was the back of the medical building.

By the way, I seemed to have met my junior brother just now. Xu Zhen spoke to herself, Jing Ti is the doctor who first discovered that there was a problem with your nutritional solution that year. I dont know what he is doing here, but I remember he went to District 13.

Xu Zhen first worked as a doctor in the Second Military Region. Later, after taking over Ying Xingjue, he resigned from the military and devoted himself to studying his situation.

Ying Xingjue lowered his eyes: The doctor is here for only one reason.

Is anyone in Damocles sick? Xu Zhen stood up, got a bottle of supplements, and put it on Ying Xingjue, Colonel Li Zes injury hasnt healed yet?

Ying Xingjue never said a word, he knew who Jing Ti was here for.

I have to train in the afternoon. He raised his eyes slightly and looked at the bottle.

Xu Zhen paused and said: The drip speed has been adjusted to the maximum. Lets push back the training.

Wei San trained all afternoon and immediately ran to the doctor as soon as she finished.

Yesterday, the doctor said his greetings in advance that he would test her data after training, preferably within two minutes of training.

Wei San: Two minutes is too short, cant you come over and test? The medical building and the training ground are not close to each other.

The doctor smiled slightly: The equipment I use is from this training ground and cannot be moved. Unlike the Imperial Military Academy, they bring all their own medical equipment.

So as soon as the training was over, Wei San jumped out and ran all the way, taking a detour to the medical building. She didn't go through the door and take the elevator, but instead, climbed up the tall building with bare hands.

When Xu Zhen turned around to get the bottle for Ying Xingjue, he followed his gaze and looked out the window. He was surprised when he saw the figure climbing up the stairs quickly with bare hands: Who is that?

Ying Xingjue watched Wei San quickly climb to a certain high-rise building, and when he saw her reaching out to knock on the window, a man inside opened the window, his eyes widened, and he didn't know what they were talking about, and then let her in. The man in a white coat stuck his head out to look downstairs, then closed the window with a look of shock on his face.

Only then did he look away and answer Xu Zhen's question: People from Damocles.

Xu Zhen came to his senses: Should be a soldier. Only those individual soldiers can do such reckless things.

Ying Xingjue never denied it.

The person who opened the window just now is Jing Ti. I saw it correctly before. Xu Zhen pulled off the needle on the back of Ying Xingjue's hand. You can go to training, but I suggest you rest first.

Ying Xingjue stood up and walked out of the medical room. He raised his head and looked at a window on a certain floor. The handprints left on the window edge were gradually covered by the cold air and disappeared.

After a moment, he turned and walked towards the training building.

You soldiers are really The doctor asked Wei San to pick up her sleeve and put the patch on the inside of her arm, I sure admire you

Wei San: Doctor, you let me arrive in two minutes.

Cant you borrow some teachers aircraft to fly over after training? Jing Ti put various test lines on Wei San and sat down, You have to use your legs to run? The strength of a soldier is replaced by their brain, and you are indeed worthy of your reputation.

Wei San: She is also an engineer!

Sit down and dont move. Jing Ti opened a cold chain box, which contained two tubes of blood. I tested the blood I drew last time. The tube on the left is my blood.

Wei San looked at the two tubes of blood and couldnt tell the difference: So?

Theres something extra in your blood components. I cant separate it out, and I dont know if its good or bad. Jing Ti sighed, I dont know if its the reason for exceeding 3S.

The blood indicators are indeed different depending on the grade, but Wei San has more unknown ingredients.

How about you go and request for Ying Xingjues blood? Wei San suggested.

Jing Ti: I will be arrested by the guards as soon as I open my mouth.

Chapter 344

Whose class did you just attend? Jing Ti looked at the measured data and was speechless. When meeting Wei San, he would always first doubt whether there was something wrong with the instrument.

Teacher Xies. Wei San looked at the data on the instrument but couldnt understand it, Whats wrong?

Jing ti turned around and looked at Wei San: You just came out from Jie Yumans hands. You dont have any fluctuations?

The entire District Thirteen knew that Jie Yuman was particularly good at fighting. Even Li Ze felt uncomfortable facing her. After Wei Sans training, her body was actually calm as if she had just woken up.

Wei San said sincerely: Actually, my heart is quite volatile.

Jing Ti: There will be ghosts if I believe you.

Forget it, I cant measure anything as you are now. There may be some changes during the competition. Jing Ti walked around the medical room a few times, In this case, Ill go find my senior sister and see if I can borrow that micro-measurement equipment. When the time comes for the competition, you will carry it with you throughout the whole process.

Wei San made a trip in vain, but nothing was found. She only found out that there was an unknown component in her blood.

As soon as she left, he stared at the two tubes of blood in the box and pondered for a moment before looking for Xu Zhen.

There is no need to ask about Xu Zhens location. The most strictly guarded place is the Ying familys medical team.

Im looking for Dr. Xu, please let her know. Jing Lai spoke his name to the guard.

Xu Zhen heard that he was coming to find her and immediately asked the guards to let him through.

At first I thought I was mistaken. I just saw you opening the window and looking out. Xu Zhen motioned for him to sit down casually.

Jing Ti: Senior sister, did you just see it just now?

Xu Zhen laughed: Not only me, but also Xingjue next to me. was the person who climbed up the window a member of Damocles main team?

Jing Ti nodded: Wei San.

Tell me, what do you want from me? Xu Zhen asked directly.

I heard before that you have a micro machine for detecting human body data. I have a research need and would like to borrow it for a while. Jing Ti said half truthfully.

Ying Xingjue's father not only annexed Tongxuan Company, but also the largest medical device company in the Federation to develop medical equipment specifically suitable for Ying Xingjue's body.

The one Jing Ti requested for was one of them.

You want this? Xu Zhen changed his mind and said, I can let you borrow it, but I want to invite you to study the problem of Ying Xingjue together.

Just as Jing Ti was about to speak, he was intercepted by Xu Zhen: I know you have never wanted to be hired by aristocratic families, but this time it is just for personal help.

Jing Ti originally wanted Ying Xingjue's blood, but now that a pillow was sent as he was dozing, he shied away as usual to prevent Xu Zhen from getting suspicious.

In the end, the two reached an agreement. Jing Ti and Xu Zhen studied Ying Xingjue's current problems together, and Xu Zhen lent him micro-instruments.

This is a micro measuring instrument. Just put it into the body of the organism being measured. Xu Zhen handed him a small box, which contained a small metal steel gun and a chip. After inserting the chip into the optical head, you can receive data.

Jing Ti put it away: Ying Xingjue is in very bad condition now?

This was the second time Xu Zhen invited him. As a long-established doctor, she would not speak easily unless she had no other choice.

Xu Zhen nodded and then shook her head: The news that he lost control should have spread widely, but the cause cannot be found at the moment. His physical condition is still stable.

I need to remind you of one thing. Jing Ti said, Ying Xingjue is a super 3S level commander. He is fully capable of controlling himself to become a stable state in your eyes.

Xu Zhen was silent and then said: I know Xingjue's body. There is no problem for the time being. This time it may be that the nutrient solution has failed.

Jing Ti did not say anything more. If she really thought so, she would not invite him to study together in private.

Chapter 345

Ai

This is the seventh time you sighed. Huo Xuanshan said calmly while sitting at the dining table.

Liao Runing simply put down his chopsticks: Im just a little why would Marshal Ji do this?

The First Military Region is the place where the Federal power is most concentrated. As the marshal, he represents the entire Federation, so he naturally needs to express his position. Jin Ke counted the rice on the plate. Sacrificing one person for the benefit of many is the most common practice in the military region.

There is almost no hesitation.

I dont understand, and I dont want to understand. Liao Runing sighed. He always felt that he was just here to compete and that was all. Now that he suddenly had a glimpse of the adult world, he couldnt change his mind.

Wheres Wei San? Ying Chenghe asked.

She was detained and beaten. Huo Xuanshan said lightly.

Ying Chenghe: Jie Yumans class?

Huo Xuanshan nodded: She kicked Teacher Jie Yuman today, and the teacher said she must successfully kick her again before she can leave.

As soon as he finished speaking, Wei San limped over carrying a plate.

Did the kick succeed? Huo Xuanshan turned around and asked.

Wei Sans hand holding the chopsticks was still shaking a little: Successful. But she also successfully unlocked a new level of understanding about Teacher Jie Yuman.

At this level, its no wonder that Colonel Li Ze was beaten by Jie Yuman.

If you dont come, Master Liao wont be able to eat anymore, Jin Ke said.

Wei San glanced at Liao Runing. Although Master Liao was usually harsh with others, he was actually more sentimental than anyone else.

While eating, they saw the main team of the Imperial Military Academy not far away, and inevitably started to think about something else.

Wei San subconsciously looked over there, but happened to meet Ying Xingjue who raised his eyes.

But she was not embarrassed when faced with this situation. Instead, she raised her hand to greet him.

As long as you are not embarrassed, others will be embarrassed. Wei San knows this skill well.

Sure enough, in the next second Ying Xingjue withdrew his gaze and stopped looking at her.

Would you like to go out and play today? Jin Ke suggested.

The closed training time has ended this morning, and they can move around freely. As usual, a few people go out to play before the game or after the game. However, this time the cold wave has been brought forward, and all places on Fan Han Star will be closed after the game.

Are you treating? Wei San said casually.

Im treating. Jin Ke agreed.

other people? ? ?

Jin Ke changed attitudes today? He actually stopped being stingy.

Just this time, it will be your turn next time. Jin Ke despised the wolfish glint in the eyes of these people.

The five people went out in the aircraft and soon realized that Jin Ke didnt really want to treat them. Instead, he took them in a circle and stopped near a hospital.

What are you doing? Liao Runing couldnt help but ask as he watched Jin Ke observe.

At this moment, five people were crowded in front of a table in a cafe. Jin Ke looked out through the floor-to-ceiling glass. The hot coffee in front of him had already gone cold.

The hospital in front is the hospital where our command came for inspection last time. Jin Ke leaned against the floor-to-ceiling glass, still looking outside.

So? Wei San asked, holding a second cup of coffee.

I thought about it carefully, Jin Ke said, What must have happened downstairs that day.

You five commanders showed up at the hospital together. If anyone wants to take action, this is the best time. Huo Xuanshan stirred the coffee and looked at the rising heat. You didnt see it, which means the matter has been resolved.

The Huo family members are distributed in various military regions and military academies. Many famous assassination activities in the history of the Federation were lost at the hands of the Huo family.

I know. Jin Ke looked away, But I always feelsomething isnt right.

Chapter 346

The scratches on the pillar that day indicated that something happened. It stands to reason that after the incident, the downstairs had been tidied up in advance, so there were no changes when they came down.

But Jin Ke suddenly felt a chill behind him, and that feeling seemed to remind him that something was wrong.

So he wanted to do it again today.

Then lets go in and have a look. Liao Runing said nonchalantly, There are three of us soldiers.

The five of them came out of the cafe and went to a clothing store to buy a set of clothes each. Huo Xuanshan and Jin Ke walked together, Liao Runing walked with Ying Chenghe, and Wei San fell behind, the four of them could be seen.

The hospital was full of people, completely different from that day.

Jin Ke passed the pillar again and found that the scratches had disappeared.

He walked around the lobby on the first floor and found nothing unusual, so he had no choice but to go out.

We can go take a look around. Huo Xuanshan said, Maybe we can see something.

Jin Ke nodded and gestured to the three people behind him.

They walked around various buildings, and Huo Xuanshan checked the surroundings: Two teams fought here.

He squatted on the ground, stretched out his hand to touch the floor tiles, and suddenly felt a cold touch. Huo Xuanshan rubbed the gap for a while, then raised his hand and looked at his fingertips: New ash, just mended.

Jin Ke looked around and affirmed: This is not a defensive point, it is too far.

People from the five military academies were stationed here that day. He was in the habit of commanding and had observed that this place was too far from the hospital and no one was guarding it.

The traces were left during this period. Huo Xuanshan said.

Jin Ke frowned and thought deeply. People from the five military academies were there that day, so it was impossible to take action. The only people to guard against were the Independent Army. If there was an Independent Army on the first floor, what were they doing here? Which force discovered them?

Finally he stood up: lets go.

As soon as they walked out of the alley, they met Ying Chenghe and Liao Runing.

Where is Wei San? Jin Ke asked them.

In the back. Liao Runing turned around and pointed, Wheres the person?

Jin Ke frowned and immediately walked over there: Wei San?

The three of them followed and walked around in a circle, but still found no trace of Wei San.

When was the last time you saw Wei San? Jin Ke asked Liao Runing with an ugly complexion.

We followed you two, Wei San was also following. Liao Runing saw Jin Kes gesture at that time, so he put his arm on Ying Chenghes shoulder and walked out like two good brothers.

Jin Ke asked again: Are you sure that when you came out, you saw Wei San coming out too?

Liao Runing nodded: I really! didnt see it.

The four of them walked into the hospital regardless. As soon as they walked into the hospital gate, they bumped into Wei San head-on.

Wei San! Ying Chenghe was the first to spot her.

I was just going to find you. Wei San said when she looked up and saw the four of them.

Jin Ke said nothing, stretched out his hand to grab Wei Sans collar, and led her to the alley. Finally, he stopped in the corner and asked: I asked you to follow me just now, where have you been?

This was the first time Wei San saw him angry. She patted Jin Kes hand and motioned for him to let go of her collar: Let go first, and Ill explain later.

Jin Ke tightened his grip: Ying Xingjue's behavior was very wrong that day. I don't want anything to happen to you here.

For some reason, as soon as Jin Ke returned here, he always recalled the look Ying Xingjue had given him at that time. He was rational and restrained, not like the sudden outburst later.

Wei San raised her hands and said sincerely: I know, I won't do it next time.

Jin Ke then let go, closed his eyes, then opened them again: Tell me, where have you been?

Wei San was so nervous when he pulled her neck that she raised her hand to straighten her collar: I saw that ugly doctor just now, so I followed him and took a look.

Chapter 347

What ugly doctor? Jin Ke frowned, suddenly remembering what Wei San said after watching the video he recorded before, The doctor Ying Xingjue attacked.

Wei San nodded: It's him.

Why are you following him? Liao Runing asked first.

I just want to see. Wei San sighed, He's really ugly.

The four of them frowned and looked at Wei San. Normally Wei San would talk to her opponents in a sarcastic manner, but that didn't include ordinary people. What's more, when the doctor pulled down his mask in the video, he clearly had a decent appearance and was not ugly at all.

Wei San, you are very strange now. Jin Ke said after a long silence.

Was there really something wrong with that doctor in that hospital?

I think I'm quite normal. Wei San raised her eyebrows, My heartbeat and blood pressure are all normal, and I don't feel out of control.

Besides ugliness, what else do you see? Ying Chenghe asked her.

Wei San thought for a while and said: He greeted other doctors and nurses. Really ugly.

She couldn't explain why, but deep down she felt that the man was ugly.

Jin Ke: No more?

None.

Lets go back first. Ill have people keep an eye on the doctor later. Jin Ke raised his hand and pressed his eyebrows. Since both of them were acting strangely because of the doctor, maybe there was something wrong with the doctor.

Arent we going to play? Wei San was still thinking about visiting other places on Fan Han Star.

Jin Ke took a deep breath: Do you think all of us are still in the mood to have fun?

Wei San nodded: I am.

Liao Runing also slowly raised his hand: I am too.

In the end, the five of them went shopping elsewhere and bought a bunch of things, all paid for by Jin Ke. He stood by and swiped his card with an expressionless face, showing no trace of his usual stinginess, strangely generous.

When they came back, most of the other military cadets had just come out of the training building. They all looked away when they saw these five people coming back leisurely.

They dont know why Damocles Military Academy has always been so confident, and started to run outside without closed door training. The Imperial Military Academy won first place time and time again, and never relaxed in training.

The five people returned to the dormitory and found that the door had been opened and Xiang Minghua was sitting inside waiting for them.

After they saw the person clearly, they breathed a sigh of relief. Fortunately, it wasn't Jie Yuman inside.

You're back? Xiang Minghua looked at the five of them, Where did you go shopping?

They have competed three times, and the teachers at Damocles Military Academy almost all knew the habits of these five people. Every time they reach a star, they will take a day out to go out.

Liao Runing said with a quick mouth, but didn't say they had been to the hospital.

En, you guys go to bed early and I'll talk to Jin Ke about something. Xiang Minghua was obviously just being polite, and motioned for Jin Ke to sit down.

Jin Ke took out a bunch of things and piled them on the living room table before sitting down.

Xiang Minghua: These students are really

Chapter 348

I just received news that there is something strange happening in the Independent Army. No one knows the specific situation. I only know that there are people coming out of District 3 and District 11. Xiang Minghua said.

What do we need to do? Jin Ke asked.

Xiang Minghua shook his head: The school has discussed it and doesn't want you to get involved. The Independent Army's affairs will be handled by the military region.

Jin Ke narrowed his eyes: Teacher Xiang, what about the other military academies?

Damocles Academy discussed not involving them, indicating that someone wanted them to get involved.

Imperial has given orders that after the extreme cold competition, in addition to the competition, the main team of the Imperial Military Academy will go out to deal with the Independent Army that appears. The other three military academies have not responded yet. Xiang Minghua paused and said, The Independent Army is different from the star beasts. We don't want you to have contact with them for the time being.

The star beasts is the enemy of all mankind, while the Independent Army is an internally divided force. These are two concepts.

These students are not even underage yet, and the Damocles Academy hopes that they can concentrate on competing, dealing with star beasts, and gaining experience, rather than getting caught up in human struggles.

They go out and don't need to train?

Xiang Minghua smiled helplessly: It's just a contingency plan. It's not clear what the Independent Army wants to do now.

The Independent Army were originally military academy students, but suddenly defected overnight.

District 11 was once affiliated with Damocles Military Academy. Most of the people in this district were civilians. They defected, and the other military schools were not even the least bit surprised. Some civilians want to rebel if they have some strength, which seems normal to them.

It's just that District 3 defected together, which no one expected.

District 3 is an out-and-about aristocratic military academy, because this district was once affiliated with the Imperial City. Among those who defected was Ying Youjin, the best commander of the Imperial Military Academy. This news shocked the entire Federation.

After the two districts defected and were banned, no one knew what they were doing. They had been hiding in the military district and even guarding the defense line.

At first, people in each military region thought that they were just disobedient. At that time, the power of the military region was in chaos. It was not impossible for them to want to independently defend the defense line. They even gradually relaxed their vigilance.

It was not until two years later that Pingtong Academys mecha master Ji Liang defected and ran to the Independent Army.

The commander, the mecha engineers, and the powerful mecha soldiers from District 11 gathered together.

Districts 3 and 11 have since been collectively known as the Independent Army. They used the slogan Run for freedom, not restricted by military power, but they committed massacres of civilians. The few big stars they currently occupy were obtained from the massacres of aborigines.

The incident is currently documented on the first page of the command manual, and the military academies require all commanders to remember this day as a disgrace to the Union.

The military regions united to attack the Independent Army, but only Ying Youjin was involved. At that time, there was no command in the Federation that could compete with him, leading to a stalemate between the two sides.

In the end, both sides took a step back. On the surface, they maintained a clear distinction for the time being. However, privately, the Independent Army was always moving, and the military regions were not lenient. They immediately erased any traces of the Independent Army when they found them.

We went to the hospital to check before. Was there an Independent Army attack downstairs? Jin Ke asked.

Xiang Minghua nodded: Li Ze didnt tell you? A small group of Independent troops appeared on the first floor, but they were forced back.

Jin Ke pinched his fingertips to control himself so as not to show any signs of abnormality. Today, Wei Sans question should be discussed later.

As soon as Xiang Minghua left, Liao Runing poked his head out of the room: Why do they only tell you this kind of thing?

Jin Ke: Didnt you hear that just now?

Yes, I heard. Liao Runings head was half exposed outside the door. If we encounter the Independent Army, are we going to kill them directly?

At any rate, most people were once of the same origin.

Chapter 349

We are only staying at the training ground. We have no chance to meet them unless the Independent Army raids the training ground. Jin Ke glanced at the door of Wei Sans room, went over and knocked, Youre sleeping?

No. Wei San came out and opened the door, Im drawing some blueprints.

Jin Ke looked at Wei San again and made sure there was nothing unusual before letting her go: Did you hear what Teacher Xiang just said? Lets not go out randomly in the future, so as to avoid encountering the Independent Army.

Okay, okay, okay. Wei San pushed Jin Ke out perfunctorily, Its getting late, I still have to design the mecha.

She just got some inspiration on her way back and had to draw it quickly.

Jin Ke returned to his room, still unable to sleep, with all kinds of things entangled in his mind.

In the end, he simply sat up. He still felt that Wei Sans behavior was too strange. Both Super 3S had physical problems and it was entirely possible for them to lose control. However, the probability of encountering the same person acting strangely was too small.

Jin Ke lowered his head and turned on the light brain, stared at it for a while, and finally decided to dial Ying Xingjues communication.

At this time of night, he made a rash call and it was to a competitor. Ying Xingjue must have hesitated for a moment. The call sounded for a few seconds before he was connected.

Ying Xingjue was wearing a military uniform, and it looked like he was still in the personal training room.

Is something wrong? Ying Xingjue asked directly.

Jin Ke coughed: Did you really lose control during the inspection that day?

Ying Xingjue's expression remained unchanged: Why do you ask this?

I just think it's strange that you suddenly lost control. It looked normal before the blood was drawn. Jin Ke certainly wouldn't say it was because Wei San was behaving strangely today.

Ying Xingjue silently walked to the corner, picked up a bottle of water, raised his head and drank a few sips, his dry and white lips were moistened, he said softly: Even if I lose control, the Imperial Military Academy must be the overall champion of the competition.

Jin Ke cursed in his heart, with a smile on his face, In the future, we will all serve in various military districts, and maybe we can cooperate in a district. It's just a competition. Friendship comes first. I just care about your health.

It's not your concern. Ying Xingjue still looked indifferent, which was completely different from his cousin's talkative demeanor.

I know you haven't lost control. Jin Ke suddenly said something, staring at him closely.

Ying Xingjue's expression did not change from beginning to end. He raised his eyes and looked at Jin Ke: I don't know what you want to know, but your test is too obvious.

Jin Ke:

Finally, Ying Xingjue nodded slightly and reached out to turn off the communication.

Jin Ke collapsed on the bed, subconsciously telling himself that Wei San was normal.

In the training room, Ying Xingjue hung up Jin Ke's communication and dialed another communication.

They went out today?

Yes, the five members of the main team went out together to wander around the lively places in Fan Han Star.

After Ying Xingjue heard this sentence, he hung up the communication, his fingertips unconsciously rested on the light bracelet on his wrist, and he lowered his eyes in thought.

He is suspicious by nature. If he had any doubts during the examination at the hospital, he will definitely go there again this time, Wei San is naturally the same.

So the inexplicable call from Jin Ke is related to Wei San?

## Chapter 350

Just this much? Ying Chenghe stood aside and watched Wei San take the Purple Liquid Mushroom.

Mix the joints and shell with Purple Liquid. Well talk about the rest later. Wei San picked up the measuring cylinder and shook it in front of her eyes. The Purple Liquid flowed slowly, like purple crystal, and the aroma emanated from it.

Ying Chenghe saved the remaining Purple Liquid Mushroom: The engine and transformer will not need it?

No. Wei San took the measuring cylinder and put it on the workbench, We can use it later if we find a good one. The current engine casing and engine are nothing special.

Now that she has obtained the Phaseless bone, Wei San hopes that the materials of her mecha will be of good quality, and now she will top it with the 3S level materials she exchanged.

If I have the opportunity in the future, I would like to find a suitable engine fluid and try to see what effect it will have if mixed with Purple Liquid. Wei San said as she rubbed the Phaseless bone.

Experiment?

En. Wei San took the time to learn mechas from Yu Qingfei every night. There was still a lot to learn. Now she could only roughly learn how to build the mecha frame, and Ying Chenghe had to assist with the rest.

Jin Ke asked for leave for you and said that you can test the new mecha here. Ying Chenghe came over and said, You dont need to train these days.

I know. Wei San looked at the various materials on the workbench, feeling like she was getting rich from poor, The S-class engine you gave me is still on Sadu star.

Ying Chenghe laughed: You were an A-grade engineer at that time, but you dared to ask for an S-grade engine.

Wei San spread out the drawings: At that time, I just wanted to see the structure and materials of the S-grade mecha. I started to bleed after just touching it.

It made her think that she was a genuine A-grade person.

The engine is also made of S-grade star beasts. If you come into contact with it, it will naturally cause sensory fluctuations in the body.

Now Wei San still has nosebleeds from time to time, but people around her are used to it.

From tonight to the next few days, Ying Chenghe and Wei San basically stayed here, not even wanting to spend time sleeping. The two of them stayed up late, Wei San designed and built the mecha, and Ying Chenghe was by her side, observing in case something unexpected happened.

Liao Runing and Huo Xuanshan came to the door several times but did not dare to go in and disturb them, and finally went to the training ground to train.

It wasn't until the morning before the game that Wei San and Ying Chenghe completed the first mecha build. The two people looked excited, but they had obviously stayed up for several nights in a row and were in a mess. Ying Chenghe had a chicken coop and huge dark circles under his eyes, and Wei San was not only covered in these, there were dried blood stains on her collar and fingers, and her nose was stuffed with paper balls.

Liao Runing, who was waiting at the door, looked inside: Are you guys is this the scene of a murder?

There were blood drops everywhere on the white floor, some of which were stuck around under the soles of shoes.

I'm going to bed. Wei San's eyes were almost closed. She squeezed out of the three people outside and ran directly to the dormitory.

Aren't you going to show us the mecha? Jin Ke shouted from behind.

Wait until I wake up. When Wei San's voice came, she had already disappeared.

Ying Chenghe couldnt bear it either: Im leaving.

How is Wei Sans mecha doing? Huo Xuanshan asked him.

It looks good. Ying Chenghe yawned and also ran away.

These two did just enough to whet our appetite. Liao Runing clicked his tongue, What do you mean it looks pretty good, they havent tried it yet?

This was rightly said by Liao Runing.

When the two of them woke up in the afternoon, they were still surrounded by Jin Ke and the others.

You havent adjusted the mecha data? Jin Ke was surprised, There is still one night left, we are going to compete.

To be precise, our mecha data has not been completely tested. Ying Chenghe said, Its too late. It will take at least two days to complete the test of a new mecha and make adjustments.

Previously at Sadu Star, it took Ying Chenghe more than two days to transform and adjust Zhu Tao.

Now lets go directly to practice and adjust again. Wei San was a little proud, I did not cultivate my dual skills as a soldier and engineer in vain.

Blowing. Liao Runing squatted beside her and threw out one word.

Let you experience it. Wei San took the lead and walked to the training ground.

The other four people followed her and went out together.
