

Smash All 351

Chapter 351

Ordinary mecha masters are not proficient in controlling combat mechas. They do not know the subtle differences in how to control mechas. They can only rely on the data of the mechas when they are running.

And Wei San is not only a mecha master, she is also a super 3S mecha soldier. She builds and designs the mecha by herself, and then controls the mecha with her own hands, which is the fastest way to understand what problems the mecha has.

The five people came to the training ground.

Your mecha won't be the same as the one from the UNDERground factory, right? Liao Runing looked at Wei San suspiciously.

What happened to that mecha? Ying Chenghe had never seen it before.

Liao Runing raised his hand to cover his mouth, but his voice was loud: Ugly!

That was a helpless move without money. Wei San released her mecha, Now let me show you what a high-end mecha is.

A black and white mecha of about ten meters appeared in the middle of the training ground. It had the unique slender figure of a medium-sized mecha. The surface of the mecha shell was shiny and new. There was white protective armor on the outside of the mecha cabin. There was something on the sides of the legs and knees. They could even smell a trace of unknown aroma, but if they smelled it carefully, they couldn't smell it anymore.

It looks quite impressive. Liao Runing got close and touched the mecha, What's its name?

Wei San: Impermanence.

Jin Ke asked her: What's the meaning?

Wei San raised her eyebrows: Nothing. Simply because the mecha was black and white, she just chose Impermanence for convenience.

Huo Xuanshan walked over and looked up at the mecha's knees: Dagger?

Wei San nodded: Detachable dagger whip.

Her moves were messy, and she basically didn't choose which weapons to use, so after discussing with Ying Chenghe, she decided to add weapons next to her knees.

What is a dagger whip? Jin Ke noticed the word Wei San said.

Wei San raised his eyebrows: Youll know after one fight.

She jumped directly onto the mecha and asked Huo Xuanshan or Liao Runing who would come first.

Me! Liao Runing quickly stepped forward, but Huo Xuanshan had already released the mecha, went in to control the mecha and stood in front of Wei San.

Liao Runing: Why is it that Huo Xuanshan gets the lead every time!

Wei San and Huo Xuanshan were already fighting over there. Huo Xuanshans home court was in the air, so he attacked Wei San directly in mid-air.

Wei San did not take out the knife. Instead, while dodging, she bent down and took out the daggers on both knees.

Jin Ke and Liao Runing next to her were puzzled. Unless fighting in close quarters, her dagger was useless.

Apparently Huo Xuanshan above didnt understand either. He raised his hand to draw his bow and shot several arrows at Wei San without mercy.

Wei San in the mecha cabin curled her lips, controlled the mecha to turn to the right, held the dagger in both hands and swung it, the short blade instantly stretched into a very thin whip.

Wei San held two thin whips and swung them sideways at Huo Xuanshan in mid-air. He didnt notice that the dagger could be lengthened into a whip. All the ice arrows were knocked down by her whip, and the bow was almost touched by Wei Sans whip even.

Liao Runing looked at it with envy: Why does Wei San always have these transformable weapons?

If you use other weapons as well, I can help you make them. Ying Chenghe turned around and said.

Forget it, Ill use a knife. Liao Runing has been using a knife since he could walk. Other weapons are completely inferior to a knife.

Its not a rare material. The dagger whip is made of diluted gold, plus some other materials. It has very good malleability. Ying Chenghe slowly explained while looking at the two people who were still fighting.

Wei San came up with the idea, but she didnt learn many things, such as what proportion of diluted gold should be used. The proportions of many things can only be known through constant experimentation and exploration.

This is done by Ying Chenghe. He provides the materials in good proportions to Wei San, who then takes over.

Except at the beginning, Huo Xuanshan was shocked by the dagger whip, but he quickly adapted to this weapon, and Wei San and he maintained a certain balance.

Get here first. Wei San was the first to shout, and then came down and stood beside Ying Chenghe to discuss the difference he had just experienced.

The mecha began to adjust little by little according to Wei Sans feelings.

Chapter 352

Then Liao Runing accompanied Wei San in a fight, and the two 3S soldiers took turns. After Wei San played one game, she began to discuss how to change it with Ying Chenghe.

Finally, after one oclock in the morning, the few people stopped.

Wei San squatted in the corner, her forehead covered with sweat.

Jin Ke, who was leaning on the side, handed her a piece of napkin.

She took it and wiped it directly on her forehead.

Jin Ke: I was letting you wipe your nose.

Wei San was stunned for a moment, then stretched out her hand to wipe her nose, and saw blood on her hand again.

Huo Xuanshan squatted over and gave her another piece of napkin: The doctor doesn't have a definite plan yet?

Now that Wei San is using the 3S mecha, her nose will bleed as long as it lasts for a long time. They are now used to carrying napkin with them.

Not yet. Wei San wiped her nose.

Just as she was talking, the doctor's message came through.

Im calling you so late, I Before the doctor could finish his words, he saw Wei San's head sticking out from the left, right and above the light curtain. There was even another head slowly stretching out from the upper left side, five heads. They all stared at him.

Why don't you set up privacy on your light brain? And these main players don't know how to avoid suspicion? The relationship is too close.

Wei San said slowly: My light brain doesn't have this function.

The doctor was silent for a while and said: Forget it, let's get down to business. There is a competition tomorrow. Come over here and I'll borrow a micro-recording instrument from my senior sister.

Okay, I'll go now.

The doctor thought of something and immediately added: There is no time limit. Don't climb up the stairs and pick out my window.

The call was hung up, and Liao Runing had no idea: Why are you still opening the doctor's window?

He asked me to rush over in two minutes. The training ground is so far away, and it took almost two minutes to get there. I couldn't make it to the elevator in time, so I had to open the window. Wei San stood up, I'm going there.

I'll accompany you there, Huo Xuanshan said, We'll come back together later.

I'll go too. Liao Runing joined in the fun.

Jin Ke and Ying Chenghe stood silently behind Wei San.

Finally, Wei San dragged four tails, and the five of them walked to the medical building together.

Do you think its the elevator thats faster or us who climb faster? Liao Runing said eagerly as soon as he reached the door of the medical building.

Several people looked at Liao Runings eyes and knew what he was thinking. After a second of silence, the three soldiers rushed towards the back door. Ying Chenghe and Jin Ke ran into the building and took the elevator.

Here we come. Hearing the knock on the door, Jing Ti immediately got up and opened the door, Wei Sanwhy is it you guys? Where is she?

Jin Ke raised his chin and pointed behind the doctor: There.

The doctor suddenly turned around and found three people holding on outside the window: After seeing too much, he had nightmares in the middle of the night.

The elevator is fast. Ying Chenghe said to Liao Runing who came in.

Wei San explained: We ran half a circle around the building. I took a shortcut that day and the elevator was far away from me.

You guys sure have nothing to do, sit down. Jing Ti asked Wei San to roll up her sleeves.

The other four people stared at the doctor without blinking, standing beside her like door gods.

Doctor

Wei San sat in front of the table, exposing her arms. He wiped the inside of her wrist with alcohol, opened the box next to him, and used tweezers to pick out something several times smaller than a fingernail.

This instrument is placed in your subcutaneous tissue. It can monitor and record the data of your body changes at all times. All data will be transmitted to me when the time comes. Jing Ti motioned to Jin Ke next to him to hold the tweezers. He took out a scalpel and gently cut a small piece of skin on the inside of Wei Sans wrist, then took the tweezers and put the small thing into her subcutaneous tissue. Finally put on the healing agent, Okay.

Why do you need to record Wei Sans body change data now? Jin Ke asked the doctor, You didnt ask for it before.

The doctor turned around and explained: We didnt know much about Wei Sans condition before. Now the examination has found that her physical condition has remained in a fixed state. There is no fluctuation at all before and after training. I want to know how her body will react when she faces a star beast or is in danger.

Jin Ke: Is your senior sister Ying Xingjues doctor?

Jing Ti nodded: Yes, she came here recently, you should know.

Jin Ke: Ying Xingjue is also using this instrument to monitor his physical condition?

The doctor paused and said: Yes.

Chapter 353

After the micro recording equipment was installed, Wei San and the four others turned around and prepared to go back to the dormitory. Tomorrow they will enter the extremely cold arena, and they are the only ones still wandering outside.

I wish you all the best, the doctor said standing at the door.

It will definitely go well. Liao Runing waved, We still have to win a championship.

If we win the championship at Pingtong Academys home court this time, Zongzheng Yue will be pissed to death. Wei San recalled the look in her opponents eyes last time, and her determination to win the championship strengthened.

Wei San likes to see people hate her but cant do anything about it.

The five of them went back to their dormitory and had a good nights sleep. They got up the next day and gathered together with other military academies to rush to the extremely cold stadium.

Is it getting colder? Liao Runing stood in the aircraft, shaking his arms.

Not only him, quite a few members of the school team also started to tremble.

Wei San put her hand against the window and looked outside: The white fog is getting bigger and bigger.

The extremely cold arena is several times colder than other places on Fan Han Star. It used to be a glacier, but we should be careful because in the past there was a lot of water in the arena that was frozen and fragile, and the mecha would crack if it stood on it. On the way, Jin Ke once again, carefully explained the precautions for playing in extreme cold to the members of the main team and the school team.

The closer they get to the extremely cold arena, the lower the temperature becomes. Everyone in the aircraft has already felt the biting cold.

Were here. The large aircraft finally landed slowly, and the Damocles cadets came out one after another. Liao Runing hid on the side motionless.

Wei San stretched out his hand and pulled him: Go down.

Liao Runings lips turned white: I dont want to go down.

Just as the last member of the school team went down, Huo Xuanshan turned back, walked directly behind Liao Runing, and kicked him out.

Liao Runing suddenly faced the cold world: !

At this moment, he felt like his breathing was frozen.

Why do you have so many things to do? Jin Ke glanced at him, Also afraid of snakes, also afraid of the cold

Liao Runing hugged himself with both hands and trembled: This world is too scary, and Im still a child.

Child, lets go. Wei San stepped forward and said.

The five major military academies all arrived at the entrance, and the teachers stood there asking them to send someone over to draw combat preparation bags.

Its your turn this time. Jin Ke turned to Liao Runing, who was at the back.

Liao Runing cowered and moved over, in sharp contrast to the people in other military academies.

People from other military academies still came to draw combat preparation bags regularly, and the surrounding media took photos of the five of them. It must be said that Damocles Military Academy has now become the favorite military academy of the media.

Because they have to make mistakes in every game, there are topics for discussion. Like today's scene, the comparison between the main team members of Damocles Military Academy and the main members of other military academies can be used to make an article and talk about it.

Liao Runing couldn't bear the cold, and there was a queue in front of him, so he simply shook on the spot.

You can see him twisting his butt in circles throughout the live broadcast.

Chapter 354

Xiang Minghua habitually stretched out his hand to cover his face: These people really don't want their image at all.

Now he has thought about it, it is not Wei Sans problem alone. These people who chose Damocles in the first place were not rule-abiding people.

For example, Huo Xuanshan inherited the Huo family's silence and restraint, but in fact every choice he made represented rebellion. The Huo family was good at using heavy mechas, so he chose light mechas. No one from the Huo family has enrolled in Damocles Military Academy for many years, so he will enroll here.

When the teachers took him with him, they still maintained the etiquette and manners of the children of the aristocratic family, but now that Wei San has initiated, he has completely changed.

Another example is Ying Chenghe, the first member of the Ying family who chose to attend Damocles Military Academy.

Xiang Minghua now knows that it was not Wei San who led them to evil, but these five people had the same bad taste!

Finally it was Liao Runings turn to draw the combat preparation pack. He had no choice, so he went directly to get the last one.

He took it, walked back to the main team, opened the list of the combat preparation package, and looked up: This

Its finally our Damocles turn to stand up! Liao Runing said proudly, Young masters luck is the best!

Damocles Military Academy had the most adequate combat readiness package this time. Everyone even had a complete set of warm clothes that could be worn outside.

Ying Chenghe took out a set of warm clothes and looked at them: This is the star animal skin here. After processing, it can resist the obvious cold.

Not too thick, just a thin layer, but enough to give them a little advantage over others.

Let me try it first. Liao Runing took the thermal clothing from Ying Chenghes hand and performed a pullover on the spot.

After Liao Runing put on her clothes, he felt it carefully: ..why is it still cold?!

Protection from cold and wind, no temperature. Ying Chenghe shook his head, It is enough to keep the human body from losing temperature.

On the other hand, in other military academies, they did not have warm clothes, and their bodies were actually shaking, but they forced themselves to stay upright.

After getting ready, the first military academy to enter the extremely cold arena was the Imperial Military Academy, with Damocles Military Academy once again ranked fifth.

Ying Xingjue stood at the front of the team. This time there was no escort around him. They had entered the arena in advance and would follow the Imperial Military Academy.

The main members of other military academies all focused on him, and everyone wanted to pull him down. As long as there was a problem with Ying Xingjue, Ji Chuyu alone could not surpass other military academies.

But Ying Xingjue ignored all the sight around, as if everything around him had nothing to do with him, and walked through the entrance of the extremely cold arena indifferently.

The rest of the Imperial Military Academy quietly and quickly followed him into the extremely cold arena.

The people at the Damocles Military Academy, who were last, watched all the military academies enter one after another, and had to wait for the time to expire before they could set off.

Pingtong Academy was the fourth to start. Zongzheng Yue turned his head and looked at Wei San three times. He wanted to let the other party know that Pingtong Academy was the king in the extremely cold arena.

However, when Wei San saw Zongzheng Yue for the first time, she suddenly closed her eyes and stretched out her hand to block it.

What are you doing? Liao Runing saw her inexplicable movements.

Zongzheng Yue is definitely trying to provoke me. Wei San covered her eyes with her hands and said to Liao Runing sideways, I can't see anything.

It's not that she's afraid of provocation, it's just that she wants to piss off Zongzheng Yue this person.

Jin Ke and the others next to him raised their hands to cover their eyes when they heard this, while talking as if nothing had happened and doing the most cowardly actions, which was extremely annoying.

Zongzheng Yues jaw tightened. He couldnt ask these people to take their hands off, so he could only turn around with anger and lead the team into the extremely cold track.

Is the person gone? Wei San still covered her eyes with her hands.

Lets go. Huo Xuanshan took his hand off and saw only the last member of the Pingtong Academy team entering.

The people from Damocles Military Academy had to wait here for half an hour before they could enter.

Chapter 355

During the live broadcast, the teachers at Damocles Military Academy looked at the students in the camera and prayed in their hearts that all of them could come back safely this time.

Lets go. Jin Ke led the team in front, Wei San and Huo Xuanshan were on both sides, Ying Chenghe was in the middle, and Liao Runing fell behind.

As soon as he approached the entrance, Liao Runing began to shiver: The entrance is so cold, what must it be like inside?

On the live broadcast the teachers looked at his unsatisfactory look and were a little helpless. The locals of Sadu Star were too afraid of the cold.

The teachers watched the students slowly enter the extremely cold arena. The camera showed that all members of the Damocles Military Academy had already entered.

Liao Runing, who was still shivering at the door, was still standing behind Ying Chenghe, but he no longer showed any signs of flinching, and his hands, which were red from the cold, were directly exposed.

Its like hes become a different person.

Without exception, everyone else who was still a little loose returned to their normal training appearance, seemingly unable to feel the sudden drop in temperature in the extremely cold arena.

Be careful where you step, the ice here is not stable. Jin Ke reminded, Dont fall, if

Before he could finish his words, a team at the end of the school team suddenly stepped on the ice and all fell down.

The temperature under the ice is too low, and a person will lose their temperature immediately if they fall in. Finally, they will sink directly to the bottom, and they will be frozen inside within a short time.

Fortunately, they wore warm clothes, and although they felt biting cold, they could still move.

The nearby team tried to rescue them, but Jin Ke stopped them: Everyone, spread out to the right.

The light mecha soldier under the ice was the first to come out. She opened the mecha the moment she fell into the ice, endured the biting cold water and entered the mecha, controlled it to take off, and at the same time pulled up the teams commander and mecha engineer.

careful!

Jin Kes voice suddenly appeared in the mind of this light mecha soldier. She had no time to react and used her instinct to control the mecha to pull the commander and mecha engineer into her arms.

A giant shark suddenly jumped out from under the ice, broke through the surrounding area, jumped up and bit the light mecha soldier.

Huo Xuanshan rushed over first, shooting the ice bow at the giant shark in the air, but the ice bow, which usually frostbites the target and slows it down, failed on the giant shark.

The light mecha soldier protected the commander and mecha engineer. They had no way to fight back and could only give up on themselves.

Her wings and the mecha cabin were bitten to pieces.

The giant shark hit the target and quickly sank into the water.

Wei San was the second to rush. She stepped on the ice continuously, rushed to the ice breaking point, and sank directly.

She stepped on the giant shark, ignoring the surrounding icy water, and slashed straight down with her broadsword.

The knife rose and fell, and the giant sharks head was chopped off.

She stepped hard on the giant sharks body, and then controlled the mecha to get near the sharks head.

Damocles Military Academys school team was silent. A nearby team quickly helped up the rescued commander and mecha engineer. There was only half a light mecha on the ice. Under the hole in the ice, the rich blood red color could not be distinguished from the giant shark or human.

After a long minute, Impermanence came out of the ice, followed by two soldiers. They successfully entered the mecha.

Impermanence came out holding half of the light mecha, and tore open the broken mecha cabin with one hand. The left side of the soldiers body had been pierced by shark teeth, and the blood was flowing. Coupled with the stimulation of the ice water underneath, she wanted to speak, but she just vomited blood in vain, with her body twitching.

The soldier looked up at Impermanence and struggled to give a thumbs up to Wei San inside.

Jin Ke rushed over, touched the side of the mecha cabin and pressed the exit button.

[A soldier from the Damocles school team was eliminated.

The rescuers arrived immediately. This was still near the entrance. They arrived very quickly and led the soldiers into the treatment cabin.

Damocles Military Academy suddenly felt a heavy feeling, and Wei San came out of the mecha: She will definitely be fine.

Liao Runing The next round will continue, wait until we get the championship to show her!

My negligence. Jin Ke did not expect that something would happen just after he came in. Everyone should be alert. There are star beasts on the ice, and there are also dangers under the ice.

Chapter 356

Just after entering, Damocles lost a soldier from the school team in front of the main team, and Damocles fell into an unprecedented heaviness.

The teachers outside the stadium suddenly became nervous. What they were worried about was not the star beasts lurking everywhere in the stadium, but the psychological condition of these students.

From the first race to the Guyu track, they may not have won the championship, but they definitely benefited a lot. Their confidence has never been hit, and they even made Pingtong Academy suffer.

And now

In the arena, Damocles Military Academy continued to walk forward. This time, they walked continuously for two hours and did not encounter thin ice again.

There is a star beast not far behind the iceberg ahead. Jin Ke stopped and said, under the ice.

They need to fight in the water.

Liao Runing stood up: Ill take them down.

Jin Ke stared at him for a while: There are two double-S star beasts and sixteen A-level star beasts under the ice. They are within a hundred meters of each other. You can lead fifty single soldiers down.

Liao Runing turned around: Who are the locals from Sadu Star? Come with me.

Fifty individual soldiers from the school team quickly walked out. After the 51st soldier was stopped, the others stopped coming out.

Liao Runing and fifty individual soldiers from the school team entered the mecha and rushed forward. They rushed to the location mentioned by Jin Ke, broke the ice together, and sank underwater.

Jin Ke and others stood there waiting. The wind blowing in the extremely cold stadium brought white particles, which were the water in the air turning into ice. It hurt their faces, but no one moved.

Everyone looked past the protruding iceberg in front, waiting for Liao Runing and the fifty school team soldiers to appear behind them.

Chapter 357

They stood here and did not join the battle. Except for Jin Ke, who was half kneeling on the ground and placed one hand on the ice, using his senses to build a barrier for those fighting underwater, the others could not see the situation below Liao Runing and others could only smell it. From time to time there was a faint smell of blood in the cold air.

The only good news they got was that there was no news, no broadcast sound.

Thirty minutes later, Liao Runing slowly appeared on the iceberg with fifty soldiers from the school team.

[Damocles Military Academy killed two double S star beasts and sixteen A-level star beasts. repeat

Many of them had ice skates hanging on their bodies. It was obvious that they were soaked in the water and frozen on the shore. However, no one, be it Liao Runing or the fifty school team soldiers behind them shivered, and they seemed to not feel the cold at all.

The teachers at the live broadcast breathed a sigh of relief. These students seemed to take what just happened as motivation.

Keep going. Jin Ke stood up and said.

As soon as he finished speaking, beams of light and broadcast sounds rose from several directions in the distance.

During the next few hours of Damocles Military Academy teams journey, the announcement of Pingtong Academy came almost every half hour, even more than the Imperial Military Academy.

Pingtong Academy fully utilized its home field advantage this time.

Lets go around this road. Jin Ke pointed at the map.

The first half of the route he mentioned was all ice. After crossing, they merged forward with Pingtong Academy in this direction.

You mean we have to get there before them? Huo Xuanshan asked him.

Jin Ke nodded: Since Pingtong Academy is familiar with this environment, it must be better to follow their path.

Get ahead of them and kill the surrounding star beasts to get resources.

But we will be on the ice for the first half of the journey. Ying Chenghe said, We will face attacks from two sides, and the temperature on the ice will be even lower.

I know. Jin Ke held the map tightly, You can watch the mecha situation.

Obviously Jin Kes route was not this one at first. Now he suddenly changed. It is difficult to say that it was not because of what happened at the previous entrance.

However, no one in the ranks of the Damocles Military Academy school team objected.

Chapter 358

Live broadcast.

I dont know if the character of your schools chief commander is good or bad. South Percys leading teacher said to Xiang Minghua, Although the anger of the team members being eliminated is now used as strength, the danger level has risen sharply now, and the victory or defeat rate is even more uncertain.

He is the main commander, he makes the decision. Xiang Minghua leaned back in his chair, As long as other people on the team dont object.

The leading teacher in South Percy stopped talking. What can he say? The teachers at the Damocles Military Academy dont care about victory or defeat, and its useless no matter how much they say.

Damocles Military Academy team in the arena began to only walk on the ice. This route was faster, and of course there were more star beasts hiding under the ice to attack.

In addition, they dont know which piece of ice will suddenly break. Since the start, several teams have suddenly fallen in, but no one has been eliminated because of this. Even if there are star beasts under the ice when they fall, they can cooperate as quickly as possible to protect the commander and the mecha engineers. The long training of the soldiers has finally come in handy.

Wei San. Huo Xuanshan reminded her in mid-air.

I know.

At this moment, the two of them were at the front of the team, meeting the large army for five kilometers.

They are responsible for cleaning up the high-level star beasts in front.

Huo Xuanshan was flying in the air, looking through the white mist to observe what was going on under the ice. Some of the ice looked thinner because there were star beasts hiding underneath.

After Wei San heard his reminder, she released her mecha directly, held the big knife with one hand, inserted it directly under the ice, and turned the knife handle slightly.

The ice surface, with the blade in the center of the circle, gradually began to crack, making a frightening crackling sound.

In the next second, a giant fish came out, full of sharp teeth, and bit Wei San.

She rolled away and put her hands on the ground.

The giant fish saw the mecha's clumsy movements, its eyes flashed with excitement, and it felt like it could bite the mecha right away.

Huo Xuanshan suddenly swooped down in mid-air, grabbed the giant fish with both hands, and forcibly lifted half of its body out of the water.

Wei San quickly stepped forward, pulled out her big knife, and slashed directly at the giant fish's belly exposed on the ice.

The broadsword struck half sideways on the ice, and because it was so fast, it even drew ice flowers.

Everything happened so fast, the audience in front of the live camera could only see roughly: Wei San inserted a knife on the ice, the giant fish appeared and bit her, Huo Xuanshan suddenly dived and grabbed the giant fish in mid-air, Wei San drew the knife with one hand sweeping it across the ice, the giant fish broke into two sections. Then the ice cracked and the mecha was unable to stand. Huo Xuanshan threw away half of the giant fish's body with one hand and grabbed Wei San's mecha to prevent her from sinking into the water. Wei San held the knife in her hand and plunged it into the emerging water.

In mid-air, Huo Xuanshan grabbed Wei San with both hands, and Wei San's knife was inserted into the remaining half of the fish. The two of them left the broken ice with half of the fish, and landed at the place where he threw the upper body of the giant fish just now.

From start to finish, not even a minute.

A giant fish, a twin-S high-level star beast, died in their hands.

Isn't this the first time that Wei San has used this new mecha? Xi Haotian looked at the two people in the camera and was really confused. In his opinion, Wei San had put on a new mecha that was said to be made of Purple Liquid Mushrooms. The mecha can't get much benefit. After all, this is a brand new mecha, and other people's mechas have been used for at least ten years.

Yu Tianhe smiled: She is a person from an unknown star. How long has she been using Zhu Sui? One semester? She is not worse than anyone else.

In this way, I admit that Wei San is almost on the same level as Ji Chuyu and Zongzheng Yue. Xi Haotian stared at Wei San and Huo Xuanshan, They work well together. This saves water and energy consumption.

Xi Haotian had never been optimistic about Wei San before. Her moves were too messy, disorganized, and lacked fighting awareness, but now, it seemed that was not the case.

Chapter 359

When Damocles Military Academy chose a route that was entirely on ice for the first half of the journey, the Imperial Military Academy also chose an ice valley that was difficult and short in distance. It was a trace left by the former glacier. Even now, the surface of the huge cracked mountain is still covered with thick ice. A thick layer of ice.

According to the notice from the Fan Han Star monitoring point, the cold wave will arrive early, so we have shortened the competition time to seven days this time. All military academies must come out on the seventh day, otherwise they will face the cold wave inside. Yu Tianhe explained to the audience on the live broadcast, I believe many people here should know the power of the cold wave better than I do. The extremely cold track is the most central area where the cold wave occurs. Once they encounter it, there is basically no possibility for them to come out.

The audience at the live broadcast was talking a lot. Although the residents of Fan Han Star had been notified of the coming cold wave and had temporarily cut off communication with the surrounding star systems, they had always just stocked up on supplies and rested at home before the cold wave came, treating it as a holiday. Now that Yu Tianhe said this, they were shocked to realize that the cold wave was so terrifying that not even these military students could escape.

Ying Yuerong added: The Imperial Military Academy chose this path because they did not want to give up the opportunity to fight for resources. In contrast, Samuel Military Academy and South Percy Military Academy chose to play it safe this time. They took the safest but most remote route. The two military academies went into battle lightly, often switching between mechas and rushing on their way. According to the data detected by the organizer half a month ago, there were relatively few star beasts in these two paths. They basically gave up the resources for this competition and only pursued platooning.

Yu Tianhe continued: Pingtong Academy is obviously very familiar with the environment here. The path they took is in the middle range, but has the most star beasts. I don't know who among the five military academies can reach the end first.

From the routes chosen by the five military academies, they can see their positioning. The Imperial Military Academy needs both resources and speed, and has absolute confidence in its own strength.

South Percy and Samuel in the second tier directly gave up their resources. As for Damocles Military Academy, which has been in the second tier in recent years, often even finishing in last place, its behavior in several competitions this year has been unpredictable. This time the extremely cold track is a direct challenge to the difficult ice route.

On the first day, this group of people acted like destructive maniacs, not sparing any star beasts wherever they went. They would break through the ice themselves and go into the water to search for star beasts.

The audience looked back and forth between several military schools, dazzled, and the radio broadcasts came one after another.

[Imperial Military Academy, Damocles Military Academy, and Pingtong Academy are crazy, they did this on the first day they entered.

[The closer the cold wave is, the more the star beasts will hide. If you want to get resources, killing star beasts now is the right solution. The three military academies will compete for the championship this time, which will inevitably be fierce.

[Damocles Military Academy is also interesting. From the four main 3S members at the beginning, all members are 3S. Now the mecha of Wei San has been changed again. It is said that it can achieve super 3S effects and can compete with the two military academies for first place. one.

[It can only be said that the old military academies have a solid foundation and can get up if they find an opportunity.

[Come on, Damocles Military Academy is a veteran, but where does it come from? When you have time, go to the major military academies. The schools are in tatters. Several areas of the playground were damaged by student mechas, and they are reluctant to spend money to repair them.

[There are many local students on Sadu Star who have enrolled in other military academies, and all of them have left.

[Its okay, Im a local teacher on Sadu Star. This month, our school has pre-filled the application form, and the students basically chose Damocles Military Academy.

[Senior Sister Wei San is the most rogue! I will definitely go to Damocles Military Academy this year! ! !

[Are you still a preparatory student? Go to training quickly, what are you doing here watching the live broadcast?

Rest here tonight. Jin Ke came down from the iceberg on the left, There are no star beasts nearby for the time being.

Damocles team was currently parked in a place surrounded by icebergs. The ice under their feet had completely frozen. If the knife was inserted and then pulled out, it would not affect the side at all.

Each team took out their tents from their combat readiness bags and set up camp on the spot.

There is a thick layer of almost liquid cold white mist on the ice here. Even if the military cadets wear thick long military boots, they can still feel the biting cold. Not to mention the tents where they sleep, they are basically sleeping on the ice.

Why cant the organizer send out tents with better quality? Wei San jumped out of the tent, and everyone was dumbfounded. She thought the tent could insulate her from the cold, but as soon as she laid down, the cold air penetrated directly into the seams of her bones.

Liao Runing squatted on half of the iceberg next to her and said to Wei San below: They call it a training exercise for us.

Huo Xuanshan slowly added: Nowadays, when people in the military region travel, they will carry capsule cabins with them to withstand various harsh environments from the outside world, and to a certain extent, prevent attacks by star beasts.

It was freezing outside while standing outside. Although the tent blocked the cold wind outside, the constant coldness rising from the ice also made people unable to sleep. Jin Ke had no way to solve this problem and could only leave it up to everyone.

Wei San jumped a few times and squatted on half of the iceberg with Liao Runing, just in the depression of the iceberg, blocking most of the cold air.

We are all so cold, and its even harder for them. Liao Runing looked at the school team members below. There was a huge difference in physique between S-level and A-level.

We'll go out after a few days. Wei San rubbed her hands and breathed a sigh of relief, Find more star beasts tomorrow so it won't be so cold.

Can Jin Ke survive? He is worse than A-level. Liao Runing is afraid of the cold mostly because of psychological problems. As Jin Ke is a 3S commander, the cold wave directly affects his perception, causing immediate and indirect damage to the body.

Jin Ke, whose bottom lip has turned purple, was still observing everyone's positions to find the most suitable defense point.

Before coming in, all five of their commanders took supplements to alleviate the impact of the cold wave to a certain extent. Wei San looked down at the ice cubes at her feet. This was a pure iceberg with no substance except ice.

She looked around and saw several not-so-high icebergs rising from the ground, blocking most of the cold air.

By the time everyone settled down, it was completely dark. Wei San and Liao Runing did not come down from the iceberg, so they squatted here to rest.

The extremely cold track gradually became quiet. The audience guarding the live broadcast rooms of various military academies were ready to take a rest. Many viewers were already dozing off at the live broadcast site. The commentators who took turns guarding did not speak anymore, but just looked at the various military academies lenses.

Wei San didnt sleep, so she moved to another iceberg and continued to squat and watch, while recalling what Yu Qingfei taught her. When she entered this state, her eyes became a little distracted.

Jie Yuman had a rest in the afternoon and came back to pick up Xiang Minghuas shift in the middle of the night. He looked at Wei San, whose eyes were lifeless on the iceberg: Is she asleep or not?

Xiang Minghua shook his head: Huo Xuanshan is still there, so she should be fine.

Just as the two were about to change shifts, something happened at the Imperial Military Academy and they were attacked by a star beast.

Xiang Minghua paused and turned back to look at the live footage of the Imperial Military Academy.

A small wave of star beasts. Jie Yumans eyes fell on Ying Xingjue in the middle of the Imperial Military Academy. These star beasts were too close. Didnt he notice it in advance?

Apparently all the teachers at the Imperial Military Academy had also woken up. They frowned as they watched the military students in the arena enter the mechas and fight the star beasts.

He was seriously affected by the cold wave? Jie Yuman frowned, otherwise with Ying Xingjue's ability, he would never have allowed this small wave of star beasts to approach before reminding them.

Probably. Xiang Minghua stood in front of the table, He seems to be in worse condition than the other main commanders.

Although the leading teacher of the Imperial Military Academy did not speak a word, the look on his face showed his displeasure. This was the first time that they were so passive.

After all, he is still a student, and they will always make mistakes. The leading teacher of Pingtong Academy suddenly comforted the teachers of the Imperial Military Academy next to him.

Student? Everyone in the arena could use this excuse, but Ying Xingjue could not. Ever since he participated in the Battle of Magic Night, he was no longer a simple student.

The school team was the first to catch up and resist the star beasts, Huo Jian dealt with the high-level star beasts, and Situ Jia and Ji Chuyu protected Ying Xingjue and Gong Yijue.

Ying Xingjue looked at the star beast opposite him indifferently and walked towards it step by step.

Every time he took a step, one of the star beasts suddenly fell down. He walked to the edge of the battle, stopped, raised his hand and pinched in the air. All the star beasts fell down instantly as if they were attacked by invisible things.

Many members of the school team who had just entered the mecha and were preparing to fight looked at the star beast lying in front of them in shock and lost their voices.

Rest where you are. Ying Xingjue lowered his hands and turned around, as if he just did something ordinary.

Huo Jian put away his sword, came out of the mecha, and continued to stand next to Ying Xingjue.

There was silence on the live broadcast.
