

Smash All 361

Chapter 361

The teachers of the Imperial Military Academy who were feeling very angry just now breathed a sigh of relief. The leading teacher turned to the teacher from Pingtong Academy who had spoken just now and said: Students, it is inevitable that they are a little arrogant.

Teachers of Pingtong Academy:

I really don't know what the scene of the Battle of Magic Night was like. Xiang Minghua looked at Ying Xingjue on the live broadcast camera with some emotion.

The Fifth Military Region was a force on the Imperial Capital side, and Damocles Military Academy was the former boss. The two sides were in subtle opposition, so naturally they could not obtain such important battle records.

Others are also growing up. Jie Yuman sat down, People like Ying Xingjue are just an exception. It takes many years for someone to appear.

Xiang Minghua suddenly smiled in a low voice: Wei San is also an example.

People from other military academies in the arena were awakened by the sound of the broadcast. They looked at the beam of light rising from the Imperial Military Academy with various thoughts.

They dont need to sleep? Wei San jumped down from the iceberg and walked to Jin Ke who was getting up, How about we go find the star beast too.

Jin Ke glanced at her: Have a good rest at night.

Now the Imperial Military Academy has killed more star beasts than Pingtong Academy. Wei San raised her head and looked at the location of the beam, We are still a little behind.

Continue to work hard tomorrow, go and rest now, dont hold back. Jin Ke said.

Theres no vigil, I just cant sleep. Wei San exhaled a white breath, Its getting colder and colder.

If we are fast, we can go out tomorrow night and be in front of Pingtong Academy. Jin Ke didnt fall asleep much. When he closed his eyes, he could see the route on the map.

Over at Pingtong academy.

All members were in better condition than other cadets and could just about sleep in the tent.

After hearing the broadcast at this time, several members of the main team came out of the tent and looked in the direction of the beam.

The Imperial Military Academy is very fast. Lu Shibai said without any surprise.

What does Damocles mean? Zong Zhengyue asked.

Today the direction of the Damocles beam is entirely within the ice.

They want to take a road ahead of us. Lu Shibai guessed Jin Kes plan, They are brave enough.

Zongzheng Yue turned his head and glanced at the school team members: Speed

up tomorrow, the weather is getting colder.

Even people in Pingtong Academy started to feel uncomfortable.

Chapter 362

Early the next morning, Damocles Military Academy team got up and continued on their way.

Why did the cold wave come earlier when it was our turn to compete! Liao Runing raised his head and complained. He felt as if his breath could freeze instantly.

The others didn't show it on their faces, but they agreed with his words in their hearts. It was too cold, and they were still wearing warm clothes, which was completely useless.

The team hurried on quickly, but they didn't encounter any star beasts all morning. There were no star beasts attacking under the ice. Even the icebergs that could block the cold wind disappeared, leaving only the endless ice field.

It feels like there are no more star beasts in this place. Liao Runing talked a lot and couldn't help but say after walking for so long, Is it too cold? They are all hiding.

Jin Ke looked around at the team members: Regardless of whether there are star beasts or not, we will continue on our way and get out of the ice field as soon as possible. If this continues, they will not be able to stay there for even seven days.

The temperature in the stadium is too low and the equipment is too little. If there is a capsule cabin, they can still support it for a while, but now it is completely impossible.

The cold wave certainly lived up to its reputation.

At the same time, the two military academies that chose the safe route, South Percy and Samuel Military Academy, also felt that the temperature was getting colder and colder.

There are not as many star beasts killed as there are hills and tracks. Shaw Elis expression turned ugly, How many did the three military academies kill?

The temperature is getting lower and lower, and the maneuverability of the mechas is also declining. Instead of taking risks, it is better for us to win the ranking safely. Nan Feizhu thought for a long time, and finally made a bold decision, The status of full mechas should be applied, lets rush to the finish line.

All mechas are in full mecha status? Jill Wood hesitated, It will consume a lot of energy. Our main team has already consumed a lot of energy at Guyu competition.

Nan Feizhu glanced at her and said: At the same time, thanks to Damocles Military Academy, we got a lot of energy in the last arena, which is enough to support the state of all mechas. The situation in the subsequent arenas is currently unknown. Lets get it first. Lets talk about the next ranking match.

The situation this year is complicated. If they plan for the next game, they might as well strive for every game now.

Lets go. Xi Wutong entered the mecha first.

The five military academies have the same goal but different directions and routes. From the floor plan of the live broadcast, they can see that two military academies have turned on the mecha status and rushed to the finish line.

Is the fog getting bigger and bigger? Jie Yuman frowned while looking at the live broadcast of Damocles Military Academy.

Xiang Minghua looked at it carefully for a while before confirming: Its too big, maybe because the cold wave is coming.

Jie Yumans eyelids twitched a few times. For some reason, she looked at the white mist and became increasingly impatient: They have to leave the ice field quickly, the cold wave is getting closer and closer

Pa!

A lens at the Damocles Military Academy suddenly cracked, and the screen instantly went black. This seemed to be a signal. All the cameras where Damocles was located began to crack one by one, until the last screen went completely black.

The whole place was quiet, and the leading teachers of Damocles Military Academy couldnt help but stand up and looked at each other, completely confused about what was going on.

Chapter 363

Yu Tianhe reacted and took the lead in communicating with the rescuers and exchange office personnel at high altitude in the stadium.

The signal was not good, there was only a sizzling sound, and the place was silent. Finally, intermittent human voices could be heard: Whitefog, cant see clearly.

The teacher at Pingtong Academy came to his senses and looked ugly: The cold wave is coming!

This is only the second day! Why is it arriving earlier again? !

Fan Han Stars leader teacher also stood up: Wherever the cold wave reaches, all communications can be destroyed instantly, and the cold air freezes the cameras over there.

Xiang Minghua, Xie Yuman and others looked at the darkened camera with expressionless faces, then turned around and continued trying to contact the rescuers at high altitude.

Just when they were still in a state where the cold wave was advancing again, the live footage of the Imperial Military Academy began to break one by one.

Yu Tianhe immediately said to other military school teachers: If you inform your students now, they will still have a chance to come out.

The teachers of Pingtong Academy looked at the students in the live broadcast camera. It will take time for the cold wave to arrive. Damocles Military Academy and the Imperial Military Academy happened to be at the rising position of the cold wave. As long as Pingtong Academy can realize that something is wrong, everyone can speed up and compete for first place.

Except for Damocles Military Academy and Imperial Military Academy who frantically contacted rescuers, teachers from the other three military academies were still hesitant, and the cold wave had not yet spread.

Samuel Military Academy has decided to leave. No one expected that Samuels leading teacher would be the first to stand up, Inform them to get on the aircraft now.

The organizer has dedicated personnel to contact the rescuers and others at high altitudes.

Everyone saw Samuel disembarking from the aircraft at high altitude. The rescuers and others informed the military students who still knew nothing about it, and Samuel took the initiative to get out.

Dont you mean we can leave within seven days? Shaw Eli didnt want to leave. We will reach the finish line soon.

Samuel Military Academy has chosen to give up. Even if you pull the flag now, it wont work. The rescuer said forcefully, Please go ahead.

What are you doing? Shaw Eli kicked the aircraft as he stepped forward.

When the teacher of Samuel Military Academy saw them starting to walk back, he felt relieved and regretted a little. Maybe it would be better to delay it a little longer.

South Percy also chose to be eliminated. Yu Tianhe said suddenly.

What are you doing? South Percys team leader was shocked. We are not eliminated. They have already entered the mecha state. They will reach the finish line in just one more day.

As long as the cold wave passes, they will lose their lives. Yu Tianhe insisted that South Percy be eliminated.

You are just the commentator, and I am the team leader this time. South Percys team leader always disagreed, The right to be eliminated is in my hands.

Now Damocles Military Academy and Imperial Military Academy are in the center of the cold wave. They have lost news, have no equipment in hand, and even their rescuers at high altitude have lost contact. Unless there is some supreme luck, they will be able to survive the two-week period, and survive the cold wave of the month.

Only Pingtong Academy, Samuel and South Percy Military Academy were left in the entire arctic field, and Samuel Military Academy voluntarily gave up.

As long as the cold wave doesnt spread so quickly, South Percy will either be first or second, and victory is in sight. How can they just give up and be eliminated.

Yu Tianhe looked at the leading teacher for South Percy for a long time, and finally called the people in the Ninth Military Region on the spot to explain the situation. They then contacted the school, and finally the school called the leading teacher.

To give up now is to give up the championship! The leading teacher looked at the military school in the camera and expressed dissatisfaction, Our school has already caught up with Pingtong Academy.

The school, withstanding the pressure from the military region, could only say forcefully: Let them out immediately and give up this game.

In the end, South Percy Military Academy could only voluntarily abstain from voting like Samuel Military Academy.

Chapter 364

The leading teacher of South Percy stared at Yu Tianhe with red eyes: The South Percy of today is not the South Percy of your time. Do you know the current situation of our military academy?

South Percy and Damocles Military Academy are already on the edge. Seeing Damocles Military Academy rise again this time, the teachers of South Percy Military Academy have been feeling a heavy burden.

The most important thing is for students to survive. Yu Tianhe was unmoved, There will still be a chance to get ranked later.

South Percy is not competing for first place, as long as it can get third in the total points, it will be settled.

They were in a stalemate for such a long time, and the people from Samuel Military Academy were already approaching the exit in their aircraft.

South Percy, who was also told that the military academy was voluntarily eliminated, was naturally unwilling to give up.

The news we have received now is that two military academies have lost their lives, including the people above. If you don't go out, you will never be able to go out again if there is a cold wave. The rescuer opened the door of the aircraft and said, Let's go.

After a period of silent resistance, the people from South Percy Military Academy finally got on the aircraft.

When the dust settled, only one military academy, Pingtong Academy, remained on the extreme cold track.

When the camera was inside, Lu Shibai looked around and seemed to notice something was wrong. He ordered everyone to enter the mecha, prepare to turn on the mecha state and move forward quickly.

The teachers at Pingtong Academy at the live broadcast were also excited. Now they were the only military school left in the field to rush to the finish line. The teachers only hoped that the cold wave would spread later.

However, the hope was clearly in vain.

An hour later, the remaining three military academies footage exploded and all images stopped.

No one in the audience even talked, they just stared at the darkened camera in confusion.

Have they come out? The leading teacher of Samuel Military Academy asked someone to contact the rescuers on the aircraft.

No one answered the call.

Were they almost close to the exit just now? Samuels lead teacher listened to the noisy hissing in the communication channel. He couldnt help but stretch out his hand to touch his chin, frowned and said to himself, They have all reached the exit, and should be able to come out.

He was so anxious, and the teachers in South Percy next to him had even worse expressions.

The students of South Percy Military Academy came out late and still had a long way to go.

As for Pingtong Academy, all the teachers felt like they were mourning. They knew the power of the cold wave better than the people present. However, the cold wave did not come so quickly in previous years, and it took some time to form and spread.

It stands to reason that this is enough time for the students of Pingtong Academy to come out.

I just received a notice that a cold wave is coming. Everyone on site has to evacuate. Ying Yuerong stood up and looked seriously at the auditorium below. The audience evacuated from the left and right. Others walked to the back. The aircraft has stopped outside.

Xiang Minghua stood still, his voice hoarse: What should we do with these students?

So far, no students from any military academy have come out. Damocles Military Academy, with more than a thousand people, was the first to have an accident, and now there is no news.

Lets evacuate first. Its useless to stay here. Jie Yuman pulled Xiang Minghua out hard. I have contacted the people in the military region. Lets find other ways.

The scene began to evacuate, and everyone looked extremely ugly.

The cold wave will start on the seventh day of the competition. This is the result of several measurements at Fan Han Star. No one expected that the cold wave would come earlier, and they allowed these students to encounter the cold wave inside.

Theres news! Someone is out!

When these teachers and organizers were evacuating, they suddenly received news from the exit of the extremely cold track.

All hearts are beating.

Are our students out? Teacher Samuel asked hurriedly.

The other military school teachers knew clearly that they could not be their students, but they still hoped in their hearts that what they heard was the name of their own school.

Samuel Military Academy! The staff member who received the news shouted loudly, They just flew out from the exit and are now rushing directly to the city. We will go there too.

Chapter 365

When the cold wave came, everyone in the Damocles Military Academy happened to be in the center. At that moment, everyone's minds went blank and they couldn't think of anything.

It was Jin Ke who reacted first, and his voice rang in everyone's mind: [Enter the mecha!

At this time, the main team members were the first to react and entered the mecha first.

The mecha is cold-resistant and can adapt to extreme environments. Several people split up to remind the school team members who had not yet entered the mecha.

After everyone entered the mecha, their brains finally woke up. They looked at the large white fog around them and slowly came to their senses.

Is this a cold wave? Wei San looked around. She could no longer hear the sounds outside the white mist. All her senses were conveying a message: cold.

How could it be a cold wave? Didn't they say that the cold wave wouldn't come until the seventh day after we entered the field? Liao Runing almost froze to death just now, but now he was still trembling after entering the mecha, and his words are trembling.

Jin Ke suppressed the heavy feeling in his heart: Since the cold wave can be advanced by a year, it is entirely possible to advance it by a few days.

Fortunately, we are standing in the center. Ying Chenghe tentatively stepped towards the outside where the white fog was thicker, and immediately retracted his feet, It's not as cold here as outside.

The center will change. We won't be able to stay here for long. Everyone should check the combat readiness packages and summarize them in ten minutes. Jin Ke ordered.

Huo Xuanshan looked up and saw that the sky was also covered by the heavy cold air, leaving only white mist: Is our game still continuing on?

Ying Chenghe lowered his head and counted his combat readiness bag: Once the cold wave comes, all the current surveillance cameras in the federation will fail and explode in this environment. If we have guessed it correctly, people in the live broadcast stadium should no longer be able to see our footage.

Jin Ke looked at the increasingly thick white fog: At this rate of spread, the entire extremely cold track will soon be covered by the cold air. In previous years, it would be covered within five days, but now it seems that it can be covered in two days or even one day. . The game will definitely not go on. We are in the center and must be the first military academy to have problems. It depends on whether other

military academies can take the initiative to get out of the game. If we get on the aircraft, we still have a chance of survival.

After Wei San heard what he said, he asked: Those of us who have not boarded the aircraft have no chance of survival?

Nonsense, young master, I, will still be alive and kicking. Liao Runing retorted, even performing a mecha somersault on the spot.

Jin Ke looked at the red button in the mecha cabin, gritted his teeth and pressed it directly.

Liao Runings sharp eyes discovered that his energy lamp was dimmed, and she was startled: Fatty Jin, what are you doing?!

Jin Ke didnt care about the nickname Liao Runing said. He raised his head and waited for a while, but the rescuer didnt come.

Sure enough, the cold wave can destroy all communication signals. Although Jin Ke did not receive the news that they have left the competition, he felt even heavier. There should be something wrong with the high-altitude aircraft. We can only save ourselves.

Ten minutes later, Jin Ke received everyones combat readiness package list. He spent five minutes integrating everything and told Wei San and Ying Chenghe: You assist other mecha masters in checking everyones mechas and energy distribution.

Then Huo Xuanshan and Liao Runing went out separately to test whether they could get out.

Jin Ke connected with all the commanders and used his senses to detect changes in the cold wave around him.

In contrast, the Imperial Military Academy was not so lucky.

Chapter 366

The reason why this cold wave spread so quickly is because there are two cold waves. For the two military academies that were also at the center of the cold wave, Damocles was not damaged because they were right at the eye of the cold wave, and they even got some breathing time.

The Imperial Military Academy was at the center of the cold wave and suffered the most severe impact.

At the moment when the camera exploded, a cold wave broke out, and everyone in the Imperial Military Academy was in the coldest zone.

Ying Xingjue took action. He controlled the physical form of perception and brought everyone into the physical barrier. Then Ji Chuyu reacted and entered the mecha, followed by several other members of the main team.

The school team members entered the mecha almost at the same time as Ji Chuyu, even faster than Huo Jian, Situ Jia and Gong Yijue.

When Ying Xingjue's perception materialized, he controlled the thoughts of the school team members and directly entered the mecha.

Situ Jia turned to look at the school team members who had entered the mecha neatly, and then looked back at Ying Xingjue, who had just entered the mecha at this time, and felt horrified in his heart: Is this the true ability of a super level 3 commander?

Ying Xingjue vomited out the suppressed blood after entering the mecha cabin. He raised his hand to wipe it off, and his calm voice was heard outside: The cold wave has advanced, we are in the center, the game is terminated, now everyone gather together, let's find an exit.

Huo Jian pointed to the sky: The people above...

All communications were interrupted during the cold wave. They can barely protect themselves and can't save us. Ying Xingjue used only declarative sentences.

Someone from the military region should come to rescue us. Situ Jia said, We may have to hold on for two days.

As early as half a month ago, Fan Han star had cut off all major transportation routes. Ji Chuyu reminded him.

Situ Jia:

Ying Xingjue forced his perception to materialize. He wanted everyone to fall together, form a circle, and slowly move forward.

The guards are still in the arena, can they come over? Ji Chuyu stood next to Ying Xingjue and asked in a low voice.

After a long time, Ying Xingjue spoke, but not in response to his question: The cold wave is intensifying.

Fan Han Star City Center Building.

Four military academies are trapped inside now, how can we calm down? The leading teacher of South Percy asked Fan Han Star to send out troops to search the extremely cold track.

Our students are also inside, and everyone is equally anxious. The representative from Fan Han Star frowned, But now two days before the cold wave, the cold air inside is changing rapidly. Going in to search is equivalent to losing your life. We cant go there now, we have to wait till at least a week later.

A week? Whether they can survive a week or not is a question. South Percys team leader took a deep breath, There are so many 3S main teams inside, as well as Ying Xingjue, you must go in.

The representative from Fan Han star had not yet responded. The leading teacher of Samuel Military Academy, who was sitting and watching the show, suddenly laughed: Now you know to be anxious. At that time, Master Yu asked you to take the initiative to get out of the game, but you still didnt agree. If

you didnt waste that time, perhaps your guys from South Percy Military Academy would have already come out.

The master Yu he was talking about was Yu Tianhe. This is how well known mecha masters are usually referred as. They like to add the word grandmaster after their last name, but Yu Qingfei is around, Yu Tianhe is not Grandmaster Yu, omitting the grand.

The teachers in South Percy turned blue and white, unable to refute.

Chapter 367

Its just that their students have already boarded the aircraft and they still have a chance to survive, so they still have to fight for the search.

Two days, someone must search after two days. The leading teacher in South Percy still insisted.

Fan Han Stars representative actually doesnt take the people of South Percy seriously, so what if Yu Tianhe is here, but now even people from the Imperial Military Academy were kept inside, so they had to respond.

One week is our maximum limit. Entering early will only lead to death. When Fan Han Stars representative spoke, his eyes did not fall on South Percy, but looked at the person with the greatest say here.

Ying Yuerong.

Ying Yuerong didn't close her eyes all day and night. She leaned back in her chair and said, I have applied to the Marshal to transfer people from the fifth district. Four days later, I will personally lead the team into the cold competition.

Everyone was shocked, District 5!

Four days? Fan Han Stars representative wanted to persuade her, In four days, the arena is still in an unstable state.

Ying Yuerong interrupted him: All the best young people from the Imperial Military Academy are inside. The people from District 5 and I will bring them out one by one, even if they are...corpses.

The Thirteenth District is also on its way. We hope to go in together in four days. Jie Yuman said.

Seeing that he could not be persuaded, the representative of Fanhan Star looked a little ugly and said slowly: Our starports have all been closed, and people from outside the star system are not allowed to come in now.

Once the cold wave hits Fan Han star, all communications will have problems. Letting people from other galaxies in now is tantamount to completely exposing oneself to an invasion. As long as someone wants to, they can find various loopholes on Fan Han Star.

Therefore, once the cold wave comes, traffic arteries will be closed in advance and galaxy barrier protection will be activated to prevent anyone from plotting against Fan Han Star.

Fan Han Stars own students were all inside, and they were anxious, but compared to the entire galaxy, the students were still lagging behind. Besides, they believed that the military students in Pingtong Academy could persevere.

We have discussed before the game, you will open a temporary channel to let us out. It is the same thing to come in now. Xiang Minghua said, We will only go to the arena and not enter the city.

There is no room for negotiation. Ying Yuerong said directly, Whether you let us in or not, District 5 will all come in.

The implication is that we will break in if we must.

Fan Han Stars representatives jaw was tense, his hands hanging under the table were clenched, and his palms were full of sweat: the Fifth District and the Thirteenth District are the most desperate teams in the entire federal military district, and they do what they say.

The Independent Army is still outside. If we let you in, they might take the opportunity to break in. Fan Han Stars representative still wanted to struggle.

Our Samuel Military Academy can also contact our military region and come over to deal with the Independent Army. Samuels leader teacher said proactively, with a leisurely tone in his words.

This time, no one in Samuel Military Academy was injured, and they all came out before the cold wave. If there were no people from other military schools, Samuel would be the boss.

Fan Han Stars representative immediately refused: No need, I will go and explain to the higher-ups, I will give you a reply in an hour.

Chapter 368

With pressure from the two strongest military regions and the support of Marshal Ji behind him, Fan Han Star held a high-level meeting for an hour that night and finally agreed to open the port for three hours.

Within these three hours, the Fifth Military Region and the Thirteenth Military Region must arrive at Fan Han Star, otherwise the port will be closed and no one will be able to come in after the galaxy protection is turned on again.

Can District 13 and District 5 arrive together? After Xiang Minghua came out, his face was full of sorrow. It happened that his school was the first to have an accident, and he didnt even have a chance to regret it.

They have been notified and are accelerating at full speed. Jie Yuman was not in a high mood. Damocles Military Academy was the first to have met with trouble, which had something to do with Jin Kes choice of the ice field route, but he was not wrong.

The arrival time of the cold wave has always been fixed, supported by monitoring data and one year in advance. However, the staff there were negligent and did not discover it. All the data clearly showed that the cold wave would not come until the seventh day after they entered the extremely cold track, but now the cold wave came suddenly and without any warning.

Before arrival, the monitoring equipment on Fan Han Star didnt even respond at all.

People from various military academies were arranged to rest in the military port building, which can withstand the cold wave. Except for the people from Samuel Military Academy who wanted to rest, people from other military academies were in contact with all parties, and the communication towers outside were gradually failing. They did not have much time.

The escort team is also inside, together with the rescuers, but the communication on their aircraft has failed and we can't contact them. Ying Yuerong stood in the room with a light projection in front of her.

The person inside the light curtain was clearly Ying Qingdao, the head of the Ying family. Even in the current situation, he still remains calm: Don't count on the escort team. Half of the people sent by the fifth district are Ying family members. As long as Xingjue can hold on, we will definitely find them within a while.

Where are the Ji family members?

There are none, the marshal thinks they can come out on their own. Ying Qingdao, as Ying Xingjue's father, naturally understands Ying Xingjue's ability. He may be able to come out alone and with the main team, but many people in the school team are basically without hope.

I once placed people on the 12th floor underground of the Fan Han Star Center Building. There is a special encrypted communication channel for emergency use. Ying Qingdao reminded.

Ordinary light brain communication will soon fail, and only Fan Han Stars military channel is available. Using this channel, all information flows must pass through Fan Han Star.

...How was his health before entering the arena? Ying Qingdao asked about Ying Xingjue before closing the communication.

Doctor Xu Zhen said that he has not found any abnormalities in his body for the time being. He is still the same as before. It may be that the composition of the nutrient solution cannot keep up. There was no one else in the room, and Ying Yuerong finally spoke with some warmth.

Ying Qingdao didnt say anything in the end, he just raised his hand and turned off the communication.

After the cold wave comes, except for the local residents who can enjoy it comfortably at home, others are spending every second like a year.

Every once in a while, the power of the cold wave increases, and the temperature of the extremely cold stadium can be imagined.

Theres a signal! The staff responsible for monitoring the extreme cold near the arena shouted loudly.

The leading teachers from several military schools gathered around.

The staff carefully captured and distinguished the information coming from the stadium, and finally determined: Its a distress signal from the aircraft!

Aircraft...

Chapter 369

It must be our students! South Percys leading teacher said excitedly.

There are four large aircraft high in the sky, and they may not be your students. Samuel, the leader of the team, said sarcastically from the side.

As soon as he said these words, the face of the leader of the South Percy team instantly turned ugly, but he could not refute that there were indeed four large aircraft in the arena.

Other military academies have a little more hope. Perhaps their students have returned in high-altitude aircraft.

The location of the signal has been found! The staff member moved his fingers quickly, It is one kilometer away from the exit of the track. Military aircraft are now arranged to respond.

Because of this news, no one in the four military academies could calm down. They were all waiting for the people from Fan Han Star to rescue the aircraft.

How long have they been there? Xiang Minghua sat at the door, clasping his hands and putting them on his face. The anxiety in his eyes could not be concealed.

Four hours. Jie Yuman also looked at the closed door. Everyone hoped that the person walking in the next second would be their own students.

Its been so long, they should have found it. Xiang Minghua couldnt bear it and got up and walked around.

The military aircraft is back! A teacher standing in front of the second-floor window shouted down.

Everyone in the building stared at the door, waiting for people from outside to come in.

One second, two seconds...after a long minute, the sealed door finally opened slowly.

Xiang Minghua and Jie Yuman had already stood up, and even held their breath at that moment.

When the door opened, everyone saw the people from Fan Han Star Military Region. Before anyone could react, they saw a group of students walking out from behind them.

Theyre from South Percy Military Academy!

Are you guys alright? Teachers from South Percy rushed down from the second floor.

Gao Tangyin shook his head: Everyone was here. The aircraft was flying at maximum speed. When the cold wave came, we were a step too late, so we were stuck in the arena. Fortunately, you all received the signal.

As long as everyone is fine. South Percys leading teacher looked back and saw that all their students were still there, and he breathed a sigh of relief.

Is this competition still a competition? Gao Tangyin asked subconsciously.

No matter what, we are the only ones left in the five military academies. Shaw Eli jumped down from the second floor. We dont know if the people in the remaining three military academies can come out alive.

His relaxed demeanor made other military academy candidates angry.

We are the only ones who came out? Gao Tangyin was surprised, They didnt board the aircraft?

In that state at that time, they were a little reluctant to take the initiative to leave, let alone the Imperial Military Academy.

Ill take you to rest first. The leading teacher in South Percy did not answer her question. Other military schools are here now, so it is difficult to talk.

When only the people in South Percy were left, the leader of the team told them that the first trouble was caused by the Damocles Military Academy and the Imperial Military Academy. When they decided to take the initiative, Pingtong Academy relied on their experience and did not choose to take the initiative. As a result, the cold wave broke out so quickly that all the cameras were blown up, and Pingtong Academy also lost contact.

Fortunately, the teacher let us out in advance. Yamamiya Isao was a little lucky. At that time, they felt the horror of the cold wave at close range on the aircraft. Almost instantly, problems occurred in the aircraft, and the glass outside the window cracked inch by inch.

At that time, all the mecha engineers went to the resource exchange office to get materials and closed the windows as much as possible. In the end, the aircraft was scrapped and stopped near the exit.

Several teachers subconsciously looked at the leading teacher without making a sound.

Chapter 370

Go take a hot shower first. The equipment here is better than the training ground. The leading teacher of the team changed the topic.

At the gate of the first floor, Xiang Minghua put his hand on the wall and said nothing for a long time after seeing the students from South Percy Military Academy coming in.

He knew clearly that the people who came in could not be Wei San and the others, but when he actually saw other military students, he still found it difficult to accept it for a while.

These military academies still had a chance to choose at that time, but their Damocles Military Academy didnt even have a chance to take the initiative.

Jie Yuman reached out and patted him on the shoulder: It would be good to have one more military academy team come out.

Xiang Minghua waited until he calmed down completely before speaking: They are in the center of the cold wave and are not familiar with the environment.

The chance of survival was much lower than that of Pingtong Academy, and there was no one in the team who could materialize perception like Ying Xingjue. He didnt even know if these students could last four days.

Its useless to think about it now. When District 13 comes, we will go find them. Xie Yuman sighed in his heart. Li Ze was still inside, hopefully Li Ze could find these students. At least they can stay in the aircraft for a while longer.

As soon as the students from South Percy returned, only the Imperial Military Academy and the Damocles Military Academy were still communicating with all parties.

Although the teachers at Pingtong Academy were anxious, a comparison of the teams of the two military academies showed that the students at Pingtong Academy were not in the center of the cold wave and were familiar with the extremely cold environment. They also entered mechas at that time, and their survival rate was greatly improved.

Everyone was currently waiting for the cold wave to fully break out and the arrival of the fifth and thirteenth districts.

After all the mechas have been inspected and the energy is distributed, everyone can stay in them for at least one day. Ying Chenghe reported after finishing the work.

Wei San also came from the other side: The cold wave is coming, are the star beasts still there?

Jin Ke replied: everyone is basically hiding. Those who are not hiding will not survive long like us.

Then we still need to make changes. Wei San looked at the school team, Two soldiers on the school team should enter the mecha of the engineers and commands to save the energy of the two mechas, and one soldier will guard the mecha next to the engineer and command.

Moreover, the mecha engineers and the mechas they command have their own defenses.

Ying Chenghe thought for a while: In this case, the seats need to be changed to two people, and some things need to be dismantled.

Alright. Jin Ke agreed, You hurry up, I think the center of the cold wave is going to change.

After speaking, he gave a plan on which types of soldiers should be kept in his mecha. Even though he knew that there would be almost no star beasts under the cold wave, the formation still needed to be maintained.

When disassembling the internal parts of the mecha, it is necessary to maintain the basic integrity of the mechas performance. Ying Chenghe and Wei San have done this once before at Guyu Arena, so they have experience.

They need to teach these engineers on the spot.

As soon as he came out of the mecha, Ying Chenghe was frozen. There wasnt even much cold in the central eye, and he couldnt bear it anymore.

Lets move quickly. Wei San called the mecha engineers over, divided them into two teams, and the two of them gave instructions respectively.

Ying Chenghes physique was not as good as that of Wei San as a soldier. After demonstrating the transformation of a mecha, he has to enter the mecha to recover.

Wei San was more resistant. She modified several mechas in succession and asked the school teams mecha engineers: Do you understand? Some mechas have special internal structures and if you dont know how to change them, just ask me.

School team mecha engineers: ... When can soldiers transform mechas? So skilled!

This group of people had no idea that Wei San was still a mecha engineer. When the dust cover was changed in the desert arena, except for the mecha engineers of the Chief Soldier team who had seen Wei San do it, the others had only seen that group of awesome hand speeds but didnt know that this person was Wei San.

Whats wrong? Wei San looked at the school teams mecha engineers who were motionless, Didnt you learn?

Learned. The mecha engineer finally came to his senses and began to quickly transform the inside of the mecha.

What a mecha soldier can do, how can they, as mecha engineers, say they cant do it?

They must do it!
