

## Smash All 431

### Chapter 431

“Where are we patrolling?” Huo Xuanshan asked Jin Ke.

“This line runs from the East City through the West City.” Jin Ke turned on his light brain and showed them, “The West City side is close to the cold wave outbreak point, and the aircraft cannot pass. We will come down halfway. There was also a small group of Independent troops who appeared before. They are hidden somewhere in Fan Han Star.”

“If we meet them, do we catch him alive or dead?” Liao Runing asked hesitantly.

“It doesn’t matter whether they’re alive or dead.” Jin Ke remembered something, “the people from Samuel Military Academy are patrolling with us.”

other people : “.....”

Jin Ke knew this was their reaction: “People from Pingtong Academy and the Imperial Military Academy took the north-south route. Those from the South Percy Academy were arranged to go to underground shelters to observe civilians there.”

Although the Independent Army wants to kill civilians, there may also be people from the Independent Army pretending to be civilians, and neither side can relax.

The five people dressed and walked out of the building. Several teachers were waiting at the door of the building.

“Be careful on the road.” Xiang Minghua looked at the five people, “Don’t show off.”

Jie Yuman walked towards Wei San, who subconsciously covered her butt and avoided her.

“Stop moving.” Jie Yuman said to Wei San.

Wei San stopped and said, regardless of the situation, “Teacher Jie, I was wrong.”

Jie Yuman walked over and raised her hand to pull the badge straight on Wei San’s arm: “.....What are you thinking about every day?”

It turned out that the badge was crooked, and Wei San breathed a sigh of relief.

“You are just going through the motions, don’t mess around.” Jie Yuman patted her arm, “If something happens, don’t be afraid.”

“I know.” Wei San nodded.

The five boarded the aircraft, and people from Samuel Military Academy arrived early in the morning.

The two military academies have always been at odds with each other, but this time they had to perform tasks on the same line. The atmosphere inside the aircraft was very tense.

“Good morning.” Wei San entered last and greeted the five people from Samuel Military Academy warmly.

Five members of Samuel’s main team: “.....”

The people from the two military academies sat facing each other. Wei San called Xi Wutong across from him: “Let’s dance together again next time.”

Xi Wutong turned his head and didn’t want to talk to her, but his mind immediately remembered the pain of being stepped on by rivet shoes.

These lunatics!

The wind and snow were still strong outside, and the aircraft was not flying very fast. Inside, in addition to the main teams from their two military schools, there was also a patrol team from Fan Han star, half S-level and half A-level.

“What is the general rank of the Independent Army?” Xiao Eli asked the man next to him who was obviously the captain.

“They have all levels.” The patrol leader replied expressionlessly.

“If we don’t come, won’t you be dead if you encounter the 3S-level Independent Army?” Xiao Eli continued to ask.

“There are no 3S-level independent troops found yet, they are basically all A-level.” the patrol leader declared.

Jin Ke turned his head and explained to Wei San and others: “Currently the only 3S-level Independent Army is the former starship chief adjutant of the fifth district.”

“It takes a whole day to go through a line completely. Please be mentally prepared.” After the patrol captain finished speaking, he stopped talking and focused on the cameras outside to see if anyone was around the street. .

The closer to the west, the slower the aircraft becomes. It wasn’t until it reached the center line, that the aircraft stops completely and everyone needs to walk over.

However, they are not in the arena and have enough energy consumption to directly turn on the mecha state.

“Did you come to the conclusion about the gray shapeless object in the video I recorded before?” Wei San walked for a while and asked Jin Ke while looking at the flying snow in the sky.

“There is no conclusion. They have never seen it. They suspect it is an unknown mutant star beast.” Jin Ke said, “The range of movement should be limited. So far, no one has seen those gray formless substances outside the stadium.”

“Maybe it depends on the vortex flow, there is no whirlpool flow outside.” Ying Chenghe guessed.

Liao Runing bumped into Wei San’s mecha: “Maybe Wei San kill them all.”

“Hey.” Xiao Eli mocked, “Did Wei San kill them? It was clearly Ying Xingjue’s hand.”

“How would you know?” Liao Runing turned to look at Xiao Eli, “you were outside the stadium, what shit did you see.”

“I’m not inside, but anyone can guess. Since even Ji Chuyu can’t do anything, how can you, Wei San, just add some Purple Mushroom Liquid and sweep through?” Xiao Yilai looked at Damocles with disdain. Xiao Eli looked at these people from Damocles Military Academy, “Show some face.”

Wei San nodded: “You’re right, without Ying Xingjue, I really couldn’t do it well.”

Xiao Eli: “.....” she admitted quite quickly.

Chapter 432

The two military academies were facing each other tit for tat, and they walked all the way west, encountering other patrols from Fan Han star on the way.

“In this kind of weather, the Independent Army has no supplies outside and cannot hide for long.” Xiao Eli said to the commander of his military academy.

“Since they have been able to hide for many years, they must have their own stronghold.” Gao Xuelin looked down at the half-collapsed building on the roadside. “The biggest fear is that like the previous staff member, there are people from the Independent Army inside Fan Han Star.”

It would be unimaginable if the Independent Army penetrated to the top.

At first, the two military academies would exchange a few words, but later everyone just moved forward to sweep the road, searching for any traces of the Independent Army.

Wei San rubbed her eyes and yawned. She tended to lose track of time during class and didn't get a good rest in the past two days.

When she raised her eyes again, she looked to the left of the patrol. They were all collapsed houses with a Pingtong Academy flag planted on them.

“There was a battle here?” Jin Ke asked the patrol leader.

“During the retreat, the Independent Army appeared. This was the place where the first massacre occurred. Some students from Pingtong Academy resisted the Independent Army and died here.” It was obvious that the captain of the patrol hated the Independent Army bone deep.

Wei San approached the collapsed house and stepped on something covered in snow. She kicked the snow on the surface to reveal the metal shell inside.

It’s a mecha shell.

She controlled Impermanence and bent down to pick up the metal shell on the ground. It was just a fragment without any patterns or emblems on it.

Wei San looked over and over for a while, attracting the attention of Liao Runing next to her, who squeezed over and took a look.

In the next second Wei San threw away the metal case in her hand.

Liao Runing’s words “Let me see” were stuck in his mouth. He looked down at the metal shell thrown on the ground: “Why did you throw it away?”

“Dirty.” Wei San gestured for him to follow the team, “I can’t tell whose mecha it is.”

Forget it if it’s dirty, Liao Runing steps over the pieces of the mecha. He cherishes his mecha very much and doesn’t touch dirty things.

They walked ahead and didn't notice that one person in the patrol had been observing Wei San.

.....

After finishing the line, everyone walked to the Zhongcheng District and returned to the port building in the aircraft. It happened that the other three military academies also returned at this time.

Ying Xingjue saw Wei San coming off the aircraft at a glance. This time she was arm-in-arm with the mecha soldier Liao Runing, and she seemed to have an unusually good relationship with him.

He frowned and looked at Ying Chenghe next to him. There was nothing strange about his cousin.

Ying Xingjue can never quite understand the relationship between the main players of Damocles and Wei San. Everyone is too close to her.

"You actually took the teacher and Shiniang to that kind of place?" Liao Runing couldn't believe it.  
"Those places are designed to deceive tourists."

Wei San: "....." Sure enough, no matter what type of world the place was, the one thing that remains unchanged is the profiteers who make false propaganda.

“Next time, I will take Shiniang to visit Sadu Star.” Liao Runing patted his chest and said, “A pure Sadu Star person, with fun and delicious food, they need to follow my dad to visit it. Unlike these two people, who’s understanding of the Imperial Star isn’t even as in depth as Jin Ke.”

Liao Runing was very skillful in the matter of flattering one and suppressing others.

“Wei San.”

Situ Jia suddenly shouted.

The people from other military schools looked back and forth between Wei San and Situ Jia. Even a few people from the Imperial Military Academy looked at Situ Jia in surprise, not understanding what he was going to do.

“I heard that you are an orphan?” Situ Jia stared at Wei San and displayed an unknown smile, “You are obviously a person who was secretly trained by Damocles since childhood. If you want to pretend, you should pretend more like it. Don’t have such a great relationship with the main team from the start. Besides, without the support from the military academy, how could an orphan reach this point?”

Wei San suppressed the smile on her face: “What do you want to express?”

Situ Jia: “It is impossible for a person at the bottom to reach your current position. Even if you are an orphan, you were trained by the resources of Damocles Military Academy.”

Wei San raised her eyebrows: "So what?"

Situ Jia spread his hands: "there's nothing."

Since it is like so, the stable class in his heart is still there. Those at the bottom cannot climb up. They can only climb up because they are trained by the people at the top.

The faint feeling of panic in his heart also completely dissipated.

Entering the building, Wei San suddenly turned to Ying Xingjue and Ji Chuyu and raised her lips: "Speaking of which, the three of us met a few years ago."

Ying Xingjue suddenly raised his eyes. If he had seen Wei San, he would definitely remember her, but he had never seen her in his memory.

Ji Chuyu also had surprise in his eyes.

"When have you met?" Jin Ke asked in a low voice beside her. He only left Star 3212 two years in advance. During this period, it was impossible for Wei San to meet Ying Xingjue and Ji Chuyu.

Then it was during the two years since he left..... Jin Ke's mind was spinning rapidly. Wei San's visit to Sadu Planet was the first time she left Star 3212, so it could only be Ying Xingjue and Ji Chuyu who went to Star 3212?

How could the two of them go to an unknown star? No, they were passing by.

Jin Ke's mind recalled the route that Ying Xingjue and Ji Chuyu took to get to Huanye Star. If they deviated slightly, they could go to Star 3212.

"You guys saved my life." Wei San raised her eyebrows, sighed exaggeratedly, and looked at Ji Chuyu, "If you hadn't killed that star beast, there wouldn't be a fifth 3S in Damocles Military Academy now. you will have one less competitor to fight against to win the championship."

Let's anger the f\*\*\* out of you.

Ji Chuyu had killed so many star beasts and couldn't remember when he saved Wei San. He frowned and stared at Wei San's face, unable to remember at all.

"Didn't you also find gray crystal in the corner?" Wei San reminded him with good intentions.

Ying Xingjue was startled, he remembered, they had found gray crystals on an unknown star.

Chapter 433

The main players from the five military academies were all at the entrance of the building. Everyone looked at Wei San, Ying Xingjue and Ji Chuyu quietly.

After Ji Chuyu heard what Wei San said, he quickly located the incident in his memory. He had not forgotten it, and even remembered it clearly. It's just that the focus of his memory is not on the person lying on the ground dying, but on the first star beast he killed on the nameless star.

"That person was you?" Ji Chuyu asked expressionlessly, but his fingers quickly turned his ring.

He didn't believe that the person lying on the ground with her face covered in blood was Wei San. That person was clearly just an ordinary person who didn't even have a mecha. If it is true as Wei San said, how long has she been exposed to mechas? Less than three years. In such a short period of time, she has already caught up with everyone on their main team.

Wei San sighed: "That was the first time I saw a combat mecha. Thanks to your rescue, I was determined to be a mecha soldier from then on. If the Imperial Military Academy tuition hadn't been too expensive and I didn't have a loan, maybe we would have been teammates." "

Ji Chuyu: "....."

"Commander, did you really save her? When did it happen?" Situ Jia was confused by Wei San's sudden move and asked in a low voice while standing nearby.

"It does not count as a rescue." Ying Xingjue looked up at Wei San and replied to her seriously and slowly, "That star beast was our mistake. Without it, you wouldn't have been hurt."

A few years ago, when the Imperial Twin Stars had not yet become famous, they followed the Fifth District reinforcements to the Huanye Star. Also following along with them were the new generation teams from the Imperial Military Academy. The star beast was still underage and was caught by the reinforcements on the way. It was originally going to be handed over to the Fifth District laboratory, but it was mistakenly released by someone from the new generation team. Since Ying Xingjue and Ji Chuyu had never fought against a star beast in reality, the hunting mission was left to them.

The two chased all the way to Star 3212 . They directly piloted the aircraft to break through the protection of the nameless star and chased it to the abandoned building. There was a gray crystal in the abandoned building on the unknown star, which was very attractive to the star beast. The star beast wanted to eat the gray crystal to replenish its energy, but the small mecha designed by Wei San at that time shot into the wall, attracting the attention of the star beast.

Ji Chuyu's mission was originally to leave the star beast behind, but they didn't expect that when they arrived, the star beast had already injured someone, so they killed the star beast directly.

When they rushed to the building, an emergency notification came from the starship. There was a riot at the Huanye Star defense line. The reinforcements needed to rush to the Fifth District. The two of them left without even paying attention to the body of the star beast.

As for the person injured by the star beast, they don't care about them, and they don't need to care about them.

As early as when the aircraft forcibly broke through the protection of the nameless star, someone on the star should have followed it, and the injured civilians on the ground would naturally be discovered.

"I still have to thank you. Without you, I would still be an ordinary person on a nameless star." Wei San said in a relieved tone, "Besides, it's thanks to the fact that your school's tuition fees are so expensive, otherwise I would have gone to your school. "

People from other military academies: “.....”

Seeing several military schools standing at the door and refusing to leave, the teachers thought they were causing trouble and rushed over: “.....”

Ying Xingjue’s fingertips hanging at his side curled up. He looked at Wei San and could not see any fluctuations in her eyes. To her, this matter seemed to be nothing at all.

Wei San’s eyes were not as grateful as she said, and even more, there was no anger towards them. Her mood was so calm that she could be called indifferent.

She didn’t care about this.

Ying Xingjue looked away, not wanting to meet her gaze.

Due to Situ Jia’s sudden talkativeness, everyone in the Imperial Military Academy felt choked up, and even people in other military schools felt strange.

What does it mean that if there was no Ying Xingjue and Ji Chuyu, she would still be an ordinary person. Does it mean that the Imperial Military Academy has found its own opponent? Also, if the tuition is expensive, there are no loans. Did Wei San ever want to come to their school?

The people from other military schools subconsciously assumed that if Wei San came to their school, it would be other military schools that would be offended, not them.

“Everyone has dispersed. Let’s get some rest early.” Xiang Minghua grabbed Wei San and walked inside, gesturing for everyone from Damocles Military Academy to follow.

The people standing at the door could still hear the voices of the people from Damocles Military Academy.

Chapter 434

“What do you mean you’re going to another school? Wei San, if you don’t explain it well today, don’t even think about having dinner.”

“Teacher, I’m just saying that this is fate! I am destined to attend our Damocles!” Wei San quickly defended, “Really, what are we going to eat tonight.....”

“Explain carefully what the injury is.” This was Jin Ke’s voice.

Wei San: “Let’s talk after dinner.”

.....

The other military schools left one after another, leaving only five people from the Imperial Military School standing there.

Gong Yijue was a little dissatisfied with Situ Jia. What happened? This happened out of nowhere, and now everyone felt uncomfortable.

"I don't believe that person is Wei San." Ji Chuyu was silent for a while, then responded to Ying Xing Jue. He was more inclined to think that Wei San was secretly trained by Damocles Military Academy.

Ying Xingjue lowered his eyes, covering up the emotion in his eyes, and said quietly: "she was born on a nameless star, and knew we found Gray Crystal, and the moves she used were confusing."

She clearly has no formal training, or has very little time to receive formal training, so she uses all kinds of moves.

Ying Xingjue raised his eyes and looked at Ji Chuyu: "What you don't believe is that she can reach where she is now by her own abilities."

Ji Chuyu was completely silent.

An unknown star orphan, with no power or influence, she even needed a loan to pay for her tuition. Now she stood at the same level as a group of proud men, and will even be stronger in the future.

They just don't want to believe it.

Ying Xingjue recalled his opinion of Wei San at the beginning of the competition, even he could not avoid labeling people.

“Get some rest early.” Ying Xingjue glanced at the people with complicated expressions and left first.

.....

Ying Chenghe sat in front of Wei San, “You never said you knew my cousin before.”

“Tell me, what’s going on?” Jin Ke sat on the left side of Wei San, “How did you get involved with them on Star 3212?”

Wei San raised her head. Liao Runing on the right and Huo Xuanshan on the opposite side were also waiting for her answer.

“Actually, there’s nothing to say. I just met him once.” Wei San spread her hands, “If that Situ didn’t come here to make trouble, I wouldn’t have mentioned it.”

Nothing important.

“I have never heard that Ying Xingjue and Ji Chuyu have been to Sstar 3212.” Jin Ke said, “ you were injured?”

Wei San took the plate and was about to eat, but Liao Runing pushed back her hand next to him: "Speak first and then eat."

".....They chased the star beast to Star 3212 when they went to Huanye Star." Wei San pulled out her hand again, holding the chopsticks, "I was scratched by that star beast, so it counts as me being saved by them."

"They went to Huanye star as reinforcements, and they chased star beasts on the way?" Liao Runing was the first to express confusion.

"Maybe it's the star beast captured for the laboratory of the Fifth District." Ying Chenghe said, "I think I've heard of it."

"So at that time you haven't learned about mechas yet?" Huo Xuanshan asked her.

"Learned." Wei San knocked on the table and motioned for them to eat quickly, "But we only have a few B-class mechas on Star 3212, and we can only use them for training when we are about to graduate."

During this meal, Wei San gave them a lecture about the poorness of 3212 Academy.

"This is too tragic." Liao Runing said immediately, "I will asked my father to donate mechas."

Some A-level mechas can still be donated and can be used by 3212 Academy.

“I still have a lot of unused materials in my studio on Imperial City. I can exchange them for making a few mechas.” Ying Chenghe also wanted to donate.

“What should be donated more is the third-generation sensory measurement instrument.” Huo Xuanshan pointed at Wei San, “otherwise, more high-level people will lose the opportunities they should have in the future.”

Not everyone is like Wei San, who can slowly come up on their own. Some people with high perception may be buried because they did not test their perception correctly.

Wei San lowered her head to pick up the food on her plate: “How many nameless stars like 3212 are there in the entire Federation?”

Jin Ke straightened up: “Because there are so many unknown stars, they don’t even bother to name them, they just use numbers.”

This shows that there are so many nameless stars, and Star 3212 was actually quite populated. Some nameless stars have very few people living on them, making the situation even more difficult.

“Let’s donate to Star 3212 first, and then slowly help other unknown stars if we have the ability.” Liao Runing thought for a while and said,

Chapter 435

Jin Ke looked at Wei San who was eating, and he became interested in one thing. How many unknown stars in the Federation were still using the first-generation perception testing instruments, and how many of them had problems with the measurements.

.....

Early the next morning, Wei San woke up and saw Liao Runing and Huo Xuanshan squatting in the living room, looking at the light brain, not knowing what they were laughing at.

“Hahahaha!” Liao Runing slapped his thigh and saw Wei San coming out of the corner of his eye. He immediately stood up and said, “Wei San, guess what happened in the other military academies after last night.”

“What?”

Liao Runing turned his head around and showed it to Wei San: “This morning, notices were posted on the official websites of all military academies. From the next academic year, all tuition fees will be halved, and loan channels will also be provided. Hahahahahahaha.”

After so many competitions, the next class of freshmen will be ushered in, in a while. The quality of the subsequent competitions in each military academy directly represents the number of students it can absorb.

The official websites of the five major military academies have been posting recruitment promotions, and the video of Wei San is currently on the homepage of Damocles’ official website.

Although other military academies despised Wei San, if they had to start over, they all wanted to recruit her into their own military academies.

“Why did this happen all of a sudden?” Wei San looked at the official website notices of each military academy, “was this just because I said yesterday that tuition fees are expensive.”

Liao Runing nodded: “Pretty much, they must regret not recruiting you. The Imperial Military Academy sent the notice first, and the other military academies followed closely after seeing this.”

“I heard that Ying Xingjue made the suggestion to the Imperial Military Academy.” Huo Xuanshan said, “He believed that the tuition fees prevented a group of outstanding students from joining the Imperial Military Academy.”

“Listen to this, Ying Xingjue is clearly saying that you are excellent.” Master Liao gave Wei San a thumbs up, “Losing you is their biggest loss.”

Wei San carefully read the notice sent by the Imperial Military Academy, and actually found the loan channel overnight: “The Imperial Military Academy is really willing to agree, and is not afraid of a value drop. It is a good military academy for aristocratic families.”

Master Liao held Wei San in his arms: “You don’t know this. Let this young master explain it to you. Our old military academy, Damocles Military Academy, has been the boss many years ago. Over the years, its first place has been occupied by the Imperial Military Academy. Now that we are rising, they are panicking, and they don’t care about the background of the students.”

“Pingtong Academy has so many rules, and the elimination rate is actually higher than the Imperial Military Academy. They also want to change it?” Wei San turned to Pingtong Academy’s official website and asked.

“Pingtong Academy is the second oldest in ten thousand years. After we rise up, the pressure is no less than that towards the Imperial Military Academy.” Huo Xuanshan threw the nutrient solution to Wei San.

This time, not only the Imperial Military Academy, but also Pingtong Academy followed suit and tried to steal students.

In fact, several people guessed most of the situation correctly.

Last night, Ying Xingjue made suggestions to the Imperial Military Academy.

What Wei San said was also heard by the leading teachers of the Imperial Military Academy. When they thought that for this inexplicable reason, the Imperial Military Academy lost a 3S class and gained a strong opponent, these teachers were horrified.

The military academy naturally disagreed at first. It was impossible even to think about asking their Imperial to lower its stature and imitate the Damocles Military Academy to cater to those poor students from unknown stars.

“A few years ago, Wei San, who we met, was just an ordinary person, but now she can stand on the same level as the 3S class. Just because the tuition of the Imperial Military Academy is expensive, she

has become our opponent.” Ying Xingjue looked at the other side of the communication and asked, “Is the school willing to see this kind of thing happen again?”

“Our tuition is not expensive. Students who can’t even afford the tuition have never touched any mechas before entering the military academy, and their natural strength is lower than other students.” Someone from the school retorted.

“None of this applies to Wei San.” Ying Xingjue declared word for word, “The rules of the Imperial Military Academy should change, otherwise Damocles Military Academy will trample the Imperial Military Academy under its feet once again.”

The second half of his sentence poked a knot in the school’s heart that had always existed.

Even though the Imperial Military Academy has maintained the first place in the competition for so many years, and Damocles Military Academy has been getting worse year by year due to the problem of student shortage, there are so many military districts in the Federation, and when people mention the Fifth District, the strongest military district, there will always be something behind it. They will follow the Thirteenth District and think that the Thirteenth District is no worse than the Fifth District.

In the end, the school held a meeting to discuss and made a concession. Not only were the tuition fees halved, but formal loan channels were also provided to ensure that students without money could enter the Imperial Military Academy.

.....

The five military academies patrolled for the second time and met again on the aircraft outside. People from other military academies looked at Wei San with scrutinizing eyes.

Chapter 436

“These people are jealous of you.” Liao Runing said with glory, “They enjoy the best resources all day long, but they still can’t beat you. They must be very sad.”

Wei San raised her eyebrows: “You can’t beat me either.”

“There is no way.” Master Liao exaggerated, “Sometimes I have to admit that there are geniuses in this world.”

The people from other military schools: “.....” if you gossip, just gossip, is it necessary to be so loud? Are they afraid we can’t hear.

“Let’s go.” Jin Ke called them over.

The same team as yesterday, Samuel Military Academy was rarely autistic today, and did not give any looks to Damocles Military Academy.

Now there is a general consensus in everyone’s mind, don’t mess with Wei San. If you mess with Wei San, the person who will be unhappy will definitely be yourself, and by the way, there will be several other military academies unhappy along with themselves .

Even Xiao Eli who was sarcastic with the people at Damocles Military Academy, was afraid that Wei San would provoke him again.

He didn't want to know how talented Wei San was.

Wei San sat at the window seat and looked out: "Is the snow outside a little lighter?"

"The temperature has not risen." Ying Chenghe asked her to look at the display screen inside the aircraft. "It will take several months for the cold wave to gradually dissipate."

This time the aircraft stopped in Central City as usual, and a group of people left and entered their mechas.

"Are we going to patrol like this every day?" On the second day, Liao Runing already foresees a boring life in the future, "It's too es as you say." Jin Ke said slowly, signaling for them to enter combat mode.

Samuel Military Academy, Damocles Military Academy and the patrol team all gathered back to back, and star beasts kept coming out from a distance, shrinking into a circle.

"Every year during the cold wave, some star beasts break through the barrier of the arena and run outside." The patrol team leader explained, "These are the first batch of star beasts to come out this year."

They thought that all the star beasts inside would be frozen to death, so they never saw a trace of them, but they didn't expect that they would appear now.

Groups of star beasts crowded together, closed the circle, and stared at the people inside.

“I haven’t moved my hands for a long time, I’ve almost suffocated.” Liao Runing twisted his arm, “This young master wants to teach them to be beasts again.”

Compared with the gray shapeless matter with swirling currents, these star beasts are really not enough to look at. The 3S level mecha soldiers from the two military schools used their hands to kill a star beast with just a few moves. The patrol team next to them was a little stunned.

In the eyes of these patrols from Fan Han Star, apart from the students of the Imperial Military Academy, Pingtong Academy is the strongest, and now whether it is Samuel Military Academy or Damocles Military Academy, it is not possible to fight with their patrols at the same level.

“Your cut is nothing more than that.” After Liao Runing killed a star beast, he turned to look at Xi Wutong next to him.

Patrol Captain: “.....” This sword strike directly decapitated two double S-class star beasts. Yet it’s nothing?

Xi Wutong ignored Liao Runing and turned around to continue dealing with the star beast.

“Your trump card is nothing more than this.” Xiao Eli couldn’t help but pointed at Wei San and spoke sarcastically.

Wei San, who was paddling, said: “Are you talking about me?”

Xiao Eli, who had previously told himself not to provoke Wei San, insisted, “I heard that you have a big move in the extreme cold arena. It seems to be false news.”

Wei San kicked the star beast away from her feet: “Even if it is false news, what can you do to me?”

Xiao Eli: “.....Sooner or later the situation will overturn.”

The circle that was originally contracted was re-expanded due to the action of the 3S-level soldier, but there were still star beasts surrounding them.

Just when everyone was focusing on the surrounding star beasts, other star beasts suddenly jumped out of the building in mid-air, and even large flying star beasts appeared to attack people in the circle.

A giant white wolf jumped down from mid-air, opened its mouth and bit into Jin Ke’s head in the middle. Wei San stretched out her hand and pulled the mecha over, blocking the front. She held the long knife and turned it. The blade of the knife was frosted, and she slashed with the wind of the knife.

Nan Feizhu was close, and the mecha’s face was splashed with the blood of the star beast, but his attention was on Wei San’s long knife. He had also seen a little white frost on her knife at the Guyu Arena, but now he could clearly feel the extremely cold murderous aura from the sword.

.....What kind of knife is this?

Several materials with ice properties suddenly appeared in Nan Feizhu's mind, but he couldn't find the most suitable proportion to forge the long knife in Wei San's hand, not to mention the several changes of her long knife.

Ying Chenghe's knowledge of weapons has reached this point?

The light mecha soldiers in the inner circle had already flown up to fight against the flying star beast. Liao Runing's left shoulder was grabbed by a flying star beast. Its claws were like steel claws and penetrated directly through his shoulder armor.

The damage to the mecha was instantly transmitted to Liao Runing through perception. He remained calm and allowed the flying star beast to grab his shoulders. He lowered his waist hard and pulled it down from mid-air. He held it with one hand and grabbed the flying star beast, thrashing it to the ground.

The flying star beast landed directly on the ground with its wings. Liao Runing did not make a move. Huo Xuanshan took the time to shoot an arrow in mid-air, directly nailing the flying star beast.

Liao Runing raised his head and gestured to Huo Xuanshan, then said to Wei San: "How many star beasts have you killed? Let's deal with them as soon as possible."

"I will only kill this side and don't care about the others." Wei San has not been very interested in fighting recently.

"Okay, Samuel's, you can allocate it yourself." Liao Runing said to Xiao Eli and others.

Wei San wanted to quickly deal with these star beasts, so she divided his Xumi sword into two swords and began to rush out.

"sorry."

Samuel's Jill Wood was kicked to Wei San's side by the Star Beast and accidentally touched her, causing the two mechas to collide.

Wei San frowned and backed away: "Be careful."

Chapter 437

The weapon Jill Wood used was called the Immovable Ax, two heavy axes. She was kicked down by the star beast, dragging down Wei San. Jill Wood quickly stood up and faced the 3S-level star beast again.

Wei San glanced at the others beside her, who were all fighting with the star beasts. She simply pulled Jill Wood over, and the two of them changed positions: "You go over there, and I'll deal with this side."

Jill Wood was stunned: "I....."

“Don’t delay my return.” After Wei San spoke, she faced the 3S-level star beast and the double-S star beast over there.

Jill Wood clenched the Immovable Ax in her hand and moved to the direction where Wei San had killed most of the star beasts. She is only double S-level, and it is too difficult to deal with 3S-level star beasts. Now that she has switched to this direction, it is obviously much easier.

The inner circle continued to expand, and the distance between the main soldiers of the two military academies became wider and wider.

Wei San was expressionless as she cleaned up the surrounding star beasts. She didn’t really want to fight recently and just wanted to finish Yu Qingfei’s class. She had several ideas, but they couldn’t be realized yet. All she could think about was mechas and their structure.

“There’s someone over there!” Jill Wood pointed to the half-collapsed building on Wei San’s side.

Wei San raised her eyes and saw that someone was flashing by. She turned and shouted to the patrol leader: “Captain, there seems to be someone over there. Do you want to go and take a look?”

Patrol Captain: “.....” was she poisonous? She was so close, why didn’t she run over immediately and turn around to ask him? By this time, the person had already run away.

“I’m almost done here.” Huo Xuanshan drew his bow in mid-air, shot a star beast, and said to Wei San below, “I’ll go over with you to take a look.”

“Okay.” Wei San began to focus on the star beast in front of herself again.

Samuel Military Academy: “.....”

Xiao Eli: “All the civilians have gone into underground shelters. Apart from us, the person on this line must be the Independent Army!”

He expressed contempt for Wei San’s reaction in his tone. He avoided a star beast’s attack and Xiao Eli was the first to run towards the place where the figure flashed past.

As soon as Xiao Eli ran away, the star beasts dispersed to the others, putting pressure on the remaining people.

“Don’t let the Independent Army kill you alone.” Liao Runing shouted from behind. He thought he was reckless enough, but he didn’t expect the people from Samuel Military Academy to be even more reckless than him, so he just chased after him.

Samuel’s commander Gao Xuelin could only lead others to chase Xiao Eli.

Jin Ke: “.....”

In this way, all the pressure on the star beast has to be placed on Damocles and the three of them.

Wei San looked at the five Samuel Military Academy members who were running away: "It's been so long, it's too late to chase them."

"Since you know, why didn't you chase them in the first place?" The patrol captain said with some dissatisfaction, "It was not easy to find the Independent Army."

Wei San dodged the attack from the star beast next to him and turned around: "It's not good for me to go alone. What if something goes wrong and I can't compete later?"

Patrol Captain: "....." A level 3S is actually afraid of this and that.

By the time the people from Samuel Military Academy came back after chasing them, Damocles Military Academy had already dealt with all the star beasts, and the patrol team was collecting the bodies of the star beasts.

"Caught up?" Wei San asked them.

Xiao Eli looked worried: "No."

"It's so fast, maybe it's a rat, not a human." Wei San comforted him, "Don't be discouraged."

“Do you have any sense of responsibility?” Xiao Eli began to question Wei San instead, “That’s the Independent Army. If we don’t catch him, they will come out to humiliate civilians for no reason in the future.”

Wei San thought hard for a while and pointed at Jill Wood: “She was the first to notice the figure. It stands to reason that she should be the one who chased after him immediately.”

Jill Wood: “I.....I called you because you were closer.”

Gao Xuelin raised his hand to indicate to Jill Wood that she should stop talking: “Damocles Military Academy just wants to stay on its own, but you’d better understand one thing. When the Independent Army insults you everywhere, it doesn’t care whether you are involved or not.”

On the return trip, the atmosphere between the two military academies once again became tense.

Chapter 438

There were people from the patrol in between.

Not only did they encounter star beasts, but the Imperial Military Academy and Pingtong Academy also encountered star beasts.

Basically all of these star beasts came out of the extremely cold arena, but this was a point in time, and no one was going near the arena anymore, so they could only strengthen the protection in the city again.

Damocles Military Academy and Samuel Military Academy saw suspicious figures during patrols and suspected that they were Independent soldiers. This matter did not attract much attention because everyone was concerned about another thing at the moment.

News from the First Military District of the Federation showed that the defense lines of each military district were slightly loosened, especially Huanye star. They also sent a starship to Fan Han star, and there must be not enough manpower there now.

The Second District and the First District have already sent teams for reinforcements, but they also require Fan Han star to open up the galaxy protection and let the people from the Fifth District go out. Along the way, students from various military academies also go out to continue participating in the competition.

Fan Han star's senior management was at loggerheads with the other side and refused to activate galaxy protection again for fear of something happening.

The meeting lasted for an hour, and for another hour, leading teachers from various military schools were also coming in and out of various conference rooms.

"Is the defense line loose at this time?" Wei San leaned on the sofa, tilted her head back, and said casually, "How can these star beasts know that a group of people are coming from the Fifth District?"

Liao Runing leaned back like her: "Maybe there are star beast spies among us."

"What nonsense are you talking about?" Jin Ke kicked him. "I once heard a saying that the more geniuses appear at the same time, it means that a greater evil force will appear later."

Huo Xuanshan looked at him: "You are saying you are a genius."

Jin Ke's face was expressionless: "I mean we are all geniuses."

Ying Chenghe thought thoughtfully: "So, this evil force is the Independent Army, and we will face the Independent Army in the future."

"I feel like the teachers don't want us to face the Independent Army." Wei San turned to look out the window.

"Half of the people there used to be from our school." Liao Runing understood the teachers' thoughts better.

Damocles Military Academy has always inherited not only the knowledge of mechas, but also the spirit of companionship. The Eleventh District, which inexplicably turned into an Independent Army, has always been a hurdle that Damocles cannot overcome.

Wei San suddenly stood up and walked outside the window: "Stop."

"What stopped?" Jin Ke asked her.

Several other people also followed her gaze.

“The snow outside.” Wei San pushed open the window, and the cold wind blew in, but it was just the cold wind and the remaining ice and snow. The wind and snow that had been floating in the air suddenly stopped.

Several people crowded over and stretched out their hands to feel the outside.

“It really stopped.”

“Maybe just for a while.”

“I’ve never heard of the cold wave continuing and the wind and snow stopping first.”

While they were talking, someone also discovered this. The teachers also came out of the conference room, went down to the first floor, and walked out of the door to observe.

“Either the cold wave has stopped, or the cold wave is gathering strength.” Jin Ke looked at the gradually fading white fog outside.

On this day, no one left the port building. People from the Fifth and Thirteenth Districts, who seemed to be hiding, began to enter and leave the building continuously.

Waiting until the third day, the news was confirmed: the cold wave had dissipated.

Wei San looked at the clearing sky outside: "I remember they said it would take several months for the cold wave to dissipate."

"Some experts speculate that it was due to a big outbreak. The cold wave compressed into a big cold wave and broke out all at once, so it was unable to follow up." Jin Ke flipped through the news that kept coming from the light brain, "We will wait for two days, if there is no problem, we can leave Fan Han star."

"Where is the Independent Army?" Liao Runing asked.

"We can't worry about it for now." Jin Ke frowned, "If they don't show up, there's no way to find them."

The cold wave dissipated all of a sudden, just like the haze in the heart dissipated, and everyone felt much better. However, teachers and organizers from the five military academies are busy, contacting local power representatives to prepare for the selection of the next competition venue, and there is also the matter of the departure of two military region teams.

The starship from the Fifth District was hijacked and they wanted to return to Huanye Star. Ying Yuerong borrowed a starship from the top management of Fan Han star to send the people from the Fifth District to the star system near Huanye Star.

After waiting for two days, the white fog completely dissipated.

The venue selection activity for the competition also officially began. The five military academies gathered again, but people from the two military regions who had not yet left stood around in case the Independent Army appeared.

"I hope we can draw a more relaxed arena." Liao Runing clasped his hands together and bowed, then clenched his fingers and nodded his forehead and chest, "Amen."

"Didn't you say that the further the competition continues, the harder the competition becomes?" Wei San asked in confusion.

"That's the saying alright, but there are a few that are relatively simple." Liao Runing whispered to her, "The one over at South Percy Star is a little simpler."

Jin Ke lowered his head and glanced at the Imperial Military Academy. Ying Xingjue, standing at the front, was as calm and self-possessed as ever.

"What are you looking at?" Huo Xuanshan asked him in a low voice.

Jin Ke looked at the other four pairs of eyes sweeping over him: "....."

He clicked on the group chat with the five and sent a message.

Jin family is rich: [That doctor is dead. 】

Master Liao: [What doctor? 】

Secretly Begging for food : [That ugly guy? 】

Jin family is rich: [Yes, I asked people to pay attention to him before. The doctor was discovered to be an Independent soldier two days ago. He wanted to kill his colleagues, but he was killed by the patrol team. 】

Master Chenghe: [Another Independent Army? Wei San said he was ugly. Could it be that she saw something was wrong with the Independent Army? 】

Secretly begging for food: [No, I simply think he is ugly. 】

Huo Xixi: [Ying Xingjue and you are both super level 3S, and neither of you had a good impression of this doctor. This is not right. 】

Master Liao: [The Independent Army and we are all the same, people, we can't just say those who are ugly are the Independent Army. Besides, looking at the photo, the chief adjutant from the Fifth District is obviously pretty good-looking. 】

Secretly begging for foodt: [en..... not ugly. 】

The five people lowered their heads and used their light brains to send messages in public. It was difficult for Xiang Minghua not to notice. He walked over quietly. The light brains of the other four people all had their own privacy functions. He couldn't see them, but Wei San's light brain only hid her id.

Xiang Minghua approached, and Wei San quickly turned off her light brain, but he still saw the last sentence, "It's not ugly."

"What are you all doing again? We're about to draw the next arena, but you're still not nervous at all!" Xiang Minghua simply hated the iron for not forming steel.

"We're not." Wei San tried to quibble, "We are waiting nervously."

Xiang Minghua snorted coldly: "Don't think that winning a championship will be the end of this. There are so many competitions ahead, enough for you to suffer through."

During the reprimand, the local representative on the stage had already come on stage, briefly said a few encouraging words, and then began to draw the next field.

The names of galaxies on the light screen kept scrolling until the representative said to stop.

【Sita Star】

Liao Runing looked up and immediately held his head: “How could this be?”

Wei San looked at the name and didn’t see any specific characteristics. The arena was full of towers?

“Most of the area of Sita Star is ocean and cliffs, which is not friendly to heavy mechas.” Jin Ke explained, “Furthermore, there are flying star beasts in the sky of Sita Star, and there are star beast attacks in the sea water, so it is a more suitable arena for light mechas.” The most important thing is that in previous years the organizer would only provide one starship and put it in the drawn combat readiness package. Others who did not draw had to find their own way to cross the sea.”

“I think we are lucky and we will definitely draw the ship.” Liao Runing cheered himself up.

A few people didn’t say anything. They didn’t know whether their luck was good or not. If they counted on this, there was basically no chance.

Huo Xuanshan looked at the light projection and said only: “I just hope that the Imperial Military Academy will not draw the starship.”

The starship is extremely hard, and more importantly, the hull is entirely made of 3S-level star beast materials, and even has the skeleton of a mutated super-3S-level star beast. The pressure it brings can prevent attacks from star beasts below 3S level in sea water. The military academy that drew this ship in previous years was basically a sure winner.

Chapter 440

“This is the starship from previous years.” After returning to the dormitory, Jin Ke took out the information collected and summarized from previous years and displayed it to several people.

“The ships in every session are the same.” Wei San looked at the photos.

“They are all the same ship, basically replaced every ten years, unless the starship is seriously damaged.” Jin Ke turned to a photo, “The outer shell of this ship is still the same, but everything inside has been replaced. Six years ago, Samuel Military Academy won the starship, and the Imperial Military Academy forced its way in. While fighting for control, the interior was burned down.”

“The materials of these shells are all real mutant turtle shells, which are only on Situ Star.” Ying Chenghe stretched out his hand to enlarge the texture of the starship shell in the photo, “In addition, the surface coating of the shell is made of the mutant plant fluid.”

“Didn’t you say before that the star with mutated plants was destroyed?” Wei San asked him.

“Before it was destroyed, some materials were left behind. They collected a lot of fluids. They were originally used for research in the laboratory and were later used for material. They can repel some star beasts.” Ying Chenghe explained.

The cold wave stopped suddenly, but the competition still needed to be carried out. All the people in the military academy began to return to their original state. Huo Xuanshan and Liao Runing were wandering around the living room, calling it a training session. Wei San was reading the information compiled by Ying Chenghe, while Ying Chenghe logged into her account and answered questions on the Rubik’s Cube forum.

Jin Ke was sitting alone on the sofa, and continued to look through the previous game videos and commentary for Situ Star, but it was obvious that he was not looking very seriously and was a little distracted.

He raised his hand and moved the light projection aside, and his eyes fell on Wei San. The doctor was an Independent soldier. One super 3S attacked him, and another super 3S thought he was ugly.

Jin Ke pondered for a moment and spent the whole afternoon looking for a photo. He removed the photo privacy and looked up to find Wei San. She was no longer in the living room.

“Who is this? He’s pretty good-looking, the one you like?” Liao Runing was jogging in the living room all afternoon and was about to take a rest when he saw the photo on his computer as he passed by.

Jin Ke: “.....”

“Who likes someone?” Wei San came out of the room with the drawings. Hearing the second half of Liao Runing’s words, she also joined in the gossip.

Jin Ke asked her to take a look at a photo: “What do you think she looks like?”

“She looks good.” Wei San looked carefully and gave a thumbs up, “Beautiful!”

Jin Ke frowned when he heard this. This person was the nurse that Ying Xingjue attacked the first time. So Wei San just thought the doctor was ugly?

“Which military academy team member is this?” Ying Chenghe poked his head over, “Although you like her, we still won’t show mercy when we encounter her.”

Jin Ke stood up and looked at the gossiping eyes of several people in the living room: “.....she is not from the military academy. She is many years older than me.”

“You like older sisters.” Huo Xuanshan said immediately.

“No.” Jin Ke still wanted to say more, but the thoughts of the people in the living room were too distracted to pull back, so he simply went into his room.

After closing the door, Jin Ke pulled up the Independent Army doctor again and looked at his photo carefully: It seems that he looks a bit ugly when he smiles. Is he overthinking it?

.....

After winning the competition, they would leave Fan Han Star the next day. In order to avoid accidents, the five military academies rushed to Situ Star together this time and did not further stop at Fan Han Star.

“How did they get on that starship?” Liao Runing always liked to look around. When he came to the starship, he discovered that the main force of the Imperial Military Academy had followed the people from the Fifth District onto a starship.

Everyone looked over and saw Ying Xingjue and others boarding another starship and separated from the Imperial Military Academy.

Xiang Minghua told the five people to hurry up while calling the students' names, "Don't look, they are going to Huanye star as reinforcements."

"Are they not competing anymore?" Wei San asked.

"Why not compete? It's a beautiful idea. They are just going to Huanye star to help. Mainly Ying Xingjue will be helping, and the others are just training." Xiang Minghua motioned for them to hurry up.

"Then why don't we go to the Thirteenth Districts as reinforcements?" Master Liao felt that they also needed to go to the battlefield to train.
