Chapter 441

“Can this be the same?” Xiang Minghua turned his head and looked over there, “The Thirteenth District can still hold on, and there is no need for students like you to go. The Fifth District is different. This time the defense line is loosened, and Ying Yuerong and Ying Xingjue must fight.”

Both of them are experienced commanders. Now they are leading the reinforcement team and can enter the state as quickly as possible. As for the few who are left to follow, it is purely the result of the game between the various families in the Imperial City.

Huanye Star is the easiest place to become famous, and of course it is also the easiest place to get into trouble.

Xiang Minghua looked at the group of students in his military academy who only cared about competition and food: “Hurry up and train hard at the Situ Star training ground, or they will come back and crush you.”

The five of them were the first to board the starship and find their own room. Wei San walked in for two seconds, then suddenly poked her head out of the room and looked at the house number next door: “Who else lives next to me?”

“It’s empty.” Liao Runing’s voice came from the unclosed room opposite.

Just as he finished speaking, the door next door opened with a click: “Looking for me?”

It's Jie Yuman.

Wei San stiffened: "Teacher, why didn't you go to District 13?"

Jie Yuman glanced at her: "I am responsible for taking care of you this year and will not leave."

"That, that Colonel Li Ze also left." Wei San stuttered.

"He goes on his path, there should always be someone here to watch you." Jie Yuman looked at the dark circles under Wei San's eyes, "What are you doing recently?"

There is no training, maybe there is a psychological problem.

"I'm not causing anything." Wei San stretched out her hand and gestured carefully, "Maybe I went to bed a little late."

Jie Yuman pointed to her room with her chin: "We're going to Situ Star later. You should head to bed now. I have something else to do and will be entertaining Master Yu."

Looking at the back of Teacher Jie walking away, Wei San subconsciously said: "What Master Yu?"

"Yu Tianhe, this time she will go with us on the starship." Ying Chenghe put down his things and leaned against the door.

“Don’t they have a special starship. If they want to go to South Percy, what’s the point of coming to us?” Liao Runing asked at the door of the room.

“The three lead commentators can sit on any starship. They can observe us by the way and have something to talk about when the time comes to explain.” Jin Ke knew a little bit, “Except for Ying Yuerong who’s heading to the Fifth District, Xi Haotian this time boarded Pingtong Academy’s starship.”

“Teacher Jie lives next door.” Huo Xuanshan looked at the door opposite and quietly touched his butt, “It’s dangerous.”

“Senior is going back to the Thirteenth District. I don’t know when we will see each other again.” Liao Runing sighed, “Fortunately, we won the championship this time.”

“There will always be a chance to meet in the future.” Wei San said.

The five people stood at the door chatting for a while, and finally returned to their room and began to rest before leaving the port.

At the same time, on board the Fifth District starship that has entered orbit.

The main team members of the Imperial Military Academy were sitting at the back of the conference room, waiting for the people from the Fifth Military Region who were about to come to the meeting.

“Huanye star is really as rumored, and the star beast is particularly difficult to deal with?” Situ Jia asked the two people who had participated in Huanye star.

Ji Chuyu slowly turned his mecha ring: “Star beasts are nothing more than those levels.”

What’s rare is that the Huanye Star has a special environment. There are various environments on the star, and the days are short and the nights are long. There are twenty-four hours in a day, and only four hours are daylight. Furthermore, the entire galaxy also has a special magnetic field. If people stay there for a long time, they will have hallucinations.

Huo Jian’s eyes fell on Ying Xingjue. Originally, only Ying Xingjue and Ji Chuyu were going for reinforcements this time. The Huo family helped him win the opportunity to follow. Later, after the Gongyi family and the Situ family found out, they also stepped forward, and applied to come.

While they were talking, the door of the conference room was pushed open, and Ying Yuerong, the captain of the Fifth District and others came in and sat at the conference table.

Chapter 442

Ying Yuerong stood at the front of the conference table, raising her hand, a light projection appeared in the middle: “According to the news from over there, the strength of the star beasts in the Fifth District’s defense line has generally increased.”

She glanced at everyone in the conference room before continuing: “This means that the star beasts are constantly evolving, and the students of the Imperial Military Academy cannot keep up and become stronger. In the end, Huanye Star can only be occupied by the star beasts.”

Huanye Star has a transcendent status in various galaxies. This is the first star that the star beasts attacked, but so far, those star beasts still have not completely occupied it. The Huanye Star represents the hope of the Federation for hundreds of years.

At first, the Huanye Star was guarded by the Thirteenth District. Later, when the Imperial Military Academy rose up, the Huanye Star was taken away and handed over to the Fifth District. This place is difficult and the casualties are high, but stationing Huanye Star symbolizes the Imperial Military Academy's all-round crushing of Damocles Military Academy.

"How have the other star beasts on the defense line changed?" Ying Xingjue raised his eyes and asked.

Everyone in front of the conference table turned to look at them. Some of them had fought with Ying Xingjue a few years ago, with admiration in their eyes. Others were indifferent to him, thinking that what happened back then was just widespread false propaganda.

"We have only obtained research data from the Second District and several military districts from South Percy. Only the strength of the star beasts in the Fifth District is changing for the time being." Ying Yuerong called up several videos from the Fifth District. "This was recorded when they were fighting."

At first, the picture was so dark that it was basically difficult to see what was inside. Later Ying Yuerong adjusted something. The picture suddenly became much clearer, and the star beast inside could be seen clearly.

The surface of the star beast's body is extremely sticky, and it is clearly on land, but it has tentacles. As soon as the tentacles moved, the sticky liquid was thrown everywhere. Once the mecha was stained, it was immediately corroded into spots.

The camera was shaking violently. It was obvious that this lens was mounted on a combat mecha.

The person piloting the mecha is familiar with this kind of star beast and is extremely skilled in handling it. Every attack can cause damage to it. The few military students sitting behind the conference table felt slightly less disgusted when they saw that the people in the military area could deal with these star beasts. However, in the next second, the dying star beast suddenly rose up, opened its mouth wide, and spat out a stream of mucus, accurately hitting the mecha cabin.

The slime corroded the shell of the mecha cabin, and the panic sound of the person inside could be heard in the video. They were probably trying to escape from the mecha cabin, but they happened to face the star beast, and the star beast bit off their necks and chewed their bodies.

“.....”

There was silence in the conference room. Situ Jia and Gong Yijue saw this kind of video for the first time, and their expressions were extremely ugly, especially after hearing the frightened final cry for help from the mecha soldier in the video.

Ying Yuerong glanced at the military students behind her and continued to another video.

Each video means that the person in the video has died, and the death is miserable. There are also people at the conference table who lower their heads and have distracted eyes.

Gong Yijue couldn't help it and got up to go out.

Ying Yuerong shouted: "Come back and continue watching."

Gong Yijue's eyes were evasive, very resistant, and his hand was still on the door of the conference room.

"Or else I'll ask them to stop now and send you back to the Imperial Military Academy starship." Ying Yuerong said coldly.

Gong Yijue gritted his teeth and let go of his hand, sat back, and looked at Ying Xingjue next to him. His expression had not changed at all from the beginning to the end.

"The strength of these star beasts has remained within a certain range for many years. The few who died were all double S-level and above mecha soldiers with rich experience. The first one was already in the third round of Huanye Star. He was originally going to retire in one month." Ying Yuerong turned off the light brain, "The lab thinks it's because too many masters have died on Huanye Star in recent years. While we are widening the defense line, our people are also becoming star beasts' rations. The beast's rations lead to the accelerated evolution and mutation of the star beast."

"Since you guys were insistent on coming this time, I hope you will forget your identity as students. When you get to the battlefield, there is only one thing to do: fight. No one cares who you are." Ying Yuerong looked at the five of them, "This is not the gold-plated district you think it is."

Chapter 443

"What's this?"

Ying Chenghe brought a bunch of newly compiled information to Wei San and saw the drawings on her table, S-class mecha, but some parts looked strange.

“S-class mecha.” Wei San blocked her nose and said in a loud voice.

After Ying Chenghe heard her voice, he realized that Wei San was bleeding from the nose again: “have you had your doctor’s appointment? Why is your nose still bleeding?”

“I’ll go to the doctor later.” Wei San also had messy hair, which is no different from Ying Chenghe. It’s a common problem among researchers. They focused on design and had no intention of taking care of themselves.

Ying Chenghe subconsciously took back the information in his hand and was held down by Wei San: “What direction is it going in this time?”

“Engine, some of it is something I have learned before, it can be regarded as Gong Yiliu’s theory.” Ying Chenghe put it down again, “You have omitted some basic knowledge, so you should pay attention, but the most important thing to pay attention to now is your body.”

“I know.” Wei San finished the last stroke, stood up, put on her coat, and casually scratched her hair, “I won’t look at it now. I’m going to the doctors.”

Ying Chenghe also followed her out and looked at Wei San’s wrist: “Do I need to take out the micro recording chip?”

“Yes, Dr. Jing said he wanted to take it off to see my data in the extremely cold arena.” Wei San just blocked one side of her nose and walked to the starship infirmary.

The micro recording instrument has been recording in Wei San's body, but the signal disappeared before and the doctor could no longer see it. Some time later, the doctor went to his senior sister's side again and had no time to take out the instrument chip.

Wei San lowered her head, still thinking about the structure on the previous drawing, and didn't notice the person coming towards her.

It wasn't until the person opposite called her: "Wei San?"

Wei San looked up and saw Yu Tianhe.

"What's wrong with your nose? Are you still fighting on the starship?" Yu Tianhe asked with a smile.

Wei San raised her hand and felt her nose, which was still stuffed with a ball of paper, and made up an excuse at random: "I accidentally hit the wall."

Yu Tianhe smiled softly: "Be careful next time." After that, she walked forward and left.

This is the first time Wei San has seen such a gentle-spoken senior. The teachers at Damocles Military Academy are very cruel to them!

Walking to the door of the infirmary, Wei San reached out and knocked on the door, took off the paper ball on her nose and threw it away.

"Come in." Jing Ti said.

After Wei San entered, Jing Ti motioned for her to sit down. He was taking apart disposable tools: "Have you had a nosebleed again recently?"

"En."

Jing Ti picked up an alcohol cotton ball with tweezers and wiped the blood stain under Wei San's nose: "Not long ago, I received Ying Xingjue's nutrient solution formula, but it's a pity that you can't use it."

"Why not?" Wei San raised her head and let him wipe it clean.

"His body is more seriously damaged." He said casually as he threw the alcohol cotton ball into the medical trash can.

Wei San frowned: "The damage is more serious? My body was also damaged?"

Jing Ti paused and raised his eyes: "You have been malnourished for so many years, does it not count as destroyed? If you take care of yourself, you should be able to recuperate."

"I remember you said before that Ying Xingjue's body collapsed because he couldn't get the elements he needed." Wei San said, "Shouldn't he also be able to make up for it. It's not like he was poisoned."

"It's different. You're a soldier, and he's a commander." Jing Ti pointed to his head, "he's injured here. Stretch out your hand."

Wei San stretched out her hand, he slit the skin he had cut before, and pulled out the chip inside.

"When you were in the arena, the signal was cut off, so I could only take it out directly to check. I will export the data and put it back again." Jing Ti directly applied medicine to the cut on Wei San's wrist. "Come back at this time tomorrow."

"You can't put it back in now?" Wei San raised her head and asked him.

"It will take a certain amount of time to export the data. I'm not sure whether the recording instrument is broken yet. You go back and do your work first." Jing Ti dug out a pile of nutrient solution from the box at the back. "Take this out and drink it. It's newly improved, try the effect."

Wei San looked at the pink nutrient solution with disgust: "Strawberry flavor?"

Chapter 444

"Watermelon flavor." Jing Ti pointed at the door of the infirmary, "Go back quickly, there are many things to do."

Wei San walked back with a pile of watermelon-flavored nutrient solution, and opened one to taste it. It was indeed watermelon-flavored.

She closed the door, cleaned the blood on the surface of the chip, put it in the reading box, and connected it to the light brain. After a while, she took out the instrument chip and put it aside.

There is a bunch of data on Wei San's previous extreme cold competition on the light brain. Twenty-four hours a day, it is as calm as if the instrument is broken.

Jing Ti continued to move down and the nodes were calculated. This should be around the first time Damocles Military Academy encountered the cold wave. Wei San's data was still a straight line without any fluctuations, as if she had calmed down. Old Monk, When you are in concentration, there is no emotion at all. Be it perception or heartbeat.

Jing Ti who has been a doctor for many years: "....."

He kept scrolling and finally found something strange. Wei San's perception suddenly broke out at a node, and it suddenly increased. It lasted for more than an hour. Even after the increase, it continued to increase, and then there was another flat line, causing him to suspect that the instrument was broken.

Jing Ti calculated the time. This time point of the outbreak happened to be the time point when the military area entered and noticed the fluctuation.

It turns out that the person who made the noise was Wei San?

Jing Lai thought for a while and started communicating with Xiang Minghua.

“What was Wei San’s condition at that time?” Xiang Minghua asked without hesitation, “When we went there, she fell on the ice and snow. She slept for a while, and there was nothing abnormal when she woke up. Is there something wrong with her body?”

“No, I’m just asking. The noise in the extreme cold arena seems to have been caused by her.”

“It’s almost the first time she and Ying Xingjue have collaborated.” Xiang Minghua said, “It’s really amazing.”

They did not see the vortex controlled by the gray formless matter, and could only see the little video recorded by Wei San. Even so, they could see that those things were difficult to deal with.

According to Jin Ke, the first collaboration between two super 3S level players was truly shocking.

“Alright, I know.” Jing Ti ended the communication, turned his chair, and went to get the chip he just took out from Wei San’s wrist.

.....

“Promoted one level.” Ying Chenghe held the light brain and went to Wei San’s room.

“What level?” Wei San turned to look at him

“.....” Ying Chenghe looked at Wei San’s messy half-length hair and the paper ball stuffed in her nose, and for a moment he suspected that he was still in yesterday.

Wei San stood up and took a look: “What is the level at on the Rubik’s Cube Forum? What are the additional sections?”

“There aren’t many sections, it’s still S-level content, but there is more content in each section. I looked at the S-level mecha masters in it and they are pretty good. They can barely be compared with the S-level mecha masters in our military academy. Ying Chenghe sat down and asked Wei San to read together, “As long as you answer more questions and open source more design data here, it will be easier to move up the level.”

“You posted a complete S-class mecha data?” Wei San asked after flipping through it.

Ying Chenghe nodded: “I used the principle design that I discussed with you before, and if someone discovered it, it wouldn’t involve Damocles. After I sent it out, I immediately upgraded it. Since I can upgrade to L3, there must be more high grades on it.”

Wei San looked at the mecha model above and suddenly asked Ying Chenghe: “Where did you discover this forum?”

“I heard someone mention it once in a forum, and I searched for it for a long time before I found it.” Ying Chenghe recalled that at first he just wanted to decompress it, and it was full of A-level stuff. In his

opinion, it was just asking 1 + 1 is equal to what, who would have thought that it could be upgraded inside.

“I also found it from outside forums.” Wei San said, “If you ask other mecha masters in the school, basically not many people know about it.”

“It’s probably a forum established by people who are away from school.” Ying Chenghe guessed.

The two of them wanted to say something else, but Jin Ke knocked on the door and came in with two packages in his hand: “Master Yu brought them, saying they were the specialties of South Pasi that he had prepared before, but they never had the chance to deliver them. What were you discussing just now?” “

Wei San gave him a few summary sentences.

Jin Ke sat down with two bags of things in his arms and said thoughtfully: “According to what you said, this forum is screening.”

Wei San and Ying Chenghe both looked at him, but the next second they reached out and snatched the specialty product from Jin Ke’s hand.

Jin Ke looked at the two people who were lowering their heads to open their bags and said slowly: “Normal military cadets wouldn’t find this kind of forum. Cheng He, do you think Gong Yijue would know about this kind of forum?”

“No.” Ying Chenghe said without hesitation. Gong Yijue was an orthodox mecha master from a famous family that couldn’t be more orthodox. He would never waste time on this.

“You discovered this forum but never upgraded. Instead, she upgraded.” Jin Ke looked at Wei San, “Answer questions for Class A when you have time, release the source mecha data..... Wei San did these things before she upgraded, and found out the other side of the forum. The purpose behind this forum may be to select a group of mecha masters who have no hierarchy and are willing to share their achievements.”

Ying Chenghe suddenly understood: “No wonder the open source mecha data was released and upgraded immediately.”

Jin Ke looked at the account and said disgustedly: “What kind of ID is this?”

“Close to life ID.” Wei San opened Yu Tianhe Fen’s specialties, “Then let’s continue going up and see if there are any other powerful mecha masters inside. Maybe we can learn something.”

The few people didn’t take this matter too seriously. The Federation had official military schools and aristocratic families who were studying abroad, so naturally there were non-governmental organizations.

Chapter 445

Wei San talked with the two people for a while and then went to the doctor. Jin Ke and Ying Chenghe said they wanted to go with her.

“What are you doing?” Huo Xuanshan asked when he saw the three people walking out together.

“Going to the doctor.” Wei San expressed her contempt for the two people sticking to her.

“I’ll go with you.” Huo Xuanshan immediately stood behind.

Liao Runing opened the door: “Wherever you go, I’ll go with you.”

Wei San: “.....”

Finally, Wei San, like a mother chicken, followed by a string of chickens, arrived at the door of the infirmary.

“It’s you again.” Jing Ti looked at the group behind Wei San and said disgustedly, “Why do you always have a bunch of people following here every time.”

“Doctor, we are just worried that Wei San is scared, so we came together to comfort her.” Liao Runing said sternly.

“This is such a trivial matter, what is a mecha soldier afraid of?” Jing Ti motioned to Wei San to extend her hand, “Are you afraid?”

Wei San glanced behind her: “.....I’m afraid.”

Jing Ti: “.....Fine.”

Wei San: These idiots are obviously out to have fun.

The recording chip was put back in, and Jing Ti took off his gloves: “I looked at your data, and there was only one burst. The other times were the same as usual. I guess you should have burst into super-3S level perception at that time.”

“Probably.” Wei San was not sure either.

Jing Ti looked at Jin Ke behind him: “You just happened to come over. I heard from Teacher Xiang that this is the first time that you are all present, and Jin Ke is also behind you. Do you feel anything?”

“Super 3S level ability?” Liao Runing was the first to speak out, “It seemed that some terrible power was awakened at that time, but it disappeared quickly. Was it because Wei San’s perception exploded?”

“I noticed it too, but Wei San was very sober at that time.” Huo Xuanshan said.

“Disappeared quickly?” Jing Ti felt his chin thoughtfully, “From the moment she broke out to the moment she disappeared, it lasted for a while, not just one second.”

Jin Ke frowned: "Ying Xingjue."

Jing Ti paused: "Ying Xingjue?"

Jin Ke came to his senses: "Ying Xingjue was also there at the time. Could it be that the chip in Wei San's body recorded his sensory fluctuations?"

"No, this instrument chip will only record Wei Sans." Jing Ti glanced at Wei San, "Maybe she stayed awake, so you only noticed the momentary explosion."

After placing the chip back, Dr. Jing Ti let them leave.

The five people went out in silence all the way to the corridor of the room. They walked to Wei San's room in tacit agreement.

"What did you want to say just now?" Wei San was the last to enter the room and closed the door and asked Jin Ke.

"We were outside at the time, and your perception exploded. I noticed that Ying Xingjue's perception expanded the range." Jin Ke said. At that time, others only knew that Ying Xingjue's materialized barrier was around the aircraft, and did not notice any abnormalities, and even He himself had doubts. "The moment he sensed the abnormal movement, I was in a situation where I could no longer detect your perception."

Ying Chenghe was confused: “But my cousin doesn’t know that Wei San is a super 3S, besides, why should he cover it up for her?”

Jin Ke shook his head. He couldn’t understand it himself, but he was sure of one thing. Before he discovers Ying Xingjue’s intentions, there was no need to let doctors or others know about these things.

Wei San sat by the bed: “Ying Xingjue..... seemed to believe that I could solve the giant gray wall.”

“Gray?” Jin Ke frowned subconsciously, “Are you color blind? That’s obviously white.”

Wei San: “.....You’re color-blind. The vortex makes up such a huge gray wall that you can even see the colors.”

“The vortexes are white. They are still white behind the wall. What you see should be the gray shapeless matter inside.” Jin Ke pulled up a chair.

“No, it’s all gray.”

The remaining three people watched the two people arguing, not knowing who’s side to stand on. At that time, the only people outside were the two of them and Ying Xingjue, and no one else could see clearly through the window.

Finally Wei San said: “let’s wait until Ying Xingjue arrives at Sita Star and ask him.”

“He may not pay attention to you.” Jin Ke couldn’t help but think of the communication he originally sent to Ying Xingjue, and curled his lips.

“Anyway, I have to ask him.” Wei San put her feet up, put her arms on her legs, and said casually with her chin in his hand, “By the way, I want to ask him if he has shielded for me.”

“Would be strange if he did say.” Jin Ke could already see Wei San’s rejected look, “Oh, I am the only kind-hearted person among the commanders.”

The other four people all groaned.

.....

When the military academies arrived at Sita Star, the Fifth District also took a starship to arrive at the anchoring star near the Huanye Galaxy.

“Everyone disembarks and takes the warship from the Fifth District to Huanye Star.” Ying Yuerong stood at the front. “After entering Huanye Star, there is only life or death.”

Except for Ying Xingjue, even Ji Chuyu, who came here for the second time, was not in a calm mood.

The anchoring star was some distance away from the Huanye Star. On the way, Situ Jia saw batch after batch of warships coming from behind and accelerated forward. There are also batches of returning warships.

Most of these returning warships were riddled with holes. He even saw a warship swaying in the distance, and finally exploded in the air, killing all those who did not pilot the mecha in time.

“Should we rescue them?” Situ Jia turned to ask Ying Xingjue, who was also standing in front of the window.

The flames of the exploding warship were reflected in Ying Xingjue’s eyes, and he whispered: “We are on different paths.”

Situ Jia wanted to say something else, but when he saw a returning warship ahead and turned around to pick up those who had escaped, he stopped saying anything.

The closer they get to Huanye Star, the more similar situations occur. Situ Jia still doesn’t understand why this happens.

“To reach Huanye Star, you first need to cross the tide of star beasts. Similarly if you want to return, you still need to go through a battle before you can return.” Ji Chuyu has been here before and knows what’s going on.

“Why not clear this line of defense?” Gongyi Jue asked.

“The cleanup is endless. The star beasts of Huanye Star know that we come and go here.” Ji Chuyu said expressionlessly, “Kill a group of star beasts, and a new batch of star beasts will appear.”

The star beasts of Huanye Star have extremely strong reproductive capacity, several times faster than the star beasts in ordinary galaxies. This is why this star is so difficult to defend. The laboratory spent a long time researching, trying to capture the star beasts and sterilize them. , artificially creating a breeding gap for star beasts, but unfortunately the effect is not great.

Huanye Star itself has great competition among star beasts, and some star beasts have been devoured by other star beasts before they can even reproduce. It was extremely difficult to catch a living star beast, so in the end this method had to be abandoned.

As they spoke, they had already arrived at the star beast tide that stretched across the Huanye Star Military Region.

Not only are there star beasts below, but there are also a large number of flying star beasts around them. As soon as they fall within the range, they will be attacked by them immediately.

Sure enough, as soon as the warship descended, the flying star beast seemed to sense that there were people with better levels inside, and rushed towards it crazily.

“Are we going out?” Situ Jia couldn’t help but ask, clasping his hands tightly and getting ready to fight.

“No need.” Ying Xingjue looked at Ying Yuerong at the front, she entered the mecha and went out.

Ying Yuerong stood alone in front of the warship, without any protection except the mecha, and there were no individual mecha soldiers around her. When a commander reaches their highest point, they basically no longer need the protection of individual mecha soldiers.

She raised her hand, released her senses, and directly attacked these flying star beasts.

Various flying star beasts began to scream in mid-air, and some even fell directly. Situ Jia followed the falling flying star beasts downwards and found that as soon as they fell, they were immediately torn apart and eaten by the star beasts below.

Flying star beasts from a distance were still flying over in a steady stream, Ying Yuerong only created a gap for the warship to let them in.

After creating a gap of a few seconds, she returned to the warship. The warship enters the protective range of Huanye Star, and the flying star beast chasing behind it will be shot down immediately once it enters the range of the military zone.

“Commander-in-Chief!”

As soon as Ying Yuerong landed, someone came over to salute and shout.

“I am just the reinforcement commander. This is the commander Ying Xingjue.” Ying Yuerong only introduced him. In her eyes, the others were not qualified enough for her to introduce.

“Commander Ying!” The other party said their greetings and led them in. “The star beasts in the southeast have been rioting frequently recently.”

“If I remember correctly, there was also a riot in the southeast when you came here before?” Ying Yuerong turned to ask Ying Xingjue.

“Yes.” Ying Xingjue nodded, “We trample everything for a hundred miles to the southeast.”

When he came here that year, Ying Yuerong had already gone to the Second District and didn’t witness it with her own eyes.

“So, in that case, the star beasts in the southeast reproduce faster than expected.” Ying Yuerong looked at him, “Then this time you still reinforce the southeast and take them with you.”

She looked back to see how many people from the Imperial Military Academy were following this time.

Ying Xingjue did not refuse.

Chapter 447

Huanye Star was filled in darkness all year round, and the air was filled with an indescribable scent, the smell of blood, silt, sea water, and even the smell of rotting corpses mixed in together.

If one had to use one word to describe the smell of this star, they could only use ‘dark’.

On the first day here, students from Imperial Military Academy couldn't fall asleep.

Ying Xingjue was watching videos on the starnet. The most popular videos in the Federation recently were all from Damocles.

The first ranked was still the admissions video recorded by Wei San from the extremely cold stadium, and the number of people leaving messages was still increasing every second.

Ying Xingjue watched it once before, but still clicked into it again.

Staring at the mecha in the video, he was a little distracted, mindlessly emptying his mind and rarely thinking about anything.

After the video had finished playing for a long time, Ying Xingjue came back to his senses and clicked on the second video on the ranking list.

This was what they saw on the podium. There was only one podium at a military academy, and there were only official shots and no media around.

Ying Xingjue watched Wei San ask him the secret of his hair care, and subconsciously looked down at his hair, wondering why this attracted Wei San's attention.

At the time he thought she would at least be as defiant as usual and say something about how Damocles would win next time.

Ying Xingjue raised his head and looked at the five people with smiles on their faces in the video. The people from the Imperial Military Academy were also happy when they won the championship, but they seemed different from them.

Ying Xingjue scrolled through his light brain and clicked on a new trending video, which he had not watched yet.

When he clicked on it, he discovered that it was a video of a media interview this morning, at Sita Star Port.

At the beginning of the video, countless people from Sita Star were waiting outside, and the camera was specifically focused on these people. They held banners in their hands to celebrate Damocles Military Academy winning the division championship, and some kept shouting Wei San's name.

Ying Xingjue looked at the people in the video. Judging from their facial features, they were locals from Sita Star, not Sadu Star.

In the past, it seems that even the Imperial Military Academy has not been welcomed by so many people, especially since there is no military district behind the sSadu Star, and the schools have always been treated with indifference. It's just that the training ground is vacated every time, so that schools can come in to compete and clean up the star beasts.

As soon as the people from Damocles Military Academy came out, they were warmly welcomed by various media, and they rushed forward for interviews.

“Wei San, may I ask, did anything interesting happen to you during the Great Cold Wave? I heard that you have been together with the Imperial Military Academy the entire time.”

Ying Xingjue quietly looked at Wei San in the camera, wanting to hear what she thought of the time she spent with the Imperial Military Academy.

Wei San accepted the microphone from Lanfa Media and coughed: “You media should be more rigorous in your wording. What does it mean to be together? We were staying together.”

The media outlet that was contacted took the call seriously and immediately changed their tune: “Yes, yes, stay together. Is there anything interesting that happened between you two?”

“There is.” Wei San suddenly looked towards the camera.

At this moment, Ying Xingjue thought she was looking at him, and his heart skipped an inexplicable jump.

“Excuse me, what is it?” The media’s voice was a little louder, as if they were waiting for some explosive news material.

“When the big cold wave came, the commander of the Imperial Military Academy commanded one person to protect the entire large aircraft. His senses were very powerful.” Wei San changed the subject, “But my sword is even more powerful. It’s a pity that you guys didn’t see it.”

She used it skillfully to suppress the desire to advance.

That sword was indeed powerful. Ying Xingjue lowered his eyes and recalled the scene when she stepped on the huge gray wall in the extremely cold arena that day.

“Xingjue.” Ying Yuerong’s voice came from outside the door.

Ying Xingjue quickly turned off the computer, stood up and opened the door: “Second aunt.”

Chapter 448

Ying Yuerong walked in: “I’m going to the southeast defense line tomorrow. How is your health?”

“There are no issues..” Ying Xingjue stood at the door, his left hand gently resting on his right wrist behind his back, unconsciously covering up his light brain on his wrist.

“Before on Fan Han Star, I never had time to ask you what happened to Wei San. I heard that you two were alone?” Ying Yuerong looked at the nephew who was already half a head taller than her.

“When we were separated from the school team, I happened to run into her, and later we found the two military schools together.” Ying Xingjue lowered his eyes and said.

“That Wei San has a bit of an evil streak.” Ying Yuerong frowned, “I’m afraid it is her as the variable that prevented the Imperial Military Academy from winning the championship. I don’t believe it at all when she said she went to Damocles Military Academy because of its low tuition fees.”

Ying Xingjue stared at the floor under his feet without making a sound. Wei San was a super 3S-level soldier. If she showed her strength like she did in the extremely cold arena before, she would really embarrass the Imperial Military Academy. Moreover, his perception could not be used to suppress her.

“Forget it, I shouldn’t tell you this, just do your best.” Ying Yuerong handed him a small iron box, “Your father asked me to pass this to you.”

Ying Xingjue lowered his head and opened it. Inside the box was a platinum token. He paused and looked up at Ying Yuerong: “Father, he.....”

“Put it away and don’t let others see it.” Ying Yuerong watched him put the box away and walked out of the door, “In ten days, I will send someone to bring you to Sita Star.”

Ying Xingjue closed the door, took out the box, and looked down at the Platinum Token inside. This platinum order is the symbol of the head of the Ying family. His father gave it to him at this time. The most important thing is that it only has one function.

——it commands ten 3S-level mecha soldiers in the escort team.

Prior to this, Ying Qingdao had always shown that he put interests first in the First District. The ten 3S-level mecha soldiers were his representatives of surrender to the First District, and they could even be used to monitor his son.

Ying Xingjue closed the box. His father might not know the true ability of the super 3S level Soldiers. Ten 3S level mecha soldiers could not threaten him unless he was voluntarily trapped.

.....

The next day, Ying Xingjue and Ying Yuerong led the teams separately. He brought the main team of the Imperial Military Academy and the fifth district army to the southeastern defense line.

In order to prevent being attacked by flying star beasts in the sky, they did not have aircraft and had to go out through the gate of the military area.

“Huanye Star only has 4 hours of daylight in a day. We can use these 4 hours to recuperate and rest, but at other times we have to face endless star beasts.” Ying Xingjue mainly spoke with Huo Jian and the others who came to Huanye Star for the first time.

There were people in the team behind who heard him speak. These people were basically replaced by the new batch and were not people from the military region a few years ago. Corresponding to the arrival and leadership of Xingjue, the team was filled with distrust.

They didn’t trust Ying Xingjue to be able to lead such a large team, especially on Huanye Star.

Even though he had achieved success before, these people had never seen it with their own eyes and only regarded it as rumors. As for whether the rumors are true or false, he can only freely prove them.

“Commander Ying, we all know this.” The young officer who was obviously the leader said, emphasizing the word ‘Ying’, “I know you are kind-hearted to explain to these people, but the situation is urgent now, everyone should go there to understand on the battlefield, there’s no time to waste.”

After hearing this, Huo Jian and the others wanted to take action, but were blocked by Ying Xingjue. He didn’t care about this. The controversy he faced a few years ago was louder than they were today. He just had to do his own thing.

The team integrated into the shape of a sharp sword and rushed toward the southeast. Less than five kilometers away from the gate of the military area, they encountered a wave of star beasts.

Ying Xingjue separated the main force from the rear army to fight. The people in the army probably wanted to show off their competition, and they were extremely ruthless. Although it was the first time for several people from the Imperial Military Academy to go to the battlefield, Ying Xingjue was here and all they had to do was follow his orders.

The speed of killing the star beasts on both sides was extremely fast. The S-class officers in the military area led their teams to frantically harvest the star beasts. However, even if they were experienced, they could not avoid casualties.

Chapter 449

Some people were unaware and fell into the siege of the star beasts, and their mechas were torn to pieces. Those star beasts are cunning, knowing that the mecha soldiers are near the mecha cabin, they will bite or scratch them into pieces, or kill the mecha soldiers in the mecha cabin, or wait for the mecha soldiers to escape and then slap them with their claws.

The screams of the star beasts and the screams of humans were intertwined in the surroundings. Situ Jia had never heard such screams with his own ears. Even the last time, he only heard the sounds from the video.

There was another screech, the sound started sharp and high, then stopped suddenly, and became muffled.

For the first time, Situ Jia hated that his ears were too sensitive. He even heard the man muttering that he was in pain, didn't want to die, and wanted to go home.

"What are you doing?" Huo Jian cut off the claw of a star beast on Situ Jia's side and shouted sharply, "Focus!"

If Situ Jia was focused at this moment, he would find that Huo Jian was just trying to calm down, with an imperceptible tremor in his voice.

Just after leaving the gate of the military area, someone was killed, which is completely different from the competition. It's not a game that can be stopped by pressing the out button, and there are no rescuers coming to save them.

Gong Yijue stood behind Ying Xingjue. There were no star beasts around him. In other words, the star beasts around him were ready to attack them. However, due to Ying Xingjue's perception, they did not dare to step forward and could only roar from the outside.

Ying Xingjue was counting down the time. After ten minutes, he asked everyone to return to the team and move on.

“How do we deal with this situation?” The officer of the team cut off the head of a star beast and said through gritted teeth, “They have completely blocked our way.”

Ying Xingjue glanced at him lightly and raised his hand to attack the surrounding star beasts. It seemed that he just moved his fingers, and the surrounding star beasts roared and retreated, obviously encountering some kind of threat.

The captain of the military region was speechless. There were powerful commanders in the military region. They could easily control the surrounding star beasts with their hands raised, but they were not at the level they could see.

“Let’s go.” Ying Xingjue looked at the darkness in front of him. “All the heavy mechas stand in front, and the medium mechas stand guard behind them. The light mechas should all spread out in the air, and continue to accurately attack the entangled mechas below.”

“There are flying star beasts in the sky.” A light mecha soldier said. If they only look down below, what about their own lives?

Ji Chuyu frowned slightly and stared at the light mecha soldier who was speaking: “When other commanders lead the team, are you also so undisciplined?”

The light mecha soldiers were suppressed by his momentum and had to fly up. Other light mecha soldiers also started to move one after another.

Ying Xingjue stood in the middle and followed the team.

In fact, the flying star beasts in mid-air could not get close to them at all. Ying Xingjue used his perception to return the mental attacks of these flying star beasts next to them one by one.

As they walked further back, the light mecha soldiers in mid-air realized that they were the safest.

There was no rest on the battlefield. They rushed to the southeast, but in fact they fought all the way through without any rest time from beginning to end. Unlike in the competition, where they could chase the star beasts, now a group of star beasts surrounded them.

Situ Jia flew in mid-air, trying very hard to suppress himself and not pay attention to the screaming people below, but every time he couldn't help but look, the haze in his heart became heavier and heavier.

After several hours of fighting, they were like a propelled meat grinder, mincing the star beasts and their own people into pieces, and they didn't even have time to look back.

Gong Yijue, Situ Jia, Huo Jian..... started to become numb and no longer glanced at those people who died screaming.

On the contrary, some people in the team who often came out to fight began to get more and more excited as they killed.

Ying Xingjue's command is simply a natural barrier that can protect most people and make those star beasts fearful. They took action without any worries.

From 6 a.m. to 3 p.m., everyone didn't stop fighting the star beast, and finally reached the southeast.

Gong Yijue looked forward and couldn't help but take a breath: there were countless times more star beasts here than he had seen before. Even in the dark, he could see the densely glowing eyes of these star beasts.

"There are more than when we first came." Ji Chuyu looked at the star beasts opposite and commented to Ying Xingjue.

Ying Xingjue looked past the star beasts and looked into the darker place: "Notify the military region to send reinforcements."

The captain of the military region frowned subconsciously. There were quite a few of them, ten thousand people. Even though they were lost along the way, they still had enough manpower. Just now he was thinking about how capable this young master Ying was, and he seemed to be quite calm, but now he was exposed when he saw so many star beasts?

"We have seen many star beasts and can deal with them. Today we are only responsible for cleaning up and weakening them." As Ying Xingjue's performance was acceptable all the way here just now, the captain of the military region spoke a little more politely now, "There is still one hour. It will be daybreak and no reinforcements are needed."

Ying Xingjue turned his head and looked at him: "What I said, I don't want to repeat it again."

The captain of the military region met his gaze, and his eyes suddenly became distracted. He involuntarily picked up the communicator and started to contact the military region.

Only after he finished the communication did he come back to his senses.

The commander of the military region thought of what he had just done, and a chill suddenly rose up behind him. Is this the skill of a senior commander? Able to control people's minds.

"Help me clear the way." Ying Xingjue spoke to the soldiers of the empire's main force, "There are high-level star beast groups there."

A group of high-level star beasts, two star beasts above S level.

Ying Xingjue didn't say a word. In addition to the high-level star beasts, he sensed even more powerful star beasts.

The star beasts protecting the southeast must be reduced, otherwise they will gradually expand the map.

These star beasts were very excited when they saw them. All the star beasts below S level unified and rushed towards them, roaring.

At this moment, their steps were terrifyingly unified, like a well-trained army.

Ying Xingjue never let the team wait on the spot. His perception spread to all people in the military area, and he also controlled their thinking frequency to the same tune. The speed of the attack was surprisingly uniform, and the kill value doubled.

He is manipulating everyone.

The only thought raised by everyone in the military area, including the main force of the Imperial Military Academy, was at this moment.

They knew that Ying Xingjue was controlling them, but they could still think in their heads. This situation seemed like their brains were still theirs, but their bodies no longer obeyed their control and had become Ying Xingjue's weapon.

Both sides are spending their lives.

Ying Xingjue controlled the entire army, but his eyes fell on the darkness further away, and he felt an evil force from there.

They alone may not be able to deal with it.

The killing seemed to be endless. Star beasts were dying in droves, and people in the military area team were also losing their lives.

Fifth Military Region, conference room.

“They need reinforcements over there? How long have they been there?”

“Ying Xingjue wants both S-level and above people to rush over as soon as possible.”

“reason?”

“There is a wave of high-level star beasts.”

“Send the people over immediately.”

Ying Xingjue’s words were very important to the top management of District 5. He had made a similar prediction back then. At that time, the leaders of District 5 were unwilling to believe it and they almost overturned, but luckily they were turned around.

.....

In the distance, the sky gradually turned white, and the corpses of the surrounding star beasts were almost piled up into mountains.

The army's physical strength has also reached its limit. At this time, the group of star beasts slowly separated, making way for the high-level star beasts behind them.

Situ Jia's mecha's face and chest were covered with blood. He held a lancet at the tip of his finger: "How can we continue this battle?"

His physical strength was first exhausted by this group of low-level star beasts, and now he has to face high-level star beasts.

Not inside here.

After Ying Xingjue looked at all the high-level star beasts, he realized that the star beast in the darkness did not appear.

In half an hour, it will be daylight.

Ying Xingjue looked at the people in the military area behind him, turned to the members of the main force of the Imperial Military Academy and said, "Half an hour."

After another half hour, when the first ray of light appears, all the star beasts will recede like the tide, and they can rest.

This time, the ones at the front were several 3S mecha soldiers from the main team.

Huo Jian was shocked when he came face to face with the same slimy tentacle star beast as in the previous video.

[Avoid the mouthparts and be careful of its tentacles.]

Ying Xingjue's voice sounded in his mind, Huo Jian calmed down again, and his eyes fell on Ji Chuyu next to him.

Perhaps it was the second time he came to the battlefield. Ji Chuyu was more stable than them and showed no fear at all.

At the same time, Ying Xingjue used his perception to control the rear military team, and they went to encircle and suppress the star beasts that were lagging behind.

After a time, the entire southeastern defense line was once again filled with various battles.

‘Boom——’

Ying Xingjue's eyes fell on the opposite side, feeling a little dazed. He heard something, but others seemed to hear nothing.
