

Smash All 451

Chapter 451

He was listening carefully, but all he noticed was that his heart was beating fast.

“Xingjue!” Ji Chuyu turned to him and shouted.

Ying Xingjue’s perception barrier weakened, and several 3S mecha soldiers could already feel the mental attacks coming from the high-level star beasts on the opposite side. Ji Chuyu couldn’t help but remind him immediately.

Ying Xingjue came back to his senses and strengthened the barrier protection again.

Not right!

[Everyone, step back!]

Ying Xingjue forcibly controlled the troops in the military region to change from combat status to retreat, which caused him to turn pale, covering his heart and spitting out a mouthful of blood.

Huo Jian was at the front and could not retreat in time. Situ Jia avoided the flying star beast in the air, let his back be caught, flew to catch Huo Jian and retreated.

When the first ray of light from the Magic Night Star rose, the ground on the southeastern defense line suddenly collapsed, and the group of star beasts fell directly with the collapsed ground.

Huo Jian looked down and couldn't even see clearly how deep the ground was. Those high-level star beasts didn't even have time to react before they fell in together.

Situ Jia did not lower his head and pulled Huo Jian hard to retreat towards the team.

“Why did the ground suddenly collapse?” Gong Yijue looked at the group of star beasts over there that seemed to have suddenly disappeared, feeling a little confused.

Ying Xingjue, who was in the mecha cabin, raised his hand to wipe away the blood on his lips. He didn't know clearly, but he just had a premonition.

The environment of Huanye Star is complex. There is no difference between star beasts and people on it. If they encountered a similar situation, they would all die.

The military team regained control of themselves and looked at the ground that suddenly sank as if it had been cut, and they were all speechless.

Without Ying Xingjue, they would all be buried here.

On the opposite side of the ground that has not collapsed, there is a group of star beasts. They were separated from Ying Xingjue by a deep ravine, and they quickly retreated at the same time, as if they were afraid that their side will collapse.

“In this way.....is the defense line considered protected?” Situ Jia asked.

“For the time being.” Ying Xingjue raised his eyes to look at the opposite side again, and the sense of spying and evil had disappeared.

Situ Jia suddenly came out of the mecha, lying half on the ground and vomiting.

It was the first time that he saw with his own eyes that a person could die so miserably, and that after his lower limbs were bitten off, he could still cry and want to live.

.....

After daylight appeared, the tide of star beasts gradually disappeared. They did not bother to rest and returned immediately.

On the way, they met a team coming to support them.

“Your defense line also collapsed?” The other party obviously got the news from somewhere, and a similar situation happened.

“Where else?” Ying Xingjue asked.

“The commander in chief.....should direct the command over there, in the northwest direction.” The visitor said, “A part of the army fell in along with the star beasts.”

The high-level star beast fell into the abyss, and the star beast that Ying Xingjue felt did not appear. The support team could only protect them back.

After returning to the military area, Ying Xingjue didn't rest, but went to the real-time topographic survey room in the fifth area.

Several commanders were already inside, and Ying Yuerong, who had just returned, stood in the middle.

Chapter 452

“Almost at the same time, four consecutive defensive lines collapsed. Only the southeastern defense line did not have a large number of military personnel fall.” Ying Yuerong looked at the terrain map, “So far, there has been no news from the people who fell in, and no one has come up. The micro reconnaissance aircraft will automatically explode after it reaches a hundred meters.”

“Do you want to send someone down?”

“They're just going to die if they head down.” Ying Yuerong didn't think anyone who went down could come back up.

“I'll go down.” Ying Xingjue replied.

Everyone turned to look at him, and then moved their eyes to Ying Yuerong.

Ying Xingjue glanced at her: "I can feel something down there."

"Even if you can materialize the barrier, the danger of going down is extremely high." Ying Yuerong looked at Ying Xingjue disapprovingly, not understanding why he was so reckless, "If there is an accident, we will only lose a super 3S level command for no reason."

"No one else has the ability to go down except me." Ying Xing decided not to give in. He had to go down to see what was inside.

After a long silence, Ying Yuerong agreed, but there was one requirement: Ying Xingjue could not go down until daylight the next day, and if nothing was found after two hours, he had to come up.

.....

"You're crazy." Ji Chuyu stood at Ying Xingjue's door, blocking his way. "Suddenly, several places collapsed at the same time. There must be something fishy."

"Hence I'll head down to take a look." Ying Xingjue said calmly.

".....I'll go down with you." Ji Chuyu looked at him, "One more person to protect you."

“No need.” Ying Xingjue refused.

Ji Chuyu’s face gradually turned ugly: “You are a commander, and I am a mecha soldier. It is my duty to protect you.”

Ying Xingjue raised his eyes: “I am a super 3S level commander. If something happens to me, even a 3S level mecha soldier cannot protect me.”

He bypassed Ji Chuyu, opened the door and went in.

Ji Chuyu stood outside the door with his head bowed, his hands gradually clenched. He knew how powerful the Super 3S level commander was, he had seen it when he first came to Huanye Star. Before that, he had only regarded Ying Xingjue as a friend, but after that, he always looked up to him.

Ying Yuerong led the team to protect Ying Xingjue to the southeast defense line. The place where it collapsed yesterday was still a deep ravine.

They camped nearby until daylight came.

Ying Xingjue entered the mecha, walked towards the abyss, and climbed down.

Ying Yuerong stood nearby. She looked at the light projection. The picture above came from the camera lens carried by Ying Xingjue.

Just like what they saw from the micro-camera yesterday, there was nothing visible about the deep, invisible ravine.

“It’s the same height as yesterday.” The mecha engineer voiced.

Everyone’s hearts were raised. They watched Ying Xingjue continue going down and the camera didn’t explode, so they relaxed a little.

However, in the next second, the lens exploded again and the picture disappeared.

The author has something to say:

Xingxing: 3S mecha soldiers are not qualified, they need to be better than 3S mecha soldiers to protect me ()

Chapter 453

The moment she saw the camera explode, Ying Yuerong’s expression changed. She forcibly controlled her emotions and asked the engineer next to her: “Is the signal bad?”

The engineer shook his head: “Maybe the environment down there is not suitable, so the camera broke.”

“It’s just a problem with the lens, it may not be the cause of an accident.” Gong Yijue said, “I strengthened Huang Jinkai’s protective armor last night.”

Everyone looked towards the abyss not far away. They could only wait for two hours to see if Ying Xingjue could come up before they could confirm whether anything happened to him.

Under the abyss, Ying Xingjue held the newly smashed lens and threw it down.

No response.

Ying Xingjue, who was in the mecha cabin, glanced around, then let go of his hand and jumped directly.

As he fell further down, the smell of various scents became stronger and more enhanced.

Ying Xingjue raised his hand across the control panel, changing the shape of the mecha to accelerate its sinking. The ravine, which was originally so deep that no one could see the bottom, has revealed its true face.

It took him a full hour before he landed at the bottom.

There were no corpses of any star beasts, and none of the high-level star beast groups that fell down with the collapsed ground yesterday had their bodies seen.

Ying Xingjue stood at the bottom of the abyss, looking up. He had deliberately destroyed the camera. He asked someone to come down because he could faintly sense a familiar aura underneath.

He had sensed this kind of aura in several people before.

Ying Xingjue erected a physical barrier and quickly walked around the bottom of the abyss to observe, but there was no sign of any star beast.

Everything surrounding him looked like an ordinary geological collapse, and it is precisely because it is so ordinary that stimulated the weirdest experience.

Ying Xingjue closed his eyes and released his perception. At this moment, the entire bottom of the abyss was covered by his perception, and he fell into an extremely broad field of vision.

black.....

The entire cliff at the bottom of the abyss was covered with black fog, no, not right, it was black bugs.

Ying Xingjue opened his eyes and looked at the cliff of the abyss, it was still normal.

Only by closing his eyes and using his senses could he see.

This kind of thing.....

Ying Xingjue's heart inevitably aroused a murderous intention.

He closed his eyes, preparing to use his perception to destroy these black bugs. They seemed to be able to sense his thoughts, and began to gather and rush toward him.

As soon as Ying Xingjue's perception came into contact with these black bugs, they immediately dissolved. He had walked to the very end of the abyssal chasm, and every inch was completely destroyed.

These black bugs were not difficult to get rid of. It could even be said to be easy to clean up. Ying Xingjue only spent a little bit of his perception. However, after he destroyed them, an uncontrollable depression arose in his heart.

The scent of these black bugs is too familiar.

Ying Xingjue stood at the bottom of the abyss for a long time, they were unable to decipher his thoughts and he finally controlled his mecha to rise up.

Above the abyss.

“Commander Ying, it has been two and a half hours. Should we send someone down to take a look?”

“If he can’t come up, we should send more people down to die?” Ying Yuerong stared at the crack in the abyss, “When the daylight disappears, we will set off to go back.”

The last light in the sky disappeared, and the strange movement of the star beast was heard in the distance. Everyone was waiting for Yuerong’s order.

Ying Yuerong looked at the crack not far away and spoke almost with difficulty: “Let’s go.”

As soon as she turned around, Gong Yijue shouted: “coming up!”

Ying Yuerong suddenly turned around and saw Ying Xingjue coming up from the abyss.

She suppressed her various emotions and finally asked: “What’s going on below?”

Chapter 454

“There are some tricky star beasts and several other cracks. I will go down there to take a look in the next few days.” Ying Xingjue looked at several people from the main team of the Imperial Military Academy, “as for them, I’ll trouble them to your care”

“Since it’s just a star beast, I’ll send more people down to help you.” Ying Yuerong said.

"No need." Ying Xingjue said, "I can handle it faster by myself."

Ying Yuerong paused and looked at him for a while, then finally agreed.

.....

Sita Star.

Wei San was battling Jie Yuman, and she can now control herself from being kicked out by Jie Yuman within ten minutes.

"Damn it, Wei San f***.....cough." Liao Runing noticed, and was about to cheer Wei San on, when Teacher Jie glanced over, he immediately swallowed it, and added in a low voice, using the posture of clenching his fists and coughing, "Her."

Jie Yuman chased Wei San, who was running wildly, feeling angry and proud at the same time.

She is annoyed that her hands are slippery and she can pull off any move. It's really annoying. She was also a little proud of Wei San's rapid progress. Who would have thought that a few months ago she was still an A-level, and she had only been exposed to her 3S mecha for such a short time, and she was already able to master so many tricks in her hands.

"That's enough." Jie Yuman stopped, "let's just practice up to this for today."

Wei San looked at her suspiciously: "Really? I don't believe this."

".....Do you think everyone is as shameless as you?" Jie Yuman came out of the mecha directly, "you should be practicing resistance in sea water these days, especially Liao Runing, who has many problems."

Wei San also jumped out of her mecha: "Teacher, how was my performance today?"

"Average." Jie Yuman casually responded.

"I don't believe it. You only kicked me twice today." Wei San refuted, clasping her fingers.

Jie Yuman: ".....is this glorious?"

"Reporting to the teacher, very glorious!" Wei San stood next to Liao Runing and Huo Xuanshan with her chest and her head raised, and she declared very proudly.

Next to them, Huo Xuanshan and Liao Runing lowered their heads and smiled sullenly.

"Laughing, still laughing?" Jie Yuman pointed at the three people, "Practice more tomorrow!"

As soon as Teacher Jie left, the three of them collapsed on the ground.

“Oh, your move wasn’t very good. You almost hit the teacher with a kick back.” Liao Runing sighed, “When can we defeat Teacher Jie?”

“Let’s fight for the next competition venue, or the next next one.” Wei San laid directly on the training ground, clutching her chest, “My heart has been pounding crazily lately.”

“You stay up too late,” Huo Xuanshan said, leaning against the wall with his knees bent.

“I haven’t stayed up late recently. I head to bed on time.” Wei San opened her eyes and looked at the ceiling of the training ground. “The mecha has not been designed yet.”

“What kind of mecha are you designing now? You don’t have materials, and you can’t change Impermanence.” Liao Runing turned to look at her.

“It’s not Impermanence.” Wei San raised her hand to cover her eyes, then raised it again, “I want to make an S-class mecha that can be used by A-class soldiers.”

Huo Xuanshan and Liao Runing both looked at her, and finally Huo Xuanshan said: “Although I am not a mecha engineer, I also know that this is unlikely.”

Liao Runing: "Have you ever mentioned this to Chenghe? What did he say?"

"I didn't say anything to him yet." Wei San turned over and sat up, placing her hands on the ground. "The ornamental mecha is made by Gongyi Liu. The principle of that kind of mecha is to let people with low or no perception experience the feeling of driving a mecha. Why can't we make an S-class mecha that can be driven by an A-class?"

"What you said makes sense." Liao Runing enunciated thoughtfully, "When you make this kind of mecha in the future, you will be an epoch-making master. When the time comes, you will be recorded in the book, parenthesis, friend Liao Runing, the powerful individual mecha soldier in the Federation."

Wei San: ".....Is this the most important point?"

Huo Xuanshan thought about it seriously: "Then I will reserve a hundred of these mechas, and then give them to our Huo family first."

Liao Runing immediately quit, "I'll make the reservation first! Whatever he pays, I'll double the price."

"Okay." Wei San agreed immediately.

The three of them finished training and wandered towards the cafeteria.

Thanks to the fortune of Wei San, the people from Sita Star exhibited great enthusiasm for Damocles Military Academy. They served meals in the canteen, and even the food was twice as much as that of other military schools.

“Why do they like you so much?” Liao Runing looked at the two chicken drumsticks on his plate, then looked at the three drumsticks on Wei San’s plate, shook his head and sighed.

“I can’t help it, my charm is too great.” Wei San sat across from Jin Ke and Ying Chenghe holding a plate.

Chapter 455

“Not exactly.” Ying Chenghe raised his head and said, “Yu Qingfei stayed here for a long time. He developed most of Sita Star. People here like him very much as well.”

Wei San’s lazy way of fishing in troubled waters is very similar to Yu Qingfei’s sometimes.

“Has Yu Qingfei been to all twelve stars?” Wei San asked.

“Pretty much.” Ying Chenghe thought for a while, “But Sadu Planet has always been Yu Qingfei’s base.”

This time was basically the meal time for each military academy. Except for the main team of the Imperial Military Academy, all other main teams were nearby. No other military academy had such a harmonious meal and yap session like Damocles.

Basically, they all eat quietly and then go to continue training.

This time, the atmosphere in Pingtong Academy was the heaviest. One of their main players has been in poor condition since coming out of the extremely cold stadium.

It is said that his perception is a little damaged, but the doctors over there are doing their best to nurse him back to health. If he really cannot recover, he may need to be replaced.

"It's also life." Liao Runing shook his head, "Suffering such a serious injury on their own home court."

"I watched the live broadcast of the replay before the extremely cold stadium, and I thought Pingtong Academy would be the first to leave." Wei San looked at the military academies with her chin in her hands, but it turned out that teachers of Samuel Military Academy were the first to let their students out.

"Us and Samuel Military Academy have lost students in the past few batches, and we have already tasted the bitter pill." Jin Ke lowered his head and said casually, "If this occurs again, Samuel won't have to compete for third place."

It can only be said that every military academy has its own considerations. Pingtong Academy wanted to stay in second place and sprint for the championship, so it took risks, but it did not expect to encounter a severe cold wave in advance.

These few people had more food than other military schools and even gossiped, but they didn't eat slower than others, and even finished the food first.

"Let's take a walk and train underwater pressure resistance in the afternoon." Master Liao was full of fighting spirit.

The five people carrying the plates made a special detour and passed the main teams of the other three military academies, very arrogantly.

After placing down the plate and walking to the door of the cafeteria, Wei San frowned and looked back inside.

“What are you looking at?” Liao Runing put his arms around the person and walked away, “Let’s go to training.”

.....

“Wei, you just won a division championship, how arrogant are you?” Xiao Eli said extremely unhappy.

Originally, he hated the group of people from Damocles Military Academy the most, but after these games, he hated these five people even more.

None of them are good people.

Xiao Eli paused suddenly. He didn’t seem to be a good person himself.

“Those five people from the Imperial Military Academy went to Huanye Star. we don’t know how much progress they have made when they came back.” Xi Wutong suddenly said.

“Didn’t they go to Huanye Star to get gold-plated?” Xiao Eli was surprised.

Xi Wutong’s eyes fell on the other people at the table and did not reply to his words.

“We don’t need to compare with them.” Gao Xuelin said, “We are also making progress.”

“A 3S-level soldier from Pingtong Academy was injured. As long as they replace him with a double S-class mecha soldier, we have a chance to advance one more.” Jill Wood looked at Takeshi Kosaka on the other side of Pingtong Academy and said.

“It’s better to have their perception hurt than to change to a Double S with no potential.” Xiao Eli said coolly, “Unfortunately, if we change to a Double S, it would be just right for your Double S. Our school is unlucky this year, and we don’t have level 3S for all members.”

Jill Wood: “.....”

“Enough.” Gao Xuelin put down his chopsticks, “Our goal is to get into the top three. Attaining third place will be considered as completing the task.”

Xiao Eli only wanted to take third place before, but now he is not convinced. Even Damocles Military Academy became the favorite to win, but their Samuel was held back by a double-S mecha soldier.

“Wei San can become level Ss, why can’t you also become level 3S?” Xiao Eli looked at Jill Wood dissatisfied.

Jill Wood: “.....”

Gao Xuelin and several others stood up and motioned to Jill Wood to leave with them.

Xiao Eli was the last to move. As soon as he stood up, he saw Jill Wood turning his head and looking over with cold eyes.

Not looking at him.

Xiao Eli followed her gaze and looked back, in the direction of Pingtong Academy.

Hey, it’s still a bit ambitious.

Chapter 456

Ying Xingjue went under all the cracks, and every time he would discover those black bugs, but at least, they could be dissolved with perception.

Obviously the threat that this black bug brought to him was still there, but it was extremely easy to deal with, which made Ying Xing feel uneasy with his determination.

These black bugs can only be discovered through perception. The last time he went down, Ying Xingjue brought an experimental test tube and filled it with a small tube of black bugs.

This kind of test tube is special. It is used to hold some star beast experimental objects. It is corrosion-resistant, pressure-resistant, heat-resistant and cold-resistant.

He initially thought that these black bugs would resist, but when the black bugs entered the test tube, they instantly formulated into a black mist. After being imprisoned, they could only spin around mindlessly in the test tube, seemingly without any attack power.

Yet the fallen star beasts and the army completely disappeared below, and nothing was seen. Ying Xing never believed that they had nothing to do with these things. He held the last remaining tube of black worms and waited under the abyss. After a long time, the black bugs still showed no reaction and could only circle around the inner wall of the test tube. Finally, Ying Xingjue used his own perception to wrap the test tube, not giving the black bug a chance to come out, and then he brought the test tube up.

“Commander Ying, have you finished dealing with the star beasts below?” Seeing Ying Xingjue coming up from below, the military captain asked.

Ying Xingjue put the test tube away without letting them see it, and nodded to indicate it ended.

In the past few days, he was dealing with the 'star beast' under the abyss, while the rest of the main team of the Imperial Military Academy were taken away by Ying Yuerong to train on other lines of defense.

After Ying Xingjue returned, he took out the test tube, but there was still a black mist inside. He put the test tube on his waist, exposed half of it, and then came out of the room.

A few hours later, Ying Yuerong led the team back, and Ji Chuyu and others were still looking murderous.

"Have you dealt with the star beast under the abyss?" Ying Yuerong spotted the test tube on Ying Xingjue's waist at the first glance, "What is this?"

"I just can't find anyone from the military area." Ying Xingjue lowered his head and pulled it out a little, saying, "The air of Huanye star."

When he said this, Ying Xingjue glanced at Ying Yuerong and the main team of the Imperial Military Academy next to him. Although they were surprised that he brought a test tube filled with air, they did not refute him. Obviously, they could not see the black mist in the test tube.

"This time the cracks suddenly appeared, but they blocked most of the attacks of the star beasts. We used several abyss cracks as lines to re-adjust the protective surface, which can temporarily resist the rioting star beasts." Ying Yuerong did not care about the test tube. She just said, "In two days, you will go to Sita star. The competition is about to start. There is no need to stay here anymore."

"Alright."

After Ying Yuerong left, several people from the Imperial Military Academy relaxed and looked at Ying Xingjue.

“Why did you suddenly think of filling a tube of air?” Ji Chuyu asked him. The first time he came to Huanye star, he didn’t see Ying Xingjue behave like this. What was different this time?

Ying Xingjue pulled out all the test tubes: “It’s nothing, I filled them in the abyss today.”

Several people heard this and thought he was using it to remind himself.

Ying Xingjue watched them return to their room, and finally raised his hand to touch the test tube at his waist, which they couldn’t see.

For a moment, Ying Xingjue thought that there was something wrong with his own perception, but looking down at the black mist in the test tube gave him a familiar feeling, and this couldn’t lie. R

.....

Sita Star.

Wei San controlled the mecha and stepped on another mecha in the water, looking at Liao Runing who was still struggling inside: “young master, are you alright? You’re afraid of this and that.”

Liao Runing struggled to reveal his head: "Your mecha is taking advantage, I just need to practice more."

"How long has it been? The competition is in a few days." As soon as Wei San finished speaking, Liao Runing reached out and grabbed her feet and pulled her into the water.

The two of them fought in a simulated seawater environment. Wei San almost suffered a loss. She turned around, held Liao Runing's head and pressed down.

It was obvious that Liao Runing was in the mecha cabin and would not get wet, but he still felt a little bit sick.

Wei San seized this second, kicked him down, and then rushed up.

Chapter 457

She stood by the pool and waited for a while before Liao Runing emerged from the water again.

Wei San: "You have a mental disorder. You are afraid of the cold, the water, and the long strips. Young Master, if you go out and compete with others like this, there will definitely be something wrong."

Liao Runing came up and came out of the mecha: "I know, I'll practice more in the next few days."

"I haven't seen you have these problems under the ice in extremely cold stadiums before." Huo Xuanshan, who had been watching from the side, said, "If you were to be stimulated, you may not care about these environments."

Liao Runi

After the three of them finished training, they were preparing to rest. On the way, they saw people from the Imperial Military Academy walking out.

“What’s going on at the Imperial Military Academy?” Wei San turned to look at them.

“The main force of the Imperial Military Academy has just arrived at the door.” Jin Ke also came from the other side, “they went over to greet them.”

Liao Runing looked at the members of the Imperial Military Academy team who were leaving: “Have they returned from Huanye Star so soon? I thought they would stay for a few more days before coming on the day of the competition.”

“There was a sudden earthquake in Huanye Star, and several cracks appeared, which blocked the star beasts. They didn’t have to spend too much time there.” Jin Ke stood nearby and explained, “But even so, they have been on the battlefield, so we don’t know what will change.”

“Wait and see.” Huo Xuanshan said.

Except for Ying Chenghe who was still in the studio, the four of them stood by the wall, waiting for people from the Imperial Military Academy to walk over.

The main force of the Imperial Military Academy was surrounded, and Ying Xingjue walked at the front as usual. Except for him, the faces of the four people behind him were different, more sinister and fierce.

“Tsk, they’ve only been there a few days, but it’s like they became a different person?” Liao Runing looked at the main team of the Imperial Military Academy and said, “Senior Shentu was also like this before.”

Jin Ke’s eyes flickered back and forth between Ying Xingjue and Ji Chuyu. Both of them were going to Huanye Star for the second time. Unlike that time, which lasted for a month, this time they only stayed for five or six days, but obviously the military area battlefield still had an impact on Ji Chuyu. He couldn’t see any changes in Ying Xingjue, not everyone could have this kind of calmness.

“What is the black stuff in that test tube on him?” Wei San looked over.

“Who?” Huo Xuanshan looked over there, and finally his eyes fell on Ying Xingjue’s waist, “Isn’t that a transparent test tube? There is nothing inside.”

Jin Ke and Liao Runing were also attracted by their conversation. They looked at the test tube looming around Ying Xingjue’s waist and agreed that it was a transparent test tube with nothing in it.

“Wei San, it turns out that you are really color blind.” Liao Runing confirmed, “No wonder your previous mecha coating was so ugly.”

“You are the ones who are color blind.” Wei San firmly refused to admit that she was color blind. When she wanted to take a closer look, her sight was blocked by Ji Chuyu. He stood next to Ying Xingjue and whispered something, just happening to block the test tube.

The return of the main team of the Imperial Military Academy attracted the attention of various military academies. Originally, the main team of the Imperial Military Academy was stronger than those of other military schools, and now they have gone to the battlefield for actual combat. Everyone has seen their changes, and suddenly the main teams of each school began to become nervous.

“There will be a competition tomorrow. There is no cold wave or sea wave in this competition. It is a serious competition, although your strength is worrying.” Jie Yuman looked at a few people and said, “But it is still eye-catching, and although I have no hope. You guys just need to win against the Imperial Military Academy.”

Several people: “.....” what a nice only just.

“Teacher, do you need peanuts?” Liao Runing raised his hand and asked.

“What do I need this for?” Jie Yuman glanced at him and didn’t respond.

“Paired with wine, teacher.” Wei San took the initiative.

Jie Yuman chased the two people around the training ground: “If you don’t have the confidence to win the championship, why are you so happy every day?!”

.....

At the beginning of the Sita Arena, the questions from the media reporters were relatively friendly, mainly because last time several military academies almost failed to get out, and this time it was more like a game of survival after disaster.

Jin Ke stood in the middle and asked several people: "Whose turn is it to draw lots this time?"

"Mine." Huo Xuanshan said.

"I hope we can draw a starship." Liao Runing clasped his hands together and bowed to the sky.

Chapter 458

Wei San kept looking towards Ying Xingjue. She didn't see clearly what was in the test tube at his waist last time. This time, she took advantage of the opportunity to draw the combat preparation bag to get a clear look.

Yet the few people from the main team of the Imperial Military Academy stood beside Ying Xingjue, blocking Wei San's gaze.

"Damocles Military Academy."

The staff stood in front of the box and called the first place player in the previous competition to come up first to draw the prize.

“Go quickly, go quickly.” Liao Runing pushed Huo Xuanshan over.

“Since only one military academy received a ranking in the last extreme cold competition, the other four military academies will be calculated based on the total score of the first three games, and the one with the higher score will be drawn first,” the staff said.

At present, the highest total points in the competition was still the Imperial Military Academy in first, which has 30 points, followed by the Damocles Military Academy, which has 16 points, and Pingtong Academy, which has only 6 points. Samuel Military Academy scored one second place in Guyu with five points, while South Percy only had one point.

Therefore, the order of drawing combat preparation packs at the Sita Arena is Damocles Military Academy, Imperial Military Academy, Pingtong Academy, Samuel Military Academy, and South Percy Military Academy.

The other people in the military academy drawing the lottery were all alone. Wei San was waiting for Ying Xingjue to come out. She moved out step by step, just in time to see the whole place where the combat preparation packs were drawn. As long as Ying Xingjue walked over, she could see the test tube on his waist.

What kind of test tubes can be brought into the arena?

After the staff reported the name of the Imperial Military Academy, Ying Xingjue walked out of the team as expected. Wei San stared at his waist intently. She didn't see the test tube until he walked behind Huo Xuanshan.

It was indeed black, she was not color blind. Wei San stared at the black mass for a while, and suddenly found that the black inside the test tube was moving.

With this movement, Wei San immediately remembered the black mist she saw in the simulation cabin. It was the same black mist and could move. Only when she got closer could she discover that it was an insect.

Wei S

While she was staring at the person intently, Ying Xingjue caught several eyes on him at the same time, but when he pretended to look back inadvertently, he only saw Wei San staring at the test tube on his waist, without any hesitation to cover it up.

Ying Chenghe punched Wei San, moved his mouth slightly, and whispered: "Wei San, stop looking." His cousin had even looked over.

"The test tube on your cousin's waist contains black bugs." Wei San lowered her voice and told several people.

The camera panned over, and several members of the main team of Damocles Military Academy straightened their backs and paused to whisper. When the camera moved away, Ying Chenghe asked: "There is nothing in there."

Jin Ke turned around and said, "I inquired last night. It was Ying Xingjue who filled a tube of air from Huanye star. There was nothing in it. If there was something, the organizer would not let him bring it in."

"There is." Wei San stared at the test tube on Ying Xingjue's waist and emphasized, "I have seen it in the simulation cabin of Guyu arena."

Liao Runing also looked at the test tube on Ying Xingjue's waist. It was still transparent and contained nothing: "I have practiced all the scenes in the simulation cabin of the Guyu track and I have never seen any black bugs." ❖

When Huo Xuanshan came over with his combat preparation bag, he wanted to open it with several people and look at it, but when he came over, he found that they were unusually quiet: "What's wrong?"

Several people stood together and pretended to open the combat readiness bag. Jin Ke asked Wei San: "In the new simulation cabin?"

"No, the old one." Wei San lowered her voice. "After I entered, a black mist flew towards me. They were all tiny insects. I don't know what species they were. Before I could take action, the simulation cabin exploded."

Jin Ke frowned: "We all can't see it, but that doesn't mean there isn't anything. Let's compete first and talk about it later."

Huo Xuanshan looked at the few people with half-understanding, then raised his hand to open the list of combat preparation kits. At this moment, there was a commotion from Samuel's side.

"Ha, the starship is ours, and the champion this time must be from Samuel Military Academy." Xiao Eli said confidently as he looked at the combat preparation bag list.

Hearing this, Liao Runing looked at Samuel's list and saw that there was indeed a starship: "They actually won it."

Looking at the combat preparation package drawn by Damocles Military Academy, they can only say that it is average.

Among the several military academies, the Imperial Military Academy had the worst combat preparation package, with nothing useful.

Ying Xingjue's mind was not on the combat preparation bag. He placed his fingertips on the test tube at his waist. He saw the look in Wei San's eyes just now. It was completely different from the others. It seemed that she.....could see the black bugs inside.

And there were other people in the five military academies whose eyes kept falling on this test tube.

Ying Xingjue once again confirmed that there was nothing wrong with him. The aura of disgust was real, but not everyone knew it.

He lowered his eyes and looked at the ground. Assuming Wei San could really see it, the biggest thing she had in common with him was the level of perception.

Chapter 459

Ying Xingjue instantly recalled the 3S that had problems in the simulation cabin on the Guyu track, and the smell coming from the simulation cabin in Wei san's training room at that time. Something was targeting the super 3S.

It's just that he couldn't figure out why Wei San had a faint aura that was the same as that evil atmosphere in her simulation cabin that time.

At that time, Ying Xingjue took action subconsciously. Just like when he shot and killed the nurse, he also targeted the doctor at Fan Han Star Hospital because he felt that aura.

At that time, Wei San's aura was so weak that he still doubted whether he was seriously injured and hallucinating.

Standing in front of the Imperial Military Academy team, Ying Xingjue quietly released his senses, covering everyone, trying to find someone other than Wei San who was sizing him up.

There was nothing unusual.

Instead, several main teams from the Damocles Military Academy looked at him from time to time.

Jin Ke coughed and reminded in a low voice: "We're about to go in, don't be distracted."

Damocles Military Academy was the first to enter, and Jin Ke took them inside.

As soon as the barrier opened, the Damocles Military Academy team entered the Sita Arena. The sea breeze blew in front of them. It was not cold, and it was even a little comfortable.

Jin Ke opened the map, looked down at it for a while and said: "The end point is on the island in the middle. There are several ways to get there, all by sea. This is suitable for teams with starships, and you can also walk most of the way along the cliff. Finally, after a short sea journey, you can reach Destination Island."

"Which way should we go?" Ying Chenghe asked.

"It depends on whether we can fight for the boat." Jin Ke raised his head and said.

"Then we have to wait here?" Huo Xuanshan asked him.

Jin Ke shook his head: "Let's go first to deal with the star beast. There is no rush to seize the ship."

Damocles Military Academy chose a road with cliffs and rocks. These roads were not stable enough, and there were all kinds of large and small stones. Whether it was walking on it by humans or driving a mecha, it would be unstable.

The school team at the back maintained a five-man team formation and moved extremely cautiously.

“It seems that a member of the school team was eliminated at the beginning of the previous game, which was a big blow to the people of Damocles Military Academy.” The new commentator took Ying Yuerong’s place and sat next to him and said, “But sometimes being too cautious can be a drag.”

Yu Tianhe smiled and said nothing. Her eyes fell on the entrance of the stadium and the camera of the military academy that had not yet entered.

After all, they are military academy students. Their physical fitness is not only stronger than that of ordinary people, but they have also undergone a lot of training. After half an hour of walking in the military academy, Damocles was able to adapt to the rocky road.

“I don’t see any flying star beasts.” Liao Runing looked up at the sky, “When can we meet the star beasts?”

“There are no star beasts around here.” Jin Ke pulled Wei San, who was still distracted, and then said.

Liao Runing was walking in the front, a little bored. Before he could even turn around to speak, he suddenly stepped on something soft under his feet. This feeling.....

He immediately jumped several meters high, accompanied by a scream.

Jin Ke thought something had happened and immediately asked everyone to stop and be on guard.

Liao Runing came back in a flash, hugging Huo Xuanshan and refusing to let go.

Everyone stood there and waited for a while, and finally a snake crawled out from a huge rock in front of them and spat fiercely at them.

This snake was too normal, not a star beast at all, and everyone was in false alarm.

Liao Runing's face was pale, his feet were off the ground, holding Huo Xuanshan between his legs, completely ignoring what the school team members behind him thought of him.

Jin Ke stared at the snake: "It's just a sea snake, keep walking."

"This is the Sita Sea Snake. They appear in groups." Ding Hemei from the school team said, "Commander, I think we should leave quickly."

When Liao Runing heard this, he suddenly felt a chill in his back: "How did you know that there would be a group?"

"I am from Sita star." Ding Hemei touched her face, "This kind of sea snake can drill into the mecha and destroy the internal structure of the mecha. Sometimes it will crawl into the mecha cabin along the ventilation ducts, and they are poisonous. They are around here. They can be found on land and seawater."

Not a star beast, but more troublesome than a star beast.

Chapter 460

Liao Runing grabbed Huo Xuanshan's hand and said, "Take me to fly into the air."

Huo Xuanshan pulled back his hand without mercy: "Everything depends on the commander's arrangement."

Jin Ke didn't know about the Sita sea snakes either. He focused all his attention on the star beast, so he could only ask Ding Hemei for information about this Sita sea snake.

Ding Hemei quickly gave a general overview, and sea snakes were constantly crawling out of the cracks in the rocks over there, staring at the group of uninvited guests.

"How is the more you're afraid, the more that's coming?" Liao Runing pulled on Huo Xuanshan and refused to let go, "Jin Ke, think of a way!"

"What can I do? Rush over." Jin Ke shook his head, "Save some energy."

Live broadcast.

“Before I came here, I had always heard that Damocles Military Academy had bad luck, but I didn’t expect it to be so bad.” Ji Zhengxin, the new commentator, was born from Pingtong Academy. He smiled and said, “In a place as big as the Sita Stadium, this is the only place that has Sita sea snakes, but they happened to encounter it. Master Yu, do you think any of them will be eliminated because of this non-star beast?”

Yu Tianhe glanced at the camera of Damocles Military Academy: “No one knows the outcome of something that didn’t happen.”

Ji Zhengxin smiled and said nothing.

Sita Sea Snakes gathered more and more among the rocks. Jin Ke looked at the school team behind him and said simply: “All light mecha soldiers enter the mecha, carry the mecha engineers and commanders and let’s leave.”

“What should I do as a mecha soldier?!” Liao Runing was shocked, “I don’t want to stay down there!”

“Otherwise.....” Jin Ke thought for a while, “The remaining two mecha soldiers will just pull the feet of the light mecha soldiers.”

Huo Xuanshan

The light mecha soldiers of each team were bearing the weight of their lives that they should not bear at this moment. They were flying in mid-air, holding one person in one hand and pulling the two people on their feet.

Wei San and Liao Runing grabbed Huo Xuanshan’s feet and hitched a ride like the school team members behind them.

“Damn it, there are snakes in the sea water!” Liao Runing lowered his head and looked down, his face turned green.

too disgusting!

Ding Hemei flew forward with her team, but then she remembered something and couldn’t help but fly higher: “Commander, I forgot to tell you that these Sita sea snakes can also use their strength to jump, so we can’t fly too low.”

As soon as she finished speaking, the Sita sea snakes on the rocks and on the sea twisted their bodies and began to jump up.

Liao Runing was so frightened that he screamed in mid-air.

“You’re so noisy.” Wei San kicked Liao Runing, “They can’t jump up.”

Liao Runing lowered his head and stared at the Sita sea snakes on the rocks. The more he looked at it, the more something was wrong, and he screamed louder: “F**, f**! They are jumping higher and higher.”

Wei San looked down and saw that the sea snakes were jumping in a relay. One jumped to a certain height, and the other one seized the opportunity to throw on the snake, using its strength to jump even higher. There were snakes waiting next to it to use its strength.

"These snakes are more terrifying than the star beasts!" Liao Runing wished he could shrink his feet into a ball.

Jin Ke has been using his perception to connect with other commanders to keep the entire team in balance and deliver orders at the same time.

He looked up, calling everyone's attention to the star beast above.

"Didn't you say there wasn't one nearby?" Liao Runing knew he was doomed as soon as he heard this.

"It was blocked by thick clouds." Jin Ke helplessly responded, "I'm afraid we need to go down."

Liao Runing's face turned pale: "These snakes will squirm into the mecha. What will happen when they squirm into our mecha cabins?"

"You have many problems." Wei San kicked him down and let go.

Even after entering the mecha in mid-air, Liao Runing's screams still reached everywhere.

Wei San had already drawn her sword during the fall, accelerated her descent, and fell into the sea before Liao Runing. At that moment, she inserted the Sumi sword into the sea water.

“?”

Liao Runing thought that when he fell into the sea, countless Sita sea snakes would immediately swarm himself, but as a result, the sea surface and the sea snakes were frozen directly.

Wei San slowly drew out her Sumi sword: “Let’s go.”

The huge sea surface turned into ice, and the school team members followed them and ran forward quickly. A bunch of flying star beasts suddenly appeared in the sky. The level was not high, but there were many of them. The light mecha soldiers were forced to deal with them in the sky.

“Is there any fire? Let’s get a flamethrower.” Wei San turned to face Ying Chenghe who was coming down.

Ying Chenghe: “.....” According to the original, he would definitely refuse, but now his concept of mecha engineers is blurred. A mecha engineer is a craftsman, and he should know how to do everything.
