

Smash All 461

Chapter 461

With the school team's mecha engineer, Ying Chenghe directly modified the guns and used the A-level thermal weapons to create flamethrowers.

It must be said that this trick was effective. They sprayed it and directly burned the Sita sea snakes crawling over the rocks.

Wei San was directly responsible for freezing the sea surface with her Sumi sword. Huo Xuanshan, who was high in the sky, was entangled by many low-level flying star beasts. He didn't take full action and directly kicked the star beast down, allowing Liao Runing below to take over.

This kind of ice and fire, a group of mecha engineers' technology of transforming weapons without hesitation, left the audience outside the live broadcast camera, the host, and teachers stunned.

Ji Zhengxin's eyes fell on Wei San's long knife: "Her knife is a bit interesting. I think it can be ranked in the top ten of the 3S-level weapons rankings. Master Yu, what materials do you think were added to it to allow it to have these attributes?"

Yu Tianhe said calmly: "Ice gold."

"Usually weapons made of ice gold should be like Huo Xuanshan's bow, always filled with coldness. Wei San doesn't look like that at all. It's more like an ordinary long sword." Ji Zhengxin shook his head.

“You may need to ask the mecha engineer who made the weapon for her.” Yu Tianhe looked at the people in the camera. “There are too many attribute materials that can be mixed together. Unless the mecha engineer who made the weapon actively informs, others cannot learn otherwise.”

“Master Yu doesn’t know either?”

“Don’t know.”

Xi Haotian listened to the two people talking and subconsciously looked at Yu Tianhe. She explained a little less today.

.....

There are no high-level star beasts. It’s just that there are a lot of flying star beasts in the sky, and there are Sita sea snakes below, which makes Damocles’ team feel troublesome. Now that Sita sea snakes have been dealt with, it doesn’t matter. The people below move forward quickly.

Finally, the Sita sea snakes were no longer seen. Half an hour later, Huo Xuanshan also led the light mecha soldiers of the school team to catch up with the large army.

Liao Runing was still in a daze and stepped on the rocks again, fearing that the Sita sea snakes would emerge again.

Wei San glanced at him: “I saw you were working hard when you had the flames just now.”

"I was not afraid of fear and pressure, and insisted on fighting on the front line." Liao Runing was touched by himself.

"Speak less." Wei San patted him on the shoulder.

"Why?" Liao Runing was confused.

Ying Chenghe also patted his shoulder: "Don't you know you are a crow's mouth?"

Liao Runing refused to admit it: "I said before that the Imperial Military Academy would win the star ship, but I didn't see them win. It was because they were picked by Samuel and his group."

"Is there any difference?" Jin Ke came over, "Maybe the Imperial Military Academy has already snatched the starship."

Finally, Huo Xuanshan patted him on the shoulder, shook his head and walked forward.

Liao Runing fell behind and suddenly reacted: "Is the Imperial Military Academy snatching the starship? What if they do? What should we do? Should we still rob it?"

"Rob!" the four people in front shouted in unison.

.....

“These people are really.....” Xiang Minghua looked at the camera. The people at Damocles Military Academy started to rob the starship. Not only would they waste time waiting for Samuel to come in, but they might also finish the robbery and be snatched by another military academy in the process.

Now Damocles Military Academy also wants to be the last to take action.

The author has something to say:

Xingxing: What to do? She keeps looking at me, should I look back? (_)

Chapter 462

The Imperial Military Academy was only allowed to enter the arena two hours after Damocles Military Academy entered the arena.

Ying Xingjue and his team were waiting nearby. They wanted to snatch the starship.

However, after the people from Pingtong Academy came in, they didn't leave either.

“They also want to steal the starship?” Gong Yijue frowned and looked at Pingtong Academy, who was standing still.

Ying Xingjue stared at Lu Shibai for a while, then left with the people from the Imperial Military Academy.

“Aren’t we going to snatch from them?” Situ Jia asked.

“They joined forces.” Ying Xingjue said calmly.

From the moment he won the starship, Gao Xuelin’s expression turned ugly. He was not as happy as Xiao Eli. Without sufficient strength, it is impossible to retain such hot resources, just like when South Percy was robbed.

So after Damocles Military Academy and Imperial Military Academy entered, Gao Xuelin took the initiative to walk to Pingtong Academy.

“We will give you the starship.” Gao Xuelin said directly.

Lu Shibai’s face remained unchanged: “Your request.”

“The starship can barely accommodate the teams of two military schools. The starship will be gifted to you, bring us to the island.” Gao Xuelin said, “The star beast should be split eight or nine points.”

“Us six?” Lu Shibai looked at him and asked.

Gao Xuelin nodded: "you guys six."

The two military academies reached a cooperation on this, so Pingtong Academy did not leave after entering, but stayed at the entrance.

It was not that Pingtong Academy wanted to seize the starship as Gong Yijue thought, but they were waiting for Samuel Military Academy to come in and go together.

The Imperial Military Academy chose the rocky road to rush to the finish line, but also like Damocles Military Academy, they did not give up their plan to grab the starship.

Live broadcast.

"The path that Ying Xingjue chose will soon lead them to the Damocles Military Academy." Ji Zhengxin looked at the direction of the Imperial Military Academy and said, "I guess the Imperial Military Academy may join forces with the Damocles Military Academy to jointly seize the starship. I just don't know who will seize it first. Unlike Samuel Military Academy, who do the two host commentators think can achieve championship this time? Should we bet?"

"I bet the Imperial Military Academy can win." Xi Haotian said without hesitation, not caring about Ji Zhengxin's evaluation of Samuel just now. "They just came back from Huanye Star. I believe they will make some progress."

“I remember that the odds between the Imperial Military Academy and the Damocles Military Academy in the Skta Arena are almost 1 to 1, surpassing the previous position of Pingtong Academy.” Ji Zhengxin looked at Yu Tianhe, “Master Yu is betting on which military academy will be the winner?”

“Damocles Military Academy.” Yu Tianhe said, “They always do unexpected things. I bet the same result will be unexpected this time.”

Ji Zhengxin looked at the shots of several military academies: “So, if you all guess the Imperial Military Academy and the Damocles Military Academy, then I’ll be the extraordinary and choose Samuel Military Academy.”

“Are you willing to admit defeat?” Xi Haotian turned to look at him.

Ji Zhengxin spread his hands: “To avoid suspicion, you all chose a school other than your alma mater. Of course I can’t choose Pingtong Academy either.”

.....

Damocles Military Academy maintained its forward speed, and Ying Chenghe looked towards the sea: “The people from Samuel Military Academy have already come in.”

“This smooth?” Jin Ke looked at the starship on the sea in the distance, “Either they were robbed by people from the Imperial Military Academy, or they joined forces with Pingtong Academy .”

“Then should we snatch it?” Liao Runing looked over there, “One versus two, I don’t think it’s feasible.”

“Let’s see if the Imperial Military Academy is willing to cooperate with us.” Jin Ke continued to walk forward.

“Cooperate with them?” Liao Runing thought about this scene for a while, “It’s not appropriate. After we finish the competition, who will come first?”

“Naturally, we’ll talk after the robbery is over on the island.” Jin Ke said, “After we go to the island, everyone will depend on their own strength.”

Chapter 463

They walked for a long time and met another star beast on the way. This time it was not a flying star beast, but a group of giant white bears on the rocks. There were also high-level mutated white bears in the process.

“Resources delivered to our door automatically.” Jin Ke raised his hand to signal everyone to enter combat mode.

Everyone in the school team is under Jin Ke’s control. His orders are transmitted to each team along with the command’s perception. Although everyone’s attacks have different weapons, they have an unusually neat tune, like a big net. This covered these star beasts and then strangled them one by one.

The two mutated high-level white bears in the middle were left to the three soldiers of the main team.

Huo Xuanshan and Liao Runing each dealt with one to attract the attention of the white bear. As for Wei San, she shuttled between the two mutated white bears, hitting the target from time to time.

It was not smooth at first. They controlled the mecha to step on the rocks and walked fairly steadily. However, when fighting the white bear, they jumped up and landed and often stepped on various rocks, large and small, bumpy and uneven. A's position is not stable. The mutated high-level white bear seized this opportunity and fought back, its claws already leaving marks on the three bodies.

Finally, Huo Xuanshan spread his wings, basically floating on the surface of the rocks, and no longer missed the target. Liao Runing was more direct. He was a heavy-duty mecha, so he simply stepped down and flattened the rocks every time. Wei San could neither fly for a long time like Huo Xuanshan and float on the surface of the rocks, nor could she directly step on the rocks. It would consume too much energy, so she could only calculate her position every time before landing.

Live broadcast.

Jie Yuman looked at the performance of several people, and finally his eyes fell on Wei San: "her progress is very fast." In such a short time, she discovered her own advantages and found a solution.

Xiang Minghua smiled a little when he heard this: "Yesterday you were still scolding them."

"If these people aren't scolded, their skin will reach the sky." Jie Yuman now thinks about the time when she first taught Shen Tukun, Huo Xuanshan, and Liao Runing, and she felt a little dazed. At that time, they were still serious students and studied seriously with her every day. Later..... one Wei San came in and everything changed.

"Wei San, she's amazing." Xiang Minghua sighed a little. At first glance, no one would know that she had only been exposed to mechas for less than a year, and Impermanence was her new mecha.

Jie Yuman looked at Wei San in the camera, then moved his eyes to the Imperial Military Academy, and couldn't help but sigh at the twists and turns of fate. Neither of these two super 3S levels can maximize their strength. Ying Xingjue's body is damaged and cannot support his huge perception. Wei San is still malnourished. Although she can be well nourished, she is unable to own a true super 3S-level mecha.

If there is another super 3s-level mecha engineer, and these two people are paired with super-3S level mechas, she doesn't know how powerful they will be, and whether they can subvert the current situation.

.....

Liao Runing stood facing the mutated high-level white bear, pretending to be suppressed by its limbs, and Wei San slashed at him with a knife from behind. However, the mutated high-level white bear was already prepared, so she let go of Liao Runing, got out of the way, and saw Wei San's knife. When she was about to cut Liao Runing, she turned her sword and cut directly on the lower limb of another mutated white bear.

At this moment, Liao Runing was approaching the high-level white bear. While he was relaxing and waiting for them to accidentally hurt him, he swung the three-ring knife, lost his mind, and stabbed the white bear's heart with the last knife.

The two saw through the mutant white bear's plan from the beginning, and just followed its trend.

Another mutated white bear had its limbs cut off, raised its head and howled, and was shot through the throat by Huo Xuanshan's ice arrow.

The water is still rolling, the waves are crashing on the rocky beach, and the air is filled with the smell of blood.

[Damocles Military Academy killed two 3S-level mutant star beasts, 4 S-level star beasts, and 76 A-level star beasts.]

Chapter 464

At the moment when the light projection rose, the Imperial Academy confirmed the location of the Damocles Academy, and at the same time, they had just finished killing the star beasts on their side.

Almost immediately at this moment, several light projections rose one after another at Sita Stadium.

Jin Ke said, "Sure enough, Pingtong Academy and Samuel Military Academy have joined forces, so we will temporarily stop engaging."

"Do you really want to cooperate with the Imperial Military Academy?" Huo Xuanshan asked.

"No cooperation, no cooperation." Jin Ke looked at the direction of the Imperial Military Academy, "The dominant advantage of the Starship is too strong. If we let Pingtong Academy and Samuel Military Academy pass by, first and second place will be theirs."

At the same time, Ying Xingjue was also accelerating towards their direction.

Forty minutes later, Imperial Military Academy and Damocles Military Academy converged.

The intention of cooperation between the two military academies on the field for the first time can be considered in history. According to previous editions, the Imperial Military Academy never paid attention to the Damocles Military Academy.

They haven't shown much performance yet, and the audience at the live broadcast site and in the live broadcast room have already started to get excited.

【 Historical meeting, the Imperial Military Academy was actually willing to cooperate with the students of Damocles Military Academy. Before, they completely looked down upon Damocles. 】

[At the end of the day, one still needs to be strong in order to stand out to others.]

[This year's Damocles Military Academy is indeed strong, with all of the team as 3S and a sudden change in style, which is puzzling. Unfortunately, when the championship bet opened, I bet on the Imperial Military Academy, otherwise I would definitely bet on Damocles Military Academy.]

[Come on, the ranking that Damocles Military Academy has achieved several times is not achieved by luck. Twelve games, not every time has such good luck.]

[That's right, the Imperial Academy always wins championships genuinely, and with Ying Xingjue, a commanding officer of over 3S level, Damocles Military Academy can't always be lucky like in an extremely cold arena. The championship must be from the Imperial Academy.]

Now, when discussing the championship on the Star Network, it has gradually become between the Imperial Military Academy and the Damocles Military Academy, and Pingtong Academy has begun to withdraw from the discussion.

The Imperial Military Academy encountered a team from Damocles Military Academy, and Wei San and her companions were sitting on the rocks, not looking like they were coming to compete, but rather sitting on the rocks watching the sea view.

Seeing Ying Xingjue and others, Jin Ke stood up. He had originally thought that a few people next to himself would also stand up, and there would be a meeting between Qiang Long and Li Hu. However, he stood up alone and passed by, while Wei San and Liao Runing sat there without moving.

Jin Ke only realized something was wrong after walking for a while, and when he turned his head, he saw that Wei San was sitting on the reef with one knee bent. He quickly winked at a few people, asking them to follow.

Wei San gave him a thumbs up first, followed closely by Huo Xuanshan. Liao Runing and Ying Chenghe were also unwilling to fall behind and gave him four thumbs.

Jin

In this way, Jin Ke stood alone with a strong momentum and walked towards the Imperial Military Academy team.

“Let’s cooperate,” Ying Xingjue said directly to Jin Ke.

“…… Sure.” Jin Ke tried hard not to look at the main team behind Ying Xingjue, feeling too frustrated. He looked at them standing here, full of killing intent.

“We each will share half of the starship, and the star beasts, we will share equally.” Ying Xingju glanced over Wei San on the reef and finally met Jin Ke’s gaze. “After we go up, we will deal with Pingtong Academy, and Samuel Military Academy will be handed over to you.”

Jin Ke was a bit stunned. Ying Xingjue showed enough sincerity in cooperation, and there was basically no need for further discussion. What he said was calculated in his own heart.

“Cough, okay, then……we have a pleasant cooperation.” Jin Ke finished speaking and turned his head to look at Damocles Military Academy. “Everyone quickly got up and let’s hurry on.”

Sitting there one by one like big shots, those who didn’t know thought the Imperial Academy had come to beg them.

Wei San stood up and waited for them to come over. She pulled Jin Ke away a bit, but she didn’t look at Ying Xingjue’s waist. The camera itself had a slow down function, and anyone outside could quickly notice something unusual by her looking carefully.

However, it’s better for them to stay away from Ying Xingjue. She really doesn’t like the black mist inside the simulation cabin, and those bugs look too disgusting.

Chapter 465

The two military academies decided to cooperate from beginning to end in less than a minute, and then they each took half and started moving forward.

The two teams do not cross the river, with a clear distinction but a hint of tacit understanding.

Live streaming.

“I heard that at the extremely cold arena, it was these two military academies that stayed together to protect a flying aircraft. Now it seems that there is indeed a shadow of cooperation.” Lu Zhengxin looked at the marching patterns of the two military academies and said, “This competition is becoming more and more interesting. I see that Pingtong Academy and Samuel Military Academy also should know that the two military academies are cooperating.”

The light projection was originally a way to determine the opponent’s position for other military academies. As long as Imperial Academy and Damocles Academy jointly attack and kill the star beasts, they will definitely discover it.

“South Percy seems to be the only lonely team left,” Lu Zhengxin turned his head to look at Yu Tianhe. “They were still the last to enter. Maybe when the four military academies meet and entangle, South Percy can take the lead.”

Yu Tianhe nodded casually and did not respond to his words.

Xi Haotian next to him didn’t respond much to Lu Zhengxin either. He spoke too much and didn’t fit the appearance of an off-site commentator. As the main commentator, the general commander will only provide explanations based on the deployment of various military academies, and then give some personal speculation, but Lu Zhengxin is not. He says everything and talks nonsense.

It's a bit messy.

Unfortunately, it seems that the audience below really enjoys listening to him.

On the field.

The two military academies each maintained their own formation and walked forward. They began to take a path up the cliff, hoping to catch up with the starship of Pingtong Academy and Samuel Military Academy.

"The organizer is simply deliberately causing trouble, putting such a big ace in the combat readiness bag." Liao Runing complained, "This is clearly encouraging us to engage in internal conflicts within our military schools."

"It's not interesting to just kill the star beasts." Jin Ke crossed the main force of the Imperial Military Academy and walked up to the front. "It's okay now. Seizing the star ship can shorten the journey in half."

The Imperial Academy remained silent as usual, and the members of the main force didn't speak much, not to mention, like the main force of Damocles Academy, they talked about everything from east to west.

Ying Xingjue looked at Wei San in front of himself. Apart from taking a glance at them when she went down the reef before, she basically only walked on the side of Damocles Military Academy and didn't look back.

Since she deliberately kept a distance and didn't look at them, including the action of pulling away the main commander of the Damocles Military Academy just now, Ying Xingjue was certain that Wei San could see what was inside the test tube.

He's ask after going out, he didn't want to ask Wei San about the test tube here.

Ying Xingjue withdrew his gaze and turned his head to look at the sea. They were not close to the position of the starship and took a shortcut to walk in front of it. Afterwards, they had to dive into the water and not kill the star beasts. Only in this state can they board the starship.

"We dive down now?" Jin Ke stood in a position and asked Ying Xingjue.

Ying Xingjue nodded and raised his hand to let everyone jump off the cliff and into the sea.

Liao Runing was still talking over there, "What if I make a heavy move and kill the star beasts after we dive?"

"You apologize with death," Wei San glanced at him and said.

Liao Runing said, "..... let's not."

Two military academy teams quietly entered the water. After entering the water, everyone entered into their mecha state. Ying Xingjue raised his hand and established a physical barrier, including the Damocles Military Academy, which included everyone within the barrier range.

This is the first time that people from Damocles Military Academy have seen this kind of treatment firsthand, and they have not felt this shock even through the aircraft before. Liao Runing looked around in amazement and couldn't help but give a thumbs up, saying, "holy cow, it's so amazing. You don't have to worry about getting heavy handed now."

Huo Xuanshan shook his head and exclaimed in his heart that there was Ying Xingjue in the Imperial Military Academy, which was like lying down and winning.

Ying Xingjue turned his head to look at Jin Ke, and they wanted to join forces to attack all nearby star beasts, making them afraid to come over.

After diving into the water, the mecha soldiers of the two military academies were basically useless, only maintaining a quiet and fast advance, relying entirely on the perception and barrier of the main commander for attack.

When Jin Ke releases his perception attack, he inevitably comes into contact with the physical barrier of Ying Xingjue, because he is inside and Ying Xingjue does not hinder him. Jin Ke could feel a vast and surging power, and he was surprised. This was the ability to command at the level of over 3S?

While perceiving the attack to drive away the star beasts, Jin Ke began to recall the little physical barrier he had used from the physical perception barrier he felt in Ying Xingjue.

Jin Ke lowered his head and raised his hand, and suddenly a thin physical barrier rose all over his body.

Chapter 466

Wei San and Ying Xingjue were the first to notice his change, and the two of them casually glanced at each other through the window under the sea, then moved their gaze away.

“Jin Ke has learned how to materialize barriers,” Wei San spoke to a few people next to her.

Huo Xuanshan looked at the sometimes disappearing and sometimes appearing physical barriers around Jin Ke and said, “Teachers will definitely be happy to know.”

So far, the rotational configuration strength of Damocles Military Academy has faintly surpassed that of the Imperial Military Academy.

“Jin Ke’s progress is so fast?” Liao Runing sighed and said, “Then we should also make further progress.”

They exclaimed, while the people at the Imperial Academy next to them were shocked. The command and perception of the physical barrier was a term that only reappeared in public view after Ying Xingjue used it, and now the main commander of the Damocles Military Academy can also use it.

Ji Chuyu frowned and looked at Jin Ke, the other party was openly stealing knowledge by using their perception to release a physical barrier.

Unfortunately, Ying Xingjue decided to let Jin Ke steal his studies without taking any measures.

Ji Chuyu frowned and stared at Jin Ke for a while, but in the end, he didn't want to disturb Ying Xingjue.

The physical barrier was not yet able to retract and release freely, so Jin Ke began to notice a faint dryness in his perception. He quickly gave up practicing and focused on dealing with the approaching star beasts.

With the help of two main commanders, the two military academy teams marched forward without bloodshed, unaware of the external uproar.

At the live broadcast, several teachers from Damocles Military Academy stood up involuntarily at the moment when Jin Ke released the physical barrier, their eyes filled with shock.

They were completely unaware that too much had happened on the extremely cold field, especially when Jin Ke released that physical barrier, which was extremely difficult. When everyone at Damocles Military Academy returned, they only talked about their luck and didn't mention it for a while, and even Jin Ke instinctively forgot about it.

The teachers at Damocles Military Academy were equally shocked when they watched this scene.

"Is this a physical barrier of perception?" Lu Zhengxin seemed to see something interesting. "The main commander of Damocles Military Academy was able to achieve this level."

Although Yu Tianhe was surprised, he was not shocked: "When the perception of physical barriers spread in the early years, the Federation had not yet existed at the level of over 3S."

“In that era, the division of perception levels was not clear. Who knows if the commanders who used physical barriers for perception were just like Ying Xingjue, with a level of over 3S.” Lu Zhengxin tapped the microphone, “Maybe the main commander at Damocles Military Academy is also a level of over 3S.”

“Impossible.” Xi Haotian first refuted, “A level of over 3S cannot be determined by a single move. Although there has been a rise in the theory of level change in recent years, everyone knows that it is just a fantasy. The highest point of perception level has always been engraved in everyone’s genes, and we only achieve this highest point through training.”

Lu Zhengxin’s face lit up with a smile and he said, “is that right, I’m a newcomer. When I train to the extreme, my perception always improves a bit.”

Yu Tianhe glanced at him and didn’t say much.

The teachers from other military academies below all had unpleasant expressions, and this competition was like watching the strength of Damocles Military Academy rise day by day. Firstly, there was Wei San who concealed her 3S strength, and now there is another 3S level commander who has used the ability of a super 3S level commander to respond to star attacks. Why are the students in their own school so unpopular? R

“These students.....” Jie Yuman sat down again and tidied up his mood. “They have big ideas one by one.”

Xiang Minghua smiled and said, “Okay, okay, when they come back, we must reward them well.”

.....

After entering the starship, the people from Pingtong Academy and Samuel Military Academy began to sail towards the destination island. During this time, the two teams occasionally went underwater and circled the vicinity of the starship in search of star beasts. At the same time, there are occasional flying star beasts that are lowered in the air to attack, which can be solved by the people of both military academies.

With the starship, they can rest on the deck at any time and stand invincible.

The speed of the Imperial Academy and Damocles Academy under the sea is getting faster and faster. As long as there is no light projection for a long time, their cooperation can quickly be detected by the two military academies on the starship. Therefore, it is necessary to board the ship before Pingtong Academy and Samuel Academy suspect it.

As the crowd was marching, Ying Xingjue suddenly signaled for them to stop: "We're not far from the starship. There are star beasts underwater and in the sky. Let's board the ship at this time."

Jin Ke heard the words and said, "Let's go around and board the ship separately."

Ying Xingjue agreed and left with the team from the Imperial Military Academy.

Chapter 467

As soon as he left, the Damocles Military Academy had no physical barrier. There were no previous teams either. Relying solely on commanding one person to perceive and attack to drive away, there were always times when it was not timely, which meant that the team had to pay a considerable price. They could not cause the death of the star beasts, no team members could be eliminated, even if they were seriously injured, otherwise they would be discovered by the people on the starship.

Jin Ke thought for a moment in place, and finally gritted his teeth to forcefully support the physical barrier, enveloping the team.

“How long do you think this big barrier can last?” Wei San looked around and asked.

“I can hold on until we board the ship,” Jin Ke turned her head and looked at Damocles’ team. “Let’s go.”

This can minimize the damage.

They chased the starship below the sea, and as expected, the two military academies on the starship encountered flying star beasts attacking from high altitude, and the star beasts also began to gather underwater.

The star beasts below the water surface are suppressed by the aura on the starship and do not attack. They just follow them, as if waiting for the people above to take the initiative to come down.

“This is already how many times, all the star beasts belong to them.” Xiao Eli watched with envy as the people from Pingtong Academy sent light mecha soldiers to deal with the star beasts. “Let’s just go into the water, there are so many star beasts.”

Gao Xuelin stared at the starry beast on the sea, which appeared as if it were a shadow, and looked towards Pingtong Academy and others behind the deck. Finally, he decided to go into the water.

Not all the people went down, only half of the team was down, and the remaining half was left guarding the starship.

Gao Xuelin and Xiao Eli led half of the team into the water, while Jill Wood and Xi Wutong stayed on the boat to prevent any changes in Pingtong Academy.

Although the two military academies are cooperating, they do not trust each other and each is on guard.

At the moment when Samuel Military Academy entered the water, Ying Xingjue noticed that they were circling around the bow of the ship, with the least number of star beasts nearby.

He led the team to wait underwater for a while, only to notice the people from Damocles Military Academy approaching before preparing to take action.

There are people guarding around the starship, and if the Imperial Academy and Damocles Academy want to go up, they will inevitably be discovered. What they captured was the astonishment of the starship guards at that moment.

Several main team mechas broke through the water and took off against the guards of the starship, landing first on the ship at that moment.

The main team was able to succeed effortlessly against the members of the team, paving the way for the school team that emerged from behind.

Unfortunately, Wei San was unlucky. As soon as she came out, she was almost pierced by a gun from Zongzheng Yue.

Wei San, who was inside the mecha cabin, was startled and quickly maneuvered the mecha to veer away. She stepped on the starship's hull, used her strength to jump up again, and swung her knife from mid air to attack Zongzheng Yue.

Zongzheng Yue sneered coldly, waved his spear, and directly confronted Wei San's sumi sword.

The sumi sword and the long spear clashed with a piercing sound.

Wei San secretly turned her hand. The marksmanship of Pingtong Academy was indeed impressive, and her hands were almost numb. If she were to replace herself with a slightly weaker person, they might not only be numb, but also shatter directly. R💎

She originally had no support point, unlike Zongzheng Yue, who stood on the boat and was carried into the water by him after a few attempts.

As soon as she fell, she saw several star beasts starting to charge towards her. Wei S

"Wei San, come up quickly!"

Someone on the starship shouted underwater.

Wei San immediately jumped up and broke through the water again, successfully boarding the ship this time.

Zongzheng Yue was entangled by Huo Xuanshan.

"Thank you," Wei San swished her hand.

"I'll hand him to you, I'll leave first." Huo Xuanshan saw Wei San coming up and immediately left on the other side.

Wei San: "No....." they should at least team up to remove Zongzheng Yue out of the game before leaving.

Zongzheng Yue scanned the surroundings and said, "The Imperial Military Academy has actually joined forces with you."

"Look at how you speak." Wei San snapped back, "don't be jealous. You can come and cooperate with us next time."

Zongzheng Yue said coldly, "Arrogant boast."

Wei San reversed her Sumi sword and aimed her long sword at the Zongzheng Yue, saying, "Even though you were the first to show off your words, I kindly answered, and I will be beaten down."

Avoiding the gunhead of Zongzheng Yue, Wei San sighed and said, "You guys are really unaware of the situation."

Chapter 468

Zongzheng Yueren's jaw tightened, and his rifle settled down, abandoning all distractions. His hand turned without a trace, and the rifle shot straight at Wei San's calf.

His rifle appears to hit only once on the surface, but in reality, it strikes frequently.

Rare was it for Wei San, after being shot by his rifle, she immediately softened her calf and knelt down on one knee.

Zongzheng Yuerenren was not this move. At the moment she knelt down, the rifle had already hit Wei San's shoulder.

The pain that spread from her shoulders to her brain made Wei San unconsciously lower her upper body. Looking from afar, it was as if she had knelt down on one knee and lowered her head to Zongzheng Yueren.

In the eyes of Zongzheng Yueren, there was a strong sense of killing intent. This Wei San challenged himself several times to make her understand that the gap between 3S level soldiers cannot be filled with just a little luck.

He clenched the rifle and with a slight turn of his hand, the rifle came to Wei San's head.

Zongzheng Yueren wanted to shoot Wei San in the head with one shot.

The audience in the live broadcast room and the teachers at the Damocles Military Academy were thrilled to see this scene.

“Pa ——”

The sound of the collision between the rifle and the mecha shell is extremely piercing.

Wei San still maintained a kneeling position on one knee, but at this moment her upper body had straightened up. Her other hand tightly held the rifle, completely ignoring the tingling sensation in her arm.

“Don't do anything more than three times.” Wei San held the rifle of Zongzheng Yueren and forcefully stood up. “You don't understand this truth?”

Zong Zhengyue's pupils shrink, she was able to stand up. He used a force of ten to ten to hit the three shots just now.

As he forcefully withdrew his rifle, Wei San released her hand.

“Hey, these are some good moves from you.” Wei San spoke as if she was acting normally, and the momentum he had just managed to create dissipated.

At this point, the vigilance of the people of Zongzheng Yueren had already reached his peak.

Wei San smiled and said, “Why aren’t you talking? You don’t believe me? Then I’ll let you feel it.”

As soon as these words fell, Impermanence approached Zongzheng Yueren like a ghost.

Zongzheng Yueren retreated one after another, and when he fired again, he no longer had the determination to hit with one shot.

Live stream.

“Zongzheng Yueren is in chaos.” Lu Zhengxin leaned back in his chair, “I’m afraid he didn’t expect anyone to stand up after he exerted all three moves. However, with the machine joints made of the Phaseless Bone and the bonus of Purple Mushroom Liquid, his three moves were not good enough.” ◆

Yu Tianhe looked at the fight on the live broadcast camera and said, “The super 3S class mecha is indeed strong.”

Lu Zhengxin's gaze inexplicably swept over Yu Tianhe and looked back at the military academy students on the starship at the competition field.

Wei San approached Zongzheng Yueren and held the circular ring in the middle of the Sumi sword, aiming the handle at him. When she swung it back, she was dodged by Zongzheng Yueren.

He just forgot that Wei San's Sumi Knife could be opened into two combined knives.

At that moment, Wei San split her sword in half, still using the handle to strike straight at Zongzheng Yueren's calf.

The same tactics, the same frequency, were given to the Zongzheng Yueren.

Compared to the pain from his calves, Wei San's moves shocked Zongzheng Yueren even more.

With the same angle and the same high frequency, he even lost his mind for a moment, was Wei San a member of the Pingtong Academy.

"There's another move," Wei San followed suit and also hit Zongzheng Yueren's shoulder, causing him to bow his head.

"Tut tut, why are you kneeling here and there?" Liao Ruling was chased by Xi Wutong and passed by, still not forgetting roast.

In the next second, Zongzheng Yueren became violent and attacked her, without giving Wei San another chance.

Wei San retreated one after another and turned her head, saying, "I'll tell you a secret."

Zongzheng Yueren is no longer distracted by her words and is determined to defeat Wei San.

Hand in hand, Wei San grabbed the Sumi knife again, and the two faced each other head-on again.

Knife and gun duel.

The place where the two mechs are standing has already begun to crack.

Wei San held her Sumi sword in both hands and pressed it against Zongzheng Yueren's rifle. The two of them were very close, and suddenly she bent her knees and kicked him.

Chapter 469

At the desert arena, Huo Zi'an from Pingtong Academy was once ambushed by her move. Zongzheng Yueren's gaze paused and he dodged her knee, but a dagger popped out of Impermanence's knee.

Wei San was just trying to attract his attention. The body of the Sumi knife condensed white frost, and in an instant, it spread along the intersection of the knives and guns.

When Zongzheng Yueren realized something was wrong, it was already too late, and the hand holding the rifle was tightly glued to Bai Shuang.

He instinctively released his strength and wanted to get rid of this strange frost.

Zongzheng Yueren have already been defeated from here.

Wei San drew out her sword, one of which was still fighting against the rifle, while the other sword was directly inserted into the mecha energy lamp of Zongzheng Yueren.

The lights went out.

[Pingtong Academy Zongzheng Yueren is out, repeat, Pingtong Academy Zongzheng Yueren is out.]

Wei San raised her lips and said, "You can't beat me."

Zongzheng Yueren stood on the starship, unable to move, unable to accept this reality.

As soon as this broadcast was broadcast, both members of the Pingtong Academy who were resisting two military academies on the starship and fighting against flying star beasts in mid air were stunned.

They were momentarily taken aback and gave a call on their phones, and for a moment, the sound of the announcement that the person from Pingtong Academy lost kept ringing.

The teachers at Pingtong Academy on the live broadcast had extremely ugly faces.

Zongzheng Yueren was eliminated, and many members of the school team were also eliminated together. The situation at Pingtong Academy has declined, and there is basically no chance of winning the championship. Even whether their ranking can be achieved is another matter.

“Unfortunately,” sighed Lu Zhengxin, “this should be the first time a member of the main team has been eliminated so early in five matches, and he is still an important member of the main team.”

Xi Haotian looked at Lu Zhengxin and couldn’t tell from his tone how regretful it was.

On the starship at the arena, Wei San calmly withdrew her sword and said, “Friend, it’s time to go back home.”

Zongzheng Yueren emerged from the mecha, his face pale like a ghost, and he still cannot accept the reality of his sudden exit.

Those who are eliminated will be taken away from the field, and Pingtong Academy will suddenly lose Zongzheng Yueren, causing chaos in the formation. By the time commander Lu Shibai regained his senses, Pingtong Academy has been completely suppressed by the people of the Imperial Military Academy.

Huo Xuanshan was dealing with Jill Wood, while Xi Wutong and Liao Runing were fighting. After hearing that Zongzheng Yueren of Pingtong Academy was out, Xiao Eli and the others below the water finally got rid of the star beasts and returned to the star ship.

Wei San turned her wrist and approached Xiao Eli. She warmly greeted him first, "Eli, I slapped you before. Do you want revenge now?"

Xiao Eli: "....." Damn it, don't think he doesn't know that she got Zongzheng Yueren out just now.

"Otherwise, we'll abandon the ship?" Xiao Eli quickly turned his head and asked Gao Xuelin.

Gao Xuel

He shouted to Ying Xingjue from the Imperial Military Academy, "Commander, this ship will be split in half with you. The champion will be given to you when the time comes, and we only need to get the ranking. If we cooperate with Damocles Military Academy and reach the destination island, you will inevitably have a fierce battle. It would be better for our two schools to join forces and drive them down now."

Wei San turned her head and looked expressionlessly at Gao Xuelin and Xiao Eli, saying, "Whether we cooperate or not, you all have to be eliminated today."

Ying Xingjue raised his eyes and said calmly, "The Imperial Academy does not cooperate with the weak."

Upon hearing this, Xiao Eli was furious and said, "With just your false aloofness, I bet Damocles Military Academy will win the championship."

Gao Xuelin: "....."

Other people arou

"Thank you," Wei San said sincerely. "Brother Eli, I'll take your words lightly later."

Several of the main members on the starship were still engaged in a fight, with Huo Jian facing Huo Zi'an. Takeshi Kosakai from high altitude landed on the starship, facing Situ Jia.

"I heard you were injured?" Situ Jia looked at Takeshi Kosakai, "There's no need to continue fighting. Why don't you abandon the ship?"

Takeshi Kosakai remained silent and went straight to fighting.

Pingtong Academy is missing one main member, and Samuel Military Academy is not enough to watch. For a while, the results of the battle on the starship are obvious.

Just as everyone thought the overall situation was timed, there was a problem on Huo Xuanshan's side.

The heavy mecha Jill Wood from Samuel Military Academy is a double S-level, and as a 3S level soldier, Huo Xuanshan naturally wants her to be eliminated once they face each other. He is ruthless in his actions, but he has yet to succeed.

Jin Ke was watching the battle, and after Zongzheng Yueren was eliminated by Wei San, he withdrew his gaze and kept looking at Huo Xuanshan and Liao Runing.

Chapter 470

Liao Runing and Xi Wutong are both at the level of 3S. He was originally more concerned about this side, but Huo Xuanshan has not yet succeeded, so he can't help but start paying attention to Jill Wood.

Her tactical literacy is extremely high. Although her speed is not as fast as Huo Xuanshan, she can predict his route ahead of time.

Jin Ke thought it seemed more and more wrong, he was too familiar with this scene.

When Wei San was still the school commander, her strength was confined to A-level mecha, which was her performance. Although she couldn't keep up with the speed, her combat skills were very high.

Jill Wood is like a replica of Wei San, as if her strength is confined within the double S-class mecha.

Jin Ke contacted Huo Xuanshan to be careful through perception.

Huo Xuanshan himself had already noticed that Jill Wood's strength was constantly increasing.

Once again, Huo Xuanshan made a mistake and almost got hit by Jill Wood's axe. She struck the starship with both axes, directly shattering most of the deck.

This kind of intensity cannot be easily achieved by a dual S-level soldier,

The two completely caught everyone's attention.

Xiao Eli turned his head to look at Jill Wood and said, "She hasn't been knocked out yet."

Gao Xuelin noticed something and said, ".....let's withdraw."

Ying Xingjue looked at Jill Wood, and compared to others' speculations, he could directly determine that she was at the level of 3S.

Ever since the fight with Huo Xuanshan, Jill Wood's perception has been constantly rising, like.....on-site upgrades.

Huo Xuanshan is the person who trains his hands. If Jill Wood is currently using a 3S mecha, he will definitely get injured.

The people of Samuel Military Academy all went into the water and left, and the nearby sea creatures began to follow them.

“What’s the situation with Jill Wood?” Liao Runing was hit several times by Xi Wutong, his head still a bit heavy.

“Her perception is constantly improving.” Huo Xuanshan frowned and looked down at his hand, feeling that..... the other person seemed to be constantly improving, while he stood still.

Wei San came over and said, “Can perception still be upgraded?”

“Maybe she’s just like you.” The camera was still there, and Jin Ke added falsely, “Samuel Military Academy deliberately concealed their strength.”

Live streaming.

The teacher at Samuel Military Academy said, “.....” Keep it a secret my ass!

Jill Wood was originally a member of the main team, unlike Wei San who rose from the main force and could even bring his own mecha when entering the main team.

“Is she at the 3S level?” The teacher at Samuel Military Academy was dumbfounded, half happy and half angry in his heart. “Why did Jill Wood hide it without authorization? She still wastes resources to make a 3S mecha now. Besides, in such a short time, she thinks she’s just like Wei San and can adapt quickly?”

“I think it doesn’t seem like she’s hiding it, she has been using the Double S mecha for many years,” said another teacher. “It’s more like she suddenly upgraded.”

“How can perception be upgraded? Nonsense.”

“When they come out for perception testing, we’ll know what level Jill Wood is.”

The main commentators on stage looked at the direction of Jill Wood’s departure, each with their own thoughts.

“There are actually people in this world who can upgrade their perception,” sighed Lu Zhengxin. “This generation of military academy students is becoming more and more interesting.”

Yu Tianhe’s gaze flashed with a hint of coldness and he said, “I don’t believe perception can be upgraded. Everyone’s perception level is already engraved in their bones. Even if Jill Wood is at level 3S, she should have been at level 3S originally.”

Xi Haotian also doesn’t believe it, the existence of the over 3S level has been confirmed because the appearance of Ying Xingjue has been confirmed, but the perception has been upgraded? It’s impossible. Since the emergence of perceptive individuals in the federation, no one has ever been able to perceive upgrades. The so-called perceptual upgrade refers to the perception that already exists within the stimulus gene.

The people from Samuel Military Academy abandoned the ship and left, leaving only the people from Pingtong Academy.

Situ Jia was momentarily unaware and was kicked away by Takeshi Kosakai, colliding with the side of the ship.

Takeshi Kosakai clenched his Lianwu bow and scanned all the people on the starship at the Damocles and Imperial academies. Finally, his gaze focused on Wei San and Ying Xingjue.

Takeshi Kosakai grinned in the cockpit of the mecha, then suddenly grabbed the Lianwu bow and pounded it hard, piercing the deck and causing the mecha to fall into the water.

The remaining main members of the Pingtong Academy were prompted to smash armor plates and chisel through the ship before leaving.
