

## Smash All 471

### Chapter 471

The people from the Imperial Military Academy and the Damocles Military Academy rushed to stop him, but they were only partially stopped, and the starship was ultimately broken.

When Wei San went down to where Takeshi Kosakai was hiding, she followed suit and jumped down, not to chase him, but to find the broken boat board.

These boat planks carry an aura that makes other star beasts fear it. Losing the planks and replacing them with ordinary materials will only turn the ship into an object surrounded by underwater star beasts.

The other main members also went into the water to search for boat planks. Wei San threw up a few broken boat planks and said, "Chenghe, hurry up and bring people, repair the boat planks."

Ying Chenghe said, ing."

He had to secretly brainwash himself and the other mecha engineers of Damocles: mecha engineers should be omnipotent, repairing ships, they can!

As soon as the starship broke down, the underwater star beasts arrived very quickly. Ying Xingjue and Jin Ke had to go into the water and use perceptual attacks to drive away the star beasts.

Wei San and the others were still searching for broken boat boards. Liao Runing was cursing and cursing as he searched. He thought that after taking the star ship, he could rest for a while. If the people of Pingtong Academy couldn't win, they would still use a shady move.

Ying Xingjue was at the stern of the ship, and Jin Ke was in charge of the bow. The two of them worked together to drive away the underwater star beasts.

Wei San has found a few broken boat boards and passed them on to Huo Xuanshan, asking him to take them to the mechanic for repair. She turned around to find other broken boat boards

Turning from the side of the ship all the way to the stern, Wei San saw a small piece of broken boat board floating behind Ying Xingjue, and she immediately followed the water flow.

Ying Xingjue noticed someone approaching and looked sideways, realizing it was Wei San's mecha. She quickly moved straight towards her, and the two of them were so close that he could clearly see all the patterns on Impermanance's shell from the window. He couldn't help but be stunned and stood still, saying, "You....."

Wei San reached over Ying Xingjue's shoulder, held the broken boat board in her hand, and then withdrew her hand.

She shook the broken boat board in front of Ying Xingjue's eyes and said, "Remember to pick it up when you see this."

After speaking, she turned around and walked up.

Ying Xingjue returned to his senses and said, "I know where all the fragments are."

Wei San only then remembered that this was a commander of over 3S level and said, "Okay, you tell me, I'll go find them."

Ying Xingjue raised his hand and pressed on his forehead, wanting to ask if she could connect through perception.

Wei San nodded, indicating that he could.

He slightly closed his eyes and covered the area with his senses, feeling all the waves below the sea, the vibrations caused by fragments sinking into the water, and all the information constantly flooding into his mind.

Ying Xingjue selected the information he wanted from countless huge streams of information, and finally opened his eyes. His voice came to Wei San's mind: "There are two broken boat boards 9 meters from the side of the starship."

Wei San immediately turned around and indeed saw two small broken boat planks. As soon as she received them, Ying Xingju's voice reappeared in her mind.

He said one, so she went to get one and grabbed all the broken boat boards when a large number of star beasts gathered.

Ying Chenghe conducted on-site research on how to repair ships, but fortunately, the mecha engineers were truly a skilled craftsman who could quickly learn how to even repair ships. In the end, each one of them even had their own patterns on the inner walls of the ship's hull.

After making up for it, Ying Chenghe went to the Imperial Military Academy to reimburse half of it.

Gong Yijue looked at Ying Chenghe strangely and couldn't explain. He didn't know how Ying Chenghe became like this now. He didn't have the consciousness of a top mecha engineer and did everything.

"You.....Damocles Military Academy is so poor that you need mecha engineers to do everything?" Gong Yijue shook his head, "You are actually so skilled at repairing ships."

Ying Chenghe is now thick-skinned: "Thank you, I also think we have the talent to repair ships."

Gong Yij

"The star beast did not attack the hull." Jin Ke stood beside the deck, looking down at the sea. The underwater star beast followed closely, but did not come forward.

The two military academies were busy for a long time and finally had time to rest.

Damocles Military Academy accounts for half of the ship, and the people from the Imperial Military Academy account for the other half. They are still clearly divided.

“How did it feel to play against Jill Wood just now?” Jin Ke asked Huo Xuanshan.

Huo Xuanshan touched his wrist. He was slashed by Jill Wood in the previous close combat, and he can still feel the pain: “At first, I thought I would be able to deal with her quickly, but she escaped several times, and even later her momentum is rising little by little.”

Huo Xuanshan thought about the words: “It seems that I inspired her potential.”

Jin Ke glanced at Wei San. Wei San had been tested and found that her gene was super 3S. The reason why she was not discovered was because Wei San was born in an unnamed star and had no power, so no one tested her.

But Jill Wood is different. If she was level 3S before, she would have been detected long ago.

Unless she can evolve.

Chapter 472

Exit of Xita Arena.

“They’ve come out, they’ve come out!!”

As soon as the media reporters waiting outside the exit heard this, they stood up one after another, crowded forward, and pointed their cameras at the exit to interview the first member of the main team to be eliminated.

Zongzheng Yueren walked out of the exit expressionlessly.

“Zongzheng Yueren, how do you feel about your elimination from the competition?”

“At the start, all forces commented that you would engage in a final battle against Ji Chuyu. Now Wei San suddenly appears and singles you out. Is there anything you want to say?”

“May I ask what you were thinking when you were eliminated?”

“Zongzheng Yue, look over here, is Wei San really that powerful?”

.....

Countless lights shone on Zongzheng Yueren’s face, and various questions were thrown at him.

Pingtong Academy’s teacher, blocking the reporter’s microphone, and wanted to bring Zongzheng Yueren away from the scene.

No one would have thought of such a thing.

At that time, Wei San broke out of the water and faced Zongzheng Yueren. The teachers at Pingtong Academy even imagined that Zongzheng Yueren could kill Wei San in the water, but instead he ended up like this.

“Zongzheng Yueren, if you were given another chance, are you sure you can beat Wei San?” Some reporters mocked loudly.

“Let’s go.” The teacher wanted to bring Zongzheng Yueren away, but he took the initiative to stop.

Zongzheng Yueren stopped and looked at the camera, letting the camera shine on him, and expressionlessly laid out: “Next time, I will win. Wei San will never beat me with my moves again.”

“What if Wei San wins again?”

“Impossible.” Zongzheng Yueren tensed his hands, obviously thinking of the humiliation on the starship again. This was the biggest shame in his life, losing to such a person.

All this time, the only opponent in his heart was Ji Chuyu from the Imperial Military Academy.

Wei San?

A thing that pops up from nowhere.

Next time he'd give her a taste of being eliminated.

.....

As the starship sailed towards the Destination Island, the two military academies would kill the star beasts following along from time to time, waiting to harvest resources.

The light projection lights up again and again.

South Percy Military Academy never thought about having any entanglements with these military academies from the beginning, and focused on pursuing its own path. From the beginning when they saw the light curtains of Pingtong Academy and Samuel Military Academy lighting up in the same direction. Now that Pingtong Academy Zongzheng Yue has been eliminated, and the light curtains of Imperial Military Academy and Damocles Military Academy have lit up instead of those two military academies, Gao Yinying knew that the starship has fallen into the hands of the Imperial Military Academy and Damocles Military Academy.

"Before, I thought Zongzheng Yueren was the only one who could compete with Ji Chuyu. Now it seems that Ji Chuyu is still the strongest soldier." Kunli Eli said while looking at the light projection rising from time to time on the sea.

"This time Pingtong Academy suffered a big blow, Samuel Military Academy will probably not do well. We must seize this opportunity." Gao Yinying looked back at the team of South Percy Military Academy, "Let's speed up."

“yes.”

.....

Samuel Military Academy.

After they entered the water, they fled all the way to the reef beach, relying on Gao Xuelin’s perception to attack, but he could not completely protect the entire team, and a fight broke out in the middle, and some members of the school team were eliminated.

After landing, Gao Xuelin ignored his splitting headache and grabbed Jill Wood and asked: “What happened on the starship before?”

Chapter 473

Jill Wood stretched out his hand to support Gao Xuelin to prevent him from falling: “I don’t know, I just feel that my body feels much lighter suddenly.”

“Is it true that the level of perception can evolve?” Xiao Eli always spoke freely and spoke whatever came to his mind, “I heard that there are star beasts on Huanye Star that have begun to evolve, so the evolution of us humans is nothing.”

Gao Xuelin: “.....”

Although all major aristocratic families have spies everywhere, Xiao Eli's opening his mouth is no less than telling everyone that the Eli family has spies on Huanye Star.

Xiao Eli is still fantasizing: "Jill Wood can evolve, and it will be my turn soon. By then I will become a super 3S level, and Wei San will be directly eliminated by me. Our Samuel can definitely get the championship."

"Okay, you go and investigate the surrounding environment." Gao Xuelin pushed Xiao Eli away. If he listened to him again, he might faint from anger.

Jill Wood watched Xiao Eli walk away and said: "Commander, I really feel that our double-S mecha is not enough anymore."

"This time I will try my best to help you redeem the main resources needed for the 3S mecha." Gao Xuelin turned to Yu Puxin and said, "From now on, you can integrate Jill's data."

Although it is still uncertain whether Jill Wood will evolve into the 3S level, Gao Xuelin is willing to take this risk and exchange all resources for what the 3sSmecha needs.

Only when all members are level 3S can they compete for that position, and only then will the Imperial Military Academy take their eyes on them instead of saying they won't cooperate with the weak.

.....

When night fell, Wei San couldn't sleep, so she sat down against the side of the deck. The person keeping watch next to her happened to be Huo Jian.

She raised her head and looked at Huo Jian for a long time. She felt that among the Huo family, Huo Xuanshan looked the most pleasing to the eye.

“Aren’t you going to sleep?” Liao Runing asked her, “Then you come here and help me watch. This young master can’t stand it any longer and needs to go to bed.”

Wei San stood up, patted her knees, and walked towards Liao Runing: “Young people are so mentally ill?”

“Young Master, I, need to take care of myself. I can’t be like you at such a young age, with two big dark circles under my eyes.” Liao Runing ran away after saying that, for fear that Wei San would do something.

Wei San stood by the deck, looking at the star beasts under the water and the flying star beasts hovering in the air, and clicked her tongue. These star beasts were like maggots attached to their bones.

But they are all living resources.

“I’ll go down and warm up.” Wei San informed to the members of the Damocles Military Academy.

For an hour, Wei San kept making moves under the water, and the broadcasts sounded one after another.

The audience who originally fell asleep watching the live broadcast were woken up by this machine gun-like broadcast and stared at the live broadcast camera with wide eyes.

Not to mention the people who were resting on the starship. Jin Ke opened his eyes and listened for a while before falling back asleep. The person who could do such a thing was either Wei San or Liao Runing.

Wei San stirred things up below, broke through the water and came out. She was about to return to her seat and continue vigil when she suddenly discovered that there was an extra person on the deck.

It was Ying Xingjue from the Imperial Military Academy. Her eyes glanced at his waist, and she turned away with a little discomfort. She didn't want to see the test tube, especially the contents inside.

Whether intentionally or not, Ying Xingjue walked from the stern to the bow, and then patrolled from the bow to the stern, always passing by Wei San, and she could not help but see the test tube on his waist.

"Commander Ying, why don't you take a rest?" Wei San took the initiative and said, "You commanders need to rest more and regain their senses."

"I heard the broadcast echoing just now and couldn't sleep for a while." Ying Xingjue said quietly.

Wei San frowned slightly, blaming her for the noise.

“Really, my hands were itchy just now. Next time you guys are resting at night, I won’t make any moves.” Wei San said hypocritically, “You can go and rest now, I promise not to make any noise.”

Ying Xingjue’s dark eyes looked at Wei San, as if he had a lot to say, but in the end he just raised his lips and smiled.

Under the moonlit night, with the sea breeze blowing on his face, the handsome young man with long hair raised his lips and smiled. It stands to reason that Wei San would not be suitable for this beautiful scene if she did not whistle.

Unfortunately, her eyes were entirely focused on Ying Xingjue’s hand which was inadvertently placed on the test tube at his waist.

If he read it correctly, just after Ying Xingjue met her eyes again, his eyes suddenly fell on the test tube.

Is this..... a hint?

Wei San looked at Ying Xingjue who turned to leave. What was he hinting at?

Forget it, Wei San can’t figure it out. She’ll ask him for clarification after the competition is over.

The starship was still moving forward, and the sea seemed extremely calm.

#### Chapter 474

After Huo Xuanshan finished his rest, he came out to take over and saw Wei San: "Where is Master Liao?"

"He's sleeping, you watch, I'm going to sleep." Wei San patted Huo Xuanshan and walked inside.

"Ok."

When Huo Xuanshan passed by, he happened to pass by Huo Jian. Their eyes met. He nodded and Huo Jian left.

.....

The night was uneventful, and everyone came out in good spirits.

"We can start working." Liao Runing flexed his arms and legs, "Jin Ke, tell me how many resources you need today, and we will help you obtain them."

Jin Ke turned on his light brain. The light brain's signal in the arena was blocked by the shielding device carried by the aircraft above. He could only receive the data provided by the aircraft at high altitude. He

looked at how many star beasts there were in Damocles Military Academy that had not been redeemed:  
“The more, the better.”

He didn’t forget that Wei San’s mecha was still an incomplete super 3S-level mecha.

It will take at least four days to drive the starship to reach the destination island, and the time taken to reach the destination island by land will be doubled.

They still have three days to hunt the star beasts on the sea. They will definitely have enough resources this time, but they may not be able to exchange them for good mecha materials.

After all, good things like the materials that the exchange office passively flowed into the collection office will only happen once.

The two military academies stayed on the starship, did not interfere with each other, and divided their respective areas to deal with the star beasts.

Wei San didn’t head down into the water today. She fetched a chair from somewhere and moved it to the deck. She sat down and began to bask in the sun with her eyes closed. She placed one foot on her knee and shook it from time to time.

Live broadcast.

Many spectators and commentators: “.....”

Xie Yuman: “.....”

Xiang Minghua gritted his teeth: “.....I knew she would get itchy if she didn’t come up with a new trick for a day. Look at the mecha engineers of the Imperial Military Academy standing in front of the deck to pay attention to the battle situation.”

“Where is Ying Chenghe?” Hearing Xiang Minghua mention the mecha engineers, Xie Yuman couldn’t help but pay attention to the mecha engineers at Damocles Military Academy.

Xiang Minghua was stunned and looked around at the camera, but he still didn’t see where Ying Chenghe was.

Half an hour later, Ying Chenghe rolled up his sleeves and turned up out of nowhere. He walked to Wei San and looked up at Huo Xuanshan, who was still entangled with the flying star beast in the air: “I just went to check. The ship’s decking has been repaired and there is no leakage. As long as there is no storm, there will be no problems. “

After he finished speaking, he suddenly became quiet and faced Wei San who was sitting on the chair and had just opened her eyes.

Wei San: “Did you just set up a flag?”

Ying Chenghe: “.....No I didn’t, did I just say something just now?”

“No, I didn’t hear anything.”

The two of them looked at the calm sea level together, with only one thought in their minds: No way right, with such good weather, there won’t suddenly be a storm right.

Every move of these two people was completely transmitted to the live broadcast room through the camera.

[In a daze, if there is a storm, it must be the fault of Damocles Military Academy! 】

[How many times has this team’s crow mouth occur? 】

[Have there been military academies in the past where a starship encountered a storm? 】

[Yes, there will be a military school who meets the storm head on every few years. If they are lucky, it will pass. If they are not lucky..... I remember about seven years ago, one military school won the starship, but it ran into a storm, was swept far away, and when they finally broke free from the storm, the starship returned to its starting point, but was won by the military academy that traveled overland. 】

.....

The two of them were extremely quiet. When Jin Ke and others came up, they were so quiet that the others even felt a little uncomfortable.

“What’s wrong?” Jin Ke asked.

“It’s nothing. I’ll go down and check the ship’s planks.” Ying Chenghe said proactively.

“Hey, Chenghe.” Liao Runing called him, “Please help me take a look at the mecha. The waterproof cover was punctured by the star beasts underneath, and the mecha cabin almost flooded.”

Ying Chenghe had no choice but to stay and check the mecha for Liao Runing.

“I’ll go down and see if there’s any water leakage.” Wei San stood up and said.

“Can you mend the boat?” Ying Chenghe turned around and asked specifically in front of everyone.

Wei San made a hand gesture: “Yes.”

Chapter 475

She walked down the stairs, inspecting the side of the ship that had been repaired before. All the broken ship boards had been spliced together and sealed with glue.

The water did not leak, but the firmness is worrying. As long as those star beasts bump hard, it will break immediately. Now it's all about relying on the shell coating to fool the star beasts under the water.

Wei San walked to the first and largest broken ship plank, which was broken by Takeshi Kosakai.

She walked around the gap. Ying Chenghe should have repaired this area with his own hands. Just like his method of transforming the mecha, he pursued perfection in every step and all data must be consistent.....

Wei San bent down and felt along a gap on the side. There was no glue here.

She squatted down and peeled off the glue. The outside was stuck and no water leaked in, but the internal gaps in the broken shipboard were not fixed at all.

Unlike Ying Chenghe's style, he has obsessive-compulsive disorder and it is impossible to miss this piece.

Wei San got up and walked back, looking for a mecha engineer to apply some glue. She went back to repair the small gap and took a photo before repairing it.

"Chenghe, was it you who repaired the largest piece of shipwreck? Did you check it just now?" When Wei San came back from repairing the boat, Ying Chenghe was already repairing Huo Xuanshan's mecha.

"I patched it yesterday." Ying Chenghe squatted on top of Huo Xuanshan's mecha and spoke without raising his head, "I just checked, what's the problem?"

“There is a small gap that has not been fixed.” Wei San showed him the photo.

Hearing this, Ying Chenghe stopped what he was doing and looked at the photo carefully: “Here? I fixed it before, and it was fine when I checked just now.”

Wei San frowned. Although Ying Chenghe didn’t take care of his hair and was slovenly, he always treated this carefully and even had obsessive-compulsive disorder. Since he was sure there was no problem, then there was no problem.

“Why was it broken? Who opened it.” Ying Chenghe enlarged the photo, “This kind of mark doesn’t look like it was broken on the outside. Maybe my glue touched something and didn’t stick properly.”

Wei San closed the photo: “Forget it, I just glued it on.”

.....

Ying Xingjue sat in the room, resting on the table with one hand.

There are cameras here, but they can choose to turn them off. Ying Xingjue turned them off early in the morning.

After a while, Ying Xingjue opened his eyes, took out the test tube from his waist, and placed it on the table.

The black mist in the test tube was still moving slowly inside, without any signs of fatigue.

Ying Xingjue's perception was always covering it. When he looked at the black mist, he felt murderous intent and wanted to destroy it, but he was always in control.

He put his fingertips on the test tube and stared at the black mist, his thoughts spreading.

Suddenly, Ying Xingjue raised his hand and moved back, and a physical barrier covered the vent in the room.

He turned around and looked over there, his eyes paused.

——Black bug.

To be more precise, it was a black insect mist in the shape of a drop of blood.

Ying Xingjue picked up the test tube on the table, approached the drop of blood insect mist, and suddenly discovered that the black mist in the test tube began to rotate faster. *r A NòÈŞ*

He watched the two black clouds of insect mist struggle continuously and pondered for a long time. Finally, he raised his hand and pricked the blood on his fingertips, dripping on the drop of black insect mist that moved from the vent.

Ying Xingjue lowered his head and looked at the black insect mist inside the test tube. They were rapidly rotating and spreading, and even had the tendency to hit against the walls of the test tube.

The black insect mist in the vent was struggling, obviously greedy for his blood, trying to occupy the energy inside, but unable to bear it, and finally melted and disappeared.

Ying Xingjue did not take this lightly, but used his own perception to crush this drop of blood. At this moment, the black insect mist in the test tube seemed to feel that the insect mist outside died, and resumed its original slow swimming state.

These things.....seem to be able to devour human flesh and blood when they are in large numbers.

Maybe even a star beast.

Ying Xingjue stood in the room, lowering his eyes and thinking deeply: So the star beasts and troops under the Huanye Star Abyss disappeared without a trace after they fell, and super 3S level perception or blood can suppress these black insect mist?

He quickly recalled the list of Huanye Star's soldiers who had died under the abyss in his mind. Without exception, they were all people below double S level.

Those people were not strong enough, so when the crack started, they didn't have time to react and they all fell into the abyss.

#### Chapter 476

At that time, there were also double S-level high-level star beasts in the southeast that fell into the abyss and disappeared. It can be speculated that these black bugs can devour double S-level and lower star beasts and humans.

Super 3S level can suppress it, while 3S level.....is unknown.

Ying Xingjue stood in the room without moving. Whose blood was that drop of blood-like black insect mist on the vent just now?

.....

"The organizer is a good person." Liao Runing said sincerely, holding the plate.

Not only can the starship drive all the way to the destination island, it also has a large canteen filled with instant food. Although it is not as good as the canteen, it is still richer in taste than nutrient solutions.

Wei San's plate was filled with all kinds of food. She couldn't bring in the special nutrient solution, and her bottomless stomach temporarily returned.

"I just looked at the list at the exchange office, and there's nothing good." Jin Ke said to Wei San, obviously talking about mecha materials, "Let's exchange it for something else first."

"Impermanence can still hold on." Wei San said nonchalantly. The exchange office had limited resources. When the competition was over, she would look elsewhere to see if she could find a suitable engine and engine fluid.

Jin Ke didn't think so, and approached and said, "You knocked Zongzheng Yueren out yesterday. A big reason you were successful was because you confused him with your moves."

Although everyone knew before that Wei San liked to learn other people's moves, but that was to deal with star beasts. Yesterday, Wei San suddenly used Zongzheng Yueren's signature moves on people, and everyone was dumbfounded.

But next time, Zongzheng Yueren will be mentally prepared to protect his energy lamp and fight against Wei San. It is not necessarily who will win. Zongzheng Yueren had more than ten years of mecha training that was not in vain. He himself is a proud man of heaven.

Jin Ke quietly pointed at Ji Chuyu at the opposite table: "I'm afraid that guy already has a way to deal with you."

Wei San chewed the soft cake in her mouth: "We can only see if I can find suitable materials for me in the competition field."

"It's hard to find. I've only heard that Gong Yiliu left something at the Guyu Arena. I haven't heard of anyone leaving any treasures at other arenas." Jin Ke sighed seriously.

Wei San stretched out her foot under the table and kicked him, “Then why did you speak so much gibberish.”

“You kicked me?” Liao Runing raised her his and complained to Wei San, then stretched out his foot and kicked Huo Xuanshan.

Huo Xuanshan didn’t know that Liao Runing was taking this opportunity to cause trouble and kicked Liao Runing violently, but Liao Runing leaned towards Wei San.

Ying Chenghe quietly retracted his feet and allowed the four people to kick around. He also picked up his plate to prevent the table from being kicked over.

Students from the Imperial Military Academy heard the movement from their table and couldn’t help but look over subconsciously.

“.....”

They were afraid there’s something wrong with these people from Damocles Military Academy.

When everyone was relaxing, thunder sounded in the sky.

Wei San suddenly paused and looked towards Ying Chenghe.

Ying Chenghe stiffly froze: “.....Haha, there won’t be a storm right.” It must have been an illusion he heard just now.

Everyone didn’t even eat, and ran directly to the deck to see what was going on outside.

The sky suddenly turned dark, and the originally calm sea surface was now ready to explode, like a powder keg that could pop at any time.

Wei San: “Does your mouth have a cheat code?”

Ying Chenghe: “.....How about I just speak the opposite from now on?”

Liao Runing looked at Ying Chenghe: “You asked for a storm?”

Master Ying looks at the sky and the sea, but not at the rest of the main team.

Jin Ke was still calm. He walked to the middle and met Ying Xingjue head on: “Looking at the situation now, a storm is coming. If the starship does not sink, we are still on the same boat. If it sinks, we will go our separate ways.”

Ying Xingjue nodded slightly, agreeing with what he said.

Jin Ke was a little surprised. He didn't know if it was his misunderstanding. Ying Xingjue was much quieter than yesterday, although he still spoke the same few words.

"The military academy that won the starship in that session was the Imperial Military Academy. They originally won with their strength, but a storm brought the starship back to the starting point, and they ended up in last place." Liao Runing was still gossiping with Wei San.

"That championship was still won by the Imperial Military Academy." Huo Xuanshan added.

Ying Chenghe comforted himself: "If you are too strong, it doesn't matter if you are unlucky, like us."

Everyone entered their mechas and maintained a fighting state to prevent the starship from being damaged, falling into the water, and being attacked by nearby star beasts.

The sky was getting darker and darker, until it was as dark as thick ink, completely blocking all light. The sea surface finally began to rise and roll, and the surrounding star beasts temporarily sank to the surface, waiting for opportunities to attack.

Everyone stood on the starship and stood firm.

Chapter 477

Ying Xingjue looked at the sea from a distance, waiting for the waves to break out.

.....

Ever since Pingtong Academy lost Zongzheng Yueren, it has been holding its breath and moving forward, meeting and killing star beasts at an extremely fast speed.

They slowed down after thunder flashed across the sky.

Lu Shibai looked up at the sky that was starting to get dark quickly, and then at the sea that was still calm for the time being, with a half-smile but not a smile: "Storm, it seems that the Imperial Military Academy has never been destined to take a starship across."

Huo Zian looked towards the reef beach in the distance: "When a storm comes, the star beasts on the land will also become restless. We need to be careful."

Lu Shibai looked back at the silent team members of Pingtong Academy: "Even if the starship is robbed and the Pavilion Master is eliminated, we must get the ranking to be worthy of the Pavilion Master."

"yes!"

On the reef beach, a uniform and low voice sounded, and everyone in Pingtong Academy was holding back the breath of revenge.

Takeshi Kosakai lowered his head, and there was a small cut on his face. When he smashed the starship with the Lianwu Bow, the broken ship plank exploded, and a piece of fine debris pierced the mecha cabin and cut a gash on his face.

The moment he lowered his head, no one knew but Takeshi Kosakai's eyes instantly turned completely black. If one looks closely, they can see that the black ones are insects that were flowing.

When he looked up again, Takeshi Kosakai had his original appearance again.

.....

There was constant thunder in the sky, dark clouds were pressing overhead, and a storm was coming.

"Wei San."

Tai Wude stood behind Wei San and called to her in a low voice while the people from the Imperial Military Academy were not paying attention.

Wei San listened and did not look back.

At this point, the two of them still have a tacit understanding, and they don't appear to be familiar with each other in front of people from the Imperial Military Academy.

“Is your Damocles Military Academy the reincarnation of a broom star?” Tai Wude couldn’t help but complain, “Any time I meet you, everyone will be unlucky.”

“Why don’t you say that the Imperial Military Academy is the reincarnation of the broom star? You encountered a storm before and were returned back to the start.” Wei San lowered her voice.

Tai Wude couldn’t help but sigh. He didn’t know why when he watched the previous military academy competitions, he felt that it was just a competition and not too difficult. Yet this time, except for the first game, which was relatively peaceful, something happened in every game.

He is just an ordinary general soldier. Being able to defeat those double S-class individual soldiers driving A-class mechas is already a highlight. If the Imperial Military Academy wins the championship, he can go back and brag about it to his parents, and show off in front of relatives. now Tai Wude always feels that as the competition goes on, his life is like the string of a kite, ready to be cut off at any time.

“Enough, your commander will definitely be able to protect you.” Wei San spoke with her back to the camera, “His perception is so strong, you will be fine.”

“That’s also right.” Tai Wude stood up and cheered up.

“Is that a tsunami?” Huo Xuanshan and Situ Jia were observing the sea in mid-air. They saw the rising sea wall from a distance, and immediately returned to the starship to tell everyone, “The tsunami is approaching.”

.....

Live broadcast.

Xi Haotian couldn't help but touch his face: "There are indeed a lot of competition conditions among military cadets this year. All kinds of accidents are bound to happen."

Yu Tianhe looked at the teams of the two military academies who were on high alert in the camera: "I would like to see how they deal with it. Apart from the star beasts, how will they face the natural environment."

Xi Haotian picked up his water on the stage and took a sip, and spoke from the bottom of his heart: "Originally, every team in these military academies could win the championship in each session, but this year they all collided. It's a pity."

Next to him, Lu Zhengxin smiled: "Those who can stand out in this fierce competition will definitely make a mark in history in the future."

Xi Haotian nodded subconsciously: "Ying Xingjue, Wei San, Ji Chu....."

Before he finished speaking, he suddenly realized that something was wrong. Wei San's ranking had been mentioned in his subconscious before Ji Chuyu.

Chapter 478

The teachers at the Damocles Military Academy below had already begun to hold their heads and looked at the sky and the ground. They couldn't figure out why Damocles Military Academy always encountered a series of accidents.

Xiang Minghua accepted fate: "Forget it..... I think our goal is still for students to complete the entire competition safely."

Time and time again, they were on tenterhooks every day, and he had already become numb.

"Let's have another look." Xie Yuman explained, "It's not certain that something will happen."

What happened in these arenas can be talked about for years just by mentioning one. One scene after another, it is really difficult to accept.

.....

It was completely dark inside Xita Arena, without a trace of light. The sky and sea were so heavy that it was hard to tell which was which, lightning, and heavy rain.

The tsunami in the distance was already approaching the starship, and the waves it brought raised the starship high, while the huge oncoming sea wall continued to rise, much higher than the starship. After waiting for the tsunami to gather momentum, it will be taken sooner or later. By then, the huge pressure brought by the sea wall will be enough to shatter the starship.

Not to mention, there are star beasts inside the raised sea wall. Even if the star ship is not broken, if these star beasts are thrown to the deck, it will be enough to cause a commotion.

"I think....." Ying Chenghe looked at the rising sea wall, "We still have time to escape now."

Jin Ke looked at the sea wall without saying anything, then turned to Ying Xingjue.

"How long can your physical barrier last?" Ying Xingjue turned to ask Jin Ke.

"Twenty minutes is my limit." Jin Ke was startled and then said.

Ying Xingjue nodded: "We take action now."

"Protect the starship?" Jin Ke asked.

Ying Xingjue's eyes fell on the sea wall: "No."

They must work together to suppress the rising sea wall.

Jin Ke suddenly understood, it was a bit hard to believe, but at the same time a surge arose in his heart, why can't the ability to command strength be used in this way? As long as they were strong enough.

Everyone began to move behind the two of them. Ying Xingjue and Jin Ke stood at the front. The two of them were on the deck and jointly released the physical barrier of perception to cover the rising sea wall.

At the moment when his perception touched the sea surface, Jin Ke could feel the huge rolling force coming from below. The bottom was vibrating violently, and the kinetic energy was transformed, bringing a steady stream of power to the sea surface.

The power coming from his perception clearly told Jin Ke that he couldn't hold on.

However, the moment the physical perception barrier enveloped it, the sea wall actually stopped rising.

Jin Ke subconsciously looked at Ying Xingjue, that's right, there was him too.

Ying Xingjue divided most of the power coming from the sea wall. At that moment, Jin Ke once again clearly realized the ability of super 3S level command, but he..... can still improve!

The two commanders forcibly suppressed the sea wall to prevent it from rising. However, the sea wall was not lowered, but did not rise.

Time passed bit by bit, and the two sides were still in a stalemate, but Jin Ke had already relaxed a little, and his perception was not enough for him to last too long. Ying Xingjue's face was also pale, and the ground was still shaking. If the sea wall hadn't been pressed down this time, it would have rebounded even more violently.

The method was the same as before in the extreme cold arena, but the only difference was that Wei San used her Sumi sword to destroy the formless matter inside the giant gray wall, and this time they destroyed the kinetic energy connection between the sea walls. .

Ji Chuyu frowned and looked at Wei San. Ying Xingjue, as the main commander of the Imperial Military Academy, the first person he turned to talk to was actually Wei San, even though he knew that the two had collaborated before.

The expressions of other main members of the Imperial Military Academy also changed slightly.

Even though he knew that Ying Xingjue's every move was based on maximizing interests, he still held a grudge in his heart.

Wei San led Huo Xuanshan and Liao Runing to rush into the physical barrier in the rain. She took the lead and slashed at the sea wall with her Sumi sword. Liao Runing, the two people followed the same example, but felt like cutting through the water wall would be in vain.

The next second, Ji Chuyu burst into flames and rushed into the physical barrier. He jumped to the highest point in the middle of the sea wall, held his Taiwu Sword, and slashed straight down.

The sea wall was cut into two by him.

When the sea wall was about to reunite, Ying Xingjue seized this opportunity and the physical barrier also split into two to separate the sea wall.

The members of the two military academies on the starship were stunned at the cooperation between the two, and everyone at the live broadcast was also amazed.

#### Chapter 479

The leading teacher of the Imperial Military Academy said proudly: "This is the strength of the Imperial Twin Stars."

One by one, the main teams of the two military schools began to divide the sea wall into pieces, while Ying Xingjue dispersed his perception barrier and pressed down the sea wall bit by bit.

Next to him, Jin Ke watched Ying Xingjue's approach and struggled to learn it. He had just mastered the physical barrier and could not do it as skillfully as Ying Xingjue.

Huo Xuanshan shot an ice bow, and Liao Runing quickly broke the sea wall. After Wei San split the sea wall, she inserted her Sumi sword into it and let the blocks of the sea wall freeze into ice. Then she held the handle of the sword and turned it hard, and the blocks of the sea wall broke into pieces. .

The sea wall that is constantly accumulating energy cannot be frozen with the Sumi sword. It can only be frozen and broken after it is cut and divided.

They cut through the sea wall, and Ying Xingjue continuously provided support. A huge sea wall that was about to capsize the starship was gradually eliminated.

Liao Runing whispered to Wei San: "What's going on with Ji Chuyu? Is he jealous that Ying Xingjue called you first?" His blade slashed like crazy.

"What's there to care about?" Wei San was puzzled. "He called me just because we worked together in the extremely cold arena."

Liao Runing shook his head: "Who told us to be strong?"

Wei San looked at Ji Chuyu: I might not be able to receive the sword he just struck. "

"Humility." Liao Runing said very confidently, "Zongzheng Yueren is the first one, and the next person to be eliminated is Ji Chuyu."

It seemed as if they were whispering, but every move they made at this time was captured on camera and broadcast live.

The teachers at the Imperial Military Academy couldn't help but sneer, saying that Liao Runing was just dreaming. The incident of Ying Xingjue calling Wei San's name first was over, and no one cared much about it. But when he pointed it out, they felt a little panicked.

"It's falling back!" The cadets on the starship shouted when they discovered that the huge sea wall was beginning to fall back.

Ying Xingjue also discovered it. He simply continued to release his senses and pushed down the sea wall again. Jin Ke's senses were faintly exhausted. When he discovered that Ying Xingjue could still release his senses, his heart was numb and he could only use super level 3S being too powerful to comfort himself.

Jin Ke also followed along and continued to suppress the sea wall with his perception.

It can be seen with the naked eye that the originally raised sea wall is gradually being suppressed.

When the sea wall was suppressed under the starship, Ying Xingjue withdrew his senses. His chest felt tight, and the familiar smell of rust came from his mouth. His vision went dark, and he half-knelt on the ground, confused.

Jin Ke didn't fare much better. He fell directly to the ground and was quickly caught by Ying Chenghe from behind.

The sea wall has fallen back, and the soldiers of the main team are preparing to return to the starship.

"It's a false alarm." Liao Runing patted his chest and said.

Wei San suddenly raised her head and looked towards the stern of the ship.

A huge object rose from the stern of the ship. It was unclear what it was, but every cell in Wei San's body told her of danger.

“escape!”

Wei San only had time to remind them, when the behemoth flicked its tail and smashed the starship into pieces.

“Fuck!” Liao Runing quickly rushed to the broken starship and dragged the team member closest to the stern away.

Before the members of the two military academies could finish their joy, the starship broke after all, and they were still in a daze as they entered the water.

Wei San quickly entered the water and did not attack the huge creature easily. Instead, she, Liao Runing and Huo Xuanshan protected the people to leave.

In the darkness, it was impossible to tell which person was from which military academy.

When Wei San saw that everyone had dispersed and was not injured by the huge creature, she sank into the water and walked forward, picking up an unresponsive mecha along the way.

” People from Damocles Military Academy should come this way.” Huo Xuanshan and the light mecha soldiers flew in mid-air and shouted.

When Wei San heard his voice, she immediately groped in the dark direction of Huo Xuanshan.

Live broadcast.

The audience has not yet closed their gaping mouths. One scene after another is so tragic, and inhumane!

They hadn't even finished lamenting the awesomeness of the two military academies when another surprise like this happened.

The commentator and the teachers below fell into silence for a long time.

What the hell is this?

The teacher at Samuel Military Academy was the first to gloat: "This is retribution for taking something from someone."

Xiang Minghua's heart was as calm as water: "As long as everything is fine." Although it was a bit miserable.

Jie Yuman: "...After they come out, let's bring them to worship Buddha."

This is getting more and more outrageous。

## Chapter 480

The ship capsized, and the temporary 'friendship' between the two military academies naturally broke down, and they went ashore separately.

On the way, they encountered star beasts underwater. Fortunately, because of the tsunami just now, those star beasts were dizzy and did not have much attack power.

When they got ashore, the dark clouds in the sky gradually dispersed and the heavy rain slowly stopped.

Huo Xuanshan was counting the number of people ashore.

The main team was all present, and some on the school team were injured, but no one had any accidents.

"Who is under your feet?" Huo Xuanshan flew back and saw a mecha lying under Wei San's feet.

"I don't know, someone from the school team." Wei San lowered her head subconsciously.

At this time, the biggest dark clouds in the sky dispersed, the light was clear, and there was even sunlight shining down.

Wei San looked down at the very familiar Huang Jinkai: “???”

Huo Xuanshan: “.....”

Liao Runing took a closer look, turned over Huang Jinkai’s arm, raised his head and said slowly: “You fished out their commander.”

Wei San: “.....”

Everyone on the live broadcast: “.....”

The audience in the live broadcast room was also completely stunned.

【? ? ?】

【what happened?】

[I’m done, Damocles Military Academy, what kind of luck is this? Now they directly chose Ying Xingjue’s energy lamp, and they’ll make history as the first commander to be eliminated.】

[I saw that when the commander of the Imperial Military Academy fell, the stern of the boat was smashed to pieces, and Gong Yijue who was standing fell into the water without even reacting.】

[The main commander of Damocles Military Academy also fell down, he was held back by their mecha engineer. ]

Xiang Minghua stared at the students of Damocles Military Academy in the camera with a strange expression on his face, but he was not too happy.

The teachers at the Damocles Military Academy next to him had different expressions, except that they were not excited.

They were even a little worried about what the main team of Damocles Military Academy would do next.

“Wei San, you didn’t realize it was him?” Liao Runing shook his head and stood up.

“How do I know?” Wei San came out of the mecha. “It was so dark under the water and raining. I thought it was a member of the school team who was knocked unconscious, so I just fished him out.”

Huo Xuanshan looked at the mecha lying on the reef beach, his head hurt, and he walked to Ying Chenghe: “How is Jin Ke?”

“He fainted, probably due to excessive sensory consumption.” Ying Chenghe had just taken Jin Ke out of the mecha.

One by one..... Huo Xuanshan shook his head and guarded the outside with a light mecha soldier.

Wei San squatted on the rocks and shouted to Ying Chenghe: "Look at your cousin."

Ying Chenghe got up and came over. It took him a while to take apart Huang Jinkai's mecha cabin.

Every time he made a move, the Imperial Military Academy teachers present at the live broadcast were frightened, fearing that Ying Chenghe would have his energy lamp extinguished.

Ying Chenghe was sweating profusely, holding his waist: "Wei San, help me pull my cousin out."

Wei San jumped off the rock and walked in by a familiar door. Ying Xingjue looked pale and was also in a coma.

Before she pulled him out, she took a special look at the test tube at Ying Xingjue's waist, reached out to touch it, and found that there was still perception attached to it.

The person had already fainted, yet there was still perception covering the test tube, which shows his obsession.

Wei San pulled the person out and handed him to Ying Chenghe: "Your cousin, so you watch over him."

Ying Chenghe: "This..... is not too good."

It's a pity that no one listened to him. Ying Xingjue seemed to be completely forgotten, and everyone was doing their own thing.

The Imperial Military Academy on the other side also went ashore, counted the number of people, and discovered that their main commander was missing, and everyone was in a state of confusion.

"Why is he missing?" Ji Chuyu stood in the middle and asked Gong Yijue, "You were next to me, where is Xingjue?"

Gong Yijue's face was ugly: "I saw the commander kneeling down without any strength. I originally wanted to help him, but I fell into the sea. When I realized what happened, I could no longer see the commander."

Very good. Another bad news. When the starship was shattered, Ying Xingjue may have fallen into a coma.

Ji Chuyu went to the sea to look for him, and Situ Jia was also searching in the air nearby, but no trace of Ying Xingjue was found.

The people from the Imperial Military Academy stood on a rocky beach, and everyone was extremely silent.

Tai Wude suddenly whispered: "He wouldn't be over there at Damocles Military Academy?"

Situ Jia was the first to retort: "If the commander is unconscious and caught by people from Damocles Military Academy, they will definitely eliminate the commander. With such a good opportunity, how could it be possible not to take action?"

Tai Wude continues to shrink back and be a quiet chief soldier. He just provided a possibility.

"Perhaps he was rushed by the seawater somewhere." Gong Yijue whispered, "Maybe he is still unconscious, otherwise he could use his senses to connect to other commanders."

"Since there is no radio sound, it proves that the commander is fine." After a while, Huo Jian said, "What we need now is to rush to the destination island."

Ji Chuyu was in a stalemate for a long time, and finally agreed to what he said. As long as the announcement did not sound, it meant that Ying Xingjue was definitely not eliminated.

"Let's turn over from this direction." Ji Chuyu said expressionlessly, "We should always pay attention to whether there is any trace of the commander."

They had no idea that everyone in the live broadcast room was calling Tai Wude a prophet.
