

Smash All 611

Chapter 611

Just putting on a gas mask does not mean it will work immediately. Ying Xingjue raised his hand and wanted to tear off the mask before he woke up.

“Wear it.” Wei San grabbed his hands easily.

The heavy rain in the stadium showed no signs of slowing down. Wei San held Ying Xingjue’s wrist with both hands and kept an eye on him. The condition of several main soldiers in the outer circle was not very good. Without a main commander to set up a barrier, the mental interference of the high-level star beasts on them seriously reduced the speed of the soldiers’ movements.

The Imperial Military Academy’s poor performance in the previous match at Xita had little to do with the loss of their main commander’s barrier, because the star beasts faced by the Imperial Military Academy in the previous match were only a small group, and even the high-level star beasts were only in the single digits. But now they are facing a star beast tide, with many high-level star beasts, and the interference with the main individual soldiers is constantly increasing, and has reached a serious level.

“Wei San, is he awake yet?” Liao Runing’s reactions were getting slower and slower, so he seized the opportunity to ask.

“What do you mean by awake?” Wei San didn’t understand what the sponsor meant and was still trying to think about it.

The next second, he noticed the person on the other side struggling. Wei San squeezed hard and turned back to warn: “Don’t move.”

“Wei San, let go.” Ying Xingjue had woken up, his eyes still calm, but he had obviously recalled what had happened along the way and guessed the current situation.

“Do you know me?” Wei San heard him calling her name and subconsciously let go.

How could she not remember knowing him? Logically, she would not forget such a person after meeting him once.

Ying Xingjue looked at Wei San after hearing this: “You are now.....”

Before he finished speaking, he realized that the condition of the soldiers was not good, so he just stood where he was, released his perception, and helped the mecha soldiers in the outer circle set up a perception barrier.

The mental attacks of the high-level star beasts were completely isolated, the soldiers breathed a sigh of relief, and their combat speed quickly increased.

“Wei San, one million, you and Ying Xingjue guard that direction.” After being isolated from the mental attack of the star beast, Liao Runing felt much better and pointed to the position to the side of Wei San.

Wei San, who was in an unconscious state, was obsessed with money the most. Upon hearing what Liao Runing said, he immediately entered the mecha and began to rush to the outer circle.

Currently, the only chief commander who has regained consciousness among the five major military academies is Ying Xingjue, but his perception is enough to cover the soldiers of the five military academies, and he can even handle it with ease.

After helping the other soldiers to establish a perception barrier, he focused all his attention on Wei San in the outer circle.

Live broadcast.

“If I remember correctly, Ying Xingjue’s materialized perception barrier can block the desire mushrooms.” Lu Zhengxin said thoughtfully, “He can completely put everyone into the materialized barrier, so that everyone can wake up and no longer need to wear gas masks.”

Xi Haotian, on the other hand, agreed with Ying Xingjue’s current approach: “At the moment, it seems that these military academy students can still hold off a bit, there’s no need to send Ying Xingjue directly, he just needs to do his job as the main commander.”

Ying Xingjue’s complete attack blocked the other cadets’ chance to receive actual combat training.

The mecha engineers over there were sweating profusely and some of them would even lose consciousness from time to time.

At this time, among the mecha engineers of the five major military academies gathered together, some people were able to show sufficient calmness.

The mecha engineer of Damocles Military Academy's general squadron's hand speed continued to soar, and he had entered a state of selflessness.

After finishing one, he handed it to the conscious person next to him, who then gave it to the mecha soldiers.

The second person to get the gas mask was Ji Chuyu. It took him a few minutes to wake up. When he stood up and prepared to fight, he found that his commander was once again teaming up with Wei San from Damocles Military Academy. S

“.....”

Ji Chuyu walked silently to Ying Xingjue's side.

Chapter 612

“You go guard the southwest direction. When the other two wake up, you lead them.” Ying Xingjue continued to give orders.

Ji Chuyu nodded, ran towards the southwest, instantly entered the mecha cabin, and fought with the star beast on the periphery. There was an extraordinary sense of murderousness in his actions.

As the mecha engineer finished making the last mask, most of the main forces of the five major military academies woke up and joined the battle one after another.

“Too many star beasts.” The mecha engineer finished working on the gas mask in his hand, looked up and muttered, “Are these star beasts crazy too?”

The reason why the star beast tide is called “tide” is because once in this situation, the star beasts will keep coming like a tide. When one batch is killed, another batch will keep approaching.

Wei San went to fight the star beast. Huo Xuanshan woke up and joined her on the battlefield. Jin Ke and Ying Chenghe were left unattended.

Jin Ke was still the same, motionless. Ying Chenghe looked down at the rope that tied him and began to struggle. Unable to get rid of it, he began to try to drag Jin Ke around, and finally stopped in the middle of the inner circle.

The soil here is the softest. He can just dig it out, dip it in water and make mud.

Ying Chenghe wanted to squat down, but Jin Ke stood still. He kicked him hard for a long time before he squatted down with him back to back.

Taking out a shovel, Ying Chenghe began to dig mud, one for himself and one for his cousin.

He dug for a long time and suddenly discovered some soft grayish-white silk sticking out from the soil. Ying Chenghe cut it off with a shovel.

The rain was still falling, the soldiers in the outer circle were fighting, and the inner circle was mostly made up of unconscious cadets. For a moment, Wei San and Ying Xingjue felt as if the whole world was in slow motion.

Before Wei San could react, Ying Xingjue took action. He individualized countless physical barriers and covered the inner circle of cadets one by one.

Ying Xingjue looked at a certain place in a daze, but he was one step too late.

Holding the shovel, Ying Chenghe looked down at the gray-white soft thread that was cut off, then looked at the other gray-white soft thread that was pierced in his chest, and felt a little pain.

Ying Chenghe kept coughing up blood, covering his mouth a little at a loss, but more blood was flowing from his chest.

Two hands are not enough.

Just when Ying Chenghe's unclear mind was only thinking about how to block it with his hands to prevent the blood from flowing out, Ying Xingjue had already come and squatted in front of him.

"Cousin..... this is for you." Ying Chenghe grabbed a ball of mud from the side. The blood on his hand was stained on the mud. He muttered a few words in a low voice and used the rain to wash the blood off the mud.

But at this time, more and more blood flowed out of Ying Chenghe's mouth. He covered his face with his arms and stuffed the mud into Ying Xingjue's mouth.

Ying Xingjue took it expressionlessly, opened Ying Chenghe's computer with his other hand, and directly pressed the exit button.

[Ying Chenghe, the mecha engineer of the main team of Damocles Military Academy, is out. I repeat, Ying Chenghe, the mecha engineer of the main team of Damocles Military Academy, is eliminated.]

Chapter 613

Rainwater mixed with blood flowed down the groove of her Sumi knife. Wei San turned her head to look towards the inner circle. It seemed as if everything between heaven and earth was still, with only the sound of the broadcast echoing in the stadium.

Huo Xuanshan stared absentmindedly at the pool of blood under Ying Chenghe's body spreading out with the rain. His fingers were stiff and he didn't even notice that a star beast was attacking him from the side.

Wei San frowned and threw the knife in her hand to the side of Huo Xuanshan: "Come back to your senses!" These star beasts ran desperately towards the inner circle.

Huo Xuanshan gritted his teeth and turned back, not looking at Ying Chenghe, and continued to kill the star beasts.

From beginning to end, except for hearing the broadcast and pausing the knife in his hand, Liao Runing never looked back, but killed the star beasts faster and faster, and his moves became more and more brutal.

.....

The medical team on the aircraft arrived quickly, carrying the treatment cabin directly down, and began to help Ying Chenghe clean his wounds on the spot.

The grayish-white soft silk, as thick as an adult's fist, pierced through Ying Chenghe's chest and passed by his heart.

The doctor took out the soft thread, and the nurse next to him immediately carried Ying Chenghe into the treatment cabin.

"It'd mutant mycelium." The doctor said to Ying Xing Jue before leaving.

Ying Xingjue had his back to them, without looking back, just looking around.

Countless mutated mycelin stretched out from the ground. Without Ying Xingjue's materialized barrier, all the cadets in the inner circle would have been in trouble, just like Ying Chenghe.

Now, mycelin were constantly extending out from the physical barrier to the ground and attacking people.

——There are mutated desire mushrooms underground.

“Everyone go outside.” Ying Xingjue said to the military cadets in the inner circle who were gradually waking up.

After being taken in by the materialized barrier, almost all of these people woke up.

These people naturally included Jin Ke, who still had a bundle of loose ropes on his body.

Jin Ke stood up and shook his head, not quite understanding the current situation for a moment.

Although many traces on the ground were washed away by rain, it was still possible to see a large amount of bloodstains there before.

Jin Ke had an inexplicable bad feeling. He looked around and found that there was only one person missing from the main teams of the five major military academies.

“Where is Chenghe?” Jin Ke looked at Ying Xingjue and asked.

“He was eliminated just now.” Ying Xingjue said slowly.

Jin Ke: “.....Is he okay?”

There is no doubt that this pool of blood was Ying Chenghe's.

Ying Xingjue looked sideways at the mycelium that continued to emerge around him: "Enter the treatment cabin."

Jin Ke bent down, supported his knees with his hands, and took a deep breath. Being able to enter the treatment cabin meant that there was still hope.

"Retreat to the outer circle first." Ying Xingjue said, and he formed a physical barrier to cover everyone in the five major military academies.

At this point, everyone in the five major military academies has woken up. Now everyone is crowding around the periphery, and the main command naturally shifts to Ying Xingjue. This time, the five major military academies did not disperse in various directions to deal with the star beast tide, but only focused on one direction and tried to fight their way out.

At this time, the elimination of Damocles Military Academy's main mecha engineer could only be temporarily suppressed, and everyone's unified goal was to fight their way out.

Live broadcast.

Jie Yuman stood up: "I'll go pick up Chenghe."

Xiang Minghua nodded: "Go ahead."

At the moment of the incident, not only the cadets in the stadium, but even the teachers who were watching were unable to react. Everything happened too quickly, and all the cadets in the inner circle were attacked.

Chapter 614

If it were normally sober cadets, nothing would happen of course. Although the mycelium was fast, the cadets who had experienced so many actual combat battles had already developed the strength to resist.

However, the cadets in the inner circle were all in an unconscious state at the time. Not to mention resistance, even if a knife was placed on the neck of some people, they would not get any resistance.

If Ying Xingjue hadn't intervened, all of these people in the inner circle would have been eliminated. No, not just eliminated.

There are not enough treatment cabins on the aircraft. If a large number of cadets get into trouble, some of them are bound to not receive timely medical treatment.

"Fortunately, Ying Xingjue pressed the elimination button for Ying Chenghe in time." A teacher at Damocles Military Academy sighed.

"Isn't this behavior of expanding the scope of the competition venue too dangerous?"

“But now the star beasts defending the front lines of each district are showing signs of evolution. Our five major military academies have finally got so many 3S-level military academy students this year. If they don’t undergo sufficient actual combat training, the chances of accidents on the battlefield will be even greater.”

“Indeed, there are so many people guarding the competition, so it can be controlled in most cases. Once on the battlefield, these people basically have no backup except for their own area.”

“I hope to apply for more treatment chambers. In the early stages of the Hephaestus Competition, the blood of countless cadets was used to explore the current competition mode. Now that the situation has changed, at least the treatment chambers must keep up. We cannot allow large-scale casualties to occur, the cadets cannot be left without timely assistance.”

The teachers on site began to discuss and have already started contacting the various military commands to hold a meeting after the competition.

.....

The situation in the stadium became increasingly complicated.

As there was no resistance from the cadets, the star beasts on the other side began to run towards this side frantically. However, these star beasts did not have the chance to run towards the cadets, but were pierced through the bodies by the hyphae that suddenly broke out of the ground halfway.

“These star beasts.....” When Xiao Eli woke up, his clothes had been put back on. He didn’t notice anything wrong. He looked at the star beasts whose blood had been sucked out with disdain. “They look like voluntary sacrifices.”

When those star beasts were pierced by the mycelium and their blood was sucked, they did not resist at all.

“Since this mushroom can confuse us, it can naturally confuse the star beasts.” Quinley Eli frowned and pointed in the direction where the star beasts kept falling. “Can we go over there?”

If Ying Xingjue’s materialized barrier can hold up.

Speaking of which, except for the Damocles Military Academy, this is the first time that other military academies have been protected by Ying Xingjue.

People from other military academies couldn’t help but think in their hearts, no wonder the Imperial Military Academy performed so poorly in the last competition after losing its main commander.

Once you get used to the feeling of having someone to cover you at these moments, no one will worry about what will happen next. You will consciously act as a movable chess piece, which is safe and worry-free.

What Quinley Eli said was exactly what everyone was thinking at the moment, to use a physical barrier to block the mutated mycelium without having to deal with the star beasts.

However, in the next second, the ground beneath everyone’s feet began to shake.....something large was about to emerge from the ground.

They couldn't run to the other side anymore as the road was blocked by huge monsters that started to appear one after another.

"It's that mushroom." Tai Wude recognized it when he vaguely saw the grayish-white cap.

The giant mutant mushroom emerged extremely quickly, and now the entire gray-white umbrella cap has emerged.

"The materialization barrier cannot completely block this mushroom."

Chapter 615

Ying Xingjue stared at the giant mutant mushroom. The physical barrier could not completely filter out things that were dense enough in the air. The mushroom was too huge. Once the components in it that could cause people to fall into an unconscious state were released, they would greatly squeeze out other oxygen components in the air. If the density of this component was too high, the physical barrier would fail.

He stared at the cadets who were still fighting the star beasts. They were too slow and it was too late.

In the blink of an eye, the giant mutant mushroom had grown out with its stem. Perhaps it had sucked a large amount of the blood of the star beasts. The mycelium emerging from the ground became denser and denser and had begun to spread towards them.

The number of star beasts here also began to gradually decrease, and the giant mutant mushrooms became visibly stronger.

The umbrella cap is only grayish white, but it gives people an increasingly evil feeling.

The reduction in star beasts is not entirely a good thing for the military academy team. Once the star beasts disappear completely, the next target will definitely become the military academy students.

“All the cadets who are fully awake can move to the back.” Ying Xingjue said, “Those wearing disinfected masks can move to the back.”

Liao Runing looked at Ying Xingjue: “If the situation just now happens again, you are the only one awake and in charge, can you hold on?”

Only one gas mask can be allocated to the main commander.

Ying Xingjue did not answer him: “The main force of Pingtong Academy is leading the people ahead, and the main force of the military academy is left behind.”

No one objected.

Even Xiao Eli, who usually liked to chatter, didn't say a word.

Pingtong Academy Zongzheng Yueren walked in the front and began to tear a hole in the star beast tide, slowly moving forward with the school team.

The torn hole gradually closed as countless star beasts continued to rush towards this side.

It seemed that the distance between the people from the five major military academies and the giant mushroom began to widen, with a group of star beasts in between.

However, as the giant mutant mushroom absorbed more and more blood of the star beast, its strength increased. The umbrella handle buried under the ground produced more and more mycelium, which continued to absorb more blood of the star beast.

Live broadcast.

Someone came up and whispered a few words into the ears of the three main commentators, and then the three of them stood up at the same time, turned off their microphones, and walked away together. The teachers from the military academies also left with them.

The audience in the auditorium couldn't help but talk about it when they saw this, totally confused as to what was going on.

At this time, all the teachers and main interpreters were standing in the conference room. Several light screens appeared inside, all of which were high-level officials from various military regions.

"The giant desire mushroom must be removed." The senior officials of the 13th Military Region said directly, "Let them turn back."

Xiang Minghua raised his head and said angrily: "If they must be eliminated, it should be the military who should do it. Why let these students go?"

"They are competing over there. The best candidates to get rid of the giant mushroom of desire are these military academy students." The senior executive of the Thirteenth District said solemnly, "From the moment we choose to enter the military academy, our lives are no longer in our own hands. Otherwise, why should we enjoy so many resources?"

"The Desire Mushrooms will only release special ingredients into the air after they are destroyed. I think we should let the students leave first, and then the military will come out to remove them." Ji Yuande, the top leader of the First District, said slowly, "Teacher Xiang is right, they are still just students."

"We just found some information." Inside the light projection, the senior executive of District 13 flipped through the folder on the table. "Once the giant desire mushroom has a chance to grow, its cap will crack open within two hours, releasing countless spores into the air. These spores will grow rapidly in any moist and soft place, and the so-called special ingredients will be released everywhere. The barrier of the arena can only block the star beasts, and cannot effectively resist the extremely concentrated ingredients in the air."

The senior executive of Thirteenth District paused and asked, "Now, who else has any objections?"

The conference room was silent.

An hour and a half had passed since the giant mushroom appeared, and these cadets could not escape even if they did not fight.

The audience in the auditorium soon discovered that the main commentators and teachers from various military academies had all returned, but their faces did not look very good.

Chapter 616

A broadcast resounded throughout the rainforest stadium.

[Attention all cadets, you need to return immediately and deal with the giant desire mushroom within half an hour to prevent its spores from spreading.]

The five military academy students who had just torn a hole in the star beast tide and tried to escape were stunned after hearing the broadcast.

“This thing is called desire mushroom?” Liao Runing’s focus was obviously misplaced.

“I’ve never heard of such a powerful mutant mushroom.” Jin Ke frowned. Normally, unknown mutant fungi would not be recorded, and the organizer should not be unaware of it either.

It just so happens that the organizers know the name of this thing, and it is only possible that the desire mushroom has appeared before, so it is recorded somewhere.

The broadcast sounded again. This time it was no longer the voice of the staff in the major aircraft, but a second broadcast, and the person speaking was Yu Tianhe.

[It only takes two hours for the giant desire mushroom to grow. The more nutrients it gets, the faster it grows. The army doesn't have time to break through, you are the closest, and in the best place to take action. The staff of the aircraft closest to you will come over with gas masks in about fifteen minutes. As long as you can survive this period of time, you can quickly deal with the giant desire mushroom.]

The broadcast paused, and then Yu Tianhe's voice came again: [Good luck to everyone.]

Wei San looked towards the inner circle. They could clearly see the giant desire mushroom without even jumping over the star beast. It had grown out completely.

"Let's go." Jin Ke and Damocles Military Academy were the first to turn around and walk towards the inner circle.

The other military academies didn't say much and all turned around.

"The main force that was awake before will be responsible for cutting off the steam, and the others will open a path in the mycelium for them to enter." Ying Xingjue said slowly, "Pingtong Academy will block the star beasts from behind."

"Can't your level 3S guards take action?" Xiao Eli asked him.

Gao Xuelin: "....."Why does it feel like Xiao Eli is getting bolder and bolder?

"If those 3S-level soldiers are also infected, not only will they not be able to help us, but it will hinder our progress." Jin Ke turned his head to look at Xiao Eli, "Besides.....we are still in the competition, outsiders are not allowed to interfere."

Returning to the inner circle was easier than before. The teams from the five military academies quickly arrived in front of the giant desire mushroom. The middle section of the road was already covered with mycelium emerging from the ground.

Young Master Liao hates these long things the most, but fungi generally like to develop in this direction to increase their attack power. Now he is almost numb seeing these, and also feels a bit angry.

The commanders of each military academy protected the main team and led the charge, while all the school teams were coordinated by Ying Xingjue, who was responsible for resisting the star beasts attacking from the rear. RanoBES

Before leaving, Wei San took a few steps back, squeezed into Damocles school team's chief team, and asked the chief mecha engineer: "Do you have all our mecha materials?"

The chief mecha engineer nodded: "After the main team's mecha engineer is eliminated, the mecha materials will be transferred to me."

"Okay." Wei San said quickly, "Take out all the Du'e gold and make it slightly larger than the size of the umbrella cap to prevent any accidents."

The chief mecha engineer was stunned. Du'e gold is a material specially used in the casing of Class A engines. This metal material has excellent sealing properties and can prevent the engine fluid from being contaminated by the external environment and causing engine problems.

“It’s quite large, so you have to put it together in pieces, and then pour another layer at the end. You also need a slab underneath.”

The chief mecha engineer quickly responded: “Do you want to seal the parachute cap?”

Wei San nodded: “Yes, leave a hole in the middle of the flat plate as wide as the mushroom umbrella. It would be best if it were a foldable plate. Then, pull the thick plate into a circle of flat plate that can be embedded in the umbrella cap. Finally, cut off the umbrella handle and seal the round hole.”

A completely enclosed space is created artificially, otherwise the spores will spread everywhere.

Chapter 617

Of course, this is just a precaution. If the umbrella stalk can be cut off in time, the mushroom cap will not crack and release spores.

“Is Du’e gold enough?” the mecha engineer of the chief’s team asked hesitantly, “This material is only Grade A.”

“The mushrooms are not aggressive, and the Du’e gold is airtight enough, that’s enough.” Wei San said.

What’s more, the sealing materials used in level 3S are not enough to cover the giant desire mushroom cap.

After Wei San finished speaking, she followed the main team members to clean up the mycelium.

After these hyphae are cut off, they recover very quickly. The main team members can only chop them off desperately to create a time difference and let the sober main team members move forward. At that time, they can cut off the umbrella handle and stop the desire mushrooms from growing.

Everyone's attention was focused on the giant desire mushroom, whose huge cap had blocked out the light from the sky.

The rain hit the umbrella cap and gradually slid down, forming a curtain of water.

This was the first time that the five military academies worked together with a common goal. No one was thinking about the competition for the time being. The only task was to remove the desire mushroom.

Wei San and Ji Chuyu led the way in the front, Liao Runing, Xi Wutong, Quinley Eli, and Takeshi Kosakai walked in the middle to conserve their energy, and the other soldiers stayed behind to prevent the mycelium from counterattacking, protecting the people in the middle and ensuring that they arrived safely in front of the handle of the giant desire mushroom.

This was not difficult for Wei San. She was good at using whips and had even dealt with tentacle monsters under the sea at the Sita Arena. These hyphae were not difficult to deal with.

"Are these hyphae becoming more and more numerous and thickening?" Huo Xuanshan looked around and frowned.

Just as he finished speaking, more than half of the star beasts on Pingtong Academy's side had their blood sucked dry.

“It takes half an hour for this mushroom to mature?” Liao Runing always felt that the mushroom would burst in the next second.

Compared to people in the stadium, people at the live broadcast site can see the game more clearly and intuitively.

The giant desire mushroom’s umbrella has stopped growing, only countless hyphae are still emerging and expanding outward, covering an increasingly large area.

“If this continues, all the star beasts in the entire arena will be sucked clean.” Jie Yuman said with a headache, “By then, there will be no star beasts left, and only the five military academies will be left. That will be a battle between the military academy students.”

The battle at the finish line is bound to turn into a melee.

“It’s enough for them to solve the current problem safely.” Xiang Minghua’s face still had anger. “What on earth were the military district thinking? Why didn’t they inform us earlier when they got this information? Now they let those kids take over.”

“The military district may have just received the information. Besides, no matter how small they are, they are still a reserve army.” Jie Yuman looked at the live camera and said, “Fortunately, these mushroom mycelium do not look that aggressive.”

The reason why those high- and low-level star beasts had their blood sucked dry so easily by the mycelium was entirely because they were confused. Now most of the military cadets were protected by Ying Xingjue's materialized protective shield, so there were no major problems.

inside the stadium.

An unexpected accident happened that no one expected.

The materialized protective shield suddenly began to shake.

"What's wrong?" Jin Ke reached out to support Ying Xingjue and looked around. Once the protective shield was dissipated..... basically all of them would become nutrients for the desire mushroom. Š

Ying Xingjue used Jin Ke's arm to stand firm: "Can you disperse your physical protective shield to cover everyone?"

"You know it's impossible." Jin Ke's strength is not that strong yet. After all, he is only a level 35 commander.

Ying Xingjue could no longer hold on. The nutrient solution he drank before coming in should have been effective enough to keep him going until he finished the game, but perhaps because he inhaled the desire mushrooms, the effectiveness of the nutrient solution was severely weakened.

“Then expand the physical protective shield and let all the people from Pingtong Academy and the school team in.” Ying Xingjue’s forehead was covered with fine sweat, and veins bulged on the back of his cold white hands. He forced himself to hold up the physical protective shield and waited for Jin Ke.

Jin Ke discovered that mysterious feeling and successfully released the physical protective shield, which expanded little by little.

“Continue on.” Ying Xingjue whispered.

Jin Ke continued to transform his perception, and the range of his physical protective shield gradually increased.

Ying Xingjue held on until his protective shield was able to cover everyone outside, and then he finally couldn’t hold on any longer.

“Command in chief!” Gong Yijue supported Ying Xingjue.

Jin Ke watched him close his eyes. His mind went blank for a moment, then he gritted his teeth and put all his senses into it.

The area where thousands of people are crowded together is really too large.

Jin Ke expanded his physical protective shield to its maximum, barely protecting them. At this time, his brain felt like it was pierced by countless needles, and his nose, ears, mouth, and even eyes began to bleed.

“What should we do next?” someone in the school team asked.

Chapter 618

The strongest commander suddenly encountered an accident, and now the only commander left who can use the physical protective shield can obviously not hold on for long.

Lu Shibai glanced around and looked down at his hands.

He originally wanted to keep some tricks, but now it seems there is no way.

Lu Shibai raised his hand and raised a trembling physical protective shield, taking on half of Jin Ke's pressure.

During this period of time, people in the stadium had no time to notice that the main commander of Pingtong Academy could also materialize the protective shield. Only some people at the live broadcast site paid attention to it.

Even the main commentator on the stage didn't explain anything, he just watched the main team members trying to approach the giant desire mushroom.

.....

“What should we do if the main team doesn’t have gas masks?” Gao Tangyin asked, “Should we withdraw?”

The materialized barrier covering the main team completely dissipated, and almost instantly, Wei San, Jill Wood, and Yamamiya Namiha, who were not wearing gas masks, fell back into their previous unconscious state.

Zongzheng Yueren was wearing a gas mask. He stepped out of the physical barrier set up by the two main commanders and led a team of sober soldiers from the school team to bring Jill Wood, Yamamiya Namiha and the main team’s mecha engineer into the barrier.

“One million.” Liao Runing used the same trick again and asked Wei San to help them.

The unconscious Wei San readily agreed.

Everyone: “.....” I wish all unconscious people were as easy to deal with as Wei San.

At this time, without Pingtong Academy and the school team to remove some of the mycelium, the mycelium in the outer circle became even more arrogant, and almost in the blink of an eye, they wiped out the star beast tide completely.

“Has the umbrella cap become bigger?” Xiao Eli suddenly pointed at the umbrella cap.

Wei San looked up and said, “.....It didn’t get bigger, it just split.”

They were still some distance away from the umbrella handle, and the closer they got to the umbrella cap, the denser the mycelium became, almost turning into a sea of white.

“It’s too late.” Wei San threw the two fan-shaped knives in her hands directly towards the umbrella handle. However, the giant desire mushroom was obviously able to sense the attack, and countless hyphae wrapped around to block her knives.

Huo Xuanshan also shot arrows with the ice bow, and several arrows hit the umbrella handle without any damage.

Only by cutting off the umbrella stalk and completely destroying the channel for transporting nutrients can the mushroom cap be prevented from dispersing.

“How long has it been?” Ji Chuyu asked Huo Jian beside him.

“Ten minutes.”

“Didn’t they say that the spores will be released half an hour later? What’s the situation now?!” Liao Runing looked at the cracked cap and didn’t know what to do for a moment. By the time they had dealt with so many mutated hyphae that rushed to the umbrella handle, it was too late to cut off the handle. The spores of the desire mushroom had already spread everywhere.

“It’s because of the materialized protective shield.” Huo Xuanshan said, “Without the Pingtong Academy and the school team killing the mutant mycelium, the giant desire mushroom absorbed enough blood power of the star beast, and the maturation time was shortened again.”

Are they just going to watch the desire mushrooms release their spores?

Just as these main force soldiers were desperately rushing towards the umbrella handle, the mecha engineer of the Damocles Military Academy’s general squad shouted: “Wei San, here!!!”

The umbrella cap is too large, and the mecha engineer of the general squadron made it in pieces, and now it is too late to put them together.

Chapter 619

The people in the stadium and the live broadcast watched as the Damocles Military Academy light soldier flew up with four large pieces of Du’e gold on its head. The chief’s team mecha engineer stood on the top and began to pour the melted Du’e gold from the top into the other four gaps. There were several mecha soldiers following behind.

Not to mention the people at the live broadcast site, even the cadets in the arena were staring at this chief’s mecha engineer in amazement.

What is this operation?

The material was used in mechas, which is what everyone has been trained to do since they entered school. Who would have thought that Damocles Military Academy would use materials on all kinds of strange tools all day long.

Everyone just stared at them flying over there with the huge golden umbrella hats on their heads. The mecha soldiers following behind were responsible for the mycelium so that the people in the air could quickly approach the main force.

Wei San did not continue to rush towards the umbrella handle, but rushed towards them, taking the Du'e goldfolding thick plate held by a light mecha soldier, and jumped on it to seal the umbrella cap.

At this time, the chief's mecha engineer had already poured the last gap.

The light mecha soldier once again flew high with the umbrella-shaped Du'e gold on his head. Wei San saw from afar that the giant desire mushroom had cracked, leaving only a thin layer of membrane. As long as the distance was increased a little more, the thin membrane would inevitably break.

Once it breaks, the spores inside will scatter in all directions.

The soldiers of the main team had already approached the umbrella handle and cut off the mycelium, which gave Wei San and the others an opportunity.

Wei San took the tool from the chief mecha engineer's hand, pulled him down, let the light soldier let go of his hand, and kicked the Du'e gold cap directly with force, letting the Du'e gold cap cover the mushroom head before the giant desire mushroom completely cracked and released its spores.

The Du'e gold cap directly covered the giant mushroom head and also rotated.

Everyone: "....."

For some reason, they suddenly felt that the giant desire mushroom that was covered was a bit pitiful.

At the moment when the gap was covered, everyone's hearts were still tense.

Is this..... a success?

"Take him back." Wei San handed the general mecha engineer to the light mecha soldier and rushed towards the giant desire mushroom.

The cap of the giant desire mushroom has been completely cracked. Even after being covered by the Du'e gold cap, spores will still overflow and leak out from the unsealed area below.

The folding plate in her hand was to serve as the final seal, but she still had to approach the giant desire mushroom first.

Sure enough, the umbrella handle of the giant desire mushroom was not broken, and the channel for transporting nutrients was still there, and the membrane eventually cracked.

Grayish-white spores float like snow under the umbrella cap.

“Block the mycelium and take me up.” Wei San rushed over and pointed at Huo Xuanshan.

Huo Xuanshan turned around and without asking why, he ran directly towards Wei San, picked up Impermanence, and started flying towards the umbrella cap.

There were too many spores, so dense that the gas mask could hardly hold up. Wei San felt that a lot of spores had entered her mecha.

The spores have begun to be exposed. If the umbrella handle is not cut off, the cap made of Du’e gold will be useless.

There was no time to think too much now. Wei San held the board and was brought to a higher place by Huo Xuanshan, stopping under the mushroom umbrella. She pulled the board open around the umbrella handle and directly pressed it against the lid made by Du’e cap.

Perfect fit.

Wei San walked around the outer circle and used the metal of the umbrella to fill the gap between the cover and the board, leaving only the circle in the middle of the umbrella handle.

Now all that is needed is to cut off the umbrella handle.

But once she gets close, she will be attacked crazily by the giant desire mushroom, and countless hyphae will surround her.
