

Chapter 10

Chapter 10:

He looked at Beta when I didn't answer..

I just lowered my dress in embarrassment.. It's not a big deal for me.. There are times I was left after lashing and wasn't even allowed to apply medicine. Sometimes those wounds become infected but they heal with time..

"Will investigate Alpha.." I saw Mr.Ollie lowering his head with respect. I think he also knew my family situation by now but he still took time to clearly investigate which means he is serious about his responsibilities and never makes decisions in a hurry...

He then turned to me and inspected me with squinted eyes.. His large fingers ran down my cheeks even though I showed my reluctance.. I felt my skin burn under his touch.. It was new to me but it also scared me..

"To reduce wolfbane in her blood we need to give her some medicines. She should be under observation..."

"Ok.. Come to pack house daily to check on her"

Clarke choked as she didn't mean it like that..

I tried to smile lightly when I saw Clarke's face.. but the wound near the edge of my lips pained..

I never knew an Alpha can be this difficult to talk.. or maybe he understood her meaning but trying to do things in his way..

"Check out what other wounds she is hiding and treat them all.." His tone was icy cold with deep light red eyes not leaving mine..

Alpha Issac's POV:

I was shocked to see her sparkling eyes the moment my eyes met hers.. At first she was hesitant to raise her head but suddenly she became happy when I forced her to look at me. I thought she would fear me but she gave me a small smile which made me twitch my mouth..

People fear seeing me and would never smile unless I smile.. but she dared to smile which made me furious..

Her scent was so alluring that my wolf wanted to take over me..

"No.. Kell.. she will be frightened.."

"Don't you think she is cute Issac.. Her smile especially.. Even though she smiled lightly it was too good to see.. I wish to see her full smile Issac.." Kell spoke in my mind.

I saw her try to smile again when Clarke made a face ... but the pained expression didn't escape my eyes.. Her lips must be cracked if I am not wrong as I saw finger marks on her cheek..

I knew Clarke wanted Alayana to be hospitalized but I don't know why but I want Alayana to stay by my side right from this moment...

Her wounds are severe but an Alpha can endure them so I didn't sympathize with her...

I turned to talk with Alayana but her cuteness made Kell take control over me...

"What's your Name?" Kell took over me as he liked her sunflower smell and small almond eyes that looked at us innocently... we think alike about her.. so I know his thoughts.... she is alluring us..

She didn't reply which made him a little irritated but he still didn't lose mind as he wanted to tame our little girl...

Even when she didn't let us touch her hand, we didn't mind as we knew she would be ours one night..but when she didn't reply to Kell's question I thought it's time to teach her discipline..

"Does anyone not teach you how to respect an Alpha?" I was shocked with the tone Kell used.. he is extruding more aura to get her talk to him..

I saw her eyes waving in fear but she still controlled her trembling hands and said in a low and magnetic voice..

"AL.. Alyana Sangster.."

Kell then nodded his head and spoke.. "Look at me whenever you talk.. respond as soon as I ask you any questions.. if not I will ask someone to teach you discipline first.."

She raised her head to see my eyes and I saw her shocked expression again.. I think now she knew Kell was speaking to her..

"Wow..Issac.. She is a beauty.. she doesn't have any makeup but still she is naturally so cute.. Let me touch her.." Kell spoke to me in mind for which I also agreed.. She suits our requirements.. I want my heir to be handsome and inherit charm from his mother..and she has it..

"Yes Alpha.." she said with respect.. Her body was trembling as if she was already disciplined..

I raised my hand involuntarily to touch her cheeks... but she avoided me by turning her head.. I didn't let her have her way.. I know she was abused but that doesn't mean I would let her go..

"You are also Alpha by blood right? Then how did you allow someone to give you wolfbane?" I am surprised Kell remembered what Clarke told when we entered the ward.. Generally he wouldn't take anything into consideration. He is lazy while I keep reminding him of our things..

I saw pain in her eyes and they became moist. She lowered her head without answering.

Kell didn't scold her anything as he also understood something happened to her in the past..

He became soft and was about to sit beside and comfort her but I stopped him..

"It's not time for that Kell.. And her smiles and pain will not have anything to do with us.. She is just a breeder.. Let's not forget it.."

I reasoned out with Kell and took my control back..

"She doesn't look like other She wolves.. Her beauty is attracting us too much.. For the first time our heart is racing for a woman... Let's be gentle to her at least.." Kell argued till I agreed to him..

"Treat her well.. I need her soon" I instructed Clarke..

I also liked her blue eyes and curly light brown hair... so I can't wait to taste her...

She raised her head in shock and was about to say something and stopped.. She looked beside me as if she was talking to someone with her eyes.... I felt confused and looked at my beta who was beside me..

He was also looking at her and then I understood something.... With disappointment I turned around to leave... She is also like all other women.. She reminded me of my mother who cheated my dad.

Anger raised in me like a volcano..
