

## Special Troop 201

Chapter 201: I'm a Soldier! (Two Chapters Combined)

"If not for this brother, we might not have been able to save the patient!" The chief surgeon also explained. His words were filled with respect for Qin Yuan. After all, Qin Yuan's medical skills were indeed very good.

"Because of you? When did you learn medicine?"

After hearing the chief surgeon's words, Zhang Erhe was stunned. He could not believe that Qin Yuan actually had medical skills. Moreover, from the chief surgeon's words, he could tell that Qin Yuan's medical skills were very good!

"This...Uncle, I'll explain to you when the time comes! Where's the army?" Qin Yuan did not want to explain too much. After all, there were too many people here, so he changed the topic. After all, even his family did not know about his medical skills. Xiao Zhenwu was the only one who knew that Qin Yuan knew medical skills!

"He had just finished drawing blood and was not in a good state, so I ordered him to rest!"

Zhang Erhe also knew that Qin Yuan did not want to say that he knew medicine in front of so many people, so he did not continue to ask.

"Young man, I don't know if you have time now. Can you come to my office for a while?"

The chief surgeon looked at Qin Yuan and invited him. After all, Qin Yuan's medical skills in ancient Chinese medicine had reached a terrifying level. Ever since the revival of Chinese medicine, he gradually started to study Chinese medicine, but the results were minimal. After all, many of the medical skills of Chinese medicine had been lost!

When he saw that Qin Yuan was actually so proficient in traditional Chinese medicine, it also aroused the chief surgeon's desire to learn.

"Good!"

Qin Yuan did not reject the invitation of the surgeon. Qin Yuan still had a good impression of him.

Hence, he turned around and said to Zhang Erhe, "Uncle, I'll go over with the doctor first. Auntie's condition has stabilized now. As for your question, I'll tell you later!"

Qin Yuan knew that Liu Yumei's condition had stabilized. With the physique enhancement liquid, Liu Yumei should wake up soon.

Qin Yuan could only explain to Zhang Erhe when he came back.

"Okay, Qin Yuan, but thank you in advance. We'll talk later!"

Zhang Erhe also knew that from the chief surgeon's eyes, Qin Yuan's medical skills should be very good. From the chief surgeon's attitude toward Qin Yuan, it was obvious that it was different. Zhang Erhe knew that this was a form of respect for Qin Yuan!

"It's okay, Uncle. We're all family! Then I'll go over and come back later!"

"Alright!"

As he spoke, Qin Yuan followed the chief surgeon into the office. The office was very simple, with only a desk and a computer.

Qin Yuan also took a look at the rest of the doctors. They were basically a pile of medical books. From this, it could be seen that the chief surgeon was a medical maniac.

For a moment, a few yellowed books in the corner of the bookshelf also attracted Qin Yuan's attention.

"By the way, Qin Yuan, I forgot to introduce myself to you just now. My surname is Liao. You can call me Elder Liao!"

The chief surgeon introduced himself with a smile as soon as he entered the office.

"Alright, Elder Liao!"

Qin Yuan also turned his attention away from those books at this moment.

"Qin Yuan, have a seat first. I'll make you a cup of tea!"

"Alright!"

As he spoke, Qin Yuan walked to the sofa and sat down.

"I just looked at the book in the corner of your bookshelf. It's a traditional Chinese medicine book!"

Qin Yuan also used the system radar to scan them and found that those books were some traditional Chinese medicine classics. Moreover, they seemed to have come from an ancient tomb.

"Your eyes are really sharp. That's a Chinese medicine book I bought from a commoner. It's just that I'm not very proficient in Chinese medicine. I don't understand a lot of medical knowledge in it at all."

"At that time, it took me a lot of effort to buy this medical book. He said that it was their family heirloom, so I spent almost 200,000 yuan on these books!"

Elder Liao did not expect Qin Yuan to recognize that it was a traditional Chinese medicine book with just one glance. For a moment, he was extremely impressed by Qin Yuan's eyesight.

"Elder Liao, can I take a look?"

Qin Yuan asked. This thing was obviously something that came from the ancient tomb. Elder Liao must have been deceived when he said that he bought it from a commoner.

“Sure, feel free to look around! If you can understand, can you share it with me?”

Elder Liao was also very happy with Qin Yuan’s request. After all, Qin Yuan was very good at traditional Chinese medicine. Qin Yuan might understand the medical skills in it.

“Good!”

As he spoke, Qin Yuan stood up and walked towards the ancient medical books that were yellowish and had an earthy smell.

When he reached the bookshelf, the aura of the tomb became even stronger. Qin Yuan picked up an ancient medical book and flipped through it. It was indeed about the treatment methods of some medical cases.

However, compared to his own pharmacopeias, it was still lacking.

“Of course. How can the system’s pharmacopeias be bad? This is the best medical method recorded in the entire world!”

For a moment, the system’s voice sounded in Qin Yuan’s mind.

Qin Yuan did not say anything. Qin Yuan understood what the system said because the entire treatment method of Pharmacology was deeply imprinted in Qin Yuan’s mind.

Qin Yuan continued to flip through it, but it was roughly the same. Although they could not compare to Qin Yuan’s pharmacopeias, they were already very powerful compared to other medical skills.

After looking at it for a few minutes, Qin Yuan was very sure that this was something that came out of the ancient tomb. Moreover, the owner of the tomb was a doctor, and he was very powerful!

“Elder Liao, these are indeed some ancient medical books. Moreover, they are Miao doctors from the southern border, but...”

“But what?”

Seeing that Qin Yuan wanted to say something but hesitated, Elder Liao was a little puzzled, so he immediately asked Qin Yuan.

“However, these books came out from the ground and are not family heirlooms! The commoner who sold you the book is not an ordinary commoner either. He must be a grave robber!”

It was obvious that the grave robbers had sold it to Elder Liao. If something goes wrong, it could be considered trafficking in cultural relics so Qin Yuan still had to remind Elder Liao.

“What? You said that this was something from an ancient tomb!”

After hearing Qin Yuan’s words, Elder Liao was surprised. He never thought that these books would come out of the ancient tomb.

In that case, these things were cultural relics, and the person who sold the books to him was a tomb raider who sold cultural relics!

“This... This... What should he do now? Is this considered trafficking cultural relics?”

Elder Liao also became nervous. He never thought that this would be something from the ground! For a moment, he did not know what to do! “What should we do now? Should I send this to the Cultural Relics Bureau?”

Elder Liao’s mind went blank. He was very obsessed with medicine. He would collect all the books related to medicine, so he did not think too much about it!

“It’s alright! You bought it without knowing. This is not something you wanted! ”

“However, it would be better to take this cultural relic to the Cultural Relics Bureau, and then call the police to arrest all the grave robbers!”

“These grave robbers have been stealing our country’s cultural relics. They don’t know how important these cultural relics are to the country!”

For a moment, Qin Yuan also gave Elder Liao a suggestion. Elder Liao should have been kept in the dark about this matter! Therefore, as long as he reported it, it should be fine!

“Alright, I’ll send these things to the Cultural Relics Bureau tomorrow and then call the police!”

Elder Liao also heaved a sigh of relief. He still believed what Qin Yuan said, but it was a pity that he had lost these medical books. When he thought of this, Elder Liao also felt a little regretful.

“It’s fine. Elder Liao, don’t worry. As for Chinese medicine, I can explain whatever you want to know to you!”

Qin Yuan knew that Elder Liao was a medical maniac. Spending 200,000 yuan to buy these medical books from these grave robbers was good proof.

“Then thank you, Qin Yuan. I’ve been obsessed with medicine all my life. I would collect and study medical books whenever I encounter them, so I don’t pay too much attention to these things!”

“I didn’t expect that I was almost implicated by these cultural relics traffickers this time!”

Chapter 202: The Top Traditional Chinese Medicine Family! (Two Chapters Combined)

After Elder Liao finished speaking, he sighed! If Qin Yuan had not gone to take a look, he would not have known that these books came from the ground.

“Elder Liao, right! Who was the Divine Doctor Hua you mentioned in the operating theater?”

For a moment, Qin Yuan also remembered that Elder Liao had thought that he was Divine Doctor Hua's disciple in the operating theater. From Elder Liao's attitude, this Divine Doctor Hua should be a very powerful Chinese medicine doctor. After all, he used the title of Divine Doctor. No matter what, he had to be skilled!

"You mean Divine Doctor Hua?"

"He's now the best Chinese medicine doctor in China. He's from the top Chinese medicine family in China. It's said that their ancestor is the divine doctor Hua Tuo!"

Hearing Qin Yuan ask about Divine Doctor Hua, Elder Liao's eyes were filled with admiration.

"Divine Doctor Hua Tuo?"

Hearing this name, Qin Yuan also felt a sense of familiarity. After all, he knew the divine doctor Hua Tuo quite well. If the divine doctor Hua Tuo that Elder Liao mentioned was really a descendant of Hua Tuo, then his medical skills would not be bad!

"Traditional Chinese medicine family? Could they have those rare herbs?"

For a moment, Qin Yuan became excited. According to Elder Liao, Divine Doctor Hua was from the top Chinese medicine family in China, so he was most likely to have the rare Chinese medicine that Qin Yuan needed.

"Elder Liao, I wonder if you can introduce me to him. To be honest, I also want to pay a visit to Divine Doctor Hua!"

Qin Yuan knew that Elder Liao must know Divine Doctor Hua, so he could use Elder Liao to introduce him!

"This..Actually, I'm not very familiar with Divine Doctor Hua. I've only seen him a few times during the Chinese Medicine exchange meetings!" "So, I really might not be able to help you with this!"

Elder Liao was also a little embarrassed. After all, he was only a Western doctor. He only had the chance to attend the Chinese Medical Exchange because Divine Doctor Hua said that doctors had no borders.

Traditional Chinese medicine has long been suppressed by Western medicine, especially after its decline, the situation became even more severe. If it weren't for the past few years when Central and South China took up the banner of traditional Chinese medicine, the field would have faced even greater challenges.

In several areas of complex and difficult diseases, traditional Chinese medicine has stood its ground against Western medicine and has even emerged victorious, proving its effectiveness. If not for these achievements, traditional Chinese medicine would have struggled to regain recognition.

During the World Medical Competition, Central and South China completely defeated Western medicine, which had dominated the field for centuries. It was at that time that Elder Liao became obsessed with traditional Chinese medicine.

One had to know that Chinese medicine was China's own medical skill. If it wasn't for the decline of Chinese medicine and the lack of inheritance, Elder Liao wouldn't have chosen Western medicine!

"It's fine, Elder Liao. I just ran into some problems and wanted to see if Divine Doctor Hua could help!"

Qin Yuan knew that Elder Liao was probably not very familiar with Divine Doctor Hua. Otherwise, he would not be studying these Chinese medicine classics here!

"In that case... I know of an opportunity! Tomorrow is the fifth Chinese medicine conference, and it will be held in N City. Divine Doctor Hua will be there too!"

"When the time comes, there will be a stage where Divine Doctor Hua will answer your questions. You can consult him if you have any questions. I just don't know if you have time to go!"

Elder Liao also remembered that tomorrow was the day of the Chinese medicine exchange, so he immediately told Qin Yuan. After all, he was really not very familiar with Divine Doctor Hua. Otherwise, he could bring Qin Yuan to get to know him!

"Traditional Chinese Medicine Exchange?"

"Elder Liao, will you be going tomorrow?"

Qin Yuan was also very happy to have such an opportunity to get to know Divine Doctor Hua. Moreover, didn't those people from traditional Chinese medicine families go to the Chinese medicine exchange? This way, the chances of him finding the medicinal herbs to save Xiao Zhenwu would be much higher.

"I'm going. I won't miss any of them, so I'll go over early tomorrow morning.

Qin Yuan, do you want to go with me?"

Elder Liao was a little excited. After all, he could learn a lot about Chinese medicine every time he attended the Chinese medicine exchange!

"Traditional Chinese medicine exchange? I also want to see it! Then I'll have to trouble Elder Liao to bring me along tomorrow!"

Qin Yuan should have nothing to do tomorrow. After all, there were still three days before he reported to the military!

Therefore, Qin Yuan would not let go of this opportunity to find these herbs!

"Alright! Give me your phone number. I'll call you tomorrow!"

Elder Liao was also very happy. Qin Yuan's Chinese medicine ability should be very good, but Elder Liao did not expect Qin Yuan to not even know about the Chinese medicine exchange meeting. It seemed that what Qin Yuan said was true. He was a soldier and did not know much about these things in society!

“Right! Qin Yuan, where did you learn Chinese medicine? I feel that although your Chinese medicine skills are very exquisite, you don’t seem to know some people in this profession very well.”

Qin Yuan’s reaction also made Elder Liao a little puzzled. After all, even if Qin

Yuan had learned Chinese medicine from a hermit expert, he should at least know some Chinese medicine families. However, Qin Yuan did not even know about Divine Doctor Hua and the Hua family. This was a little strange!

Hua Zhongnan’s family was China’s number one traditional Chinese medicine family. There were very few people in China who did not know him.

“I’d be honest with you, I really don’t know much about these aristocratic families! I’ve been passionate about Chinese medicine since I was young. It can be said that I learned it by myself from some Chinese medicine classics!”

“But I was born into a military family, so I chose to join the army!”

In the face of Elder Liao’s question, Qin Yuan could only explain it this way.. After all, the pharmacopeias were exchanged from the system store, so Qin Yuan did not know how to explain it!

Chapter 203: The Top Traditional Chinese Medicine Family! (Two Chapters Combined)

“You said you learned it by yourself?”

Elder Liao looked at Qin Yuan in disbelief. He was also very shocked. It was very difficult to learn by yourself without a master.

He was like this too. He had been researching for a few years, but he had only scratched the surface. He had not even reached a level of proficiency!

However, from Qin Yuan’s skillful acupuncture technique in the operating theater just now, he did not seem like a self-taught person at all!

“I’ve been especially fond of reading Chinese medicine books since I was young, so I never gave up. However, my family hoped that I would continue to serve my country, so I joined the army!”

“So that’s how it is? Qin Yuan, you’re really a medical genius. It’s a pity that you don’t practice medicine!”

“Why did you join the army?”

After listening to Qin Yuan’s explanation, Elder Liao also felt a little regretful. After all, if Qin Yuan was self-taught, then his talent in traditional Chinese medicine would be terrifying!

“It’s okay. I joined the army for the people!”

Qin Yuan looked at his military uniform and said firmly to Elder Liao. Whether it was studying medicine or being a soldier, it was for the people! “No, Qin Yuan, that’s not what I meant. Being a soldier is tough!”

For a moment, Elder Liao felt that he had asked the wrong question and immediately explained! He did not mean to say that being a soldier was not good. He just felt that it was a pity that Qin Yuan, who had such good medical talent, did not follow the medical profession!

Looking at Qin Yuan's firm gaze, Elder Liao also felt some admiration. After all, soldiers were worthy of respect, and Qin Yuan was from a military family!

"Elder Liao, you don't have to be so polite. I know what you mean!"

Qin Yuan also knew that Elder Liao did not mean that it was bad to be a soldier. He just felt that it was a pity for him to be a soldier.

"That's good! I'm this straightforward! Therefore, it's easy to offend people!"

Elder Liao was a little embarrassed. After all, he really didn't think it through!

"Elder Liao, if there's nothing else, I'll go back first. This is my phone number.

If you have any questions, you can call me or leave a message."

Qin Yuan also knew that for a medical fanatic like Elder Liao, what they pursued their entire life was the medical skills they loved. Therefore, Qin Yuan was willing to answer Elder Liao's medical questions about traditional Chinese medicine to the best of his ability!

"Okay, thank you, Qin Yuan. I'll call you when I go tomorrow. We'll set off from here together!"

Elder Liao also admired Qin Yuan very much. Qin Yuan's neither arrogant nor impatient personality was really rare! "Good! I'll see you tomorrow, Elder Liao!"

"See you tomorrow!"

After saying that, Qin Yuan walked out of Elder Liao's office and rushed to the ward where Fatty Zhang and the others were.

After Qin Yuan left, Elder Liao immediately packed up all the books he had bought from the cultural relics dealers and went to the Cultural Relics Bureau.

After all, these things were cultural relics. He did not want to break the law because of these things.

He had planned to hand it in tomorrow, but then he remembered that he had to attend the Chinese medicine exchange meeting with Qin Yuan tomorrow!

Soon, Qin Yuan returned to Fatty Zhang's mother's ward. After the operating theater came out, Elder Liao invited Qin Yuan to his office. He did not explain too much to Zhang Erhe!

When Qin Yuan arrived at the intensive care unit, he only saw Zhang Erhe alone. Fatty Zhang was not here!

"Qin Yuan? Why are you here? Are you done talking to the doctor?"

Seeing Qin Yuan walk in, Zhang Erhe asked in confusion. He thought that Qin Yuan would talk to the doctor for a long time!

“Uncle, I came over after we finished chatting. By the way, where is Da Jun?”

Qin Yuan was quite curious. Fatty Zhang should be here at this time. After all, this kid was so worried about his mother, but he was gone at this time!

“Him! I chased him back to the army. Your auntie is fine now, so I chased him back. Initially, I was afraid that your auntie wouldn’t be able to hold on anymore. I didn’t want this kid to have any regrets!”

“He originally said that he would wait for you, but I saw that you were probably busy, so I asked someone to send him back!”

Zhang Erhe also explained. Now that his wife had been saved, his worried heart was relieved!

“I see! That’s good!”

Qin Yuan nodded. After all, there was nothing serious now. Fatty Zhang’s mother only needed to recuperate!

“Thank you, Qin Yuan! Just now, the nurse also told me about what happened in the operating theater. It was you who saved your aunt at the last moment!”

“Although I don’t know when you learned medicine, I have to thank you first!”

Zhang Erhe was very grateful to Qin Yuan. If not for Qin Yuan, he might have been separated from his wife forever!

“You’re welcome, uncle. We’re all family, and Da Jun and I are brothers!” Qin Yuan said with a smile.

“By the way, Uncle, I hope you can keep my medical studies a secret for now.

Grandpa doesn’t like me doing this!”

Qin Yuan did not want too many people to know that he knew medical skills, so

he found an excuse to tell Zhang Erhe.

“You’re indeed your grandfather’s grandson. Be it in the army or in medicine, you’re really proficient in everything!”

Zhang Erhe praised Qin Yuan. Zhang Erhe was very happy that his wife was alive. Even if she had to lie in bed for the rest of her life, he felt that it was a chance given by the heavens!

“No, I still have a lot to learn!”

Qin Yuan replied humbly. He was quite happy that he could save Fatty’s mother. After all, Fatty was his brother. If his mother left, Fatty would probably find it difficult to accept it!

“I’ve heard about your deeds. Work hard, and your achievements in the future will definitely not be lower than ours!”

“We are also getting old. Our country needs young blood like you!”

Looking at Qin Yuan's neither arrogant nor impatient personality, Zhang Erhe was very pleased. After all, what the country needed the most was talented young blood like Qin Yuan!

"Don't worry, Uncle! With us here, our motherland remains steadfast in its redness!"

Qin Yuan knew that whether it was his grandfather or Fatty's father, they had dedicated their lives to the country. Their feelings for the country and the army were self-evident!

"Good. I'm relieved that Da Jun can follow you!"

"Don't worry, I won't tell anyone about your medical skills. I just want to ask about your aunt's situation. Will she be able to stand up?"

At this point, Zhang Erhe became a little nervous. He had heard from the nurse that even if his wife was saved, her bones and organs were seriously injured!

Moreover, the bones in his legs were almost shattered. Even if she survived, she might not be able to stand up anymore!

"Don't worry, Uncle. Auntie's condition has stabilized. With me around, Auntie will definitely recover."

Qin Yuan was not lying. If he, who had the Pharmacopeias and the system, could not do anything about this, then he would be useless!

One had to know that there was still the physique enhancement liquid to improve and repair Liu Yumei's body, so it was definitely possible to recover. It just needed some time!

Although the effect of the Physique enhancement liquid was not as good as the Vitality liquid, Liu Yumei's situation was much better than before. The most important thing was that the Vitality liquid required more than tens of millions of skill points!

"Yes! I won't give up as long as there's a chance. I believe you!"

Hearing Qin Yuan's words, Zhang Erhe's eyes were filled with hope! He knew that Qin Yuan was not lying to him. A soldier's saliva was like a nail. The most important thing was a promise!

"Alright, I'll give Uncle a Chinese medicine prescription. Send someone to get the medicine according to the prescription. The medicine for external application and the method of use are all on it!"

As he spoke, Qin Yuan also picked up the pen on the bedside table and wrote down the Chinese medicine prescription on the note!

"So many herbs?"

Zhang Erhe was a little surprised to see so many Chinese medicines listed on Qin Yuan's paper!

"Yes! The medicine written here are the best Chinese medicine for treatment!"

Chinese medicine is different from Western medicine.. Chinese medicine treats the root cause!"

Chapter 204: Traditional Chinese Medicine Exchange! (Two Chapters Combined)

Seeing Zhang Erhe's surprised expression, Qin Yuan immediately explained. One had to know that traditional Chinese medicine was different from western medicine. Traditional Chinese medicine relied on the nourishing effect of medicinal herbs to eradicate diseases bit by bit.

Western medicine was different. Western medicine immediately used medicine to fight the virus, so it would cause a certain degree of damage to the human body!

"Alright! I'll get someone to buy it now!"

As he said that, Zhang Er immediately got his guard to take the prescription and go out to purchase it!

"Uncle, how is the culprit now?"

Qin Yuan also thought of the culprit who caused this accident! The perpetrator had obviously killed someone on purpose!

"The police have him under control now. I heard that the kid has some background. Otherwise, he wouldn't have run over someone so brazenly!"

Zhang Erhe was very angry. When he said this, his eyes were filled with anger. Looking at his wife on the hospital bed, he wished he could tear the culprit apart!

Qin Yuan was also a little angry. He hated these good-for-nothings the most!

They don't know how to do anything and only know how to commit crimes. Moreover, the culprit relied on his family background to cause trouble outside!

"Background? Who cares about his background! In front of the law, even if his background was the Emperor, he had to bear the sins that he should bear!"

"Uncle, there's no mercy in this matter!"

Qin Yuan also replied to Zhang Erhe angrily. Qin Yuan disliked things like backgrounds the most.

It was because of these so-called backgrounds that these troublemakers dared to do so many evil things!

They thought that every time they did something wrong, as long as they had some background, they would be able to solve all their problems!

"Don't worry! This won't happen in front of me. I want them to know that they've kicked an iron plate this time!"

Zhang Erhe was also very serious. Regarding this matter, he did not care if he had any background or how big his background was!

If not for Qin Yuan, his wife might have been a cold corpse by now. Even if she came back to life, she would still be lying on the cold hospital bed!

Zhang Erhe was already extremely angry. However, he had been at the hospital all this time. Otherwise, he would have charged over long ago!

“Yes! They have to take responsibility for when they are wrong. Don’t think about escaping the punishment of the law!”

“Uncle, you don’t have to worry about Auntie’s situation with me around!”

Regarding this matter, Qin Yuan’s idea was to let the perpetrator receive the punishment he deserved! Fatty Zhang’s mother, Qin Yuan, was very confident that she could return to how she was before. After all, with the Pharmacopeias and the system, he could do it!

“Thank you, Qin Yuan! Uncle won’t give you a speech but after this matter, you must come to our house. Uncle will thank you properly!”

Zhang Erhe did not know how to thank Qin Yuan. He was very touched by Qin Yuan’s actions!

If not for Qin Yuan, he and his wife would have been separated forever. When he thought of this, his anger towards the perpetrator increased even more!

“Uncle, we’re all family, there’s no need to be so polite!”

“If anything happens to Auntie, you can tell me immediately. This is my number!”

“As for the medicine for external application, we have to wait until Auntie wakes up before we start!”

Qin Yuan reminded him. Looking at Liu Yumei on the hospital bed, Qin Yuan felt helpless. When he was young, he received a lot of care from Fatty’s mother. He really did not expect such a good person to encounter such a thing!

“Good!” Zhang Erhe also nodded!

“Then Uncle, I’ll go back first!”

He still had to follow Elder Liao to the Traditional Chinese Medicine Exchange tomorrow, so he had to go back and rest!

“Alright! You’ve been busy the entire day. Go back first!”

“By the way, are you going back to the army or staying here?” Zhang Erhe asked.

“Uncle, I still have some things to do with Elder Liao tomorrow! So I’m staying in the hospital lounge for the night!”

“If anything happens to Auntie, you can tell me immediately. This is my number!”

As he spoke, Qin Yuan handed his phone number to Zhang Erhe!

“Sleep here. Why don’t I arrange a hotel for you? The condition of the lounge here is not very good!”

Zhang Erhe said softly and took Qin Yuan’s phone number!

“I’m fine! We are soldiers, we can go anywhere! Uncle, you don’t have to worry too much!”

Qin Yuan pointed at his military uniform. He did not care much about what Zhang Erhe said. After all, soldiers could sleep and rest anywhere!

“Good!”

Seeing Qin Yuan pointing at his military uniform, Zhang Erhe was very gratified. Qin Yuan had really integrated the attitude of a soldier into his bones. He still remembered that he was a soldier with every move he made!

After saying that, Qin Yuan walked out of the ward. Fatty’s mother was fine, so he could only slowly treat her now. As for Fatty, Qin Yuan felt that Zhang Erhe’s desire for his son to become a dragon was too urgent!

Soon, Qin Yuan arrived at a very clean lounge under the nurse’s arrangements. Qin Yuan’s deeds had spread throughout the entire hospital.

At the critical moment of the operation, he actually used traditional Chinese medicine to save the patient. For a moment, even the eyes of the nurse who brought Qin Yuan to the lounge shone!

“Mr. Qin, have a good rest! Elder Liao left, but he knew that you were going to rest here.. He originally wanted to invite you to his house, but he knew that you probably wouldn’t agree, so he arranged this lounge for you!”

Chapter 205: Traditional Chinese Medicine Exchange Meeting! (Two Chapters Combined)

After bringing Qin Yuan to the lounge, the nurse said softly, her eyes filled with admiration and curiosity for Qin Yuan!

“It’s fine. It doesn’t matter!”

Qin Yuan also knew that Elder Liao had probably gone to hand in those books! He was going to the Chinese medicine exchange tomorrow, so he should be going to deal with these things!

“Alright! Mr. Qin, you should rest well. Elder Liao said that he would come and look for you tomorrow!”

The nurse said again. The nurse was also very happy to see that Qin Yuan was so easy to talk to. She originally thought that Qin Yuan would have his own temper. After all, people with some strength would have their own temper. She did not expect Qin Yuan to be so easy to talk to, and he did not mind staying in the hospital’s lounge! “Alright, thank you for your hard work!”

Qin Yuan also thanked her!

“You’re welcome. Mr. Qin, you can tell us if you need anything! You should rest first! ”

“Sure!”

After saying that, the nurse left. After Qin Yuan closed the door, he began to wash up. He did not feel hungry after a busy day, so he lay on the bed and fell asleep!

Early the next morning, Qin Yuan was woken up by Elder Liao's call!

"Qin Yuan, I'm downstairs! Come down to the parking lot on the basement floor when you get up!"

Elder Liao's voice could be heard from the phone!

"Okay! I'll go down now!"

"Alright, the Chinese medicine exchange meeting is about to begin! I'll wait for you downstairs!"

After saying that, Qin Yuan hung up the phone and immediately got up to wash up. He changed into the casual clothes that Zhang Erhe had sent over and left the room!

Soon, Qin Yuan met Elder Liao in the parking lot!

"Elder Liao, you have a chauffeur! This treatment is not bad!"

After seeing Elder Liao, Qin Yuan also smiled and teased him.

"This is arranged by the hospital. It's not as convenient for us to drive as young people like you! "

Elder Liao also laughed. He did not expect Qin Yuan to joke with him! He thought that Qin Yuan would be very serious!

"By the way, Qin Yuan, the books you mentioned yesterday really came out from the underground. After you left yesterday, I immediately sent them to the Cultural Relics Bureau. In the end, it was confirmed that they were really cultural relics!"

"If you hadn't told me, I really wouldn't have known. If something happened later, I would have suffered!"

As soon as Qin Yuan got into the car, Elder Liao said excitedly! Yesterday, he sent those books to the Cultural Relics Bureau and immediately called the police!

Not only was he fine now, but he had also made a report. Now, the group of grave robbers was wanted by the police!

"You're welcome. It's best if these cultural relic dealers and grave robbers are caught. Many of our country's cultural relics flow out from these people!"

Qin Yuan also knew that these cultural relics dealers and grave robbers were sinners of the country and the people!

For the sake of their own interests, they had sold out their own country's heritage. You have to know that these things are very important to our country. The culture and influence of a country can be used to prove the wisdom of our ancient people and the heritage of our nation!

“That’s right! Those guys were too despicable!”

For a moment, Elder Liao hated these grave robbers. It was a small matter that he spent 200,000 yuan. The most important thing was that the treasures of our country were sold to foreigners by these guys!

“Don’t worry, the police will take care of these guys!”

“By the way, Elder Liao, are you sure that Divine Doctor Hua will come today?”

Qin Yuan knew that the police would not let go of these black sheep who harmed the motherland and the people. He was more concerned about whether Divine Doctor Hua would come today.

After all, the herbs he wanted were most likely known to Divine Doctor Hua. After all, Divine Doctor Hua was from the top Chinese medicine family in China. Their heritage was different from ordinary families.

The heritage of traditional Chinese medicine families was medical skills and medicinal herbs! Therefore, these rare herbs were most likely to be found in these traditional Chinese medicine families!

“Don’t worry! Divine Doctor Hua would never go back on his word!”

For a moment, Elder Liao replied with certainty. Regarding Qin Yuan’s worry, Elder Liao also seemed to feel that Qin Yuan had something very important to look for Divine Doctor Hua, but he did not immediately ask Qin Yuan!

Just like that, they quickly arrived at the city’s gymnasium. The venue for this Chinese medicine exchange meeting would be held in this gymnasium!

After Qin Yuan got out of the car, he was shocked by the scene in front of him! There was a sea of people in front of Qin Yuan. For a moment, the media and the crowd crowded together. This scene could even be compared to some big star concerts!

“Divine Doctor Hua’s influence is really great!”

Looking at the scene in front of him, Qin Yuan sighed softly. He did not expect Chinese medicine to have such a great influence now!

“Of course. Chinese medicine is China’s own medical skill after all. In the past few years, Divine Doctor Hua’s Chinese medicine skills have spread throughout the country!”

“Even some foreign experts in the medical field would come because of this. This is because Divine Doctor Hua used Chinese medicine to cure many difficult and miscellaneous diseases that Western medicine could not cure!”

Elder Liao immediately explained. He was already used to Qin Yuan’s surprise!

“Looks like Divine Doctor Hua is not bad. Someone has finally taken up the banner of Chinese medicine. If our ancestors in China knew about this, they would definitely be very happy!”

Looking at the scene in front of him, Qin Yuan was also very gratified. After all, traditional Chinese medicine was their own medical skills. Now that it was being pursued by the world, Qin Yuan was also very happy!

“Yes, and it’s also because of Divine Doctor Hua that many hospitals have started to set up Chinese medicine hospitals!”

“Let’s go in first! Divine Doctor Hua shouldn’t be here yet!”

As he spoke, Elder Liao took out two invitation cards from his pocket and handed one to Qin Yuan!

“This?”

Looking at the invitation letter that Elder Liao handed over, Qin Yuan was a little surprised. How did Elder Liao have this? Didn’t he say that he didn’t know any Chinese medicine friends?

“This is an invitation from our hospital! Every hospital would have two invitations!”

“I was going to come with another professor, but I told him that I’ll be bringing you here, so he didn’t come! He knew nothing about Chinese medicine, so he was not interested!”

“Don’t think too much about it. What I said is the truth!”

Elder Liao was also afraid that Qin Yuan would think that another professor had given up the opportunity to learn because of him, so he explained!

“So that’s how it is! Then Elder Liao, you’re not particularly proficient in Chinese medicine either! Why are you so obsessed with it?”

Qin Yuan also said with a smile. How could he believe Elder Liao’s explanation? Elder Liao must have done something to stop him, but Qin Yuan still remembered this kindness in his heart!

“If I had Chinese medicine in the past, I would definitely study Chinese medicine!”

Elder Liao said loudly with a firm gaze! Although he was not very proficient in Chinese medicine, his love for Chinese medicine was not something that ordinary people could compare to.

“Thank you, Elder Liao!”

Qin Yuan knew that Elder Liao must have spent much effort getting this invitation letter. Otherwise, with the sea of people in front of them, if they did not have this invitation letter, they might not have been able to enter the venue. Moreover, even if they entered, they might not have had the chance to communicate with Divine Doctor Hua!

“You’re welcome!”

Elder Liao also replied with a smile. Qin Yuan originally wanted him to introduce him to Divine Doctor Hua and now he could be introduced with this invitation letter!

Elder Liao came to the hospital early in the morning with an invitation letter to pick up Qin Yuan. Originally, he was supposed to pick up another professor every time, but this time, he could only leave the professor behind and bring Qin Yuan here!

Meanwhile, Professor Liu, who had originally planned to attend the Chinese medicine exchange meeting with Elder Liao, returned to his office while cursing!

He had been waiting for Elder Liao downstairs for an hour. He had called Elder Liao countless times but could not get through. In the end, he could only return to his office helplessly. Elder Liao had also turned off his phone after picking up Qin Yuan!

“Let’s go! Qin Yuan, let’s go through the exclusive passage!”

“Good!”

On the other side, Elder Liao also said to Qin Yuan, so he brought Qin Yuan to the exclusive passage.

Soon, Qin Yuan and the others entered the stadium under the guidance of the staff!

For a moment, Qin Yuan had no choice but to thank Elder Liao for his help.

Otherwise, even if he came today, he might have to wait in line outside the door.. He might not even be able to enter the venue!

Chapter 206: The Exchange Begins! (Two Chapters Combined)

Soon after, Qin Yuan followed Elder Liao into the venue.

As soon as he entered the venue, Qin Yuan was shocked by the crowded scene in front of him. The entire venue was already filled with people, and even some of the platforms were already packed with people. This was the first time Qin Yuan had seen such a scene. He did not expect Chinese medicine to influence so many people now.

“Elder Liao, has Chinese medicine now influenced so many people?”

Looking at the scene in front of him, Qin Yuan asked Elder Liao beside him in surprise.

“Yes, ever since Divine Doctor Hua defeated the experts from Korea, Japan, and the United States in the afternoon exchange, the whole of China and even the world was in an uproar!”

Elder Liao nodded and patiently explained.

“Korea? Japan?”

“The Chinese medicine exchange meeting actually invited people from these countries?”

Elder Liao said that if countries like Korea, Japan, and the United States were to participate in the Chinese Medicine Exchange, then this Chinese Medicine Exchange would not just be an exchange between Chinese doctors!

It could be said that this was already a small-scale international medical competition!

“Yes, in the beginning, this Chinese medicine exchange meeting was just a small exchange meeting between Chinese doctors!”

“However, after someone uploaded the video of the scene to an international website, the response was very intense!”

“There are even some Chinese medicine practitioners and Western medicine practitioners who have started a fierce confrontation on the forum!”

“As you know, Chinese medicine has been suppressed by Western medicine for the past few hundred years. In addition, there is a serious gap in the inheritance of alternative medicine in China, so alternative medicine has always been looked down upon by Western medicine!”

“Japan and Korea have always said that Chinese medicine is their heritage!”

Upon hearing Liao Lao’s words, a flicker of anger appeared in Qin Yuan’s eyes. Chinese medicine has always been a heritage of the Chinese ancestors passed down to future generations. When did it become associated with countries like Japan and Korea?

Let’s not forget that these countries have all derived their culture and even their writing system from China’s influence.

“How shameless! These tiny island nations dare to claim that Chinese medicine is part of their heritage!”

Qin Yuan had no favorable impression of these Japanese and Korean individuals. He regarded their nations as despicable and a disgrace to humanity.

“That’s because our country, China, has experienced decades of turmoil and conflicts, resulting in a significant disruption in the inheritance of Chinese medicine.”

“During the last Chinese Medicine Exchange Conference, these countries directly participated. After all, medical skills know no borders, and countries are constantly revitalizing their cultural heritage. Therefore, they allowed medical practitioners from other countries to join in.”

“During that conference, both Japan and Korea sent several highly skilled medical masters. As a result, not a single Chinese physician had the opportunity to demonstrate their skills during the entire exchange conference. ”

“At the last moment, Hua Zhongnan, or Divine Doctor Hua, suddenly appeared and defeated the doctors from Japan and Korea with his Chinese medical skills. That saved the reputation of Chinese medicine!”

When Elder Liao mentioned Hua Zhongnan, his eyes were filled with admiration. Just from this point alone, Qin Yuan felt that the Divine Doctor Hua that Elder Liao mentioned was worthy of his respect.

As a soldier, he knew how important and difficult it was to protect the country's reputation in any place and situation!

“Elder Liao! Is Divine Doctor Hua here?”

Looking around the venue, it seemed that there weren't many doctors present, and the staff members were busy. It appeared that there were no doctors from other countries.

“Not yet. There are still a few minutes before the start of the conference. Let's go and take our seats in the front row first.”

“We were invited to participate in the exchange conference, so we have our exclusive seats!”

Elder Liao explained.

“Sure!”

With that, they were led to their seats by the staff.

“Elder Liao, is this Divine Doctor Hua's medical skills very strong?” Seeing that the exchange meeting had not started yet, Qin Yuan continued to ask Elder Liao about Divine Doctor Hua's medical skills. According to Elder Liao, Divine Doctor Hua's medical skills should be very powerful.

“If he isn't strong, how can he be called Divine Doctor Hua?”

“It's just that during the last exchange meeting, those medical masters from Korea and Japan deliberately used some special cases to challenge our Chinese medicine.”

“Moreover, at that time, our Chinese medicine couldn't even figure out what the cases were. It was only in the final moments that Divine Doctor Hua came forward and, within just two minutes, diagnosed them!”

“You see, those cases even stumped Western medicine, requiring various instruments for examination, and there was still a possibility of misdiagnosis. But the Divine Doctor Hua solved them in just two minutes!”

At this point, Elder Liao became even more excited as if the scene back then was happening now!

The exciting scenes kept appearing in Elder Liao's mind!

“Indeed, reaching the point of diagnosing complex cases within two minutes is already considered master-level in Chinese medicine.”

Qin Yuan also understood that Divine Doctor Hua's medical skills were already at the master level to be able to diagnose those difficult and miscellaneous diseases in two minutes!

Qin Yuan only knew that Chinese medicine was divided into four levels after obtaining the Pharmacopeias. They were beginner, proficient, master, and grandmaster. The divine doctor Hua Tuo was a doctor at the grandmaster level..

Chapter 207: The Exchange Begins! (Two Chapters Combined)

‘Yes, during that exchange meeting, the divine physician not only diagnosed those difficult cases within two minutes but also effectively controlled the patients’ conditions on the spot. In no time, he successfully treated those illnesses.’

“The other physicians from different countries, including medical professors from the United States, were shocked and couldn’t believe the incredible skills of Divine Doctor Hua in Chinese medicine.”

“It was at that moment when everyone started referring to him as the divine doctor. However, the divine doctor himself never allowed others to address him in that manner.”

Elder Liao said excitedly to Qin Yuan. At that moment, Elder Liao was completely convinced by traditional Chinese medicine.

“Let’s see if we can make friends with Divine Doctor Hua! From what you said, Divine Doctor Hua is a respectable Chinese medicine master!”

Qin Yuan replied with a smile. From Elder Liao’s words, he could feel that Divine Doctor Hua was a very good Chinese medicine master.

A doctor’s benevolence was the most basic quality of a medical student. The more powerful a Chinese medicine practitioner was, the more approachable, kind, and loving they would be. This was because Chinese medicine could nourish the heart. Only when one’s state of mind had a breakthrough could one make a difference in medical skills!

Therefore, the most important thing in Chinese medicine was to cultivate one’s body and mind. The more calm one’s mind was, the more academic breakthroughs one could make in Chinese medicine. Chinese medicine had a long history, and many very powerful Chinese doctors had emerged!

Even Qin Yuan’s pharmacopeias and the Taiyi Divine Acupuncture Technique were medical treasures passed down by the Chinese ancestors!

“Don’t worry, Divine Doctor Hua will answer any questions you have after this.

He has a good temper and is very approachable!”

Elder Liao knew that Qin Yuan came here today to seek guidance from Divine Doctor Hua. This was because, in Elder Liao’s heart, he did not think that Qin Yuan’s Chinese medicine skills could be better than Divine Doctor Hua’s!

‘Yes!’

Qin Yuan nodded!

He didn't deny when Elder Liao had said that he was here to learn from Divine Doctor Hua. Although he knew that his current Chinese medicine level had reached the grandmaster level, he didn't want too many people to know.

After all, he was a soldier. If not for Xiao Zhenwu's illness, he would not have come here!

Soon, an emcee of the exchange event also came up with the microphone!

"Hello, everyone. I'm Liao Yusheng. I believe that all of you who have attended the Chinese medicine exchange meeting before already know me!"

"That's right. I'm also the host of this year's Chinese Medicine Exchange. I'm very happy that everyone can attend this Chinese Medicine Exchange. Seeing this crowded scene, I know what everyone is looking forward to!"

The moment the emcee went on stage, the atmosphere at the venue was immediately lifted.

"Divine Doctor Hua! Divine Doctor Hua! Divine Doctor Hua!"

"Chinese medicine is invincible! Chinese medicine will win!"

For a moment, everyone in the venue started chanting. The voices of tens of thousands of people shook the entire venue. Even Qin Yuan, who was sitting in the guest seats, was a little moved by the atmosphere.

This was a kind of passion for Chinese traditional medicine and Chinese heritage. It was also a kind of national pride that was stimulated from the bottom of their hearts!

"Alright! I know that everyone is looking forward to seeing Divine Doctor Hua, and I'm very happy that Divine Doctor Hua has come to our event today. Next, we'll be bringing everyone a pinnacle showdown in medical skills."

"Everyone, please look forward to it!"

The host was very professional and knew how to drive the atmosphere of the venue. Just these few words alone ignited the entire audience!

"Chinese medicine is invincible! Chinese medicine would win! The world's number one doctor in Chinese medicine!"

For a moment, the slogan rang out. In their eyes, Chinese medicine was the medical skill of their country.

Over the years, Chinese medicine had been suppressed and even questioned by many people. This was because there were more than one or two brainless experts on the Internet who asked for a medical qualification certificate!

Those people's eyes had been gnawed through by modern medicine. They had even forgotten that they were Chinese!

One had to know that even after traditional Chinese medicine had cured an illness that Western medicine couldn't cure, those experts actually still asked about their medical qualifications!

Fortunately, the country's Chinese medicine system gradually recovered over the years, and many Chinese doctors could also get a medical qualification certificate. Otherwise, Chinese medicine would have been wiped out by this move.

**"Next, let's give a warm round of applause to celebrate the start of the fifth Chinese Medicine Conference!"**

Following the host's words, the entire venue erupted into loud applause!

**"Next, let's invite our Chinese Traditional Chinese Medicine delegation to the venue!"**

Following the host's introduction, a group of Chinese medicine representatives walked out from the entrance. All of them were dressed in Chinese clothing, giving off a historical feeling!

**"Chinese medicine will win! Chinese medicine will win!"**

As the Chinese medicine delegation entered the venue, the entire venue was filled with a series of cheers.

**"Next, let's welcome our international medical delegation!"**

As soon as the host finished speaking, a few Korean doctors and Japanese doctors walked out from the entrance. Then, there were a few American medical professors. They were all wearing their own national costumes!

However, after they entered the venue, the entire venue was silent. Even a needle falling to the ground could be heard. Qin Yuan was amused by this scene!

One had to know that the difference was too great. The tens of thousands of people in the entire venue could actually achieve divine synchronization at this moment. This also represented the patriotic heart of the audience. Although Qin Yuan also knew that medical skills had no borders, the Chinese doctors had it, and the audience had it!

**"These international doctors have come from afar. As a country of etiquette, everyone should follow me and give them warm applause!"**

When the host saw this scene, he was a little embarrassed. He immediately said to the audience, "After all, no matter what, although we don't like it when people come to our country, we can't be too obvious."

Following the host's words, some claps rang out from the audience. It was obvious that the audience did not buy the host's words!

This was the home advantage. After all, if they didn't like it, they didn't like it. How could one force them to like someone?

When the host saw this scene, he quickly changed the topic!

“Good! Now, let’s welcome the one we’ve been looking forward to, Divine Doctor Hua, Elder Hua!”

The host shouted loudly. Instantly, the entire venue was already in an uproar. “Divine Doctor Hua! Divine Doctor Hua! Divine Doctor Hua!”

Hua Zhongnan was wearing a white robe! He had a head full of white hair and his eyes were bright and piercing. His entire person gave off a kind aura that emanated from his body!

Qin Yuan looked at Divine Doctor Hua who walked out and instantly felt a sense of amiability and closeness!

“Hello, everyone!”

After Elder Hua walked onto the stage, he waved at everyone in the venue and gestured for the audience to stop cheering!

The entire venue immediately fell silent. After the cheers from the audience stopped, all the doctors took their seats.

On the stage, a Japanese doctor said angrily.

“They are all low-class people with no manners at all. They are all sick men of East Asia. How can they compare to our people!”

“That’s right, they’re all Chinese pigs. Our Yamato people’s medical skills are some of the best in the world!”

Another Japanese doctor who was with him also responded angrily. They were still a little resentful towards the audience’s attitude!

“Hua Zhongnan, this guy, I’ll let him know what true medical skills are in a while!”

“Don’t worry! Before we came, we had already made preparations with the American experts!”

The Japanese doctor laughed evilly.

Although the Japanese doctor’s voice was very soft, it was still heard by Qin Yuan. One had to know that Qin Yuan had a warning radar, so their conversation was heard by Qin Yuan. He knew that these guys were definitely up to something bad again!

For a moment, the corners of Qin Yuan’s mouth curled up slightly.. In a while, he would let these Japanese people know that they would be responsible for what they had said!

Chapter 208: Traditional Chinese Medicine VS Western Medicine! (Two Chapters Combined)

“First of all, I’m so happy that so many people have come to the Chinese Medicine Exchange today. I’m also very grateful to everyone for their attention to the world’s medical skills!”

“Today, not only are there representatives of Chinese medicine from all over China, but there are also some international doctors from around China. I believe that today’s exchange meeting will be especially exciting.”

After all the doctors sat down, the host once again brought the atmosphere of the audience to life.

“Chinese medicine is invincible!”

“Chinese medicine will win! Divine Doctor Hua will definitely win!”

For a moment, there was a thunderous applause. The enthusiasm of the audience was no weaker than in any large-scale competition!

“Next, let me introduce the rules of this exchange!”

“This exchange is divided into two stages!”

“In the first stage, the representatives of Chinese traditional medicine and the representatives of international doctors will examine and treat the 10 patients arranged for the competition!”

“The representative with the shortest time and the highest accuracy wins!”

“In the second stage, each of the representatives will send a patient to the other party’s doctor to treat the patient and provide the best treatment method!”

“Now, the exchange will officially begin!”

As soon as the host finished speaking, the venue erupted into a round of applause. They were also looking forward to what the upcoming competition would be like!

A minute later, as the audience stopped cheering, the exchange officially began.

Soon, under the arrangement of the host, the 10 patients from the hospitals in the country walked onto the stage.

As the competition began, physicians from different countries started diagnosing and treating their assigned patients. After about 10 minutes, the representatives from each country returned to their seats with the results, jotting down the symptoms of each patient on paper.

Meanwhile, the Chinese traditional medicine representatives approached the patients for diagnosis and treatment after the physicians from other countries had finished. However, Elder Hua remained seated and did not walk forward.

The audience was puzzled by this scene. Why didn’t Elder Hua come forward to treat the patient? Could it be that Elder Hua felt that his presence was unnecessary?

For a moment, the audience in the venue began to speculate.

Qin Yuan also noticed this scene. Qin Yuan glanced at the patients on the field and found that they were indeed suffering from some common diseases. This was indeed not challenging for a Chinese medicine master like Elder Hua.

Therefore, Elder Hua was probably planning to let other Chinese medicine doctors compete with the representatives of doctors from various countries. If Elder Hua were to diagnose such a simple illness, he would be able to diagnose all the patients in four to five minutes!

Very soon, the Chinese medicine representatives were all done with their diagnosis and treatment. They immediately returned to their seats and listed the symptoms of the ten patients on a piece of paper.

The on-site staff quickly brought the answers of the doctors from both sides to the judges!

The live audience became nervous for a moment. Now, they were waiting for the host to announce the time and accuracy of the treatment for each delegation!

A few minutes later, the host walked onto the stage!

“I’m sorry to have made everyone wait! Everyone must be looking forward to the final result of the competition!”

The moment the host came on stage, the entire audience was excited. Everyone was looking forward to the final result of this competition. Would the Western doctor’s medical skills be better or the Chinese doctor’s slightly better?

“This time, our Chinese medical team took 10 minutes and 25 seconds to diagnose all 10 patients!”

“Chinese medicine will win! Chinese medicine is invincible!”

As soon as the emcee finished speaking, the crowd erupted in cheers.

“As for our international doctors, they also took 10 minutes and 25 seconds, and... they also diagnosed all the patients’ illnesses correctly!”

When the host announced the results, the live audience fell silent for a moment. They were all a little stunned. They did not expect such a coincidence. The representative doctors of Chinese medicine and the international representative doctors took the same amount of time, and the number of people who were diagnosed correctly was also the same.

Doesn’t this mean that the competition between the Chinese medicine representatives and the international representatives is considered a draw?

“After the decision of the judges, the result of the competition between the Chinese medicine representatives and the international representatives is a draw!”

In fact, even the host was a little stunned when he received the news. After all, the timing was too coincidental. However, this was the truth. He could only announce the results truthfully!

“Isn’t this too much of a coincidence?”

For a moment, Elder Liao, who was seated below the stage, sighed softly. He also felt that the results of this competition were too coincidental. The Chinese medicine representative doctors and the international representative doctors actually took the same amount of time, and all the patients were diagnosed correctly.

“The Chinese medical doctors are doing this on purpose!”

Qin Yuan could tell from the start that when the other representatives of traditional Chinese medicine went on stage, Elder Hua had already told one of them not to let the doctors from other countries lose too badly.

Elder Hua’s intention was probably to not attract too much attention. After all, there were too many countries paying attention to this competition. This had even attracted the attention of the international community. After all, this exchange was also being broadcasted in real time!

“This? Why would they do that?”

Elder Liao couldn’t understand Qin Yuan’s explanation at all.. Why did they deliberately draw with the international representative doctors when they could have won the competition?

Chapter 209: Traditional Chinese Medicine VS Western Medicine! (Two Chapters Combined)

“Our Chinese physicians probably don’t want to be too ostentatious, and Elder Hua doesn’t seem to want to create a storm of public opinion!”

Qin Yuan did not understand this either. After all, this seemed to be just a competition between doctors. There was no need to hide anything. However, from the conversation between Elder Hua and the traditional Chinese medicine doctors, Qin Yuan felt that this was what he meant!

“Alright then! It is possible that he did not want to affect the relationship between the countries!”

Elder Liao seemed to have understood something. When Qin Yuan said this,

Elder Liao remembered that the last time, because Divine Doctor Hua defeated Western medicine with Chinese medicine, some of the audience members from the Western countries were unhappy and fought with the audience members from our country.

“What’s wrong?”

Qin Yuan was a little curious when he saw Elder Liao say this with a dark expression. This was because from Elder Liao’s expression, Qin Yuan knew that Elder Liao should know why!

“After Divine Doctor Hua defeated Western medicine previously, some of the audience from Western countries were unhappy, so they started arguing with our country’s audience.”

“And they fought. I heard that there were even deaths. This time, the international public opinion is very big!”

“So, Divine Doctor Hua must be doing this because he doesn’t want the same thing to happen again!”

Hearing Elder Liao’s explanation, Qin Yuan finally understood Elder Hua’s motive for doing so. However, Qin Yuan had swept his gaze across the audience just now and did not find anyone from other countries. It was possible that the organizers did not allow spectators from other countries to enter this time!

Qin Yuan could understand this reason. Western medicine has dominated the field of healthcare for the past century or two, and in the eyes of many, it represents the pinnacle of medical expertise.

So, for them, it would be challenging to accept a sudden defeat by traditional Chinese medicine, especially if they held a biased or limited view of its effectiveness.

However, since Chinese medicine was experiencing a revival, they should seize the opportunity to demonstrate its capabilities to the world instead of being afraid.

Traditional Chinese medicine needs to demonstrate its strengths to the world and make the global medical community aware that its thousands of years of heritage cannot be easily compared to the few hundred years of Western medicine.

In particular, after Qin Yuan obtained the Medical Compendium, he discovered that it contained a vast amount of information on various diseases and treatment methods. Even medical conditions that modern medicine struggles to treat are documented in the compendium. As a result, Qin Yuan’s understanding of traditional Chinese medicine has greatly expanded, surpassing multiple levels.

“Since the Chinese medicine representatives and the international representative doctors had a draw in the first stage, then the second stage of the medical competition will definitely be especially exciting! Let’s wait and see!”

Not long after, the host’s voice rang out. Many people felt that the results of the first stage of the competition were too coincidental, but they did not know that this was a deliberate move by Elder Hua!

“Chinese medicine will win!”

“That’s right. Don’t forget that Divine Doctor Hua didn’t even make a move. If he did, he would definitely be able to defeat them!”

“That’s right! Divine Doctor Hua definitely didn’t want Western medicine to lose too badly. Otherwise, he would definitely defeat them completely!”

For a time, some of the audience members in the venue commented softly.

After all, Elder Hua had not participated in the first stage of the competition. If Elder Hua had participated, the result would definitely not have been like this.

Therefore, the audience in the venue was also looking forward to the second stage of the competition because they knew that Divine Doctor Hua would definitely make a move in the second stage.

Qin Yuan did not agree with Elder Hua's operation. After all, this was a competition of medical skills. Since it was a competition, he should go all out!

"Good! Since the first stage of the competition had ended, the second stage of the competition for difficult and miscellaneous diseases had officially begun!"

"First of all, can the Chinese medicine representatives send out a patient with a difficult and complicated disease for the international doctor representatives to diagnose!"

As soon as the host finished speaking, a patient was pushed out by the nurse.

"Hello, esteemed international medical experts! This patient is someone we have received with multiple complex and difficult conditions."

"Due to the diverse range of diseases the patient is experiencing, it took some time for our traditional Chinese medicine practitioners to diagnose the specific conditions this patient is suffering from!"

"So we also want to see what the international medical experts have to say about the patient's illness!"

A Chinese medicine doctor walked out and said to the international doctors.

At this moment, Qin Yuan, standing in the audience, also noticed the patients being presented by the traditional Chinese medicine practitioners for diagnosis.

The patient was wearing a black coat that covered his entire body except for the eyes, with thick clothing layered on every other part!

Seeing the patient wearing so many clothes in such hot weather, Qin Yuan found it peculiar and decided to use the system to scan the patient.

"Porphyria?"

For a moment, Qin Yuan exclaimed in surprise. From the series of symptoms and manifestations of the patient on the stage, there was no doubt that it was Porphyria.

This disease had long been recorded in the Pharmacopeia. This disease was also known as the top ten strange diseases and ranked first. It was already recorded in the Traditional Chinese Medicine Pharmacopaea!

"Porphyria?"

Hearing Qin Yuan, even Elder Liao was puzzled. He had never heard of such a disease in the world.

"Qin Yuan, what kind of illness is this?"

Elder Liao asked curiously. This was the first time he had heard of this illness!

"This condition is when the natural chemicals in the human body produce too much bilirubin. Porphyria can cause serious problems in the body, such as vomiting, itching, and epilepsy."

“But the worst thing is that it can cause a person to be overly sensitive to sunlight and seriously damage the skin. Because of this symptom, it is called ‘vampire disease’ in traditional Chinese medicine.”

Qin Yuan began to explain to Elder Liao. Qin Yuan was amazed by this illness. These were all recorded in his pharmacopeia. As for whether there were any records of this illness in modern Western medicine, Qin Yuan did not know!

“Is there such a disease in this world?”

Hearing Qin Yuan’s explanation, Elder Liao also exclaimed. He did not expect such a strange illness to exist in this world!

“Then can this illness be cured?”

Elder Liao also asked the question that he was most concerned about. He did not know much about this disease! As a doctor, what he cared about the most was whether this illness could be cured.

“This disease cannot be cured. At present, there is no way to cure the disease, whether it is traditional Chinese medicine or Western medicine. The patient will have repeated episodes throughout his life. However, through regular treatment, staying away from the inducement can prolong the time of the illness and improve the quality of life of the patients with Porphyria.” “Porphyria is prone to repeated attacks. When it attacks, the patient will be in more pain! This kind of illness could be controlled by traditional Chinese medicine, but it was too difficult to cure it!”

According to the records Qin Yuan found in the medical compendium, there were indeed treatment methods for porphyria. However, Qin Yuan was aware that the patient on stage was already in the advanced stage of the disease. If it had been detected earlier, there might have been a chance for a less costly cure.

The system’s medical compendium did provide treatment methods for this condition, but the cost was equally high. Currently, Qin Yuan had no means to treat the patient on stage, so he could only inform Liao about the inability to provide a cure.

Because Xiao Zhenwu’s cancer was already giving him a headache. He couldn’t treat the patient on stage too!

For a moment, even Qin Yuan felt how scarce skill points were. This was the first time he felt that skill points were not enough when he needed them!

If he had enough skill points, Qin Yuan would be willing to treat the patient.

Now, even someone like him could only alleviate the symptoms and buy time. As for healing, he could only wait until he had enough skill points!

“I really didn’t expect there to be such a strange disease!”

Elder Liao sighed. He could only be surprised by this illness. As for the treatment, he did not dare to think about it.

“This strange disease can already be compared to cancer!”

Qin Yuan did not expect the Chinese medicine doctors to take out such a patient for a competition.. They probably wanted to see if Western medicine had a way to treat this patient!

Chapter 210: Traditional Chinese Medicine is Not Powerless! (Two Chapters Combined)

When they saw the patient’s condition, the international doctors were also shocked. It was obvious that this illness was a headache for them!

The doctors from Japan also walked to the side of the patient and immediately examined him carefully.

The American doctor’s face darkened. Qin Yuan also noticed the expression of the American medical expert. It seemed that the American medical expert had also come into contact with patients with this disease.

“There’s no way to cure this illness!”

After a moment of silence, the American medical expert said softly. The United States had long begun to study this disease, and so far, they still had not figured out how this disease developed, let alone the treatment method!

After hearing the American medical experts’ words, the doctors from Japan and Korea stopped their examinations. They had been there for some time and still could not figure out what the illness was. From the words of the American medical experts, they knew that the American experts must have known about this illness!

“Professor Hanson, do you know what this is?”

A Japanese doctor asked with a puzzled look. They had never seen such a disease before, so they had just checked for a long time and did not know what it was!

“This disease has long been discovered in the United States. We call this disease porphyriasis!”

The American expert came forward to explain. The United States discovered this illness many years ago and had studied it for many years. However, he did not expect the Chinese medicine representative to take out a patient with this illness!

“Porphyria? What kind of illness is this?”

The medical experts in the United States and the doctors in the various countries were all confused. They had never heard of this illness before!

This was also the first time that the Chinese medicine representatives had heard of the name of this disease in the United States. After Elder Hua examined the patient, he said that this disease had been recorded in some ancient Chinese medicine books. It seemed that the ancient Chinese medicine doctors called it vampire disease!

“This condition is when the natural chemicals in the human body produce too much bilirubin. Porphyrria can cause serious problems in the body, such as vomiting, itching, and epilepsy.”

“But the worst part is that it causes the patient to be overly sensitive to sunlight and can seriously damage the skin.”

“Although the US has discovered this disease for many years, we have no way to treat it. We can’t even alleviate it!”

Upon seeing such a patient with this condition, Dr. Hansen, the medical expert from the United States, shook his head helplessly. Even he had no way to treat this kind of illness!

After hearing Dr. Hansen’s words, the physicians from Japan and Korea showed signs of frustration. They didn’t expect the Chinese medical representatives to present such a challenging case for them to diagnose and treat. It was clear that if they couldn’t identify the illness, they would be considered defeated.

Seeing this situation, the doctors from the other countries could not accept it at all. They walked straight to the Chinese medicine representative’s seats and said angrily, “You Chinese medicine doctors brought out such an incurable disease for us to examine. Can you guys even diagnose and treat this disease?”

For a moment, the Japanese doctor saw this situation and started to act shamelessly. He felt that the Chinese medicine representatives were cheating. If even the American experts said there was no way to treat this illness, then there was no way for Chinese medicine to treat it!

If that was the case, then this competition would be meaningless!

“Exactly! You’re completely disregarding the competition by presenting such a patient for us to diagnose. This untreatable condition holds no significance at all!”

The doctors from Korea, like the doctors from Japan, also ran to the Chinese medicine representatives to protest!

For a moment, the doctors from these two small countries were very angry. They all felt that the Chinese were cheating, and they also felt that Chinese medicine could not cure this disease at all.

The American medical experts did not say anything. They just quietly watched the doctors from Korea and Japan argue with the Chinese medicine representatives!

Seeing this scene, Elder Hua, who was sitting at the side, stood up from his seat!

“We Chinese doctors brought out a patient with this illness to see if Western medicine has a way to treat it! As for what you said about us ignoring the rules of the competition, when did the rules say that such a disease was not allowed?”

When Elder Hua saw that the doctors from all over the world kept saying that Chinese medicine was ignoring the rules of the competition, he was also a little angry!

This was originally a competition between doctors. If they could all cure the illness, then what was the point?

“Then can you Chinese doctors diagnose and treat it?”

Seeing Elder Hua speak, the Japanese doctors were unhappy and asked Elder Hua!

“We Chinese doctors have a different name for this illness. We call it vampire disease!”

“Although we, as practitioners of Chinese medicine, may not currently have a method to treat this condition, we can at least alleviate the patient’s symptoms and reduce the frequency of attacks!”

“It seems... you can't even achieve that, can you?”

As he spoke, Elder Hua looked at the American medical expert, Hansen, who was standing at the side.. Elder Hua did not hold back at all when the Japanese doctor provoked him!
