

Special Troop 511

Chapter 511 - 511: Methods of Modification

Li Rong and the others continued to chat as they showed Qin Yuan around.

“Actually, we participated in the research and development of the Type 11 sniper rifle that you successfully improved. Although it has been mass-produced and put into use, there has been no progress in the improvement and optimization.” Li Rong said to Qin Yuan.

“But what surprised me was that you only improved one or two parts and adjusted the synthesis of some materials, and you successfully improved the performance of this gun by so much.”

“You don’t know how many senior experts in our laboratory were shocked by the results of this improvement.”

The experts at the side nodded to show their approval of Qin Yuan’s strength.

Unknowingly, everyone had already walked to the laboratory office. “Let’s talk in the office first. Everyone can’t wait to know your improvement ideas and concepts.”

As soon as Qin Yuan sat down, he went straight to the point and told the experts about his improvement concept and process as if it was a family treasure.

After listening to Qin Yuan’s explanation, everyone was shocked. They were deeply impressed by Qin Yuan’s unconventional new ideas and innovative thinking.

Time passed quickly as they chatted. It was already night time. After dinner with Li Rong, Qin Yuan went straight back to the dormitory to rest.

After all, they had been on the road for a whole day, and they had shared and discussed the principles and concepts with the experts for most of the afternoon. Even a person made of iron would feel tired.

“Right! Chief Physician Li!”

Qin Yuan suddenly called out to Li Rong, who was about to turn around and leave.

“What’s wrong? Is there anything else?” Li Rong asked him doubtfully.

“This time, I specially brought a modified Type 10 sniper rifle with me. It’s in the car.”

“I’ve optimized it recently, so I wanted to bring it over for you to help test.”

“When we set off today, I tested it at the Battle Wolf Base. Its performance has increased by a conservative 5%!”

As soon as Qin Yuan finished speaking, everyone present was stunned! Everyone could not wait to find this spear.

“Did I hear it right? That’s the Type 10 sniper rifle that we spent years trying to improve and almost gave up.”

“Qin Yuan’s colleague just said that it has been improved by 5% on the original basis. If this is true, then this can definitely shake up the entire Chinese military industry.”

When Lin Haidao saw this, he quickly took the Type 10 from the car. The experts could not care less about resting now. They immediately took the gun and could not wait to test it.

Qin Yuan tidied up and went to sleep.

At five o’clock in the morning the next day, Qin Yuan had already gotten up and washed up before heading to the training ground for morning exercise.

Although there was not much space for training, there was still a field.

However...It was too small. It was only four to five hundred meters.

It couldn’t be compared to the ones in Battle wolf Base. The ones in the base could easily reach thousands or even tens of thousands of meters.

However, it was no wonder. This place was probably just for the experts to take a walk and relax after a meal.

Qin Yuan had only gone out for less than 20 minutes when a car stopped outside his residence.

In order to ensure the safety of the experts, the research center gave each of them a small villa. There would be security guards patrolling outside the villa day and night.

The experts got out of the car one after another and looked at Qin Yuan’s residence with hesitation.

“Isn’t it too early for us to disturb Comrade Qin Yuan? Perhaps he hasn’t woken up yet.”

Every expert had a tired look on their face.

Last night, they stayed up until midnight to test the gun that Qin Yuan had brought.

In the end, they found that the performance of the gun had increased by as much as 5% as Qin Yuan had said.

If special bullets were added, the power would continue to increase.

More importantly, after Qin Yuan adjusted and improved the parts, it did not affect the later maintenance at all. In fact, after testing, he found that the life of the Type 10 sniper rifle was actually longer than before.

This was definitely a huge improvement.

Every expert was so excited that they couldn’t sleep. After the test was completed, they couldn’t wait to come over and find out more about Qin Yuan.

To these scientists, money could not arouse their ultimate desire. The only thing that could arouse their desire to explore was weapons research.

At this moment, Li Rong called the security personnel in charge of the area over and asked, "How was Comrade Qin Yuan's rest?"

"I've been resting in my room since I came back yesterday," the security guard said respectfully. "But I went out for morning exercise at five in the morning today."

The experts looked at each other and could not help but admire Qin Yuan even more in their hearts.

Qin Yuan's self-discipline was indeed worthy of being a special forces soldier. Then, everyone drove to the field.

When they reached the field, they could vaguely see a figure running around the field.

When everyone saw Qin Yuan, who was so engrossed in his morning exercise, they did not take the initiative to disturb him. They only watched silently from afar.

Finally, after running for five kilometers, Qin Yuan discovered the people who were looking at him not far away. He gradually adjusted his speed and slowly ran in the direction of Li Rong and the others.

After a few minutes, Qin Yuan adjusted his breathing and asked calmly, "Why are you all here?" Do you guys have the habit of doing morning exercises?"

Chapter 512 - 512: Thoughts and Methods of Modification

Everyone was silent.

At this moment, Li Rong continued, "They didn't wake up early. They just didn't sleep at all."

"We tested the Type 10 sniper rifle you brought last night and studied it until late at night. We came to find you early in the morning to understand the details. "

"That's right! How can we sleep? Such excellent improvement data is too rare."

At this moment, Lin Haidao added, "You guys from the Battle wolf Special Forces are really amazing. I didn't expect you to be up for morning exercise before the sun even rose. You're really admirable!"

"Everyone didn't sleep the whole night and came to look for me early in the morning. I'm too embarrassed to continue my morning exercise."

Qin Yuan was a little embarrassed.

"Then I'll go back and take a shower to change my clothes. We'll meet in the office later." Qin Yuan said politely.

"Alright, no problem! We'll wait for you in the office first."

"Everyone, you haven't slept all night. You should go back and wash up. You can leave first."

Li Rong told the experts to go back and clean up.

Everyone nodded after hearing this. They turned around and got into the car to return to their respective residences.

After Qin Yuan took a shower and washed up, he followed Li Rong and the others to have breakfast and went to the laboratory together.

Qin Yuan turned on his computer and combed through all the processes and concepts of the 10 modifications.

The experts who had come to a realization finally understood why Qin Yuan could complete such a perfect weapon modification.

It turned out that Qin Yuan had modified the steel springs and other items in the materials. Although the adjustment was not very large, it could make the entire part fit more tightly.

This would increase the accuracy of the gun and reduce the friction between the parts.

It was not that they had not thought of what Qin Yuan said, but after repeated acting and experimental tests, the final effect was not as good as his performance.

Because there were too many things involved in this, there were nearly a hundred details that had to be taken into account. A slight change could cause a serious difference in the results.

This was like cooking. When to put in the ingredients, how to control the heat, even if it was the same recipe, different people would make different tastes.

On the other hand, not only did Qin Yuan master the core improvement technology, but he had superb practical skills that matched the technology.

Through Qin Yuan's explanation, the experts present were all shocked by his unique concept.

It was not that Qin Yuan's attainments in this area were much stronger than theirs, but that Qin Yuan could keenly perceive the mysteries within. Moreover, through his keen insight, he could infer other things from one instance, and he could always pay attention to the points that others easily overlooked.

Pa, pa, pa...

At this moment, Li Rong suddenly stood up and clapped, his face full of admiration.

Seeing this, everyone stood up and applauded Qin Yuan's excellence to express their admiration!

"In the future, it will be the world of you young people. It seems that old bones like us have to go back and enjoy our retirement!"

Li Rong teased.

"How is that possible? I'm just a junior. How can I be compared to the seniors in the research lab?"

"I just managed to improve it by accident. In the future, I'll still have to rely on the experts to help me test the weapons I improve."

Qin Yuan did not dare to take credit for himself. He followed Li Rong's words and found a way out.

Li Rong continued, "We've been in the field of weapon research and development for decades. Naturally, we know the difficulties involved."

"If you don't have a very deep foundation, it's absolutely impossible for you to modify two rifles to such an excellent level in just a few months."

"After an all-nighter test yesterday, there are no problems with your improved Pole 10. In time, it can be put into production and used in combat troops!"

"What's even more surprising is that the manufacturing cost after your improvement can actually be reduced by three levels from the original foundation. It's simply unbelievable."

The more Li Rong spoke, the more excited he became.

"I'll get them to prepare the materials tomorrow. Once they're ready, send them to the headquarters immediately."

"Yes! It's settled then!"

"Director Li, this? Isn't it considered complete if you pass the test? Why do you still have to organize the materials and send them to the headquarters?" Qin Yuan asked Li Rong in confusion.

"That's the right question. Let me tell you why!"

"Your innovation this time meets the patent application standards. If the headquarters successfully passes it, not only will you be able to make a contribution, but you will receive a considerable bonus."

"Bonus? I don't care about this bit of money. I just want to contribute more to my country. That's what I want most." Qin Yuan said disdainfully.

Hearing Qin Yuan's words, the surrounding air instantly froze. That patent fee was worth tens of millions. It was not a small sum of money.

Qin Yuan's nonchalance shocked them.

However, his family did not lack this bit of money. What he cared more about was whether he could contribute more to the military industry of his country.

"Director Li, I think we can talk about reporting to the headquarters later. This is because the current stage has only completed a portion of the improvements."

"I think we can add some improved synthetic materials on top of this foundation. The power will be even stronger."

As Qin Yuan spoke, he immediately showed everyone the computer interface.

“Please take a look, everyone. These are the plans I’ve made before I came here. If it’s feasible, not only can the performance of this gun be improved, but its lifespan can be extended.”

“I have a special bullet plan here, but my laboratory in Battle Wolf Base is limited. I can’t get many materials, let alone the production conditions. Your base has the conditions, so it shouldn’t be too much of a problem to develop it.”

“The specific plan is in this document. I think we can give it a try. If it succeeds, the performance will increase by at least 5%.”

Heavens! It was already as difficult as ascending to the heavens to increase another percent in performance yet Qin Yuan wanted to increase another five percent.

This meant...

The overall performance of the Type 10 sniper rifle had increased by 10%.

The Type 10 Sniper Rifle was already a world-class large-caliber sniper rifle. If its performance was improved by so much, wouldn’t it be at the peak of the world?

It was as if he wanted to directly suppress Barrette.

If it really succeeded, then the Chinese army would have the world’s top sniper rifles.

“Hurry up! Immediately simulate Comrade Qin Yuan’s plan. If the simulation is successful, immediately start the research and production. There’s no time to lose!” Li Rong immediately ordered the experts.

“Yes, sir!”

The experts carefully sorted out the information, afraid that they would miss out on any key information.

At this moment, everyone had unconditional trust in Qin Yuan because he had successfully improved two sniper rifles.

Everyone who participated in the research of this improvement plan became extremely expectant. If they could succeed, everyone in the research institute would receive the corresponding glory reward.

Moreover, this would allow their research institute to become famous among all the light weapons research institutes in China.

Even if this improvement plan wasn’t proposed by any of them, this gun was a brand -new product from the laboratory.

“Thank you for your hard work. If you have any questions that you need to discuss with me, feel free to come to the training ground to find me. I’ll definitely cooperate with everyone’s research work.”

Qin Yuan said sincerely to everyone. "If there's nothing else, I'll go to the training ground to train first."

As he spoke, Qin Yuan slowly stood up and prepared to leave the laboratory.

"Good! We'll inform you immediately if there's any news!" Li Rong replied to Qin Yuan excitedly.

"Right! Director Li, I have a presumptuous request."

Qin Yuan suddenly called out to Li Rong.

"It's fine. Tell me, is there anything I can help you with?"

"Director Li, can you help me get a set of equipment? It's convenient for me to carry weights. Otherwise, it's not convenient for me to train."

"Alright! No problem!"

"I'll get someone to record your request later and immediately customize it according to your request!" Li Rong readily agreed..

Chapter 513 - 513: Unexpected Experimental Results

The research institute was a military factory. Many of the weapons and equipment of the special forces were produced here. It was naturally not difficult for them to customize special equipment for Qin Yuan. It was a small matter for Li Rong.

"Then I'll have to trouble you, Director Li!" Qin Yuan replied politely.

After exchanging pleasantries for a while, Qin Yuan left.

Just as Qin Yuan was doing his physical training seriously, he got someone to get a lot of training facilities on the field.

It had to be said that Li Rong really attached great importance to Qin Yuan. It could be seen from his efficiency.

Qin Yuan checked the equipment carefully. It was indeed exactly the same as the equipment in Battle Wolf Base. Some of them were even more high-end.

After a simple warm-up, Qin Yuan began to train crazily, trying to squeeze out every bit of strength in his body.

It had to be said that in terms of training subjects, Qin Yuan was not only ruthless to his team members, but he was even more ruthless to himself!

Other than Qin Yuan himself, no one knew better than him how terrifying his body would be after breaking through the limit.

It was because of Qin Yuan's strict training mode that the powerful Battle Wolf Special Forces were created.

Just like that, for the next week, Qin Yuan did not go to the laboratory. He insisted on carrying weights on the training ground every day.

Li Rong and the others did not look for Qin Yuan during this period of time. They must have been studying and adjusting to Qin Yuan's improvement plan.

During this period of time, Qin Yuan had been torturing his physical fitness in different ways every day, crazily breaking through his limits.

It was not until the sixth day that Li Rong and the others rushed to the training ground. They were so excited that they ran and shouted.

"Comrade Qin Yuan! Good news! Great news!"

"We succeeded!"

"I finally succeeded!"

Lin Haidao ran at the front, and the others were so excited that they were incoherent.

Qin Yuan stopped when he heard that. He turned around and calmly took off his equipment. This result was actually within his expectations.

Therefore, when he learned that the modification was successful, he did not show too much surprise. It was as if everything was under control.

What surprised Qin Yuan was that the original improvement plan only took three days, but these experts actually took a whole week to complete the improvement.

Qin Yuan looked at the people who were panting and said calmly, "Let me see me gun."

"Here!"

Lin Haidao was panting heavily as he handed the improved Type 10 sniper rifle to Qin Yuan with an expectant look.

"Qin Yuan, we've tested it many times!"

Li Rong, who arrived a step later than them, began to speak excitedly.

"We followed the plan you gave us and improved it. The result was an 8% increase in overall performance and a 20% increase in lifespan!"

"The most commendable thing is that the production cost is actually reduced by 40% compared to before the improvement!"

"This part of the data is slightly higher than the expected data you gave previously."

"But from the data, it's indeed higher than my expected report, but it's much lower than my psychological expectations." Qin Yuan pursed his lips and said indifferently.

It seemed that Qin Yuan was not very satisfied with the results of this improvement, but to the experts, this was already a historic breakthrough.

“This result isn’t above the 10% you mentioned, but it’s an 8% increase. This is already very perfect.”

“Do you know how many years it took for us to complete the improvement in order to increase the comprehensive data of a sniper rifle by 3 percent?”

Qin Yuan, who was not satisfied with the data, made Lin Haidao feel angry.

They had worked hard for a few years to get a little improvement, but Qin Yuan could achieve a qualitative leap in a short period of time on his own.

“Actually, what I want to say is that our improvement this time should have a better performance.” Qin Yuan replied calmly in the face of Lin Haidao’s anger.

“Although everyone has worked very hard for such a long time to improve and research, I still feel that everyone’s strength has not been fully displayed.”

Then, Qin Yuan squatted down and successfully disassembled the gun. The parts of various sizes were neatly placed on the ground.

Qin Yuan’s smooth operation instantly convinced the experts present. This dismantling speed was too fast. No matter how familiar he was, he could not do it so quickly.

Experts like them had been dealing with these guns and parts all their lives. Dismantling all kinds of guns was their specialty.

Their dismantling speed was not inferior to any special forces soldier, and they were even stronger than them.

However, compared to Qin Yuan today, he was simply faster and more accurate than any of them. He was so amazing!

“As I expected, there really is a problem!”

Qin Yuan said silently, “There was a problem with the material synthesis process. Although it wasn’t a big problem, it was because of this small difference that the final result was lower than my expectations.”

“If you follow the production steps I provided, there shouldn’t be any problems.”

Qin Yuan continued, “There’s a problem with the special material on the outer layer. It should be because it didn’t dissolve sufficiently, which caused the rifling to be severely damaged. This directly affects the shortening of its service life.”

Qin Yuan’s sharp diagnosis shocked everyone again. They couldn’t even look at the young man in front of them who was two times younger than them..

Chapter 514 - 514: Unexpected Experiment Results (2)

It had only been less than a minute, but he could accurately determine that it was a problem with the synthesis of materials.

It was amazing. He had not even seen the production process, but he could still describe it so accurately.

At this moment, everyone was anxious!

“But...We have been strictly following your steps to make improvements step by step!”

Li Rong asked Qin Yuan in confusion, “There’s no reason for it to be wrong?”

“If that’s the case, then it’s not a problem with your personnel. It might be an error in the equipment.”

Qin Yuan analyzed as he ruled out the possibilities. “I’ll go with you to understand the equipment for material synthesis and decomposition.”

“Alright! Please follow me!”

Li Rong agreed to Qin Yuan without hesitation.

Qin Yuan followed Li Rong to the laboratory very quickly. The laboratory was filled with excellent production equipment, and almost all of them were 80% new.

Li Rong brought Qin Yuan to a two-meter-tall steel equipment and stopped.

“The problematic part is this machine, right?”

Qin Yuan asked Li Rong.

“Yes, this equipment was only sent here last year. It’s the latest generation of products!”

“Do you know how many materials are dissolved in our laboratory every day? Every data is crucial. So far, there have been no problems.”

Li Rong said confidently.

Qin Yuan carefully checked the equipment inside and outside and continued, “Send the outer layer of materials over to dissolve. I want to personally observe the entire process.”

“Good!”

Li Rong immediately sent someone to prepare. Soon, the new shell special material was sent over and the melting process began according to the procedure.

The equipment was activated, and the materials began to melt in the melting furnace.

Throughout the entire process, Qin Yuan had been using the radar to scan the situation inside. His colleagues were carefully listening to the sound of the gears running.

“Stop!”

Qin Yuan suddenly shouted.

The technicians operating the equipment immediately pressed the pause button. The experts were stunned. They did not know what had happened and looked at Qin Yuan in confusion.

“It’s indeed a problem with the equipment.” Qin Yuan said seriously.

“According to the data displayed by the equipment just now, it should take 2 minutes and 20 seconds to complete the dissolution. However, look at this time and the percentage of dissolution. It’s obviously 0.12 seconds slower than the specified time.”

“Of course, this isn’t just a problem caused by the equipment alone. There’s a small part in the equipment that has worn out and created a gap. This is the main reason for the error.”

“Although the data displayed on your display panel is correct, it’s not difficult to notice the slight time difference when the stopwatch is actually used.”

“Perhaps you will think that the lack of time is nothing, but if the parts are not fully melted in accordance with the stipulated time, the consequences will be quite serious.”

“Small problems can’t be effectively solved at the source. If they accumulate for a long time, they will make a big mistake.”

Listening to a single word was better than reading ten years of books. After listening to Qin Yuan’s statement on the problem, the experts naturally understood the severity of it.

They were all professionals in the field of technology, so they naturally knew the serious consequences of a mistake in the data.

However, they did not expect Qin Yuan to know the situation inside just by listening for a short while.

How was this done?

“Arrange for the relevant technicians to come over and check immediately!” Li Rong immediately ordered.

At this moment, Qin Yuan was an authority in their eyes, even more so than an authority. Every word he said carried weight in everyone’s eyes.

It was out of trust in Qin Yuan from the bottom of their hearts. Although they had not been in contact with him for long, Qin Yuan gave them the feeling that he was trustworthy.

The technicians in charge of detecting the faults were soon in place.

Under Qin Yuan’s guidance, the technicians quickly found the parts that were worn out. After a long inspection, they only reported to Li Rong after confirming the malfunction.

“Director Li, this part is indeed worn, but it’s not a big problem.”

“There is only a slight deviation. Did you encounter any problems because of this?”

The technician said to Li Rong in surprise.

The technician in charge of the maintenance naturally did not understand the serious consequences of such minor wear and tear. In his eyes, this small problem was naturally not a big deal.

At this time, when the experts heard the test results of the technicians, their admiration for Qin Yuan increased again. At this moment, they could not wait to immediately apotheosize Qin Yuan on the spot.

“Are there any spare parts?” Qin Yuan completely ignored the surprised experts at the side and asked the technician about the stock of spare parts. “Yes! We have all the spare parts in reserve for emergencies.” “Then go get one and change it immediately.”

The technician nodded and immediately went back to get the parts.

Qin Yuan turned around and looked at Li Rong. “Start production from scratch and see how many problems there are in the final result.”

Li Rong took a deep breath and immediately got the others to get ready.

The technicians quickly retrieved the parts and successfully replaced the worn parts.

With their first production experience, they only took less than a day to produce a brand new Type 10 sniper rifle.

Qin Yuan picked up the gun with both hands and checked it carefully before nodding in satisfaction.

“Yes! It is perfect! Hurry up and take it for testing!”

After a few hours of continuous testing, the final test results were out. The experts were so excited that they almost couldn't speak.

The data showed that the improved Type 10 sniper rifle had actually pulled the data to a new level, improving its excellent performance by a full 11%.

Not only that, even its lifespan had increased a lot compared to the previous improvement!

This time, everyone's long-cherished wish was finally fulfilled. Qin Yuan's pursuit of perfection and perfection had completely won over everyone in the research institute. At this moment, he was like an idol in the research institute.

In the next half a month, Qin Yuan basically trained in the morning, and in the afternoon and evening, he focused on continuing to carry out in-depth improvement research on the 10 moves with the experts.

During this period, even the CEO of the Huabei Group personally came to visit

Qin Yuan.

Their modification of the Type 10 had caused quite a commotion in the field of light weapons. The results of the improvements were outstanding in the industry.

There were many laboratory experts who came because of its fame, wanting to see the beauty of this improved Type 10.

Of course, the Type-10 sniper rifle had yet to be fully produced and used in various combat units. It had only passed their laboratory tests.

When it came to the actual production and application, it was inevitable that the headquarters would go through layers and layers of program review.

When the Chinese Academy of Sciences heard the news, they quickly sent people over to visit Qin Yuan to meet this young talent.

Fortunately, Qin Yuan was not greedy for such vanity. When he heard the news, he immediately asked Li Rong to help him avoid it.

Qin Yuan was not a fool. The purpose of these people's visit was to exchange and learn on the surface, but in fact, they wanted to take him for themselves and poach him back to seek more benefits.

To be able to increase the overall strength of the Type 10 sniper rifle by 11% with his own strength, there was definitely no other person in the entire China who could have such a god-like operation!

Qin Yuan's heart was as clear as a mirror. He did not want to be a tool who stayed in the laboratory all day long. He only wanted to serve his country, so it was right to hide as much as possible.

He had been away from Battle wolf Base for quite some time, and it was time to prepare to return.

Qin Yuan looked for Li Rong. "Director Li, the modification of the rifle is nearing completion. The rest of the work can be left to the experts to finish." "I've been out for so long. It's time to return to the base."

Li Rong saw that Qin Yuan had made up his mind to leave, so he could not force him to stay.

"Since you've already decided, I can't force you to stay. Remember to keep in touch if there's anything in the future."

"Also, the first batch of Type IOS has been produced. You can bring them back to Battle wolf."

"Then I'll thank Director Li on behalf of the base!" Qin Yuan smiled..

Chapter 515 - 515: Heading to the International Special Forces Competition

Li Rong knew that the higher-ups had given special permission to bring the modified Type 10 back to Battle Wolf Base.

"Qin Yuan, your improved technology is already in the process for a patent. If it passes successfully, it will be a patent reward of tens of millions!"

Li Rong and the other experts looked at Qin Yuan enviously. In their hearts, Qin Yuan deserved the patent.

Although this was Qin Yuan's personal patent, their laboratory had benefited a lot from it. For example, their current research funding had more than doubled.

Their salary and bonus had naturally advanced by a level.

Because Qin Yuan needed to carry a lot of weapons, considering the safety issue, Huabei Group specially allocated a small private plane to Qin Garden to send him directly back to Battle wolf Base.

As soon as Qin Yuan got off the plane, he saw Gao Shiwei, and the others welcoming him.

Gao Shiwei walked towards Qin Yuan with a smile on his face. You've done a great job this time!"

"I heard that you even applied for a patent for your improvement!"

"Chief, you're really well-informed. You didn't even wait for me to report to you personally, and you already know everything. You didn't leave me with any suspense at all!"

Qin Yuan responded to Chief Gao Shiwei with a smile. Suddenly, Gao Shiwei changed his mind and wiped away the smile on his face.

"Qin Yuan, although your contribution to the improvement this time is not small, you have achieved the goal of the improvement. I just wonder if you have any plans after you come back this time?"

That's right! Battle wolf had gone to participate in the special forces training, and the weapon modification was almost completed. There was nobody in the base, so there was nothing to deal with.

Qin Yuan thought for a moment and replied, "Chief, Captain Long has brought everyone to participate in the training. I wonder how their training is going."

"Now that you mention it, I really miss them a little. I miss the days when we trained together at the base and went on missions together!"

"If only I could participate in the competition with them. I could share honor and disgrace with everyone, advance and retreat together, and fight for honor together!"

Qin Yuan's tone was filled with regret. As he spoke, he stared at the empty training ground not far away.

Gao Shiwei, who was at the side, roughly understood Qin Yuan's thoughts. He nodded thoughtfully as he listened.

"Qin Yuan, do you really want to participate in the special forces competition?" Gao Shiwei asked Qin Yuan tentatively.

When Qin Yuan heard this, his eyes immediately lit up. He looked at Gao Shiwei expectantly.

"This... This training has already started for more than a month. Can I still participate?"

Qin Yuan, who was filled with anticipation and a little conflicted, expressed the doubts in his heart, "It would be best if you were a 'transfer student'."

Qin Yuan said in a probing tone, his eyes occasionally paying attention to the changes in Chief Gao Shiwei's expression.

At this moment, Gao Shiwei, who had been silent for a while, said, "How about this? I'll make a special application to the organization and allow you to participate in the special forces competition."

"Although there has never been a precedent of joining the training in the middle of the special forces competition. However, considering that you've improved a weapon and achieved good results, we can use this as an attachment to make a special application!"

"Wow! Chief, you've spoken my mind!" Qin Yuan said excitedly.

As soon as he heard that there was still a chance to participate in the special forces competition, Qin Yuan was instantly energized!

"I'll say it first! Although that's what I said, there's no precedent in the past. So this is dependent on the organizer!"

"Because of the special circumstances, the organizers have to consider all aspects. This special forces competition is international, and the participants are all elite troops from various countries!"

"In addition, there's still half a month before the end of the training. You haven't participated in the previous training at all. Even if the organizers agree to let you join, they're worried that you'll drag everyone down because of the progress. "

"This is what I'm most worried about. As your chief, I have to consider everything! "

Gao Shiwei said to Qin Yuan with a worried expression, but there was a hint of anticipation in his eyes.

"Chief, don't worry about this! Half a month is more than enough for me to familiarize myself with all the events of the training. "

"I definitely won't be a burden to Battle wolf!" Qin Yuan said confidently.

"Good!"

"Qin Yuan! I was waiting for you to say that. I like your confidence in daring to challenge!" Gao Shiwei said happily.

"Let's not talk too much. I'll go back and make a special application for you now! "

"Thank you for your kindness, Bureau Chief! I will definitely not disappoint you!" Qin Yuan looked grateful.

"Don't disappoint me! I reckon it'll take a lot of effort to apply this time!"

The two of them chatted and laughed along the way and unknowingly returned to the office. Gao Shiwei, started to work hard on Qin Yuan's participation in the special forces competition.

Qin Yuan's special system naturally would not hold Battle wolf back. It was just a month of training progress. With his strength and the system's assistance, it was simply a piece of cake.

Qin Yuan was not idle either. He still had some work to finish in the laboratory. Now that he was back, he could go to the laboratory to finish it and prepare for the special forces competition.

The waiting time was always very long. Just like that, another week passed uneventfully..

Chapter 516 - 516: Heading to the International Special Forces Competition

Finally, the heavens rewarded him! Qin Yuan had received good news!

The international organizer of the Special Forces Competition was very surprised and curious after receiving this special application. They even specially arranged for someone to come to China to do a background check on Qin Yuan.

During the investigation, they found out that Qin Yuan's various outstanding performances made them interested in this young man. This was especially true for the recent improvement of the Type 10 sniper rifle that shocked the entire military industry.

After collecting all kinds of background information about Qin Yuan and returning to the organizer, after a meeting and discussion, they finally decided to let this young special forces soldier with an outstanding resume enter the special forces competition.

Qin Yuan, who received the notification of the competition, was naturally overjoyed. At this moment, he did not want to delay for a moment and immediately packed up his things.

Qin Yuan quickly packed up everything he needed. He looked around the dormitory to see if he had missed anything.

After confirming that everything was packed, he immediately went to bid farewell to Chief Gao Shiwei.

"Chief! I've received a notice to participate!" Qin Yuan said excitedly.

"Moreover, the organizer said that I was exempted from training and directly participated in the competition. This is really unexpected!"

"Not bad! Qin Yuan. It seems that the organizers have not only set a precedent for you, but exempted you from training. '

Gao Shiwei was very surprised by this.

"This opportunity is hard to come by. Cherish it. Don't disappoint everyone!"

'Yes, sir! Chief! I will definitely lead Battle wolf back with honor!"

Qin Yuan immediately saluted in response.

After a simple farewell, Qin Yuan came to the base helipad. The helicopter sent by the organizer to pick Qin Yuan up was already waiting there.

Qin Yuan successfully took a helicopter and set off for C Nation, where the competition was held. As Qin Yuan was exempted from training and did not need to participate in the special forces training, he went directly to the venue to wait for the main team.

After a few hours of long-distance flight, they finally arrived at the rich and developed C Nation. Qin Yuan moved into the dormitory of the competition base according to the arrangement.

After settling down, an officer with blonde hair, blue eyes, and white skin appeared in Qin Yuan's dormitory.

"Hello! Comrade Qin Yuan! I'm the officer in charge of receiving you, Leo!" Major Leo introduced himself to Qin Yuan.

"Hello, Major Leo! Nice to meet you!" Qin Yuan replied with a military salute.

"I've heard that there's a very powerful major in China. Not only is he good at leading troops, but he has a very powerful weapon modification skill!"

"Do you know that the case of you modifying the Type 10 sniper rifle has spread all over?"

Major Leo was like a fan meeting his idol. He started talking and said to Qin Yuan.

Qin Yuan was stunned by this sudden enthusiasm. He did not know that the news of him improving the weapon had spread throughout C Nation's army.

"I knew you were coming to participate in the competition this time, so I specially applied to my superiors to be your guide. From now on, during the period of the competition, I will accompany you to familiarize yourself with the environment here, including the training content. '

"Thank you for your trouble, Major Leo!"

Qin Yuan was a little at a loss in the face of this passionate fan. He felt flattered.

"Comrade Qin Yuan, don't stand on ceremony with me! When the competition begins, we will be the strongest opponents on the field. '

"But you're still my idol off the field. I want to improve my weapons and equipment like you one day. That would be so cool!"

After saying that, Major Leo took out a copy of the training content and process plan for the special forces competition and gave it to Qin Yuan.

"Comrade Qin Yuan, this is the content of our training. You should familiarize yourself with it as soon as possible. Also, you have to master at least three different languages." Major Leo told Qin Yuan the key points in detail.

After half an hour of introduction and communication, Qin Yuan had already grasped the entire framework of their training. Now, it was time to familiarize himself with them one by one.

At this moment, the nutrition specialist at the competition base found Qin Yuan to customize the competition meal recipe for him.

The nutritionist would make different meals according to the physical parameters of each participating team member, so that the participating team members could always maintain the best physical condition to deal with the competition!

After all, this special forces competition was a long and drawn-out battle. It had very high requirements for endurance and physical fitness.

After chatting with the nutritionist, they sent him off and went to the training ground at the base.

Leo introduced the training ground to Qin Yuan and said that he could enter and exit the training ground freely during the competition. He could simulate various training scenarios to familiarize himself with the competition subjects.

The training subjects were naturally not difficult for Qin Yuan at all. One had to know that Qin Yuan's various skill indicators were invincible.

The most important thing now was language communication and translation. If he could resolve the language barrier, he would have the upperhand in this international competition.

The annual International Special Forces Competition held in C Nation this time was the most important competition among the military competitions.

Every year, seven different countries would be selected to participate in the competition, and the most powerful elite special forces in the country would be invited to participate in this competition.

Therefore, in terms of language, Qin Yuan had to master at least six languages to facilitate daily communication. As for text translation, he had to master three languages.

This was because all the materials given in this kind of international competition were written in the common language of foreign countries, and almost no Chinese language was used. Therefore, the language requirement had to be at the proficient level.

If there was a language barrier and translation was difficult, no matter how strong one's combat ability was, it would be difficult to master the rules in the game and perform better.

There were still five days until the opening of the competition. It was a huge test for Qin Yuan to be familiar with many languages in such a short period of time.

Of course, it was an impossible task for others, but this was Qin Yuan! Qin Yuan, who had all his skills filled up.

There was really no skill that Qin Yuan could not learn.

"Qin Yuan, it's really a big test for you to master so many skills in just a week.

This is simply an impossible mission for us."

"Good luck!"

Leo said and handed Qin Yuan a tablet. It contained the complete language learning system of each country and the assessment content of all the subjects of the training.

Qin Yuan's next step was the study assessment. Passing the system assessment meant that he had completely mastered all the contents of the training for the special forces competition.

For the other special forces members, they had to pass the assessment with full marks in order to qualify for the competition.

However, Qin Yuan was a specially approved participant. He only needed to familiarize himself with the content and could participate without the assessment.

"Thank you, Major Leo! I'll definitely make you all look at me in a new light." Qin Yuan did not show any weakness in response to his doubts.

"Alright! I look forward to your learning results!" Leo encouraged Qin Yuan.

With that, the two of them said goodbye and returned to their dormitories.

In view of the time, Qin Yuan quickly familiarize himself with the database on the tablet. The amount of information inside was too large. It was absolutely impossible to complete the system assessment in five days with just his memory.

Qin Yuan quickly returned to the dormitory. He woke up the system and activated the super powerful language learning ability, as well as the ability to expand his brain capacity and memory.

After the perfect integration of these powers and his body. At this moment, no matter what content Qin Yuan read, not only could he read ten lines at a glance, but he could firmly imprint the content in his mind like a copying machine.

Therefore, other than eating and sleeping, Qin Yuan spent the rest of his time either training on the training ground or learning the languages of various countries.

For the past few days, Qin Yuan was like a beast with a full spring. He was crazy on the training ground, training and learning crazily. Under the premise of the system's strong power, he only needed to sleep for two hours a day to maintain his energy to adapt to the high-intensity learning every day.

Five days passed quickly. Leo found Qin Yuan early in the morning to assess him.

In the end, he scored full marks in all the subjects! Oh my god! This shocked Leo so much that his jaw dropped!

It was understandable for him to get full marks for combat skills, but he could get full marks for speaking six languages and translating three languages.

What kind of perverted study maniac was this! What kind of ceiling opponent was this! Leo was instantly impressed..

Chapter 517 - 517: Special Forces Competition Rules

Just as Leo was shocked by Qin Yuan's various assessment indicators, a shout came from not far away.

“Captain! ”

“Captain!”

After Qin Yuan heard the familiar shout, he turned around and looked in the direction of the sound. It turned out to be Geng Hu and the others.

When the Battle wolf members heard that Qin Yuan was participating in the competition, they rushed to C Nation’s stadium after the training ended.

Qin Yuan realized that it was a team member he had not seen for a long time. A smile appeared on his originally serious and tense face.

“Captain! I really didn’t expect you to really come and participate in the special forces competition with us!”

Geng Hu said excitedly.

“This is an international special forces competition. It’s all about the elites of the various countries. I don’t want to miss such a rare opportunity!”

“Isn’t this! I’m here! Fight side by side with everyone and create glory together! ”

“Good!”

“We will advance and retreat together with honor and disgrace, and fight for the honor of our motherland!”

Zhou Qing’s gaze was firm as he echoed Qin Yuan’s aura.

At this moment, the person in charge of the competition walked over and communicated with Qin Yuan fluently in a foreign language. Then, he said to his teammates, “Let’s follow the main team to the resting area that has been arranged. There should be two more teams left before everyone is here.”

“Yes, sir!”

Qin Yuan and the others followed the person in charge and drove to a 20 -storey dormitory building that the base had prepared in advance. This would be the dormitory where they would rest for the special forces competition.

“Everyone, rest well today! The opening ceremony will be held tomorrow morning. After the opening ceremony, everyone will prepare well for the day after tomorrow. The competition will begin the day after tomorrow!”

Zhou Qing looked at the empty environment, his mind filled with confusion.

“Captain, it’s such a big building. Don’t tell me we’re the only ones living there?” Zhou Qing asked in confusion.

“That’s right! The organizing committee of the competition requires that the members of each member country have an independent building to rest in.

Each building will have a complete set of living facilities.”

“We are independent and do not interfere with each other. Moreover, there will be nutritionists who will be responsible for our daily diet according to the differences in diet and your physical fitness in each country.”

Qin Yuan clearly and carefully responded to Zhou Qing’s doubts.

When everyone heard this, they opened their mouths and exclaimed. The living standards of these participating team members were really high.

The reason why the organizing committee had to make such detailed arrangements for their daily lives and meals was mainly to allow the participating players to quickly adapt to the environment and maintain their physical and mental state during the competition.

“The organizing committee is too humane. It’s too awesome!” Geng Hu was very happy.

“All of you, wake up! Are you going to be captured just because of this?”

“Don’t forget that you’re not here for a vacation.”

Qin Yuan looked at their intoxicated expressions and immediately sternly reminded them of the purpose of their trip.

Looking at the person in charge of the competition who was gradually walking away from their sight, Qin Yuan lowered his voice and continued to speak to them.

“This seemingly perfect and thoughtful living arrangement, on the one hand, is for everyone to have a good state of mind for the competition, and on the other hand, it is to numb you through some subtle details.”

“It’ll slowly wear down your fighting spirit in a comfortable living environment!” Qin Yuan said meaningfully.

It made sense to everyone. C Nation was the main organizer of this year’s event, and it was internationally renowned. Therefore, they naturally wanted to gain face.

“This is our first time participating in such a large-scale international special forces competition. No matter what, we must do our best.”

“Just treat every match as a real battle. This is a good opportunity to prove your strength.”

Qin Yuan encouraged the Battle wolf members. He seemed to be worried that they would be too nervous and affect their actual performance. “In short, let’s fight together for the honor of our country!”

“Battle wolf will win!”

Everyone shouted in unison.

“Alright! Everyone, go and have a good rest.”

‘Yes...’

The next day, Qin Yuan brought everyone to the opening ceremony of the base. It was arranged in an open stadium.

The bustling field was filled with tall and mighty foreign soldiers, making people feel an unconscious sense of oppression. From afar, they looked like moving human walls.

Qin Yuan and the others were a little petite in their eyes. Although they were not as tall as the foreign soldiers, and their muscles were not as developed as theirs, their refined bodies were very flexible and very suitable for fighting in the wild.

On the contrary, although the foreign soldiers were tall, powerful, and muscular, they were naturally not as agile as Qin Yuan and the others when they moved.

After the leaders of C Nation gave their opening speech, the annual International Special Forces Competition gradually began.

The representatives of the various countries went on stage to take the oath, inspiring people to announce their determination to win this time.

A few foreign leaders took the opportunity to speak about the Chinese soldiers.

However, Qin Yuan took it to heart and did not lower himself to the level of these foreign leaders who liked to talk too much.

After all, the main venue of this competition wasn't on this stage, but on the entire competition field. One would know if it was a mule or a horse, and it wasn't just a few words that could represent how powerful one's ability was..

Chapter 518 - 518: Rules of the Special Forces Competition

Zhou Qing couldn't stand it anymore. “Captain! These foreign soldiers are clearly looking down on us!”

“It's too infuriating!”

“Shut up!” Qin Yuan said to Zhou Qing in a low voice.

“Control your emotions. This is the opening ceremony. If you have anything to say, hold it in until the dormitory.”

That's right! At this moment, their every word and action represented the image of the Chinese soldiers. If they were to lose their manners in public, they would become a laughing stock.

“We represent the image of our country. We have to act like a big country. How can a few words provoke you like this?”

After listening to Qin Yuan's analysis, Zhou Qing immediately realized the seriousness of the matter. He quickly restrained his emotions to prevent himself from losing control of his emotions.

“So what if they really look down on me? The real arena here is not this three-foot stage, and it is not just a matter of talking.”

“If you want to be the best, you have to defeat all of them in the competition and become the best. This is much more useful than talking!”

Every word Qin Yuan said to Zhou Qing was reasonable, and every word hit the nail on the head. Zhou Qing nodded in understanding.

The next morning, Qin Yuan and the others got up early to make all the preparations. After having breakfast together, they followed the other participating teams and left the base in an orderly manner. They arrived at the venue of today’s competition, the primeval forest.

C Nation’s military had already sent people to cordon off the competition venue to ensure that the security work inside was flawless. They strictly controlled the environment of the venue to prevent external interference and damage.

The teams from the seven countries got off the bus and lined up to wait for the organizers to announce the rules of the competition.

There were a total of 10 subjects in the competition this time. The participants had to complete a battle of strength and endurance within the specified time. In order to make the content of the competition more exciting, the organizers arranged the competition environment according to the actual combat environment. It tested everyone’s physical fitness, adaptability, willpower, and flexible use of combat skills in the jungle.

The environment of the primeval forest competition was extremely harsh. The special forces participating in the competition had to fight day and night, and allocate their time well to complete all the subjects required by the competition and achieve good results.

Although the special forces soldiers who came to participate in this competition were all experienced, under the strict requirements of the competition, it was still a competition that could not be underestimated.

The first event was the 8000-meter skydiving. In this vast virgin forest, there were flags marked in different directions, and the corresponding national flags were the landing targets of the special forces of each country.

Then, the participants would continue to randomly receive combat missions in the forest and complete them. Because the landing points of different countries were different, there would be differences in the adjacent test subjects. It was not easy to meet with other countries in this forest.

The last event was the 100 -meter extreme parachute. After completing the other nine subjects, this was the final event. The participants had to rush to the designated location after completing all the previous projects and board the plane to parachute.

After each team member made the last low-altitude jump, it meant that the team had completed all the competition subjects.

It was obvious that this was a race against time and stamina.

When their first event started, C Nation’s army would surround them and fire at them from all directions to disrupt them. Due to the fact that blank bullets could still be lethal at short distances,

the competition was not a real battle. For safety reasons, special electronic guns were used in this competition.

If smoke comes out of the top of the participant's head, it means that the participant has died and the match is terminated.

When the participants successfully escaped the encirclement and successfully reached the next competition subject, they would still be harassed by the C Nation's military.

All the participating teams' guns, sniper rifles, and rifles were provided by C Nation. They were all high-standard acting equipment. The interference personnel sent by C Nation could be counter-killed by the participants to clear the obstacles for the smooth progress of the competition.

All in all, as long as a participant could successfully complete all the subjects, his combat strength in the jungle would definitely be first-class in the future.

This time, C Nation had put in a lot of effort. They had arranged tens of thousands of soldiers in the jungle to interfere with the competition. In this 50 square kilometer primeval forest, even if they did not chase after them, there would be interference everywhere.

“It seemed that the competition environment this time is really dangerous.”

Qin Yuan and the others carefully checked the weapons and equipment provided by the organizers and found that most of them were more practical. They met the requirements of the combat weapons in the actual combat environment.

For example, a military dagger, a compass, a simple jungle map (mainly marking the location of the competition), a parachute, and a gun.

The M5 rifle was an assault rifle produced by Bohr Company in Country B. It was a lightweight and miniaturized variant of the M15A3 assault rifle.

The M5 still used the M15's gas direct-thrust transmission method, using magazines that could be used with the M15. The two rifles used the same standard bullets.

The M30 sniper rifle was jointly developed by C Nation's army and navy. It was mainly used by the special forces of the army and the Navy Seal Assault Unit.

The M30 and the Sniper 85 were similar in terms of performance and shooting range. After a round of selection, all the participants successfully boarded the plane with their assigned weapons.

With the deafening roar of the plane's engine, the plane gradually rose to an altitude of 8000 meters.

“Attention, all participating teams. The current altitude has reached 8000 meters. All team members get ready to parachute at any time.”

The captain was broadcasting the altitude in real-time, reminding the participants to be ready to jump at any time.

The cabin door at the back of the plane was quickly opened by the accompanying C Nation soldiers. They immediately called for everyone to parachute in an orderly manner.

“Let's go!” Qin Yuan shouted at the Battle wolf members and immediately stood up to line up and walk to the hatch.

Everyone jumped up one after another. The participants who were at random heights were like eagles soaring in the blue sky.

After breaking through the clouds in the sky, Qin Yuan and the others gradually approached the ground. The lighthouse in the depths of the primeval forest lit up with a dazzling red light. That was the parachute landing point.

Everyone adjusted their direction with a clear goal. When they reached a certain distance, they opened their parachutes one after another.

Whoosh..

The opening of the parachute brought about a huge recoil, slowing down the speed of the participants who were falling rapidly in the air.

Everyone immediately adjusted the direction of the parachute accordingly and slowly landed on their respective landing points.

On the other side, Qin Yuan was not in a hurry to open the parachute like the other participants. Instead, he was on the intercom. "Let's not open the parachutes. This altitude is not suitable." "We must be the first group to land successfully."

"Roger!"

Qin Yuan said as he rushed into the primeval forest at his fastest speed.

Not long after, Qin Yuan led everyone and quickly left the other teams behind. At that moment, Qin Yuan realized that he had reached a suitable altitude to open the parachute and quickly gave the order.

"Open the parachute!"

Whoosh whoosh whoosh...

The sound of parachutes opening was heard as everyone's parachutes opened and landed in the direction of the forest.

"I found our flag!" Zhou Qing was the first to discover the landing destination.

"Follow me!"

Qin Yuan shouted in the air.

At this moment, their conversation was transmitted to the base command center through the walkie-talkie.

All the team leaders were watching quietly. An LED display screen that occupied the entire wall switched the competition screens of the participating players from all over the world.

Long Xiaoyun stood calmly in the crowd, watching the game on the big screen slowly and calmly. She was not disturbed by the cheering of the team leaders of other countries.

Seeing that they were getting closer and closer to the national flag, Qin Yuan and the others had yet to determine the exact landing point. There were trees all around them. If they landed directly, they

would definitely dangle on the trees and cause the parachute to be damaged. They would not be able to participate in the final low-altitude parachute landing event.

At this critical moment, Qin Yuan could not care less and immediately ordered. "Everyone, land on the trees and drop your parachutes to the ground as fast as you can!"

"No mistakes!"

Chapter 519 - 519: Difficult and Dangerous Competition

"Yes, sir!"

After everyone heard the order, they began to adjust their direction without hesitation. They tried their best to choose a place with sparse branches and leaves to land decisively.

The moment Qin Yuan landed, he turned around to look at the approximate landing location of the participating teams from the other countries that were left far behind.

Because the map in their hands did not indicate the landing points of other countries

Whoosh...

Suddenly, Qin Yuan was caught by a tree branch. At this moment, he quickly turned around and hugged a larger tree branch at the side. Then, he used the momentum to quickly cut off the parachute with his dagger.

Qin Yuan quickly slid down the smooth tree trunk to the ground and successfully stood firm.

The others used the same method to successfully land. In a short while, all the members of Battle wolf successfully landed.

In the referee system, Battle wolf was ranked first! That's right! It was the result of skydiving.

This result shocked everyone in the judges' seats. They had never thought that Battle wolf would be so decisive at such a critical moment when weighing the pros and cons.

They actually chose to give up their parachutes in order to get first place.

Although he had gotten first place, the price he had to pay was heavy. This meant that they would not be able to complete the last low-altitude jump in the competition.

Just as everyone was wondering if Battle wolf and the others were committing suicide, only Long Xiaoyun understood Qin Yuan's intentions.

This match had just begun. In the end, it would depend on how Qin Yuan led the team to fight!

After confirming that Qin Yuan and the others had successfully landed, a loud voice echoed in the sky above the forest.

"The Chinese team has successfully landed! Interruption initiated!"

"The Chinese team has successfully landed! Interruption initiated!" "The Chinese team has successfully landed! Interruption initiated!"

The broadcast was actually in C Nation's language. Damn it! They actually didn't use the international language of Country Y. The organizers were obviously trying to make things difficult for them.

Fortunately, when Qin Yuan was studying at the base, he had used the system to record C Nation's language database. Qin Yuan immediately gathered everyone after hearing the announcement.

"They've already started moving! Everyone, come over quickly and discuss tactics!"

As he spoke, Qin Yuan unfolded the map, and the others surrounded him. Qin Yuan quickly drew a circle with his finger and confirmed their location with the others.

Qin Yuan pointed at the recent rock climbing subject and said, "Logically speaking, we should finish rock climbing first. However, according to our current situation, it's not recommended to go rock climbing first!"

"Why? Since we're already here, we should hurry up and finish the subject." Geng Hu looked at the map and asked Qin Yuan with a puzzled expression.

"Right now, we have to solve the problem of the parachute first! Otherwise, no matter how good our previous results are, if we can't complete the low-altitude jump in the end, it will be equivalent to wasting our efforts!"

Qin Yuan replied to Geng Hu thoughtfully. If he was not wrong, the landing conditions of other countries must be better than theirs! It was unlikely that the parachute was damaged.

In other words, the organizers had never wanted Battle wolf to win. They only wanted China to accompany them.

How could Qin Yuan, who had seen through everything, tolerate this? At this moment, Qin Yuan's heart was already burning with fighting spirit.

"Follow me!"

Qin Yuan did not continue to explain. He quickly stuffed the map into his clothes and immediately led them in the direction where they had seen Country Y before they landed.

"Quickly follow!"

Everyone quickened their pace. Soon, Qin Yuan led the team into the forest.

Around the route from the five-star flag to the rock climbing assessment point, 200 traps had been set up as the key to their clearing.

After receiving the news from the command center that Battle wolf had successfully landed, they immediately raised their vigilance and quietly waited for the appearance of their "prey".

However, what made them feel funny was that they had not seen Qin Yuan and the others even after almost an hour.

At this moment, there was the sound of someone walking over from the forest. They thought that Qin Yuan and the others had finally appeared. Just as they were about to shoot, they realized that it was actually their own people!

They were really good. They had ambushed and interfered, but in the end, their own people came.

After some discussion, they found out that they were an ambush team from another team. They had waited for a long time before coming over to find Battle wolf.

In the end, there wasn't even an extra person on the way. As they walked, they accidentally entered the encirclement of another subject.

After chatting for a while, the conclusion was that Battle wolf did not follow the route set by the organizers to complete the competition.

However, they didn't pay much attention to it. No matter which competition they went to first, there would be a large number of C Nation troops waiting for them.

After Qin Yuan's careful judgment, the closest place to their landing point was Country Y.

This was because Country Y had won first place in the International Special Forces Competition every year. Country Y's special forces were a force to be reckoned with.

This time, the organizers had arranged for Country Y's landing point to be near Battle wolf, undoubtedly to create more pressure and obstacles for them.

This time, the team members they sent out were the elites of the Dark Team.

At this moment, the members of Country Y landed smoothly and orderly. They were in second place in parachuting. The fact that Battle wolf had snatched first place did not seem to affect them..

Chapter 520 - 520: The Difficult and Dangerous Competition (2)

After all, the focus of this competition was not parachuting, so they did not need to take risks. They just wanted to clear the obstacles one by one and obtain results.

Just as they were about to pack their parachutes, Qin Yuan and the others suddenly darted out of the forest. They took advantage of the moment when they closed their parachutes and let down their guard to attack from behind. They knocked out a few of them at once, and the remaining three nimbly dodged.

"Let's end this quickly! Get the parachute and retreat immediately."

Qin Yuan quickly ordered.

"Yes, sir!"

The rest of the team skillfully removed the parachutes from the unconscious members of the UK team and immediately rushed to support Zhou Qing.

At this moment, Zhou Qing was chasing after the three members of the UK team who had luckily escaped. Now that reinforcements had arrived, Zhou Qing's original one-on-three had become a five-on-three.

In the blink of an eye, Qin Yuan and the others worked with Zhou Qing to quickly tie up the three of them and even gagged their mouths. Qin Yuan quickly removed the parachute from their bodies and left with everyone.

“What if no one finds them?”

“Don’t worry, I’ll untie them in less than half an hour when they wake up.”

Qin Yuan replied to Zhou Qing cheerfully, looking satisfied. He brought his team members to the nearest competition venue.

The organizers had naturally seen what happened to the members of Country Y. However, since Qin Yuan and the others did not do anything out of line, it was not appropriate to directly use the rules of the competition to restrict them.

After all, the rules of the competition did not clearly state that one could not snatch the opponent’s items. It only stipulated that vicious acts of violence such as fighting could not occur during the competition.

Not long after, the rankings of the various participating teams changed again. Country Y, which was originally ranked second, fell to the bottom because of Qin Yuan’s actions.

As the contestants from all over the world landed, everyone rushed to the nearest location. The referees stared intently at the performances of the participating teams on the big screen.

Qin Yuan led everyone to the nearest competition obstacle, the 500-meter obstacle course.

This obstacle had always been C Nation’s strength. The best record in history was 5 minutes and 2 seconds.

In this event, C Nation had never lost before. They had won first place every year without any accidents.

This obstacle course wasn’t just about jumping over obstacles. In addition to jumping over obstacles, everyone had to carry a 200-pound log on their shoulders.

Furthermore, the logs could not fall to the ground during the process. Otherwise, the results would be invalid.

This obstacle mainly tested the cohesiveness and tacit understanding of the participating team members. It tested the limits of each person’s physical fitness.

This time, Qin Yuan led the Battle wolf team to break the competition record for the first time!

3 minutes and 1 seconds!

The Chinese Battle wolf Special Forces, which had never been taken seriously by the other participating teams, had easily broken C Nation’s long-standing record during their first time participating in the Special Forces Competition.

It was awesome! This was the first shot of the competition. I don’t think there will be any other team leaders looking down on our Battle wolf’s strength.

3 minutes and 1 seconds! This result was like a devil in the eyes of the referee. Everyone in front of the big screen exclaimed in disbelief!

“Is this Battle wolf a demon?”

“This result is too shocking!”

At this time, the leaders of the participating teams all looked at Long Xiaoyun with admiration, and Long Xiaoyun only responded with a calm smile.

Qin Yuan and the others not only broke the record in this obstacle competition, but they won their dignity among all the participating teams with their strength.

+20 points!

That's right! The individual competition this time was indeed an additional 20 points. Although the first place in this obstacle was awarded 10 points, there was a special rule that if one broke the historical record, they could get an additional 10 points.

Therefore, with just two obstacles, Battle wolf successfully secured first place and was far ahead of all the participating teams.

Even if someone wanted to interfere, they would not be able to do anything in the face of such a terrible competition environment.

This was because anyone with a discerning eye could see that the difficulty of this competition had been added maliciously. For example, the landing location of the high-altitude parachute at the beginning was obviously deliberately arranged in the densest part of the jungle.

If Qin Yuan had not given the right command, his life would have been in danger if he had been slightly careless when landing.

This was the result they had achieved after overcoming many difficulties and obstacles. Others naturally had nothing to say.

After completing this competition obstacle, Qin Yuan quickly led everyone to the next competition obstacle.

It was the obstacle closest to their landing mark-rock climbing.

Of course, along the way, they suffered a lot of interference from the military forces arranged by the organizers. They almost succeeded in ambushing them several times.

Bang! Bang! Bang!

As Qin Yuan and the others had limited ammunition for their guns, they did not dare to counterattack easily. They only kept looking for cover to dodge and advance.

"Listen up, no matter who it is, as long as you get shot, hand over the ammunition immediately without hesitation!"

Qin Yuan instructed them sternly.

"Because we have limited ammunition in this competition, the role of ammunition is extremely precious. Therefore, after you are eliminated, you must not hesitate to give the ammunition to your own team members."

"Yes, sir!"

Because in such a harsh environment, the use of ammunition must have a reasonable plan. Otherwise, if they did not care about the consequences and messed around in the early stages, they would be finished when they needed to use ammunition later.

Therefore, most of the time, when they encountered a barrage of firepower, they could only dodge skillfully and could not fight these small fries head-on.

Coincidentally, Long Xiaoyun, who was in the command center, clearly noticed that the interference firepower of the other participating countries on the big screen was obviously smaller than what Battle wolf encountered.

Not only were the numbers less than what Qin Yuan and the others had encountered, but the firepower suppression was not as fierce as what Battle wolf had encountered.

Battle wolf was facing a fierce attack that was going to kill everyone! Naturally, Long Xiaoyun took all of this in silence and didn't want to express anything.

Because she knew that the organizers had done it on purpose. In addition, there were too many possibilities in the competition. It was impossible to know who the dark horse would be until the end.

Although it looked like a peaceful primitive forest from the outside, the competition in the forest was still in full swing.

Qin Yuan, who was well versed in the rules of the competition, led everyone around many areas that were heavily ambushed. Although the route had changed, there were still a small number of teams waiting for an ambush nearby.

At this moment, they had arrived at an ambush circle of about thirty to forty people. Qin Yuan immediately ordered, "Cover them with fire, tear open an opening, and charge through!"

"Yes, sir!"

Bang! Bang! Bang!

They found cover to shoot while thinking of ways to advance. In just a few minutes, the interference army was mostly eliminated.

When the remaining people saw this, they became even more furious and increased their firepower. Qin Yuan was not afraid of the strong firepower and hid in the dark.

If he saw anyone who dared to show up, he would immediately shoot with his sniper rifle and trigger the smoke device on their bodies.

Pulling the trigger, the opponent was successfully eliminated. Zhou Qing and the others were firing non-stop with their rifles. They coordinated with their teammates and hit every shot without wasting a single bullet.

When Qin Yuan and the others successfully passed through the ambush circle, the interfering soldiers began to stop their fierce attacks because the competition required them to only attack within the designated ambush circle.

As long as Qin Yuan and the others crossed the ambush circle, they could not continue to chase. Otherwise, it would be a foul.

The assistant in charge of the assessment in the forest led the way. Qin Yuan and the others quickly rushed to the bottom of the cliff. They threw their guns behind them and began to climb the cliff with their guns on their backs.

Bang! Bang! Bang!

In an instant, a series of gunshots came from the bottom of the cliff.

Truly insane! On one hand, he had to concentrate on climbing the rock, and on the other hand, he had to avoid the fierce fire under his feet.

If they were careless, they could easily fall off the cliff and die. It seemed that the organizers were really going overboard this time! “Pay attention to avoiding fire and concentrate on climbing!”

“Don’t let go!”

Qin Yuan said with all his might..
