

Star of Space 204

Chapter 204 What's there to be shy about?

In order to make the girl happy, the master of the palace actually asked him to be a gentleman at night!

"My subordinates will do it immediately."

"Exiled Wu, remember not to leave any place alone, otherwise, you will have to wait until the 3456th, 7890th batch of silkworms are frozen into ice lumps." Lin Caisang saw that Exiled Wu was about to leave, He immediately raised his voice to remind.

...

After getting off the carriage, Lin Caisang was sent back to his room by Ya Molian and a sack of ice silk cocoons.

With this sack of ice cocoons, the temperature in the room suddenly became colder, causing Lin Caisang to take off Yamolian's coat and all the sleepy bugs that were crawling all over his body disappeared.

Ya Molian looked around the room, and finally could only tuck her into the quilt.

"It's almost dawn, don't get up in the morning, this ice cocoon..."

He wanted to say that he would take the ice cocoon to his place first. Putting it here would not only chill her, but if Grandma Lin and the others found it, they would not be able to explain the origin of the ice cocoon.

Before he could finish speaking, Lin Caisang interrupted him, "Just leave it there and I'll study it further."

She was worried about where to put it. After Ya Molian left, she hurriedly entered Jinzhu to ask, could this ice silkworm be raised in Jinzhu space?

"Put the ice cocoon here, won't you get cold?"

"Why is it cold? How can a fat person like me be afraid of the cold?" Lin Caisang replied seriously.

There is no such thing as being afraid of the cold, not to mention that Yamo Lian had wrapped her in such a big quilt, it would be strange for her to be cold, not to mention that she would have to enter the Jinzhu Space soon, where the temperature could be constant.

Seeing what she said, Ya Molian said nothing more, "Sleep well, I'll leave first."

"good."

Lin Caisang could no longer nod obediently, watching Ya Molian fly away from the window with a tangled face.

"Should I seal up the windows?"

It's really confusing. It's not that I haven't thought about it before. It's just that wherever Ya Molian wants to go, there shouldn't be any place that he can't reach, right? What's more, it's just a small cliff village.

This window is sealed, he won't come in from somewhere again, right?

Let her think about it, should she lift the roof, or come in directly through the door of the room openly?

"It's better not to do it. He's not even embarrassed anymore. I don't have anything to be ashamed of as a modern person. I just leave him alone. I don't care about him. I'll go to the next level and ask Brother Yujing."

Lifting the quilt, she gently lifted the sack and dodged directly into the space.

...

In the space, there are many medicinal herbs that she planted directly when she was digging for medicinal herbs in the mountains. She looked at the medicinal herbs when they were still small and didn't like them. Now they are growing very well.

Some medicinal herbs have already bloomed.

"Brother Yujing, let me ask you a question. How many missions do I have to take before Golden Pearl can be upgraded? Look at my ice silk cocoon, which is in urgent need of a breeding level." Holding a sack in her hand, she was still plump. His face was full of confusion.

The current Jinzhu space can only grow medicinal materials, which is the most basic level.

If you want to breed ice silkworms, you must upgrade to the second level to open this function.

Fortunately, breeding is the second level and planting is the third level. Otherwise, she would have to keep doing tasks until the Golden Pearl Space is upgraded to the third level. Then she really doesn't know where to put these ice silkworms.

‘More than ten, high-level tasks, details unknown.’

Twelve characters were displayed on the jade mirror, which made Lin Caisang look at the sky speechlessly.
