

Starchild 391

[Chapter 391: Starry Sky Chessboard](#)

Looking at the fantastic scene of the Kunlun God's Domain, Yun Xi finally remembered his purpose coming to the Sky Tower.

Casina didn't lend her identity to him just to let him go sightseeing, she wished for him to find the solution for healing his body here.

Yun Xi didn't know what was wrong with his body, however, since Casina said it, it should be true.

"Obtain 100 successive victories and get the Soul Jade as a reward." Remembering what Casina said, his hand lightly touched the body of the tower.

The next moment, his body was absorbed into the Sky Tower.

It was hard to describe the feeling of touching the Sky Tower. He felt as if he was seeing the entire universe in an instant.

He saw endless lights of stars flying around him, forming countless star bridges.

Each star bridge leading to a world, a civilization.

The entire god domain world was in the web made of the countless star bridges, and even though there were already overwhelming worlds in the web, they just occupied a small part in the starry sky.

Outside the farthest star bridge, there were still numerous unknown, mysterious worlds, which were too far away from the endless god domain worlds, so they hadn't been caught by the web made of the star bridges. Arguably, the living beings in these worlds were still in the darkness of ignorance.

The world is so big.

The starry sky is so vast.

Is this the reason why Teacher Casina gave me her identity? Is this awesome, soul-stirring scene what she wanted me to see?

Walking along the star lights, Yun Xi found that he was standing at a place which looked very familiar.

"This is..." Looking around, Yun Xi was surprised.

Being surrounded by the star lights, one road after another appeared in all directions, like a mini star bridge system.

It looked pretty similar to what Yun Xi saw at the star altar.

"Hum? Master, does the star trial begin again?" Mei'er appeared in her soul form, looking around with curiosity.

"No, the next star trial hasn't started. I'm in the Sky Tower." Yun Xi explained.

“Oh, this place looks really similar to the star altar.” Mei’er floated in the air and sniffed.

“I can smell master’s smell everywhere, even if it isn’t your past heritage, it must have a deep relationship with you.” Mei’er was sure that the Sky Tower was built by using the power of the stars.

“Oh, if it’s true... was I really a great person in my past life?” In Yun Xi’s mind, his past life was just “a bad lucky guy who had four horrible ex-girlfriends”.

But now, it seemed that he did something very great in his past life. At least, he was talented when building wonders.

“Of course, I have said that you are the greatest master in the world! Otherwise, they wouldn’t launch that...” Suddenly, Mei’er covered her mouth and stopped.

“Oh, the inner structure is so incredible...” Fortunately, Yun Xi was observing the inner structure of the Sky Tower, he didn’t pay attention to what Mei’er just said.

Standing in the front of the Sky Tower, where looked like an altar, Yun Xi saw several stairs leading into the void.

At the entrance of each stair, there were signs indicating where the stairs led to.

Looking up at the end of the stairs, there were several different coloured light balls, as if there were stars hanging in the Sky Tower.

Yun Xi looked at the nearest stair, and it was tagged as “The City of Doll”.

“The City of Doll, where you can make the most perfect doll! There are countless dolls waiting for you here!”

Oh, it sounds interesting! Yun Xi was itching for a try. However, when he sat his foot on the stair, he heard an ear-piercing warning.

“Warning! Warning! You have no privilege to enter the City of Doll. This is the paradise of puppeteers, please start from making your first doll.”

“Well...” Yun Xi remembered that he was using his teacher, Casina’s identity. Of course, Casina wouldn’t hold the permission to enter the City of Doll.

If so... Yun Xi looked at the other stairs carefully.

“The Door of Heaven.” The stair leading to the paradise of angels. Only angels can enter this door.

“The Door of Hell.” The lost paradise of demons. Only demons can enter this door.

Undoubtedly, they won’t open to Yun Xi.

From the beginning, he shouldn't come here. It was too early for him to come to the realm of the legend rank.

"By the way, Teacher Casina told me to obtain 100 successive victories, but... where should I go?" Yun Xi looked around in confusion.

"The City of Doll", "The Door of Heaven", "The Door of Hell", "The Paradise of Elves"... apparently, judging from their styles, there were the areas of the Western God's Domain.

"Wait, master, the stairs here will change periodically!" Mei'er finally figured out the operational principle of the star altar.

Just like the orbit of the stars, the areas connecting to the stairs would change from time to time. What Yun Xi just saw was the "Mystery Place Theme Pack" series.

After a while, three new stairs appeared in front of him.

"Heaven Book World", "Five Elements World" and "Starry Sky Chessboard", three Eastern style stairs appeared.

In the "Heaven Book World", there were countless books, where was used to decide the candidates of the inheritor of the Heaven Book.

In the "Five Elements World", people could study the mystery of five elements.

Looking at the “Starry Sky Chessboard”, Yun Xi’s eyes brightened up. He was sure that this was the world Casina wanted him to go!

Because the stair of this world opened to him!

“Mei’er, let’s go!” Yun Xi stepped on the stair with expectations.

After about 15 minutes, the connecting areas of the stairs changed again.

This time, the world of “Battle God’s Championship Contest” finally appeared, but there was already nobody on the altar.

[Chapter 392: When the Legend Starts](#)

At the same time.

In the Western God’s Domain, the God Tower.

In the Eastern God’s Domain, the Sky Tower.

In the Dragon God’s Domain, the Dragon Tower.

“Starry Sky Chessboard” appeared in the three towers at the same time.

The hero ranked people and legend ranked people who saw it in the three towers instantly fell into ecstasy.

Unlike most mystery worlds in the seven towers, “Starry Sky Chessboard” was a pretty rare mystery world even to legend ranked beings.

In the legend, “Starry Sky Chessboard” stood for one of the highest secrets of the seven towers, it was a challenge of wisdom. The people who were chosen by it were all the smartest people in their god’s domains.

It would be great luck to the people who could play chess in the Starry Sky Chessboard world, it was a miracle that countless strong living beings were eager for.

“What? The Starry Sky Chessboard just appeared?”

“Go, go, go! Every who can set foot on the stair, get into this mystery world quickly!”

“It’s already been a thousand years! After a thousand years, the Starry Sky Chessboard appears again!”

“Don’t push! Get in line!”

...

In the Dragon God’s Domain, Orfina, the old Ruby Dragon left the Emerald Dream. As she slowly opened her eyes, the countless crystals around her all broke.

She was the most excellent sophist in the Dragon God's Domain, the Ruby Dragon who was called "Morning Glory", the strongest chess player who achieved 50 successive victories the last time the Starry Sky Chessboard appeared. She only achieved 50 successive victories because she lost to the God of Wisdom.

"Oh, finally, this mystery world opens again... how long have I slept?"

"Oh, a thousand years? I'm really happy to play chess again."

...

In the Western God's Domain, Norn, the God of Wisdom, the only living being who achieved 60 successive victories last time, looked at the light ball in the God Tower with joy.

The Starry Sky Chessboard, one of the ultimate secrets of the God Tower. It was said that the person who successfully passed its test could see one of the ultimate truths of the universe.

Nobody knew what the truth was. However, as the well-known God of Wisdom, he was so eager for any truth of the universe.

This time, he was confident enough to challenge all the chess players in the endless god's domains, achieving 100 successive victories, because it was the requirement to face the ultimate challenge of the Starry Sky Chessboard.

Even though he was the God of Wisdom, after defeating Orfina the Ruby Dragon, he was exhausted and finally stopped after he achieved 60 successive victories.

In the mystery world of the Starry Sky Chessboard, no matter how long you were there and what your identity was, everything depended on your chess strength. The people who achieved 50 successive victories would be marked “5 star points” automatically by the Starry Sky Chessboard. Norn, the God of Wisdom was the only “6 star points” chess player.

...

In the Western God’s Domain, the Mechanus God’s Domain.

Countless engineers walked around the God Tower and looked at a giant crystal which was connected with the God Tower by innumerable electric cables.

In the crystal, a girl was curling up, sleeping in the God Crystal that was more expensive than an entire god’s domain.

Her body was covered by strange clothes with countless circuit symbols, her tender skin looked so fantastic like a dream, her translucent silver hair dropped to her tiptoes. On her forehead, there were a pair of antennas, but now, they were shrunk.

“Zii! Zii!” An amazing amount of electric currents wrapped around the God Crystal, they danced and cheered, waiting for the girl to wake up.

“Start the first set of quantum computers!”

“Start the second set of quantum computers!”

“The core planet motor is running smoothly!”

“The first, second and third satellites are running smoothly!”

The Mechanus God’s Domain was known for alchemy and black technology. The alchemists and engineers all looked at the sleeping girl with a look of ecstasy.

After the war of gods, the void god race achieved independence, she was the first perfect creation the alchemists and engineers made with their hands.

She was the miracle, she was the legend, she was the highest crystal of wisdom of the entire Mechanus God’s Domain. In order to create her, all the engineers in the entire Mechanus God’s Domain had used all of their money to bring her to fruition.

Today, she would wake up, and the Mechanus God’s Domain would return to the stage of the endless god domain world again!

“Start, Code Name Alpha! Our god, the strongest Cyber Elf!”

“Long live science!”

“We will become the truth of the universe, we are the avatars of the world!”

With the ear-piercing sounds of electric current, the planet heat-removal system slowly launched. By extracting untold energies from the core of the planet, the black technology which combined the legacy of god and human technology aroused the girl from her sleep.

Slowly opening her eyes, the girl walked out from the God Crystal. She was so beautiful, as if she was the combination of all good things in the world.

Standing on the ground, the girl opened her mouth. It was an announcement from her godhood, it was the congratulations of a newborn god.

“I have died in the past, who will know my name and life story?”

“I was lost in the unknown, who will know my place?”

“My heart has gone to nirvana, who can seek for its trace?”

“My disappearance is already doomed, but I shall never stop.”

“The disaster hasn’t been ended, and will last forever in eternity.”

“My fear, my tear, and my heart are empty.”

“I’m nothing, I’m void, I’m ash, I’m desolation.”

“The gods have died, the twilight is coming. As the light is still shining on the ground, I return from eternity!”

“Code Name, Alpha, launch, out!”

[Chapter 393: The Tutorial of Starry Sky Chessboard](#)

The appearance of the Starry Sky Chessboard was random. This time, it only opened in the Sky Tower, the God Tower and the Dragon Tower.

Rarely, people swarmed toward it in the three towers. They strived to step onto the stair from different star altars.

The rule of the Starry Sky Chessboard was to play a game called “Star Go”, which was recognized as the highest crystallization of wisdom in the endless god domain world.

Its prototype was an old game called “Go”, which was a game played with black and white pieces on a board of 361 crosses. However, “Star Go” was far more complicated than “Go”, its chess pieces were “stars”, and the players needed to play in the chessboard which would change continuously.

It referred to the knowledge of astronomy, geography and divination. Arguably, it was so complicated that even gods couldn’t predict the result.

It was a game that only belonged to the wisest legend ranked beings in the universe, mortals wouldn’t even be able to understand the rules of the Star Go.

In the mystery world of the Starry Sky Chessboard, “power” was meaningless, because only the people who could calculate quickly and understand the rules of stars had the opportunity to win this game.

“Stars” were the chess pieces and “star map” was the chessboard. From the first day this game was invented, there weren’t any chessboards that were the same.

The star map would change continuously, even the appearing of the changes was such that no one expected. This was the mystery of the Starry Sky Chessboard.

Even if a person wasn’t eager for the reward after achieving 100 successive victories, to play chess here was already a great opportunity for improving oneself. Therefore, every time the Starry Sky Chessboard appeared, people would strive to enter into it like a flock of ducks.

However, the Starry Sky Chessboard didn’t open to everyone. Only the smartest people could step on the stair leading to this mystery world, and this was just the beginning.

Before formally starting the game, there was still a hard test to pass.

...

“The grading game? It’s used to test the player’s Star Go strength and explain the basic rules of Star Go?”

Looking at the huge chessboard in front of him, Yun Xi was annoyed.

Oh, I never heard about Star Go before, how can I achieve 100 successive victories?

Maybe the Star Go is very easy, and I will meet a lot of rookies, as long as I can understand the rules, I can win 100 times easily?

Is Teacher Casina a master-hand of Star Go? If so, it explains why she was so confident that I can win the final reward, the Soul Jade.

Yes, that must be the truth! After all, Teacher Casina is the sixth Sky Sword, it isn't surprising to know that she is good at the Star Go!

Yun Xi quickly accepted the explanation and started to learn the rules of Star Go.

Of course, if he was in the mystery world called "Battle God's Championship Contest", he would find that he had been armed with golden, sparkling legend ranked weapons to the teeth.

Most people would be scared to death and lose 90% of their combat power after seeing Casina's projection in the mystery world called "Battle God's Championship Contest".

After all, Casina was the absolute overlord of the Battle God's Championship Contest.

Because she had won so many times, the rewards she had obtained were already innumerable, after wearing the equipment she had, her defense power and attack power would be ten times stronger than anyone.

Even if it was a legend ranked being who wasn't inferior to Casina in the real world, after seeing her equipment in the "Battle God's Championship Contest", they would immediately turn away and concede.

If Yun Xi was in the “Battle God’s Championship Contest”, to achieve 100 successive victories would be as easy as traveling to the nearby town.

Of course, since he had entered the mystery world of “Starry Sky Chessboard”, he wouldn’t be able to know it now.

He had started to learn the rules of the Star Go with confidence.

“Um-hum, oh, it’s pretty easy!” Yun Xi read the rules of the Star Go.

The players just needed to put chess pieces on the chessboard called “star map”, occupying the territory on the star map, the one who obtained the absolute advantage on the star map would be the winner.

The rules were similar to the mortal’s game, “Go”, but the chess pieces were different.

Each of the chess piece of the Star Go had their own nature. Some of them were fire type, just like the planet full of lava in the real world; some of them were water type, just like the ice-covered planet in the real world.

The nature of the chess piece stood for different planets in the real world.

Similarly, the chessboard called “star map” was the same. It was the simulation of the real starry sky.

Before the game started, both sides of the players wouldn't know what the star map was and what kinds of chess pieces they would obtain. It was a great challenge to their computing power and understanding about the rules of the stars.

Now, in front of Yun Xi, it was the most basic star map, a simulation of a very small galaxy with nine slots.

In the box beside of his hand, there were 18 chess pieces waiting for his picking.

“Nine Chess Pieces Go” was the basic of the Star Go, it was used to test the handfeel of the player.

Theoretically, all the 18 chess pieces could be put into the 9 slots, but the natures of the chess pieces and the natures of the slots were different.

Based on the slots the chess pieces were put in, the power the chess pieces could release would be various.

[Chapter 394: The Easy-to-understand Star Go](#)

Put the right chess piece into the right slot of the star map was the basic rule of Star Go.

Just like the real starry sky, the star map would change as time went by.

Putting the “stars” into the star map was the biggest change.

If the player put a fire-type chess piece into the slot that was also fire-type, the fire element in this area of the star map would become stronger.

On the contrary, if the player put an ice-type chess piece into the fire-type slot, it would reduce the fire element in this area.

The rules of Star Go was to put the right chess pieces into the right slots to gain advantages, "eat" the opponent's chess pieces or break the opponent's layout.

The star map would affect the nature of the chess pieces, and the chess pieces would change the star map too. The infinite changes on the star map would be the battlefield of the smartest people in the endless god's domains.

Even though the "Nine Chess Pieces Go" was just the most basic Star Go that was used to test the player's ability, to most people in the world, it was already an extremely difficult barrier.

It seemingly only needed to put 9 of the 18 chess pieces into the right slots, however, because the star map would change automatically as time went by, it was hard to predict the effect of the chess pieces in each slot. It was a test of the player's understanding about the natures and orbits of stars, which was called the basic sense about Star Go.

The battle would start when putting down the first chess piece. To most sophists who came to the Starry Sky Chessboard, they could figure out thousands of permutations from the several limitations.

The stronger the star map became after filling up the slots, the higher score the player would obtain. Only the people who achieved great scores could really enter the Starry Sky Chessboard, playing with the smartest people all over the god's domains.

To the people who had obtained the "star point", even just "1 star point", this test was just a simple warm-up exercise.

Unfortunately, Casina hadn't come to this mystery world yet, to be precise, Casina only came to a mystery world in the Sky Tower, the Battle God's Championship Contest.

Naturally, Casina had no record in this world, which meant that she was a "0 star point" newbie, and Yun Xi had to learn the rules of Star Go from the beginning.

Of course, Yun Xi hadn't known any of this now.

"Oh, it looks pretty easy! No wonder that Teacher Casina thought that I can achieve 100 successive victories easily!" Yun Xi picked a transparent, green chess piece, putting it into the first slot of the chessboard.

"Yes, it's super easy to you, master." Mei'er smiled sitting on Yun Xi's shoulder.

Yun Xi didn't know the reason, but he naturally thought that it was right to put the green chess piece into the first slot.

In his mind, it would be strange if he didn't put it into the slot, because it was an integral part of that starry sky from the beginning.

After putting down the first chess pieces, he quickly picked up the second chess piece and the third chess piece. Invisible waves spread around from the chessboard, connecting the three green chess pieces together.

The “starry sky” on the chessboard was the holy land that was blessed by “wind”, the three chess pieces were the three state formation in this star field.

After Yun Xi put down the three chess pieces, a circulation formed amongst the three “stars”, the outline of the “Sanctuary of Wind” appeared.

If describing it using the terms of Star Go, a “ko” just formed, which meant that Yun Xi had controlled this star field on the star map, he could “eat” all the other chess pieces in this area.

When the first “ko” formed, the chessboard emitted soft green lights.

The appearance of the “Sanctuary of Wind” had proved that Yun Xi was qualified to play with other chess players, so he passed the test.

“Have I passed the test?” Yun Xi felt that Star Go was really easy! At least, it was easier and more interesting than the boring mathematics practice.

Oh, it would be better if mathematics was as simple as Star Go!

“Puff!”

The old Shaman of the Western God’s Domain spat blood on the chessboard.

“Oh, no! I calculated wrong!”

He had learned the rules of Star Go over hundreds of years. In order to take part in the regulation game of Star Go, he had drunk dozens of Elixirs of Wisdom, and used all the support magics he knew. At least, he was sure that his computing power had reached the legend rank today, but he still failed the entrance test.

He wasn't the only person who failed the entrance test, the "Nine Chess Pieces Go".

"Why? No! My computation wasn't wrong! It's the world! The rule of this world is wrong!"

The 17th master of the Yi Sword Sect, Taoist Priest Qing Feng cried. After putting down 8 chess pieces into the slots, he found that he went into a dead end. He couldn't accept the result!

"No, I don't believe it! Why was my computation wrong?"

He spat out blood.

John, the hero ranked Holy Knight, the top one wise general of the Western God's Domain held his forehead. He just calculated till he felt dizzy, and finally, all the chess pieces exploded because he put them into the wrong slots, which meant that he failed the test!

The Starry Sky Chessboard not only tested the players' wisdom and computing power, but also tested their understanding about the rules of stars. Even if one was at the legend rank, it was useless when referring to playing Star Go.

This was the reason why only very few people could pass the test and become formal chess players. Most of the time, only 20 or 30 people could play the Star Go on the Starry Sky Chessboard.

Each of them was the wise man above all wise men, the people understood the rules of stars very well. They really were the real legends of wisdom in the endless god domain world!

[Chapter 395: 47 Chess Players](#)

“Ding!” As the last grain of sand dropped to the bottom of the sandglass, the entire entrance test was over.

There were hundreds of people who could set foot onto the stairs in the Sky Tower, God Tower and Dragon Tower, arguably, they were the real elites and wise men in the endless god’s domains.

Some of them were knights, who never conceded on the battlefield.

Some of them were monks, who penanced, trying to understand the rules of the world.

Some of them were sages who built tall magic towers.

There were even real gods, dragons, and mysterious living beings.

Undoubtedly, it was a celebration of the highest wisdom in the endless god domain world, it was a stage that only appeared once in a thousand years.

Finally, when the entrance test finished, there were only 47 people who were formally allowed to enter the Starry Sky Chessboard.

“The entrance test has finished, you have passed the test. Please choose your code name.” A huge chessboard appeared in front of Yun Xi.

One star after another started to appear on the chessboard.

Every star meant a chess player who would join the game.

It was the battlefield of wisdom, even gods would be excited on this stage of glory.

Almost all the 47 people were legend ranked living beings.

Only a few of them were hero ranked living beings. They could pass the entrance test of the “Nine Chess Pieces Go”, which meant that they had very special abilities or bloodlines that could let them obtain legend ranked computing power.

“47 people? Oh, this means that several new ‘star points’ will be born!”

Norn, the God of Wisdom habitually calculated the standard of the chess players.

Every time, the Starry Sky Chessboard would appear in the seven towers randomly, so the number of the chess players would change every time. This time, there were 47 chess players. In Norn’s memory, the chess players this time were the most.

Because of Norn, the God of Wisdom, the entire Western God's Domain was fanatical to Star Go, he himself was the recognized strongest chess player, the only "6 star points" in the seven towers.

"As expected, the Ruby Dragon of the Dragon Tower also comes this time." He looked at the bright star in the north.

In the Starry Sky Chessboard, the higher "star points" one had obtained, the brighter one's star would become.

As the only "6 star points" chess player, the god who once obtained 60 successive victories, his star was the brightest.

However, even so, he didn't know if he could obtain more than 60 successive victories this time.

Because playing Star Go would drain his spiritual strength. When entering the last phase, he would have to play with the chess players who weren't inferior to him, thus the consuming of his spiritual strength, he would be unable to replenish it at that time.

It was a real harsh battlefield of wisdom. Even to him, it was almost impossible to obtain 100 successive victories.

In fact, he knew that his 60 successive victories last time was because of luck. The Ruby Dragon Orfina's Go Strength was just half-and-half with him. He defeated Orfina after she obtained 50 successive victories, and she defeated him after he obtained 60 successive victories.

The gap between "5 star points" and "6 star points" wasn't wide. If he wasted too much energy when playing with Orfina, it would even be possible to be defeated by "4 star points" chess players.

Everything was possible on the Starry Sky Chessboard, even Norn couldn't avoid failure if he didn't give his whole attention to any of his opponents.

He was the strongest chess player, because his record was stable. He had more than 50% chance to defeat any of the "5 star points" chess players. Although Orfina wasn't inferior to him, she liked to take risks when playing, so her record was unstable.

When Norn was observing other people, other people were also observing the opponents around themselves.

Theoretically, if you didn't quit, you could play as many turns as you wanted here. Therefore, everyone on the Starry Sky Chessboard would meet each other more than once.

Most of them already became acquaintances, only several new faces appeared this time.

"The God of Wisdom" was Norn's code name, "Ruby Princess" was Orfina's code name. She was called the smartest dragon in the Dragon God's Domain, and her true body was a star.

Apart from them two, there were several "4 star points" chess players, such as "Black Mage", "Maple Teeth", and "Duck Rome". They also defeated "The God of Wisdom" and "Ruby Princess" several times.

Compared to them, the new chess players had zero star points now, so most of them didn't pay too much attention to these newbies.

This time, there were four new chess players.

“Maha Mystery” – apparently, it was an eastern style code name, this was a new chess player from the Sky Tower.

“Hero of Might” – this was a mysterious chess player from the Dragon Tower.

“Cyber Elf Alpha” – nobody heard this code name before. Maybe it was a legend ranked elf.

“A Cloud in the Sky” – it really was a strange code name. Nobody knew who this new chess player was.

At this time, nobody would know what a storm these newbies would roll up.

Everyone looked at the two strongest chess players, Norn and Orfina, and expected an earth shattering competition between them.

“Ok, I will use this code name.” Yun Xi was satisfied with the code name he just chose.

“A Cloud in the Sky” meant that he wanted to be as free as the cloud in the sky.

[Chapter 396: Maha Mystery](#)

“What a gorgeous chessboard!”

Yun Xi looked at the huge chessboard and immediately fell in love with it.

It was the most complicated, most mysterious and most beautiful thing he had ever seen. In the continuously rotating nebula, there were endless star maps.

Just looking at the chessboard, Yun Xi felt as if he was looking at the history of stars.

“This thing...” Mei’er supported her arms, observing the mysterious chessboard.

As a star spirit, she instinctively felt something from the chessboard.

It was familiar and strange.

It was close and distant.

It looked as if a web that mixed up all the star maps in the past, at present and in the future together.

The ranking of the Starry Sky Chessboard... isn’t inferior to the Sky Tower itself!

As the stars on the chessboard started to twinkle and shine, they dropped onto the huge star map one by one.

Each star stood for a chess player.

Amongst all of the stars, the stars of Norn and Orfina were the brightest.

Unknowingly, only Yun Xi hadn't entered the chessboard.

"All right, let's go!" Yun Xi and Mei'er flew to the infinite lights of stars.

The battle had just begun!

In the Sky Tower, Dragon Tower and God Tower, one legend ranked being after another cast their eyes onto the light ball stood for the Starry Sky Chessboard. They couldn't join this competition, but they could see the record of the chess players the Starry Sky Chessboard published.

As the highest crystallization of wisdom in the endless god domain world, the winner of this game would become the focus of attention by everyone.

In the recent 1000 years, the God Tower was dominant, Norn the God of Wisdom made a great contribution to it.

Because he won repeatedly on the Starry Sky Chessboard, a lot of sophists were born in the Western God's Domain, which contributed a great amount of achieving points for the God Tower.

Therefore, almost all god's domains started to learn Star Go in the recent 1000 years, and they had explored many new strategies of Star Go.

It would be doomed to be an era that all stars were shining.

Yun Xi looked at the monk who had three eyes, six arms and bright lights all over his body. He was shocked.

“Maha Mystery”, he was Yun Xi’s first opponent. They both were newbies.

But in Yun Xi’s eyes, he was really an eminent monk!

“Oh, benefactor, you are predestined with Buddha!” The monk’s six arms held a vase, a pearl, a vajra, a wand, a sword and a Buddhist sutra. He saluted to Yun Xi.

“Namo Amita Buddha!”

He was the strongest secret weapon of buddhism, Sacred Monk Maha!

Yun Xi gawked. He never saw such a monk whose body was covered with golden lights! Is he a living Buddha?

Because of the rule of the Starry Sky Chessboard, the monk’s face was covered by starlights, however, his golden, gorgeous kasaya and talismans still made Yun Xi feel ashamed of his own unseemliness.

He must be an enlightenment monk!

Even if he said “In fact, I’m the nirmanakaya of Bodhisattva, I come here to convert you to Buddhism.” Yun Xi would believe his words.

Of course, Yun Xi never planned to believe in Buddha and convert to Buddhism.

He still dreamed of a better future after he got rid of his ex-girlfriends’ hunting and married the girl he liked!

At least, he still thought that this dream would come true someday now.

Yun Xi’s strength was no match for the enlightenment monk’s dharma body, fortunately, they were on the Starry Sky Chessboard, they only needed to break a lance using the chess pieces.

There were two golden hourglasses between both of them, which looked similar to Casina’s Sand of Time.

When the game started, first, they needed to determine who was on the offensive (by guessing if the number of chess pieces were odd or even), after that, they could think before the sands in the hourglass ran out in their turn. Apart from that, their true faces would be covered by starlights, but they could use avatars to show their identities.

“Odd.” Yun Xi said.

“Even.” Maha Mystery said.

The number of the chess pieces was odd. Yun Xi was on the offensive. He could put his chess piece first.

He took a deep breath.

Take it easy, it doesn't matter! This is just a simple game, otherwise, Teacher Casina wouldn't be so sure that I could obtain 100 successive victories! Even though he looks like an enlightenment monk, it doesn't mean that his Star Go strength is strong!

Yes, it must be the truth!

When the sequence of moving the chess pieces was determined, a vast star map appeared in front of them. The star map was far more complicated than the star map of the Nine Chess Pieces Go!

"Amitabha!" When the star map appeared, the Sacred Monk Maha closed his eyes. His body turned into three incarnations, looking at the mysterious star map together!

His first incarnation picked a flower, put it in his hand and smiled.

His second incarnation sat on a lotus with a sad look.

His third incarnation laughed heartily with a big belly and red face.

His first incarnation was Manjusri Bodhisattva.

His second incarnation was Ksitigarbha Bodhisattva.

His third incarnation was Buddha Maitreya.

His Buddha dharma “Maha Mystery” could let him borrow the powers of Buddhas and Bodhisattvas.

At this time, the Sacred Monk Maha borrowed the powers of the Bodhisattvas and Buddha, trying to figure out the secret of the star map using their theurgy.

“Pa!” Yun Xi didn’t know what the Sacred Monk Maha was doing at all. He just picked up a chess piece and put it into the slot in the center of the chessboard, where was called “tengen”!

Chapter 397: First Victory!

“Tengen?”

Looking at the chess piece, Maha’s three incarnations pondered together .

Chess pieces could be placed everywhere on the chessboard . “tengen” was the most stable place in the entire star map .

Putting the first chess piece here was meaningless, because the nature of tengen would barely change in the game, which meant that it was equal to give up one’s first move advantage .

Yun Xi just gave up his “sente”!

“Kakari .” Manjusri Bodhisattva pointed to the corner of the chessboard .

“Top left corner .” Ksitigarbha Bodhisattva pointed to the corner on the left .

“The right corner is also fine .” Maitreya Buddha laughed loud . Apparently, he thought that his victory was already in the bag .

The young boy was apparently a newbie, because he didn’t even know that no one could put the chess piece in the center of the chessboard at the beginning . He had lost the upper hand!

After thinking a minute, the Sacred Monk Maha picked up a red chess piece and put it into the slot in the left corner of the star map, where Ksitigarbha Bodhisattva pointed at .

It wasn’t his best choice, however, he wanted to test Yun Xi’s style of playing Star Go by this .

His Buddha dharma “Maha Mystery” recorded the styles of all the chess players he had observed .

All chess players had their own style when playing Star Go . Norn the God of Wisdom’s style was stable; Orfina the Ruby Dragon’s style was wild; some people were good at making traps in the game, if they couldn’t be at the upper hand, they would already lose half; some people were good at counterattack, if they were on the offensive, they would be at a loss about what to do; some people’s state was unstable, they could be invincible when they were in a good state, but would also be dashed to the ground when they were in a bad state .

The Starry Sky Chessboard was the battlefield of wisdom . The Sacred Monk Maha was a secret weapon the Buddhism had prepared a thousand years for this day .

Everyone could use all magics, theurgy, and equipment on the chessboard . Just like the real world, winner obtains everything .

Looking at the sacred monk, Yun Xi showed an expression of “I know you will put the chess piece there!” . He put the second chess piece in the slot where was in the opposite direction of Maha’s chess piece on the chessboard .

Oh, he likes to counterattack? Maha was lost in thought again . When half of the sands had dropped to the bottom of the hourglass, he moved again .

Even if your defense is strong, it wouldn’t be meaningless to face my stronger attack!

“Attack!” Manjusri Bodhisattva nodded .

“You should attack .” Ksitigarbha Bodhisattva put his palms together devoutly .

“You must attack!” Maitreya Buddha laughed .

Therefore, Maha started his fierce attack . After ten rounds, half of the area on the chessboard had been occupied by Maha’s chess pieces . He had even eaten three of Yun Xi’s chess pieces .

“Ok, it’s over .” Yun Xi looked at the chessboard and began to draw the net in .

“Pa!”

“Pa!”

“Pa!”

Ten rounds later, Maha still attacked fiercely, and Yun Xi started to link up his chess pieces on the chessboard .

The 11th round, Yun Xi’s chess pieces suddenly emitted green lights .

Seven chess pieces formed a completed “Sanctuary of Wind”, which he also used in the Nine Chess Pieces Go .

“Amitabha!” Looking at the chessboard, Maha was shocked .

Originally, his chess pieces had dominated the chessboard, but when Yun Xi put down a chess piece, a “ko” formed and the situation was totally reversed .

What happened? When did he make the mistake that caused this happening?

“Not here .” Manjusri Bodhisattva loosened his fingers .

“Not there . ” Ksitigarbha Bodhisattva shook his head .

“Not here, not there!” Maitreya Buddha patted his stomach and laughed bitterly .

Maha froze . His hand raised highly but couldn't put the chess piece down .

He didn't expect that the situation suddenly became so bad to him! They hadn't even played 50 rounds!

No, there is still hope!

“Well, is the monk thinking that he can still save the situation?” Mei'er sat on Yun Xi's shoulder, kicking his hair with a naughty look .

“Hmm, I think he is gonna lose, but... maybe there are some changes I don't find . ” Looking at the star map, Yun Xi didn't find any problem .

“Amitabha! Maha means infinite! If someone has to take the tough stuff, let me do it!” Maha chanted with a religious look . His six arms raised the six talismans together .

The vase, pearl, vajra, wand, sword and Buddhist sutra emitted bright lights together . One picture of Mandala after another appeared behind him .

“No! No!” Manjusri Bodhisattva lowered his head .

“Stop! Stop!” Ksitigarbha Bodhisattva looked at him with compassion .

“You are done! You are done!” Maitreya Buddha shook his stomach .

These pictures of Mandala was Maha’s treasures, they were disposable goods he borrowed from a predecessor of Buddhism . Each of the picture could temporarily increase a part of his computing power .

He obstinately thought that he still stood a chance to save the situation!

As the secret weapon of Buddhism, the monk who could create the Buddha dharma “Maha Mystery”, he couldn’t be defeated in the first game! Moreover, his opponent was just a newbie!

“Buddha is compassionate!” He shouted . After that, his eyes became clear as if he just obtained a great awakening .

In the 100th round, Yun Xi put down the 100th chess piece, which announced the victory of his first battle .

“Oh, benefactor, fate has brought us together, you are predestined to join Buddhism!” Although he had been defeated, the Sacred Monk Maha didn’t look dejected . He raised all the treasures in his six hands and smiled at Yun Xi .

“If you want to join Buddhism, just go to the Temple of Manjusri in the west of the Kunlun God’s Domain!”

Chapter 398: The Secret of Tengen

“Well, as expected, Star Go is pretty easy!” This was Yun Xi’s feeling about his first game.

“The monk made a lot of mistakes!” As a star spirit, Mei’er easily found over ten mistakes the Sacred Monk Maha made.

In fact, Maha’s line of thinking wasn’t wrong, but from his second round, the natures of the chess pieces he put down had very few differences with the areas on the star map.

No, he didn’t make everything wrong, it was just a very subtle, inconspicuous mistake. The nature of the area his chess pieces occupied were changing, he shouldn’t launch any fierce attack in this situation.

Star Go was different from Go, although a few of the rules of the two games were similar, however, the chessboard of Star Go was a changing star map. The chess pieces on the star map would effect the star map and the star map would affect the chess pieces too.

Maha’s biggest mistake was that he thought that Yun Xi was a newbie, so he let down his guard and launched an imprudent attack.

Even if his opponent was a “4 star points” chess piece, his opponent would be careful about his attack. Apart from Orfina who would definitely strike back immediately, other people would stand firmly and fight steadily in the face of his attack.

However, Yun Xi’s style was different from any other chess player. In his eyes, Maha’s fierce attack was equal to bringing about his own destruction!

When Yun Xi's chess pieces formed the first "ko", he had dominated the chessboard. Even in theory, Maha didn't have any chance to win, that was the reason his three incarnations sighed together.

No, it wasn't because Maha was weak. He created the Buddha dharma "Maha Mystery" and obtained the pictures of Mandala, his computing power was actually in the top three list.

Unfortunately, his opponent was Yun Xi, the "newbie" who didn't need to calculate and only played chess on his feelings.

At the same time, on another star map.

The top ten chess player last time, the wise man whose code name was "Duck Rome" stared at his remaining chess pieces in fear.

What happened? Am I defeated? How could it be true?

Is she really a newbie?

Her strong computing power and terrible sense of pressure... he never saw anyone like her before!

Maybe even Norn the God of Wisdom couldn't win against her when it came to computing power!

Her computing power was far stronger than any human, no, even gods were no match for her. She forced him to the corner within 30 rounds, how weird her Star Go style was!

“I concede!” Duck Rome threw down his remaining chess pieces.

It couldn't be called a “competition”, the gap between them was so wide that he couldn't keep playing with her.

He had a feeling that she would really become a “dark horse” of this term of Star Go Competition.

Her computing power and deductive ability were even stronger than any god he had seen. He couldn't imagine “what” he was facing.

“Cyber Elf Alpha”, looking at her code name, he sighed for the countless mysteries in the world of Star Go again.

“Monsters” really exist!

In the Kunlun God's Domain, on the altar in the Sky Tower.

A group of monks looked at the record the Starry Sky Chessboard showed.

“How can it be possible?”

“Maha was defeated in the first game?”

“He created ‘Maha Mystery’! Who can defeat him so easily?”

“‘A Cloud in the Sky’, who is he?”

They were really shocked, because they knew although this was the first time Maha came into the Starry Sky Chessboard, but in the tests they did before, after borrowing powers from Manjusri Bodhisattva, Ksitigarbha Bodhisattva and Maitreya Buddha, his Star Go Strength could be enhanced to 5 star points!

If he burned the pictures of Mandala, his Star Go Strength could even be increased to 6 star points, at the same level with Norn, the God of Wisdom!

How could he be defeated by an unknown newbie in the first game?

Who the hell is the ‘A Cloud in the Sky’?

Yun Xi, the tenth game.

His opponent had 3 star points, whose code name was “Tao Quan Zi”, was one of the elders of the Heaven Road’s Palace and the master of the Plough Palace.

“Hey hey, young boy, the future belongs to you young people, but now, it’s still our era!” Looking at Yun Xi, Tao Quan Zi smiled.

Oh, he is undoubtedly a newbie!

When did I see a newbie put the first chess piece in the center of the chessboard last time? He just gave up his first round of the game! (Maha: yes, I thought so before too!)

“Well... umm, yes, nice to meet you.” Yun Xi touched his head in confusion.

Why didn't everyone see it? Putting the first chess piece in the center of the chessboard, the place called “tengen” is the basic of Star Go!

In his view, “tengen” was the most stable point in the entire star map.

If describing it use the mathematical term he just learned, it was the “initial point” of everything.

As long as he put the first chess piece at “tengen”, he could “perceive” the trend and change of the entire star map.

When his chess piece occupied the “tengen”, he could see all the natures of chess pieces and areas on the star maps.

Why didn't everyone put their chess piece at “tengen”? Yun Xi felt strange. Why did they give up their chance to obtain this upper hand?

When Yun Xi was on the offensive, he would always put his first chess piece at “tengen”, even if he was on the defensive, he would put his chess piece at “tengen” as soon as possible.

As long as he put his chess piece at “tengen”, he had won half of the game.

No wonder that Teacher Casina thought that I could obtain 100 successive victories easily.

Because it's really easy!

[Chapter 399: The Disaster of Sky and Earth](#)

After 100 rounds, Tao Quan Zi looked at the chessboard with his mouth wide opened.

I was defeated?

When did it happen? When did all of my chances of winning disappear?

Who am I? Where am I from ? Where will I go?

Why was I defeated so suddenly ? Even when I played with Norn, the God of Wisdom, the strongest 6 star points chess player, I didn't lose so scandalously.

Look at the chessboard! The “dragon” formed by my chess pieces are trapped by three “ko”, and all of them are green “Sanctuary of Wind”.

Every “ko” was like a big hole in the formation of Tao Quan Zi's chess pieces. Even to Norn the God of Wisdom, it was already a desperate situation.

“Are you really a newbie?” Looking at the opponent’s unknown name, Tao Quan Zi only wanted to cry.

He was from the Sky Tower, just like that “secret weapon” of Buddhism. Where is this “monster” from? Why didn’t I hear anything about him before?

As the master of the Plough Palace, he didn’t believe that he would be defeated so easily!

Star Go wasn’t a game that could be practiced alone. When the Starry Sky Chessboard didn’t open, he and other chess players would practice themselves using simulated chessboards.

They used the starry sky as their chessboard, the real stars as their chess pieces. It was the privilege of the legend rank. Occasionally, a few talented hero ranked newbies would be guided and supported by them and joined this game.

Although the best imitation till now could only simulate a small part of the real Starry Sky Chessboard, it was better than nothing.

“Yes, I’m a newbie.” Yun Xi nodded, looking at Tao Quan Zi with a strange look.

“Why don’t he concede?” Mei’er counted the chess pieces on the chessboard. Even if Tao Quan Zi retracted 10 rounds on the chessboard, he still has no chance to win, he still insisted on fighting to the teeth and refused to concede.

Yes, “never concede” was Tao Quan Zi’s style of playing Star Go. Even though the situation was already irreparable, he would hold on till the last moment!

It has nothing to do with the game, it's his road of cultivation, his respect and faith.

He would never concede.

However, even though he didn't want to concede... the situation on the chessboard was too terrible!

Tao Quan Zi almost shouted out loud. How did you find all my tricks and block them all?

This round of game was even able to leave a psychological shadow in his heart!

When Tao Quan Zi was thinking, Yun Xi already connected his chess pieces together.

From the beginning till now, this was the most satisfying round of the game.

How to describe his feeling? Yun Xi felt that his first opponent, the Sacred Monk Maha Mystery's attack power was the strongest.

He was the only opponent who had eaten three of Yun Xi's chess pieces.

Compared to Maha, Tao Quan Zi was more persistent. Although he actually had no chance to reverse the situation, he still kept playing.

Yun Xi realized that Tao Quan Zi was a real player, even though he was already doomed to be defeated, he was still enjoying every second and minute of playing Star Go.

He was just like robbing Peter to pay Paul, he just refused to give up.

In the face of such a chess player who enjoyed the process of playing Star Go, Yun Xi thought that he could try something different on the chessboard.

Tao Quan Zi suddenly found that he could find a living road on the chessboard.

His “dragon” had been swallowed by Yun Xi’s three “Sanctuary of Wind”, theoretically, he should concede after that. But he was really enjoying the process of playing Star Go, so he held on till now, and he really saw a chance of winning.

He didn’t expect that the situation suddenly changed after his “dragon” was eaten.

Is this my opportunity?

Tao Quan Zi was wild with joy.

“Pa!”

“Pa!”

“Pa!”

Three rounds later, he made a “ko” for himself, eating several Yun Xi’s chess pieces.

Yun Xi smiled.

Mei’er covered her mouth, stopping herself from laughing out loud.

Yun Xi leisurely put a chess piece on the corner of the chessboard.

Tao Quan Zi hurriedly ate Yun Xi’s chess pieces, trying to recover his lost territory.

The 130th round, Tao Quan Zi laughed. He thought that he had reversed the situation!

What a miracle! I didn’t think that I could do this in my life! After this game, my Star Go Strength should be able to raise to 4 star points.

Yes, I can win! I can defeat this monster like newbie!

“Pa!” Yun Xi put down his last chess piece, the miracle of Star Go appeared in front of him.

The “ko” on the chessboard were all connected together, eating all Tao Quan Zi’s chess pieces at once. The entire chessboard emitted green lights, sweeping through everything.

“What... this is...” Tao Quan Zi’s mouth opened wide. He never expected that this scene would really happen!

All of his chess pieces were eliminated!

Yun Xi’s chess pieces formed a “ko” that covered the entire chessboard, which was nearly impossible to appear in Star Go.

Tao Quan Zi tried to remember what this meant in the rules of Star Go.

If the chessboard was a real starry sky, then Yun Xi’s “stars” had just changed the rules of the world, the Disaster of Sky and Earth!

[Chapter 400: The Same Tengen](#)

“Tengen is really useful!”

Looking at Tao Quan Zi, Yun Xi felt a strong emotion in his heart, though couldn’t see his face.

In order to launch the Disaster of Sky and Earth, Yun Xi needed to meet a lot of preconditions. Anyone wanting to accomplish this needed to master the star map on the chessboard, so it was necessary to put the first chess piece onto tengen.

In the changing star map, only Tengen was always stable. It was the core of the entire star map.

“It’s really a rewarding trip! The Disaster of Sky and Earth really exists! Thank you!” Looking at A Cloud in the Sky, Tao Quan Zi sighed.

He wasn’t ashamed to be defeated by the Disaster of Sky and Earth.

“After this, come to Heaven Road Palace. Then we could play for three days and nights!”

Yun Xi now had 10 victories in a row.

The light above Yun Xi’s head flashed. In a second, the star lights around him became brighter.

It meant that he had just formally become a chess player who had 1 star point. This identity was already sufficient to become a honored guest of all forces in the endless god domains world.

Because of Norn the God of Wisdom, it was a trend to play Star Go in the high society of the endless god’s domains.

Many legend ranked beings were learning Star Go, but couldn’t even step into the Starry Sky Chessboard. Any chess player who had obtained a star point, even just 1 star point, could be the tutor of these exalted legend ranked beings.

Even if Yun Xi left the Sky Tower now, his identity of 1 star point chess player was already able to let him live comfortably.

10 successive victories, it was already a shocking achievement amongst newbies.

However, this time, compared to Yun Xi, there was a more terrible “monster” around.

The 4 star points chess player, Black Mage’s 13th round game.

Black Mage unluckily met Norn the God of Wisdom at his second round and was defeated. Apart from this, his play was smooth and he had achieved 10 successive victories.

It wasn’t a bad thing to meet Norn at the second round.

Based on the unwritten rules of Star Go, for a long time, he wouldn’t meet Norn again, which meant that it was perfectly possible to achieve a series of victories.

If he was lucky, he could achieve 20, no, 30, no, even 40 successive victories, as long as he didn’t meet Orfina the Ruby Dragon quickly.

Moreover, he still stood a chance to defeat Orfina even if he met her.

His style was weird when he played Star Go, his attack was often abrupt and unexpected. Norn’s style was stable, he wouldn’t be affected by Black Mage’s tricks, but his style restrained Orfina’s style.

He was one of the few 4 star points chess players who could break even with Orfina.

If I'm really lucky, It's even possible to achieve 60 successive victories!

Maybe I can become a 6 star points chess player after this game, just like Norn the God of Wisdom?

With such a joyful idea, Black Mage started his 13th round of the game.

In the game, not everyone's round of the game was the same. Based on the time they defeated their opponent or was defeated by their opponent, the rounds they had played were different.

When Black Mage played with Norn the God of Wisdom, the battle between them lasted for a long while. The gap between 4 star points and 6 star points wasn't wide enough to let Norn defeat him quickly.

Even Norn was defeated after his 60 successive victories the last time. He was defeated by Orfina, Duck Rome, and even him, Black Mage almost defeated Norn once.

Black Mage tested out Norn's Star Go Strength this time just now. He had to admit that he wasn't likely to defeat Norn this time in the game.

However, it's not a shame. Norn was the only 6 star points chess player, everyone was defeated by him more than once.

"3 star points... Cyber Elf Alpha..." Black Mage casually took a glance at his opponent's code name and star point. Suddenly, he froze.

Cyber Elf Alpha... isn't she one of the four newbies? How can it be possible that she already obtained 3 star points?

3 star points meant that she had achieved 30 successive victories, but... she was just a newbie!

If it's true, when I have just played 13 rounds of the game, she has won 30 rounds?

No, it can't be true! Star Go will drain large amounts of mental strength. It's not surprising to play several hours in a round of the game.

I did waste too much time when I played with Norn, but, 30 rounds? Are you kidding me?

"Pa!" Before Black Mage reacted, Cyber Elf Alpha had put down her first chess piece.

"Do you look down on me? How dare you give up your upper hand advantage?" Black Mage sneered when he saw the place of Cyber Elf Alpha's first chess piece.

Humph, I don't know who you are, you are probably a legend rank elf, it doesn't matter. The bloodline of "pointy ears" is indeed special.

However, I'm not a mortal either. I'm a dark mage who has activated my bloodline, the uncrowned king of ten god's domains!

In order to practice Star Go, I even made a real star map in the real world, using real stars as my chess pieces!

As a newbie, how dare you put the first chess piece in the center of the chessboard, where the tengen is?

Very well, I will teach you the cruel law of the jungle of Star Go!
