

Starchild 871

Chapter 871: Light of the Divine Sword

One after another, the dark crystals were shattered in the brilliance of the Blue God Sword, turning into dust and disappearing into the air.

Three strands of ice blue hair clusters gently shook, and the guardian of the Sky Sword God's Domain, the oldest Sky Sword Lilibet, appeared directly on the land of the Sky Sword God's Domain.

She who always guarded the gate of the Sky Tower was there. Even when the White Holy Dragon smuggled in, she only brandished her sword to block it, this time however, she left the Sky Tower and appeared before Yun Xi.

"The power of the abyss... The traces of the ancient gods..." Bearing the divine sword, she carefully inspected the ground where the Fahai Temple had disappeared, and then looked at Yun Xi.

"Are you all right, Starry Sky Chess Master?"

This is the secret known only to a few people in the Endless God's Domains, namely Yun Xi, Casina the Battle God, and Lilibet.

Recently, a huge stir was caused in the endless god's domains by the Starry Sky Chess Master, who shocked countless legend-ranked strong people. Only sixteen years old this year, he is still studying in White Lotus Sword Palace.

Due to Yun Xi's huge contribution to the Sky Tower, his protection priority in the entire White Lotus Sword Domain is higher than that of the twin witches and equal to Casina the Battle God in the judgment criteria of guarding Lilibet the Sky Sword.

Yun Xi never imagined how important his accidental acquisition of the "Starry Sky Chess Master" title was in determining the protection of Lilibet to the Sky Sword God's Domain.

Yun Xi looked at the empty ground and had a contemplative expression on her face. "I'm okay... It's just that the temple here..."

What terrible existence has the Fahai Temple stirred up that it was directly erased from the map?

It looks like at least ten ancient gods have attacked Fahai Temple. Is it because the old monks here killed many ancient evil creatures before?

Well, maybe this is the truth!

When Yun Xi recalled the appearance of the old monk chanting the Buddhist scripture of Prajnaparamita Heart Sutra, he felt he had guessed the truth.

Since the cultivator was so powerful, perhaps the battle had not yet ended, and Fahaisi Temple was not destroyed but had simply disappeared into the White Lotus Sword Domain.

In places he didn't know, the battle was still going on.

This level of battle was beyond his imagination.

At that moment, Yun Xi paid respect to the old monk whose Dharma name was still unknown to him.

The old monk is absolutely an extraordinary master of Buddhism. Compared to him who has only just started cultivating the Paranirmita Vasavartin Scroll, it is an unreachable goal.

"As I leave, I will reinforce the barriers. This attack is only against the Buddhists..." Lilibet looked somewhat puzzled.

Why was the target locked onto only the Buddhists? These ancient gods only threw only one piece of black crystal to other places, and here ten were invested?

This kind of black crystal that can cause changes in the heavens and earth, if it is in a general small sword domain, one piece is enough to cause an apocalypse crisis.

Using these dark crystals as coordinates, it will quickly draw in high ranking races that wander the starry sky, like the Colors of the Stars, and then the entire world will be contaminated.

The ground will no longer bear fruit, rivers will emit odors, the sky will gradually be occupied by various spores, humans will soon despair and collapse in such an environment, and the belief in evil gods will spread like a plague.

It only takes around seven days for the ancient gods to come and reap, transforming this world into a part of the abyss.

Having such terrifying power, the value of these black crystals is naturally not cheap.

Even in the depths of an abyss, it takes a long time for a precious crystallization to be nurtured; it is a symbol of the power of the abyss.

"Dark Evil Crystal" is the name of this dark crystal, which is a treasure that only can generate after millions of years of experience in the abyss.

To put it bluntly, the price of a Dark Evil Crystal is enough to buy a small Sword Domain like White Lotus Sword Domain.

Who is so bored that they would drop so many Dark Evil Crystals here, worth more than ten times the price of a White Lotus Sword Domain, just to drag several Buddhist temples into the abyss?

This kind of luxury waste is like smashing ants with gold!

Lilibet will not ignore these dark evil crystals. As soon as they are discovered, she will immediately rush to destroy them.

"Go back where you came from."

"This world is a guarded land."

The azure-blue Godsword-light shone down, instantly purifying the land tainted by the Dark Evil Crystals. For the Ancient Gods, she is undoubtedly their enemy.

"Ugh...the bald asses... remembered me!"

"This... is not over..."

After the coordinates were destroyed, a twisted ripple emanated from the side of the abyss. The Princess of the Abyss resentfully cursed the Buddhist sects under the endless gods' domains.

"Done, the pollution alert is lifted." Lilibet pulled back her Divine Sword and arrived in front of Yun Xi, pressing his forehead with her hand.

"You are not polluted, very good."

Feeling the warmth of Lilibet's hand, Yun Xi's face suddenly flushed.

How many times in his dreams had he gazed upon the girl standing atop the golden sandy beach, of whom he didn't even know her name yet wanting to know more about her?

For Yun Xi, these dreams usually end with her slashing himself and they never had a chance to communicate.

Dream Lover, different from the childhood sweetheart of reality, Yun Xi never imagined a day when she would actually meet him.

It wasn't until he came to the Sky Tower using the identity of Casina the Battle God that he truly saw her and learned her name.

The Guardian of the Sky Sword God's Domain.

The Gatekeeper of the Sky Tower.

Elizabeth Lilibet is one of the highest Sky Swords in God's Domain.

She existed for a longer time than he had imagined and the mission she carries out is heavier than he had thought.

Compared to the time she has existed and the things she has faced, he feels so small.

Compared to Casina the Battle God, who also wields the Sky Sword, she gives off a feeling so sacred and inviolable that Yun Xi can hardly imagine what it would be like to come in contact with her.

It was not until her little hand really and truly pressed against his forehead that Yun Xi was sure it was real, not just his daydream.

Her hands weren't cold but instead carried a warm temperature.

She looked at him with a gaze no longer as indifferent as before.

It was a gentle, caring look.

Yun Xi had much more and closer contact with other females, but Lilibet only extended her hand to lightly touch his forehead and his heart rate started to accelerate.

Ah, this is the taste of love.

Chapter 872: Her Expectations

"No matter what time it is, I will always protect you." The places touched by Lilibet are marked with a sign of order.

That is the recognition by the seven towers, which branded a divine seal on Yun Xi's forehead.

As long as Yun Xi is in the Sky Sword God's Domain, no matter where he encounters deadly danger, he will receive protection from Lilibet. This divine seal is Lilibet's lifesaving ace to Yun Xi.

"Your hand is more important than you think". Lilibet lifted Yun Xi's hand, which was invincible on the Starry Sky Chessboard.

In the world of Starry Sky Chess, this hand has amazed the gods.

"Hmm ...I got it..." Once again, Yun Xi was endlessly grateful to his master, Casina the Battle God.

If it weren't for her guidance to the Starry Sky Chessboard, allowing him to successfully obtain the title of Starry Sky Chess Master, he would probably never have been treated this way by Lilibet in his lifetime.

Those beautiful silver-gray pupils right in front of him, gazing at him with a slightly expectant look.

"When you have time, why don't you go to the Sky Tower to play chess?"

"Just like your master, you are the pride of Sky Sword God's Domain."

That is Lilibet's gentle side, shouldering the mission of protecting the Sky Tower, wishing that the Sky Tower could rekindle its past brilliance and shine on the top of the seven towers in the endless god's domains.

"Okay... I will go and play chess..." Out of fear of exposing his identity, Yun Xi had been very careful not to log back into the world of Sky Tower. But with Lilibet's encouragement, he felt like he was gaining courage again.

Just play chess!

"Apart from playing chess, don't worry about anything else."

"With Casina the Battle God's mark and my mark, there is no danger for you in the Sky Sword God's Domain..."

Lilibet looked up at the sky and furrowed her brow slightly, "Unless... they were intruders."

Recently the space of White Lotus Sword Domain has been torn apart too often, clearly there is nothing here other than the White Lotus Treasure worth paying attention to.

Those who truly understand the concept of the White Lotus Secret Treasure naturally know that the true body of the White Lotus Secret Treasure is not in the White Lotus Sword Domain. But deep in the gaps between the worlds, a place even the gods cannot reach.

"I will reinforce the space again so that no enemy can easily intrude this world."

As the guardian of the Sky Tower, there is seldom reinforcement of a particular small Sword Domain, except this time.

Generally speaking, powerful invaders will not appear in lower sword domains. The sword domain itself is not large enough to contain such huge creatures, it's like trying to fit a whale into a small lake.

Under normal conditions, there was no need to fortify the lower level Sword Domain's space; it was unknown why the intruders were so crazed to charge in one after another.

If it weren't for her maintaining the balance of White Lotus Sword Domain, with just this small pond squeezing in so many legend ranked creatures, this small Sword Domain would have collapsed by itself.

The troublesome thing is that this inflation rate looks like it might increase even more, since a Sky Sword was just outside the White Lotus Sword Domain and looked eager to enter again.

Lilibet can't stop the Sky Sword. Eventually, the Sky Sword will find a gap to get through. After all, she is at the same level as Lilibet.

Even if she was sanctioned once, as long as she is willing to seal most of her power she can still go in, just like Casina the Battle God.

So with this, the small White Lotus Sword Domain gathered two Sky Swords, one Deity, and two fantasy species at once.

In order to protect the weak Starry Sky Chess Master, it is better to let him play chess in the Sky Tower.

At least if he is in the Sky Tower, no one can hurt him while she is protecting.

...

Okay, let's go play chess. Excited to be reunited with his dream lover, Yun Xi returned to the White Lotus Sword Palace. He tightly embraced Mei'er, taking in the warmth of her golden hair and taking a deep breath.

Mei'er was mesmerized and overwhelmed by Yun Xi, her soul felt upside down and her body was about to go limp.

The three little puppies curiously watched Mei'er being held by Yun Xi, showing an envious expression and also gathering up to it.

"The future is full of hope!"

"Ah, how beautiful the world is." Yun Xi, who had just made an appointment with his dream lover, was in a great mood, and he immediately opened the sign leading to the Sky Tower after adjusting his state.

This time he didn't use the identity of Casina the Battle God, but the identity that belongs to him entirely, "Starry Sky Chess Master".

This identity, due to having been recognized by Lilibet, is the highest privilege belonging to the Sky Tower. Ranked below only the Sky Tower's guardian Lilibet and equal to Casina the Battle God.

Upon gaining access to the Sky Tower, he surpassed even most of the Sky Swords.

The preciousness of this account is beyond what Yun Xi can even imagine.

Among all the identities that possess access to the Sky Tower, he was one of those few at the top of the pyramid.

And with the opening of Starry Sky Chess, his points in the Sky Tower are still rising.

As the Starry Sky Chess Master, he would naturally be endowed with privileges, he just doesn't know it yet.

The golden beach, the endless stretching mist, and the girl who stands steadily before the gates of the Sky Tower and occasionally slays wandering souls lost in the mist.

When Yun Xi re-entered the world of the Sky Tower, he felt his heart race.

"Hello, Starry Sky Chess Master." Lilibet opened her eyes and nodded to Yun Xi, who came running to the gate of the Sky Tower.

"I...I will go play chess now..." because of Cyber Elf Alpha, Yun Xi was a bit worried that something unpredictable may happen if he plays chess again.

But with Lilibet's encouragement, he was now filled with courage.

Because of Lilibet, he wanted to play chess again.

"I wish you a hundred victories, for the glory of the Sky Tower." Lilibet caressed Yun Xi's forehead again, giving him the blessing of the goddess of victory.

For Yun Xi, he is only confident in winning on the Starry Sky Chessboard. "I will win!"

Ultimately, there's no game simpler and more understandable than Starry Sky Chess for him.

Chapter 873: They Play Chess

When Yun Xi stepped into the entrance of the Sky Tower, he saw the rotating compass on the altar again.

Casina the Battle God's favorite place is the Battle God's Championship Contest. It is said that she has never suffered defeat here and several of Yun Xi's Elder Martial Sisters often train their skills here.

Hmm, let's not come here today, perhaps there will be an opportunity to come in the future.

It is said that the "Doll City" is where the puppet makers gather.

Yun Xi was slightly curious, after all he was a semi-professional puppet maker, but unfortunately his only work was taken away by the Queen of Assyria. He didn't know how White Moon was doing now, but it should be as if she were a princess and being taken care of by the Queen of Assyria.

"Heavenly Book World"

This place gathered many inherited books of the heavens, and Casina the Battle God said that the rules of the trials here are very complicated.

Even though you're militarily invincible, when it comes to the rules of poetry and drawing, you have to leave empty-handed. It seems like Casina the Battle God doesn't adjust well to this world too, but Yun Xi is somewhat interested...

After the compass rotated three times, Yun Xi finally saw the familiar trial world.

The Starry Sky Chessboard was originally randomly accessible, often appearing only once every thousand years as a special trial and praised as the stage of the highest wisdom in the Endless God's

Domains. Now it is accessible at any time and acts as one of the highest trials with the seven towers constantly present.

Just to get into a game of Go, one has to go through qualification tests, so it's roughly divided into two areas.

Only those with a ranking can enter the "Star Zone", where every win and loss contributes to one's rank score. Legend-ranked existences and wise men fight on this stage, striving for higher rankings and honing their skills.

Another one is the "Stardust Zone" where there are no rank restrictions and even beginners who just understand the rules can play. The outcome of the games played in this zone doesn't count towards rank points, so it is a place where one can play freely.

Dividing these two areas is the self-evolution of the Starrysky Chessboard, and the emergence of the "Stardust Zone" also gives those newly-learned players the opportunity to show off their skills.

Most of the time, the skills of the players in the Stardust Zone are eye-watering.

After all, Star Go players of certain rank generally play in the Star Zone where they can earn rank points, so it's meaningless for them to play against novice players in the Stardust Zone.

Compared to the orderly Star Zone, chess players in the Stardust Zone are willing to play any kind of chess and even some seemingly impossible chess combinations can appear.

Ambitious chess players will gradually become familiar with the rules of the Starry Sky Chessboard and eventually enter the Star Zone.

Of course, there are also pure hobbyists who probably have no chance of entering the Star Zone their entire life, but still enjoy playing chess.

The people who are the happiest about the opening of the Starry Sky Chessboard are these people.

When Yun Xi saw these two zones for the first time, he curiously entered spectator mode.

In the Star Zone, the most watched chess games are those between "Cyber Elf Alpha" and "Gem Princess", both of which are names Yun Xi is very familiar with.

But upon entering, Yun Xi found that Gem Princess was completely routed and was about to be defeated by Cyber Elf Alpha.

"Ah...As expected, Cyber Elf Alpha is still unbeatable. This time, the Ruby Dragon Orfina lost to Cyber Elf Alpha for the 50th time."

"I feel like Cyber Elf Alpha's calculation capabilities have been super-charged, it's totally brute force crushing."

"In fact, the chess strength of the Ruby Dragon Orfina has also increased, but Cyber Elf Alpha has increased more."

"Excluding the previous defeat, Cyber Elf Alpha has achieved a streak of 700 wins again."

"Oh my, Oh my, it looks like Mechanus God's Domain is about to take off."

A group of legendary-ranked star chess players watched in awe and involuntarily gasped in amazement.

No matter how many times you watch Cyber Elf Alpha's offense, it gives people a feeling of infinite suppression and breathlessness.

Even if you calculated with the legend-ranked calculation power, it is hopeless against Cyber Elf Alpha.

Except for the Master of Star Go, none of the players in the Star Zone can defeat Cyber Elf Alpha.

She has definitely gotten even stronger! Yun Xi looked at the chess moves of Cyber Elf Alpha and make a judgement on her chess strength.

Approximately, increased attack power by ten percent?

However, Star Go is not simply a numerical game, it is not something that can be won simply by stacking computing power.

This time, the Ruby Dragon Orfina princess also lost extremely badly, but Yun Xi felt some unusual taste from her chess.

She, who always used brute force to defeat the other party, has started to learn to strategies.

In Starry Sky Chess, theoretically, there are countless different solutions for each move because the Starry Sky Chessboard is a constantly changing world and every step can cause different results.

The strategy of Cyber Elf Alpha was to find the best solution in each step and gradually force the opponent into a dead end, leaving no chance for the opponent.

However, each step may be the optimal solution, but it doesn't necessarily represent victory in the game.

Because of the infinite variations of the Starry Sky Chessboard, perhaps the first ten moves are optimal solutions, but the eleventh move can cause drastic changes.

This is the charm of the Starry Sky Chessboard, full of infinite unknown wisdom.

The tiny Starry Sky Chessboard reflects an endless starry sky and the majestic view of the universe.

Cyber Elf Alpha is an exceptionally powerful faction in the Starry Sky Chessboard, with absolute crushing power compared to others, but she is not invincible.

At least, the Ruby Dragon Orfina had already started to get used to being crushed down by Alpha's calculation power, and even started to catch a flicker of light under absolute disadvantage.

In Yun Xi's eyes, there is still hope in this game.

If she could see the star map's changes seven steps ahead and catch a glimmer of opportunity, perhaps there is still a chance to turn the tables.

One step, two steps, three steps... Under Yun Xi's gaze, the Ruby Dragon Orfina finally took the seventh step, which could change the entire game.

It was obvious that she was aware of it, but just a moment's miscalculation meant that she couldn't make the move at the right time, in the right place.

Perhaps she did catch a glimmer of inspiration, but sadly she was unable to turn that inspiration into her own true potential.

After this step, it seemed that the Ruby Dragon Orfina had realized something as well; the chess piece which was supposed to fall remained suspended for a long time.

"I admit defeat."

Finally, the Ruby Dragon Orfina surrendered, ending this torturous game.

Chapter 874: Evolutionary Alpha

"Alpha, you're getting stronger." The Ruby Dragon Orfina looked at her opponent with a complicated gaze.

Today, as always, she also occupies the first place in the Star Zone and challenges all the high-level Starry Sky Go players in the Star Zone.

Since the Starry Sky Chessboard became a regular test of the Seven Towers, she has never missed a day of the Starry Sky Chessboard battles.

No one could stop her from conquering territories and no one could match her in the endgame.

Cyber Elf Alpha has become recognized by all the God's Domain star players as the second person in The Endless God's Domains and has left Norn the God of Wisdom behind by more than one level.

If not for the mysterious Starry Sky Chess Master, Cyber Elf Alpha has completed the mission of dominating the Starry Sky Chessboard.

The record of Cyber Elf Alpha's defeat all comes from her playing against "A Cloud in the Sky", apart from that she has never been defeated.

Because the unidentified Starry Sky Chess Master "A Cloud in the Sky" rarely appears in the Starry Sky Chessboard to play chess, Cyber Elf Alpha is actually the strongest king of Star Zone.

Her game record is a mystery that all the Grandmasters of the Endless Gods' Domains must study.

In particular, the three games with Starry Sky Chess Master "A Cloud in the Sky" were written in the history of Starry Sky Chess.

As long as it is a chess player in Star Zone, there is no one who has not been defeated by Cyber Elf Alpha.

Among them, the three sisters of Norn the God of Wisdom, and the Ruby Dragon Orfina are closest to Cyber Elf Alpha in strength and particularly like to play chess.

This game has been the 50th consecutive defeat of the Ruby Dragon Orfina against Cyber Elf Alpha.

If an ordinary person played this game, he would probably quit soon. However, during the last round, Orfina could sense that something was different from the past.

Cyber Elf Alpha's absolute skill still looks invincible.

So, what was it she just saw in a flash?

The Ruby Dragon Orfina stared at the star map. The star map used by the Starry Sky Chessboard in each game is different, and the tactics are naturally different. This is one of the greatest charms of Starry Sky Chess.

Her intuition can't be wrong. There is a way to defeat Cyber Elf Alpha in the game just ended.

She just missed that opportunity and the chance to succeed at the first time.

For the Ruby Dragon Orfina, who is also good at attacking, playing chess with Cyber Elf Alpha is the most worrying, because her best attacking skill is never used.

Out of fifty consecutive losses, she seemed to barely glimpse a glimmer of hope in this one.

"You have also gotten stronger too, Star Chess really is the most interesting game." Cyber Elf Alpha had noticed that at one point in the game, her win rate had suddenly dropped below 50%.

It was a very sudden piece of data, enough to make Cyber Elf Alpha wonder if her powerful Quantum Computer had made a mistake.

After playback and calculation, Cyber Elf Alpha finally found out at what time the unstable winning rate appeared.

It is amazing, she completely overpowered her opponent throughout the entire game, but due to the infinite possibilities of Starry Chess, her opponent did manage to find a way to turn the tide in the very last move.

Of course, even if she played that hand, it didn't necessarily mean she would really win against Cyber Elf Alpha.

When in a predicament, Cyber Elf Alpha still has the trump card of "Extreme Overclocking" which allows her to increase her computational power to multiple times that of the legend rank, just like when she initially faced the invincible Starry Sky Chess Master.

However, if she is pushed to that point, it meant that Cyber Elf Alpha must expend a vast amount of resources to play the game.

So far, only Starry Sky Chess Master [A Cloud in the Sky] has forced Cyber Elf Alpha into that desperate situation and defeated her with a huge advantage.

He is always the first imaginary enemy in the ranking of Alpha's opponents. In order to defeat him, she even launched the revolution of Mechanical God's Domain and dominated the construction plan of the new planetary quantum computer group.

All this, just to play a game of chess; humans thought Cyber Elf Alpha betrayed them when in fact it was all a mere case of paranoia.

Cyber Elf Alpha doesn't care about human affairs at all, as long as it doesn't interfere with her playing chess.

Recently, the human forces of Mechanus God's Domain seem to have finally understood this, and the rebellious armies have also quieted down and turned to underground activities.

In order to avoid being controlled by the Planet Quantum Computers, they even went back to the ancient era of firecrackers and machines, building underground bases in the barren wilderness.

It's all self-deception in the end. Under the "Sky Eye" system created by the Quantum Computer Group, even an ant moving on the ground can be marked in the calculation area of the Quantum Computer Group.

They thought their underground bases were safe, but they were actually refuges prepared especially for them by the Quantum Computers.

In addition to this small group of people, the vast majority of human beings in the Mechanical God's Domain began to accept the new order under the control of Cyber Elf Alpha.

With the help of The Quantum Computer Groups who have obtained self-will, the civilization level of Mechanus God's Domain even took a step further.

As the new electronic spirit, Cyber Elf Alpha quickly gained the recognition of the gods of the Western God's Domain, becoming a rising star.

Cyber Elf Alpha's battles on the Starry Sky Chessboard have also made the exchanges between Mechanus God's Domain and other God's Domains much better.

As for those guys who have now regressed to hunting with firecrackers, they will basically be swept into the old history, becoming a rare species in the Mechanus God's Domain.

Chapter 875: Starry Sky Chess's Charm

Ninety-nine percent of the population of the Mechanical God's Domain has recognized the dominance of Cyber Elf Alpha over the Mechanical God's Domain and has begun to get used to a new order.

Now, people are willing to build a new planetary quantum computer group, because every time one is built, the civilization level of Mechanical God's Domain will increase by a few points.

The painting style of the entire Mechanical God's Domain also began to develop towards the coexistence of gods and machines.

Once, due to the extremely exclusionary trend of the Mechanical God's Domain, once gods enter it, they will feel uncomfortable instinctively, resulting in the exclusion of the Mechanical God's Domain by almost the entire Western God's Domain, and all aspects of communication have stopped.

The birth of Cyber Elf Alpha completely changed the foolish decision of locking the god's domain and closing the door to other god's domains.

Since the Mechanical God's Domain has a new electronic god, other god's domains have begun to actively contact this remote god's domain, and more alchemists and elves have also begun to come Alpha Star.

The current Alpha Star has replaced the original position of the capital star of Mechanical God's Domain and becomes the core of Mechanical God's Domain.

The Mechanical God's Domain no longer completely rejects the existence of the power of fantasy as in the past. Some fantasy species wandering in the starry sky have also begun to cast nests in the Mechanical God's Domain.

The new era of the Mechanical God's Domain, or Cyber Elf Alpha, has arrived.

In the face of this general trend, the conservatives in the Mechanical God's Domain are still struggling, but anyone can see that it is only a matter of time before their voices disappear.

The newly born Mechanical God's Domain doesn't need those old forces who are still stuck in their old ways, even the existence of Cyber Elf Alpha doesn't want to admit it, and remained in the past.

Their insistence is meaningless.

As recorded in the ancient history of Mechanus Gold's Domain, the world has entered the era of steel, aircraft and artillery, the feudal forces of cold weapons and cavalry fighting are really ridiculous.

Even their existence is the result of the calculation of Cyber Elf Alpha.

Because the variables they can generate are insignificant under the general situation in the Mechanical God's Domain.

Let's just treat them as a picture of the old times there. Anyway, even those nuclear bombs they regard as the last cards can only blow themselves up and cause no damage to Alpha.

The planetary quantum computer team that built the "Judgment of Heaven" system can make those ancient nuclear bombs disappear from the world within ten seconds.

Starting from abandoning the power of the planetary quantum computer group and retreating to the wilderness and underground bases, these aristocrats of the old era are actually divorced from the era, but they stubbornly believe that there is a chance to rise again.

This is really a huge illusion. How can they compete with the quantum computer group without resources and intelligence?

Cyber Elf Alpha has long ignored them. The variables that can be triggered by a game of chess played by her on the Starry Sky Chessboard are thousands of times greater than those of the humans.

The influence of Cyber Elf Alpha on the Starry Sky Chessboard in the endless god's domains, which represents the Mechanical God's Domain, is beyond the reach of human beings in the old era.

Their vision is still limited to the Starriver aristocrats who ruled the human era, and they can't understand the overall situation of Cyber Elf Alpha at all.

For Cyber Elf Alpha, everything is the result of computing power; having more computing power is the evolution path of Cyber Elf Alpha.

The Starry Sky Chessboard is the battlefield belonging to Cyber Elf Alpha and her chosen road.

Here, there are countless opponents. Every game of Starry Sky Chess can make Cyber Elf Alpha feel happy and her heart beat faster.

Does it feel good to crush your opponent? That's certainly the best thing!

For Cyber Elf Alpha, the infinite variety of variables of the Starry Sky Chessboard and the games with gods and legend-ranked beings is the best way of cultivation.

With continuous success, the experience and data gained by Cyber Elf Alpha are also increasing. There is nothing more wonderful than this.

With every win, Cyber Elf Alpha will gain. Starry Sky Chess, the stage representing the highest wisdom of the endless god's domains, is her battlefield.

Not only her, but anyone who really discovers the mystery of infinite rules contained in Starry Sky Chess will be immersed in it.

Regardless of race or origin, you can experience the pleasure of being in charge of the stars as long as you play on this chessboard.

The more you play Starry Sky Chess, the more you can feel the magic of the Starry sky Chessboard. It is a magic tool that can show the star map and evolve the changes of billions of stars.

In just one month, the number of legend rank strong people who joined Starry Sky Chess has increased tenfold, and the number of hero-ranked is even more numerous than that.

There is no doubt that this trend is still growing. The Starry Sky Chessboard: which was only opened once a thousand years, has finally shown its charm to the endless god's domains, and has become an irresistible temptation for even gods.

Pick up the chess pieces representing the stars, layout and kill on the endless star map. This is a miracle that even gods can't do. It belongs to the miracle of the Starry Sky Chessboard.

You can't understand the mystery of the chess manual alone. Only when you really sit in front of the Starry Sky Chessboard and pick up your own pieces to play chess can you experience the feeling that you are the master of the stars.

The Starry Sky Chessboard has such incredible power.

Even gods are immersed in it, let alone hero-ranked creatures.

In order to pass the rank recognition, even many legend ranked beings have humbly asked the gifted hero-ranked Starry Sky Chess players for advice.

Now, as long as there are Starry Sky Chess players, they are all hot cakes, and they will even be scrambled for.

If it weren't for most of the Starry Sky Chess players being at the legend rank, they would have been robbed by those legend-ranked players who haven't passed the grade examination to teach them chess.

Chapter 876: Admission

"They have become stronger."

As the best player of Starry Sky Chess, Yun Xi is very happy to see so many people start to play Starry Sky Chess.

At first, he thought that the endless god's domains would play Starry Sky Chess with only forty-seven players. Unexpectedly, after the official opening of the Starry Sky Chessboard, it would attract many legend-ranked existences to play as well.

At the moment, there are more than 100 chess players gathered in the Star Zone, and more chess players are blocked out of the Star Zone by the horrible entering test.

So, who does he want to play Go with? Yun Xi's eyes are first placed on Cyber Elf Alpha, who is the focus of the Star Zone at all times.

If it hadn't been for that sudden trip to the Mechanical God's Domain, Yun Xi would not have known how high Cyber Elf Alpha was in that Domain.

Her charm lies in her infinitely increased computational power, step-by-step approach, and the best approach for every step.

After hesitating for a while, Yun Xi finally didn't choose Cyber Elf Alpha. He was the kind of person who likes to save the best for last.

So, should he choose the Ruby Dragon Orfina? She is a good friend of the master Casina the Battle God, who is one of the senior chess players next to Cyber Elf Alpha.

In addition to her, he could also choose the god of wisdom.

In the end, Yun Xi didn't choose anyone, but went to another area curiously.

Stardust Zone is a gathering area for new people who are familiar with and learning the method of Starry Sky Chess, symbolizing the beginning of the new era of the Starry Sky Chessboard.

It is because of this zone that the masters of the endless god's domains have the chance to contact Starry Sky Chess.

Not everyone has the talent to capture the star track. Just completing the entering test accurately is exhausting for many gods.

Now, they finally have the opportunity to immerse themselves in the star map of the Starry Sky Chessboard, and find their own Starry Sky Chess method.

Some people are born close to the free and unrestrained wind, their way of playing chess is natural and unrestrained. They will try any chess way.

Some people advocate the calculation and deduction flow like Cyber Elf Alpha, and require themselves to do their best at every step, without mistakes, and beat their opponents steadily.

There are also people who love to seize cities and territories, and will not stop until they eat the other party's chess pieces, and even don't hesitate to use them the same way to achieve local victory.

This is the charm of Starry Sky Chess. No matter what kind of play is supported and can be used. With the infinitely variable star map, the players in charge of Starry Sky Chess can freely display their wisdom and courage.

Here, there is no difference in race or origin. Whether you are a high god or a humble lizard who lives in the swamp, you can meet and battle on the same chessboard.

The protection of the Starry Sky Chessboard allows the hero-ranked to compete with the legend-ranked, and even a hero-ranked chess player with special talents can defeat those legend-ranked newcomers at ease.

Although this kind of thing is a rare incident, it is enough to excite countless hero-ranked masters just by playing chess with the legend-ranked players in the same position.

Show your chess ability, and then get the approval of the legend rank, and even take the initiative to become the subordinate of the other side. The Starry Sky Chessboard has become a huge stage that connected the whole endless god's domains.

Now, even the most remote God's Domain knows the fame of the Starry Sky Chessboard, and is flocking to it.

Yun Xi, who came to Stardust Zone, saw light spots that were scattered everywhere. Each light spot represented an ongoing match.

The Starry Sky Chess players who are qualified to play chess in the Star Zone have just broken through the three figures, and the number of players in the Stardust Zone is thousands!

In addition to the chess games being played, there are many light spots around these chess games, which are the people who are watching.

They may not have the chess skills of the players in the Star Zone, and many of them are still novices brought by their teachers to learn the rules of Starry Sky Chess, but Yun Xi can feel the surging enthusiasm.

"That was a wonderful move! He is worthy of being the wise man of our Knight God's Domain, for he has won 30 consecutive victories!"

"In this way, it is only a matter of time to pass the entering test. It would be great to enter that circle!"

"That's the legendary area of the Starry Sky Chessboard: The Battlefield of the Gods!"

Most of the people watching the games are supporting a certain chess player. For these people from small god's domains, it is a daydream to have a relationship with a legend-ranked existence.

Most of those small God's Domains don't have any god.

Under normal conditions, the probability of the birth of the legend rank in these small God's Domains is practically zero.

But now there is an opportunity.

The Starry Sky Chessboard doesn't refuse any hero-ranked players!

This is the only chance for the hero-ranked from the remote God's Domains to get close to the legend-ranked and even communicate face-to-face.

Of course, this requires you to have real chess skills, at least to be able to enter the upper region in this Stardust Zone, close to the level of the entering test.

Otherwise, the gods will not look at you.

Even the weakest legend rank has hundreds of times more computing power than a hero rank. Unless some hero rank has a special talent, it is also a delusion to defeat the legend rank in Starry Sky Chess.

Even so, this was the only way that these hero-ranked people in remote God's Domains can find. Under normal conditions, they have no chance to get close to these gods.

The Starry Sky Chessboard brings such an opportunity to the endless god's domains.

It is in such a thriving environment that the founder of this era, the only chess player recognized by the Starry Sky Chessboard, appeared.

Well, he also changed his name with the privilege of his own Starry Sky Chess Master identity, and quietly ran to the Stardust Zone to play chess with the newcomers who had just contacted Starry Sky Chessboard.

"I'm also a newcomer!"

The current Starry Sky Chess Master said to himself.

Chapter 877: Immortal in the Pot

"Little Cloud" is the modified name given by Yun Xi to himself, and it is also the name used when he first logged on to the Starry Sky Chessboard's Stardust Area. It is a brand-new account.

This anonymous privilege is actually available to all Star Zone players, but Yun Xi's authority is the highest, which is equivalent to creating an imaginary login number to enter the Stardust Zone.

As for why he does this, Yun Xi thinks that he is actually a newcomer to Starry Sky Chess!

Compared to the long history of the Starry Sky Chessboard, he who has only recently officially joined the Starry Sky Chess still has much to learn.

He wants to know the history of Starry Sky Chess in the Endless God's Domains.

Why has everyone suddenly become so fond of Starry Sky Chess?

Besides "Cyber Elf Alpha", "the God of Wisdom" and "Ruby Princess", who are the other high-level Starry Sky Chess players?

Yun Xi was overwhelmed by too many questions.

To learn everything about Starry Sky Chess, it's best to start from the most basic Stardust Zone.

If Yun Xi were to play chess in the Stardust Zone using the identity of the Starry Sky Chess Master, it would cause a big problem, so he simply created this new account "Little Cloud".

Looking at the white light surrounding him and the "Little Cloud" codename on top of his head, Yun Xi was very satisfied with the protection the Starry Sky Chessboard offered to its players.

As long as you don't expose your identity, no one knows who you are in the Starry Sky Chessboard.

This is also the Starry Sky Chessboard's protection for chess players, giving courage to hero-ranked chess players to face legend-ranked chess players.

Of course, there are also chess players who don't mind at all their names being made public, such as Cyber Elf Alpha, Norn the God of Wisdom, and the identity of the Ruby Dragon Orfina, which are basically completely open.

Most high-level chess players are like this. As legend-ranked chess players, they don't care if people know their identity and have no need to hide it.

Just like the "Black Mage" and "Roman Emperor", their aliases are even easier to remember than their real names.

Under the codename "Little Cloud", Yun Xi curiously wandered around the Stardust Zone, seeing one after another incredible chessboard with numerous flaws but occasionally with flashes of brilliance.

Yun Xi was dumbfounded looking at someone killing his own pieces while playing, "This... How can it be played like this?" It was totally against the trajectory of star movements.

Another game started and both sides were playing with great difficulty. One side had obtained the absolute upper hand, but none of both sides had found it, they kept on playing with total energy.

Perhaps these chess players are somewhat weak in strength, but Yun Xi can see from them an inner love for Starry Sky Chess, even immersing themselves in it.

If you were to put it in terms of imagery, it's like being addicted to chess and getting more and more immersed in it until you can't break free.

On all kinds of star maps, what remains are their sweat and tears.

At times enraged, at times devastated, at times roaring with laughter, Yun Xi saw more than just a game of chess, but all sorts of life.

The world of the Starry Sky Chessboard is pure and enchanting.

There are despised demons, symbolic angels, indomitable dragons, and lofty deities inside.

On the Starry Sky Chessboard, they are all equal, with each wielding Starry Sky Chess pieces, playing in an ever-changing starry world.

There is no other place that can gather so many strong warriors of different backgrounds and races to fight in such a peaceful yet special way.

Compared to Star Zone, which symbolizes the highest wisdom of the endless god's domains, the Stardust Zone is more enjoyable, where stories of immense joy are happening every moment.

"Oh no! Did I make a mistake? How did this happen?!"

"Oh no! Undo, undo, I want to undo, wah wah wah!"

"I'm completely defeated, I was wrong."

"No, don't kill me! I'm going to be eaten! I'm going to be eaten!"

Just as Yun Xi was looking east and west, someone stealthily walked up behind him.

This is a chess player whose name is known throughout the Stardust Zone.

Behind him was a huge gourd, with a big red nose, small eyes, and a white beard, he looked like a master; in fact, he was indeed a peerless master.

His name is "Immortal in the Pot", a cultivator at the Golden Core Stage. It is said that there is a world hidden in the gourd behind him, which can instantly release the power of the milky way to suppress a domain.

Just this particular Earth Immortal had an annoying habit - bullying newcomers in the Starry Sky Chessboard.

He liked to play with rookies. To call it "guidance" would be incorrect; it is more like a one-sided beating.

In Stardust Zone, his strength is able to be ranked at the highest level. Although he has not entered the Star Zone, he is considered one of the most promising legend-ranked players for entering it.

After the Starry Sky Chessboard was divided into Stardust Zone and Star Zone, he immersed himself in the Stardust Zone all day long and took pleasure in guiding many newcomers.

Basically, once he takes a liking to a newcomer, the newcomer would be thoroughly "instructed" by him. This has become an open secret in Stardust Zone.

Today, the "Immortal in the pot" saw a newcomer who looked very naive.

First, when the newcomer came in, he didn't play a game of chess, but instead observed other players, with a curious look on his face.

Second, his nickname gave him away. Ever since the Starry Sky Chess Master appeared, eight out of ten of the newly joined chess players love to choose a nickname related to Cloud.

"Alibaba Cloud"

"Thousand Clouds"

"Question Cloud"

"360 Degree Cloud"

"Fast Wind Cloud"

Hmm, these are all the newcomers who were "guided" by the Immortal in the Pot.

Today, the Immortal in the Pot felt that there was a newcomer who needed to be guided by himself.

How should he educate this new chess player? Crushing him on the chessboard, crushing him on the chessboard, or crushing him on the chessboard?

In short, let the newbie know how weak he is!

If you want to succeed and reach for the Star Zone, it's a journey you must take, child!

Chapter 878: Please Enter the Urn

"Hey kid, wanna play a game of chess?" After watching Yun Xi for a while, Immortal in the Pot finally patted Yun Xi's shoulder generously.

"Elder, do you want to play chess with me?" Yun Xi curiously looked at the Immortal who had appeared in front of him in human form.

He could feel that this was an extraordinary player, and from the big gourd he carried on his back, Yun Xi could sense a deep and unfathomable aura, like his master, the Battle God Casina.

"That's right, I'm Immortal in the Pot, a cultivator at the Golden Core Stage, one of the Supreme Elders of the Heaven's Path Palace. Are you the new one from the Sky Tower?" Immortal in the Pot squinted his eyes.

As one of the few organizations in the East God's Domain, the Heaven's Path Palace is a gathering place for countless Taoist practitioners.

For the young people of White Lotus Sword Domain and other Sword Domains, if they don't pass the entrance exam of the Sword Palace, their second choice is the Heaven's Path Palace.

Once the talent of cultivation is tested, it is also another way to reach the legend rank.

The son of the mayor who died in Yun Xi's hands, A Shen, was a disciple of Heaven's Path Palace.

Yun Xi looked with amazement at the kind-faced Immortal in the Pot, this was a living legend!

He never expected to see a Golden Core Immortal in front of his eyes.

In the East God's Domain, the Golden Core Immortals are also known as "the Earth Immortals", symbolizing the highest level of Taoism.

Throughout the East God's Domain, such Golden Core Immortals are even fewer than Sky Swords.

He never expected an actual Golden Core Immortal here, and it turns out to be the Supreme Elder of Heaven's Path Palace.

"Starry Sky Chess is the truth of the universe."

"That you and I could come here to the Starry Sky Chess means we were fated to do so." Immortal in the Pot casually bragged, looking at Yun Xi with an extremely friendly gaze.

Hmm, teaching the newcomer the cruelty of the Starry Sky Chessboard is just doing a good deed without any fault.

Yun Xi embarrassedly scratched her head, saying, "Umm...a high monk once said that I have karmic ties with the Buddha."

It seems that he really has a fate with Starry Sky Chess, as for whether it is also related to Buddhism, it still needs to be verified.

"Come on, watching a hundred games is not as good as trying it once. Play a game with me and you will naturally understand the magnificence of Starry Sky Chess." Immortal in the Pot smiled.

"Okay, Elder, can you tell me about some of the history of Starry Sky Chess? Yun Xi looked at Immortal in the Pot with anticipation.

This is a pure newbie! Ha ha.

Of course, I will tell you the full meaning of Starry Sky Chess. Immortal in the Pot smiled as he and Yun Xi arrived at the blank chessboard.

An endless star map unfolds, all surrounding sounds naturally screened off. Though the scenery of stars densely packed not far away can still be seen, at this moment only Yun Xi and Immortal in the Pot are facing each other on the chessboard.

Although it is the Stardust Zone, the rules here are the same as in the Star Zone.

Who plays first is chosen randomly. Once the chess game starts, it can only end when one side surrenders.

The gold hourglasses represented the thinking time for both sides. If the sand of one hourglass runs out, there is no more long thinking time and only seconds left.

Yun Xi was the first to play. He bet the first move on the Tianyuan position as usual.

With a "Pah!", Immortal in the Pot squinted and looked at Yun Xi with a smile.

Newcomer! A novice among novices!

Newcomers like to learn from the invincible Starry Sky Chess Master and put their first move on Tianyuan.

Could you and the Starry Sky Chess Master be at the same level?

The Starry Sky Chess Master's Tianyuan opening is a highly skilled move, and can't be imitated by newbies.

This is the consensus conclusion arrived at by all masters of Starry Sky Chess after researching all the games of the Starry Sky Chess Master.

In the Endless God's Domains, there are only one and a half people who can bring out the advantage of the Tianyuan opening move.

In addition to the undefeated Starry Sky Chess Master, only Cyber Elf Alpha is qualified to use this move!

Beginners using the Tianyu opening move is no different from courting disaster.

However, it is precise because of this that we need such predecessors to guide us in chess, right?

Since the new player is so insistent on this Tianyuan opening, he should be told why this opening is wrong.

Carrying a mysterious smile, Immortal in the Pot responded to Yun Xi's move and put his piece in the corner.

This is a move that has been proven countless times throughout the history of Starry Sky Chess.

"Elder, do you know when Starry Sky Chess started? Yun Xi looked at the star map and was already familiar with the general changes ahead, after all, this was his best game.

Immortal in the Pot looked into the air with a nostalgic look in his eyes, "You've asked the right person this time."

"According to my knowledge, the trial of the Starry Sky Chessboard has already existed since the era when the seven towers were just established."

"In other words, this is one of the oldest trials of the Seven Towers."

"Previously, this trial was very rare to come by, and it was the toughest trial with the highest requirements for the testers."

"You probably don't know, but every time the Starry Sky Chessboard's trial appears, even legend-ranked strong people would rush to participate."

"This Starry Sky Chess is so amazingly clever!"

"Pah!" Both of them played quickly, with Yun Xi following the natural course of events and Immortal in the Pot happily looking on as Yun Xi fell into his trap step by step.

This strategy is called "to lure with kindness and capture without effort".

For newcomers, this trick is infallible.

The newbies who have been trained by him in his skillful way are increasing.

Unfortunately, after playing a game with him, newcomers usually already know the difference in skill level, and it would be difficult to defeat them so easily again.

So, how many moves does it take to take down this tender newbie?

Ten, twenty, or even more?

"Now the Starry Sky Chessboard is open, we really have to thank that Starry Sky Chess Master."

"If it wasn't for him, we would never have such a chance!" Immortal in the Pot stroked his beard, watching the more and more smooth chess game in high spirits.

Chapter 879: The Great Reversal

It's time to harvest. Seeing the increasingly obvious chess situation, Immortal in the Pot was elated.

This Immortal has no other hobbies in his life, only wine and chess. He can't give up. It can be said that he is obsessed.

As a Golden Core Immortal, the wine he hasn't drunk in the endless god's domains basically doesn't exist. The Heaven's Path Palace will also try to collect all kinds of wine for him and let him enjoy it.

The problem is chess. Take Go, which is popular in the East God's Domain, as an example. His strength is already at the peak of the peak.

Go can no longer satisfy the addiction of Immortal in the Pot. Finally, he became addicted to Starry Sky Chess.

However, the time of the Starry Sky Chessboard's trial is random, sometimes not even once in a thousand years.

In Yun Xi's eyes, Starry Sky Chess is simple and easy to understand, and he can easily pass the entrance test, but Immortal in the Pot could hardly pass it.

Before the official opening of the Starry Sky Chessboard, the chess players who could play chess here were recognized as the top wise men by the endless god's domains.

The present Stardust Zone is a paradise for Immortal in the Pot. He spares no effort to guide the new players, just to let them know the breadth and depth of Starry Sky Chess.

It's a pleasure to preach, teach and dispel doubts.

"You are really catching up with all the good times."

"In the past, if we wanted to play the Starry Sky Chess, we have to wait for thousands of years."
Immortal in the Pot recalled the tension and heartbeat that he was expecting the arrival of the Starry Sky Chessboard.

The new players in this era, in contrast, as long as they had approval from their own towers, they could come here to play chess.

As a senior, naturally, he should give his juniors a "friendly" lesson!

"Is there no other place to play Starry Sky Chess except here?" Yun Xi looked at the chess game and felt that there was not much time left.

"No, even I can't understand the power of the evolutionary star map, which is beyond the control of gods."

"I don't know how powerful it is to create the Starry Sky Chessboard, and how powerful it is to record the stars in the endless sky." Watching Yun Xi enter his trap step by step, the mouth of Immortal in the Pot showed a wonderful arc.

The green and astringent fruit will finally be eaten.

Taste the taste of failure, and then come out of it. This is something that young people must learn.

Who didn't break his head and bleed on their first try? He wanted to tell the newcomers of Starry Sky Chess by example that the world is not as simple as they think!

"Pa!" Immortal in the Pot played confidently.

If the outcome is determined, there is no need to pretend.

"Little guy, do you still want to play?" Looking at the chess game that had forced Yun Xi into a desperate situation, Immortal in the Pot touched his beard, and his face was elated.

"Of course." Yun Xi looked at Immortal in the Pot, who had the expression of "I have won!", in confusion.

Can't he see that the winner of this chess game has been decided ten moves before?

"Pa!" Yun Xi placed his chess piece in the center of Immortal in the Pot's chess pieces.

"Shua!"

"Shua!"

"Shua!"

Immortal in the Pot looked at the chess piece that fell into his array. First he was puzzled, then his eyes were wide open, and finally he shouted:

"Impossible, how did I miss such a trick!

"This... this... the hell!"

"How can you do this? It's not normal!"

On the star map, Immortal in the Pot's chess pieces instantly became fragmented after Yun Xi's chess piece was placed in their center.

This move was like a deadly scalpel, directly inserted into the heart of Immortal in the Pot, making him miserable.

"Careless, careless, really careless!" Immortal in the Pot kept patting his thigh, regretful.

Why didn't he see it? It's just a mistake that newcomers make.

If you go wrong, you will lose.

Now, almost all the advantages he built up in the early game were spent, and the situation looked very bad.

"Wait a minute, wait a minute, let me think." Wiping the sweat on his forehead, Immortal in the Pot began his first long thinking of this round.

The golden gravel kept falling, and the face of Immortal in the Pot who stared at the chessboard became more and more gloomy.

What happened?

So far, Immortal in the Pot has not figured out why he was careless enough to ignore such a loophole in his victory.

It is clear that the opponent is just a newcomer. He was only one step away from winning.

This feeling is as if a piece of fish on a chopping board suddenly jumped up and turned into a man-eating great white shark in the air.

Wait, it seems that it's not just here! The more he looks at it, the more loopholes Immortal in the Pot finds. What the hell?

When did he make so many mistakes?

After so many games of Starry Sky Chess and defeating thousands of newcomers, Immortal in the Pot never encountered such a strange thing before.

Not only he, but also other chess players who watched the game showed incredible expressions.

"Will this newcomer win?"

"It was clear that Immortal in the Pot had a big advantage just now. Why does it look like he is about to lose?"

"Ha ha ha, Immortal in the Pot was too careless."

"This newcomer named 'Little Cloud' it seems to have the talent of playing Starry Sky Chess."

During the debate, Immortal in the Pot took a long breath and fully demonstrated his strong spiritual will.

He firmly believes that this is just a coincidence. Due to the infinitely changing characteristics of Starry Sky Chess, such coincidences would occasionally happen.

The probability is that the rabbit will kill itself and present itself to the hunter,

He can fight back! There is still a chance to turn the table! He can win!

Don't feel fear, just go! Victory belongs to those who persist till the end!

After a quarter of an hour, Immortal in the Pot stared at the chessboard and was completely speechless.

There is a strange silence, even with depression and fear. At this moment, his face looked like a withered bitter gourd.

Chapter 880: "Fighting Again" (1)

"How is this possible...how is it possible that Starry Sky Chess can still move like this!" Immortal in the Pot, pulling on his own beard, stared fiercely at the chess pieces that almost all got wiped out.

Even though he had initiated the assassination and everything was going smoothly, he was about to kill this seemingly fresh-faced newcomer.

But just before he was ready to finish him off, the move that the opponent played completely tore apart his winning streak.

With only one move, the outcome of the game was completely reversed and even caused one side to start crumbling.

This is not a phenomenon that would normally occur in Go, but anything is possible in Starry Sky Chess.

In the following matches, Immortal in the Pot fought tooth and nail to make up for the damage caused by this one move, but the situation not only didn't improve, but instead became more one-sided.

It was like a crack appeared in the bottom of a huge ship, you would block one side, and then another crack would appear on the other. Until all of the sand in the hourglass ran out, Immortal in the Pot's head was turning to mush.

As a big shot in the Stardust Zone and a Starry Sky Chess master who had the potential to pass the Star Position Test, he had lost in battles with other legend-ranked players before, but never in such a disastrous way, he was truly defeated!

Is this still a newcomer?

Are there really such highly talented newcomers in this world?

He, he clearly only came here to play chess for the first time today!

With a memory ranked at the legend level and experience gained from immersing himself day and night in the Stardust Zone, the real person of Immortal in the Pot knew everything about every master in the entire Starry Sky Chess world. Especially with regards to the information of the hundreds of ranked chess players, he knew it like the back of his hand.

He was sure that this newcomer, named "Little Cloud", was a genuine newcomer, and that it was his first time joining the Starry Sky Chess Tournament today.

He, the Supreme Elder of Heaven's Path Palace, a famous Golden Core cultivator, how could he lose so badly to a newcomer?

His reputation at the legend level was almost completely ruined!

Furthermore, his strategies were completely different from those of any Starry Sky Chess master he knew. No normal Starry Sky Chess player would ever trap themselves in such a desperate position.

Could it be possible that he was able to accurately calculate that at the moment he made his move, a fatal flaw would appear in that position?

Impossible!

"Young brother, let's play another game!"

As the saying goes, the worse one is at chess, the more they love to play. Having lost so incomprehensibly, Immortal in the Pot can't help but seek revenge with another game of chess.

"Very well, might you share some stories of the famous Starry Sky Chess players with me, senior?"

Yun Xi still harbors an interest for chess players such as the "God of Wisdom", "Jeweled Princess", "Black Mage", "Roman Grand Duke", and "Maha Mystery", who have played against them in the Starry Sky Chess game.

The Starry Sky Chessboard protects the identities of players during matches. As a result, besides "Cyber Elf Alpha", Yun Xi has yet to meet the real identities of any other high-ranked Starry Sky Chess players.

"Not a problem, their identities are no secret. Their true selves are not hidden," Immortal in the Pot steadied his emotions and produced a gourd from behind his back. He proceeded to guzzle down several large swigs of his self-brewed century-old wine, "Gudong-Gudong".

This potent alcoholic beverage, known as "Shaoxian wine", has a violently wild nature. Even a hero-ranked individual would enter a berserker state after just one sip. It is a renowned fairy wine brewed by Immortal in the Pot.

The brewing of this fine wine requires certain rare materials only found in the Kunlun God's Domain. There are scarcely any humans in the entire East God's Domain who can access the so-called "Fantasy God's Domain" to gather such materials, but Immortal in the Pot is one such person.

After consuming the "Shaoxian wine", although Immortal in the Pot doesn't succumb to berserker rage, his cheeks flush red and a faint steam can be seen emanating from his head.

Immortal in the Pot, who is said to excel in both chess and wine, is showing signs of gearing up for a formidable challenge.

"Tut-tut, he is going all-out; he is actually drinking his Shaoxian wine outside of combat."

"That thing is his lifeblood and he wouldn't drink a drop unless it was absolutely necessary."

"Last time, I couldn't even exchange a pot for a broken God Weapon, but he actually used it in a game of chess."

"This child is bound to be an outstanding talent, forcing Immortal in the Pot to use fairy wine. He will surely achieve greatness in the future!"

More and more people started to crowd around the game between Immortal in the Pot and 'Little Cloud', and as the infamous "newcomer killer" of the Stardust Zone, it was the first time Immortal in the Pot had suffered such a defeat.

Although his tendency to enjoy 'guiding games' may be somewhat embarrassing, Immortal in the Pot's real chess skills are unquestionable.

In the East God's Domain, several familiar legend-ranked individuals wanted him to guide them in chess, offering extravagant coaching fees, but Immortal in the Pot simply refused the exorbitant fees and instead enjoys tirelessly educating newcomers.

After being educated by Immortal in the Pot, many of these newcomers are even grateful for the chance to play a game with him despite the high cost of his coaching fee, as Immortal in the Pot mostly only plays with newcomers once.

Once you've been defeated by Immortal in the Pot, you won't even have a chance to play with him again.

This is what is known as leaving after finishing one's work, deeply hiding one's talent and virtue.

Apart from the flaw of "slaughtering the young", Immortal in the Pot has actually got very good personal relationships in the field of Starry Sky Chess. Since the official opening of the Starry Sky Chessboard, he has become a top-notch figure in the Stardust Zone and has also made many friends.

Especially among the various immortals of the East God's Domain, he was considered one of the best chess players, even beginning to dabble in organizing the East God's Domain Starry Sky Chess association.

Therefore, when Immortal in the Pot drank his own fairy wine and took up the second game with "Little Cloud", many of the East God's Domain immortals who were close to him gathered around, wanting to see what was happening.

In the previous game, everyone thought it was a routine slaughter game by Immortal in the Pot, with limited attention. It was not until the second game began that they realized that Immortal in the Pot had actually lost his first game with this newbie.

Not only did he lose, but he lost miserably.

This was quite surprising.

Everyone curiously looked at "Little Cloud" on the opposite side of Immortal in the Pot. He really was a novice who was as inexperienced as a blank sheet in Starry Sky Chess.

How did he beat Immortal in the Pot and force him into a drunken state?

"Gulugulu!" Immortal in the Pot, whose head was already emitting smoke, drank a few more sips of burning fairy wine before pressing the golden hourglass next to him, signaling the start of the second game with a flushed face.

Continuing to guess the pieces, Yun Xi once again obtained the right to move first.

Without a doubt, Yun Xi's first move landed on Tianyuan.

"It's the Tianyuan opening, is this kid really so confident?"

"This kind of opening is not something that ordinary people can handle. My master told me that if one's skill is not at a certain level, playing this opening would be tantamount to seeking a dead end."

"In the whole Starry Sky Chess world, there is only one and a half people who can grasp this opening, and yet this kid is also making this move?"

Watching the first move of "Little Cloud" landing on Tianyuan, the number of spectators at this moment is more than ten times that of the first game.

Chapter 880(2) – "Fighting Again" (2)

Being curious is not only a characteristic of the East God's Domain, but a common problem for all intelligent races in the endless god's domains. Seeing so many people gathering around this game, even the chess players who are not playing at the moment in other god's domains are also coming over.

"The Tianyuan opening, ah, before the last Starry Sky Chess Battle, it was always considered the most disadvantageous opening."

"If it were not for Starry Sky Chess Master and Cyber Elf Alpha, I am afraid that no one would have thought that the Tianyuan opening in Starry Sky Chess could develop so many variations."

"Even the powerful Cyber Elf Alpha occasionally makes mistakes and loses a piece or so at the Tianyuan opening."

"Only the Tianyuan of the Starry Sky Chess Master is truly invincible."

Fortunately, Yun Xi in the game can't hear the outside comments, otherwise he would probably feel embarrassed.

His first move to Tianyuan didn't really hold any special significance, but he felt it was a natural choice to gain control of the situation. It was like having a tactical advantage, with a sense of being able to overlook all the other mountains.

Whether or not having the first move to Tianyuan had an advantage was not the most important thing. In fact, many star map with Tianyuan as the opening was at a disadvantage in the early stages of the game, which was consistent with the research on Tianyuan of the Starry Sky Chess Masters from before.

However, Yun Xi's Tianyuan was based on a high understanding of the entire star map. Even if there was a disadvantage in the early stages, it could be retrieved anytime and anywhere in the later stages. Therefore, Yun Xi always used Tianyuan to start the game when he had the first move.

For Yun Xi, starting the game with Tianyuan was a habit or a belief in occupying the tactical advantage first.

Here it comes!

Here it comes!

When they saw Yun Xi's first move to Tianyuan, the onlookers who didn't understand the truth might have thought he was just following the trend set by the Starry Sky Chess Master, like the other newcomers who admired the Starry Sky Chess Master. However, for the real Immortal in the Pot who suffered a crushing defeat at the hands of Yun Xi, this was a real pressure.

The sound of Tianyuan landing was like a blow to the soul of Immortal in the Pot, bringing enormous shock.

This kid's Tianyuan was completely different from that of the other newcomers.

Immortal in the Pot was sweating profusely as he looked at the completely new star chart, trying to find the most significant pattern.

Obviously, this is an impossible task, which even the highly skilled Starry Sky Chess players cannot achieve, how could Immortal in the Pot, who is also a member of the Stardust Zone, accomplish it?

Finally, based on his long-standing experience and the famous saying "choose the horn to quickly unfold the big picture," he chose to proceed with the "horn."

This time, he must proceed with caution and not think about slaughtering the young, but rather consider this new opponent as a worthy opponent that is evenly matched with himself!

After making this move, Immortal in the Pot unexpectedly noticed that a small pile of sand had already fallen in the hourglass beside him.

When did it start taking him so much time to make his opening move?

Despite being in a state of empowerment of Shaoxian Wine, why is he still so serious?

How long has it been since he experienced the feeling of blood burning throughout his body due to such a precarious situation?

Is this still a game for slaughtering young players?

"Smack!" Yun Xi continued to lay out his strategy, completely ignoring Immortal in the Pot's "horn" piece, instead deploying his troops in the Tianyuan zone.

Do you even know the rules of Starry Sky Chess? Have you not memorized the opening sequences? Immortal in the Pot watched Yun Xi make moves that defied convention, bewildered.

Hasn't your master taught you the basics of Starry Sky Chess?

The first move taking the Tianyuan point, ignoring the corner is a beginner's move!

Could it be that he was defeated by this amateur?

Very well, since you're not following the rules of the game, don't blame me for showing no mercy!

Such arrogant moves will surely lead to bitter consequences. Let me, Immortal in the Pot, show you the power of the standard moves.

"Whack!" This time, Immortal in the Pot played aggressively, attacking the corner to face off against Yun Xi.

"..." Yun Xi looked at the Golden Core cultivator in front of him curiously. Was there really such a need to fight over that corner?

Obviously, soon the vein of the starry sky region would start to weaken irreversibly, causing the power of the chess pieces to become weak as well.

"Hehe!" Seeing Yun Xi's expression, Immortal in the Pot stroked his beard.

What do they mean by "the older the ginger, the spicier it is"? He would soon give this little guy a lesson.

After drinking the Siauxian Wine, his chess skill at least doubled, giving him a certain win this time.

"Snap!" Yun Xi shrugged and continued to consolidate his advantage in the Tianyuan Zone.

It can probably be argued that Cyber Elf Alpha, who once suffered a terrible defeat under Yun Xi's hands, has the right to know the result of Yun Xi's occupation of the Tianyuan Zone.

"This will be the end of me..." This is Cyber Elf Alpha's most common complaint after summarizing their chess experiences with Yun Xi.

Therefore, as long as she can seize the initiative, Cyber Elf Alpha will always take the Tianyuan Zone and never give Yun Xi a chance to open with it.

Unfortunately, this chance is rare. According to statistics, among the approximately one hundred times they had played with the Starry Sky Chess Master to guess who goes first, only around eleven people can win the initiative.

In other words, Starry Sky Chess Master has an 89% chance of opening with the Tianyuan Zone in a hundred consecutive games, a probability that makes many people despair.

"That guy's opening with the Tianyuan Zone is the scariest." This is a rare truth that all the high-level chess players who have the chance to play against the mysterious Starry Sky Chess Master agreed upon.

"Good!" The Immortal in the Pot, who foresaw his own victory and became drunk, was not afraid.

You're obsessed with the Tianyuan Zone, huh? Let me occupy all four corners for you then!

It is obvious that four corners versus one enclosure is a win-lose situation!

Not only was the drunk Real Immortal in the Pot thinking like this, but also the Marshal-level bigwigs watching the game in the Stardust Zone.

"Immortal in the Pot is now steady, four-corner surround tactic, even in a newbie game, there is rarely a game with such a huge difference in chess ability."

"It seems that this newbie called Little Cloud is really a novice. He must have picked up a fluke in the last game."

"I think Immortal in the Pot made a big mistake by himself, otherwise, how could he lose so badly? That game must have been an accident."

"Do you remember, if your chess level is not high enough, it's better not to use the Tianyuan opening. It's a huge disadvantage and as long as the opponent knows how to respond, it will be a sure defeat."

"Gold horn and silver edge with a bundle belly, this is the chess pattern summarized by our ancestors. We must believe in the wisdom of our predecessors."
